NOTICE OF PUBLIC HEARING
DEVELOPMENT PERMITS PROPOSED IN YOUR AREA

Department File:	**509-PA23-05321**
Department File:	**509-PA23-05322**
Department File:	**509-PA23-05323**
Owner/Applicant:	Edward J. King
Agent:	Bill Kloos, Law Office of Bill Kloos
Assessor's Map & Tax Lot:	21-25-12-00-00843, 21-35-07-30-02900, 21-35-07-30-02800
Address:	NA (adjacent to the Oakridge State Airport)
Acreage:	+/- 13.34 acres, 12.05 acres, 13.28 acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zones:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Rural Comprehensive Plan (/RCP)

509-PA23-05321 Proposal: A request for Type II Planning Director Approval of a dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(2)-2.4, House Bill 2225, and RCP Flora & Fauna Policy 11.

509-PA23-05322 Proposal: A request for Type II Planning Director Approval of a dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(2)-2.4 and House Bill 2225, and RCP Flora & Fauna Policy 11.

509-PA23-05323 Proposal: A request for Type II Planning Director Approval of a dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(2)-2.4 and House Bill 2225, and RCP Flora & Fauna Policy 11.

The Lane County Planning Director has elected to process the above Type II applications through a Type III Hearings Official procedure in accordance with Lane Code 14.030(1)(b)(ii)(cc).

The Lane County Hearings Official will conduct an evidentiary public hearing in accordance with Lane Code Chapter 14. **The hearing will be held in hybrid format on Thursday, September 7, 2023, at 9:30 AM** in the Lane County Customer Service Center, Goodpasture Room, 3050 North Delta Highway, Eugene, OR 97408 **and** through the Zoom video conferencing platform. Information for the Zoom attendance option is as follows:

URL: https://us06web.zoom.us/j/89674043984?pwd=NWQ1VFBGaDBIN1Nyd1RqbTNRSDRHUT09

You received this notice because you own property located near the property that is the subject of this notice. Per Lane Code 14.060, Lane County is required to notify you of the evidentiary public hearing of the above-cited proposals so that you have the opportunity to comment and/or participate in the evidentiary public hearing. Lane County is required only to notify the applicant, owner, owners of record of property of adjacent properties per the most recent property tax assessment roll, and other persons identified. You may want to share this notice with others in your neighborhood as some may not be aware of the proposal.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be promptly forwarded to the purchaser.

Enclosed is a vicinity map and site plan for the subject property.

The order of procedure for the conduct of the hearing will generally be as follows:

a. Announcement of the nature and purpose of the hearing
b. Announcement of opportunities for submission of information and appeal.
c. Disclosure of ex parte contacts
d. Report by the Director
e. Applicant's testimony
f. Testimony of persons in favor
g. Testimony of other persons
h. Any additional comments by the Director
i. Applicant rebuttal
j. Conclude the hearing

Failure to raise an issue in a hearing, in person or by writing, or failure to provide statements or evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

The application, all documents and evidence relied upon by the applicant, and the applicable criteria are available for inspection at no cost at the Land Management Division. A copy of the staff report will be available for inspection at no cost at least one week prior to the public hearing. Copies of these materials will be provided at a reasonable cost upon request.

The Land Management Division representatives for these applications and hearing are **Julia Dobberstein** (regarding Department File No. **509-PA23-05321**), who may be contacted by telephone at **541-682-3958** or by email at **julia.dobberstein@lanecountyor.gov** and **Shawna Adams** (regarding Department File No. **509-PA23-05322** & **509-PA23-05323**), who may be contacted by telephone at **541-682-8904** or by email at **shawna.adams@lanecountyor.gov**, for more information or to request a courtesy copy of the Hearings Official decision. Please submit written materials to: Lane County Land Management Division, Attn. Shawna Adams and Julia Dobberstein, 3050 North Delta Highway, Eugene, Oregon 97408. Written materials may be submitted prior to, or during the public hearing.

The meeting location is wheelchair-accessible. Persons needing special accommodation (e.g., hearing impaired, language translation, chemical sensitivity needs, and large print copies of the agenda) are instructed to submit their request at least 48 hours prior to the meeting by calling David Ruiz-Maya at 541-682-6768.

Notice of Complete Land Use Application

Applicant:	**Owner:**	**Agent:**
Edward J. King	E.J.K. Investements	Bill Kloos, Law Office of Bill Kloos
30414 Lebleu Rd.	30414 Lebleu Rd.	375 West 4th St. Suite 204,
Eugene, OR 97405	Eugene, OR 97405	Eugene, OR 97401

File No.:	509-PA23-05321
Received:	May 8, 2023
Deemed Complete:	June 7, 2023
Assessor's Map & Taxlot:	21-25-12-00-00843

Proposal: A request for Director Approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(2)-2.4 and House Bill 2225.

The land use application referenced above has been deemed complete and accepted for processing pursuant to Lane Code (LC) 14.050(1). The Lane County Planning Director has elected to process the above Type II applications through a Type III Hearings Official procedure in accordance with Lane Code 14.030(1)(b)(ii)(cc). Acceptance as a complete application does not involve determining if the application is approvable based on the applicable approval criteria. It is the responsibility of the applicant to demonstrate that the application meets the approval criteria. The information provided by the applicant may or may not be adequate for this purpose.

Staff are required by LC 14.050(1)(d) to mail this written notice to the applicant when an application is deemed complete. Staff will process your application according to LC Chapter 14 Type III procedures. A formal notice of hearing will be sent to the applicant, owner and surrounding property owners in which a hearings official will make a determination about the land use proposal. The tentative hearing date is September 7, 2023.

A land use decision with findings of fact and conditions of approval will then be mailed to the applicant, parties of record and surrounding property owners. Absent an appeal and upon expiration of the 12 day appeal period, your land use decision becomes final.

I am the staff contact for this application unless notice is provided otherwise. If you have any questions concerning this letter or your application, please feel free to contact me, at 541-682-3958 or julia.dobberstein@lanecountyor.gov.

Sincerely,

Julia Dobberstein

Julia Dobberstein, Planner

PROPOSAL: A request for Type II determination for a Template dwelling in the Impacted Forest Lands (F-2) Zone, pursuant to the provisions of Lane Code 16.211(2)-2.4.

REQUIRED SUBMITTALS (Also reference the Application Standards handout)

Lane Code 14.020 (3)(b) Electronic Materials.

(i) When application or appeal materials submitted in hard copy format are over five pages in length, an applicant or appellant must provide an identical electronic version of the submitted materials in addition to a hard copy. Any other party submitting written materials into the record that are over five pages is also encouraged to submit an identical electronic copy. Any electronic materials must be in a format acceptable to the Director. This provision should not be interpreted to prohibit electronic submittals of materials less than five pages in length. The County will scan submitted materials upon request for fee. The County cannot be held responsible for electronic submittals that are not received by the Director or not confirmed by the Director to have been received.

(ii) When electronic materials over five pages in length are submitted by any party for inclusion in an application record, an identical hard copy of the materials must also be submitted unless this requirement is waived by the Director.

Lane Code 14.040 Application Requirements

(1) Minimum Submittal Requirements. Applications for a Type I through Type IV procedure must be submitted on a form provided by the Director, address all applicable standards and criteria, and include the following materials and information:

(a) Applications must include at least one hard copy of all application materials, no larger than 11 inch x 17 inch in size;

(b) All applicable information requested on the application form;

(c) Required filing fee, except that the required filing fee may not be required when Lane County initiates an application;

(d) Signature of each applicant;

(e) Signature of a property owner or property owner's authorized representative;

(f) Proof of property ownership by providing a certified or recorded copy of a deed, or land sale contract, or Lane County Tax Assessor's records;

(g) Assessor's map and tax lot number of the subject property;

(h) A site plan drawn to a standard engineer's scale, and conforming to the County's site plan submittal standards;

A site plan must be included. Refer to the handout entitled "How to prepare your plot plan." Identify nearby driveways. Driveways spacing standards are contained in Lane Code 15.138.

(i) Information demonstrating compliance with any applicable prior decisions and conditions of approval for the subject property;

(j) A written narrative clearly indicating what action is requested and addressing all applicable standards and criteria;

(k) Supporting information required to evaluate the application and address the applicable standards and criteria;

(l) A written statement indicating whether a railroad-highway crossing provides or will provide the only access to land that is the subject of an application; and

Does a railroad-highway crossing provide the only access to the subject property?

Yes ___ No X

(m) Additional information needed to evaluate applicable standards and criteria.

(2) **Fees Required. In addition to any other applicable approval criteria, an approvable Type II or III application must be accompanied by the appropriate filing fee unless the Director authorizes a waiver or reduction to filing fees pursuant to Lane Manual Chapter 60.850.**

(3) **Determination of Application Requirements. The Director may waive any of the requirements of subsection (1) above if deemed to be inapplicable to the application.**

(4) **Applicant's Burden. It is the applicant's responsibility to provide evidence demonstrating that the application complies with all applicable standards and criteria.**

ADDITIONAL INFORMATION REQUESTED FOR THIS APPLICATION:

ZONING F-2 **ACREAGE:** 13.34 acres

DESCRIBE THE ACCESS TO THE PROPERTY (circle the answer):

State Hwy (County Rd) Public Rd Private Easement

Road name: Airport Road

NUMBER OF EXISTING DWELLINGS ON PARCEL: None

EXISTING IMPROVEMENTS: What structures or improvements does the property contain (i.e., outbuildings, roads, driveways, wells, septic tanks, drainfields)? Will any structure or improvement be removed/demolished?

None

PHYSICAL FEATURES: Describe the site.

- The Vegetation on the property: The parcel is mostly open with scattered vegetation of fir, oak and maple trees.
- The Topography of the property: The parcel slopes downhill to the northeast.
- Any Significant Features of the property (steep slopes, water bodies, etc.): None.

APPROVAL CRITERIA

Lane Code 16.211(2) contains the Impacted Forest Lands (F-2) Zone Table of Permitted Uses. Use 2.4, the template dwelling, is subject to (3)(c), (3)(q), (3)(r), (5), and (6).

(3) Use Standards

(c) **A single family "template" dwelling authorized on a lot or parcel located within a forest zone pursuant to the following:**

The subject property must be a lawfully established unit of land:

- Was the property created by a partition or subdivision? List plat number _____
- If not, a final legal lot verification is required prior to submittal of this application. What is the file number for the legal lot verification?

LLV PA08-6330 Notice PA08-6329

(i) If the lot or parcel is predominantly composed of soils that are:

The minimum number of parcels within the template depends on the productivity of the soil type. At least 51% of the acreage of the parcel is composed of soils capable of producing:

____ (1) Less than 50 cubic feet per acre per year: See subsection (aa)

____ (2) 50 to 85 cubic feet per acre per year: See subsection (bb)

__X__ (3) More than 85 cubic feet per acre per year: See subsection (cc)

Soil Type	(Cubic ft/acre/yr)	% of Parcel
Total (must equal 100 %)		

(aa) Capable of producing zero to 49 cubic feet per acre per year of wood fiber if:

(A) All or part of at least <u>three</u> other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(bb) Capable of producing 50 to 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least <u>seven</u> other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(cc) Capable of producing more than 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least <u>11</u> other lots or parcels that existed on January 1, 1993, are within a 160 acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

Include a scaled map and the template used to verify the requirements in (aa), (bb), or (cc) showing the 1993 configuration of the parcels.

How many lots or parcels existed on January 1, 1993? 12

How many dwellings existed on January 1, 1993 and continue to exist? 5

Complete the following table to support your answers on the previous page.

	map and tax lot	deed & date	dwelling date

Include property description cards, which you can obtain from Lane County Assessment & Taxation.

If necessary, see the Planner on Duty for prior partitions/subdivision/legal lot status of surrounding properties. If a property was created via a partition or subdivision, please list that above in the deed/date column. If a legal lot verification was completed on a property, please include the PA# along with the year of creation.

If the dwelling is a manufactured dwelling, provide evidence it was placed on the property prior to January 1, 1993.

(ii) Lots or parcels within urban growth boundaries cannot be used to satisfy the eligibility requirements of subsection (i) above;

(iii) A dwelling, as used in subsection (i) above, is considered to be in the 160-acre template if any part of the parcel is in the 160-acre template;

(iv) Except as provided by subsection (v) below, if the subject tract abuts a road that existed on January 1, 1993, the measurement required in (i) above may be made by creating a 160 acre rectangle that is one mile long and 1/4 mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(v) The following applies where a tract 60 acres or larger abuts a road or perennial stream:

(aa) The measurement must be made in accordance with paragraph (iv). However, one of the three required dwellings must be on the same side of the road or stream as the tract, and:

(A) Be located within a 160-acre rectangle that is one mile long and one-quarter mile wide centered on the center of the subject tract and that is, to the maximum extent possible aligned with the road or stream; or

(B) Be within one-quarter mile from the edge of the subject tract but not outside the length of the 160 acre rectangle, and on the same side of the road or stream as the tract;

(bb) If a road crosses the tract on which the dwelling will be located, at least one of the three required dwellings must be on the same side of the road as the proposed dwelling;

Will you be using the 160 acre rectangle template aligned with the road? Yes X No ___

If yes, is least one of the dwellings used in the dwelling count located on the same side of the road as the proposed dwelling? NA Yes ___ No ___ (If no, you cannot use the rectangle template)

(vi) A proposed "template" dwelling under this section is not allowed:

(aa) Unless no dwellings are allowed on other lots or parcels that make up the tract and deed restrictions established under paragraph (3)(c)(vii) for the other lots or parcels that make up the tract are met; or

(bb) If the tract on which the dwelling will be sited includes a dwelling;

Does the tract contain any other dwellings? Yes ___ No X

(vii) Where other lots or parcels that make up a tract in Subsection (vi):

(aa) The applicant must provide evidence that the covenants, conditions, and restrictions form adopted as "Exhibit A" in OAR chapter 660, division 6 has been recorded with the county clerk of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(bb) The covenants, conditions, and restrictions are irrevocable, unless a statement of release is signed by an authorized representative of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(viii) The Director shall maintain a copy of the covenants, conditions, and restrictions filed in the county deed records pursuant to this section and a map or other record depicting tracts do not qualify for the siting of a dwelling under the covenants, conditions, and

restrictions filed in the county deed records pursuant to this section. The map or other record required by this subsection shall be readily available to the public in the county planning office.

(q) For single-family dwellings, the landowner must sign and record in the deed records for the County a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

If this application is approved, this will be made a condition of approval.

(r) For single-family dwellings, the approval is valid for four years from the date of approval, unless otherwise specified in the approval or by other provisions of Lane Code. Notwithstanding the requirements of LC Chapter 14, an application for a two year extension of the timelines for the permit approval can be made and approved pursuant to LC Chapter 14.

Pursuant to ORS 215.417, this application, if approved, will be valid for four years from the date of approval and one two year extension of the timelines can be made. This will be made a condition of approval.

SITING CRITERIA

(5) Siting Standards for Uses, Activities, and Structures

The following siting criteria apply to all new uses, activities, and structures allowed by LC 16.211. These criteria are designed to make such uses compatible with forest operations, to minimize wildfire hazards and risks and to conserve values found on forest lands. The Director must consider the criteria in this section together with the requirements of Section (6) to identify the building site.

(a) Residences, dwellings, and structures must be sited as follows:

(i) Near dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet from any ravine, ridge or slope greater than 40 percent (40%);

Explain the reason for the proposed location. You must address the following issues:

- How is the new dwelling close to other dwellings on adjacent property? Explain.
  See attached Applicant's Statement
- How is the dwelling near existing roads?
  See attached Applicant's Statement
- Will a new driveway be constructed or will an existing driveway be extended?
  See attached Applicant's Statement
- What is the most level part of the property?
  See attached Applicant's Statement

- What is the area that is least suitable for forest use based on the soil productivity, forest management and forest harvesting practices?

  See attached Applicant's Statement

- Is there a ravine, ridge or slope greater than 40% within 30 feet of the new dwelling?

  See attached Applicant's Statement

(ii) With minimal intrusion into forest areas undeveloped by nonforest uses;

Will the dwelling encroach into a forested area? Or will it be located in an existing developed or open area? Explain how the dwelling location will cause minimal intrusion to forested areas:

See attached Applicant's Statement

(iii) Where possible, when considering LC 16.210(5)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

Is the dwelling within 500 feet of adjoining property zoned F-1? Yes X No ___

If yes, explain:

See attached Applicant's Statement

Is the dwelling within 100 feet of adjoining property zoned F-2 or EFU? Yes ___ No X

If yes, explain:

See attached Applicant's Statement

(iv) The amount of forest lands used to site access roads, service corridors, and structures must be minimized.

Explain how the location of the dwelling and driveway minimize intrusion into the forest. Attach additional pages if necessary.

See attached Applicant's Statement

(b) Setbacks. Structures other than a fence or sign cannot be located closer than:

(i) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(ii) 30 feet from all property lines other than those described in Section (5)(b)(i).

(iii) **The minimum distance necessary to comply Sections (5)(a) and (6).**

Does the property front County Right-of-way? Yes X No ___

If yes, what is the distance from the proposed dwelling to the County Right-of-way? 1200 Feet

How far is the proposed dwelling from the northern property line? 300 Feet

How far is the proposed dwelling from the eastern property line? 400 Feet

How far is the proposed dwelling from the southern property line? 300 Feet

How far is the proposed dwelling from the western property line? 130 Feet

Are these setbacks at least the minimum distance to comply with (5)(a) and (6)?

Yes

(iv) **Riparian Setback Area. A riparian setback area applies to the area (iv) between a line that is 100 feet from and parallel to the ordinary high water of a Class I stream designated in the Rural Comprehensive Plan. No structure other than a fence may be located closer than 100 feet from the ordinary high water of a Class I stream unless a riparian modification application is approved in accordance with LC 16.253(3). Vegetation maintenance, removal, and replacement standards and exceptions to these setbacks are found in LC 16.253.**

Is there a designated Class 1 stream on the property? Yes ___ No X

If yes, how far will the dwelling be from the Class 1 stream? _____ Feet

(c) **Domestic Water Supplies. For new dwellings and non-farm structures on vacant land, evidence must be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant must provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(5)(c) above, evidence of domestic water supply means:**

(i) **Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;**

(ii) **A water use permit issued by the Water Resources Department for the use described in the application; or**

(iii) **Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant must submit the well constructor's report to the Director upon completion of the well.**

What is your proposed water source (check the answer):

Private Well X Community System ___ Public system ___

Describe: Existing wells on nearby properties show adequate supply of water available for parcel. See attached Exhibit M

For a community or public system, do you have written verification the provider can serve your dwelling?

Yes ___ No ___ If yes, include a copy with this application.

Do you have a water use permit (well log) for an existing well, issued by the Water Resources Department? Yes ___ No X

If yes, include a copy with this application. Copies can be obtained by searching for groundwater data at the following website: https://www.oregon.gov/OWRD/pages/index.aspx

(d) As a condition of approval, if road access to the dwelling is by a road owned and maintained by a private party or by the Oregon Department of Forestry, the U.S. Bureau of Land Management, or the U.S. Forest Service, then the applicant must provide proof of a long-term road access use permit or agreement. The road use permit may require the applicant to agree to accept responsibility for road maintenance.

(e) Approval of a dwelling is subject to the following requirements:

(i) Approval of a dwelling requires the owner of the tract to plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in department of Forestry administrative rules.

(ii) The Director must notify the County Assessor of the above condition at the time the dwelling is approved.

(iii) Stocking survey report:

(aa) If the lot or parcel is more than ten acres, the property owner must submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(bb) Upon notification by the Assessor, the Department of Forestry will determine whether the tract meets minimum stocking requirements of the Forest Practices Act. If the Department of Forestry determines that the tract does not meet those requirements, that department will notify the owner and the Assessor that the land is not being managed as forest land. The Assessor will then remove the forest land designation pursuant to ORS 321.359 and impose the additional tax.

If this proposal is approved, (d) and (e) above will be made conditions of approval.

(6) Fire-Siting Standards for Dwellings and Structures

The following fire-siting standards or their equivalent apply to new residences, dwellings, manufactured dwellings, or structures allowed in Lane Code 16.211:

(a) The dwelling must be located upon a parcel within a fire protection district or must be provided with residential fire protection by contract. If the dwelling is not within a fire protection district, the applicant must provide evidence that the applicant has asked to be included within the nearest such district. If the Director determines that inclusion within a fire protection district or contracting for residential fire protection is impracticable, the dwelling must comply with the following fire safety plan requirements:

Is the property within a fire district? Yes X No ___ If yes, go to (b) below.

If the property is not within a fire district, you have two options (choose one):

____ (A) Submit evidence of a long term services contract with the nearest fire district and request annexation into the fire district, or

____ (B) Develop a Fire Protection Plan. It must comply with standards in (i) - (v) below. The Fire Protection Plan will be verified as a Condition of Approval, but it is recommended that you submit the plan with this application.

(i) The means selected may include a fire sprinkling system, onsite equipment and water storage or other methods that are reasonable, given the site conditions;

(ii) If a water supply is required for fire protection, it must be a swimming pool, pond, lake, or similar body of water that at all times contains at least 4,000 gallons or a stream that has a continuous year round flow of at least one cubic foot per second;

(iii) The applicant must provide verification from the Water Resources Department that any permits or registrations required for water diversion or storage have been obtained or that permits or registrations are not required for the use;

(iv) Road access must be provided to within 15 feet of the water's edge for firefighting pumping units. The road access must accommodate the turnaround of firefighting equipment during the fire season. Permanent signs must be posted along the access route to indicate the location of the emergency water source; and

(v) A 100-foot wide primary safety zone and a 100-foot wide secondary safety zone surrounding the perimeter of the dwelling or manufactured dwelling structures must be provided and maintained in perpetuity in compliance with the standards in (6)(c).

(b) Fire Safety Design Standards for Roads and Driveways.

(i) Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for firefighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways must comply with the standards specified below. Evidence of compliance with the standards specified in (6)(b) should include objective information about the firefighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

Attach to this application objective information demonstrating compliance or feasibility of compliance with Lane Code 16.211(6)(b)(i), including:

X Itemized list of firefighting equipment. Obtain from the fire district (if applicable).

X Description and evidence of physical nature of access or driveway route. Topography maps, photos, or other evidence may be included in the application.

See attached Applicant's Statement

X Description of proposed improvements to access or driveway route. Design drawings may be included in the application.

See attached Applicant's Statement

In addition to the above items, the application may also include:

____ A preliminary written verification of compliance from the agency providing fire protection, or a preliminary written certification of compliance from an Oregon Registered Professional Engineer. However, please note that such certification will also be made a condition of approval to verify final access and/or driveway construction.

The standards below will be a condition of approval and will be verified by staff.

(ii) Road and Driveway Surfaces. Roads must have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways must have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and must have a vertical clearance of 13 feet 6 inches.

Will an existing driveway be extended to serve the new dwelling? Yes X No ___

Will there be a new driveway in a new location? Yes X No ___

(iii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County must meet these standards for turnarounds. Dead-end roads must have turnarounds spaced at intervals of not more than 500 feet. Turnarounds must comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) must intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They must be constructed to the standards for driveways in LC 16.211(6)(b)(i) above and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds must have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(cc) No cul-de-sacs or hammerhead turnarounds must be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

Are you proposing a dead-end road? Yes ___ No X

Is it over 200 feet long? Yes ___ No ___

If yes, it must contain turnouts. Explain: _____

See attached Applicant's Statement

(iv) Bridges and Culverts. Bridges and culverts must be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width

surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Will the new driveway or extension of the driveway contain any culverts or bridges? Yes ___ No X

If yes, explain: _____

_____

(v) **Road and Driveway Grades. Road and driveway grades cannot exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment and water supply.**

Will the road or driveway contain any slopes in excess of 8%? Yes ___ No X

If yes, explain: _____

_____

(vi) **Identification. Roads must be named and addressed in compliance with LC 15.305 through 15.335.**

Please be advised that staff will evaluate the route of the road serving your dwelling, from the homesite back to the public road to which it connects. Staff will determine if the road is to be named, per LC 15.312 and LM 15.015(3).

(vii) **Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet must provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.**

The driveway must be 12 feet wide. How wide is the driveway? 12'

Is it over 200 feet long? Yes X No ___

If yes, it must contain turnouts. Turnouts are not required if the driveway is 16 feet wide.

Will the driveway have turnouts? Yes X No ___

Will the driveway be 16 feet wide? Yes ___ No X

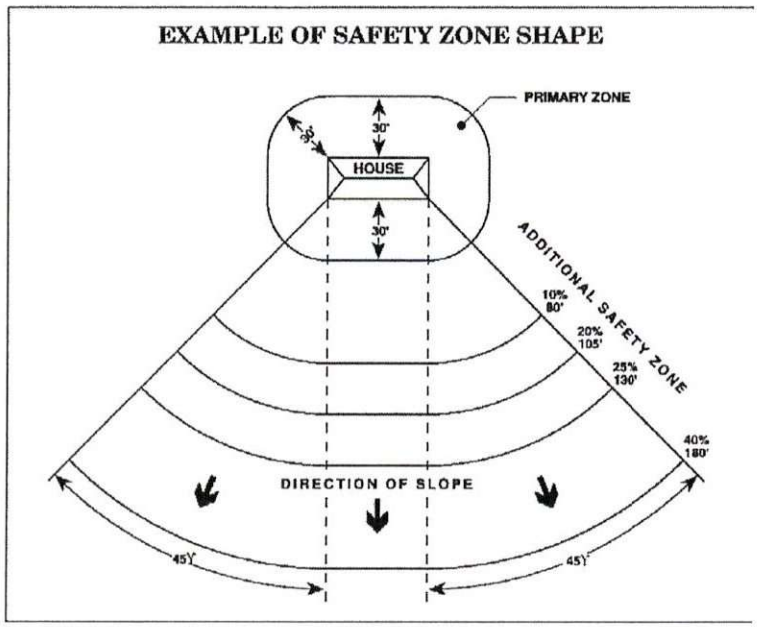
(viii) **Modifications and Alternatives. The standards in (6)(b)(i) through (6)(b)(vii) above may be modified by the approval authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for firefighting equipment from its point of origination to its point of destination.**

Are you proposing any modifications or alternatives to the road or driveway standards? If yes, explain. Attach additional pages of necessary.

None.

(c) **Fuel-Free Breaks. The owners of dwellings and structures must maintain a primary safety zone surrounding all structures and clear and maintain a secondary safety zone on land surrounding the dwelling that is owned or controlled by the owner in compliance with these requirements.**

(i) **Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures, unless otherwise specifically stated in LC 16.211. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees must be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation must be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) must be placed next to the house.**



(aa) **As slope increases, the primary safety zone must increase away from the house, parallel to the slope and down the slope, as shown in the table and figure below:**

The new dwelling must be surrounded by a 30 foot primary safety zone. If the dwelling is on a slope, the safety zone will increase, as shown in the table.

Table 16.211-2 Minimum Primary Safety Zone

Slope	Feet of Primary Safety Zone	Feet of Additional Primary Safety Zone Down Slope
0%	30	0
10%	30	50
20%	30	75
25%	30	100
40%	30	150

Figure 16.211-1

(ii) Secondary Safety Zone. The secondary safety zone is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary safety zone is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary safety zone must be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees must be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels must be removed.

The secondary fuel break must be established an additional 100 feet from the primary safety zone, but only on property you own.

* Show the fuel breaks on the site plan. If approved, the primary safety zone and the secondary fuel break will be verified as a condition of approval. Contact staff (541-682-3577) or visit the Planning website (www.lanecounty.org/planning) for details regarding fire break standards.

* The establishment and maintenance of fuel breaks within the Riparian Setback Area must comply with the applicable requirements of Lane Code 16.253.

(d) The dwelling must have a fire retardant roof.

(e) Dwellings or manufactured dwellings must be sited at least 30 feet away from a ravine, ridge, or any slope greater than 40 percent slope.

Substantial evidence may need to be submitted with the application to determine slope. This could include photos, slope calculations, and/or evidence from a private engineer or surveyor such as a stamped site plan. What is the slope of the land within 30 feet of the dwelling? less than 10%

(f) If the dwelling has a chimney or chimneys, each chimney must have a spark arrester.

If the proposal is approved, (d) and (f) above will be made conditions of approval and will be verified by staff.

Applicant's Supplemental Narrative

LC 16.211(3)(c) A single family "template" dwelling authorized on a lot or parcel located within a forest zone pursuant to the following:

(i) If the lot or parcel is predominantly composed of soils that are:
(aa) Capable of producing zero to 49 cubic feet per acre per year of wood fiber if:
(A) All or part of at least three other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and
(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

RESPONSE: Not applicable.

(bb) Capable of producing 50 to 85 cubic feet per acre per year of wood fiber if:
(A) All or part of at least three other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and
(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

RESPONSE: Not applicable.

(cc) Capable of producing more than 85 cubic feet per acre per year of wood fiber if:
(A) All or part of at least three other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and
(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

RESPONSE: Not applicable. The subject property is predominately comprised of soils capable of producing more than 85 cubic feet per acre per year of wood fiber. 75% of the subject property is comprised of soil map unit 63D Jory capable of producing 178 cubic feet per acre per year of wood fiber as documented in the Lane County Soil Ratings for Forestry August 2011 Update. Exhibits G & T.

(ii) Lots or parcels within urban growth boundaries cannot be used to satisfy the eligibility requirements of subsection (i) above;

RESPONSE: No parcels used to satisfy the eligibility requirements are within the Urban Growth Boundary of Oakridge – Westfir. Exhibit B.

(iii) A dwelling, as used in subsection (i) above, is considered to be in the 160-acre template if any part of the parcel is in the 160-acre template;

RESPONSE: The 5 dwellings relied upon for eligibility are on parcels that are at least partially in the boundaries of the 160-acre template.

(iv) ***Except as provided by subsection (v) below, if the subject tract abuts a road that existed on January 1, 1993, the measurement required in (i) above may be made by creating a 160 acre rectangle that is one mile long and 1/4 mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;***

RESPONSE: The subject property abuts a County Road, Airport Road. The applicant has chosen to use a 160-acre rectangle that is one mile long and 1/4 mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road. An alternate road alignment template map is also provided to demonstrate conformance with the requirements. Exhibit J1 and J2.

(v) ***The following applies where a tract 60 acres or larger abuts a road or perennial stream:***
(aa) The measurement must be made in accordance with paragraph (iv). However, one of the three required dwellings must be on the same side of the road or stream as the tract, and:
(A) Be located within a 160-acre rectangle that is one mile long and one-quarter mile wide centered on the center of the subject tract and that is, to the maximum extent possible aligned with the road or stream; or
(B) Be within one-quarter mile from the edge of the subject tract but not outside the length of the 160 acre rectangle, and on the same side of the road or stream as the tract;
(bb) If a road crosses the tract on which the dwelling will be located, at least one of the three required dwellings must be on the same side of the road as the proposed dwelling;

RESPONSE: Not applicable. The subject property is less than 60 acres in size.

(vi) ***A proposed "template" dwelling under this section is not allowed:***
(aa) Unless no dwellings are allowed on other lots or parcels that make up the tract and deed restrictions established under paragraph (3)(a)(iii) for the other lots or parcels that make up the tract are met; or
(bb) If the tract on which the dwelling will be sited includes a dwelling;

RESPONSE: Not applicable. The subject property is vacant. The tract consists of only one parcel.

(vii) ***Where other lots or parcels that make up a tract in Subsection (vi):***
(aa) The applicant must provide evidence that the covenants, conditions, and restrictions form adopted as "Exhibit A" in OAR chapter 660, division 6 has been recorded with the county clerk of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(bb) The covenants, conditions, and restrictions are irrevocable, unless a statement of release is signed by an authorized representative of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

RESPONSE: Not applicable. The subject tract consists of only one parcel.

(viii) The Director shall maintain a copy of the covenants, conditions, and restrictions filed in the county deed records pursuant to this section and a map or other record depicting tracts do not qualify for the siting of a dwelling under the covenants, conditions, and restrictions filed in the county deed records pursuant to this section. The map or other record required by this subsection shall be readily available to the public in the county planning office.

RESPONSE: Not applicable. The subject tract consists of only one parcel.

OAR 660-006-0027 (6)(h) If the lot or parcel on which the dwelling will be sited was part of a tract on January 1, 2019, no dwelling existed on the tract on that date, and no dwelling exists or has been approved on another lot or parcel that was part of the tract.

RESPONSE: The subject property was not part of a tract on January 1, 2019. Exhibit H.

LC 16.211(5) Siting Standards for Uses, Activities, and Structures
The following siting criteria apply to all new uses, activities, and structures allowed by LC 16.211. These criteria are designed to make such uses compatible with forest operations, to minimize wildfire hazards and risks and to conserve values found on forest lands. The Director must consider the criteria in this section together with the requirements of Section (6) to identify the building site.

RESPONSE: The above provision requires that the standards of subsections (a) through (b) below be weighed together with the requirements of Section (6) below to determine the building site. As discussed below, placement of the dwelling at the site is the building site that best meets the above objectives.

(a) Residences, dwellings, and structures must be sited as follows:

(i) Near dwellings on other tracks, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent (40%);

RESPONSE:
Near other dwellings: The dwelling site is located in the west portion of the parcel. The area is sparsely settled with dwellings. The proposed dwelling site is located approximately 1000 feet from the house to the east which is the nearest in any direction on Map 21-35-18 Tax lot 914. The site is as close to dwellings on other tracts as it can be while respecting the configuration of the parcel and the proximity of the airport.

Near existing roads: The homesite is located immediately adjacent to an existing timber road extending through the parcel from Airport Road. See Exhibits A & D – Site Plan and Aerial.

On the most level part of the tract. The tract slopes down to the northeast. See Exhibits S & X. Based on these materials, the dwelling site is on the most level portion of the tract, especially when this provision is balanced with other provisions, such as setbacks, access, slopes, and minimal intrusion into forested areas.

On the least suitable portion of the tract for forest use: The entire area of the parcel not underneath the approach surface of the Oakridge airport is comprised of Soil Map Unit Jory (63D) with a forest productivity ratings of at least 178 cu.ft./ac/yr. There is no ability to construct the home within an area of less forest productivity. Exhibit T. Soils are not determinative of forestry suitability, but are relevant. When balanced with other standards, the dwelling site is located on the least suitable portion of the tract for forest use.

At least 30 feet from any ravine, ridge or slope greater than 40%. There are no ravines, ridges or slopes greater than 40% within 30 feet of the site. See Exhibit S –LIDAR

(ii) With minimal intrusion into forest areas undeveloped by nonforest uses;

RESPONSE: The size and configuration of the parcel, combined with the proximity of the Oakridge Airport with the accompanying Approach Surface, severely limit the available locations for the homesite. The placement has been determined by the necessity for adequate fuel breaks and access. The dwelling site accomplishes this.

(iii) Where possible when considering LC 16.211(5)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

RESPONSE: The subject property is bordered by property zoned F-1 to the west and south. Property to the north is zoned F-2 and AO. The dwelling site is setback 130 feet and 290 feet from the south and west property lines respectively (the directions of the F-1 properties). The north-south dimension of the parcel is only 550 feet which limits the ability to achieve a setback of 500 feet from the south property line and still achieve an adequate area for fuel breaks. The homesite is centered in the east-west direction below the area impacted by the Airport Approach Surface restrictions.

(iv) The amount of forest lands used to site access roads, service corridors, and structures must be minimized.

RESPONSE: The site will be accessed in part by an existing access road that serves the BPA power line easement and will be shared by easement by two parcels to the northeast, Map 21-35-07-30 Tax lots 2800 and 2900. The roadway will be constructed to county standards. Service corridors for utilities will run adjacent to the proposed roadway and driveway. Thus, the use of the existing roadway assures the amount of forestland used to site roads and services will be

minimized.

(b) Setbacks. Structures other than a fence or sign cannot be located closer than:

(i) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(ii) 30 feet from all property lines other than those described in Section (5)(b)(i).

(iii) The minimum distance necessary to comply Sections (5)(a) and (6).

RESPONSE: The dwelling site is at least 30 feet from all property lines and more than 20 feet from Airport Road. See Site Plan. (5)(a) and (6). See Site Plan.

(iv) Riparian Setback Area. A riparian setback area applies to the area between a line that is 100 feet from and parallel to the ordinary high water of a Class I stream designated in the Rural Comprehensive Plan. No structure other than a fence may be located closer than 100 feet from the ordinary high water of a Class I stream unless a riparian modification application is approved in accordance with LC 16.253(3). Vegetation maintenance, removal, and replacement standards and exceptions to these setbacks are found in LC 16.253.

RESPONSE: No Class I Stream is within 100 feet of the subject property. See Exhibit R.

(c) Domestic Water Supplies. For new dwellings and non-farm structures on vacant land, evidence must be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant must provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(5)(c) above, evidence of domestic water supply means:

(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or

(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant must submit the well constructor's report to the Director upon completion of the well.

RESPONSE: The applicant will drill a new well. Based on well log data for nearby wells, particularly well LANE 4467 located on the adjacent property Map 21-35-18 Tax lot 914, Exhibit M – Water Resources Well Records, there is sufficient proof to make a conclusion that

there is a feasible domestic water supply available. The subject property is exempt under ORS 537.545, and agrees to submit the required report once the well is complete.

.

(d) As a condition of approval, if road access to the dwelling is by a road owned and maintained by a private party or by the Oregon Department of Forestry, the U.S. Bureau of Land Management, or the U.S. Forest Service, then the applicant must provide proof of a long-term road access use permit or agreement. The road use permit may require the applicant to agree to accept responsibility for road maintenance.

RESPONSE: Road access to the subject property is provided by a Rural Local County Road – Airport Road.

(e) Approval of a dwelling is subject to the following requirements:

(i) Approval of a dwelling requires the owner of the tract to plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in department of Forestry administrative rules.

(ii) The Director must notify the County Assessor of the above condition at the time the dwelling is approved.

(iii) Stocking survey report:

(aa) If the lot or parcel is more than ten acres, the property owner must submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(bb) Upon notification by the Assessor, the Department of Forestry will determine whether the tract meets minimum stocking requirements of the Forest Practices Act. If the Department of Forestry determines that the tract does not meet those requirements, that department will notify the owner and the Assessor that the land is not being managed as forest land. The Assessor will then remove the forest land designation pursuant to ORS 321.359 and impose the additional tax.

RESPONSE: It is feasible to demonstrate \conformance with this requirement as a condition of approval.

(f) Signs.

(i) Signs cannot extend over a public right-of-way or project beyond the property line;

(ii) Signs cannot be illuminated, flashing, blinking, contain scrolling images, or capable of movement; and

(iii) Signs are to be limited to 200 square feet in area.

RESPONSE: No signs are proposed.

(6) Fire-Siting Standards for Dwellings and Structures

The following fire-siting standards or their equivalent apply to new residences, dwellings,

manufactured dwellings, or structures allowed in Lane Code 16.211:

(a) The dwelling must be located upon a parcel within a fire protection district or must be provided with residential fire protection by contract. If the dwelling is not within a fire protection district, the applicant must provide evidence that the applicant has asked to be included within the nearest such district. If the Director determines that inclusion within a fire protection district or contracting for residential fire protection is impracticable, the dwelling must comply with the following fire safety plan requirements:

(i) The means selected may include a fire sprinkling system, onsite equipment and water storage or other methods that are reasonable, given the site conditions;

(ii) If a water supply is required for fire protection, it must be a swimming pool, pond, lake, or similar body of water that at all times contains at least 4,000 gallons or a stream that has a continuous year round flow of at least one cubic foot per second;

(iii) The applicant must provide verification from the Water Resources Department that any permits or registrations required for water diversion or storage have been obtained or that permits or registrations are not required for the use;

(iv) Road access must be provided to within 15 feet of the water's edge for firefighting pumping units. The road access must accommodate the turnaround of firefighting equipment during the fire season. Permanent signs must be posted along the access route to indicate the location of the emergency water source; and

(v) A 100-foot wide primary safety zone and a 100-foot wide secondary safety zone surrounding the perimeter of the dwelling or manufactured dwelling structures must be provided and maintained in perpetuity in compliance with the standards in (6)(c).

RESPONSE: The parcel is located within the Hazeldell Rural Fire Protection District which has an intergovernmental agreement (IGA) with the Oakridge Fire Protection District to respond to all emergency calls. The proposed shared road and driveway will be improved to the applicable Lane Code 16.211 fire standards. See Exhibit A. The route of access from the Fire District located at 47592 Hwy 58 is by way of a State Highway (58) for a distance of 1 mile to Airport Road (County road). Airport Road is paved for the entire ¾ mile length to get to the subject property.

(b) Fire Safety Design Standards for Roads and Driveways.

(i) Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for firefighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways must comply with the standards specified below. Evidence of compliance with the standards specified in (6)(b) should include objective information about the firefighting equipment, the physical nature of the access route, the nature of any proposed improvements to

the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

RESPONSE: The subject property is within a fire district. The proposed shared road and driveway will be improved to the applicable Lane Code 16.211 fire standards. See Exhibit A. The route of access from the Fire District located at 47592 Hwy 58 is by way of a State Highway (58) for a distance of 1 mile to Airport Road (County road). Airport Road is paved for the entire ¾ mile length to get to the subject property.

(ii) Road and Driveway Surfaces. Roads must have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways must have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and must have a vertical clearance of 13 feet 6 inches.

RESPONSE: Access to the site is from Airport Road via an existing shared easement road and a driveway that will be improved to Lane Code 16.211 standards. Exhibit A. It is feasible to construct the road and driveway to the above county standards.

(iii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County must meet these standards for turnarounds. Dead-end roads must have turnarounds spaced at intervals of not more than 500 feet. Turnarounds must comply with these design and construction standards:
(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) must intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They must be constructed to the standards for driveways in LC 16.211(6)(b)(i) above and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or
(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds must have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and
(cc) No cul-de-sacs or hammerhead turnarounds must be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the

chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

RESPONSE: Turn arounds within the road portion of the shared access are illustrated on Exhibit A at intervals of not more than 500 feet. A turn around will be provided at the dwelling,

(iv) Bridges and Culverts. Bridges and culverts must be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

RESPONSE: No bridges are required or existing. No new culverts are proposed. However, if any are needed, the applicant agrees to install per the above.

(v) Road and Driveway Grades. Road and driveway grades cannot exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment and water supply.

RESPONSE: The proposed shared roadway and driveway can be constructed on slopes not exceeding 16%.

(vi) Identification. Roads must be named and addressed in compliance with LC 15.305 through 15.335.

RESPONSE: This is instructional.

(vii) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet must provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

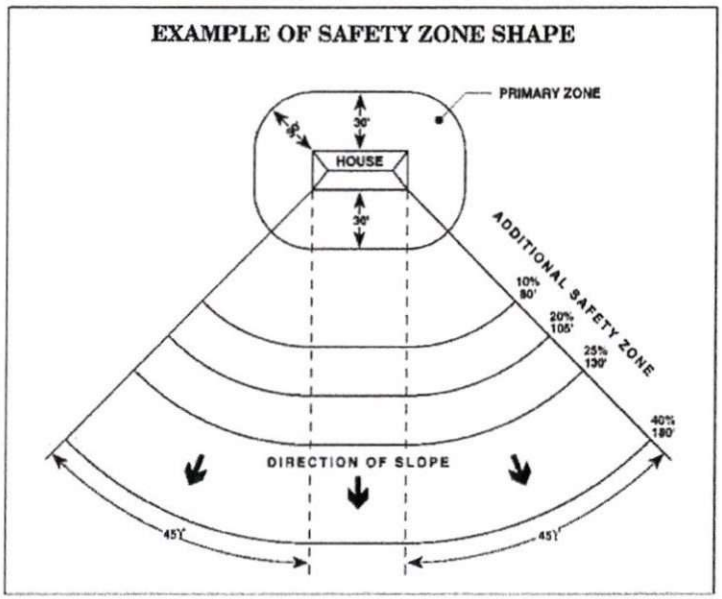
RESPONSE: The driveway portion of the access is roughly 450 feet in length to the home site. See site plan, Exhibit A. Based on topography, it is possible to provide the necessary 1 turnout. A turn around will be provided at the dwelling, Exhibit A.

(viii) Modifications and Alternatives. The standards in (6)(b)(i) through

(6)(b)(vii) above may be modified by the approval authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for firefighting equipment from its point of origination to its point of destination.

RESPONSE: Not applicable.

(c) Fuel-Free Breaks. The owners of dwellings and structures must maintain a primary safety zone surrounding all structures and clear and maintain a secondary safety zone on land surrounding the dwelling that is owned or controlled by the owner in compliance with these requirements.



(i) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures, unless otherwise specifically stated in LC 16.211. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees must be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation must be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) must be placed next to the house.

(aa) As slope increases, the primary safety zone must increase away from the house, parallel to the slope and down the slope, as shown in the table and figure below:

Table 16.211-2 Minimum Primary Safety Zone

Slope	Feet of Primary Safety Zone	Feet of Additional Primary Safety Zone Down Slope
0%	30	0
10%	30	50
20%	30	75
25%	30	100
40%	30	150

Figure 16.211-1

RESPONSE: The site slopes downward to the northeast. There are slopes greater than 20% within 30 feet of the dwelling site. The applicant has provided a 30-foot primary fuel break, plus an additional 75' primary fuel break in the northeast direction. See Exhibit A - Site Plan. There are no slopes in excess of 40% within 30 feet of the home site.

> ***(ii) Secondary Safety Zone. The secondary safety zone is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary safety zone is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary safety zone must be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees must be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels must be removed.***

RESPONSE: The proposed dwelling site will have a full secondary fuel break in all directions around the primary safety zone.

> ***(d) The dwelling must have a fire retardant roof.***

RESPONSE: This is instructional.

> ***(e) Dwellings or manufactured dwellings must be sited at least 30 feet away from a ravine, ridge, or any slope greater than 40 percent slope.***

RESPONSE: There are no slopes in excess of 40% within 30 feet of the home site. See Exhibit S.

(f) If the dwelling has a chimney or chimneys, each chimney must have a spark arrester.

RESPONSE: This is instructional.

Re: Forest Template Dwelling Application
E.J. King Investments
Map 21-25-12, TL 00843

Dear Lane County:

This is an application for a forest template dwelling. This same application was filed several years ago. However, prior to a decision by the Planning Director, the Land Use Board of Appeals (LUBA) interpreted RCP Goal 5 Policy 11. Based on that LUBA decision, the application was withdrawn, along with many others.

LUBA was forced to interpret Policy 11 on its own in the absence of an interpretation of Policy 11 by the County Board. LUBA interpreted Policy 11 to mean that the ODFW recommended minimum acreages for Big Game Habitat must be applied directly to forest template dwelling applications. See *King v. Lane County*, __ Or LUBA __ (LUBA Nos. 2021-047/052, Oct. 15, 2021), *aff'd without opinion* 317 Or App 136, 501 P3d 1058 (2022). The interpretation by LUBA was required because Policy 11 is ambiguous – that is, it is subject to multiple, plausible interpretations. LUBA explained: "[T]he text of Policy 11 is ambiguous and requires interpretation to determine how to apply the ODFW density limitations* * * *" Slip op 22.

Recent decisions by LUBA and the Court of Appeals have determined that, based on a statute relating to housing, ambiguous standards in county plans and codes may not be applied at all in reviewing applications related to housing, such as this one. The relevant statute is ORS 197.307(4) which provides: "Except as provided in subsection (6) of this section, a local government may adopt and apply only clear and objective standards, conditions and procedures regulating the development of housing, including needed housing."

There are several recent cases involving this statute. The decision that is most directly on point is *Community Participation Organization 4M v. Washington County*, __ Or LUBA __ (No. 2020-110, Sept. 29, 2021), which confirmed that the requirement in ORS 197.307(4) to apply only clear and objective standards applies to <u>all housing</u>, including housing outside of UGBs. LUBA explained, Slip op 16-17:

> "The county contends that ORS 197.307(4) does not require clear and objective standards for the development of housing outside a UGB. The county Is mistaken. As we explained above, SB 1051 amended ORS 197.307 and enlarged the clear and objective requirement by removing the previous requirements that the

> proposed development of housing be on buildable land" and that it be for "needed housing." By its terms, the clear and objective requirement applies to "the development of housing, including needed housing." ORS 197.307(4). The applicability of ORS 197.307(4) is not confined to areas within a UGB by the definition of needed housing in ORS 197.303(1)."

A more comprehensive treatment of how this statute now applies, including to this application, is found in *Warren v. Washington County*, __ Or LUBA __ (No. 2018-089, Nov, 14, 2018), *aff'd* 296 Or App 595, 439 P3d 581 (March 20, 2019), which involved county approval of a six-lot subdivision on rural land with a Goal 5 resource protection. Both LUBA and the Court of Appeals discussed the 2017 amendments to the statute in detail and concluded that the statute now applies to any housing proposal, whether or not the land is inventoried as "buildable land." As the Court of Appeals concluded, *id.* at 598:

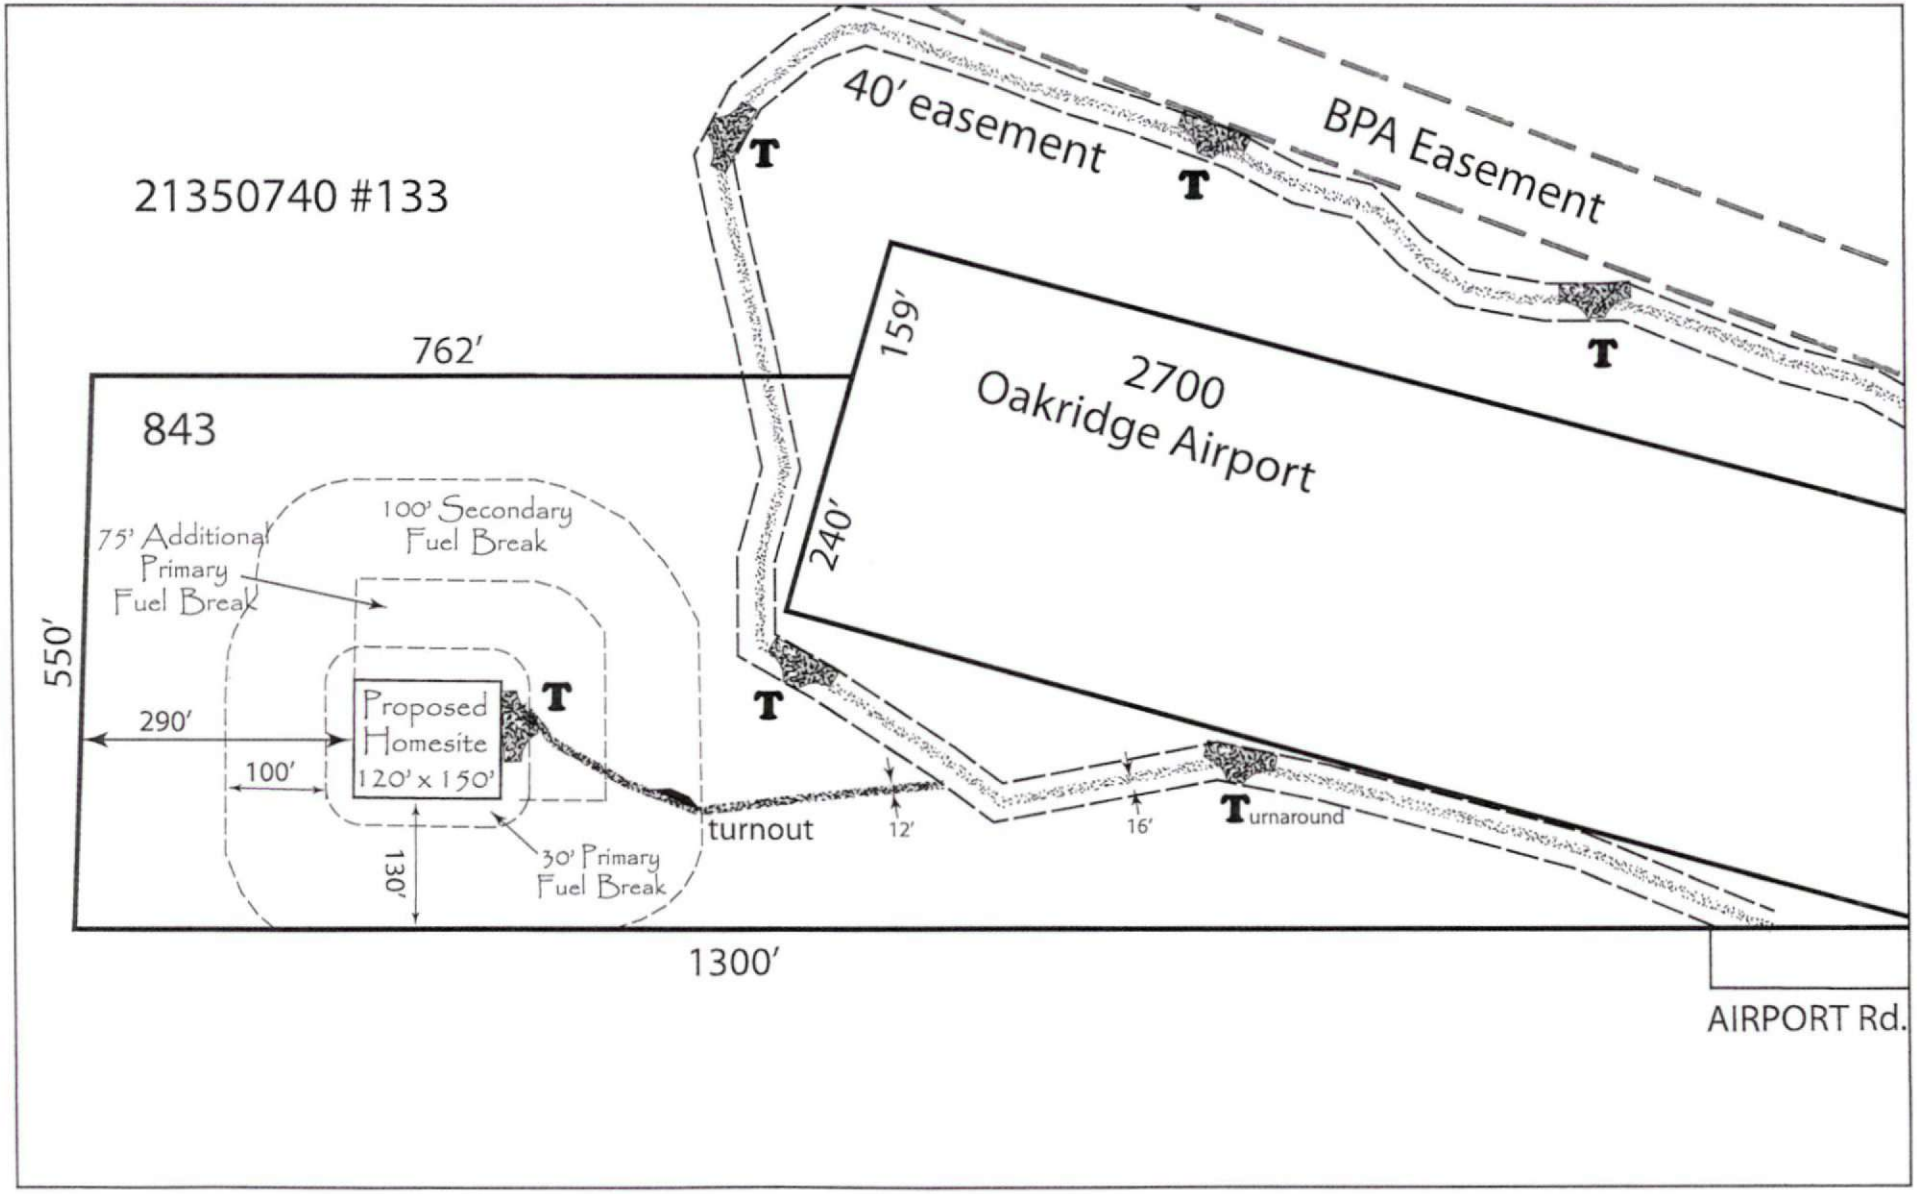
> "Thus, ORS 197.307(4) no longer refers to "buildable land," and, by its terms, provides that local government can regulate the development of housing only through clear and objective standards, conditions, and procedures."

This is a proposal to develop housing on rural resource land. Based on ORS 197.307(4), the County is prohibited from applying any standard that is not clear and objective. That includes RCP Plan Goal 5 Policy 11, which LUBA has correctly determined is ambiguous. As a final note, opponents of this application may say that the Policy is no longer ambiguous because LUBA stated an interpretation. That view is fatally facile. LUBA interpreted the policy because it is ambiguous; picking one among multiple plausible interpretations does not make the policy clear and objective. It remains ambiguous on its face. It is the ambiguity that drives the need for an interpretation; the interpretation does not negate the ambiguous character of the policy.

As a final note, this application should be treated by the County the same way that the Hearings Official treated an application for a Relative Farm Help Dwelling on EFU land. See *Helsel*, PA 21-05928 (March 30, 2023). There the Hearing Official approved the dwelling use over the objections of LandWatch for the reason that none of the standards pressed by LandWatch for a denial is clear and objective and, thus, were not a basis for denial.

> "LandWatch contends that the application fails to satisfy the following approval criteria: that the farm operation qualifies as a 'commercial' farm operation; whether the operation is 'existing.' As opposed to planned; and that help on the farm from the relative is 'necessary' or 'needed.' As asserted by the applicants, all of the approval criteria that form the basis of these arguments are not clear and objective. Accordingly, pursuant to state law and the needed housing statute, they

cannot be applied to the subject application." *Helsel* at 6.



Sincerely,

Bill Kloos

Property Values & Taxes

The values shown are the values certified in October unless a value change has been processed on the property. Value changes typically occur as a result of appeals, clerical errors and omitted property. The tax shown is the amount certified in October. This is the full amount of tax for the year indicated and does not include any discounts offered, payments made, interest owing or previous years owing. It also does not reflect any value changes.

	Real Market Value (RMV)			Total Assessed Value	Tax

THIS INDENTURE WITNESSETH, That the Grantor, EDWARD HINES LUMBER CO., a corporation duly organized and existing under and by virtue of the laws of the State of Delaware and duly authorized to transact business in the State of Oregon, and pursuant to authority given by the Board of Directors of said corporation, conveys unto the State of Oregon, through its Board of Aeronautics, for public purposes and as a gift, all that property situated in Lane County, Oregon, for an airport to be known as the Oakridge Airport and described as:

> Edward Hines Lumber Co. property in Section 7, Township 21 South, Range 3 East and Section 12, Township 21 South, Range 2 East of the Willamette Meridian, Lane County, Oregon; Beginning at a point formed by the intersections of the Centerline of the proposed Oakridge Airport Runway and the South Line of Section 7, Township 21 South, Range 3 East of the Willamette Meridian, Lane County, Oregon, said point being 1409.02 feet South 89° 43' East from the Southwest Corner of said Section 7; thence South 89° 43' East 811.56 feet along the South Line of said Section 7; thence North 75° 27' West 2802.12 feet; thence South 14° 33' West 400.00 feet; thence South 75° 27' East 1229.04 feet to the South Line of said Section 7; thence South 89° 43' East along the South Line of said Section 7, 811.56 feet to the place of beginning, containing 18.51 acres more or less. All the bearings above referred to are based on true bearings as obtained from solar observations. (See attached map),

and covenants that GRANTOR is the owner of the above described property free and clear of all encumbrances, and will warrant and defend the same against all persons who may lawfully claim the same; provided however that if said property is not utilized for airport purposes it shall revert to the GRANTOR or its assigns.

IN WITNESS WHEREOF, said GRANTOR has caused its corporate seal to be hereto affixed and has caused its name to be signed to these presents by its Executive Vice President and attested by its Assistant Secretary this 1st day of May, 1967.

DECLARATION OF PROPERTY LINE ADJUSTMENT

Crown Properties, LLC, is the owner of several tracts of land, which where conveyed to Crown Properties LLC, by a deed conveyance as recorded on Document Number 2006-038355, with the Lane County Oregon Deeds and Records, Lane County Oregon. One of the Tracts within the conveyance is the MITCHELL TRACT, which contain 4 parcels of land. Each of the 4 parcels of land have been previously determined to be a legal lot for building purposes by the governing authority, being Lane County Planning Department, with the office at the Lane County Oregon County Courthouse, in Eugene, Oregon.

Crown Properties, LLC, being the owners of the MITCHELL TRACTS are going to record 5 consecutive property line adjustment deeds to show the movement of the common line between the 4 parcels of land.

This is the fifth of the five consecutive deeds.

The True Consideration for this conveyance is NONE.

This Declaration of Property Line Adjustment is recorded to relocate the common boundary between two parcels of land, the owner of Parcel 2 being a portion of Tax Lot 800 of Tax Map 21-25-12-00, which by a previous property line adjustment is a portion of the Southeast ¼ of Section 12 of Township 21 South Range 2 East of the Willamette Meridian, in Lane County Oregon and a portion of the a portion of Tax Lot 100 of Tax Map 21-35-07-40, which is a portion of the Government Lot 4 and a portion of the Southeast ¼ of the Southwest ¼ of Section 7 of Township 21 South Range 3 East of the Willamette Meridian, in Lane County Oregon, that is South of County Road No. 836 and County Road No. 1323 and north of the Oakridge Airport and north of the revised Parcel 3 of the previous property line adjustment.
And the owner of Parcel 4 being a portion of Tax Lot 100 of Tax Map 21-35-07-40, which is a portion of the Government Lot 4 and a portion of the Southeast ¼ and the Southeast ¼ of the Southwest ¼ of Section 7 of Township 21 South Range 3 East of the Willamette Meridian, in Lane County Oregon, that is South of County Road No. 836 and County Road No. 1323 and north of the Oakridge Airport and north of the revised Parcel 3 of the previous property line adjustment and a portion of Tax Lot 800 of Tax Map 21-25-12-00, which by a previous property line adjustment is a portion of the Southeast ¼ of Section 12 of Township 21 South Range 2 East of the Willamette Meridian, in Lane County Oregon.

The purpose of the property line adjustment is to move a common boundary line between Parcels 2 and 4 according to Lane County Land Use Regulations and ORS 92.190.

After the forth property line adjustment Parcel 2 is described as follows;

Beginning at the South One Quarter Corner of Section 12 of Township 21 South Range 2 East of the Willamette Meridian, in Lane County Oregon, Thence along the North-South One Quarter Line of said Section 12, North 1* 12' 01" East 976.47 feet; Thence leaving the North-South One Quarter Line of said Section 12, East 3541.42 feet; Thence South 75* 12' 52" East 875.00 feet; Thence South 14* 47' 08" West 600.00 feet more or less to the North Line of a parcel of land that was conveyed by deed to the Oakridge Airport as recorded on Reel 360-R/ 96687, within the Lane County Oregon Deeds and Records; Thence along the North and West Line of said Oakridge Airport, North 75* 12' 52" West 2215.00 feet more or less to the Northwest Corner of said Oakridge Airport; Thence South 14* 46' 43" West 159.08 feet; Thence leaving the said Oakridge Airport South 89* 03' 23" West 762.23 feet; Thence South 0* 51' 49" West 550.00 feet more or less to the South Line of said Section 12; Thence along the South Line of said Section 12 South 89* 03' 23" West 1302.31 feet to the Point of Beginning, all in Lane County Oregon.

After the forth property line adjustment Parcel 4 is described as follows;

Beginning at the Southeast Corner of Section 7 of Township 21 South Range 3 East of the Willamette Meridian, in Lane County Oregon, Thence along the East Line of said Section 7, North 0* 36' 50" East 46.61 feet to the TRUE POINT OF BEGINNING; Thence leaving the East Line of said Section 7, North 79* 46' 22" West 1402.58 feet; Thence South 10* 12' 06" West 287.10 feet more or less to the South Line of said Section 7; Thence along the South Line of said Section 7, North 89* 28' 35" West 1119.68 feet; Thence leaving the South Line of said Section 7, North 14* 47' 08" East 495.14 feet; Thence North 75* 12' 52" West 1875..00 feet; Thence West 3541.42 feet more or less to the North-South One Quarter Line of Section 12 Township 21 South Range 2 East of the Willamette Meridian, in Lane County Oregon; Thence along the North-South One Quarter Line of said Section 12, North 1* 12' 01" East 410.43 feet; Thence leaving the North-South One Quarter Line of said Section 12 East 1702.65 feet: North 206.25 feet more or less to the South Line of County Road No. 836 (commonly known as Westfir Road); Thence along the South Line of said County Road on the following bearing and distances; Thence South 74* 36' 18" East 81.07 feet; Thence 404.91 feet along the arc of a 2576.48 foot radius curve to the left (the long chord of which bears South 79* 06' 26" East 404.49 feet); Thence 218.94 feet along the arc of a 924.93 foot radius curve to the right (the long chord of which bears South 76* 49' 48" East 218.43 feet); Thence South 70* 02' 51' East 512.73 feet; Thence 304.10 feet along

the arc of a 666.62 foot curve to the left (the long chord of which bears South 83* 07' 01" East 301.47 feet); Thence North 83* 48' 49" East 111.78 feet more or less to the West Line of Roney Road Subdivision as Platted and Recorded on Book 41 Page 6 within the Lane County Oregon Plat Records; Thence leaving the South Line of said County Road and going along the West, South and East Plat boundary of said Roney Road Subdivision the following bearing and distances; Thence South 6* 10' 53" East 167.99 feet; Thence North 83* 48' 49" East 224.56 feet; Thence along the arc of a 1630.39 foot curve to the left (the long chord of which bears North 80* 51' 40" East 167.93 feet); Thence South 12* 04' 56" East 20.00 feet; Thence North 77* 55' 14" East 369.32 feet; Thence North 12* 04' 56" West 20.00 feet; Thence along the arc of a 620.51 foot curve to the right (the long chord of which bears North 88* 54' 37" East 236.49 feet); Thence North 9* 52' 37' East 67.99 feet; Thence South 80* 06' 10" East 315.62 feet; Thence along the arc of a 1275.92 foot curve to the left (the long chord of which bears North 87* 01' 10" East 568.50 feet); Thence North 74* 04' 15" East 366.03 feet; Thence North 15* 51' 27" West 100.00 feet to a point being the Northeast Corner of said Roney Road Subdivision, said point also being on the South Line of County Road No. 1323 (commonly known as Westfir Road); Thence leaving the said Roney Road and going along the South Line of said County Road No. 1323 the following bearing and distances; Thence North 74* 06' 24" East 0.04 feet; Thence 293.90 feet along the arc of a 1057.15 foot radius curve to the right (the long chord of which bears North 82* 02' 08" East 292.96 feet); Thence East 46.08 feet; Thence 260.40 feet along the arc of a 315.25 foot radius curve to the left (the long chord of which bears North 66* 20' 10" East 253.06 feet) more or less to a point on the West Line of Westfir Plat as Plated and Recorded on File 73, Slide 399 within the Lane County Plat Records; Thence leaving the South Line of said County Road No. 1323 and going along the Southerly Boundary of said Westfir Plat the following bearing and distances; Thence South 67* 41' 21" East 304.50 feet; Thence North 75* 06' 55" East 165.30 feet; Thence North 73* 42' 15" East 73.23 feet; Thence North 54* 21' 57" East 90.30 feet; Thence North 84* 03' 18" East 397.93 feet; Thence North 78* 49' 55" East 113.52 feet; Thence North 57* 21' 19" East 115.89 feet; Thence North 66* 18' 00" East 212.98 feet; Thence South 76* 16' 38" East 48.22 feet; Thence South 59* 18' 04" East 54.65 feet; Thence South 64* 20' 47" East 263.90 feet more or less to the East Line of said Section 7; Thence leaving the South Boundary of said Westfir Plat and going along the West Line of said Section 7, South 0* 36' 50" West 1608.39 feet to the TRUE POINT OF BEGINNING, all in Lane County Oregon.

Following this property line adjustment the adjusted Parcel 2 is described on the attached Exhibit "A" and the adjusted Parcel 4 is described on the attached Exhibit "B".

The new common boundary between Parcels 2 and 4 is underlined in the description of Parcel 1 attached as Exhibit "A".

A sketch of this adjustment is attached as Exhibit "C".

The below described parcels are based upon a survey of the parcels done by Keith Leavett for Westfir Land & Development Co., see CSF# 24775 dated Feb. 18 1981, at the Lane County Surveyors Office.

BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON TRANSFERRING FEE TITLE SHOULD INQUIRE ABOUT THE PERSON'S RIGHTS, IF ANY, UNDER ORS 197.352. STATUTORY WARRANTY DEED

Marie Elizabeth Swanson, Surviving Trustee of the Swanson Family Trust under trust agreement dated January 22, 1997, Grantor, conveys and warrants to **James Stubblefield** , Grantee, the following described real property free of liens and encumbrances, except as specifically set forth herein:

See Legal Description attached hereto as Exhibit A and by this reference incorporated herein.

Subject to:

1. Covenants, conditions, restrictions and/or easements, if any, affecting title, which may appear in the public record, including those shown on any recorded plat or survey.

The true consideration for this conveyance is **$175,000.00.** (Here comply with requirements of ORS 93.030)

BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON TRANSFERRING FEE TITLE SHOULD INQUIRE ABOUT THE PERSON'S RIGHTS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, OF CHAPTER 424, OREGON LAWS 2009. THIS INSTRUMENT DOES NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY THAT THE UNIT OF LAND BEING TRANSFERRED IS A LAWFULLY ESTABLISHED LOT OR PARCEL, AS DEFINED IN ORS 92.010 OR 215.010, TO VERIFY THE APPROVED USES OF THE LOT OR PARCEL, TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES, AS DEFINED IN ORS 30.930 AND TO INQUIRE ABOUT THE RIGHTS OF NEIGHBORING PROPERTY OWNERS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, OF CHAPTER 424, OREGON LAWS 2007, AND SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009.

Dated this 2 day of April, 2010.

The Swanson Family Trust

Marie Elizabetti Swanson

Marie Elizabeth Swanson, Surviving Trustee

NOTICE OF A LAND USE DECISION
BY THE LANE COUNTY PLANNING DIRECTOR

Mailing Date: 11/20/2008

Department Files: PA08-6329 (Notice)
PA08-6330 (Legal Lot Verification TL 100 Revised 13.29 acres)
PA08-6332 (Legal Lot Verification TL 800 Revised 12.05 acres)
PA08-6333 (Legal Lot Verification TL 100 Revised 13.28 acres)
PA08-6344 (Legal Lot Verification TL 100 Revised 184.28 acres)

Property Owner: Crown Properties, LLC
Applicant: Nickell Land Surveying & Planning, LLC
Assessor's Map & Tax Lot: 21-25-12-00-00800 & 21-35-07-40-00100
Contiguous Ownership: NONE

You own or occupy property near the above referenced property which is the subject of a land use application and pending decision for conditional **Approval** by the Lane County Planning Director.

PROPOSAL: To make the Director's Legal Lot Verification final and granting this unit legal lot status in accordance with Lane Code Chapter 13.020.

PLEASE NOTE: An approval of this proposal does not create a new unit of land and is not used with the intention of extinguishing written or unwritten real estate rights. Furthermore, Lane County makes no claim as to the property's ownership, title or boundary location. Additionally, this legal lot decision does not approve development or improvement of the subject unit of land beyond what is allowed by current zoning.

Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals. You may receive more information, including requirements to appeal this pending decision, by the Director to the Lane County Hearings Official.

Attached to this Notice are a Staff Report and a Legal Lot Verification. The application, the Lane County Planning Director's report, all documents provided by the applicant, and any applicable criteria used to make the determination are available for inspection at the Lane County Land Management Division. The Lane County Land Management Division representative is **Brandon J. Callister** who can be contacted at **541-682-4650**. Other Information can be obtained through the Lane County Web Site at **http://www.lanecounty.org/Planning/**.

ATTENTION: **Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.**

EXHIBIT I

NOTICE OF A LAND USE DECISION
BY THE LANE COUNTY PLANNING DIRECTOR

Enclosed is a vicinity map of the subject property and surrounding properties.

This decision will become final at 5 P.M. on 12\2\2008 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision.**

1. To complete this form, fill in the required information and attach to it all of the materials and information required in numbers 2, 3 and 6 of the appeal form.
2. Then, submit the completed form to Lane County Planning Director so that it is received by him or her prior to the above mentioned time that the decision becomes final.
3. The Lane County Planning Director shall reject an appeal if it is not received prior to the time that the decision becomes final or if it is not complete.

Failure of an issue to be raised in a hearing, in person or in writing, or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

I. PROPOSAL

Applications requesting Legal Lot Verification on one or more units of land were made. In accordance with Lane Code 13.020, the purpose of these applications was to determine if the identified units of land complied with the state and county laws that were in effect when it was created.

II. BACKGROUND INFORMATION

On 11/06/2008, applications for legal lot verifications were submitted to Lane County Land Management Division. The applications were reviewed and accepted as complete on 11/19/2008.

III. LOCATION AND DESCRIPTION

The subject properties are in the F-2 zone with the minimum parcel size being 80 acres. The locations of these properties are as identified above along with the corresponding acreages.

IV. APPROVAL CRITERIA & FINDINGS OF FACT

The identified units of land are legal lots in accordance with LC 13.020. Additionally, the following criteria apply:

- The units of land were created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances.
- The adjustment was limited to the relocation of a common boundary between lawfully created units of land where no additional units of land were created and the existing unit of land reduced in size complied with applicable zoning ordinances. All units of land complied.

V. DECISION

These units of land were created in conformance with applicable land division and zoning regulations and are legal lots in accordance with Lane Code 13.020.

LAND MANAGEMENT DIVISION

LEGAL LOT VERIFICATION REPORT

PUBLIC WORKS DEPARTMENT *125 E 8th AVENUE, EUGENE OR 97401 PLANNING: 682-3807*

DATE: November 19, 2008
STAFF: Brandon J. Callister

Notice: PA08-6329

1) Unit 1 Legal Lot verification Report: PA08-6330
   Tax Map and Lot Number: 21-35-07-40-00100 (P-1)
2) Unit 2 Legal lot Verification Report: PA08-6332
   Tax Map and Lot Number: 21-25-12-00-00800 (P-2)
3) Unit 3 Legal Lot verification Report: PA08-6333
   Tax Map and Lot Number: 21-35-07-40-00100 (P-3)
4) Unit 4 Legal lot Verification Report: PA08-6334
   Tax Map and Lot Number: 21-35-07-40-00100 (P-4)

These legal lot verification reports are based upon information provided by the applicant and County records on the above referenced properties. Based upon our findings, these units of land conformed to applicable regulations that existed at the time they were created. Please refer to Lane Code 13.010 (4) for the definition of a legal lot or parcel.

A legal lot is a unit of land (lot or parcel) that conforms to the applicable regulations that existed at the time the parcel or lot was first created. It remains a legal lot unless the parcel or lot lines are changed, the lot lines are vacated, or the unit of land is further divided as provided by law LC 13.010

FINDINGS

A. Land Division information
   1) Unit 1: The unit of land was created as a separate parcel on 07/14/1913
      - Instrument from which the unit of land was divided or separately described: DEED Book 1103 Page 122 dated 07/14/1913
      - The unit of land was reconfigured on 10/07/2008
        Documentation: Declaration of Property Line Adjustment 2008-059421 dated 10/07/2008

   2) Unit 2: The unit of land was created as a separate parcel on 02/09/1901
      - Instrument from which the unit of land was divided or separately described: DEED Book 51 Page 627 dated 02/09/1901
      - The unit of land was reconfigured on 10/07/2008
        Documentation: Declarations of Property Line Adjustment 2008-059421, 2008-059424, & 2008-059425

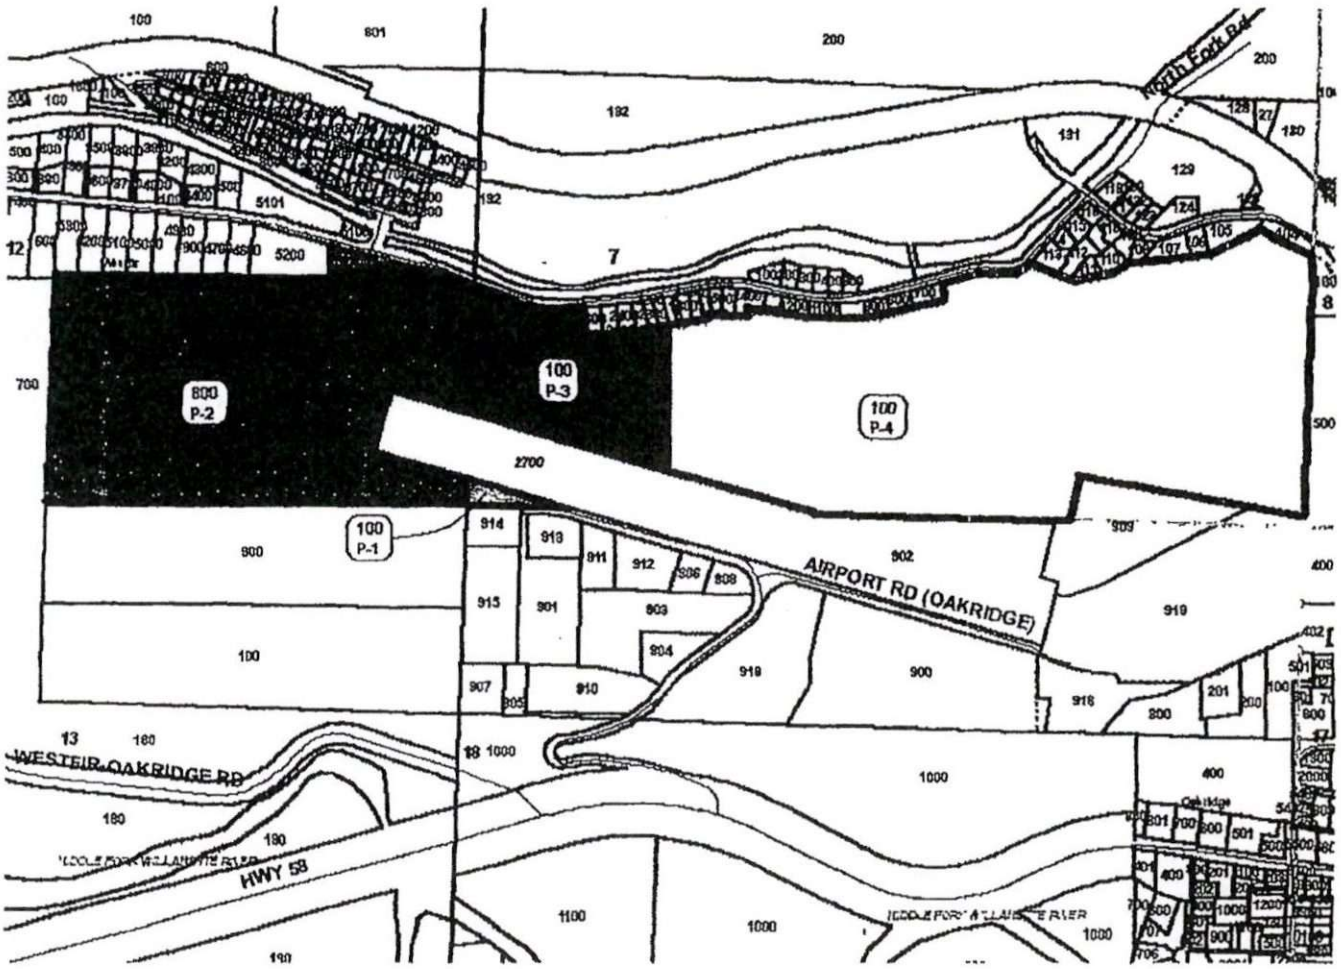
This legal lot verification does not approve any development. In accordance with LC 13.010 and LC 13.020, a legal lot verification is "A determination that a unit of land was created in conformance with the Lane Code and other applicable law." This legal lot verification identifies a unit of land that was created in conformance with the applicable county and state laws.

3) Unit 3: The unit of land was created as a separate parcel on 07/14/1913

- Instrument from which the unit of land was divided or separately described: DEED Book 103 Page 122 dated 07/14/1913
- The unit of land was reconfigured on 10/07/2008
  Documentation: Declarations of Property Line Adjustment 2008-059422 & 2008-059423

4) Unit 4: The unit of land was created as a separate parcel on 08/01/1945

- Instrument from which the unit of land was divided or separately described: DEED Book 293 Page 240 dated 08/01/1945
- The unit of land was reconfigured on 10/07/2008
  Documentation: Declarations of Property Line Adjustment 2008-059422, 2008-059423, 2008-059424, & 2008-059425



B. Zoning and Land Division information

Land division laws effective on: ☐ May 2, 1962 ☐ June 4, 1970 ☒ March 26, 1975
Criteria: The units of land were created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances. The adjustment was limited to the relocation of a common boundary between lawfully created units of land where no additional units of land were created and the existing unit of land reduced in size complied with applicable zoning ordinances. All units of land complied.

Original zoning ordinance date: 08/29/1978 & 08/22/1979 Zoning effective on 02/29/1984
Criteria: The units of land were created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances. The adjustment was limited to the relocation of a common boundary between lawfully created units of land where no additional units of land were created and the existing unit of land reduced in size complied with applicable zoning ordinances. All units of land complied.

This legal lot verification does not approve any development. In accordance with LC 13.010 and LC 13.020, a legal lot verification is "A determination that a unit of land was created in conformance with the Lane Code and other applicable law." This legal lot verification identifies a unit of land that was created in conformance with the applicable county and state laws.

Cottage Grove, Or. 97424

Owner: Crown Properties, LLC
30414 LeBleu Rd.
Eugene, Or. 97405

RE: Report and Verification of a Legal Lot, PA08-6330
Tax Map and Lot Number: 21-35-07-40-00100 (Revised 13.29 acres)
More exactly described: Declaration of Property Line Adjustment 2008-059421 P-1 dated 10/07/2008

This legal lot verification report is based upon information provided by the applicant and County records on the above referenced property. Based upon our findings, this unit of land **conformed** to applicable regulations that existed at the time it was created.

Findings (Refer to Lane Code 13.010 for the definition of a legal lot, lot and parcel)

1. The unit of land was created before being reconfigured as a separate parcel on or before 07/14/1913. Information on the instrument(s) from and by which this unit of land was reconfigured is as follows:

   a) Information on the instrument from which the unit of land was divided or separately described: Deed Book 103 Page 122 dated 07/14/1913 (See LLV PA06-6078)

   b) Information by which the subject property was reconfigured: Declaration of Property Line Adjustment 2008-059421 P-1 dated 10/07/2008 (See LLV PA08-6332 for the other affected parcel, being P-2)

2. Based upon the above information, the creation of this unit of land as a separate parcel **complied** with all effective land division laws and zoning regulations for size and shape and therefore meets the criteria for a legal lot:

   a) Land division regulations:
   When the unit of land was created, there were no land division laws regulating its creation. Lane County adopted applicable land division regulations on March 26, 1975. This unit of land **complied** with land division laws because the unit of land was created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances. The unit of land was reconfigured by the adjustment of the common property line which is authorized by ORS 92. The adjustment is limited to the relocation of a common boundary between two lawfully created units of land where an additional unit of land is not created.

   b) Zoning regulations:
   When the unit of land was created, there were no zoning laws regulating its creation. Lane County adopted applicable zoning regulations on 08/22/1979, however the reconfiguration fell under the current F-2 zoning which was adopted on 02/29/1984. This unit of land **complied** with this zoning because the adjustment of common property lines is authorized by ORS 92. The adjustment is limited to the relocation of a common boundary where the existing unit of land reduced in size by the adjustment complies with applicable zoning ordinances.

EXHIBIT "D"

Notes:
Tax Lot 100 (Revised 13.29 acres), Map 21-35-07-40, as described in Declaration of Property Line Adjustment 2008-059421 P-1 dated 10/07/2008, as depicted on the enclosed map complies with applicable land division and zoning requirements.

FOR INFORMATIONAL PURPOSES ONLY: This unit of land appears to have legal access.

PLEASE NOTE: THIS IS A PRELIMINARY LEGAL LOT DETERMINATION AND IS NOT A FINAL LEGAL LOT DETERMINATION.

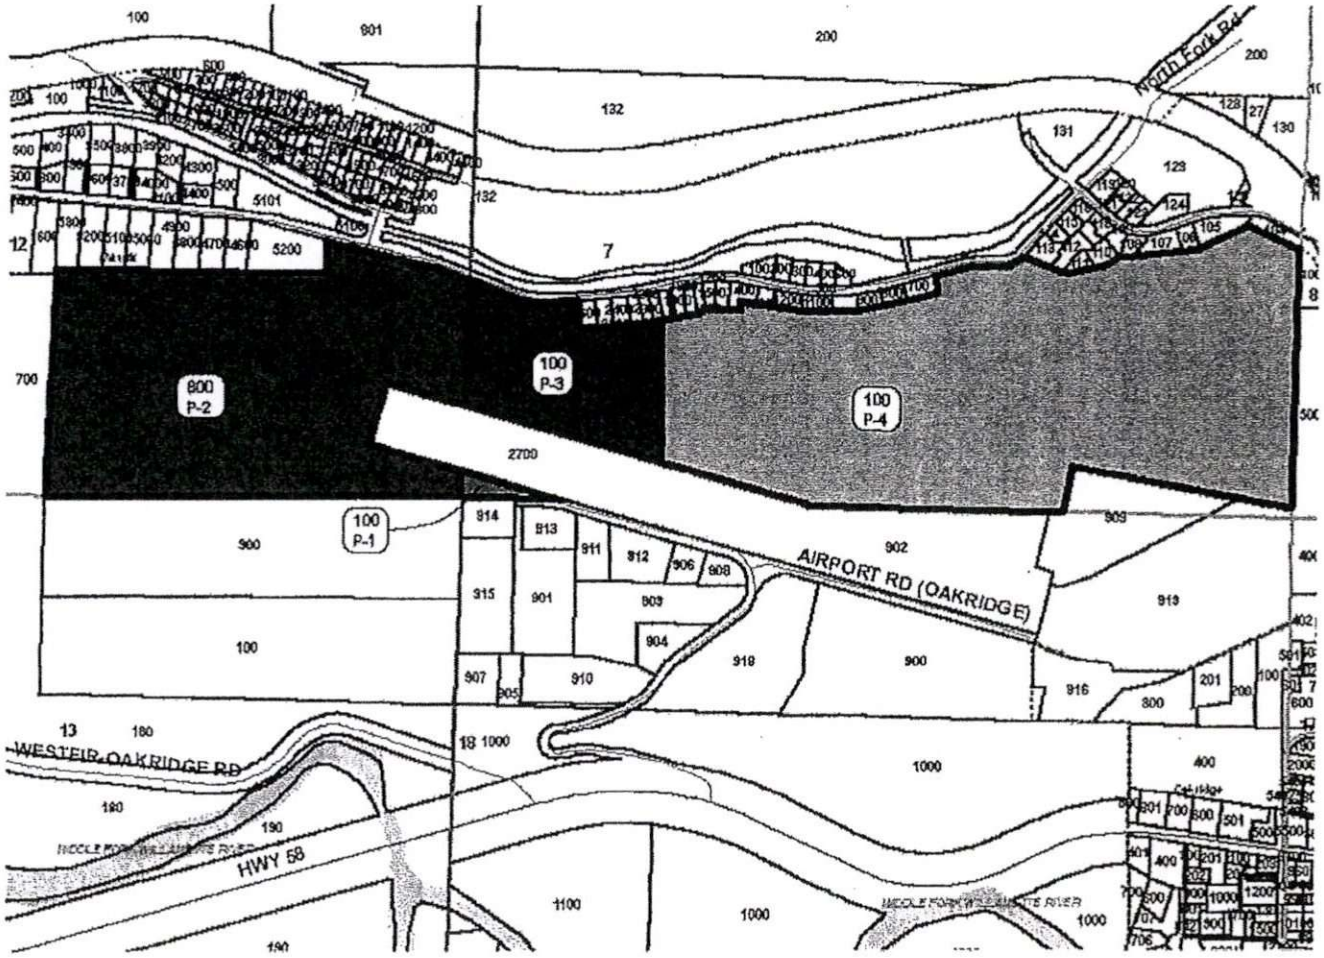
Legal Lot Information:

A. A legal lot verification by the Director is considered final when it is made and noticed and shall occur when:
   1. Submit an application: An application is submitted and reviewed for a legal lot verification on a lot or parcel resulting from a property line adjustment; or
   2. Notice is sent: If notice is requested by the property owner for any legal lot verification, upon submitting an application for review

PLEASE NOTE: Please be aware that if the boundary of this preliminary legal lot changes by the time a permit or application requiring a legal lot is submitted, a new Legal Lot Verification will be required.

B. If your land is found to be a legal lot, then:
   1. Ownership in this property may be conveyed with the assurance that it will not require approval by Lane County under its land division regulations; and
   2. Lane County will recognize this property as a legally separate unit of land for the purposes of development. Nevertheless, development will still be subject to applicable zoning, sanitation, access, and building regulations.

PLEASE NOTE: A Legal Lot Determination and Decision affirms the legal creation of this unit of land, it does not create a new unit of land and is not used with the intention of extinguishing written or unwritten real estate rights. Furthermore, Lane County makes no claim as to the property's ownership, title or boundary location. Additionally, legal lot verification does not approve development or improvement



Sincerely,

Brandon J. Callister

THIS INDENTURE WITNESSETH, That the Grantor, EDWARD HINES LUMBER CO., a corporation duly organized and existing under and by virtue of the laws of the State of Delaware and duly authorized to transact business in the State of Oregon, and pursuant to authority given by the Board of Directors of said corporation, conveys unto the State of Oregon, through its Board of Aeronautics, for public purposes and as a gift, all that property situated in Lane County, Oregon, for an airport to be known as the Oakridge Airport and described as:

> Edward Hines Lumber Co. property in Section 7, Township 21 South, Range 3 East and Section 12, Township 21 South, Range 2 East of the Willamette Meridian, Lane County, Oregon; Beginning at a point formed by the intersections of the Centerline of the proposed Oakridge Airport Runway and the South Line of Section 7, Township 21 South, Range 3 East of the Willamette Meridian, Lane County, Oregon, said point being 1409.02 feet South 89° 43' East from the Southwest Corner of said Section 7; thence South 89° 43' East 811.56 feet along the South Line of said Section 7; thence North 75° 27' West 2802.12 feet; thence South 14° 33' West 400.00 feet; thence South 75° 27' East 1229.04 feet to the South Line of said Section 7; thence South 89° 43' East along the South Line of said Section 7, 811.56 feet to the place of beginning, containing 18.51 acres more or less. All the bearings above referred to are based on true bearings as obtained from solar observations. (See attached map),

and covenants that GRANTOR is the owner of the above described property free and clear of all encumbrances, and will warrant and defend the same against all persons who may lawfully claim the same; provided however that if said property is not utilized for airport purposes it shall revert to the GRANTOR or its assigns.

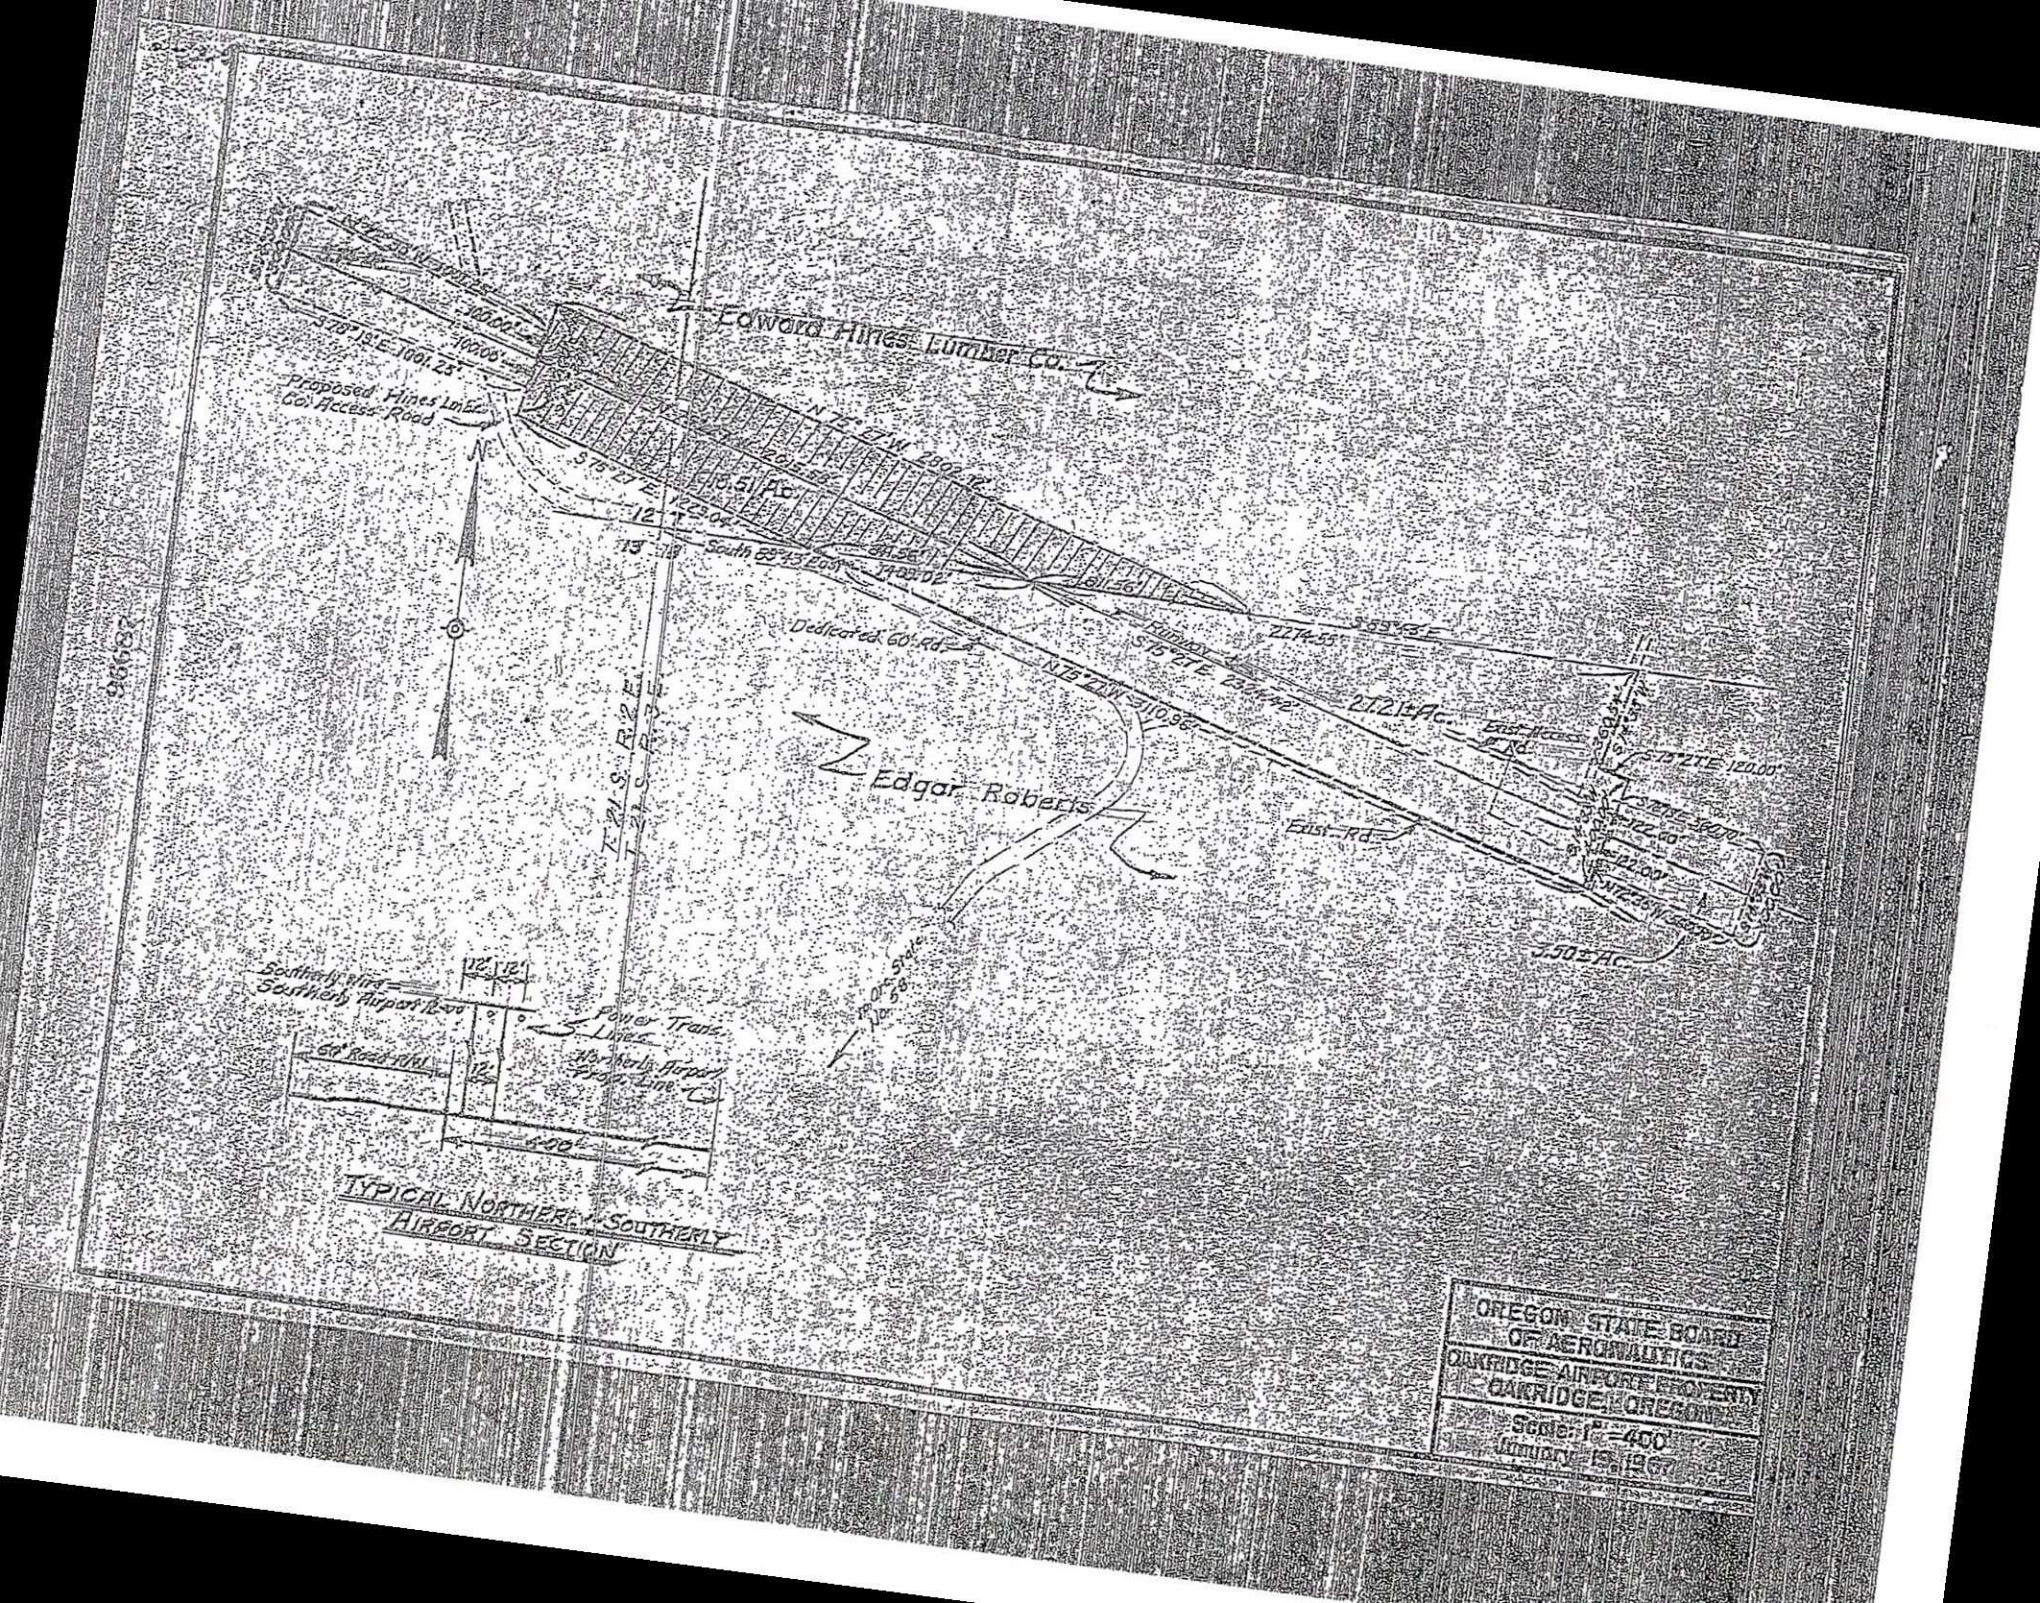
IN WITNESS WHEREOF, said GRANTOR has caused its corporate seal to be hereto affixed and has caused its name to be signed to these presents by its Executive Vice President and attested by its Assistant Secretary this 1st day of May, 1967.

EDWARD HINES LUMBER CO.

ATTEST:

R. F. Brodl
Assistant Secretary

By Joseph J. Fitzgerald
Executive Vice President



STATE OF ILLINOIS)

ADDRESS:

RE: Report and Verification of a Legal Lot Described as Lane County Assessment & Taxation Map # 21-35-18 /TL 908.
A more exact description by reference to Deed or Land Sales Contract is RF1437/865 2701.

Based upon the information provided in this report, a description of the above referenced property has been examined, and it has been determined that this property constitutes a legal lot, which means:

1. Ownership to this property may be conveyed with the assurance that such a conveyance would comply with Lane County land division regulations; and
2. Lane County recognizes this property as a legally separate unit of land for the purposes of development. Development would still be subject to applicable zoning, sanitation, and building regulations.

Finding #1: Legal Lot Standard

The definition of 'legal lot' and 'parcel' in Lane Code Chapter 16.090 are the standards to be used to measure whether or not a unit of land constitutes a legal lot. A 'legal lot' is defined by Lane Code Chapter 16.090 as, "a lawfully created lot or parcel". A 'parcel', lawfully created, is further defined by Lane Code Chapter 16.090 as a unit of land created "by deed or land sales contract if there are no applicable planning, zoning, or partitioning ordinances or regulations." "No applicable planning, zoning, or partitioning ordinances or regulations" is interpreted to mean that, at the time the unit of land was created by deed or land sales contract, its creation:

1. Complied with any existing Lane County land division regulations; and
2. Complied with any existing Lane County zoning requirements for dividing property; and
3. Complied with any existing Lane County comprehensive plan requirements for dividing property.

The term 'creation' is interpreted to mean the date:

1. on which, by deed or land sales contract, the parcel was first segregated out of its parent parcel; or
2. on which, by deed or land sales contract, the parcel was first given a separate metes and bounds description.

Finding #2: Evaluation of the Referenced Property

Based upon the following factual information about the creation of the above referenced property as a parcel by deed or land sales contract, and based upon an evaluation of this factual information against the standard for a legal lot mentioned above in Finding #1, the above referenced property constitutes a legal lot:

1. Based upon the following information, the subject property was created as a separate parcel on 5-20-70.

   a. Information for the deed or land sales contract which created the subject property as a separate parcel:

      Recording # R 484/10186

      *Date 5-20-70 (Place this date in the space provided above in #1.)

      Grantor Bangs & Dick Logging Co.

      Grantee Daniels, Alfred E. & Hettie

   b. Information for the deed or land sales contract from which the subject property was segregated or separately described:

      Recording # R 477/3455

      Date 3-23-70

      Grantor Mims, Lee H. & Libby

      Grantee Bangs & Dick Logging Co.

2. Based upon the following information, the creation of the subject property as a separate parcel complied with all effective land division, zoning, and comprehensive plan regulations, and it therefore constitutes a legal lot:

   a. Land division regulations:

      [X] When the subject parcel was created, there were no land division regulations in affect to govern its creation. Lane County did not adopt applicable regulations for this kind of division until 3-26-75.

      [ ] There were land division regulations in effect governing the creation of this parcel, and the creation of this parcel was specifically exempted by these regulations from compliance because _____

b. Zoning regulations:

[X] When the subject parcel was created, there were no zoning regulations in affect at the time. The zoning for this property was adopted on 8-22-79.

[ ] When the subject parcel was created, there were the following zoning regulations in affect which the parcel complied with because _____

_____

_____

c. Comprehensive Plan regulations:

[X] When the subject parcel was created, there was no comprehensive plan in affect at the time. The first comprehensive plan for this property was _____ upper Middle Fork which was adopted on 6-29-77.

[ ] When the subject parcel was created, there was the following comprehensive plan in affect which the parcel complied with because _____

_____

_____

If you have any questions or comments, you may contact the Land Management Division during public assistance hours, Monday thru Friday, 10:00-12:00 & 1:00-3:00,and discuss this with the planner at the assistance counter.

(formerly 4–1043)

OR 4748

34757

The United States of America

To all to whom these presents shall come, Greeting:

WHEREAS,

The Murphy Company,

being the owner of a certain tract of land situated and included within the limits of the Mount Hood National Forest, Oregon, has, under the provisions of the Act approved March 20, 1922 (42 Stat. 465), as amended (16 U.S.C. 485), reconveyed and relinquished the said tract to the United States and has, under the provisions of said Act, selected in lieu thereof the following described tracts of land:

Willamette Meridian, Oregon.

T. 21 S., R. 2 E.,
Sec. 13, N½N½NE¼;

T. 21 S., R. 3 E.,
Sec. 8, NE¼SE¼;
Sec. 9, W½NW¼;
Sec. 15, S½SE¼;
Sec. 22, NE¼NE¼;
Sec. 23, NE¼NE¼NW¼, E½W½NE¼NW¼,
SW¼SW¼NE¼NW¼, and N½NW¼NW¼;

Aggregating 322.50 acres;

NOW KNOW YE, that there is, therefore, granted by the UNITED STATES unto the said claimant the lands above described; TO HAVE AND TO HOLD the said lands with all the rights, privileges, immunities, and appurtenances, of whatsoever nature, thereunto belonging, unto the said claimant, its successors and assigns, forever;

EXCEPTING AND RESERVING TO THE UNITED STATES from the lands so granted:

1. A right-of-way thereon for ditches or canals constructed by the authority of the United States. Act of August 30, 1890, 26 Stat. 391; 43 U.S.C. 945;

2. The following three easements, in accordance with the provisions of the Act of February 28, 1925 (43 Stat. 1090):

   a. An easement for existing T.V. Butte Road No. 2163, 66 feet in width, being 33 feet on each side of the centerline thereof, with as much additional width as required for adequate protection of cuts and fills, said centerline being more particularly described as: Beginning at a point on

Patent Number 36-71-0015

GPO 847 - 946

34757

County Road No. 1076 which is N. 45° W., 364 feet from the section corner common to Sections 14, 15, 22, and 23, T. 21 S., R. 3 E., W.M. and traversing in a northwesterly direction over and across the SE¼SE¼ of said Section 15 to a point which is N. 19° E., 1,059 feet from the east 1/16 corner on the south section line of said Section 15, T. 21 S., R. 3 E., W.M.

b. An easement for the existing Westfir Road No. 2115, 66 feet in width, being 33 feet on each side of the centerline thereof, with as much additional width as required for adequate protection of cuts and fills, said centerline being more particularly described as: Beginning at a point 1,558.9 feet south of the section corner common to Sections 4, 5, 8, and 9, T. 21 S., R. 3 E., W.M. and traversing in a southeasterly direction over and across the SW¼NW¼ of said Section 9 to a point on the north right-of-way line of County Road No. 360, said point being N. 5°36' W., 515 feet from the southeast corner of the SW¼NW¼ of said Section 9, T. 21 S., R. 3 E., W.M.

c. An easement for the proposed Aubrey Mountain Road No. 2172, being of variable width on either side of the centerline thereof, with as much additional width as required for adequate protection of cuts and fills, said centerline being more particularly described as: Beginning at a point on the south right-of-way line of County Road No. 1076, which said point is 2,238.70 feet east and 257.25 feet south of the section corner common to Sections 14, 15, 22, and 23, T. 21 S., R. 3 E., W.M.; thence with a right-of-way width 50 feet each side of centerline, S. 7°40'46" W., a distance of 222.57 feet; thence with a right-of-way width 33 feet each side of centerline, along the arc of a right hand curve of 48°, a distance of 146.63 feet; thence with a right-of-way width of 33 feet each side of centerline, S. 78°03'39" W., a distance of 38.81 feet; thence with a right-of-way width of 33 feet each side of centerline, along the arc of a left hand curve of 48°, a distance of 104.52 feet; thence with a right-of-way width of 33 feet on each side of centerline, S. 27°53'34" W., a distance of 474.89 feet; thence with a right-of-way width of 33 feet each side of centerline, along the arc of a right hand curve of 14°, a distance of 243.49 feet; thence with a right-of-way width of 33 feet each side of centerline, S. 61°58'52" W., a distance of 73.56 feet; thence with a right-of-way width of 50 feet each side of centerline, along the arc of a left hand curve of 54°, a distance of 293.51 feet to a point which is 1,601.88 feet east and 1,470.82 feet south of the section corner common to Sections 14, 15, 22, and 23, T. 21 S., R. 3 E., W.M.;

Form 1860–10
(March 1965)
(formerly 4–1044)

OR 4748

34757

Provided that if for a period of 5 years, the United States of America, or its assigns, shall cease to use, or preserve for prospective future use, the said roads, or any segments thereof, for the purposes reserved, or if at any time the United States of America determines that the roads, or any segments thereof, are no longer needed for the purposes reserved, the easements traversed thereby shall terminate. In the event of such nonuse or of such determination by the United States of America, the United States of America shall furnish to the patentee, its successors and assigns, a statement in recordable form evidencing termination.

SUBJECT TO:

1. A prior reservation of all minerals, including but not limited to oil and gas, to Pope & Talbot, Inc., in that certain warranty deed dated August 22, 1950, and recorded in Book 424 at Page 645, Deed Records of Lane County, Oregon, as to the N½N½NE¼ of said Sec. 13, T. 21 S., R. 2 E.; and

2. Such rights for railroad right-of-way purposes as Central Pacific Railway Company or its successors in interest may have as to the SW¼SE¼ of said Sec. 15, T. 21 S., R. 3 E., pursuant to the Act of March 3, 1875 (18 Stat. 482) and the Act of March 3, 1899 (30 Stat. 1233) under right-of-way, serial number Roseburg 010872, approved December 3, 1917.

WARRANTY DEED

EDGAR N. ROBERTS AND FAUNA DOLORES ROBERTS, husband and wife, hereinafter called GRANTOR, conveys to the STATE OF OREGON through its BOARD OF AERONAUTICS all that property situated in Lane County, Oregon, for Oakridge Airport and described as:

Edgar Roberts property in Section 18, Township 21 South, Range 3 East of the Willamette Meridian, Lane County, Oregon; Beginning at a point formed by the Centerline of the proposed Oakridge Airport Runway intersecting with the North Line of Section 18, Township 21 South, Range 3 East of the Willamette Meridian, Lane County, Oregon, said point being 1409.02 feet South 89° 43' East of the Northwest Corner of said Section 18; thence South 89° 43' East along the North Line of Section 18 2274.55 feet; thence South 14° 33' West 360.54 feet; thence South 75° 27' East 120.00 feet; thence South 14° 33' West 400.00 feet to a point 12.00 feet South 14° 33' West of the Centerline of the Bonneville Power Line; thence North 75° 27' West 3110.96 feet parallel with the Bonneville Power Line to the North Line of Section 18; thence South 89° 43' East 811.56 feet to the place of beginning containing 27.21 Acres more or less. All the bearings referred to in the above description are based on true bearings as obtained from solar observations. (See attached Map)

and covenants that GRANTOR is the owner of the above described property free of all encumbrances, and will warrant and defend the same against all persons who may lawfully claim the same. If said property is not utilized for airport purposes it shall revert to the GRANTORS or their heirs or assigns.

Dated this 8th day of March, 19 67.

DEFINITIONS

1. PRIMARY SURFACE – The portion longitudinally centered on the runway, extending 200 feet beyond each end of a runway prepared hard surfaced runway. The width of the primary surface is equal to the width of the beginning of the runway's most precise approach surface.
2. "B" TRANSITIONAL SURFACE – The surface that extends upward and outward at right angles to the runway centerline and the runway centerline extended at a slope of 7:1 from the sides of the primary surface and from the sides of the approach surfaces to the horizontal and conical surfaces.
3. "C" HORIZONTAL SURFACE – The horizontal plane 150 feet above the established airport elevation beginning at its intersection with the transitional surfaces and extending to the beginning of the conical surface.
4. "D" CONICAL SURFACE – The surface extending upward and outward from the periphery of the horizontal surface at a slope of 20:1 for a horizontal distance of 4000 ft.
5. "E" APPROACH SURFACE – The surface longitudinally centered on the extended runway centerline and extending upward and outward from each end of the primary surface.
6. AIRPORT REFERENCE POINT – The point established at approximate geographical center of the airport landing area.
7. AIRPORT ELEVATION – The highest point on the usable landing area, which elevation is to be considered the elevation of the horizontal surface.

Notice of Pending Land Use Decision
By The Lane County Planning Director

LANE COUNTY OREGON

LAND MANAGEMENT DIVISION
http //www LaneCounty org/PW_LMD/

Mailing Date:	1-7-11
Department File:	PA 10-5485
Property Owner:	E.J.K. Investments, LLC
Applicant:	Nickell Land Surveying & Planning, LLC
Assessor's Map & Tax Lot:	21-25-12-00-00843
Address or Location:	Airport Road, Oakridge, OR
Acreage:	13.34 acres
Base Zone:	Impacted Forest Lands (F-2, RCP)
Combining Zone(s):	Airport Safety Combining Zone (/AS-RCP)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director **The conditions of approval are contained in the attached Exhibit A.**

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: Request for Director approval of a dwelling in the Impacted Forest Lands Zone (F-2, RCP) pursuant to the "Template Dwelling" provisions of Lane Code 16.211(5) and Lane Code 16.211(8).

Enclosed is a site plan of the subject property.

The proposed use that could be authorized by approval of the land use application is: One Dwelling

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report are available for inspection at the Lane County Land Management Division at no cost, and copies will be provided at reasonable cost. The name of the Lane County Land Management Division representative to contact is **Sarah Wilkinson** and the telephone number where more information can be obtained is **541-682-4054**.

This decision will become final at 5 P.M. on 1-19-2011 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision.**

EXHIBIT Z

1. To complete this form, fill in the required information and attach to it all of the materials and information required in numbers 2, 3 and 6 of the appeal form.

2. Then, submit the completed form to Lane County Planning Director so that it is received by him or her prior to the above-mentioned time that the decision becomes final.

3. The Lane County Planning Director shall reject an appeal if it is not received prior to the time that the decision becomes final or if it is not complete.

Failure of an issue to be raised in a hearing, in person or in writing, or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

Prepared by: Sarah Wilkinson, Planner **Date:** 1/6/2011

Authorized by: Kent Howe, Planning Director **Date:** 6 Jan 11

EXHIBIT A

CONDITIONS OF APPROVAL
PA 10-5485

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of PA 10-5485 is valid for a **four-year** period from the final date of approval. Lane County may grant an initial extension period of **two years** if:

   a. An applicant makes a written request with the required fee for an extension of the development approval period;

   b. The request is submitted to the county prior to the expiration of the development approval period;

   c. The applicant states reasons that prevented the applicant from beginning or continuing development within the approval period;

   d. The county determines that the applicant was unable to begin or continue development during the approval period for reasons which the applicant was not responsible; and

   e. The criteria and standards under which this proposal was granted have not changed.

Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision.

The following conditions shall be met prior to the expiration date in Condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease:

1. Submit to Lane County Assessment and Taxation a stocking survey report for the subject property, prepared by a qualified forester. A copy of the stocking survey report shall be submitted to Lane County Land Management Division with evidence of receipt by Lane County Assessment and Taxation.

2. Complete, notarize and record a Farm and Forest Management Practices Easement for the subject property (Attachment 1). Attach to the easement an "Exhibit A" that contains the legal description of the subject property. The easement is to be submitted to and recorded by Lane County Deeds and Records. A copy of the signed, notarized and recorded Farm and Forest Management Practices Easement shall be submitted to Lane County Land Management Division.

3. Physically establish primary and secondary fuel breaks. The minimum primary fuel break shall extend 30 feet in all directions around the dwelling. The secondary fuel break shall extend 100 feet in all directions around the primary fuel break. All fuel breaks must be maintained in perpetuity. Please contact 541-682-3989 for more information about fuel break requirements.

4. Submit evidence that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629.

5. Construct the length of the private road and driveway, from the Airport Road right-of-way to the proposed dwelling, to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director. Please contact 541-682-3989 for more information about the requirements of LC 16.211(8)(e).

6. Submit written documentation from the Hazeldell RFD that states that the roads and driveway leading from the fire station to the proposed dwelling are adequate for their fire fighting equipment to access the use, fire fighting equipment and water supply.

   - OR -

   Submit written documentation from an Oregon Registered Professional Engineer that states that the roads and driveway leading from the fire station to the proposed dwelling meet the requirements of LC 16.211(8)(e).

7. Obtain approval of a road name for the private road (Attachment 2). The road name should not duplicate existing road names, or be similar sounding, or confusing. Upon approval of the road name, a road name sign shall be installed at the intersection of the private road and Airport Road (Attachment 3). The road name shall be noted on the Site Plan. Addressing requirements shall be addressed as part of the building permit process. Please contact 541-682-4196 for more information about road naming and/or signage.

8. No structure or object shall be erected, altered, allowed to grow or be maintained above the surface of the ground within the Approach Surface, as defined by LC 16.246(5)(a).

9. No structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface, which extends outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of seven horizontal feet to one vertical foot to the intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above the runway.

   The center of the northern boundary of the proposed home site is located approximately 50 feet south of the Approach Surface. Accordingly, the height of the dwelling is not to penetrate 1426 feet above sea level, which is equivalent to 7 feet (50 ÷ 7 = 7) above the elevation of the runway (1419 feet above sea level). The applicant documented that the elevation of the proposed home site is 1402 feet above sea level. Accordingly, at the center of the northern boundary of the home site, the height of the dwelling is not to exceed 24 feet (1426 – 1402 = 24).

   The center of the proposed home site is located approximately 100 feet south of the Approach Surface. Accordingly, the height of the dwelling is not to penetrate 1433 feet above sea level, which is equivalent to 14 feet (100 – 7 = 14) above the elevation of the runway (1419 feet above sea level). The applicant documented that the elevation of the proposed home site is 1402 feet above sea level. Accordingly, at the center of the home site, the height of the dwelling is not to exceed 31 feet (1433 – 1402 = 31).

10. File a Notice of Construction or Alteration (Form 7460-1) with the Federal Aviation Administration and the Oregon Department of Aviation. A copy of the filed Notice shall be submitted to Lane County Land Management Division.

11. A Facility Permit is required for placement of facilities within the right-of-way of Airport Road (Attachment 4). Facilities and development include, but are not limited to, road improvements, sidewalks, new or reconstructed driveway or road approach intersections, utility placements, excavation, clearing, grading, culvert placement or replacement, storm water facilities, or any other facility, thing, or appurtenance [LC 15.205(1)]. **A facility permit is required for the existing private road approach connection to Airport Road.**

12. Storm water runoff from the subject property shall **not** be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches. Ditches adjacent to County roads are designed solely to accommodate roadway storm water runoff.

13. Upon completion of conditions no.2 through no.12, complete and submit a Land Use Application for the Verification of Conditions for PA 10-5485, with the applicable fee (Attachment 5). **Attach to this application:**

    - ☐ Copy of the stocking survey report with evidence of receipt by Lane County Assessment and Taxation;
    - ☐ Copy of signed, notarized and recorded Farm Use and Forest Management Agreement;
    - ☐ Copy of a well constructor's report or a water use permit from the Water Resources Department;
    - ☐ Copy of filed Notice of Construction or Alteration (Form 7460-1).
    - ☐ Copy of facility permit;
    - ☐ Copy of letter from the **Hazeldell RFD** regarding adequacy of roads and driveway; and
    - ☐ Copy of the approved Site Plan that conforms with the approved plans, drawn to scale, including the same information, and meeting other minimum standards of the Land Management Division. The Site Plan shall show the primary and secondary fuel breaks and the approved name for the private road.

14. As part of the Verification of Conditions process, the road, driveway and fuel breaks shall be field inspected by Land Management Division staff to verify the requirements stated in conditions no.3, 5 and 7 have been met. At the discretion of the Planning Director, failure to meet, upon first inspection, the minimum fuel break and/or driveway and/or grade standards as in LC 16.211(8)(c) and (e), may require the owner to submit an application for Fuel Break Verification and Road Inspection, with the applicable fee.

15. Upon completion of the Verification of Conditions, submit a building or placement permit application for the proposed dwelling. To schedule a Permit Review Meeting, during which application for a building permit is submitted, please call 541-682-3577 or visit the Planner on Duty in the Land Management Division located in the Public Service Building at 125 E. 8th Ave., Eugene, OR. Please contact the Building Department at 541-682-3823 and the On-Site Sewage Department at 541-682-3754 with questions regarding building and sanitation requirements.

16. In the building or placement permit application submittal, submit a Site Plan that demonstrates the parcel configuration, proposed dwelling, driveway, and septic system, are located as on the approved Site Plan, unless modified by the Planning Director. The Site Plan shall show the primary and secondary fuel breaks and the approved name for the private road. At the discretion of the Planning Director, any deviation from the approved Site Plan may require an application for the Modification of Conditions.

The following condition shall be met prior to approval for legal occupancy of the proposed dwelling.

17. The proposed dwelling shall meet the following requirements, to be verified by the Lane County Building Official:

    a. All buildings or structures with chimneys shall have a spark arrester on all chimneys.

    b. Wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs.

    (Please contact a Lane County plans examiner at 541-682-3823 for more information about building code requirements)

The following conditions are provided for informational purposes and shall be fulfilled as applicable to the proposed development:

18. All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

19. All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

20. Private Access Easements shall conform to the applicable requirements of LC 15.055:

    (4) The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.

(5) All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.

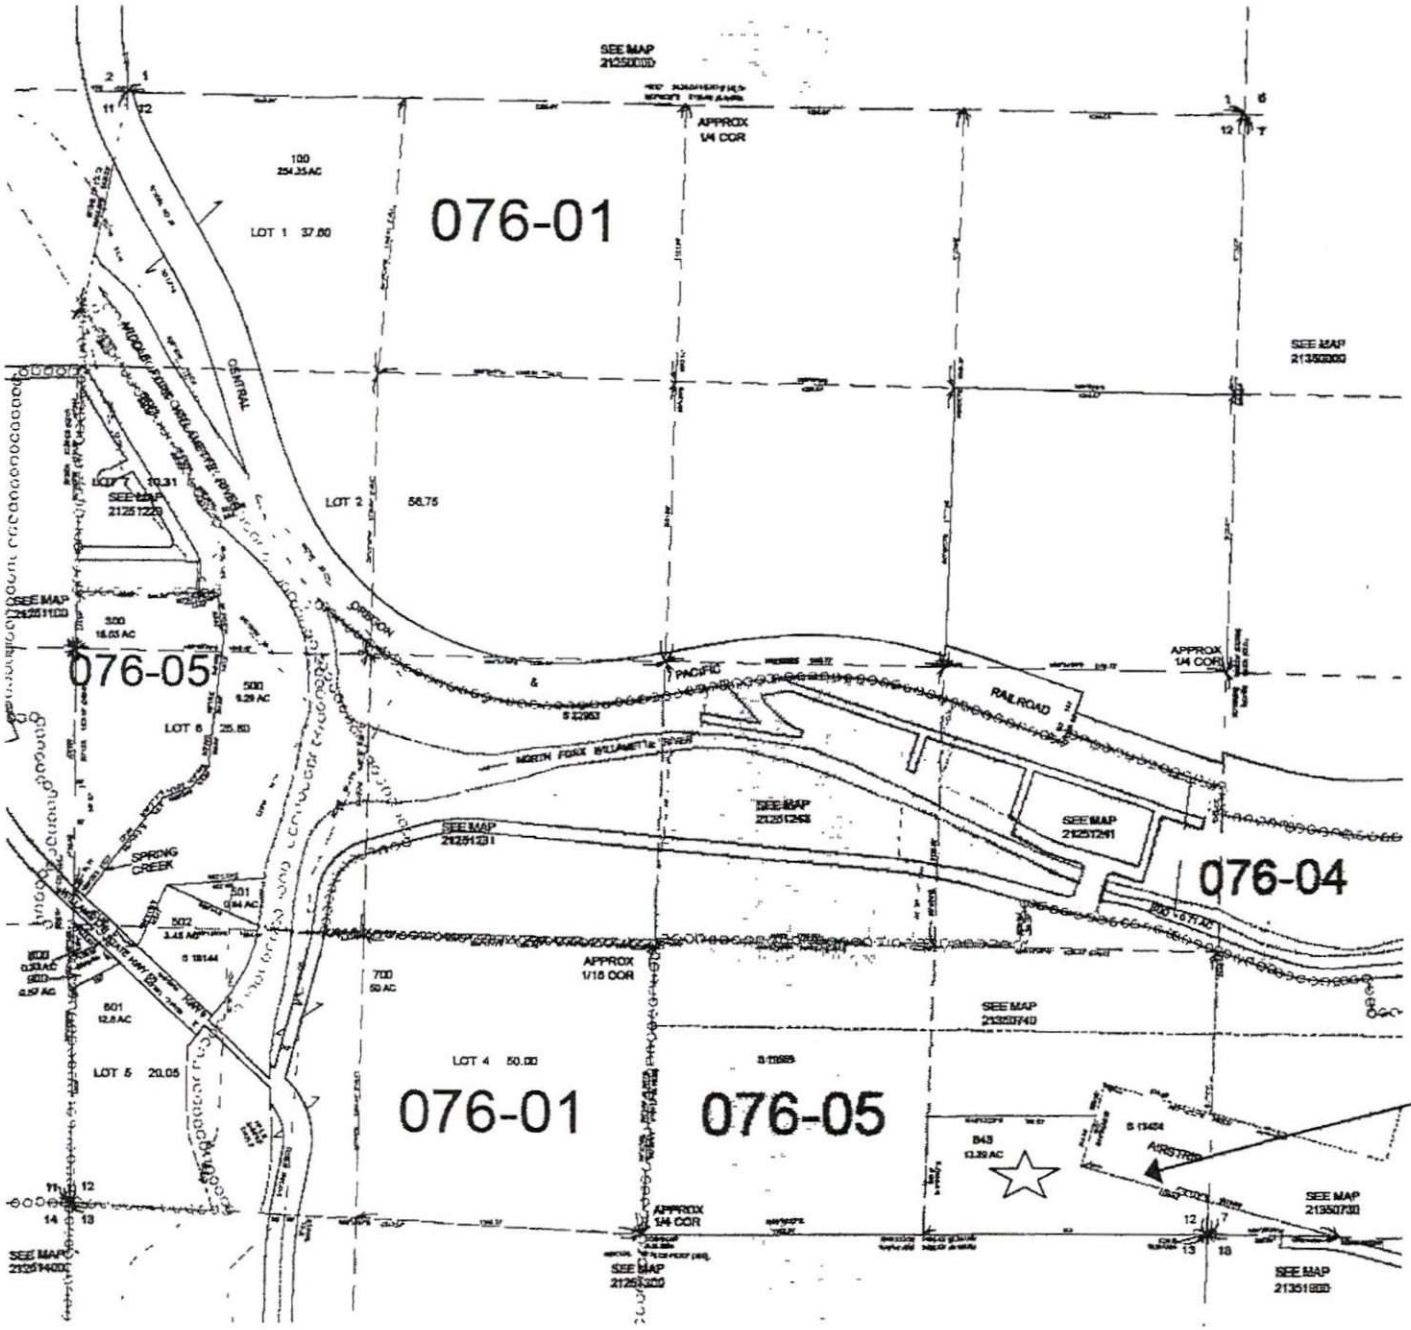
(6) Development on a lot or parcel taking access over a railroad or limited access road right-of-way may require documentation that permanent or long term access over the railroad or limited access road meeting the requirements of this section has been granted.

(7) Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.

(8) The County may require that at the entrance to a Private Access Easement road a sign be posted at private expense stating the name of the private road and the words "Private Road, Not Dedicated for Public Use or Maintained by Lane County."

21. The following is provided for informational purposes as an **Advisory Notice**: Section 93.040(1) of the Oregon Revised Statutes requires the following statement to be included in the body of any instrument transferring or contracting to transfer fee title to real property:

"THIS INSTRUMENT WILL NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY APPROVED USES AND TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES AS DEFINED IN ORS 30.930."



This Oregon Law disclosure requirement serves a constructive purpose. Approval of a residence for this property is contingent upon compliance with the conditions of the special use permit, and any future owners of the subject property need to understand and adhere to these conditions. This disclosure statement should alert the cautious and potential purchaser to inquire with the Lane County Land Management Division about the conditions of this special use permit.

Planning Director Approval of a Land Use Application

Staff Report

Department File:	PA 10-5485
Property Owner:	E.J.K. Investments, LLC
Applicant:	Nickell Land Surveying & Planning, LLC
Assessor's Map & Tax Lot:	21-25-12-00-00843
Address or Location:	Airport Road, Oakridge, OR
Acreage:	13.34 acres
Base Zone:	Impacted Forest Lands (F-2, RCP)
Combining Zone(s):	Airport Safety Combining Zone (/AS-RCP)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)
Staff Planner:	Sarah Wilkinson, 541-682-4054

I. PROPOSAL

Request for Director approval of a dwelling in the Impacted Forest Lands Zone (F-2, RCP) pursuant to the "Template Dwelling" provisions of Lane Code 16.211(5) and Lane Code 16.211(8).

II. BACKGROUND

On June 25, 2010, the applicant submitted to Lane County Land Management an application for a "Template Dwelling." On July 20, 2010, staff reviewed and deemed the application incomplete pending submittal of evidence of compliance with Lane Code 16.246. On November 17, 2010, the applicant submitted the required materials and staff accepted the application as complete. On November 26, 2010, staff solicited referral responses from affected agencies, service providers and surrounding property owners. Referral responses, applicable to the approval criteria, are incorporated in the findings and decision below. Copies of all written responses are included in the application file for this proposal.

III. PROPERTY AND PROJECT DESCRIPTION

a. **LOCATION:** The subject property is identified as Tax Lot No. 843 on Lane County Tax Assessor's Map 21-25-12. The property is located immediately west of the Oakridge Airport and is a legal lot, verified by PA 08-6330 and noticed by PA 08-6329.

b. **ZONING:** The subject property is designated Forest (F) in the Lane County Rural Comprehensive Plan, is zoned Impacted Forest Lands (F-2, RCP) and is within the Airport Safety Combining Zone (/AS-RCP).

c. **SITE DESCRIPTION AND SURROUNDING USES:** The subject property is 13.34 acres in size and vacant. The property slopes upward from the east to the west and contains a scattering of trees. The property is bordered to the east by the Oakridge Airport and is surrounded to the

north and west by land zoned Impacted Forest Lands (F-2, RCP), to the south by land zoned Non-Impacted Forest Lands (F-1, RCP) and to the east by land zoned Airport Operations (AO-RCP) and Rural Residential (RR-5, RCP).

d. **PROJECT:** The applicant proposes to construct a dwelling on the subject property. The proposed 100-foot wide by 100-foot deep home site is located 250 feet south of the north property line, 200 feet north of the south property line, 400 feet west of the east property line, and 130 feet east of the west property line. The proposed dwelling is to be accessed from Airport Road, a County road, by an existing private road that also serves the nearby Tax Lot No. 133, 2900 and 2800. The proposed dwelling is to be accessed from the existing private road by an existing private driveway. The applicant proposes to construct a 120-foot long extension of the existing driveway.

IV. APPLICABLE CRITERIA AND FINDINGS OF FACT

Staff evaluated the subject proposal pursuant to the applicable criteria found in Lane Code 16.211(5) and Lane Code 16.211(8). The code language is in **boldface** type, followed by the findings of fact.

A. Conformity with Lane Code 16.211(5):

One single-family dwelling or manufactured dwelling is allowed subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to provide written notice of the decision and an opportunity for appeal, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(5)(a) through (f) and LC 16.211(8) below.

(a) The tract upon which the dwelling or manufactured dwelling will be located has no other dwellings or manufactured dwellings on it. As used in LC 16.211(5), "tract" means one or more contiguous lots or parcels in the same ownership. A tract shall not be considered to consist of less than the required acreage because it is crossed by a public road or waterway.

Finding 1: Staff finds the subject proposal meets this criterion. The subject tract consists of only one parcel in the ownership of "EJK Investments LLC" (Assessor's Map & Tax Lot: 21-25-12-00-00843). The tract contains no other dwellings or manufactured dwellings.

(b) The lot or parcel upon which the dwelling or manufactured dwelling will be located was lawfully created.

Finding 2: Staff finds the subject proposal meets this criterion. The property is a legal lot, verified by PA 08-6330 and noticed by PA 08-6329.

(c) The lot or parcel upon which the dwelling or manufactured dwelling will be located:

(iii) Is predominantly composed of soils that are capable of producing 85 cubic feet per acre per year of wood fiber; and

(aa) All or part of at least eleven other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(iii)(aa) above.

Finding 3: Staff finds the subject proposal meets this criterion. The subject property is composed of soils that are capable of producing at least 85 cubic feet per acre per year of wood fiber. The subject property abuts Airport Road, which was accepted as a County road in 1978 (R878-80868) and 1980 (1052-R-03833). Per LC 16.211(5)(c)(iii)(aa)(A), the applicant documented the presence of at least 11 other lots or parcels that existed on January 1, 1993, within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the subject property:

- Map 21-35-18, Tax Lot No. 914, 913, 911, 912, 906, 908, 903, 904, 902
- Map 21-25-13, Tax Lot No. 900
- Map 21-35-07-30, Tax Lot No. 2700

The verification of the status of the 11 lots or parcels referenced above was preliminary and does not constitute a determination of legal lot status. Lots or parcels within urban growth boundaries were not used to satisfy the eligibility requirements in LC 16.211(5)(c).

(bb) At least three dwellings or permanent manufactured dwellings existed on January 1, 1993, on the other lots or parcels described in LC 16.211(5)(c)(iii)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(iii)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings or permanent manufactured dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle.

Finding 4: Staff finds the subject proposal meets this criterion. The applicant documented three dwellings that existed on January 1, 1993 on the lots or parcels listed in Finding 3:

- Map 21-35-18, Tax Lot No. 912, 908, 904

(d) Approval of a dwelling or manufactured dwelling shall comply with the requirements in LC 16.211(5)(d)(i) through (iv) below:

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

Finding 4: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, a stocking survey report for the subject property, prepared by a qualified forester, shall be submitted to Lane County Assessment and Taxation. A copy of the stocking survey report with evidence of receipt by Lane County Assessment and Taxation shall be submitted to Lane County Land Management Division.***

(e) Prior to land use clearance of a building permit for the dwelling or manufactured dwelling, when the lot or parcel on which the dwelling or manufactured dwelling will be located is part of a tract, the remaining portions of the tract shall be consolidated into a single lot or parcel and a deed restriction using the form provided in OAR 660-06-027(6), "Exhibit A," shall be completed and recorded with Lane County Deeds and Records. The covenants, conditions and restrictions in the deed restriction:

Finding 5: This criterion does not apply to the subject proposal. The subject tract consists of only one parcel in the ownership of "EJK Investments LLC" (Assessor's Map & Tax Lot: 21-25-12-00-00843).

(f) Land use approval of a permit described in LC 16.211(5) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(5)(f) above may be made and approved pursuant to LC 14.700(2).

Finding 6: Approval of the subject proposal shall be valid for four years from the final date of approval as indicated in the Conditions of Approval (Exhibit A). Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(5)(f) above may be made and approved pursuant to LC 14.700(2).

(g) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

Finding 7: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, a Farm and Forest Management Practices Easement for the subject property shall be submitted to and recorded by Lane County Deeds and Records. A legal description of the property shall be attached to the easement as "Exhibit A." A copy of the recorded Farm and Forest Management Practices Easement shall be submitted to Lane County Land Management Division.***

B. Conformity with Lane Code 16.211(8):

The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h) and (j), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through(b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

(a) Setbacks. Residences, dwellings or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent;

Finding 8: Staff finds the subject proposal meets this criterion:

a. **Near dwellings or manufactured dwellings on other tracts.** The proposed dwelling is to be sited approximately 1,250 feet west of the nearest dwelling located to the east on Tax Lot No. 914, as identified on Lane County Tax Assessor's Map 21-35-18.

b. **Near existing roads.** The proposed dwelling is to be located near an existing private road.

c. **Most level part of the tract.** The applicant stated that the proposed dwelling is to be sited on a level part of the subject property in an area containing slopes of 3 – 6 percent.

d. **Least suitable portion of the tract for forest use.** The entirety of the subject property is undeveloped by non-forest uses and is composed of high-yielding soils. The modestly sized 100-foot wide by 100-foot deep proposed home site is located in an open area, near an existing private road, to minimize intrusion and to minimize the amount of forest lands used to site access roads, service corridors and structures.

e. **30 feet away from any ravine, ridge or slope greater than 40 percent.** The applicant stated that the proposed dwelling is to be sited at least 30 feet away from any ravine, ridge or slope greater than 40 percent.

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses; and

Finding 9: Staff finds the subject proposal meets this criterion. The entirety of the subject property is undeveloped by non-forest uses and is composed of high-yielding soils. The modestly sized 100-foot wide by 100-foot deep proposed home site is located in an open area, near an existing private road, to minimize intrusion and to minimize the amount of forest lands used to site access roads, service corridors and structures.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 and at least 30 feet from the adjoining lines of property zoned F-2 or EFU; and

Finding 10: Staff finds the subject proposal meets this criterion. The subject property is not adjacent to property zoned EFU. The proposed dwelling is to be sited at least 130 feet from adjoining property zoned F-2. The proposed dwelling is to be sited less than the required 500 feet from an adjacent property to the south zoned F-1 (Map & Tax Lot: 21-25-13-00-00900). Staff finds, however, that it is not possible to site the proposed dwelling at the required distance as the dwelling would encroach into the Approach Surface of the Airport Safety Combining Zone. Per LC 16.246(4), no structure or object above the surface of the ground is allowed to be erected, placed, grown or maintained within the Approach Surface. The proposed dwelling is located as far away as possible from the adjacent property zoned F-1 given the constraints of both the Approach Surface and the required fire siting standards, which require a 130-foot combined primary and secondary fuel break surrounding the dwelling in all directions.

(iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) are met; and

Finding 11: This criterion does not apply to the subject proposal. The subject property neither contains nor is adjacent to a Class I stream.

(v) Structures other than a fence or sign shall not be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road or a local access public road specified in Lane Code LC Chapter 15; and

(bb) 30 feet from all other property lines; and

(cc)The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

Finding 12: Staff finds the subject proposal meets this criterion. The proposed dwelling is to be sited at least 20 feet from Airport Road, the nearest right-of-way of a County road, and at least 30 feet from all other property lines. The location of the proposed dwelling complies with LC 16.211(8)(a), as discussed above, and 16.211(8)(b) through (d), as discussed below.

(b) The amount of forest lands used to site access roads, service corridors and structures shall be minimized.

Finding 13: Staff finds the subject proposal meets this criterion. The entirety of the subject property is undeveloped by non-forest uses and is composed of high-yielding soils. The modestly sized 100-foot wide by 100-foot deep proposed home site is located in an open area, near an existing private road, to minimize intrusion and to minimize the amount of forest lands used to site access roads, service corridors and structures.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:

(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements.

(aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crowns and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house. As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	Feet of Primary Safety Zone	Feet of Additional Safety Zone Down Slope
0	30	0
10	30	50
20	30	75
25	30	100

40	30	150

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

Finding 14: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be located in a level area that contains slopes of less than 10-percent within 30 feet of the dwelling. There is sufficient area to establish the required primary and secondary fuel breaks in all directions around the dwelling. ***As a condition of approval, primary and secondary fuel breaks shall be established and maintained. The minimum primary fuel break shall extend 30 feet in all directions around the dwelling. The minimum secondary fuel break shall extend 100 feet in all directions around the dwelling. All fuel breaks must be maintained in perpetuity.***

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district or shall be provided with residential fire protection as evidenced by a long term contract with a fire protection district (FPD) recorded in Lane County Deeds and Records. If the dwelling or manufactured dwelling are not within a FPD, the applicant shall provide evidence that the applicant has submitted a written request for a long term services contract with the nearest FPD and to be annexed into the FPD boundaries. If the FPD and the Planning Director determine that inclusion within a FPD or contracting for residential fire protection is impracticable, the Planning Director shall require as a condition of approval for the dwelling or manufactured dwelling that the property owner implement and maintain a Fire Protection Plan as an alternative means for protecting the dwelling or manufactured dwelling from fire hazards, consistent with the following standards:

Finding 15: Staff finds the subject proposal meets this criterion. The subject property is located within the Hazeldell Rural Fire District.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is

repaired or replaced in one year, the roof covering shall be made to comply with this section.

Finding 16: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs. Building plans for the proposed dwelling shall meet this requirement. Compliance with this requirement shall be field verified by Land Management Division staff.***

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:

(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water; or

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or

(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

Finding 17: Staff finds that it is feasible for the subject proposal to meet this criterion. The applicant proposes to drill a new well to provide domestic water supply. ***As a condition of approval, evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629.***

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the fire fighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of

compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

Finding 18: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be accessed from Airport Road by an existing private road and driveway. The applicant proposes to construct a 120-foot long extension of the existing driveway. ***As a condition of approval, the length of the private road and driveway, from the Airport Road right-of-way to the proposed dwelling, shall be constructed to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director.***

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not more than 500 feet. Turnarounds shall comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(cc) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

Finding 19: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be accessed from Airport Road by a private road that serves the nearby Tax Lot No. 133,

2900 and 2800. The private road does not appear to exit onto any other roads and is therefore considered to be a dead-end road. ***As a condition of approval, the length of the private road and driveway, from the Airport Road right-of-way to the proposed dwelling, shall be constructed to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director.***

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Finding 20: This criterion does not apply to the subject proposal. The existing private road and driveway do not contain bridges or culverts. No bridges and culverts are proposed.

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply.

Finding 21: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, information shall be provided from the Hazeldell Rural Fire District demonstrating that the roads and driveway leading from the fire station to the dwelling are adequate for fire fighting equipment to access the use, fire fighting equipment and water supply; or written documentation from an Oregon Registered Professional Engineer shall be submitted that states the roads and driveway meet the requirements of LC 16.211(8)(e)***

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

Finding 22: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be accessed from an existing unnamed private road that provides access to Tax Lot No. 843, 133, 2900 and 2800. It is County policy to require the naming of a private road when more than three uses/parcels are served. ***As a condition of approval, the private road is required to be named. The road name should not duplicate existing road names, or be similar sounding, or confusing. Upon approval of the road name, a road name sign shall be installed at the intersection of the private road and Airport Road. The road name shall be stated on the site plan. Addressing requirements shall be addressed as part of the building permit process.***

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

Finding 23: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be accessed from Airport Road by an existing private road and driveway, which exceeds 200 feet in length. ***As a condition of approval, the length of the private road and driveway, from the Airport Road right-of-way to the proposed dwelling, shall be constructed to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director.***

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for fire fighting equipment from its point of origination to its point of destination.

Finding 24: This criterion does not apply to the subject proposal. The applicant did not request modification of the standards in LC 16.211(8)(e)(i) through (vi).

V. OTHER DEVELOPMENT STANDARDS

Lane Code 16.246, Airport Safety Combining Zone:

3. Use Limitations. In a /AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

a. The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

Finding 25: Staff finds that it is feasible for the subject proposal to meet this criterion. The subject property is located within the Approach Surface and Transitional Surface of the Oakridge Airport. Per LC 16.246(5)(a), the Approach Surface is longitudinally centered on the runway centerline, extending outward and upward from the ends of the Primary Surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 5,000 feet and widening from the width of 250 feet to 1,250 feet at its outer edge. Per LC 16.246(4), no structure or object is allowed to be erected, placed, grown or maintained within the Approach Surface. Compliance with LC 16.246(4) is a condition of approval of the subject proposal.

Per LC 16.246(5)(e), the Transitional Surface extends outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of one horizontal foot to seven vertical feet to its intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above

the runway. LC 16.246(5)(e) contains a typographical error. Per LC 16.246(9) and OAR 660-013-0070(1)(a), the Transitional Surface extends outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of seven horizontal feet to one vertical foot to the intersection with the Horizontal Surface. The center of the northern boundary of the proposed home site is located approximately 50 feet south of the Approach Surface. Accordingly, the height of the dwelling is not to penetrate 1426 feet above sea level, which is equivalent to 7 feet (50 ÷ 7 = 7) above the elevation of the runway (1419 feet above sea level). The applicant documented that the elevation of the proposed home site is 1402 feet above sea level. Accordingly, at the center of the northern boundary of the home site, the height of the dwelling is not to exceed 24 feet (1426 – 1402 = 24).

The center of the proposed home site is located approximately 100 feet south of the Approach Surface. Accordingly, the height of the dwelling is not to penetrate 1433 feet above sea level, which is equivalent to 14 feet (100 ÷ 7 = 14) above the elevation of the runway (1419 feet above sea level). The applicant documented that the elevation of the proposed home site is 1402 feet above sea level. Accordingly, at the center of the home site, the height of the dwelling is not to exceed 31 feet (1433 – 1402 = 31). As a condition of approval, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface.

b. All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

c. All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

Finding 26: Staff finds that it is feasible for the subject proposal to meet this criterion. Per referral response from the Oregon Department of Aviation (Exhibit E), the applicant is required to file a Notice of Construction or Alteration (Form 7460-1) with the Federal Aviation Administration and Oregon Department of Aviation. As a condition of approval, all structures and uses shall comply with LC 16.246(3)(b) and (c).

Lane Code Chapter 15, Access Requirements:

Per referral response from Lane County Transportation Planning (Exhibit F):

Access to the proposed dwelling is from Airport Road which is a Lane County maintained rural road (LCR). It is functionally classified as a Local road having a minimum right-of-way width of 50 feet for development setback purposes [LC 15.070(1)(c)(i)(gg)].

In accordance with Lane Manual Chapter 15.515, storm water run off from private property shall not be directed to the Lane County road right-of-way, nor into any Lane County drainage facility, including

roadside ditches. Ditches adjacent to County roads are designed solely to accommodate roadway storm water run off.

A facility permit could not be found for the easement approach connection to Airport Road. A facility permit is required.

The following information is provided for informational purposes:

LC 15.055 - Minimum Requirements for Private Access Easements

(4) The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.

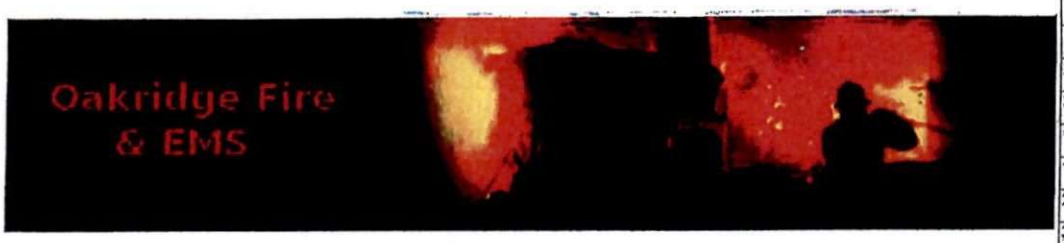
(5) All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.

(6) Development on a lot or parcel taking access over a railroad or limited access road right-of-way may require documentation that permanent or long term access over the railroad or limited access road meeting the requirements of this section has been granted.

(7) Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.

(8) The County may require that at the entrance to a Private Access Easement road a sign be posted at private expense stating the name of the private road and the words "Private Road, Not Dedicated for Public Use or Maintained by Lane County."

LC 15.055(2)(c), "...lands within a Forest Zone shall be governed by the siting and development standards of the applicable zoning district."



Transportation Planning defers to Land Management to ensure that the easement meets Forest Zone requirements from Airport Road to the proposed dwelling.

VI. DECISION

Based upon the findings above and the required conditions of approval, staff finds the applicant's request for approval of a dwelling in the Impacted Forest Lands Zone (F-2, RCP) to be consistent with applicable requirements of Lane Code 16.211(5) and Lane Code 16.211(8). The applicant's request is **approved** subject to the Conditions of Approval stated in Exhibit A.

Welcome to Oakridge Fire & EMS!

Supporting Fire and EMS Services through Community Involvement

The City of Oakridge is dedicated to providing life saving paramedic and fire services to the citizens of the community. Ensuring that lives, as well as structures, can be saved in an emergency is a critical service that ensures prosperity, growth, and the well being of the general public.

Oakridge is nestled in Eastern Lane County off of Oregon Route 58, also known as Willamette Highway 18. Oakridge is a small community with a population of 3,500. Oakridge Fire & EMS is a Fire Department governed under the City of Oakridge. The Fire Department is a combination department consisting of full-time career staff under IAFF Local 851, part-time staff and volunteers that operate under a non-profit 501 (c)3. Oakridge Fire & EMS operates 2 full-time medic units and a 3rd out when available. Our Ambulance Service Area (ASA) is 2,200 square miles, the largest in the county, with mostly rural forested area. Our Fire Service area is Oakridge city limits. We also work under an Intergovernmental Agreement (IGA) with with both Hazeldell Rural Fire District and the City of Westfir to respond for all emergency calls. We respond to all types of emergency calls as far East as Willamette Pass Ski area, mp 61, as far west as mp 17 bordering Dexter Rural Fire District. Oakridge Fire & EMS responds to over 800 calls per year, with more than 87% of those being ambulance calls. The United States Forest Service, along with various independent contractors, control fires in the surrounding National Forest.

PROUD TO SERVE OUR COMMUNITY

Oakridge Fire
and EMS

ABOUT US

Our Mission

The City of Oakridge is dedicated to providing life-saving paramedic and fire services to the community's citizens. Ensuring that lives and structures can be saved in an emergency is a critical service safeguarding prosperity, growth, and the general public's well-being.

We Save You Money

If you are a home/business owner in the Cities of Oakridge or Westfir, and/or Hazeldell Rural Fire Protection District, your business/home owner's insurance premiums may be decreased thanks to a new Insurance Services Office (ISO) rating of Oakridge Fire & EMS. Oakridge Fire & EMS improved its rating from a "5" to a "4" in areas with a hydrant system. From an "8" to a "5" in areas within 5 miles of a fire station but with no hydrant system. From a "10" to a "10W" in areas within 5 to 7 miles of a fire station with no hydrant system. In ISO's rating system, they use a 1-10 scale. The lower the number, the better the agency's rating is. The rating system reflects how quickly and efficiently a firefighting force can respond to a fire emergency. **Check with your insurance agent to ensure your insurance premiums reflect these new rates.**

About the Department

Oakridge is nestled in eastern Lane County off of Oregon Route 58, also known as Willamette Highway 18. Oakridge is a small community with a population of 3,500. Oakridge Fire & EMS is governed by the City of Oakridge. The Fire Department is a combination department consisting of full-time career staff under IAFF Local 851, part-time staff, and volunteers that operate under a non-profit 501(c)3.

We respond to over 1,200 calls annually, with more than 87% being ambulance calls. The average ambulance call takes 3 hours from the 911 call to return to the station. OFD Operates two medic units. Our ambulances respond to over 2,200 square miles, the largest ambulance service area provider in Lane County. Our Fire Service area is Oakridge city limits with an Intergovernmental Agreement (IGA) with Hazeldell Rural Fire District and the City of Westfir to respond to all emergency calls.

ABOUT US

Hazeldell RFD

The Hazeldell Rural Fire District (RFD) was formed in November 2002 to provide fire protection services to non-incorporated areas in the Oakridge/Westfir community of Lane County. The Hazeldell RFD is a legal municipal entity formed under Oregon Revised Statutes Chapters 198 and 357. This organization was created by a majority vote of Oakridge/Westfir rural residents, is funded through property tax assessments, and serves an area of about 15 square miles. To provide those services promptly to all rural residents, the Fire District needs to strategically locate facilities and fire fighting equipment across its area of responsibility.

Applicant's Statements addressing Lane Code 16.246 Airport Safety Combining Zone requirements for development of a dwelling on Map 21-25-12 Taxlot 843

LC 16.246(2) Applicability. The /AS-RCP Zone is applied to those lands adjacent to the Creswell Airport, the Cottage Grove Airport, the McKenzie Airport, the Oakridge Airport and Florence Airport which are encompassed by the surfaces set forth and described in LC 16.246(5) below and diagramed in LC 16.246(9) below. For purposes of this Chapter, the elevations of the five runways are established as follows:

(a) Cottage Grove - 641 feet above sea level.
(b) Creswell - 535 feet above sea level.
(c) Florence - 12 feet above sea level.
(d) Oakridge - 1419 feet above sea level.
(e) McKenzie - 1620 feet above sea level.

The determinations of the height of the various airport surfaces below are based on the established primary surface of the Oakridge Airport runway at an elevation of 1419' MSL.

(3) Use Limitations. In a /AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

The homesite is located underneath the Transitional Surface to the south of the Approach Surface at the west end of the runway. It is feasible to construct a dwelling on the subject property that does not penetrate the surface as described below. See analysis under the applicable Lane Code 16.246(5)(e) provision.

(b) All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.
(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

It is feasible to meet these requirements when development of the property occurs. The applicant will file a Notice of Construction or Alteration (Form 7460-1) with the Federal Aviation Administration and Oregon Department of Aviation.

EXHIBIT BB

(4) Uses Prohibited. The area lying beneath the Approach Surface beginning at the end of the Primary Surface and extending outward a horizontal distance of 1,000 feet shall be considered to be a clear zone. Within this clear zone, no structure or object, except for fences and navigational aids approved by the airport operator, shall be erected, placed, altered, allowed to grow or be maintained above the surface of the ground.

The subject property is not located beneath the Approach Zone of the Oakridge Airport.

(5) Surface Described.

(a) Approach Surface. A surface longitudinally centered on the runway centerline, extending outward and upward from the ends of the Primary Surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 5,000 feet and widening from the width of 250 feet to 1,250 feet at its outer edge.

The subject property is not located beneath the Approach Zone of the Oakridge Airport. The elevation of the approach surface at points measured outward from the runway centerline and extended upward at a slope of 20 horizontal feet to one vertical foot are shown in Table 1 below.

(d) Primary Surface. The Primary Surface is a plane longitudinally centered on the runway centerline and extending 200 feet beyond the ends of the prepared runway surface and having a width of 250 feet. For purposes of this section, the Primary Surface shall be considered as having the same elevation as its respective runway as the same are specified in LC 16.246(2) above.

The northeast corner, the closest corner, of the proposed homesite is located 242' from the southeast corner of the primary surface. The Primary Surface is established at an elevation of 1419' MSL above.

(e) Transitional Surfaces. These surfaces extend upward and outward at 90 degree angles to the runway centerline and the runway centerline extended at a slope of seven feet horizontally for each foot vertically from the sides of the Primary Surface and Approach Surface to the point of intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above the runway.

The elevation of the Transitional Surface at each corner of the proposed homesite can be determined by taking the distance of the corner from the end of the Primary Surface, dividing by 20 to account for the 20' horizontal to 1' vertical rise then taking the distance from the Approach Surface, dividing by 7 to account for the 7' horizontal to 1 vertical rise and adding the two numbers together. This analysis is contained in Table 1 below and illustrated in Exhibit BB. The analysis demonstrates that the lowest elevation of the Transitional Surface occurs at the northeast corner of the proposed homesite at an elevation of 1442' MSL. The homesite is located at an approximate elevation of 1402' MSL which allows for the development of a 40' tall dwelling. It is feasible to develop a dwelling within this height limitation. Additional survey certification can be provided as a condition of approval if necessary.

TABLE 1

Homesite Corner	Distance from end of primary surface	increase in vertical elevation at a 1v:20h ratio from end of Primary Surface	elevation of approach surface	distance from Approach Surface	increase in vertical elevation at a 1v:7h ratio from side of Approach Surface	elevation of Transition Surface
SE	242'	12'	1431'	192'	27'	1458' MSL (1419' + 12' + 27')
NE	264'	13'	1432'	76'	10'	1442' MSL (1419' + 13' + 10')
SW	384'	19'	1438'	216'	30'	1468' MSL (1419' + 19' + 30')
NW	408'	20'	1439'	100'	14'	1453' MSL (1419 + 20' + 14')

Subject: RE: 509-PA20-05064 E.KING Oakridge

Kimberly,

Thank You for your inquiry into use of the BPA access road for driveway access to your clients property.

I have attached a copy of the BPA easements and the plan & profile drawing for the area crossing your clients property. BPA's Hills Creek-Lookout Point No. 1, 115 kV transmission line right of way is 100 feet in width. The deeded access road includes portions of the road that are both inside and outside the corridor width. A survey by your client locating the right-of-way boundary may be needed to assist proper siting of structures beyond the boundary.

Also attached, is a copy of BPA's land use application form. A $250.00 non-refundable fee will be required to process the application.

Your email mentioned plans to upgrade the road and bring it up to county standards. As part of the application, BPA would like to know, the equipment that will be used to do the work, what grades and turnouts are planned, what gates may be installed and whether any utilities will be undergrounded in the road. (Distances of road features from transmission structures are especially useful for analysis and can reduce the need for site visits.) This information will allow BPA to do a

EXHIBIT CC

thorough analysis of safety hazards that could arise from excavation and grading work in the right-of-way, and to work with your client to assure safe and secure joint access to the road in the future.

Please note that a portion of the BPA access road crosses the airport property as it turns north from the county road. Permission from the Oregon State Board of Aeronautics may be needed to improve and use that portion of the road.

Due to COVID-19 work restrictions, applications can take longer to process than usual. Detailed plans and work descriptions greatly assist in the turnaround time for responses. Email correspondence and application submission is vital to aid response time.

Please contact Myself or Janai if you have further questions or concerns.

Respectfully,

Harley Canaday

Subject: [EXTERNAL] FW: 509-PA20-05064 E.KING Oakridge

Good afternoon, Janai:

I represent Ed King on the subject properties near Oakridge. Based on our site plans, none of the proposed dwellings are within the BPA right-of-way, which appears to be 80-90'. It is not our intention to propose any dwellings within the BPA easement. In fact, no structures will be built within the BPA easement.

However, we would like to utilize the existing access road. I was under the understanding that it was an old logging road. Regardless, as part of development, it will need to be improved to County standards (16' wide; compacted gravel; 20' of cleared area). This will also benefit BPA and give better access.

Attached is a rough site plan that shows all the parcels and the location of proposed access. It is feasible for us to move the dwelling site on TL 2900 eastward, if that would alleviate your concerns. A couple detailed site plans are also included.

In any case, please let me know what we need to do to obtain permission to use the existing access road, part of which is within the BPA easement?
Further, could you clarify the location and width of the BPA easement so that we can incorporate into our site plans, please?

Thank you much,
Kim

Kim, Sounds good. You may have better luck with Janal than I did, especially if you show her the c. 2010 letter to her.

If you are unable to get something from them that confirms feasibility by Friday and would like me to hold off on the decision until that can be provided, I'll need an extension to enable that.

> Kim, BPA comment for this template dwelling application are below. I have followed up with Janai to verify whether the situation is similar to that in 2010 where we had sufficient confirmation to make feasibility findings. It sounds like that is not the case this time- they would need more info and an application before they can confirm that use of their access for the proposed purposes is something arrangements can be made for. Please advise how you would prefer we proceed with the review.

Thanks Janai. At this point, we just need to know that the proposed access is feasible, e.g. that BPA is amenable to an arrangement with the applicants. Is the BPA able to confirm that at this stage? If not, is that what might be 12 weeks out or does the applicant need to submit one of your applications to before you would be able to respond?

My error I apologize this will need to be approved by BPA & has not been submitted as of yet. The existing case file we have is on another E.King parcel in Lane County.

I have attached a map that reflects where our lines are it appears the landowner will need to complete one of our applications for approval before building any dwellings in our easement areas. His parcels are marked by blue dots...
Thank you~

Hi Shawna,

BPA currently has received a request for this development & is in the process of review for a Land use permit. Due to the Covid 19 we are currently on a telework status from home. Our current eta on the Land use applications for multiple departments to review may be extended, the normal response time is: 6-12 weeks to process. Thank you for your patience. Have a great day & stay safe.

and contiguous to said right of way that (a) are danger trees on the date hereof (hereinafter called "present danger trees"), or (b) become danger trees thereafter (hereinafter called "future danger trees"). The right to top, limb or fell danger trees outside of said strips (hereinafter called "additional danger trees") may only be exercised within 3 years after all present danger trees have been cut, and the UNITED STATES OF AMERICA shall pay the person who is the owner thereof at the date of cutting such additional danger trees the market value prevailing at the date of cutting under authority of the UNITED STATES OF AMERICA, such payment to be made within a reasonable period of time after they have been so cut; and

Grantor also hereby grants, bargains, sells, and conveys unto the UNITED STATES OF AMERICA, and its assigns, a permanent easement and right of way for the construction, operation, use and maintenance of roads approximately 14 feet in width (with such additional widths as are necessary to provide for cuts, fills, and turn-outs and for curves at angle points) on, over, and across the land of the Grantor in portions of the SW¼SE¼, SE¼SW¼ and Government Lot 4 of Section 7, Township 21 South, Range 3 East, and the SE¼SE¼ of Section 12, Township 21 South, Range 2 East, W. M., Lane County, Oregon, for the following purposes, namely: the right to enter and to clear of timber, danger trees, and

Bonneville Power Administration, attached hereto and by this reference, made a part hereof.

ATTACHMENT 2.40

The Grantor reserves the right of ingress and egress over and across said roads and the right to pass and repass along and on said roads insofar as the same extend across the lands of the Grantor, said right to be exercised in a manner that will not interfere with the use of the roads by the UNITED STATES OF AMERICA, its employees, contractors, or assigns.

It is understood and agreed that if said roads are damaged by the UNITED STATES OF AMERICA, its employees, contractors, or assigns, the UNITED STATES OF AMERICA, subject to the availability of appropriations, or its assigns, will repair such damage. It is further understood and agreed that the Grantor may erect or maintain fences across such roads, provided adequate gates of not less than ten feet in width are installed, which may be kept locked, provided the UNITED STATES OF AMERICA is also permitted to install its own lock thereon.

TO HAVE AND TO HOLD said easement and rights unto the UNITED STATES OF AMERICA and its assigns, forever.

The Grantor covenants to and with the UNITED STATES OF AMERICA and its assigns that the title to all brush, timber, or structures existing upon the rights of way on the date hereof, and the title to all present danger trees shall vest in the UNITED STATES OF AMERICA on said date; and that title to any additional danger trees shall vest in the UNITED STATES OF AMERICA upon their being cut pursuant to the terms hereof; and that title to all future danger trees cut pursuant to the terms hereof shall remain in the owner thereof at the date of cutting; and that the consideration stated herein is accepted by the Grantor as full compensation for all damages incidental to the exercise of said easement and danger tree rights, except payment for any additional danger trees as defined hereinabove which may be cut under authority of the UNITED STATES OF AMERICA as herein provided.

The Grantor also covenants to and with the UNITED STATES OF AMERICA that Grantor is lawfully seized and possessed of the lands aforesaid; has a good and lawful right and power to sell and convey same; that same are free and clear of encumbrances, except as above indicated; and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the lawful claims and demands of all persons whomsoever.

The UNITED STATES OF AMERICA, Department of the Interior, acting by and through the Bonneville Power Administrator, pursuant to the Acts of Congress approved August 20, 1937 (50 Stat. 731, 16 U.S.C. 832a, et seq.), as amended, and June 30, 1949 (63 Stat. 377, 40 U.S.C. 471, et seq.), as amended, and regulations and delegations of authority issued pursuant thereto, and as part of the consideration for the easement rights hereinabove described, does hereby remise, release and quitclaim to the Grantor all that portion of Tract LO-35 as acquired by easement dated October 10, 1960 and recorded in Reel 162 '60 D, File No. 15633, Official Records of Lane County, Oregon, which lies southerly of the above-described Tract Lo-R-35.

IN WITNESS WHEREOF, EDWARD HINES LUMBER CO. has caused this instrument to be signed by its proper officers thereunto duly authorized and its corporate seal to be hereunto affixed this 18 day of July, 1968.

Cc: ADAMS Shawna L; PECK Heather
Subject: RE: ODA Comment: 509-PA20-05065 & 509-PA20-05066

[redacted]

Hi Jared,

Great to hear from you and thanks for reaching out. I'm doing well, thank you. I hope you are as well.

Yes, the ODA requests submittal of the FAA Form 7460-1 still be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport.

The applicant must submit FAA Form 7460-1 documents to the ODA and receive Letters of Determination for the proposed construction as required by OAR 738-070-0060, prior to issuance of any building permits for the Template Dwellings.

The applicant should note that a separate FAA Form 7460-1 must be submitted for each Template Dwelling.

Notification to the FAA is also required for each Template Dwelling and is completed through the FAA's online portal:

https://oeaaa.faa.gov/oeaaa/external/portal.jsp

The ODA Letters of Determination will provide recommendations for the proposed construction in regards to aviation and public safety.

I am happy to reach out to the applicant directly if further clarification is needed.

Thanks again and please let me know if you have further questions.

Best regards,

Seth Thompson

This message was sent from outside the organization. Treat attachments, links and requests with caution. Be conscious of the information you share if you respond.

Hi Seth –

EXHIBIT DD

I hope all is well with you. I just want to confirm that the ODA would still like the attached form to be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport?

If so, is their submittal of the form to you all sufficient for the County to issue building permits, or do they need to see the processing of the form through with ODA first?

Thank you much,

Jared Bauder | Planner, CFM

Subject: ODA Comment: 509-PA20-05065

Good afternoon,

Thank you for providing the opportunity for the Oregon Department of Aviation (ODA) to comment on Department File: 509-PA20-05065.

The ODA has determined that a FAA FORM 7460-1 will need to be completed by the applicant for the proposed construction.

The completed FAA FORM 7460-1 must be submitted to the ODA and FAA prior to final approval of building permits or land use decisions.

I have attached a FAA FORM 7460-1 for reference.

Please let me know if you have any questions.

Best regards,

Seth Thompson

NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION

§ 77.7 Form and time of notice.

(a) If you are required to file notice under §77.9, you must submit to the FAA a completed FAA Form 7460–1, Notice of Proposed Construction or Alteration. FAA Form 7460–1 is available at FAA regional offices and on the Internet.

(b) You must submit this form at least 45 days before the start date of the proposed construction or alteration or the date an application for a construction permit is filed, whichever is earliest.

(c) If you propose construction or alteration that is also subject to the licensing requirements of the Federal Communications Commission (FCC), you must submit notice to the FAA on or before the date that the application is filed with the FCC.

(d) If you propose construction or alteration to an existing structure that exceeds 2,000 ft. in height above ground level (AGL), the FAA presumes it to be a hazard to air navigation that results in an inefficient use of airspace. You must include details explaining both why the proposal would not constitute a hazard to air navigation and why it would not cause an inefficient use of airspace.

(e) The 45-day advance notice requirement is waived if immediate construction or alteration is required because of an emergency involving essential public services, public health, or public safety. You may provide notice to the FAA by any available, expeditious means. You must file a completed FAA Form 7460–1 within 5 days of the initial notice to the FAA. Outside normal business hours, the nearest flight service station will accept emergency notices.

§ 77.9 Construction or alteration requiring notice.

If requested by the FAA, or if you propose any of the following types of construction or alteration, you must file notice with the FAA of:

(a) Any construction or alteration that is more than 200 ft. AGL at its site.

(b) Any construction or alteration that exceeds an imaginary surface extending outward and upward at any of the following slopes:

(1) 100 to 1 for a horizontal distance of 20,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(2) 50 to 1 for a horizontal distance of 10,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway no more than 3,200 ft. in actual length, excluding heliports.

(3) 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section.

(c) Any highway, railroad, or other traverse way for mobile objects, of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, for a private road, 23 feet for a railroad, and for a waterway or any other traverse way not previously mentioned, an amount equal to the height of the highest mobile object that would normally traverse it, would exceed a standard of paragraph (a) or (b) of this section.

(d) Any construction or alteration on any of the following airports and heliports:

(1) A public use airport listed in the Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement of the U.S. Government Flight Information Publications;

(2) A military airport under construction, or an airport under construction that will be available for public use;

(3) An airport operated by a Federal agency or the DOD.

(4) An airport or heliport with at least one FAA-approved instrument approach procedure.

(e) You do not need to file notice for construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded structure will not adversely affect safety in air navigation;

(2) Any air navigation facility, airport visual approach or landing aid, aircraft arresting device, or meteorological device meeting FAA-approved siting criteria or an appropriate military service siting criteria on military airports, the location and height of which are fixed by its functional purpose;

(3) Any construction or alteration for which notice is required by any other FAA regulation.

(4) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

INSTRUCTIONS FOR COMPLETING FAA FORM 7460-1

PLEASE TYPE or PRINT

ITEM #1. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #2. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #3. New Construction would be a structure that has not yet been built.

Alteration is a change to an existing structure such as the addition of a side mounted antenna, a change to the marking and lighting, a change to power and/or frequency, or a change to the height. The nature of the alteration shall be included in ITEM #21 "Complete Description of Proposal".

Existing would be a correction to the latitude and/or longitude, a correction to the height, or if filing on an existing structure which has never been studied by the FAA. The reason for the notice shall be included in ITEM #21 "Complete Description of Proposal".

ITEM #4. If Permanent, so indicate. If Temporary, such as a crane or drilling derrick, enters the estimated length of time the temporary structure will be up.

ITEM #5. Enter the date that construction is expected to start and the date that construction should be completed.

ITEM #6. Please indicate the type of structure. DO NOT LEAVE BLANK.

ITEM #7. In the event that obstruction marking and lighting is required, please indicate type desired. If no preference, check "other" and indicate "no preference" DO NOT LEAVE BLANK. NOTE: High Intensity lighting shall be used only for structures over 500' AGL. In the absence of high intensity lighting for structures over 500' AGL, marking is also required.

ITEM #8. If this is an existing tower that has been registered with the FCC, enter the FCC Antenna Structure Registration number here.

ITEM #9 and #10. Latitude and longitude must be geographic coordinates, accurate to within the nearest second or to the nearest hundredth of a second if known. Latitude and longitude derived solely from a hand-held G P S instrument is NOT acceptable. A hand-held GPS is only accurate to within 100 meters (328 feet) 95 percent of the time. This data, when plotted, should match the site depiction submitted under ITEM #20.

ITEM #11. NAD 83 is preferred; however, latitude and longitude may be submitted in NAD 27. Also, in some geographic areas where NAD 27 and NAD 83 are not available other datum may be used. It is important to know which datum is used. DO NOT LEAVE BLANK.
ITEM #12. Enter the name of the nearest city and state to the site. If the structure is or will be in a city, enter the name of that city and state.

ITEM #13. Enter the full name of the nearest public-use (not private-use) airport or heliport or military airport or heliport to the site.

ITEM #14. Enter the distance from the airport or heliport listed in #13 to the structure.

ITEM #15. Enter the direction from the airport or heliport listed in #13 to the structure.

ITEM #16. Enter the site elevation above mean sea level and expressed in whole feet rounded to the nearest foot (e.g. 17'3" rounds to 17', 17'6" rounds to 18'). This data should match the ground contour elevations for site depiction submitted under ITEM #20.
ITEM #17. Enter the total structure height above ground level in whole feet rounded to the next highest foot (e.g. 17'3" rounds to 18'). The total structure height shall include anything mounted on top of the structure, such as antennas, obstruction lights, lightning rods, etc.

ITEM #18. Enter the overall height above mean sea level and expressed in whole feet. This will be the total of ITEM #16 + ITEM #17.

ITEM #19. If an FAA aeronautical study was previously conducted, enter the previous study number.

ITEM #20. Enter the relationship of the structure to roads, airports, prominent terrain, existing structures, etc. Attach an 8-1/2" x 11" non-reduced copy of the appropriate 7.5 minute U.S. Geological Survey (USGS) Quadrangle Map MARKED WITH A PRECISE INDICATION OF THE SITE LOCATION. To obtain maps, contact USGS at 1-888-275-8747 or via Internet at "http://store.usgs.gov". If available, attach a copy of a documented site survey with the surveyor's certification stating the amount of vertical and horizontal accuracy in feet.

ITEM #21.
- For transmitting stations, include maximum effective radiated power (ERP) and all frequencies.
- For antennas, include the type of antenna and center of radiation (Attach the antenna pattern, if available).
- For microwave, include azimuth relative to true north.
- For overhead wires or transmission lines, include size and configuration of wires and their supporting structures (Attach depiction).
- For each pole/support, include coordinates, site elevation, and structure height above ground level or water.
- For buildings, include site orientation, coordinates of each corner, dimensions, and construction materials.
- For alterations, explain the alteration thoroughly.
- For existing structures, thoroughly explain the reason for notifying the FAA (e.g. corrections, no record of previous study, etc.).

Filing this information with the FAA does not relieve the sponsor of this construction or alteration from complying with any other federal, state or local rules or regulations. If you are not sure what other rules or regulations apply to your proposal, contact local/state aviation's and zoning authorities.

Paperwork Reduction Act Statement: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection displays a currently valid OMB Control Number. The OMB control number for this information collection is 2120-0001. Public reporting for this collection of information is estimated to be approximately 19 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, completing and reviewing the collection of information. All responses to this collection of information are mandatory for anyone proposing construction or alteration that meets the criteria contained in 14 CFR 77. This information is collected to evaluate the effect of proposed construction or alteration on air navigation and is not confidential. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177-1524.

ATTACHMENT 2.53

...l Regulations (14 CFR), part 77 authorizes FAA to collect this information. PURPOSE(S): FAA will use the information provided to administer the Aeronautical Study Process. ROUTINE USE(S): In accordance with DOT's system of records notice, ALL 18 Mailing Management System and DOT/FAA 828 Petitions for Exemption, Other than Medical Exemption-Public Dockets, the information provided may be disclosed to officials within the Federal government and the public in general.

Hello Chris, Can you confirm whether your email is intended for the Hearings Official in consideration of template dwelling applications PA23-05321, PA23-05322, PA23-05323 scheduled for public hearings tomorrow morning at 9:30 am? If so, please also confirm your mailing address so I and Julia Dobberstein (County staff planners assigned to those applications) can add you to the party list for future notices concerning the applications?

Best regards,

To whom it may concern we purchased our F2 land in 2014 with the understanding we would be able to get a template lot approval. We used our savings to buy the land and hope to build a house on it one day. We finally got to the point of being ready to build and applied to the county for a template lot approval and just before we were approved the decision was made by Luba regarding big game overlay on F2 land. We have been stuck in limbo with a property we cannot sell or build on and would greatly appreciate anything the County Board could help our family with on this matter.

Sincerely

Chris and Meagan Leturno

Re: PA23-05321, PA23-05322, PA23-05323;
Applicants' First Open Record Submittal

Dear Shawna:

I am having delivered to LMD today two stacks of documents. One is a Compilation of documents relevant to the Policy 11 interpretation issue – mostly acknowledgment documents from the early 1980s. The second is a compilation of recent HO decisions addressing Policy 11.

Attached to this letter is a Table of Contents for each set.

This is a lot of paperwork. To facilitate your compiling this for the record I will send you a Drop Box link to the documents and decisions. However, I am counting on the physical delivery to constitute "filing."

Separately, I am submitting a letter that resolves the issue of the location of the driveway. I believe this is the only substantive outstanding issue in these applications other than the Policy 11 question. My goal, of course, is to maintain support of staff on all issues other than the Policy 11 issue.

Sincerely,

Bill Kloos

Bill Kloos

VICTOR ATIYEH
GOVERNOR

Department of Fish and Wildlife
NORTHWEST REGION
ROUTE 5, BOX 325, CORVALLIS, OREGON 97330 PHONE 757-4186

June 16, 1980

Lane County Board of Commissioners
Otto t'Hooft, Chairman
Courthouse, Public Service Building
125 East Eighth Avenue
Eugene, Oregon 97401

Dear Sir:

The Department of Fish and Wildlife has completed review of the draft "Coastal Goals Compliance Report" and proposed amendments. We compliment the county for drafting a document which follows the requirements of Goals 16, 17 and 18 and considers the needs of the citizens of the county.

As I stated during the June 12th hearing, the Department supports adoption of the Coastal Goals Compliance Report. However, we do have several suggestions we wish to offer for your consideration.

These are:

1. Page 17. Policy 1 (Natural)
   Replace existing language with:

   "Authorized log storage sites in existence as of July 1, 1980, are considered a grandfathered use which may be continued. Additional sites or expansion of existing sites must be authorized by appropriate state and federal agencies. However, due to the impacts of log storage in intertidal areas, Lane County recommends against expansion of existing sites or creation of new storage sites in Natural management units".

   We recommend this new language to alleviate wording in the June 12th draft which "tells" the DSL how it will operate its lease laws. We also attempt to omit controversial language in the proposed amendments which suggests that all existing log storage is water dependent.

2. Page 18. Policy 3 (Natural)

   The policy should be retained as originally drafted in the June 12 draft. The Department of Fish and Wildlife is solely responsible by ORS for commercial fishing and clamming. This department would oppose the proposed amendment. However, a statement in the plan which clarifies the county's feelings would be welcomed.

3. Page 18. Policy 1 (Conservation)

   Change the policy wording similiar to No. 1 above.

4. Page 19. Policy 6 (Conservation)

   Proposed new policy:

   Filling, dredging and other activities which degrade natural estuarine values will only be allowed if they constitute a minor alteration of the estuary or are part of an active restoration project and:

   a. are required for navigation or other water-dependent uses which require an estuarine location,

   b. if a public need is demonstrated,

   c. no upland location exists, and

   d. adverse impacts are minimized.

5. Page 19, 2nd paragraph (Development)

   The amendment offered in May 15 appendix should be incorporated into report.

6. Page 20-21. Mitigation and Restoration

   The Department encourages the county to identify potential sites even if they are currently private-diked lands in agricultural use. We have identified some of these sites (blue color) in the attached maps. The Department does not favor removal of the two islands as suggested in ORD803. The islands have developed substantial fish and wildlife values which would be impacted by such a project.

7. Page 22. Conditional uses (Natural)

   Change aquaculture to aquaculture facilities. Delete commercial clamming and fishing.

   The reason for these changes is that these activities are regulated under statute by the Department of Fish and Wildlife.

8. Page 22. Permitted uses (Conservation)

   Change aquaculture to aquaculture facilities. See reason expressed in number 7 above.

9. Page 24. Proposed Management Unit B (Conservation)

We offer the following modifications to the language proposed in the amendments:

Discussion: The Port of Siuslaw has expressed a desire to develop a boat basin and harbor of refuge in the upriver cove, (DOMSEA Bay) when the jetties are extended. The cove area does contain clams, shrimp and other benthic organisms, but biological productivity is minor in the content of the estuary as a whole. The site is, however, biologically productive and valuable for fish and wildlife, especially birds, of the lower bay. The site would provide good shelter with reconstruction of the jetty and has the additional advantage of proximity to the river mouth. The State Marine Board cites a 12% increase in larger boats in Lane County in 1979 and supports development of the harbor to help provide moorage for existing boats and anticipated future increases in moorage need. Lane County supports development of the harbor of refuge contingent on the Port meeting the requirements of state and federal agencies, including providing the county with sufficient data to develop an exception to Goal 16. Special care should be exercised to protect the upriver Piddock Bay area from adverse development impacts.

The small cove immediately west of DOMSEA Bay and north of the north jetty at approximately River Mile .5 was formed by water washing through gaps in the existing jetty. The cove supports ~~xxxxxxx~~ shorebirds. The cove may require some filling to allow for jetty maintenance or reconstruction. Any filling of the cove shall be the minimum necessary with total filling of the cove avoided. The cove shall be used only as needed for expansion and reconstruction of jetties, subject to state and federal agency requirements.

I must point out that the Department has agreed with the Fish and Wildlife Service's position on the proposed boat basin. However, we are willing to re-evaluate the proposal when sufficient data is available to address the criteria required for an exception.

10. Page 25. Management Unit E

We support the language in the June 12th draft for this management unit as we do not favor removal of the two islands.

11. Page 33. Policy 8 (Prime Wildlife Area)

We offer the following revised policy statement:

Timber harvesting shall be in accord with the Oregon Forest Practices Act. Lane County recognizes that the current Forest Practices Rules do not contain adequate provisions to implement requirements of Goal 17. Thus, the county encourages the State Forester to evaluate the Rules as required by Goal 17, ~~[illegible]~~ Until such an evaluation is completed, timber harvesting activities in the Prime Wildlife Area should be in accord with the Forest Practices Act after consultation within the Department of Fish and Wildlife to determine a harvest plan which will result in the least impact on wildlife inhabiting the designated area.

12. Page 34. Policy 6 (Significant Natural Area)

Revise language similiar to that proposed in number 11 above.

13. Page 48. Prime Wildlife MU20

Shoreland management 20 is an upriver extension of the prime wildlife shorelands referred to in points 14 and 15 below. We concur with removing from this unit pasturelands and aquatic marshes previously identified in these comments. However, this Department strongly opposes the proposed amendment to delete this unit.

14. Page 49. Prime Wildlife MU21

The Department is soundly opposed to the proposed amendment's attempt to remove the Prime Wildlife Area designations from the south side of the estuary from Glenada to the upper end of Duncan Slough (shoreland units 20 and 21).

We also oppose the draft language in the June 12th draft. We do, however, support the description of management units 20 and 21 in the Feb. 1 draft with provisions for modifying the 1,000 foot allowance in 18-11-29 to allow an approximately 5-acre buffer to protect the heron rookery.

Modifications of the Feb. 1 draft as represented in the June 12th draft and in the May 15 list of amendments are not supportable by biological data from this agency or the Wilsey and Ham report.

15. Page 48. Residential Development MU 28

This forested shoreland habitat should be classified "Natural Resource Preservation" with Prime Wildlife Area adjacent to the estuary.

We are opposed to the Residential Development designation. To place these shorelands in the Residential Development designation the county must develop data to take an exception to Goals 4 and 17. The timbered shorelands between Glenada and Lawson Creek possess some of the highest shoreland wildlife habitat values on Siuslaw Bay.

The maps submitted with the draft report contain some errors. These relate to placement of shoreland designations on aquatic areas and omission of some valuable habitats from natural management units. We do not fault the county for these mapping errors as they are relatively minor. We have recently provided county staff with an estuary habitat classification map completed by our department in 1979. Our habitat maps were completed under contract with LCDC and are being used by that agency in acknowledgement reviews.

Please relate the numbered comment below to corresponding numbers on the attached county maps.

1) The natural aquatic management unit should be expanded to include the area delineated. This area has been identified as containing some of the highest diversity and quantity of organisms within the estuary. It includes the only known habitat in Siuslaw Bay for certain clam species.

2) This area should be re-designated natural. Its expanse of intertidal area and natural resources place it, according to goal language, with the natural designation. The unit description should allow repair of the rock groins.

3) This marsh area should be natural and placed in aquatic unit "D".

4) This marsh area should be natural and placed in aquatic unit "D".

5) The marsh area east of the North Fork should be natural and placed in unit "E".

6) These areas are potential restoration sites.

7) Management unit "E" should be enlarged to include this natural marsh area.

8) These marsh areas should be included in the natural aquatic management unit "F".

9) This marsh area should be included in natural aquatic management unit "F:.

10) These parcels are potential restoration sites.

11) This is a potential restoration site.

~~12) This is a potential restoration site.~~

13) This marsh area should receive a conservation aquatic designation.

~~14) These parcels are potential restoration sites.~~

15) This marsh habitat should be placed in natural management unit "H".

16) These marsh habitats should be placed in natural management unit "H".

17) This is a potential restoration site.

18) This marsh should be placed in natural aquatic unit "H" or "I".

~~19) These parcels are potential restoration sites.~~

20) These marsh areas should be placed in natural aquatic unit "I".

I again take this opportunity to compliment the county on the excellent job of drafting a coastal goal compliance report. The coastal goals are very specific and demanding and we believe the county's report follows the intent of these goals. Our comments are not offered to criticize but to assist the county in meeting goal requirements.

We have enjoyed the opportunity to work with the county in this portion of the planning process. If we can be of assistance in reviewing additional portions of the county's comprehensive plan or clarify any comments in this letter, please call.

Sincerely,

Jim Lauman for

Jim Lauman, Asst. Chief
Environmental Management Section

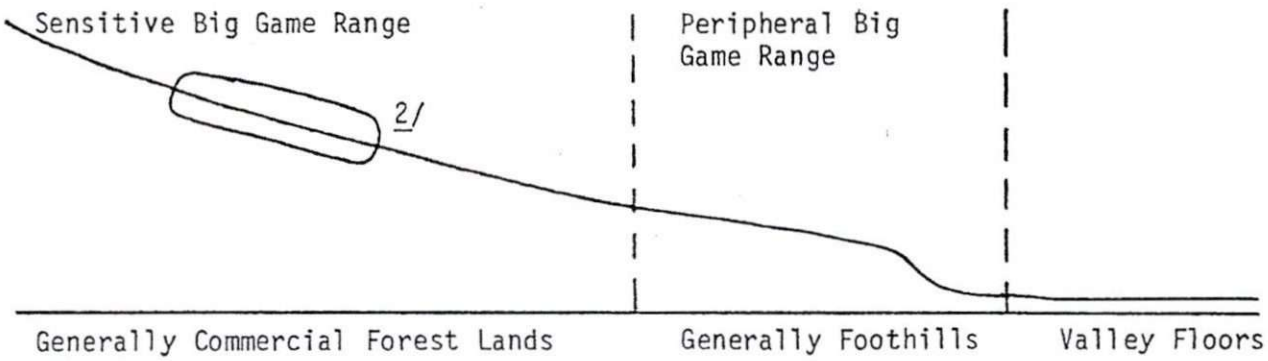
JL:pb

BIG GAME RANGES - COAST RANGE

Definitions

Sensitive Big Game Range - That portion of the county which supports the majority of big game. In general these lands are sparsely developed commercial forest lands. They also provide the majority of big game recreational opportunity.

Peripheral Big Game Range - Foothill areas of the county generally located between commercial forest lands and valley floors. These lands support substantial big game populations and serve as a wintering area for animals from sensitive range in severe winters. However, conflicts exist between big game and other uses. These existing conflicts limit management options and recreational opportunities.



Impacted Big Game Range - Those areas of the county that have existing levels of land-use which preclude future wildlife management options of maintaining viable wildlife populations and recreational opportunity. These areas frequently contain populations of big game animals.

Development Within Big Game Ranges 1/

1. Sensitive Big Game Range: 1:80 acres

2. Peripheral Big Game Range: 1:40 acres

   * The plans should not allow for subdivisions or partitioning below the recommended density levels.

1/ The Department's recommendations relate to overall residential density and not minimum lot sizes.

2/ Lands already developed to a density which precludes big game usage should not be included within big game range maps.

WORKING PAPER:

Flora & Fauna

DRAFT

MAR ~ 1982

COMPREHENSIVE PLAN REVISION

LANE COUNTY, OREGON

FLORA AND FAUNA WORKING PAPER

INTRODUCTION

Oregon's wildlife and fish resources are varied and abundant. Lane County alone with its large land area and highly diverse landscape from snow level to sea level provides numerous specialized habitat areas for more than 290 species of birds, 70 mammal, 13 reptile, 17 amphibian and over 50 fish species. This diversity also is apparent in the vegetation of the County from coastal salt spray meadows inland to the treeless crests of the Cascade range.

Inventories of fish and wildlife species were compiled from Oregon Department of Fish and Wildlife information, various environmental assessment or impact statements and the Eugene-Springfield Metropolitan Area Wildlife Study. These lists are presented in the appendix to this report.

Inventories of habitat types are presented on USGS maps at a scale of one inch equaling one mile (15-minute series). This shows unique, endangered or threatened sites such as eagle nests, snowy plover sites, heron rookeries, band-tailed pigeon mineral springs, osprey snags and northern spotted owl sites. Further, major and Peripheral Big Game Range and general riparian vegetation around Class I streams are shown on these maps. Noncoastal wetlands and Sensitive Fish and Waterfowl areas are depicted on other maps.

The USGS maps also show general locations of Nature Conservancy sites and sites inventoried by the Oregon Natural Area Preserves Advisory Committee (NAPAC) which are in Lane County's Inventory.

Statewide Planning Goal #5 - Open Spaces, Scenic and Historic Areas, and Natural Resources - requires consideration of numerous resources, among them fish and wildlife habitat, ecologically and scientifically significant natural areas and wetlands.

Wetlands are considered here as fish and wildlife habitat. Although they have many valuable functions, their habitat value is a primary one. The original list of ecologically and scientifically significant areas included 86 sites from the Nature Conservancy Inventory and 12 sites from the Natural Area Preserves Advisory Committee. These are further refined in this paper.

Several deficiencies in Lane County's treatment of fish and wildlife habitats and natural areas were noted by LCDC. These were:

1. Updated inventory information required for sensitive fish and waterfowl areas and noncoastal wetlands.

2. Provide more specific information on Nature Conservancy Inventory sites.

3. Adopt mandatory policies regarding the protection of natural areas and noncoastal wetlands and clarify this with existing policies that encourage drainage projects.

4. Adopt implementing measures for the protection and/or resolution of conflicts with noncoastal wetlands, natural areas and the following types of fish and wildlife habitat: big game range, riparian areas and sensitive fish and waterfowl areas.

After these orders to comply were written, LCDC adopted administrative rule 660-16-00 which gives very specific procedures for evaluating Goal 5 resources. The administrative rule applied to Lane County due to the continuance status of the County. Therefore, this paper addresses the items set out in the orders to comply and does so in the format of OAR 660-16-00. Specifically, this rule requires that when conflicts to Goal 5 resources can be anticipated in the plan, the economic, social, environmental and energy (ESEE) consequences of the conflict are analyzed and resolution to the conflict proposed. In cases where a resource is considered significant but conflicts cannot be anticipated, procedures are established to analyze conflicts as they are identified.

The contents of this paper are as follows:

A. General Findings. Concise statements summarizing facts on Lane County's flora and fauna resource and potential impacts of certain land use activities.

B. Habitat Types. A description of the 12 habitat types found in Lane County.

C. Endangered or Threatened and Special Concern Species. A listing of the threatened or endangered species found in the County and special habitat requirements for some of them.

D. Habitats of Particular Concern. Location, quality and quantity information and conflict analysis for the following types of habitat:

Riparian vegetation
Noncoastal wetlands
Sensitive fish and waterfowl
Big game range

E. Natural Areas. Location, quality and quantity of the sites on the Nature Conservancy and NAPAC lists determined to be significant, including conflict analysis.

F. Policy Recommendations.

G. Appendices. Includes lists of species.

FINDINGS

1. Lane County's fish and wildlife resource is highly varied. Diverse habitats, ranging from coastal to alpine, support nearly 400 vertebrate species. Status of individual species extends from common to endangered.

2. Four physiographic provinces - coast, coast range, western interior valleys and western Cascades - are found in Lane County. Each province represents differences in climate, substrate, topography and other physical

and chemical variables. Each is distinct and represents a unique diversity, supporting flora and fauna which are adapted to the region.

3. Twelve distinct wildlife habitats are found in Lane County: estuary and bay (includes subtypes coastal salt marsh, tidelands and eelgrass), inland marsh, lakes and reservoirs, wet meadows, annual and perennial grasslands, riparian vegetation, coastal shore pine/spruce, Douglas fir/trailing blackberry, true fir/alpine, deciduous hardwoods, agricultural lands and cities.

4. Lane County's fish and wildlife resource provides substantial social, economic and ecological values.

5. A diversity of habitats is required to maintain Lane County's fish and wildlife fauna. Distribution of many species is limited by specialized habitat requirements.

6. Coordination between Lane County and state and federal agencies is necessary to properly harmonize wildlife needs and other resource values.

7. There will be a continuing need to review and update fish and wildlife inventory information.

8. Numerous land use activities have the potential to diminish the quality and quantity of fish and wildlife habitat. Habitat losses for a broad spectrum of fish and wildlife continue to occur. Sound resource management is necessary to minimize this loss.

9. Lack of biological information for many species handicaps the development of management procedures such as habitat guidelines.

10. Species not presently endangered or threatened may become so if their habitats are not adequately protected.

11. Examples of habitats of special value to fish and wildlife include high quality riparian and wetlands areas, estuaries, Major and Peripheral Big Game Ranges and other sensitive, fragile or unique areas.

12. Protecting water quality and quantity is vital to fish and wildlife resources.

13. A majority of certain habitat types and major watersheds lie within federal ownerships in Lane County. Therefore, public land managers have prime responsibility for protection of these habitats and watersheds. Where private lands support certain habitats, County land use planning needs to take into consideration wildlife needs, Statewide Planning Goal objectives and the rights and management objectives of the private landowner.

14. Land use activities which could negatively impact fish and wildlife habitat if uncontrolled include:

    a. Conversion of agricultural and forest lands to other uses;

b. Division of large tracts of farm and forest lands to small parcels;

c. Field burning, fencerow clearing, wetland drainage and certain other agricultural practices;

d. Careless or unplanned road construction;

e. Gravel extraction from streambeds.

f. Logging and road building activities which do not conform strictly to the Oregon Forest Practices Act.

15. Designated natural areas in Lane County provide examples of unique or outstanding habitat or species assemblages.

The many other riparian and wetland areas in the County range from undisturbed, very diverse areas to fringe marshes and riparian zones in urban areas. Often the small marshes and riparian zones in agricultural and urban areas take on a greater degree of importance due to their scarcity. They may provide a refuge for species whose habitat has been destroyed elsewhere.

Quality can be degraded in different ways. Certainly, removal of vegetation most immediately destroys most habitat value of an area. This can be done either directly by tearing out plants or by draining away water so that wetland or riparian vegetation can no longer survive. Human presence can drive off some forms of wildlife, but if not in large numbers will not generally degrade habitat values too much. Intense activities, such as recreation sites, will have a greater effect on habitat values and should be closely examined in view of this prior to approval.

Another activity which can greatly damage riparian and wetland areas, but which is only a minor problem in Lane County, is livestock grazing. The continual disturbance of streambanks can retard vegetation and can cause severe erosion.

Quantity

No good inventory exists on the quantity of riparian habitat in Lane County. Mapping of riparian habitat around Class I streams gives only a general indication of its location, but no figures on depth of the zone from the waterbody or cleared areas. The Willamette River Greenway and coastal lakes and rivers have the best mapping of riparian vegetation, often by aerial photography on large-scale maps, but these areas already have mechanisms to protect riparian vegetation.

The National Wetland Inventory maps will shortly cover about one-half of the County. General location of wetlands is given but no quantification of acreage by wetland type (and no indication of wetland quality). This mapping system, prepared by US Fish and Wildlife Service, will eventually cover the entire County.

Conflicting Uses

Two major activities conflict with preservation of riparian and wetland habitat areas:

1. Destruction of vegetation for any purpose; forestry, agriculture, construction, recreation, aggregate extraction, etc.; and

2. Draining surface or subsurface water which then changes the vegetative structure and generally the habitat value.

The end result of both of these activities is reduction in habitat value, flood control, water pollution control, and stability along streambanks for riparian vegetation.

An ESEE analysis for loss of riparian and wetland areas from either direct destruction or drainage follows.

ESEE Analysis

Economic Consequences

1. Since wetland and riparian vegetation decrease water velocity and damage from floods, removal of this vegetation could increase economic damage from flooding.

2. Merchantable timber removed from riparian and wetland areas is a source of employment, income and revenue in Lane County, although most species growing there have low economic value compared to some other species of timber.

3. Lands cleared for agricultural use could increase economic activity from that source.

4. Lands disturbed for aggregate extraction could increase economic activity from that source.

5. Removal of riparian and wetland vegetation could result in a loss of revenue from hunting which could result from a decrease in game species of fish and wildlife.

Social Consequences

1. Decline in wildlife diversity can be an important factor for many persons who enjoy living in proximity to watchable wildlife.

2. Regulations aimed at maintaining riparian and wetland vegetation, not just requiring building setbacks from those areas, would result in a much greater degree of governmental restrictions on most lands than presently exist. The sort of enforcement effort it would require to regulate vegetation removal in riparian and wetland areas Countywide would be truly massive. The payoff from this sort of effort must be particularly questioned since a majority of the County is timberland which is regulated by the State Forest Practices Act, not County regulations for riparian and wetland areas.

3. The question of aesthetics varies greatly with the viewer. Some persons prefer the look of natural vegetation along a water body, others find an artificial park-like setting preferable. A law requiring maintenance of riparian vegetation would force one perspective on a landowner.

4. The greater erosion potential when riparian and wetland vegetation is removed could result in more turbid water. This could have an effect on downstream recreational uses.

Environmental Consequences

1. Removal of riparian and wetland vegetation would result in decreased wildlife habitat, with a decrease in wildlife diversity.

2. Bank stability would be decreased with removal of vegetation. This causes more erosion, dirtier water and negative effects on aquatic life.

Riparian habitats have been recognized as one of the most important and valuable land types in Oregon for several reasons: (1) they play an essential role in determining the quality of fish habitat; (2) they provide a vegetative buffer for streambank stability; (3) they offer seasonal and year-long habitat to the greatest numbers and diversity of terrestrial wildlife populations than any other habitat type; (4) they accommodate and attract important recreational activities such as hunting, fishing, boating, camping and hiking; (5) their aesthetic value is high because of the pleasing combination of land and water, attractive and unique vegetation types, and abundant animal life; (6) their ability to control pollution by filtration; and (7) their ability to assist in flood control by water containment.

Fishery habitat is directly related to the conditions in the surrounding watershed, especially the adjacent riparian zone. Riparian vegetation provides a number of important features to aquatic habitat: (1) streambank stabilization and erosion control which reduces sedimentation and helps maintain an oxygen supply to eggs and juvenile fish; (2) a natural filter to settle out sediments and reduce downstream siltation; (3) shade to maintain suitable water temperatures for aquatic life; (4) organic debris to feed aquatic insects which are essential to the diets of many fish; (5) bank stability to minimize stream damage from torrential floods; (6) overhanging bank cover from the roots of trees, shrubs, and other vegetation to provide fish with protective cover and terrestrial insects; and (7) groundwater recharge by its ability to absorb water. When a riparian zone is adversely affected by human activities, the quality and quantity of fish production will be affected.

Riparian vegetation likewise plays a vital role for wildlife. The habitat is a gradation between aquatic habitat of the stream and surrounding terrestrial habitat. The riparian zone usually provides all four basic habitat components: water, food, cover and space. The habitat is generally more diverse than upland plant communities, and therefore supports greater wildlife diversity and higher numbers of individuals. Certain fish and wildlife species are totally dependent on the riparian ecosystem, other species use the area as a travel corridor, or for feeding, roosting, nesting or watering. The significance of riparian habitat to game and nongame wildlife, both within and in the vicinity of the area, surpasses that of any other habitat type (American Fisheries Society, 1980).

Very similar statements can be made for wetland ecosystem species diversity and habitat importance as for riparian areas. Their variety of habitats, and often their inaccessibility, make them very important for many species. Wetlands which occur in agricultural or developed areas take on an even greater degree of significance as they are often a refuge for animals which have been displaced and can provide some of the only available living space for many forms of wildlife.

Administrative Rule 66-16-000 requires examination of the location, quality and quantity of Goal 5 resources, including wetlands and fish and wildlife habitat. Riparian vegetation, being an important habitat type, was distinguished in the Orders to Comply as needing better implementing procedures for protection or resolution of conflicts.

After examination of location, quality and quantity, a decision must be made whether the resource sites are significant. If so, conflicting uses must be

identified. An analysis of ESEE consequences must be done, then a program developed for resolution of conflicts. The resolution can take three courses: a) preserve the resource site; b) allow the conflicting use fully; or c) specifically limit conflicting use.

Location

Although the total amount of riparian and wetland vegetation is much reduced from the amount prior to human habitation of Lane County, these habitat types still exist all around us. Unless the water regime which supports the area changes, areas which have been cleared will revert to riparian or wetland vegetation without constant upkeep.

All lakes, reservoirs and Class I streams in Lane County have been mapped. These maps are not included here for budgetary purposes, but are available in the Planning Department offices. Class I is a designation used by the Oregon Forestry Department and the Oregon Department of Fish and Wildlife to indicate streams important for fish life. Class I streams are those valuable for domestic use, important for angling or other recreation, and/or used by significant numbers of fish for spawning, rearing or migration routes. Stream flows may be either perennial or intermittent during parts of the year. Unless in a disturbed state, riparian vegetation will exist around all of these. Certain areas of stream and lake banks have been designated as "sensitive fish and waterfowl habitat," and will be discussed and analyzed later in this report. This section, then, deals only with riparian areas outside of the "sensitive" areas.

In the northwest quarter of the County, wetlands have been mapped by the US Fish and Wildlife Service. The maps, called the National Wetland Inventory, are very detailed and use an intricate classification system to show types of wetland vegetation. Most of the mapping is done at a scale of 1" = one mile, with the area close to Eugene at a scale of 1" = 2000'. Neither of these scales work well for most site specific uses. They give general ideas about where within a section wetland vegetation occurs, but field examination would be necessary to determine exactly where the wetland occurs.

This mapping should eventually be completed for all of the County, but lack of federal funding may extend that effort. Mapping for the southwest quarter of the County should be released in draft form by summer, 1982. As mentioned earlier, where this Inventory exists, it will be considered the maximum number of sites which will be considered wetlands. Where this mapping is not yet completed, only the earlier definition of a wetland will be used to identify sites.

Quality

For the most part, quality of riparian and wetland areas is discussed as it relates to quality for fish and wildlife habitat, as this is considered one of their prime functions. The "sensitive fish and waterfowl" areas designated by the ODFW are a subunit of riparian and wetland areas. These areas, discussed in the next section, are the most important and highest quality riparian and wetland areas.

2. Northern Bald Eagle. This nationally threatened species requires buffer areas around nest sites with restricted activities during nesting seasons. Federal land management policies provide protection for this bird on federal lands. No nests on private land are presently known in Lane County. If nest sites are identified on private land, an ESEE analysis should be done on conflicts which would either destroy the nest site or inhibit fledgling viability. The County should then work with the Oregon Department of Forestry to make them aware of the location of these areas and implementation methods adopted by the County for conflict resolution.

3. Wolverine. This threatened species requires remote, high elevation areas of the Cascades free of logging and intensive human activities. These areas are in federal ownership and therefore not under County jurisdiction.

4. Silverspot butterfly. This species is on the National list of Threatened and Endangered species. It requires undisturbed salt spray meadows and adjacent upland brush and treeline areas. It is only found along a small section of the Oregon coast. The Coastal Resources Management Plan of Lane County recognizes this species and applies a Prime Wildlife Management Unit to its habitat.

5. Western snowy plover. This species, threatened in Oregon, requires undisturbed areas of dry sand along the beach between the highest tide line and the vegetation line. The Oregon Department of Transportation, State Parks Division, regulates activities including vehicular use of this area. The Oregon Department of Fish and Wildlife is currently preparing a state management plan for the snowy plover. This plan will probably include recommendations for areas closed to vehicles either year round or seasonally to protect the habitat of this bird and other important shorebirds.

   Since the habitat is within state jurisdiction, Lane County proposes no direct action, but does support state activities to protect this species.

6. American osprey. This bird is a special interest species because its very specific nesting requirements in timber areas make it susceptible to population losses from habitat modification. The bird is neither threatened nor endangered and is found throughout the County, although not in great numbers. Some protection is already provided around coastal lakes and in the Willamette River Greenway. No special zoning provisions will be adopted by the County for osprey nesting sites. Nest sites are shown on the Wildlife Inventory maps. If these sites are confirmed by ODFW, their maintenance will be a consideration in land divisions and special use permits.

RIPARIAN AND WETLAND AREAS

LCDC Orders to Comply mandate updated inventory information on the location, quality and quantity of noncoastal wetlands and implementation measures for the protection and/or resolution of conflicts with these wetlands and with riparian habitat areas. The discussion in this section does not distinguish between coastal and noncoastal wetlands. Although many coastal wetlands are protected by Goal 17, many are not and should be considered along with wetlands on a Countwide basis.

Several areas within the County presently have regulations dealing with riparian vegetation. These are the Willamette River Greenway, the Siuslaw River Estuary, and coastal lakes. Also, lands zoned for timber production are regulated by the Oregon Forest Practices Act which considers buffer strips around streams. The County is not attempting to preempt state authority in forestry zoned areas. The discussion on conflicts and conflict resolution, therefore, does not apply to those areas.

It is difficult to separate discussions of wetlands and riparian (streamside) vegetation. Conditions which give rise to both are very similar and habitat values are similar. Riparian vegetation is that vegetation alongside streams and lakes which is structurally and physiologically adapted to living in saturated conditions.

Defining a wetland is more difficult and must be considered as a continuum of conditions not in direct relation to a lake or stream. There are many different definitions of wetlands - open water may or may not be present, the area may be seasonally or permanently wet, different vegetation types may occur. For purposes of this paper, a wetland is an area in which open, standing water is present for at least six months out of the year and is a minimum size of one acre. Vegetation types can range from grasslands to areas with mature, water-loving trees (Oregon white ash, cottonwood, alder and willow). The wetland must be large enough to be important for wildlife feeding and watering. The one-acre minimum size is intended to exclude small, backyard wet areas, and to give an indication of the type of areas intended to be covered by this definition of wetland. In a case of dispute over whether an area is important for wildlife and should be considered a wetland, the ODFW's recommendations will be relied upon.

For areas of the County covered by the National Wetland Inventory, that Inventory shall be considered the maximum number of sites which may possibly be considered wetlands. If sites occur there, though, which are streams or do not have open water present, they will not be considered a wetland by this definition.

These wetlands correspond to the Inland Marshes discussed in the Habitat Types section of this paper, rather than the Wet Meadows.

Riparian and wetland ecosystems are characterized by the combination of high species diversity, high species densities and high productivity. Continuous interactions occur between riparian and wetland ecosystems and adjacent uplands by transfer of energy, food and species.

ENDANGERED, THREATENED AND SPECIAL CONCERN SPECIES

Both plant and animal species which have been identified by the state or federal government as endangered or threatened are present in Lane County. Some species not presently threatened or endangered may become so if their habitat is further altered by man's influence and present practices.

It is important to note that many of these species are found on public lands. Those management agencies have prime responsibility for conservation and protection of the species on their lands.

No deficiencies were noted by LCDC during compliance review for threatened and endangered species. Two policies regarding threatened, endangered, and special interest species are presently part of the Lane County Plan. These policies are:

- Recognize and support existing federal and state programs protecting threatened or endangered fish and wildlife species.

- Provide special consideration to protection of sensitive species (those susceptible to significant population declines resulting from habitat modification).

The following definitions apply:

Endangered Species - Those likely to become extinct if present trends continue.

Threatened Species - Those whose population trends indicate that endangerment is forthcoming if present trends continue.

Special Interest Species - Those rare and uncommon species because of numbers or trends. Designations tend to be rather subjective and are therefore generally unofficial.

Endangered Animals and Plants

Columbian white-tailed deer
California brown pelican
American peregrine falcon
Gray wolf
Oregon chub

Bradshaw's desert parsley
Meadow sidalcea
Wayside aster (suggested as endangered)
Pacific fleabane (suggested as endangered)
Howellia (suggested as endangered)

Threatened Animals and Plants

Sea otter
Wolverine
Western spotted frog
Northern spotted owl
Western snowy plover

Silver spotted butterfly
Northern bald eagle
Wapato, broadleaf arrowhead
Darlingtonia, California pitcher plant

Special Interest or Protected Animal and Plant Species

Mary's Peak salamander
Sharp-tailed snake
Western rattlesnake
American osprey
Northern purple martin
Red tree vole
Cony (pika)
Short horned lizard
Oregon slender salamander
Tailed frog
Marine mammals

Allium amplectons
Aster hallii (curtus)
Cypripedium californicum
Draba aureola
Erigeron cascadensis
Eriogonum umbellatum
Gentiana newberryi
Ledum groenlandicum
Montia diffusa
Pellaea andromedaefolia
Phacelia verna
Phlox peckil (Phlox diffusa)
Pleuricospora fimbriolata
Scoliopus hallii
Sidalcea nelseniana
Silene douglasii var. monantha
Sinelowskia calycina
Sullivantia oregona
Vaccinium oxycoccus var. intermedium
Viola adunca var. bellidifolia

Specific Species Requirements

1. Northern spotted owl. Recent recommendations to an Interagency Spotted Owl Task Force from research in Oregon suggests maintaining 1,000 acres of old growth timber within 1-1/2 miles of the nesting tree of a pair of spotted owls. An Oregon Interagency Spotted Owl Management Plan has been drafted. This plan recommends a minimum nesting pair quota in Oregon of 400 pairs. Of these 400, 290 pairs should be located on US Forest Service land, 90 pairs on BLM land and the remaining 20 pairs on "other lands." Other lands include, but are not limited to state, county, national park, and private lands. Protection is not required on private lands by any state or federal laws.

   The major economic loss to a private landowner which would result from maintaining 1,000 acres of old growth timber for the purpose of one pair of spotted owls does not seem justified when 98 percent of the quota of owls is proposed for federal lands. A restriction on harvesting 1,000 acres of old growth from private property would be excessive and would very possibly constitute a "taking" under the law.

   No known spotted owl nests occur on private property in Lane County at this time. Because of the unreasonable burden protection of this species would place on a private landowner, no special provisions are recommended for any nests which may be found or constructed on private property.

   Maintaining a viable population of this species is recognized as an important goal by the County. As part of their multiple purpose mandate, the Forest Service and the Bureau of Land Management are encouraged in their efforts to protect this species on public lands in Oregon.

include the blue and ruffed grouse, mountain quail and the band-tailed pigeon.

Numerous species of small birds and mammals are associated with this habitat type, including several important furbearers.

c. Location

Valley foothills, coast range and Cascade range.

9. True Fir/Alpine

a. Description

This type occurs primarily in the Cascades above the Douglas fir-trailing blackberry area. Noble fir, Engelmann spruce, white fir, grand fir, mountain hemlock and mountain alder are the most common species. High elevation areas are densely covered with huckleberry, a preferred browse plant for many species of animals.

This habitat type contains numerous small lakes and meadow areas that are extremely important to wildlife.

b. Value to Wildlife

This habitat type is important summer range for black-tailed deer and Roosevelt elk. Some mule deer also spend the summer months in this area. This area contains the pine martin, fisher, wolverine, coyote and pikas. The black bear is also found in this habitat type.

Game bird species present are the blue grouse and occasionally band-tailed pigeon.

Many small birds and mammals are associated with this type.

This type contains numerous meadow and prairie areas that are very important to wildlife species and every effort must be made to preserve them. These meadows are important for resting, feeding, calving areas for elk and during most winters a place for animal survival. Many wet meadows remain open during deep snows and thus provide an important wintering area for animals.

c. Location

High elevations of Cascades - primarily in federal ownership.

10. Deciduous Hardwoods

a. Description

This forest type consists of white oak and black oak, with undergrowth of poison oak, ceanothus sp. and grasses. May also contain scattered or small clumps of Douglas fir or pines. Found primarily in the Willamette Valley and along the foothills.

b. Value to Wildlife

This area is the year-around habitat of the black-tailed deer, black bear, bobcat, coyote and silver gray squirrel. Upland game species include the ruffed grouse, valley and mountain quail and in many areas the ring-necked pheasant. The mourning dove and band-tailed pigeon also use this habitat. Other species include many types of song birds, small mammals, hawks and owls.

This habitat type value varies with its location, but most of it offers resting, feeding and nesting for many species of wildlife.

Its location along the valley foothills provide cover for species that utilize the agricultural areas for food. Some of the best black-tailed deer habitat in Lane County is found in this habitat type.

c. Location

Numerous sites primarily on valley foothills.

11. Agricultural Lands

a. Description

Includes the irrigated and nonirrigated agricultural forage and croplands and dry land seeded pastures.

b. Value to Wildlife

This land type provides important upland game and waterfowl habitat. The black-tailed deer is also found using these areas, but mainly for food, as long as adjacent land types are available for cover.

Many furbearing species such as the beaver, muskrat, mink, etc., are found in the waterways associated with this land type.

Several hundred species of song birds, small and large mammals, hawks and owls are dependent upon this habitat type. The availability of food provided by this habitat type also attracts many species of wildlife from the adjacent habitats.

c. Location

Willamette Valley and assorted small valley floors.

12. Cities

Not applicable to rural Lane County.

c. Location

Countywide.

5. Riparian Vegetation

a. Description

This type occurs along streams, rivers and slough banks. Vegetation is usually in a dense, narrow band. Species of plants identifying this type are those dependent on water such as willow, cottonwood, alder and aspen. Further discussion is found in the Riparian and Wetlands section and the Sensitive Fish and Waterfowl section of this report.

b. Value to Wildlife

An important wildlife habitat type. The riparian vegetation is a concentration point for a great variety of game and nongame species, providing food and cover. This vegetation renders the more open grassland and agricultural areas suitable for wildlife feeding areas by providing the necessary cover. The riparian strip also acts as a food supply for beaver and muskrat and can provide nesting cover, including snags for cavity-nesting birds. Valuable for maintaining good water quality for aquatic organisms.

c. Location

Countywide.

6. Annual and Perennial Grasslands

a. Description

This type contains the annual and perennial grassland areas of the County. Species of forbs and grasses differ with the geophysical area.

In Western Oregon the type may typically be found in small acreages but may be in large tracts of several hundred acres which are commonly called prairies. Many species of native and domestic grasses may be found in this type. In the Cascades and Coast Range this type occurs on shallow soils. Bracken fern may be a common plant on these sites also.

b. Value to Wildlife

A very important type for elk, deer, grouse, turkey, mountain quail, moles, gophers, ground squirrels, hawks and owls and many smaller species of wildlife. This type is heavily used on winter range and summer range by deer and elk. Grouse and quail use the prairies for feeding on insects which are a vital part of the young birds' diet in the summer.

c. Location

Countywide.

7. Coastal Shore Pine/Spruce

a. Description

A narrow belt along the coast from the beach inland to the coastal foothills. Shore Pine and spruce are the main trees with salmonberry, red elderberry, salal, alder and thimbleberry being other species present. The coastal sand dunes and beach grass areas are also included in this type.

b. Value to Wildlife

Mature, dense stands of spruce and shore pine are of limited food value to big game species, but are necessary for the protection, shelter, travel lanes, etc., that they provide. Areas that have been burned, logged or otherwise disturbed produce good black-tailed deer, Roosevelt elk, black bear, blue and ruffed grouse and band-tailed pigeon habitat. Numerous species of small birds, shore birds and mammals are associated with this habitat type.

The coastal sand dunes near Florence provide an important area for whistling swans during the winter months.

c. Location

Narrow coastal strip.

8. Douglas Fir/Trailing Blackberry

a. Description

Trees are Douglas fir, western hemlock, red and Port Orford cedar, big-leafed and vine maple, red alder, trailing blackberry, salmonberry, salal and other similar species. Douglas fir and hemlock are the most abundant. Brush species are present in wildfire burn, logged and other disturbed sites. This is the largest habitat type in Lane County.

b. Value to Wildlife

Mature dense stands of Douglas fir are of limited food value to most species of big game; however, they are necessary for the shelter, protection, etc., that they afford. Many species of birds and mammals, however, spend their entire life dependent upon these mature stands of vegetation (ex. northern spotted owl, pileated woodpecker, flying squirrels). With logging and fires these timbered areas are opened to produce abundant foods in the form of berries, forbs, browse and grasses.

Big game species associated with this habitat type are the black-tailed deer, Roosevelt elk, black bear and mountain lion. Upland game species

WILDLIFE HABITATS

The following descriptive information on Lane County habitat types is derived primarily from Oregon Department of Fish and Wildlife materials. This material is not considered an inventory and is not accompanied by maps. It is intended merely as background information.

1. Estuary and Bay (includes salt marsh, tidelands and eelgrass)

   a. Description

      That area from the mouth of a bay or river inland to the mean high tide line. Within this type will occur coastal salt marsh, tideland, eelgrass and open water. Includes all salt, brackish and freshwater area below the mean high tideline. Climate basically mild winters and cool summers. Precipitation is heavy, about 40 inches.

   b. Value to Wildlife

      A very important type to wildlife species. Estuaries and bays support thousands of waterfowl, waterbirds and shorebirds. The shallow tidal areas are critical feeding areas for many species because of the abundance of small food organisms. Eelgrass beds in certain coastal bays are the most important black brant feeding areas. Coastal salt marsh is valuable feeding and nesting area for waterfowl, snipe, yellowlegs, plover, godwits, rails, etc. Mud flats, in addition to being important for many shorebirds, waterfowl and water birds may also serve as haul-out grounds for seals. Raccoons are common foragers in this type. Band-tailed pigeons use the tide flats and salt marsh channels in specific areas for drinking and often concentrate in large numbers at these places.

   c. Location

      Siuslaw River and minor estuaries.

2. Inland Marsh

   a. Description

      This type is a shallow water area, not including coastal bay marsh, with water remaining year-around. Usually vegetated throughout or with patches of open water. Tules and cattails are common indicator plants of this type. Further discussion of this important habitat is found in the Riparian and Wetlands section of this report and under Sensitive Fish and Waterfowl Areas.

   b. Value to Wildlife

      Contains some of the most important waterfowl and waterbird nesting and wintering areas. This is critical habitat because of the limited acreage of this type in Lane County. Muskrats are common mammals found

in this type. Redwing and yellow-headed blackbirds use this type for nesting. Amphibians and reptiles such as frogs, toads, salamanders, turtles and certain snakes are found in this type.

c. Location

Fern Ridge Reservoir and numerous smaller sites.

3. Wet Meadows

a. Description

Boggy or damp areas with many small springs or bisected by slow-moving streams. Contain sedges, monkey flower, skunk cabbage, false hellebore, aspen, cone flowers or similar species. May be found throughout the County from low foothill areas to high elevations in the Cascade Mountains. These are generally seasonal wetlands. Further discussion of wetlands is found in the Riparian and Wetlands section of this report.

b. Value to Wildlife

A very important vegetation type. Provides summer, fall and sometimes winter forage to big game. Utilized as wallows by bear and elk. Important to amphibians such as toads and frogs. This type is usually important for watering area. Can be excellent beaver habitat. Beaver ponds and slow-moving streams in this type can be excellent fish-producing area also because of the abundant food supply.

c. Location

Numerous sites Countywide from low foothills to high Cascades.

4. Lakes and Reservoirs

a. Description

All open fresh-water areas in the County. Borders sometimes vegetated with water-tolerant forbs, shurbs and trees. There are 11 major reservoirs in Lane County. Lowland and coastal lakes total 10 and 27 respectively. High lakes are abundant in the Cascade Mountains with approximately 250 located in Lane County.

b. Value to Wildlife

The value of these areas varies with type and location. Most offer resting, nesting and limited feeding areas to waterfowl. Many of the large, deep reservoirs are of low value because of continuous water level fluctuation. Some of the wildlife species present in these bodies of water are: furbearing animals--otter, beaver, muskrat, nutria; waterfowl--ducks, geese, swans, coots, rails, grebes and loons; amphibians and reptiles--frogs, toads, snakes, turtles and salamanders.

Indian Creek	Salt Creek
Deadwood Creek	Hills Creek
Whittaker Creek	Steamboat Creek
Esmond Creek	Coast Fork Willamette
Wildcat Creek	Row River
Wolf Creek	Mosby Creek
Long Tom River	Sharps Creek
Willamette River Main Stem	Brice Creek
Mohawk River	Layng Creek

All or portions of the following areas are considered sensitive waterfowl habitat:

Fern Ridge periphery exclusive of parks
Old Long-Tom channel below Fern Ridge
Main Long-Tom channel below Fern Ridge
Amazon Canal where not riprapped
North Fork Siuslaw Freshwater marsh
Maple Creek marsh
Siltcoos Lake/Westlake marsh

Quality

Since these are the areas identified as important, sensitive fish and waterfowl areas, they can all be considered high quality for that purpose.

Quantity

Most of the major rivers and creeks in the County are designated Sensitive Fish and Waterfowl areas, but not the many miles of smaller, less significant Class I streams.

Conflicts

Maintenance of natural vegetation in waterfowl nesting areas is of prime importance to those species. Maintaining riparian vegetation around sensitive fish areas is essential to water quality and aquatic life. Removal of riparian vegetation in these areas is considered a conflict, whatever the purpose.

ESEE Consequences

ESEE consequences for Sensitive Fish and Waterfowl areas is generally the same as for Riparian and Wetlands, with a few additions. Since the areas in this category are considered more valuable for fish and waterfowl habitat than others in the County, the effects of vegetation removal can be more significant.

Economic consequences

Same as for Riparian and Wetland areas.

Social consequences

Same as for Riparian and Wetland areas plus the following:

1. Sensitive Fish and Waterfowl areas are important for recreational purposes, both private and public. They also influence nearby recreational values. For instance, severe erosion from one property can influence fishery values downstream.

Environmental consequences

Same as Riparian and Wetland areas plus the following:

1. Sensitive Waterfowl areas serve as important resting and feeding areas for migratory birds. Destruction of this habitat causes effects which reach far beyond Lane County.

Energy consequences

Same as Riparian and Wetland areas.

Conflict Resolution

To repeat the procedure, after examination of ESEE consequences of potential conflicts, a decision must be made to preserve the resource fully, allow the conflicting use fully, or to specifically limit the conflicting use. In this case, preserving the resource fully would be to completely protect riparian vegetation in the identified waterfowl nesting areas and adjacent to the identified streams. Allowing the conflicting use fully would mean that no implementation requirements would exist protecting that riparian vegetation. The third option is a compromise between the two.

The third option, limiting the conflicting use, is the most appropriate, with the limitation weighed in favor of maintenance of the vegetation. Since these areas are the most important fish and waterfowl areas in the County, the riparian vegetation should be maintained whenever possible. As with Riparian and Wetland areas, a 50-foot building setback from the high water mark of the waterway shall be required. But within these Sensitive areas a 30-foot strip of indigenous vegetation shall be left along the waterway. Exceptions to this requirement shall be very limited and will include areas necessary for water-dependent uses, and areas which are now unvegetated and developed.

Regulations for riparian vegetation maintenance will be similar to those currently existing in the coastal shoreland overlay zones. One example, from the Residential Development Combining District (LC 10.255-30(3)):

"Within the setback area . . . all indigenous vegetation except that removed to provide paths to the water body shall be retained within an area 30 feet in width measured at right angles from the mean high water line of the water body. For the remainder of the required setback area brush may be removed but trees shall be retained."

Policy statements pertaining to Riparian and Wetland areas are also applicable here.

3. Water holding capacity is decreased with removal of vegetation in wetlands and riparian areas.

4. Water purification through filtration is a function of riparian and wetland vegetation which would be missing if the vegetation were removed.

5. The values of floodwater retention and decrease in floodwater velocity would be missing with removal of riparian and wetland vegetation.

Energy Consequences

1. If riparian vegetation is removed, bank erosion can increase. This causes more turbid water which may be more expensive and require more energy to treat downstream.

Conflict Resolution

After examination of the conflicts to riparian and wetland vegetation, and the ESEE consequences of those conflicts, the decision must be made as to preserving the resource totally, allowing the conflicting use totally, or specifically limiting the conflicting use. The third option, specifically limiting the conflicting use, seems the only prudent course of action. To disregard the value of riparian and wetland vegetation and not even consider it in permit applications does not make sense, when the valuable functions of the areas are taken into account. On the opposite end of the spectrum, to have a program which requires the County to be involved in any activity, no matter how minor, in riparian and wetland areas, also does not make sense. A program which recognizes the value of wetlands and riparian areas by way of strong policy statements, requires reasonable setbacks from Class I streams and wetlands so construction will not occur in the wetland or riparian zone, requires a balancing of wetland and agricultural values before drainage projects are undertaken, and which carefully considers input from the Oregon Department of Fish and Wildlife prior to approval of Special Use Permits and land divisions will ensure that these important areas receive the evaluation and attention they deserve.

SENSITIVE FISH AND WATERFOWL AREAS

LCDC Orders to Comply required implementation measures for the protection and/or resolution of conflicts for fish and wildlife habitats in general, and sensitive fish and waterfowl habitats in particular. Lane County's previous plan discussed riparian areas around all Class I streams. The Oregon Department of Fish and Wildlife (ODFW) objected to this being too broad brush. Correspondingly, LCDC required that the category of sensitive fish and waterfowl areas be called out.

This category is a subset of the riparian and wetland areas discussed above. Maps have been provided by ODFW showing important waterfowl nesting habitat and streams which receive high use by anglers and/or game fish. Streams which are consistently used by large numbers of anglers are considered to contain large numbers of game fish, even though creel censuses have not been done in each of the areas. These identified areas are considered the highest quality fish and waterfowl habitat in Lane County.

Location

Certain of the areas identified by ODFW already receive a high degree of protection for the surrounding riparian vegetation. These are the Willamette River within the Greenway and coastal lakes and marshes covered by management units under the Coastal Resources Management Plan.

Other of the areas fall under the jurisdiction of the Oregon Forest Practices Act. In areas zoned for the primary purpose of timber production, state rules take precedence over County regulations. Buffer strips and critical wildlife and aquatic habitat are considered by the Oregon Department of Forestry prior to approving harvest plans.

Still other of the areas identified by ODFW are within federal lands where the County has no jurisdiction.

Instead of providing a map in this text (at a scale which is difficult to interpret) a list of the areas involved will be provided. The map is available in the Planning Division office for review.

Portions of the following streams are sensitive fish habitats:

Tenmile Creek	McKenzie River
Big Creek	Gate Creek
Cape Creek	Blue River
Sutton Creek	South Fork McKenzie River
North Fork Siuslaw	Horse Creek
Siltcoos River	Lost Creek
Woahink Creek	Middle Fork Willamette
Maple Creek	Fall Creek
Fiddle Creek	Little Fall Creek
Sweet Creek	Winberry Creek
Siuslaw River above Mapleton	North Fork, Middle Fork Willamette
Lake Creek	Salmon Creek

BIG GAME RANGE

LCDC Orders to Comply required implementing measures for the protection and/or resolution of conflicts with Big Game Range. The County must clarify the types of uses which conflict with big game habitat, and would therefore be reviewable by the County under any implementing measures developed. The primary conflicting use mentioned by LCDC is residential use at certain densities.

Location. The Oregon Department of Fish and Wildlife (ODFW) has divided big game range in Lane County into three categories as follows:

> Major Big Game Range - That portion of the County which supports the majority of big game. In general these lands are sparsely developed commercial forest lands. They also provide the majority of big game recreational opportunity.
>
> Peripheral Big Game Range - Foothill areas of the County generally located between commercial forest lands and valley floors. These lands support substantial big game populations and serve as a wintering area for animals in severe winters.
>
> Impacted Big Game Range - Those areas of the County that have existing levels of land use which preclude future wildlife management options of maintaining viable wildlife populations and recreational opportunity. These areas frequently contain populations of big game animals.

These areas are mapped on Lane County Wildlife Inventory maps. As a general depiction, Major Big Game Range occurs on federal lands, large timber company holdings, and some private lands which are sparsely developed. Peripheral Big Game Range encompasses primarily foothills and smaller valleys. Impacted Range includes cultivated fields and developed areas, often on valley floors.

Because of the large amount of undeveloped timberland in Lane County, the majority of the County is Major Big Game Range. But, due to scattered ownership patterns, many areas within the Major Range are small, private parcels. Peripheral Range often falls along small valley floors which are privately owned and often fairly extensively developed. For example, most of the Fall Creek, Mohawk and Lorane valleys are within Peripheral Range, as well as large tracts of land west of Elmira.

Wildlife Inventory maps have not been included in this Working Paper due to budget constraints, but are available for review in the Planning Department office.

Quality. The majority of big game use occurs on Major Range. This can be considered the highest quality habitat as man's intrusion with developments is the least. Peripheral Range is also important habitat, and can be particularly crucial in severe winters, but has enough development to limit big game use and management options. Impacted Range is the lowest quality habitat of the three categories. It is already developed to an extent that precludes viable management of the species, although populations may still exist there.

One other category of lands should be mentioned here. Outside Urban Growth Boundaries, areas exist which are committed to nonresource use. Exceptions for these areas will be taken as "Built Upon and Committed Lands" and acknowledged by LCDC. These small pockets of development within Major or Peripheral Range are essentially Impacted areas due to their level of use by man. They were not large enough, generally to include on the Big Game maps as Impacted. These areas will be treated as Impacted areas for implementation purposes.

Quantity. Areas of of Major, Peripheral and Impacted Big Game Range have not been computed. Figures for acreage of some other categories of land may be useful, though, for illustrative purposes.

Total amount of land in Lane County	2,959,400 acres
Commercial forest land (primarily Major Range)	1,813,228 acres
Other public lands (primarily Major Range, some Peripheral Range)	735,112 acres
Farms (primarily Impacted Range)	255,712 acres

Over 61 percent of the County is considered commercial forest land, a category with essentially no residential development. Including other public lands, such as the Dunes National Recreation Area, Oregon State lands, Corps of Engineers lands and County parks, approximately 85 percent of the County is not available for residential use. A good portion of the remaining acreage is farmland, a category very difficult to justify as available for residential use, but also not prime big game habitat.

Conflict Identification

The clearing of natural vegetation for agricultural purposes decreases an area's habitat value for big game. But since important, existing agricultural lands are already considered Impacted Big Game Range, this is not an issue now. Impacted Range has essentially been "written off" for big game management.

Management of land for timber production does not conflict with big game habitat. With proper forest management techniques, big game habitat can be significantly enhanced. The forage provided to deer and elk in clear-cut areas is very important, but the combination of areas in various successional stages is probably the vital factor in enhancing numbers of deer and elk. Lands zoned for the primary purpose of timber production are subject to the requirements of the Oregon Forest Practices Act. For our purposes, timber harvesting activities do not constitute a conflict to Big Game Range.

The primary conflict to big game, as mentioned earlier is residential use at certain densities. ODFW has recommended overall residential densities for Peripheral Big Game Range at one dwelling unit per 40 areas; for Major Big Game Range at one dwelling unit per 80 acres. Therefore, to restate the conflict: overall residential density greater than one dwelling unit/40 acres in Peripheral Range and one dwelling unit/80 acres in Major Range conflicts with habitat for big game.

The following paragraphs basically outline procedures to be used for implementation of the ODFW density recommendations in big game ranges. The premise is to work overall density figures into minimum lot size recommendations for regions of the County, rather than postponing the issue by referrals to ODFW for every land division application. The anticipated result is to base zoning

by region on the overall residential densities or ODFW minimum parcel size recommendations, thereby creating no conflict with Goal 5.

The County will be divided into regions convenient for planning purposes. These have not yet been determined, but will probably result in 10-20 regions in the County.

Within these regions, determinations will be made of acreages, number of existing residences, and additional number of residences allowable to still fall within the overall density level. Built upon and committed areas are subtracted out, as they are treated as Impacted Range. From the figure of remaining residences and acreage, a residential carrying capacity will be determined. This figure, or the ODFW figure of 40 or 80 acres, whichever is lesser, will be recommended in the region for residential density for big game purposes. This, along with other resource land requirements will be used to determine appropriate zoning in an area.

If this figure is ever exceeded, it constitutes a conflict with Big Game Range. ESEE consequences must be determined and analyzed at that time. Prior to dividing the County into regions and making the above determinations, it is impossible to determine if conflicts will exist in any regions. The expectation, based on examining trial areas, is that the recommendations of ODFW can be incorporated without creating a conflict.

Special uses which may be allowed in resource zones have the potential of conflicting with Big Game Range. To preclude that conflict, criteria will be incorporated into the Special Use review considering the effect on big game. Recommendations will be requested from ODFW and considered as part of the review process.

As a final note regarding residences in Big Game Range, damage to landscaping and gardens is a common problem around these residences. For new residential building permits within Major and Peripheral Range, the applicant will be notified that compatibility problems with big game may exist.

Several recommendations in the Policies Section of this Working Paper relate to the method the County will use to protect Big Game Range.

NATURAL AREAS

Lane County's original work on natural areas included just a listing of sites from the Oregon Natural Heritage Program (ONHP) and the Governor's Natural Area Preserves Advisory Committee (NAPAC). A very brief narrative was included with the NAPAC sites, but only site names for the 86 ONHP sites. LCDC's review mentions 12 NAPAC sites; in fact, there are only nine sites in this category.

In its review of Lane County's plan, LCDC noted that adequate quality, quantity and locational data existed for the NAPAC sites. The 86 sites from the Nature Conservancy Inventory, though, required more specific information on location, quality and quantity.

The Goal 5 Administrative Rule (66-16-000), adopted after LCDC's review of Lane County's plan, contains procedures for more detailed review of Goal 5 resources. Accordingly, both the ONHP and NAPAC sites are re-examined and divided into three categories as laid out in the rule:

1A: Available information on location, quality and quantity indicates resource site not important; not included on plan inventory.

1B: Some information available but inadequate to identify resource site; included on plan inventory with special status; plan statement to address resource site when information available.

1C: Information on location, quality and quantity indicate site is significant; conflicting uses, if any, identified; ESEE analysis of conflicting uses; conflict resolution proposed.

Criteria for Evaluation

For those sites with adequate information on location, quality and quantity, it was necessary to determine if the site was "significant." If so, it fell in an 1C category; if not, in a 1A category. This decision required criteria upon which to base that judgment. Six questions were answered for each site or group of similar sites. These were:

1. Uniqueness?
2. Number of examples limited?
3. Site unusual due to size?
4. Rare or endangered species present?
5. Site already protected by County zones?
6. Examples already protected on public lands?

In some cases final decisions were necessarily subjective and were judgment calls. In other cases, the decision was based on other plan policies. For instance, one of the sites determined not to be significant was the Noti Osprey nest. The portion of this Working Paper on Endangered, Threatened and Special Interest Species stated that no special zoning measures will be taken in Lane County for Osprey nests.

Sites placed in the 1B category had inadequate information on location, quality and quantity to allow use of these criteria. When information is available, the

same method will be used to place them in either a 1A or 1C classification. Moving a site out of the 1B category will be considered a plan amendment.

1B Category

Six sites have been placed in this category. These are:

1. Booth Island/Siltcoos Lake
2. McKenzie River Island
3. South Fork Gate Creek
4. Swamp Creek
5. Marshall Island Heronry
6. Willamette Valley Quaking Aspen Grove

These sites are individually discussed below. No specific timetable is set for dealing with the first four sites. When information is presented to this department which will allow a determination of significance of the site, it will be analyzed and placed in either a 1A or 1C category, based on the criteria mentioned above. Site #5, Marshall Island Heronry, will be field inspected by ODFW later this year. Based on the results of their investigation, the site will be placed in a 1A or 1C category later this year. Site #6 will also be placed in a 1A or 1C category within 1982. Field inspection of the site by knowledgeable botanists is essential here.

a. Booth Island--Siltcoos Lake (ONHP #82). ODFW is unaware of a band-tailed pigeon mineral spring on this island.

b. McKenzie River Island (ONHP #52). ONHP Inventory states "Good riparian habitat and river island." No further data is available.

c. South Fork Gate Creek (NAPAC #12). No way to locate this site any more specifically. Defined only as "old Douglas fir, western hemlock and relatively steep slopes . . . patches of red alder and vine maple."

d. Swamp Creek (ONHP #49). This unsurveyed, unverified ONHP site is described in their Inventory only as "small stream, riparian vegetation."

e. Marshall Island Heronry (ONHP #113). This heronry is on a parcel divided by state and private ownership. Logging on large cottonwoods in the private ownership in 1980 may have destroyed the rookery. ODFW plans flights of the Willamette this spring to inspect heronrys, followed by field surveys later in the spring. If the heronry exists, this site will be placed in a 1C category; if not, in a 1A category. If in 1C, the nest trees and a buffer around them should be protected with a Natural Resource Zone. If the heronry turns out to exist on private property, the Parks Department or the Fish and Wildlife Department are urged to acquire this property.

f. Willamette Valley Quaking Aspen Grove (ONHP #2). This site is reported as a one-acre stand of Quaking Aspen located west of Elmira along Highway 126. The site is a remnant, native stand of trees. Conflicting directions to the site listed in the Nature Conservancy file have made it impossible to locate this site to date. Botanists from the Nature Conservancy and the University of Oregon are very interested in assisting the County to find this site, if it still exists.

The ONHP report states: "Very rare, relict remnant stand of Quaking Aspen. Very rare in the WV [Willamette Valley] of extreme botanical interest due to long separation from the major Aspen gene pool and because of its novelty and rarity in the Willamette Valley."

If the trees still exist, the site will be placed in a 1C (significant) category. A full ESEE analysis will be done at that time, which will include information and recommendations from botanists. The following items should be considered when and if a full ESEE analysis is prepared:

Under economic consequences, the possibility of reduction of income to the private property owner if the land cannot be converted to another use. Also the fact that the property owner may gain tax advantages if an NR zone is applied and an open space tax deferral approved.

Under social consequences, the loss of a rare site such as this is inherently displeasing to many persons, even though the site is on private property and not open to the public.

Under environment consequences, the fact that the tree is very abundant in other parts of the US. Also that the long separation from the major Aspen gene pool could result in valuable research opportunities.

No energy consequences can be anticipated at this time.

1C Category

Fifty-six sites fall within this category. These sites have been divided into four groups and will be discussed in this order:

1. Sites owned by USFS and BLM
2. Sites which are State Parks
3. Sites covered by the Coastal Resources Management Plan or the Willamette River Greenway
4. Others

- -

1. Sites Owned by USFS or BLM

No additional research has been done on these 29 sites. Available information from the Nature Conservancy on location, quality and quantity indicates these resource sites are significant, and therefore are placed in a 1C category. Because they are in US Forest Service and BLM ownership, however, no conflicts exist based on uses allowed in zoning districts. Lane County does not have jurisdiction on federal lands. Although, as a matter of policy, zoning districts are applied to federal lands in the County, these zones have no effect unless the land is converted to nonfederal ownership. Besides the issue of lack of jurisdiction, the Forest Service

and BLM are required by federal law to consider natural areas as part of their multiple-use mandate.

Inventory of Resource Sites Owned by the US Forest Service

1. Bob Creek (ONHP #55) 15-11, 15-12
2. Buck Creek (ONHP #99) 18-45-4,5
3. Cox Rock (ONHP #16) 17-12-10
4. Diamond Peak Wilderness Area (ONHP #124) 24-55,65
5. Fossil Beds (ONHP #137) 21-1E-30
6. French Pete Wilderness Area (ONHP #140) 17,18-5E,6E
7. Gold Lake Bog RNA (ONHP #95) 22-6E-20,29
8. Hagan-Block Proposed Research Natural Area (ONHP #148) 16-4E,11-15
9. H. J. Andrews Experimental Forest (ONHP #105) 16-5E,6E
10. Karnowsky Creek Bald Eagle Nest (ONHP #119) 18-11-22
11. Lamb Butte Scenic Area (ONHP #126) 17-6E22
12. Lily Lake (ONHP #4) 17-12-15
13. Lost Creek Headwaters (ONHP #54) 16-6E-19, 17-6E-24
14. Lowder Mountain Geological Area (ONHP #127) 17-6E-19
15. Mount Washington Wilderness (ONHP #123) 15-7E
16. Olallie Ridge Research Natural Area (ONHP #96) 17-65
17. Parrot Rock (ONHP #115) 17-12-4
18. Quaking Aspen Swamp (ONHP #129) 17-6E-28
19. Rebel Rock Geological Area (ONHP #128) 18-6E-30
20. Siuslaw South Jetty Area (ONHP #68) 18-12-21
21. Three Sisters Wilderness (ONHP #122) 15-19-6E-9E
22. Torry Charlton Forest (ONHP #149) 20,21-6E
23. Yankee Mountain Scenic Area (ONHP #125) 17-5E-26

Inventory of Resource Sites Owned by BLM

1. Dorena Heronry (ONHP #111) 20-2-31
2. Eagle Rock (ONHP #1) 17-3E-10
3. Hula Creek Headland Forest (ONHP #101) 17-8-N1/2 NW1/4 6
4. Long Tom River (ONHP #6) 16-5
5. Poodle Creek Heronry (ONHP #112) 17-7-13
6. Shaw Creek Heronry (ONHP #110) 20-5-6

2. Sites Within State Parks

These sites, owned by the State of Oregon, are within the State Parks and Highways System. There is no question as to the significance of these sites, that is why they have been set aside as State Parks and Waysides. The sites are placed in a 1C category. No conflicts exist based on uses allowed in zoning districts. The sites are all zoned in Public Reserve Zones and are presently being managed by the State Parks Division and the Oregon Department of Transportation.

a. Ben and Kay Dorris State Park (NAPAC #11) 16-2E-36. Douglas fir-alder vegetation. Existing recreational use does not negatively impact this vegetation.

b. Darlingtonia State Wayside (ONHP #109) 17-12-35. Unique plant protected in this wayside.

c. Dexter Island and Dexter Dam State Park (ONHP #108) 19-1-5,8,9. Riparian vegetation and heron rookery. The approved Master Plan for this park (now called Elijah Bristow State Park) indicates that the rookery and riparian vegetation areas will not be negatively affected.

d. Washburne Memorial State Park (ONHP #58) 16-12-22. Unique vegetation complexes, including an unusual sphagnum moss bogs, are protected in this park.

e. Washburne Wayside (ONHP #40 and NAPAC #4) 15-5-12. Douglas fir and white oak vegetation. Minimal development in this wayside.

3. Sites Within the Coastal Resources Management Plan or Willamette River Greenway Plan

Information on the location, quality and quantity of these sites indicates that they are all significant and are being placed in a 1C category. Two special purpose plans, the Coastal Resources Management Plan (CRMP) and the Willamette River Greenway Plan, have been adopted by the County. Different parts of these plans cover the 21 sites listed here.

Because of the degree of protection already afforded these sites, and the amount of planning which has already gone into them, no conflicts are determined to exist with use of these sites as they are presently zoned.

During development of Management Units within the Coastal Resources Management Plan, natural values of the area were a major factor. Those same values are the basis of the Greenway Plan. Detailed information on these plans, and the Management Units, is available in the Planning Division office.

a. Big Creek (ONHP #45) CRMP--Management Unit (MU) 45, Prime Wildlife Area.

b. Big Creek, Rock Creek and Tenmile Creek. Silverspot Butterfly sites (ONHP #5,56,130). CRMP--MUs 38,45, Prime Wildlife Area for this nationally threatened species.

c. Butterfly, Grass, Reed and Jernigan Islands (ONHP #83). CRMP--Siltcoos Lake MU 1, Significant Natural Area. The riparian vegetation on these islands provides excellent wildlife, particularly bird, habitat.

d. Camp Baker (Boy Scout Camp) (ONHP #46) CRMP--Siltcoos Lake MUs 5 and 6. A Prime Wildlife Area MU extends 150 feet inland from the shore of the lake to cover riparian vegetation and marshy areas; the remainder of the site is in a Natural Resources Conservation MU.

e. Coast Fork Willamette River (ONHP #93). Greenway Plan. Riparian vegetation, the important value listed at this site, is protected by Greenway Development permit requirements.

f. Cox Island (ONHP #65) CRMP-MUTI, Natural. This island is owned and managed by the Nature Conservancy.

g. Duncan Slough and Marsh (ONHP #61) CRMP--MU N, Natural. A unique marsh complex and a band-tailed pigeon mineral spring are protected by this MU.

h. Heceta Beach Dunes (ONHP #37) CRMP--Beaches and Dunes section and Beaches and Dunes Combining District of the zoning ordinance guide development in dunal areas.

i. Heceta Head/Conical Rock (ONHP #53,114) CRMP--MU 48, Significant Natural Area. Conical Rock is part of the Oregon Islands National Wildlife Refuge. Heceta Head is an important bird nesting area, as well as being an outstanding scenic site.

j. McCarty Marsh Heronry (ONHP #62) CRMP--MU 25, Prime Wildlife Area. The private property owner has an agreement with ODFW to protect this rookery.

k. Mercer Lake (ONHP #145) CRMP--Mercer Lake MUs. Several MUs are used to surround the shoreline of this lake, protecting its natural values.

l. Middle Fork Willamette River (ONHP #91) Greenway Plan. The valuable riparian vegetation here is protected by the Greenway Plan and Development Permit.

m. Miller Arm/Maple Creek Marsh (ONHP #81) CRMP--Siltcoos Lake MU 4, Prime Wildlife Area. This MU protects an uncommon canary grass/tule marsh.

n. North Fork Siuslaw River Marsh (ONHP #60) CRMP--MU H, Natural. The proximity of four marsh types and the extent of the marshes make this site unusual. The Natural designation provides protection for this area.

o. Siboco Slough and South Inlet Pigeon Springs (ONHP #63,132) CRMP--MU I, Natural. These marsh areas and the mineral springs are protected by the Natural designation.

p. Siltcoos Lake (ONHP #85) CRMP--Siltcoos Lake MUs. The Lane County portion of Siltcoos Lake's shoreline is surrounded by MUs which recognize the importance of the riparian vegetation and the marshlands.

q. Siltcoos Lake Dunes (ONHP #84) CRMP--Beaches and Dunes Section. This section of the Plan, as well as a Beaches and Dunes Zoning District guide development in dunal areas and preserve the important values of the dunes.

r. Siuslaw River Estuary (ONHP #67) CRMP. The entire estuary portion of the CRMP is designed to recognize and preserve the various values of the estuary and its shoreline.

s. Sutton Lake Marsh (ONHP #20) CRMP--Sutton Lake MU 4, Significant Natural Area. This MU covers an important willow, sedge and bullrush marsh.

t. Woahink Lake Bog (ONHP #14) CRMP--Woahink Lake MU 2, Prime Wildlife Area. An uncommon plant is protected by this MU.

4. Others

1. Upper Yachats Elk Pasture (ONHP #146). A portion of this site, previously in private ownership, has been purchased by ODFW. The remainder is in the Siuslaw National Forest. SNF and ODFW have an agreement concerning use of the site as an elk wintering area. The site is zoned FM - no conflicts exist.

2. Fern Ridge (ONHP #8). The reservoir itself is owned by the Corps of Engineers and operated under a management plan done in 1980. This plan recognizes the vital role of Fern Ridge to wildlife, particularly waterfowl. The ODFW manages wildlife in the area, including plots south of the reservoir being farmed for wildlife utilization only. The reservoir is considered "sensitive fish and waterfowl habitat," discussed earlier in this report. As such, riparian vegetation around the reservoir is protected. No conflicts exist.

POLICY DISCUSSION

Several existing policies relate to flora and fauna. These are:

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize and support existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Provide special consideration to protection of sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies shall be encouraged to work with landowners to conserve wildlife habitats.

5. Lane County shall be encouraged to investigate and utilize fee acquistions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to implement these policies.

While these policies are adequate as far as they go, there are other areas discussed in this Working Paper for which policies have not been developed. The general areas with policy gaps will be mentioned and examples of possible policies given.

- Policy gap: Riparian and wetland vegetation. Examples of policies are:

    1. Riparian and wetland vegetation is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Maintenance of this vegetation shall be encouraged with setbacks from Class I streams and wetlands, and consideration of the areas in other land use activities such as Special Use Permits and Zone Changes.

    2. Drainage of wetland areas will not be promoted by Lane County. Any drainage project over which Lane County has permit authority shall be approved only after analysis of the ESEE consequences of such an action.

- Policy gap: Sensitive Fish and Waterfowl areas. An example of a policy is:

    1. Sensitive Fish and Waterfowl areas are recognized as the most valuable habitat of their type in the County. Maintenance of riparian vegetation shall be a prime consideration in zoning districts in these areas.

- Policy gap: Big Game Ranges. Some policy examples are:

    1. Residential building permits issued within Major or Peripheral Big Game Range shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

    2. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big Game Range.

3. ODFW recommendations on overall residential density with Peripheral and Major Big Game Range shall be a determinant in minimum parcel size for regions of the County.

- Policy gap: Conflicts not anticipated or identified in the plan. Example of policy:

1. If uses are identified (which were not previously identified in the plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-00 will be followed.

APPENDIX A

WILDLIFE OF LANE COUNTY

1. Birds

Approximately 305 species are thought to occur in Lane County. Frequency of occurrence may range from common to rare or accidental; further, some occurrences are seasonal only. This inventory is as complete as current resources allow. Updating and further verification is anticipated, as populations are not static but dependent upon habitat, nesting occurrence, threatened or endangered species, etc.

Common Loon
Arctic Loon
Red-Throated Loon
Horned Grebe
Eared Grebe
Western Grebe
Pied-Billed Grebe
Red-Necked Grebe
Black-Footed Albatross
Fulmar
Pink-Footed Shearwater
Sooty Shearwater
Slender-Billed Shearwater
Leach's Storm Petrel
Fork-Tailed Petrel
White Pelican
Brown Pelican
Double-Crested Cormorant
Brandt's Cormorant
Pelagic Cormorant
Common Egret
Black-Crowned Night Heron
Great Blue Heron
Green Heron
Great Egret
Snowy Egret
American Bittern
Whistling Swan
Trumpeter Swan
Canada Goose
White-Fronted Goose
Snow Goose
Black Brandt
Mallard
Gadwall
Northern Pintail
Green-Winged Teal
Blue-Winged Teal
Cinnamon Teal
European Widgeon

Harlequin Duck
White-Winged Scoter
Red-Breasted Merganser
Surf Scoter
Ruddy Duck
Hooded Merganser
Turkey Vulture
White-Tailed Kite
Goshawk
Sharp-Shinned Hawk
Cooper's Hawk
Red-Tailed Hawk
Swainsen's Hawk
Rough-Legged Hawk
Ferruginous Hawk
Golden Eagle
Bald Eagle
Marsh Hawk
Osprey
Prairie Falcon
Peregrine Falcon
Pigeon Hawk
Merlin
American Kestrel (Sparrow Hawk)
Blue Grouse
Ruffed Grouse
California Quail
Mountain Quail
Ring-Necked Pheasant
Sandhill Crane
Virginia Rail
Sora
American Coot
Black Oystercatcher
Semipalmated Plover
Snowy Plover
Killdeer
American Golden Plover
Black-Bellied Plover
Surfbird

American Widgeon
Northern Shoveler
Wood Duck
Redhead
Ring-Necked Duck
Canvasback
Greater Scaup
Lesser Scaup
Common Goldeneye
Bufflehead
Old Squaw
Knot
Pectoral Sandpiper
Baird's Sandpiper
Least Sandpiper
Dunlin
Short-Billed Dowitcher
Long-Billed Dowitcher
Stilt Sandpiper
Semipalmated Sandpiper
Western Sandpiper
Sanderling
American Avocet
Red Phalarope
Northern Phalarope
Pomarine Jaeger
Parasitic Jaeger
Long-Tailed Jaeger
Glaucous Gull
Western Gull
Herring Gull
Thayer's Gull
California Gull
Ring-Billed Gull
Mew Gull
Bonaparte's Gull
Heermann's Gull
Black-Legged Kittiwake
Sabine's Gull
Forster's Tern
Arctic Tern
Common Tern
Caspian Tern
Black Tern
Common Murre
Pigeon Guillemot
Marbled Murrelet
Ancient Murrelet
Cassin's Auklet
Parakeet Auklet
Rhinoceros Auklet
Horned Puffin
Tufted Puffin
Band-Tailed Pigeon
Ruddy Turnstone
Black Turnstone
Godwit
Spotted Sandpiper
Common Snipe
Long-Billed Curlew
Solitary Sandpiper
Wandering Tattler
Willet
Greater Yellowlegs
Lesser Yellowlegs
Long-Eared Owl
Short-Eared Owl
Saw-Whet Owl
Poor-Will
Common Nighthawk
Vaux's Swift
Anna's Hummingbird
Rufous Hummingbird
Calliope Hummingbird
Belted Kingfisher
Yellow-Shafted Flicker
Red-Shafted Flicker
Common Flicker
Pileated Woodpecker
Acorn Woodpecker
Lewis' Woodpecker
Yellow-Bellied Sapsucker
Hairy Woodpecker
Downy Woodpecker
Eastern Kingbird
Western Kingbird
Traill's Flycatcher
Hammond's Flycatcher
Ash-Throated Flycatcher
Say's Phoebe
Willow Flycatcher
Dusky Flycatcher
Western Flycatcher
Western Wood Pewee
Olive-Sided Flycatcher
Horned Lark
Violet Green Swallow
Tree Swallow
Bank Swallow
Rough-Winged Swallow
Barn Swallow
Cliff Swallow
Purple Martin
Steller's Jay
Gray Jay
Scrub Jay
Black-Billed Magpie
Common Raven

Rock Dove
Mourning Dove
Barn Owl
Screech Owl
Great Horned Owl
Snowy Owl
Pygmy Owl
Burrowing Owl
Norther Spotted Owl
Great Gray Owl
House Wren
Winter Wren
Bewick's Wren
Long-Billed Marsh Wren
Rock Wren
Northern Mockingbird
Sage Thrasher
American Robin
Varied Thrush
Hermit Thrush
Swainsen's Thrush
Western Bluebird
Mountain Bluebird
Townsend's Solitaire
Golden-Crowned Kinglet
Ruby-Crowned Kinglet
Water Pipit
Bohemian Waxwing
Cedar Waxwing
Northern Shrike
Loggerhead Shrike
Common Starling
Hutton's Vireo
Solitary Vireo
Red-Eyed Vireo
Orange-Crowned Warbler
Yellow Warbler
Yellow-Rumped Warbler
Black-Throated Gray Warbler
Myrtle Warbler
Audubon's Warbler
Townsend's Warbler
Hermit Warbler
MacGillivray's Warbler
Yellow Throat
Yellow-Breasted Chat

Common Crow
Clark's Nutcracker
Black-Capped Chickadee
Mountain Chickadee
Common Bushtit
White-Breasted Nuthatch
Red-Breasted Nuthatch
Brown Creeper
Wrentit
Dipper
Wilsen's Warbler
House Sparrow
Western Meadowlark
Yellow-Headed Blackbird
Red-Winged Blackbird
Northern Oriole
Brewer's Blackbird
Brown-Headed Cowbird
Western Tanager
Black-Headed Grosbeak
Lazuli Bunting
Evening Grosbeak
Purple Finch
House Finch

ADDENDUM TO WORKING PAPER:

FLORA & FAUNA

November, 1983

MEMORANDUM

lane county

TO Interested Persons and Groups

FROM Land Management Division

SUBJECT Revision of General Plan Working Papers DATE November 1983

In order to fully comply with the requirements of Oregon statewide planning Goals as promulgated by the Oregon Land Conservation and development Commission, Lane County must revise certain elements of its rural General Plan. Following the revision action, the Plan must be submitted to LCDC for acknowledgement.

Part of the revision effort is directed toward improving the information base and Policy suggestions of the Working Papers. These documents were originally intended to serve as technical foundations (by pulling together information and in some cases indicating where it was already available) for Plan development. The actual Plan was to take the form of Policies and a Plan Diagram, both of which were completed and, in the case of the Policies, adopted. Working Papers were to serve as reference material.

To bring the Plan into better compliance with state Goals, all three elements -- Working Papers, Policies and Plan Diagram -- need some revision. Since the Policies are generated from information in the Working Papers, it follows that new Policy statements must be founded in the form of Working Paper revisions.

Attached for your review and comment are revisions to one of the existing Working Papers. It is the intention of the County to follow essentially the same process of public review that was followed when the Working Paper were originally published. Bear in mind that in some instances, revisions pre-empt or modify or add to material now in the Working Papers.

After action is completed on all Working Paper revisions, the Policy statements generated by this procedure will be compiled and brought before the public and County officials for adoption as amendments to the General Plan Policies document. When the Plan Diagram is made available for similiar action, it too will contain pertinent directives of this and the other Working Papers.

REVISIONS TO "FLORA AND FAUNA WORKING PAPER"

I. Introduction

The "Flora and Fauna Working Paper" was published by Lane County in March, 1982. It was brought before both County Planning Commissions in a public hearing format in March and April, with testimony taken and responses given. In May, 1982, both Planning Commissions issued formal reports to the Board of County Commissioners, recommending tentative Policies to be formulated from both the Working Paper and the testimony received about it. The tentative Policies were reviewed and adopted by the Board of County Commissioners in December 1982.

In early 1983, staff of the DLCD reviewed the Working Paper and identified some aspects of it that needed to be adjusted before it would comply with statewide planning Goal requirements. The purpose of this Revision report is to correct those deficiencies.

Changes to the "Flora and Fauna Working Paper" take the form of technical data additions, and of Policy statements. Only the Policy statements are intended to be formally adopted as part of the Plan.

II. Working Paper Revisions

A. ADD the following language to page 5 of the Working Paper, directly following the first (leading) paragraph of the section entitled, "Wildlife Habitats":

The description of a habitat type in the following section is intended to provide a setting for identification of more specific resource types and sites. Because several of the following habitat types are so prominent in the County (e.g, "Douglas Fir/Trailing Blackberry", "Deciduous Hardwoods"), mapping the information would be of little value. Likewise, it is not practical to make Plan designations of these types, thereby eliminating the need for the "Goal 5 Rule" application. It is assumed that existing land use regulations (such as forest land zoning) will properly protect these habitat types, allowing the County to focus its regulator efforts on specific types (such as riparian lands) discussed later in this Working Paper.

B. DELETE the list of "sensitive fish habitats" which appears on pages 20 and 21 of the Working Paper, and ADD the more detailed list below:

Row River	Dorena Reservoir to Coast Fork Willamette Layng Creek to Dorena Reservoir
Layng Creek	South Boundary of 21-15-24 to Row River
Brice Creek	South Boundary of 22-25-29 to Row River
Sharps Creek	Clark Creek to Row River
Mosby Creek	Tom Creek to Row River
MAIN STEM WILLAMETTE BASIN	
Springfield Mill Race	Middle Fork Willamette to Main Stem Willamette
Main Stem Willamette	Confluence of Coast and Middle Forks Willamette to County Line
MC KENZIE RIVER BASIN	
McKenzie River	County Line to Main Stem Willamette
Mohawk River	Drury Creek to McKenzie River
Gate Creek	Minney Creek to McKenzie River
Blue River	Blue River Reservoir to McKenzie River County Line to Blue River Reservoir
South Fork McKenzie River	Cougar Reservoir to McKenzie River Roaring River to Cougar Reservoir
West Fork Horse Creek	Horse Creek to McKenzie River
Horse Creek	Separation Creek to McKenzie River
Lost Creek	South Boundary of 16-65-13 to McKenzie River
UMPQUA BASIN	
Steamboat Creek	Horse Heaven Creek to County Line

C. DELETE the sixth paragraph on page 20 (concerning a map) and ADD the following:

A small-scale map of the streams identified below appears in this Working Paper. Streams listed have been called out by ODFW, and reaches noted by agency staff. A large-scale map is also available for review in County planning offices.

D. DELETE the text under "Quantity" (page 21), and ADD the following:

Several hundred miles of waterway are involved, all of it subject to the Riparian Lands setback requirements discussed in that section of the Working Paper. Since fish habitat is confined to the streams themselves, all such habitat is automatically included in riparian land designations. Waterfowl nesting areas extend beyond the water surface, normally in Wetland areas as identified in that section of the Working Paper.

Although occuring in all parts of the County, sensitive fish habitat has very similiar characteristics throughout -- it is highly dependant on the existence of riparian vegetation. Such vegetation is the subject of recommended protective measures (setback and vegetation management provisions) along Class I waterways.

Because of the vast quantity of waterway designated sensitive fish habitat, and the unifying requirement of riparian vegetation, it is not useful to attempt site-specific conflict analysis. Conflict analysis for waterfowl nesting areas coincides with that for wetlands.

E. DELETE the last three sentences in paragraph 2 of the section entitled "Conflict Resolution" on page 22 (beginning with, "As with Riparian...."). ADD the following language:

The Oregon Fish and Wildlife Department has recommended building setbacks of 50 to 100 feet (depending on zone, which in turn reflects location) along waterways designated as sensitive fish habitat, and the use of a NR zone for wetlands not falling into the riparian strip. These setbacks can be the same rules as have been proposed for Class I streams (see previous section of the Working Paper). Since sensitive fish habitat consists of specified portions of Class I waterways, the riparian land management program should effectively protect such habitat. The NR zone should be applied to wetlands not protected by Coastal zoning or federal ownership.

F. DELETE paragraph 5 on page 14 of the Working Paper (in section entitled, "Riparian and Wetland Areas"), and ADD the following:

For areas of the County covered by the National Wetland Inventory, wetlands shall be defined through a program of consultation with fish and wildlife experts of the Oregon Fish & Wildlife Department and its federal counterpart. For interim purposes of this section, streams and areas of open water shall not be considered wetlands.

G. DELETE the first two sentences of paragraph 1, page 16 of the Working Paper (under section entitled, "Location"), and ADD the following:

The Oregon Fish and Wildlife Department has assisted the County in providing maps of all Class I streams, as well as major significant wetland areas. Attached to this Working Paper is a summary map of those areas, and detailed maps are available for review in County offices.

H. DELETE last two paragraphs under section entitled "Location" on page 16 of the Working Paper, and ADD the following:

A vast array of wetland types has been identified from air photo analysis by the U.S. Fish and Wildlife Service. That agency's product, known as the National Wetland Inventory, includes wetland types from open water to small, seasonal marshes. The scale of the maps is at 1"=62,500 feet (scale of USGS quadrangles) and 1"=24,000 feet. Such a scale, although permitting total coverage of the County, requires much supplementary interpretation and field checking before specific Plan designations and regulations can be placed on the sites.

Presently, about half the County (from the Willamette Valley to the Coastal Zone) has been so mapped, and it is expected that the rest of the County will be completed within a year or two. Although it is not possible -- because of the interpretation requirements mentioned above and of incomplete County coverage -- to designate a large number of minor wetlands, the maps have been useful in identifying "major wetlands." These major wetlands are considered by ODFW staff as being sufficient in size and value to merit County identification. They are located in the following areas:

- Fern Ridge periphery exclusive of parkland;
- Old Long Tom River channel below Fern Ridge dam, including lands between it and new channel.
- North Fork Siuslaw freshwater marsh;
- Maple Creek marsh;
- Amazon Canal at its confluence with the waters of Fern Ridge Reservoir.

Staff of the ODFW indicate that protection of the above major wetlands will enable the County to meet basic Goal 5 requirements, and the later interpretation and application of NWI mapped data will completely fulfill such requirements.

The areas listed above are mapped in detail on the County's Plan Diagram maps. Additionally, a small-scale map showing their general location is attached to this Working Paper. They are discussed in more detail in the "ESEE Analysis" section.

The County should take the Goal 5 Rule "1B" option on interpreting and applying the NWI data, within a timetable of one or two years (or when complete County coverage finally occurs).

I. DELETE both paragraphs of the section entitled, "Quantity" on page 17 of the Working Paper, and ADD the following:

The quantity of riparian and wetland areas is difficult to estimate in terms of acres or square miles. For purposes of this analysis, "quantity" of riparian lands is defined as all lands along both banks of Class 1 streams in Lane County, to a setback line 100 feet from ordinary high water. This area may or may not contain riparian vegetation; uses of it vary depending on location.

Major wetlands as previously defined vary in size from a few to several hundred acres. Each wetland is discussed individually in the "conflict analysis." The quantity of wetlands on the National Wetlands Inventory probably measures in hundreds of square miles; until a full analysis is done per the Goal 5 rule "1B" option, there is no way of knowing.

J. DELETE the section entitled, "ESEE Analysis" on pages 18 and 19 of the Working Paper. ADD the following material to replace it:

Riparian Lands

For purposes of conflict analysis, riparian lands are divided into the following categories:

- Resource Areas (forested and agricultural);
- Rural Lands (partially/sparsely developed);
- Developed & Committed areas (including communities).

The analysis is carried out for each category.

1. Resource Areas

a) Economic Impacts:

1) Merchantable timber removed from riparian areas is a source of employment and revenue in the County.

2) Use of riparian areas for farming purposes increases available land for farming; usually, riparian lands consist of soils types suitable for agriculture.

3) Riparian lands used for aggregate production increase the economic benefits of that resource.

4) Loss of riparian vegetation destroys fish and waterfowl habitat, increases flood risks, and destroys the riverbank itself, all of which produce net costs to the area.

b) Social Impacts:

1) Loss of income from reduced forest and farming activities adversely affects Land County residents, and could require relocation, etc.

2) Regulations to restrict activities in the riparian strip may conflict with the Forest Practices Act, and in any case will increase the burden on the landowner. Enforcement of such regulations in Resource Areas would be difficult.

3) The social consequences of reduced water quality, flooding, and fish/wildlife quantity, stemming from loss of riparian lands could be significant, especially for those oriented toward outdoor recreation and those living in flood-prone areas.

c) Environmental Impacts:

1) Loss of riparian vegetation would have a significant adverse impact on the riverine environment, as already discussed, and on the wildlife species dependent on that environment.

2) Reduced bank stability, more turbid water, flooding, etc., has generally negative impacts on downstream environments. Flood control would be more difficult to achieve, water purification would be necessary for jurisdictions using surface water for municipal supply, and the risk of health hazards from poorer water quality and/or flooding would increase.

d) Energy Impacts:

1) Reduction of agricultural or forestry production would require a greater investment of energy to more intensively manage unaffected areas and/or obtain the resource products from other areas.

2) Loss of riparian vegetation and a reduction in environmental quality could result in increased downstream energy costs (water treatment, greater travel in search of suitable outdoor recreational sites, flood cleanup)

2. Rural Lands

a) Economic Impacts:

1) Riparian land development restrictions can decrease the availability/usability of Rural Lands, thus increasing land costs.

2) In much the same manner as with Resource Areas, loss of riparian areas for noncommercial forestry, farming, etc., can increase landowner costs and reduce income.

3) Reduced riparian land quality can reduce property values and increase costs to landowners through flood risk, higher insurance costs, less wildlife, and poorer water quality.

b) Social Impacts:

1) Rural residents who desire high-quality riparian environments would be adversely impacted by loss of riparian land and associated consequences.

2) Restrictions on building and land use in the riparian strip would adversely impact landowners through reduction of their options for building siting, etc.

c) Environmental Impacts:

1) In rural areas, riparian environments often contrast to open lands used for pasture, or once covered with timber, or cleared for homesites. Loss of such lands would damage those environments andthus the quality of the overall community or area.

2) The quality of surface and groundwater, upon which rural landowners depend, would be adversely impacted.

d) Energy Impacts:

1) Energy costs to landowners would be higher if riparian restrictions forced them to live elsewhere. Costs would be lower if riparian restrictions preserved water quality, provided natural flood control, and so forth.

3. Developed and Committed Areas

a) Economic Impacts:

1) Especially on small parcels, the preservation of riparian vegetation through County use restrictions could have serious impacts on the owner.

2) Siting of structures, riparian land use, and vegetation management would all be affected by riparian regulations, possibly increasing costs to landowners.

3) Loss of riparian vegetation through no management would decrease the desirability of the local environment and adversely impact property values. Physical damage to the riverbank through loss of riparian vegetation could cause bank erosion which in turn would increase costs to the landowner to combat it, or because of damages to structures and other improvements.

b) Social Impacts:

1) Within developed areas, riverbanks are often valued for both public and private recreational purposes. Usually, riparian land has a higher social value than equivalent nonriparian land. Loss of that resource would be detrimental to such qualities.

2) The burden of riparian use restrictions on the landowner would amount to another layer of regulation, and could be difficult to enforce.

c) Environmental Impacts:

1) The adverse impacts of flooding, bank erosion, loss of wildlife and fish habitat, reduced water quality and increased runoff would be significant if riparian vegetation was not protected in some manner.

2) Excessive restrictions on riparian lands within developed and committed areas could result in an aesthetic environment which would displease those who prefer manicured, park-like community settings to more wild, natural settings.

d) Energy Impacts:

1) Restrictions on riparian land use could increase energy costs to those forced to find other land upon which to build.

2) Public service costs in areas not subject to flooding or other adverse impacts of destroyed riparian areas, including the energy costs of those services, would be controlled.

Conflict Resolution

Following the analysis of conflicts, a decision must be made whether to 1) preserve the resource totally, 2) allow unlimited conflicting uses, or 3) limit the conflicting uses. Such limitation should be in the form of regulations and similiar implementing measures.

Considering the value of riparian vegetation to the County's ecosystem, and the impacts of its loss, option 2) above is not prudent. On the other hand, a complete limitation of all activities-- option 1)-- in the 100-foot riparian area is equally unfeasible. As with most resources, a compromise is the most practical -- the third option.

In Goal 5 Rule language, a "3C" decision should be made. This should take the form of Policies and land use regulations which accomplish the following:

1. Requires building setbacks* from all Class 1 streams. (The actual setback should be 50 feet in rural development zones and 100 feet in rural resource zones. According to ODFW officials, these setbacks are justifiable, and have been used in other Oregon counties. Specific language should be introduced to each zoning district to this end.)

2. Provides for vegetation management within the riparian setback strip. (ODFW officials have provided the County with suggested vegetation management regulations, based in part on the County's Coastal Resources Management Plan shoreland provisions, to be applied within the riparian strip. The actual area of application should be 30 feet for the 50-foot strip, and 50 feet for the 100-foot strip. See the County's "Natural Resources Conservation" shoreland overlay for fuller justification and explanation.)

3. Provides for flexibility. (It must be recognized that situations will occur where the above regulations are overly burdensome. A provision for landowner appeal for a relaxation of the standards needs to be written into each zoning district along with the other standards suggested above. Upon such appeal, the vegetative

*for non-water dependent uses.

management area -- as well as the wider riparian setback area itself -- could be modified upon consultation with, and approval by, officials of the ODFW.)

4. Does not conflict with the provisions of the Forest Practices Act. (Presently, it has not yet been resolved in Oregon whether or not Goal 5 concerns take precedence over activities regulated by the FPA -- an example being timber cutting along a Class 1 stream. Until and if that issue is resolved in favor of Goal 5 concerns, County action to limit conflicting uses should not be applied to lands subject to FPA regulation.)

5. Uses existing regulations wherever practical. (Both the Willamette Greenway Permit and the Coastal Resources Zoning regulate activites in the riparian zones of respective waterways. There is no need for an additional layer of regulation on lands already subject to such regulation. In fact, those standards should be used as a basis for management of riparian lands in areas beyond WGP or CRZ jurisdiction.)

Wetlands

The Major Wetlands listed earlier can each be evaluated seperately for Goal 5 Rule conflict analysis.

1. Fern Ridge Reservoir

   a) Location: Marshy areas on perimeter of the Reservoir, including lands to southeast of Reservoir (see map).

   b) Quality: High. The major fresh water wetland of the County. Contains freshwater marsh, warm water game fish, submerged & emergent vegetation, fur bearers, and many species of waterfowl, shorebirds, song birds and small mammals.

   c) Quantity: Several hundred acres of land, most of it owned by the U.S. Army Corps of Engineers, some of which is managed by ODFW under an interagency agreement.

   d) Conflicting Uses: Any use which would result in destruction of vegetation or drainage of surface/subsurface water.

   e) ESEE Analysis:

      1) Economic: The principal value of the area is for its present use. Alternative uses, such as development, would require expensive land alteration. As a focal point for outdoor, water-related recreation in central Lane County, Fern Ridge Reservoir and its wetlands provide a significant economic benefit. Maintenence of the Reservoir also provides valuable flood control benefits to downstream landowners.

      2) Social: Social consequences of protecting the resource parallel the economic ones -- generally beneficial.

      3) Environmental: The site provides a highly valuable area for a variety of life-forms. Destruction of the wetlands would destroy the habitat values, and would probably degrade the quality of the Reservoir and adjacent lands for flood control and recreational purposes.

4. Maple Creek Marsh

a) Location: Maple Creek where it meets northeast extent of Siltcoos Lake (19-11-30). See map.

b) Quality: High. One of the largest freshwater marshes in the area. Major use by water birds, beaver, furbearers, salmonids, shorebirds, emergent grasses, canary grass, sedges.

c) Quantity: About 30 acres, in private ownership.

d) Conflicting Uses. Same as entry #3.

e) Conflict Analysis: Same as entry #3. Also in a similiar manner, this site is under the protection of Coastal Resources zoning. The area is presently zoned with an overlay district of "Prime Wildlife," which is intended to maintain its existing character. A base zone of Exclusive Farm Use additionally restricts potentially conflicting uses.

5. Amazon Canal

a) Location: Amazon Canal for about the first ¼-mile from its confluence with the waters of Fern Ridge Reservoir.

b) Quality: High. Part of the Fern Ridge wetland system, although more open water than marsh. Water level varies. Provides habitat for various bird and acquatic animal species.

c) Quantity: About 200 yards of water and banks. Owned by Corps.

d) Conflicting Uses: Same as entry #1.

e) Conflict Analysis: Same as entry #1, although site plays less of a sponge function and more of a flood control function.

Conflict Resolution

Conflict resolution for wetlands should be much the same as for riparian lands: limit the conflicting uses (the "3C" option). Those areas which are owned by the Corps of Engineers can be considered to have sufficient protection from conflicting uses without the futile effort of County regulation of federally-controlled resources. Areas presently under the jurisdiction of Coastal Resource Zoning can also be assumed to have adequate protection, since the fundamental purpose of the County's Coastal Zoning was to restrict activities that posed a threat to Coastal resources -- shorelands, estuarine areas, and beaches and dunes. Areas not in either of the above categories should be designated with a "Natural Resource" land use category and appropriately zoned. As with most zones, it should contain language permitting flexibility when merited -- without the violation of Goal 5 purposes.

J. DELETE text beginning with the last paragraph on page 24 of the Working Paper through the remainder of text on page 25, and ADD the following in its place:

Although this is a useful index, officials of the ODFW stress the fact that a mere "numbers game" is not the optimum manner to deal with conflicts to the Big Game Range resource. While overall densities are important indicators of conflict, the manner in which these densities occur can either create worse conflict or reduce that which already exists.

A prime example is that of "clustering" dwelling units in Peripheral or Major Range areas -- siting dwellings on large tracts of timber or agricultural land near lot lines, near roads, and near one another. This leaves the balance of the land unimpacted.

The means to prevent conflict is appropriate zoning and siting regulations. As a general rule, the County's 80-acre forest land zone will satisfy the requirements of Major Range, and the 40-acre zone will satisfy the requirments of Peripheral Range. Since commercial timber zoning is very restrictive of dwelling unit placement, it is unlikely that conflicts will occur.

Within Developed and Committed areas, ODFW officials are examining the utility of continuing to designate some of these lands as either Peripheral or Major Range. Developed and Committed areas should be considered as Impacted, and conflicting uses permitted.

The County should continue to work with the ODFW to resolve the issue of Big Game Range designation and protection in a mutually acceptable manner -- including the involvement of that agency in land use regulation development. If the zoning procedure described above does not succeed in pre-empting conflicts with the resource, it will be necessary for the County to go through the ESEE process and determine new ways of dealing with conflicts. The process should follow the Goal 5 Rule format, and center on weighing the relative benefits of dwelling unit construction against those of Big Game Range maintenence.

Policies concerning this issue are proposed in the concluding section of this Working Paper.

K. DELETE the first full paragraph on page 27 (following the list of "1B" sites) in "Natural Areas" section, and ADD the following:

The six sites are individually discussed below. Since proper evaluation of each of them requires field inspection and reporting by knowledgable experts (biologists, botanists, etc.), and such staff capability is not presently available to the County, the County should commit itself to a timetable of developing the necessary information to satisfy the Goal 5 Rule, for each of of these sites. It is proposed that they be fully evaluated, and placed in "1A" or "1C" categories, within two years of the adoption of the Plan Policies, or equivalent statements, proposed in this Working Paper.

L. DELETE item "a" at the top of page 30 (Ben & Kay Dorris State Park), and re-letter the following four items "a" through "d"; ADD the following statement in a paragraph to conclude the listing:

The State of Oregon Parks and Recreation Division has, in a letter to Lane County, stated that the natural area values of these parks are being and will be protected, and that no conflicts with the resource are foreseen.

M. DELETE the third full sentence in item 6. on page 13 of the Working Paper ("American Osprey"), and ADD the following in place of it:

Through protection of the vegetative fringe along waterways, the habitat requirements of the osprey are protected by existing County regulations (e.g., Willamette Greenway Permit, Coastal Shoreland zoning overlays) and are expected to be further protected by new zoning restrictions intended to fulfill the County's responsibility for protection of riparian and wetland resources (see later sections of this Working Paper).

N. DELETE the material on pages 33 and 34 under "Policy Discussion." ADD the following in that location:

Following the publication of the first draft of this Working Paper, a number of Policies were adopted -- drawing in part on suggestions made in the Working Paper -- and placed in the General Plan Policies document (itself adopted December 1982). These Policies are duplicated at the conclusion of this section, for reader reference.

In order to comply with LCDC directives, and to implement proposed resource management programs discussed on the preceding pages, a few of the adopted Policies need to be revised, and some new ones added. These are proposed in the following paragraphs.

1. Revise existing Policy 3 as follows:

"3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification)."

2. Revise existing Policy 6 as follows:

"6. Riparian vegetation along all Class I streams in the County is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Riparian lands shall be defined as the lands within 100 feet of ordinary high water on Class I streams, and shall be considered "significant" "1C" areas (in the language of OAR 660-16-000/025); "3C" protection of the riparian resource shall be achieved through development setbacks and vegetation management regulations within the riparian strip. The setback distance will vary from 100 feet from ordinary high water in rural resource zones to 50 feet from ordinary high water in developed and committed areas; provided a means is made available for review and modification of these requirements where it can be demonstrated that an unduly restrictive burden would be placed on the property owner. Such review and modification shall be spelled out in the zoning districts affected, and shall involve consultation with officials of the Oregon Department of Fish and Wildlife."

3. Revise existing Policy 7 as follows:

"7. Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal/state ownership; where these do not occur, the "Natural Resources" zone shall be applied. Other wetlands from the National Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per Goal 5 requirements if it is clearly demonstrated that an unprotected significant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction."

4. Revise existing Policy 8 as follows:

"8. The County shall not establish restrictions, based on Goal 5 objectives, on timber management activities subject to the Forest Practices Act which are more severe than the requirements of the Act itself. Goal 5 resources which are not dealt with by the Act shall be protected by the County per Goal 5 and OAR 660-16-000/025 requirements."

5. Revise existing Policy 9 as follows:

"9. Sensitive Fish and Waterfowl Areas as identified in the 1983 Revision to the Flora and Fauna Working Paper, shall be considered "significant" "1C" resources per OAR 660-16-000/025, and protected per "3C" requirements through protection of riparian and wetland resources as described in the above Policy statements."

EXISTING FLORA AND FAUNA POLICIES from GENERAL PLAN POLICIES Document....

Flora and Fauna

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Provide special consideration to protection of sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies are encouraged to work with landowners to conserve wildlife habitats.

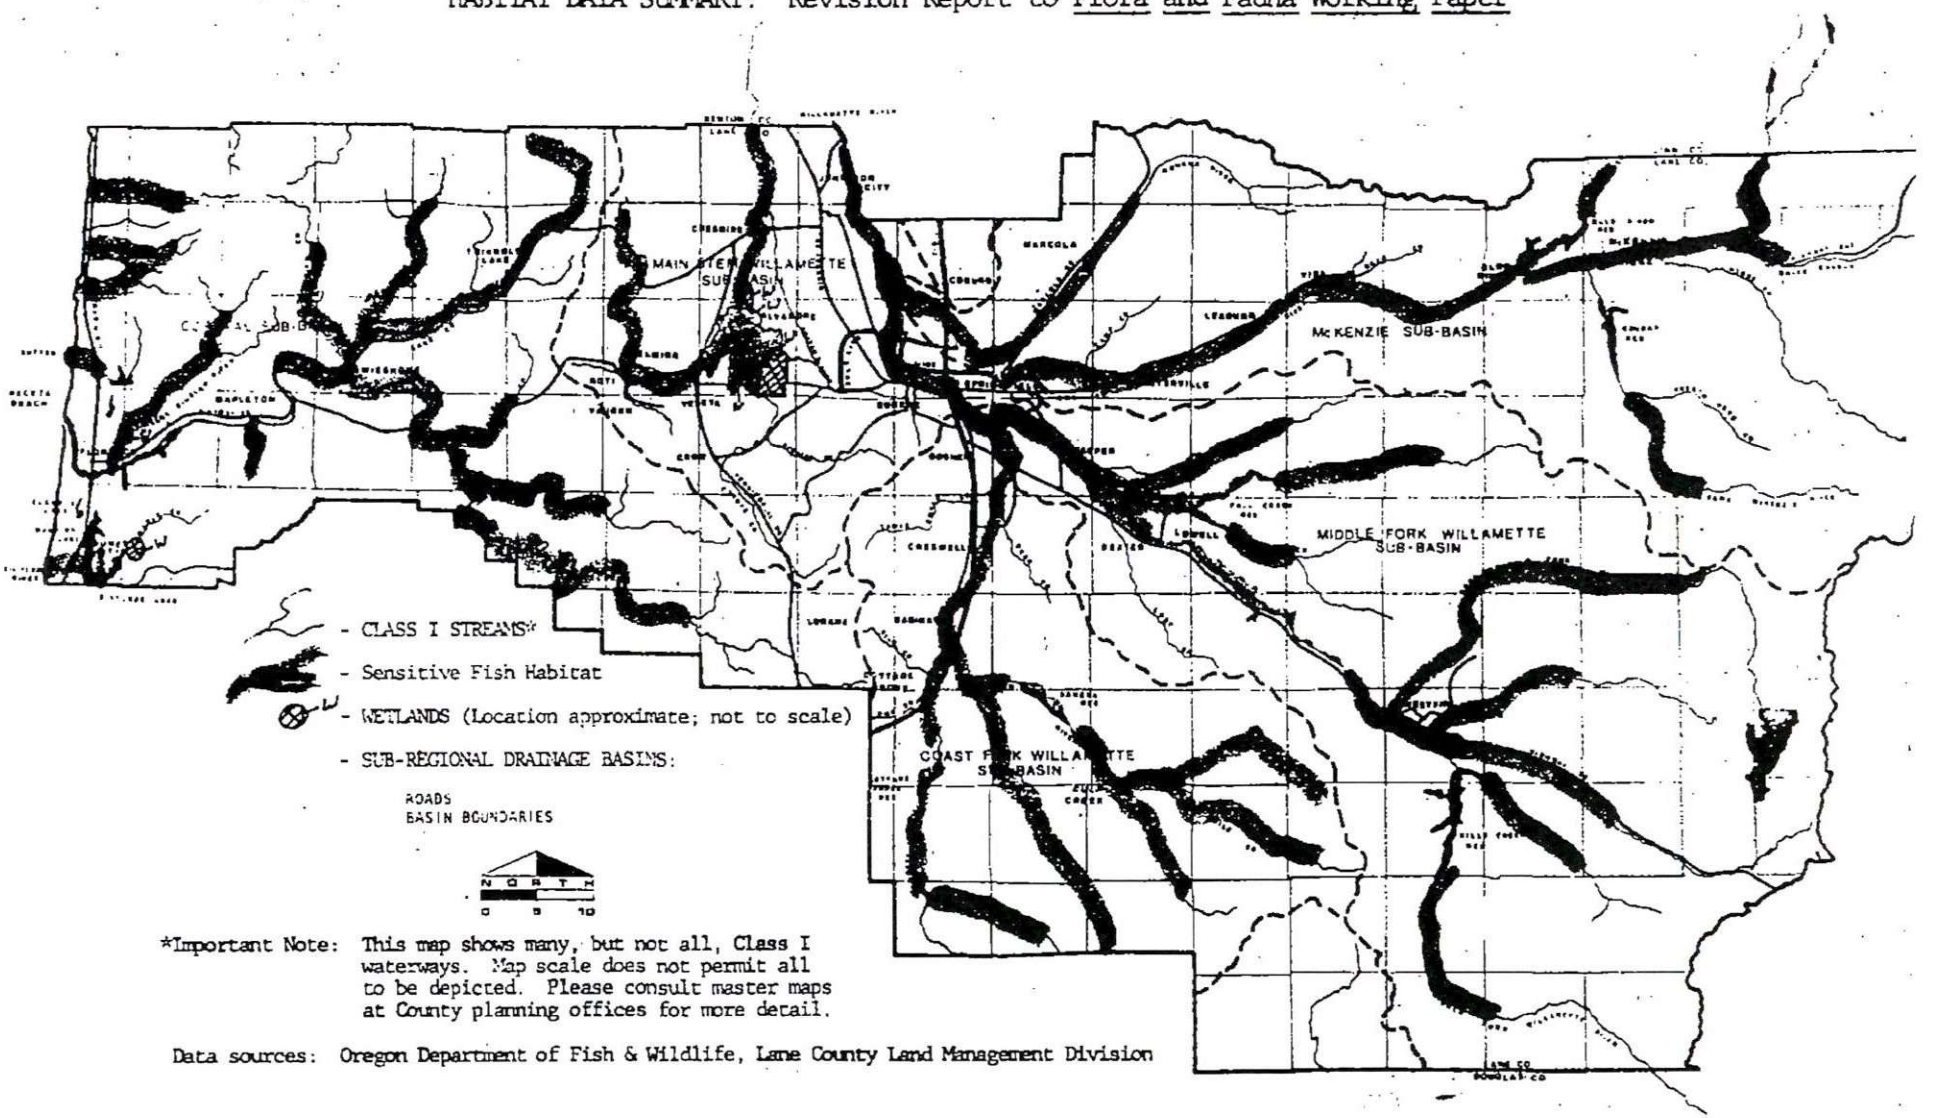
5. Lane County is encouraged to investigate fee acquisitions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to protect Goal 5 resources.

6. Riparian vegetation along all Class I streams is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Maintenance of this vegetation shall be encouraged with setbacks from Class I streams and shall be a consideration in Special Use Permits and Zone Changes.

7. Because of the inadequate inventory in Lane County, freshwater wetlands are being placed in a 1B category (insufficient data existing, per Goal 5 requirements, to decide on preserving the resource or not). When National Wetland Inventory (or equivalent) maps are available for all private lands in the County, these wetlands will be evaluated for quality and quantity as per the Goal 5 administrative rule (OAR 660-16-000). If the wetlands are determined to be significant, they will be evaluated against the rule's standardized set of ESEE (Environmental-Special-Economic-Energy) factors and conflict resolution proposed. This action will take place within one plan update period after the maps are available.

8. Lane County shall rely on the Oregon Forest Practices Act for protection of wildlife habitats and areas on lands zoned for the primary use of commercial growing and harvesting of forest tree species. Such habitats and areas shall include sensitive fish and waterfowl areas, riparian vegetation, wetlands areas, and big game ranges.

9. Sensitive Fish and Waterfowl Areas, as identified in the 1982 Lane County Working Paper on Flora and Fauna, are recognized as the most valuable habitat of their type in the County. Maintenance of riparian vegetation shall be a prime consideration in zoning districts in these areas.



10. Residential building permits issued within Major or Peripheral Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna, shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

11. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna.

12. Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000.

13. If uses are identified (which were not previously identified in the plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

HABITAT DATA SUMMARY: "Revision Report to Flora and Fauna Working Paper"

*Important Note: This map shows many, but not all, Class I waterways. Map scale does not permit all to be depicted. Please consult master maps at County planning offices for more detail.

Data sources: Oregon Department of Fish & Wildlife, Lane County Land Management Division

Goal 6:	Air, Water and Land Resources; Water Quality; Air Quality
Goal 7:	Areas Subject to Natural Disasters and Hazards
Goal 8:	Recreational Needs
Goal 9:	Economy of the States
Goal 10:	Housing
Goal 11:	Public Facilities and Services
Goal 12:	Transportation
Goal 13:	Energy Conservation
Goal 14:	Urbanization
Goal 15:	Willamette Greenway

3. Ordinance No. 870 shall remain in full force and effect until the effective date of this Ordinance.

4. If any section, subsection, sentence, clause, phrase or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions hereof.

While not part of this Ordinance, the Board of County Commissioners adopt the Legislative Findings set forth in attached Exhibit "C" in support of this action.

Enacted this ~~15th~~ 29th day of February, 1984.

Chair, Lane County Board of Commissioners

Recording Secretary for ~~this~~ Meeting of the Board

I. Historical Planning Perspective

1. Scope. Lane County is one of only two counties stretching from the Pacific Ocean to the crest of the Cascades, currently has twelve incorporated cities, and is the only county in the State to which all 19 Statewide Planning Goals apply. Therefore, the range of comprehensive land use planning issues in Lane County is innately complex. This complexity has been gradually addressed through a jurisdictional and geographical approach to comprehensive land use planning. All twelve cities with County support, have submitted comprehensive land use plans to LCDC and had these plans approved or acknowledged by LCDC (except for the Eugene-Springfield Metro Area General Plan area outside of the UGB). Lane County has submitted its Coastal Goals Compliance Report and, in July of 1983, was found by LCDC to be in compliance with Goals 16-18. Finally, Lane County has completed its Rural Comprehensive Plan for the remaining areas of the County and will submit the plan, together with a request for acknowledgement, to LCDC.

2. Compliance Status. Lane County believes its current Rural Comprehensive Plan substantially complies with all applicable Statewide Planning Goals. In the past, compliance with the Goals has eluded the County. On Feb. 13, 1981, LCDC formally denied Lane County's last compliance request and adopted over 200 pages of findings describing plan deficiencies. At that time, Lane County's Comprehensive Plan submittal consisted of a series of subarea plans, a policies document and several chapters of implementing codes. The current Rural Comprehensive Plan consists of a single policies document, set of plan and zone maps, and chapter of Lane Code.

3. 1981 and 1982 Planning Efforts. After LCDC denied Lane County's Comprehensive Plan in February of 1981, Lane County developed a work program to achieve Goal compliance. Twenty different technical reports (Working Papers) were developed to address each Goal in terms of inventory and suggested policy approaches. Ordinance 870 for the plan policies was adopted on Nov. 10 of 1981 and amended in Dec. of 1982. During this period, plan and zone maps were developed for public review and subsequent hearings.

4. 1983 and 1984 Planning Efforts. In January of 1983, public hearings to adopt county-wide plan and zoning map designations were stopped because of plan and zone deficiencies identified by County staff as well as DLCD staff. Between January and November of 1983, staff developed an additional set of working papers and working paper addendums to address identifiable Goal deficiencies. In October of 1983, the Board of Commissioners appointed the Planning Commissions as the Citizen Involvement Program Committee and adopted a work program to achieve citizen review, input and ultimate adoption of the plan. In November of 1983, joint Board/Planning Commission public meetings were held to review the additional working papers and working paper addendums.

e. An informal policy of holding meetings and hearings in the area affected by the subject matter was initiated -- that is, holding citizen involvement meetings (with Planning Division staff) or official public hearings (by Planning Commissions and/or the Board of County Commissioners) in one or another subarea, instead of requiring subarea residents to come to Eugene. Although more expensive and time-consuming than the reverse, the effort brought planning awareness to many citizens who might not otherwise have become involved.

f. Our current citizen involvement program was originally adopted in 1976 and revised in 1978, 1980, 1981 and 1983. Concurrently with revising the citizen involvement program in 1981, the Board approved a citizen involvement program for the rural comprehensive plan revision project. See the attached LANE COUNTY CITIZEN INVOLVEMENT PROGRAM FOR PLANNING, Goal 1 Attachment "A". In October of 1983, the Board of Commissioners appointed the Planning Commissions (Lane County Planning Commission and West Lane Planning Commission) as the Citizen Involvement Program Committee. Goal 1 Attachment "A" does not reflect the change of the CIPC membership to the two planning commissions. However, Goal 1, Policy #4 reflects this change.

2. Over the years the CIPC has been plagued by lack of consistent participation by its membership. The restructuring of its membership in 1983 was to overcome this difficulty. As stated in the October 12, 1983 report of the Board the prior structuring was not successful in its objective. See Goal 1 Attachment "B".

3. Goal 1 gives preference to an independent committee, however offers two alternatives; the governing body (Board of Commissioners) may assume the CIPC function s or it may assign it to the Planning Commission. In appointing the Planning Commission as the CIPC, the Board considered the following three alternatives and considered alternative 3 to be preferrable:

a. An attempt could have been made to revitalize the independent CIPC. As a minimum this would have required assignment of staff liaison to provide close and continuous support. The support would have been both direct (i.e., CIPC meetings) and indirect. The indirect support would have included such things as maintaining contact with represented groups, keeping individual interest high through personal contacts, etc. Such effort would have been almost a full time position. Financial limitations precluded allocation of this amount of resources to achieve an objective that could be attained by other means. Additionally, the long term success of this approach would have been questionable.

b. A second approach would have been for the Board to assume the role of the CIPC. Advantages included the Board members familiarity with current and proposed planning efforts, broad public contact, high interest level and selection by a district election. Disadvantages were the additional load to an already overcrowded schedule, limited membership (5 members) and

narrowing the scope of information input (the advisors are the implementors).

c. The third alternative, and the one selected by the Board in October 1983, was to delegate CIPC repsonsibility to the two Planning Commissions. Advantages included familiarity with current and proposed planning efforts, broad public contact, widely based membershp, regular meeting schedule, high interest level of the two commissions, and noninvolvement in the application process The Board's realignment of Planning Commission duties (the elimination of the planning commissions from the application process) placed them in an ideal position to also oversee the citizen involvement process. Being the primary body to develop comprehensive plans, they also were front line observers to the publics' interaction with the process. Additionally, experience has shown that citizen involvement and access are matters of paramount concern to the commission members. The Planning Commission appointment process established by the Board more than adequately meets Goal requirements for CIPC membership.

4. 1981-1984 Comprehensive Plan Revision Time Span. Lane County has been working on its comprehensive plan since mid 1981 when the first working papers were developed. The Plan revision work has been in process for two and one half years. There has been more than adequate time for interested citizens to review working papers prepared early in the plan revision process.

5. 1983-1984 Work Program. Lane County halted hearings in January of 1983 to correct several plan deficiencies. Additional plan inventory, code work needed to be done and reviewed in order to have a comprehensive plan that would comply with the Goals. See Goal 1 Attachment "C".

6. Work Program and Citizen Involvement Program Committee. In October of 1983 the Board of Commissioners tentatively adopted an intensive work program for public review and adoption of a revised comprehensive plan capable of being acknowledged. The two planning commissions in Lane County were then appointed as the Citizen Involvement Program Committee for the reasons mentioned earlier. The work program was designed to involve the Planning Commissions and public in the comprehensive plan revision consistent with Goal #1 and to comply with stringent submittal timelines mandated by the 1983 Oregon Legislature.

7. Between October 18, 1983 and February 29, 1984, 61 separate public meetings were held to revise the comprehensive plan. Public information meetings were held prior to final Planning Commission deliberation and final Board adoption of the plan and implementing codes. See Goal 1 Attachment "D".

8. Comprehensive Plan revision documents prepared in 1983 were made available to the public from Nov. of 1983 to Feb. of 1984 in a self service area located in the first floor of the County Courthouse. Between Nov. 1983 and Feb. 1984, planning staff kept a

sign-up sheet for persons wishing assistance regarding comprehensive plan revision matters. 1109 persons were provided with such assistance. See Goal 1 Attachment "E".

9. To organize individual plan, zone or implementing code requests, Lane County developed Comprehensive Plan Revision CPR Request forms. These forms allowed owners to clearly identify specific property and to state their request for a revision. All request were entered into the County's computer and an accurate tracking system was in place. More than 1800 such requests were received and reviewed by Lane County. See Exhibit "L".

10. Written correspondence was received which was not tracked like CPR requests. The record shows that in excess of 100 such correspondences were received by Lane County prior to final decisions. See Goal 1 Attachment "F".

11. A Comprehensive Plan/Zoning Revision Newsletter was mailed to persons on the County's mailing list and to the Register Guard and Siuslaw News on November 17, 1983. See Goal 2 Attachment "G". As a result of public hearings, many names were added to the mailing list, those persons receiving comprehensive plan revision information. See Goal 1 Attachment "H".

12. Prior notice of all public hearings and meetings was provided through the Board of Commissioners office, Goal 1 Attachment "I", and the Land Management Division, Goal 1 Attachment "J".

13. Public Announcements were provided to the news media disclosing news or topics of special interest. See Goal 1 Attachment"K".

14. Between December 1983 and February 1984 at least 87 news articles and editorials appear in local newspapers. See Goal 1 Attachment "L".

15. Between December 1983 and February 1984, at least 52 letters to the editor appeared in local newspapers. See Goal 1 Attachment "M".

16. Between November 1983 and February 1984, the comprehensive plan revision efforts received radio and tv coverage.

17. Between November 1983 and February 1984, special interest groups contacted and informed members about the comprehensive plan revision. See Goal 1 Attachment "N".

CONCLUSION

Based upon the above facts, we find that Lane County has provided extensive opportunities for citizen participation in full compliance with Goal 1 and the County's citizen involvement program.

LAND USE PLANNING LEGISLATIVE FINDINGS

Goal #2 provides:

"GOAL: PART 1 - PLANNING: To establish a land use planning process and policy framework as a basis for all decisions and actions related to use of land and to assure an adequate factual base for such decisions and actions.

"City, county, state and federal agency and special district plans and actions related to land use shall be consistent with the comprehensive plans of cities and counties and regional plans adopted under ORS 197.705 through 197.795.

"All land use plans shall include identification of issues and problems, inventories and other factual information for each applicable state-wide planning goal, evaluation of alternative courses of action and ultimate policy choices, taking into consideration social, economic, energy and environmental needs. The required information shall be contained in the plan document or in supporting documents and implementation ordinances shall be filed in a public office or other plce easily accessible to the public. The plans shall be the basis for specific implementation measures. These measures shall be consistent with and adequate to carry out the plans. Each plan and related implementation measure shall be coordinated with the plans of affected governmental units.

"All land use plans and implementation ordinances shall be adopted by the governing body after public hearing and shall be reviewed and, as needed, revised on a periodic cycle to take into account changing public policies and circumstances, in accord with a schedule set forth in the plan. Opportunities shall be provided for review and comment by citizens and affected governmental units during preparation, review and revision of plans and implementation ordinances.

"PART II - EXCEPTIONS: When, during the application of the statewide goals to plans, it appears that it is not possible to apply the appropriate goal to specific properties or situations, then each proposed exception to a goal shall be set forth during the plan preparation phases and also specifically noted in the notices of hearing shall summarize the issues in an understandable meaningful manner.

"If the exception to the goal is adopted, then the compellinreasons and fac ts for that conclusion shall be completely set forth in the plan and shall include:

(a) Why these other uses should be provided for'

(b) What alternative locations within the area could be used for the proposed uses;

(c) What are the long term environmental, economic, social and energy consequences to the locality, the region or the state from not applying the goal or permitting the alternative use;

(d) A finding that the proposed uses will be compatible with other adjacent uses.

"PART III - USE OF GUILDELINES: Governmental units shall review the guidelines set forth for the goals and either utilize the guidelines or develop alternative means that will achieve the goals. All land us plans shall state how the guidelines or alternative means utilized achieve the goals."

FINDINGS

1. Factual Base. Goal #2 requires that there be "inventories and other forms of date ... as the basis for the policies and other deicisions set forth in the plan. The Lane County Rural Comprehensive Plan is based upon extensive inventories, as identified below, and conforms to this requirement:

a) 1981 - 1982 Working Papers:

"1. County Planning Process
2. Citizen Involvement
3. Agricultural Resources
4. Forest Resources
5. Historic Resources
6. Natural Resources: Flora and Fauna
7. Public Facilities
8. Recreation
9. Transportation
10. Urbanization
11. Energy Resources
12. Environmental Quality
13. Economy
14. Population
15. Natural Resources: Minerals and Aggregate
16. Water Resources
17. Natural Resources
18. Housing
19. Willamette Greenway"

b) 1983 Working Papers and Working Paper Addendums:

1. Developed and Committed Lands
2. Marginal LAnds (and Nonresource Lands)
3. Addendum to Agricultural Lands
4. Addendum to Forest Lands
5. Addendum to Historic Resources
6. Addendum to Flora and Fauna
7. Addendum to Energy
8. Addendum to Mineral and Aggregate Resources
9. Addendum to Willamette Greenway

d. Policy 20. Because of its size and geographical local, Lane County has numerous, natural recreational amenities. To provide greater opportunities for citizens to utilize these amenities, to promote economic diversification, and to promote tourism; Lane County developed Policy 20 for destination resorts. The provisions of this policy and the DR/RCP zone provide adequate standards to assure that such development would be destination resort oriented and distinguishable from purely commercial or residential development. When discussed at public meetings and hearings, feedback regarding this policy was supportive.

e. Policy 21. This policy is in response to the large number of specific property, plan/zone requests Lane County has received via written Comprehensive Plan Revision (CPR) requests. It assures that all citizens will receive notification of the final status of their requests. It also recognizes the complex review and factual findings necessary to support marginal lands or nonresource designations and provides the framework to obtain additional information and Planning Commission reviews.

f. Policy 22. This policy anticipates that certain errors or omissions will occur when Lane County adopts the plan, and when such errors are identified, provides a framework for Lane County to initiate corrective action without citizens having to pay application fees for such corrective action. Citizen support for such a policy was received during hearings.

g. Policy 23. This policy responds to concerns for interim protection of Goal's resources raised by the Department of Fish and Wildlife, the League of Women Voters, and the Ad Hoc Fish and Wildlife Committee. It recognizes the value of protecting Goal 5 resources in a 1B category and provides a framwork for applying interim protective measures.

4. Planning Map. Goal 2 requires that the comprehensive plan also consist of a general plan map including general plan designation. We find that Lane County's adoption of the general plan maps and plan designations via Ordinance PA 883 satisfies this requirement.

5. Implementing Ordinances. Goal 2 requires that the comprehensive plan shall have adequate implementing measures to implement the purposes of the plan policies and designations. We find that Lane County's adoption of Lane Code Chapter 16 satisfies this requirement.

AGRICULTURAL LANDS GOAL LEGISLATIVE FINDINGS

Goal #3 provides:

"GOAL: To preserve and maintain agricultural lands.

"Agriculture lands shall be preserved and maintained for farm use, consistent with existing and future needs for agricultural products, forest and open space. These lands shall be inventoried and preserved by adopting exclusive use zones pursuant to ORS Chapter 215. Such minimum lot sizes as are utilized for any farm use zones shall be appropriate for the continuation of the existing commercial agricultural enterprise with the area. Conversion of rural agricultural land to urbanizable land shall be based upon consideration of the following factors: (1) environmental, energy, social and economic consequences; (2) demonstrated need consistent with LCDC goals; (3) unavailability of an alternative suitable location for the requested use; (4) compatibility of the proposed use with related agricultural land; and (5) the retention of Class I, II, III and IV soils in farm use. A governing body proposing to convert rural agricultural alnd to urbanizable land shall follow the procedures and requirements set forth in the Land Use Planning goal (Goal 2) for goal exceptions."

FINDINGS

1. Inventory: We find that agricultural lands, as deifned by Goal 3, have been inventoried in the Agricultural Resources Working Paper, the Working Paper: Addendum to Agricultural Lands, and during the preparation of the plan map.

2. Policies: We find that the General Plan Policies, Part II, Goal 3, adopted by Ordinance No. PA 883, are reflective of the above inventory and provide fifteen general standards to preserve and maintain agricultural lands as required by Goal 3. Policy No. 18, Goal 2, Part II of the General Plan Policies commits the Board to further refinement of the standards necessary to preserve agricultural lands as required by Goal 3.

3. Plan Designations: Ordinance PA 883 adopts the plan designation of "Agricultural Land". We find that the above policies provide direction for the application of the agricultural land designation.

4. Zones: Agricultural lands designated as "Agricultural Land" are zoned Exclusive Farm Use (E) by Lane County, and the E zone is contained in LC 16.212 as adopted by Ordinance 1-84. The E zone is modeled after the provisions of ORS 215 consistent with Lane County's adoption of marginal lands. The standards in the E zone also bear a clear relationship to the above inventory and policies. Farm unit and parcel sizes in the E zone are based upon the inventory data, analyses and conclusions contained in

Working Paper: Addendum to Agricultural Lands. We find that the E zone complies with Goal #3.

FORESTRY GOAL LEGISLATIVE FINDINGS

Goal #4 provides:

"GOAL: To conserve forest lands for forest uses.

"Forest land shall be retained for the production of wood fibre and other forest uses. Lands suitable for forest uses shall be inventoried and designated as forest lands. Existing forest land uses shall be protected unless proposed changes are in conformance with the comprehensive plan.

"In the process of designating forest lands, comprehensive plans shall include the determination and mapping of forest site classes according to the United States Forest Service manual "Field Instructions for integrated Forest Survey and Timber Management Inventories - Oregon, Washington and California, 1974."

"Forest Lands -- are (1) lands composed of existing and potential forest lands which are suitable for commercial forest uses; (2) other forested lands needed for watershed protection, wildlife and fisheries habitat and recreation; (3) lands where extreme conditions of climate, soil and topography require the maintenance of vegetative cover irrespective of use; (4) other forested lands in urban and agricultural areas which provide urban buffers, wind breaks, wildlife, and fisheries habitat, livestock habitat, scenic corridors and recreational use.

"Forest Uses -- are (1) the production of trees and the processing of forest products; (2) open space, buffers from noise, and visual separation of conflicting uses; (3) watershed protection and wildlife and fisheries habitat; (4) soil protection from wind and water; (5) maintenance of clean air and water, (6) outdoor recreational activities and related support services and wilderness values compatible with these uses; and (7) grazing land for livestock."

FINDINGS

1. The Forest Land working paper and addendum are incorporated as if fully set forth herein. The following discussion addresses only the issues where the ultimate policy choice is at variance with the draft working papers.

2. Dwellings. During the public comment stage of this Plan's development, substantial opposition to the limitations on locating dwellings on Impacted Forest Land (F-2) arose. In reviewing available optoins, the Planning Commission and Board of County Commissioners were aware of the following factors:

a. The specification of permissible forest uses, as exprssed in the Goal itself, is quite limited. Despite this limitation, two appellate court cases allow uses not enumerated in the Goal. See Shadybrook Environ. Protect. Assn. v. Washington Co., 61 Or App 474 (1983), rev. den., 294 Or 682 (1983), where the

court authorized nonforest (rock quarry) uses in a forest zone. See also, Publishers' Paper Co. v. Benton Co., 63 Or App 636 (1982), which authorizes nonforest dwelling in forest land when certain conditions are met.

b. Lane County forest zones have been subject to legal challenges in the past and LCDC and LUBA directed that nonforest uses, such as dwellings, be allowed only if "necessary and accessory to" an enumerated forest use. Lamb v. Lane County, 7 Or LUBA 137 (1983). Neither LUBA nor LCDC defined "necessary and accessory to".

c. During 1983, LCDC attempted to prescribe, via a proposed Administrative Rule, under what circumstances a dwelling would be permitted. The draft Rule of February 17, 1973 proposed that if a dwelling were allowed that it must be a use "accessory" to the forest use. No such Administrative Rule was ever adopted.

d. Approximately 92 percent of Lane County's forest land is either in industrial or public ownership. This land has been zoned F-1, Noninpacted Forest Land. The implementing measures under this zone are quite specific and uses are strictly limited. For example, dwellings, except for replacement and statutory lots of record, are not allowed.

e. Forest Management Plan. Land designated F-2, while impacted by nonforest activities, are nevertheless lands capable of significant forest production. Lane County wishes to enhance forest management on these parcels. The method selected is to allow dwellings only when two things occur: A Forest Management Plan is submitted demonstrating how the dwelling will enhance forest production and a tax deferral or equivalent stocking is achieved. The second condition will be discussed in detail later. With regard to whether a Forest Management Plan, was a viable criterion to help meet the "necessary and accessory to" standard, we received conflicting evidence. At least one individual testified that dwellings interferred with and adversely affected Forest Management. No specific data arising from Lane County on this issue was submitted. In contrast to this testimony, numerous owners of F-2 parcels testified that they managed their forest from their home and were able to enhance forest production thereon. They testified in detail about being able to work on the land in the evenings and on weekends thinning, fertilizing, etc. Also, numerous citizens pointed to the small tree farmer of the year who managed the winning parcel in question, 22 acres, from his home on the subject property. Finally, we note that Forest Management from the homesite has been a tradition in Lane County for many years without any requirement of Forest Management Plans or tax deferrals. Because of the conflict in testimony as to the impact of dwellings, we elect to continue the basic pattern, but formalize actual practice by conditioning the dwelling on the Forest Management Plan -- by this technique, we can be assured of enhanced production and thereby help confirm that the dwelling is necessary and accessory to Forest Management. New dwellings for nonforest purposes on land suitable for commercial forest production are not allowed.

DIVISIONS IN F-2 IMPACTED FOREST LAND

Division standards in the F-1 Zone remain as discussed in the working paper and need no further discussion. F-2 Division standards did change in response to public testimony and an explanation is required.

The 1983 Legislature, revised Oregon law to provide that dwellings may be allowed on any woodlot operated in conjunction with the farm operation if the parcel is capable of producing $10,000 in gross income over the growth cycle (ORS 215.213(2)(b(A)(B)). When this revision was adopted, the Legislature was aware of Goal #4's requirement to conserve forest land for commercial forest uses. Reading the Goal and the statutory revision together, we find that the Legislature has determined that $10,000/year gross income over the growth cycle meets the standard of the Goal. Further, that similar treatment of impacted forest land in Lane County will result in consistent treatment of forest land and farm woodlots. In fact, this land is very similar. Impacted Forest Land is, by its nature, forest land affected by nonforest uses, i.e. farms. It is often located in transition areas between EFU and Nonimpacted Forest Land. Furthermore, such a standard is objective and certain. Objectivity and certainty are two land use criteria we wish to use whenever possible.

In addition, we believe the legislative standard is very logical. $10,000 gross income per year over a growth cycle is a significant economic unit. As such, our experience leads us to conclude that the marketplace will cause the owner of such land to conserve its use for forest purposes. We find that an asset worth $10,000/year over a growth cycle will not be left idle, but will be used for forest purposes. As such, the legislative standard meets the Goal.

This conclusion is supported by the Oregon property tax laws. The two programs, the Western Oregon Forest Land and Severance Tax (ORS 321.257 to .375) and Western Oregon Small Tract Optional Tax (ORS 321.705 to .765) create substantial incentives for Forest Management. Property once placed in the program is subject to substantial back taxes if not continuously managed for forest purposes. See ORS 321.760 and 321.372. If an owner elects not to apply for the designation on the parcel, the property, by definition, will have a very significant true cash value. An asset capable of $10,000/year gross income is very valuable. Substantial annual carrying costs exist if the deferral programs are not used. Our experience leads us to conclude that the vast majority of owners of newly created parcels will, therefore, apply for the deferral or continue in the program as the taxes are too high otherwise.

Based upon the nature of the division standard, which only allows creation of economically viable commercial units, we find the purpose of the Goal is fulfilled.

We selected the $10,000 standard based upon a memorandum from the office of the State Forester, Dave Stere to Mike Rupp of DLCD, dated September 22, 1983. We note the current economic conditions reflect very low timber values. By adopting the standard of September 22, 1983, we have selected a standard which produces far larger acreages than market conditions just a few years ago would have produced. The State Forester's memorandum is attached hereto as an exhibit.

Our experience further indicates that most soil types in Lane County in lannds zoned F-2 have a cubic foot site class of Class 3, 4 and 5. As a consequence, parcel sices of 40 acres and larger will be, in fact, the parcel sizes actually allowed.

In conclusion, because the parcel created is a significant economic unit, it is, by definition, a viable commercial forest parcel, and the division standard meets Goal #4's requirement to retain forest land for forest purposes.

FARM USES IN AREAS OF MIXED FARM AND FOREST USES

1. We incorporate by reference the memorandum from County Counsel to the Board of County Commissioners and Planning Commission dated December 9, 1983, copy attached and adopt the same as if fully set forth therein.

Water Impoundments, LC 16.211(2)(d). The proposed standard was 1,000 acre feet. However, we found this area to be too large. We, therefore, specified that impoundments of greater than 100 feet should be moved to the conditional use category so that they would be subject to review prior to approval.

Class I Stream Setbacks and Maintenance, Removal and Replacement of Riparian Vegetation, LC 16.211(9)(b) and (c). These standards were revised consistent with the flora and fauna working paper addendum and comments from the Department of Fish and Wildlife.

IN THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY, OREGON

ORDINANCE NO. 870
(Amended 11/10/82)

) IN THE MATTER OF REPEALING ORDINANCE
) NO. 804 AND ADOPTING THE GENERAL PLAN
) POLICIES AS A COMPONENT OF THE
) COMPREHENSIVE PLAN FOR LANE COUNTY
) (PA 82-145)

WHEREAS, the Board of County Commissioners has received a recommendation from the Lane County Planning Commission (LCPC Resolution PA 82-191) and the West Lane Planning Commission (WLPC Resolution PPA 82-145) regarding amendments to the General Plan Goals and Policies, a component of the Comprehensive Plan of Lane County; and

WHEREAS, the Board of County Commissioners has received and considered the proposed amendments, public testimony and correspondence relating thereto; and

WHEREAS, the Board of County Commissioners has performed its public hearing and other duties in accordance with applicable law; now, therefore;

THE BOARD OF COUNTY COMMISSIONERS ORDAIN AS FOLLOWS:

1. Ordinance 804 adopting the "General Plan Goals and Policies" as an element of the Lane County Comprehensive Plan is hereby repealed.

2. The proposed "General Plan Policies" as set forth in Exhibit A attached hereto is ADOPTED as a component of the Comprehensive Plan of Lane County.

In support of this ordinance, the Board adopts the findings set forth in Exhibit B attached hereto.

This ordinance becomes effective December 31, 1982, unless, prior to that date and by separate ordinance, the Board shall extend the effective date to a later time.

Enacted this 10th day of November, 1982.

Scott Lucas Allen
Chair, Lane County Board of Commissioners

APPROVED AS TO FORM

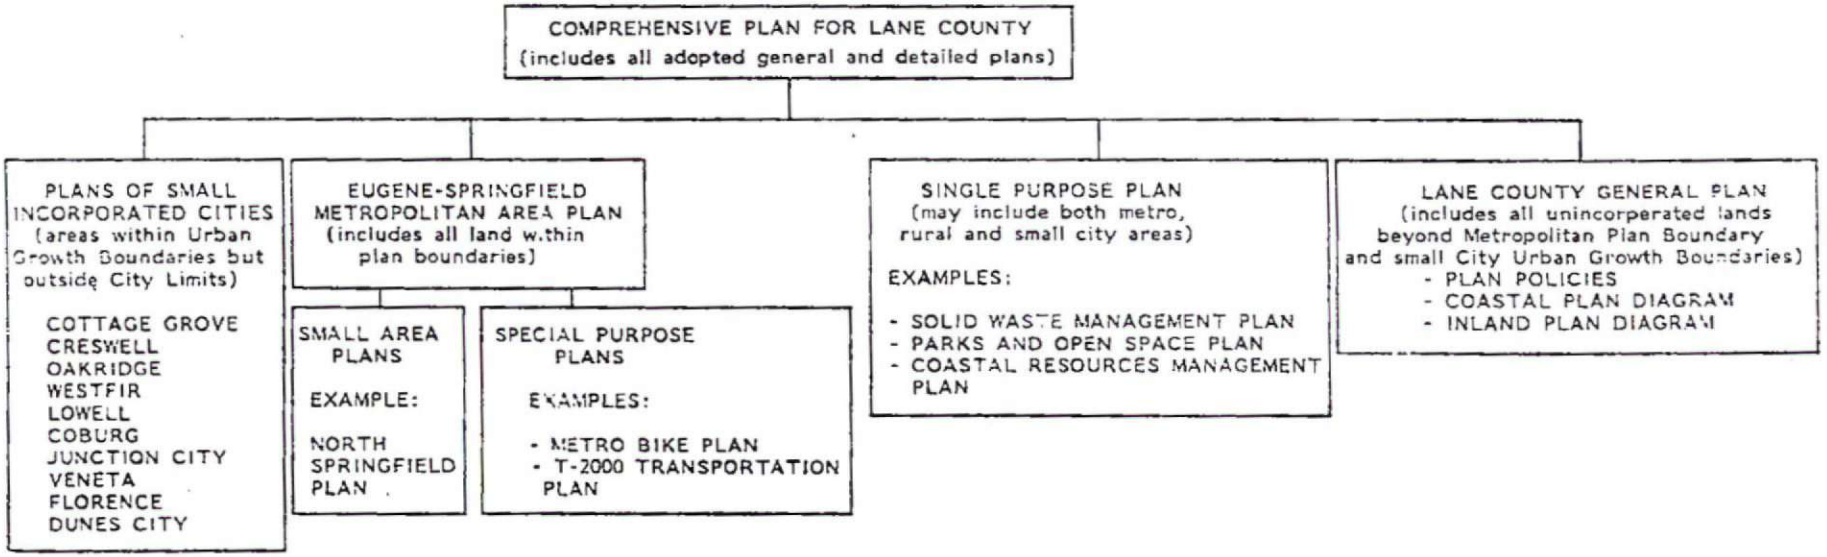
Appendix A: Policy Categories----------41

PART I: INTRODUCTORY MATERIAL

A. INTRODUCTION TO THE GENERAL PLAN

The Lane County General Plan applies to all unincorporated lands within the County beyond the Urban Growth Boundaries of incorporated cities in the County and beyond the boundary of the Eugene-Springfield Metropolitan Area Plan. Where these lands are beyond County jurisdiction (such as National Forest lands), the Plan does not legally apply, but it does contain provisions and representations of County positions on various issues, to be used by those agencies (e.g., US Forest Service) in their own management actions, and also used in the event that lands not in County jurisdiction enter County jurisdiction.

The Plan follows the format of the LCDC Statewide Planning Goals, recognizing that they must be met by all local jurisdictions in Oregon. It is composed of two major elements:



1. County General Plan Policies: For each LCDC Goal, there are one or more Policies to be applied by the County toward land use and other planning and resource-management issues, in the interests of compliance with sound planning principles and statewide planning law. Policies are binding commitments, but will be carried out within established work programs and over all County priorities. The application of Policies which call for new programs or studies will occur as County resources (staff, budgetary) permit.

2. Plan Diagrams: Two major planning regions are identified for Lane County--the Coastal Region and the Inland Region. For each, detailed representations of land use are depicted on maps, or Plan Diagrams. Land use regulation methods, such as zoning, are applied to carry out the intent of the designations. The application of the general plan is primarily through zoning.

Chart One diagrams the relationship of these elements, and also indicates relationships with other portions of the County Comprehensive Plan.

The document now before the reader is one of the two above components--the County General Plan Policies document. The Policies document is the broad, direction-setting portion of the Plan, and lays out approaches for interpretation of County planning needs and means of complying with State of Oregon planning law. This law attaches great importance to local jurisdictions having adopted comprehensive plans which in turn meet the requirements of statewide planning Goals. Accordingly, matters of interpretation concerning the General Plan are to be resolved in favor of compliance with these Goals, and the Plan itself shall be recognized as representing the County's best effort in meeting the requirements of LCDC and its policy expressions, including the Goals.

B. INTRODUCTION TO THE COUNTY POLICIES COMPONENT OF THE GENERAL PLAN

County Policies are broad, somewhat generalized statements that provide direction to County decision makers in their efforts to choose between competing uses for given resources, and in their efforts to solve historic problems and prevent new ones from occurring. The Policies covering complex topics and laying the groundwork for future actions of various kinds. The Policies expressed here apply to rural Lane County, outside of the Urban Growth Boundaries of cities and beyond the Plan Diagram Boundary of the Eugene-Springfield Metropolitan Area General Plan. They are designed to be compatible with similar Policies--and planning efforts--of other governmental jurisdictions in the County.

In some respects, the Policies can be considered the basis of the County plan, in that they provide the lead, or set the general direction, for subsequent County actions to deal with various land use and resource management decisions. In doing so, they are directly intended to fulfill the mandate of the LCDC statewide planning Goals.

Four statewide planning Goals are not addressed in this document: the four "Coastal Goals" (LCDC Goals 16-19). These, and Policies connected with them, are located in a special-purpose Coastal Resources Management Plan developed and adopted for use in the Coastal portion of the County. They should be used in concert with the "basic fifteen" Goals. Since they are special-purpose in nature, and deal more specifically with particular concerns of the Coastal area, conflicts that may arise or be generated between the Coastal Policies and the "basic fifteen" should be resolved in favor of the Coastal Policies until and if one or the other conflicting statement is changed to eliminate the conflict.

The Willamette Greenway Goal is considered to be part of the "basic fifteen." The Appendix to this document cites the language of the 15 Goals.

C. HISTORY OF THE POLICIES DOCUMENT

The Policies contained in this document were developed during a period of more than a year, beginning in early 1981. A process was devised at the beginning of the period to prepare a series of 20 Working Papers, which, along with other sources, were to serve as the technical data base for the Policies. The Working Papers were written and published from mid-1981 to early 1982. Each Working Paper contained information on a given topic or topics and a number of them contained preliminary Policies which were drawn from the information in the Papers and which were presented for initial discussion purposes.

Hearings were held on the Papers as they were published. Each Planning Commission prepared a Report to the Board of County Commissioners containing its reaction to the Paper and containing draft Policies. Often the Policy statements drew on sources other than the Working Papers -- existing County Plan information (such as special-purpose plans or technical studies), comments or testimony of individuals or groups appearing at the hearings, the judgment and views of Planning Commission members and so on -- and so represented a broad array of perspectives and attitudes. Each Planning

Commission Report cited information used in Policy development, in order to provide a firm basis for Policy use. The background information, including the Working Papers, is to be used to help interpret and understand General Plan approaches but is not itself designed to be adopted as legislative law.

Following the initial development of Policies, the two Planning Commissions went through a process of reconciling differences between each Commission's version of them. After this was completed, the Policies were put before each Commission for a second time for formal public hearing as a complete draft document and then approved for Board of County Commissioners' review and hearing. The Board completed its hearings in mid-1982 and adopted a final version of the Policies document.

D. CITIES, COMMUNITIES AND RURAL LANDS

While the Policies in this document are directed at Lane County government, it is clearly recognized that the County has a responsibility to, and must coordinate efforts closely with, the incorporated cities within its boundaries. Statewide planning law requires that each incorporated city develop and adopt its own land use plan which must itself comply with LCDC Goals. The plan must contain essentially the same elements as the County General Plan, with an additional element of an identified Urban Growth Boundary (required by Goal 14). Future urban growth for each city is to take place within that Boundary. In the case of the Eugene-Springfield Metropolitan Area Plan, a mutual Boundary is adopted by both cities and the County. For all other cities, the County must ratify the cities' UGBs by independent evaluation of, and adoption of, appropriate city plan provisions.

Through this method, the County becomes responsbile for administering the provisions of city plans within the city UGBs but outside of the corporate city limits. "Joint Agreements for Planning Coordination" drawn up between the County and each city lay the framework for cooperative action in the effort. Policies concerning Goal 14 in this document further indicate County posture toward city plans. County adoption of city plans--or amendments thereto--ensures that conflicts between city plans and County Plan do not readily occur.

Unincorporated communities are treated differently. They are identified as "community" on the two Plan Diagrams, but are not given official Urban Growth Boundaries. Instead, the probable limits of growth over the planning period are reflected in the area within the "community" designation. Since lands within these areas are under County jurisdictions, no Joint Agreements are required, but development there must be justified by LCDC "need" or "committed land" exceptions.

Areas within rural Lane County qualifying as Exception areas on the basis of need or precommitted uses are not necessarily "communities" as such, but do have some of the characteristics of community development--higher densities, for example. These areas are treated much as unincorporated communities are within the General Plan, in that they are solely under County jurisdiction, and they are provided with specific land use designations and zoning reflective of their characteristics. They are not portrayed, however, with the broad "community" designation in most cases.

For purposes of Plan administration, a parcel of land is either within a UGB or designated community or it is not--the deciding factor is the portrayal on the Plan Diagram. Lands adjacent to such boundaries are not considered to be within them until and if the boundaries are adjusted to accomodate them.

New Development Centers are special-purpose community designations produced through the Plan Amendment process. A NDC, once adopted, has the status of "community" unless it incorporates as a separate jurisdiction beyond County control, in which case it must meet LCDC requirements just as other incorporated cites do. NDC definitions, approval guidelines and criteria are integrated with the County's Lane Code (Chapter 12) rules on Plan Amendments, and parallel Lane Manual provisions.

Finally, lands considered "rural" are lands not within any of the above classifications. These lands include the vast majority of total Lane County acreage, and are under the jurisdiction of the County plus state and federal governments (e.g., National Forests). The statewide planning Goals and the Policies of this Plan limit substantial rural development. However, it is recognized that such development may occur provided it is consistant with the policies contained in this document.

E. IMPLEMENTATION

As stated earlier the County Policies are intended to guide actions and decisions. Although the policies have a common feature (i.e., relating to one or more aspects of land use) they cover a broad range of topics and concerns. Because of this wide range it is not reasonable to assume all policies are to be implemented in the same manner. Visualizing a policy as being in one or more of the following categories will provide a better understanding as to its application.

Advisory Policies

These are statements describing the County's position on a certain topic or issue; generally but not always, relating to a subject nor under the direct jurisdiction of the County. These policies are primarily intended to inform or influence the actions of other parties. They do not have direct influence on the implementation of the General Plan through Plan Map designation, zoning of land or County Regulations.

Example: "Lane County recommends that no new wilderness areas be designated without a complete analysis of the revenue and employment impacts on Lane County. Where designations are made, negative employment and revenue impacts should be mitigated by increasing allowable timber harvests on other public lands." (Goal 5, #D.2.)

Commitment Policies

These are statements describing a future action the County intends to undertake. The policies cover a variety of topics including (a) guidance in County operations, procedures and relationships with other agencies, (b) recognition of state and federal requirements, and (c) general direction or intent. Where the County believes the action is necessary to carry out

State Planning Goals or the General Plan the commitment will be in a mandatory, binding [form (i.e., Lane County shall . . .). Where the action may be desirable, however, not absolutely necessary, the statement may be phrased in a nonmandatory, advisory manner (i.e., Lane County is encouraged to . . .).] As with advisory policies, the commitment policies do not have a direct influence in plan diagram designations or zoning. Actions resulting from the commitment may, however, have a direct influence. Inasmuch as these policies are describing a future action, lack of achievement at any particular point in time due to lack of resources shall not be construed as a failure to carry out the plan.

Examples: "Lane County shall actively support and assist progressive solid waste management efforts. The Lane County Solid Waste Management Plan shall be the primary instrument to effect this policy." (Goal 11, #4)

"Lane County is encouraged to investigate and utilize fee acquisition, easements, cluster development, preferential assessment, development rights acquisition and similar techniques to implement these policies." (Goal 5, #C.5.)

"Avoidance and/or control of soil erosion shall be major criterion addressed in all applicable County review procedures." (Goal 6, #A.1.)

Plan Conformity Policies

These are directives applicable to land use designations. They are intended to guide designations on both plan diagrams and zoning maps. These policies are initially implemented by the adoption of the plan diagrams and zoning maps. Subsequent rezoning and/or plan diagram amendments must be in accord with these policies (i.e., an action that would be inconsistent with policies in this category is inconsistant with the plan). The policies are applicable to both legislative and quasi-judicial actions:

Example: Land use designations in the Comprehensive Plan and implementing zoning shall be commensurate wth groundwater aquifer capacities. (Goal 6, #A.8.)

Depending on the circumstances, a given policy may fall into more than one category. The purpose of establishing these classifications is 1) provide a better understanding of how the plan will be implemented, and 2) provide a review standard for future land use changes. This latter purpose is accomplished by requiring any future rezoning and/or plan diagram be in accord with the Plan Conformity Policies. This review standard is considered to be the minimum level of review. As a minimum threshold, however, it should not be construed to mean that compliance with the plan conformity policies is the sole criterion and other policies cannot be taken into consideration. If it can be demonstrated that approval of a change, even though satisfying the plan conformity policies, is in conflict with other policies or State Planning Goals, the request may be denied. The classification of the Policies is set forth in Appendix A.

F. DEFINITIONS

ADOPT -- Take official action to make part of the body of regulations and Policies with which the governing body functions.

ASSIST -- Actively help or support in the accomplishment of a program or a desired action through provision of technical assistance, administrative aid, or political support.

CITY -- A legally incorporated general-purpose government operating under State of Oregon statutes.

COMMUNITY -- A cohesive, identifiable human settlement of a size use-mixture, and density making it effectively unavailable for other uses, usually having a commonly-acknowledged place name, but not having a separate general-purpose form of government.

CONSERVE -- Manage in a manner which avoids wasteful or destructive uses and provides for future availability.

DEVELOP -- Convert from a less intensive to a more intensive use, including to bring about growth or availability , to conduct a mining operation, to make a physical change in the use or appearance of land (exception normal agricultural or forest management practices), to divide land into parcels or create or terminate rights of access, to construct or alter a structure, and other similar actions.

DEVELOPMENT -- The act, process or result of "develop."

DISCOURAGE -- Argue against, make more difficult to accomplish, restrict

ENCOURAGE -- Stimulate, give help to, make possible, foster.

ESEE -- Environmental-Special-Economic-Energy impact analysis required by Goal 5, Administrative Rule OAR-660-16-000.

GENERAL PLAN -- That portion of the Lane County Comprehensive Plan having jurisdiction in rural areas outside of Urban Growth Boundaries of cities and the jurisdiction of the Eugene-Springfield Metropolitan Area General Plan.

GOAL -- A desired condition or circumstance toward which the planning effort is directed, by nature somewhat generalized, used to give direction and indicate intention; an expression of State of Oregon intention as articulated by the Oregon Conservation and Development Commission.

IMPACT -- The consequences of a course of action; the effect of an action or decision upon something else as measured by the characteristics of the thing impacted prior to the decision or action as compared to the characteristics of the thing impacted following the decision or action.

INSURE (ENSURE) -- Guarantee, commit necessary effort to see that something indeed occurs or happens.

MAINTAIN -- Support, keep and continue in an existing state or condition without decline.

NATURAL RESOURCES -- Air, land and water and the elements thereof which are valued for the existing and potential usefulness to man.

NEW DEVELOPMENT CENTER -- A major development proposal, the scale and magnitude of which is likely to produce a significant impact on the area. Typical forms of an NDC include seasonal-residential developments, year-round "new community" developments, recreational complexes, or traditional "new town" proposals. New Development Centers encompass the following characteristics:

1. Large land area comprising one or more contiguous parcels;

2. Utilization of the principles of planned community development;

3. A more intensive level of residential development for the property than contemplated in the County General Plan Diagrams;

4. The inclusion of uses other than residential.

PLAN DIAGRAM -- A graphic portrayal, on a map, of land use designations which fulfill state and County planning Goals and Policy requirements.

POLICY -- A formally adopted means of moving toward a Goal; a mandatory action which is ultimately binding on the jurisdiction adopting it.*

POLLUTION -- Violation or threatened violation of applicable state or federal environmental quality statutes, rules and standards; reduction in the natural quality of a given resource as a result of external actions by man.

PRESERVE -- Save from loss or change, set aside for special purposes, insulate from modification.

PROGRAM -- Proposed or desired course of proceedings or action.

PROHIBIT -- Prevent or forbid from being done.

PROMOTE -- Urge or encourage the carrying out of a given action or program; contribute toward the accomplishment of an object through specific actions or attitudes.

---

*Note: This definition is to be applied to all elements of the General Plan of Lane County, including special-purpose Plans such as the Housing Plan.

PROTECT -- Save or shield from loss, destruction or injury or for future intended use.

PROVIDE -- Prepare, plan for and supply what is needed to accomplish an action or program.

PUBLIC FACILITIES AND SERVICES -- Those structures, programs and activities which are supplied by government or quasi-government units to constituents of an area, on a collective basis, which are intended to promote or protect the health, welfare, safety and quality of life of the constituents; examples include sewer and water systems, police and fire protection and recreational sites and programs (includes facilities defined by LCDC as "key" facilities).

RESTRICT -- Make more difficult to accomplish, limit in terms of quantity or intensity.

RURAL LANDS -- Lands within Lane County beyond the Urban Growth Boundaries of cities and beyond the jurisdiction of the Eugene-Springfield Metropolitan Area General Plan.

URBAN GROWTH AREA -- Lands encompassed by the Urban Growth Boundary of a given city.

URBAN GROWTH BOUNDARY -- The anticipated limit of the reach of public facilities and services which can be supplied within a designated period from a particular city; usually refers to the extent of "hardware-type" facilities, such as sewers and water systems. Provisions of these services permits higher-density development commensurate with that usually found in city or urban environments, and thus the UGB is also a definition of the anticipated limits of that type of growth pattern.

PART II: LANE COUNTY GENERAL PLAN POLICIES

GOAL ONE: CITIZEN INVOLVEMENT

1. Lane County shall assure the availability of planning information in a timely manner to all County citizens.

2. Plan implementation shall include participation by the general public through a citizen involvement program in the development, adoption and application of codes and ordinances needed to carry out the County General Plan requirements.

3. Firmly identified public needs and desires shall be responded to by the County planning process, within the parameters of state and local planning requirements.

4. The Citizen Involvement Program Committee (CIPC) of Lane County is recognized as the primary body advising the Board as to:

   a. citizen access to planning information;
   b. effectiveness of the existing program;
   c. needed program changes or new program areas;
   d. compliance with LCDC Goal #1 (Citizen Involvement).

5. The program of communicating with chartered community organizations shall be continued.

6. Identification of priorities for and adoption of capital improvement programs shall be done through the citizen involvement program.

GOAL TWO: LAND USE PLANNING

1. The purpose of the revised Lane County Comprehensive Plan shall be to provide information to assist public and private decision-making, and to meet the requirement of Oregon State Planning Goals and associated laws.

2. The Policies shall provide the direction for County growth and development and programs for dealing with planning issues; the Plan Diagrams shall be specific graphic descriptions of proposed land use throughout the County, and shall be the primary basis for zoning decisions.

3. All products of the County Planning process shall be made available for public review and comment and shall be adopted through the hearings process.

4. The County shall be divided into two sub-County regions: the Coastal Region and the Inland Region. Each region shall have its own Plan Diagram. The dividing line shall be the eastern jurisdictional boundary of the West Lane Planning Commission.

5. The Lane County Planning Commission and the West Lane Planning Commission shall have primary advisory authority for the Inland and Coastal Regional Plan Diagrams, respectively. Both Commissions shall have equal authority with respect to Countywide issues, including County Policies (not including geographically-based Policies, such as the Coastal Goals or the Willamette Greenway). Conflicts between the two Commissions shall be resolved by the Board of County Commissioners.

6. The revised General Plan shall have primary jurisdiction in all areas of the County outside of incorporated City Urban Growth Boundaries and the Plan Boundary shown on the Eugene-Springfield Metropolitan Area Plan Diagram (which includes UGB plus additional territory).

7. The Planning period for the revised Plan shall be 20 years with revisions and update to occur every five years, beginning five years from the date of adoption.

8. It shall be the policy of the County to systemize and streamline the existing Plan amendment process, to make the process more efficient and more responsive to individual needs. This will be accomplished by future amendment of the Lane Code.

9. Exceptions to LCDC Goals (i.e., a determination that it is not possible to apply an appropriate goal to a specific property) shall be in accordance with OAR 660-04-000 (Goal 2 Exception Process) and shall only be taken at times of Plan adoption or amendment.

GOAL THREE: AGRICULTURAL LANDS

1. Encourage agricultural activities by preserving and maintaining agricultural lands through the use of exclusive farm use zones.

2. Where lands may be subject to both State Goals 3 and 4, preference will be given to Goal 4 in Agricultural Rent Zone 3 as that zone is established by the County Tax Assessor. In Rent Zones 1 and 2 preference will be given to Goal 3.

3. Reserve the use of the best agricultural soils exclusively for agricultural purposes.

4. Insure that zoning districts applied to agricultural lands encourage valid agricultural practices in a realistic manner; emphasis shall be placed on performance rather than arbitrary requirements such as minimum parcel sizes.

5. Use planning and implementation techniques that reflect appropriate uses and treatment for each type of land.

6. Encourage irrigation, drainage and flood control projects that benefit agricultural use with minimum environmental degradation in accordance with existing state and federal regulations.

7. Some agricultural land in Lane County is not suitable or available for agricultural use by nature of being built upon, committed to or needed for nonagricultural uses. The County shall plan and zone such lands for nonagricultural uses by using the exceptions process of LCDC Goal 2, Part II.

8. Provide maximum protection to agricultural activities by minimizing activities, particularly residential, that conflict with such use. Whenever possible, planning goals, policies and regulations should be interpreted in favor of agricultural activities.

9. Actively explore better methods of identifying agricultural lands than those currently used. Such methods should accurately reflect the productive capacity of the land taking into account fertility, suitability for management, climatic conditions, availability of water, land use patterns and accepted farm practices.

10. Such minimum lot sizes or land division criteria as are used in exclusive farm use zones shall be appropriate for the continuation of the existing commercial agricultural enterprise in the area.

11. Conversion of rural agricultural land to urbanizable land shall follow the process and criteria set forth in LCDC Goal 3.

12. Regard nonagricultural uses within or adjacent to agricultural lands as being subject to the normal and accepted agricultural practices of that locality.

13. No County policy shall be construed to prevent the rezoning of land in compliance with ORS 215.215(2), or to require the taking of an exception or

adoption of a plan amendment prior to such rezoning, as long as the requirements of the statute are met. The statute shall be implemented by ordinances requiring findings of compliance with ORS 215.215(2) and incorporating the standards set forth in ORS 215.243. Such rezoning shall be the favored method of regulating existing commercial and industrial nonfarm uses.

14. No County policy shall be construed to exclude permitted and specially permitted nonfarm uses, as defined in ORS Chapter 215.213, from EFU zones. Implementing ordinances shall provide for such uses, consistent with the statutory requirements. Special permits for commercial uses in conjunction with farm use shall have the same effect as making the use an outright permitted use on the affected parcel.

GOAL FOUR: FOREST LANDS

1. Forest lands will be segregated into three categories. Lands capable of producing commercial wood products that have large areas free from competing uses will be designated Forest Land I. Land capable of producing commercial wood products, however, if impacted to some degree by competing uses, will be designated Forest Land II. Forest Land not suitable for the producing of commercial wood products shall be designated Forest Land III.

2. Restrict the intrusion of nonforest uses on Forest Land I. Limit the intrusion of nonforest uses on Forest Lands II and Forest Lands III.

3. Consider and evaluate, prior to allowing the conversion of forest lands to nonforest uses, (i.e., through rezoning) the total forest benefits lost and the impacts of the proposed use on adjacent forest lands.

4. Develop and apply standards for commercial forest lands that utilize a minimum parcel size together with performance criteria to allow deviation from the established minimum.

5. Where lands may be subject to both State Goals 3 and 4, preference will be given to Goal 4 in Agricultural Rent Zone 3 as that zone is established by the County Tax Assessor. In Rent Zones 1 and 2 preference will be given to Goal 3.

6. Some forest land in Lane County is not suitable or available for forest use by nature of being built upon, committed to, or needed for nonforest uses. The County shall plan and zone such lands for nonforest uses by using the exceptions process of LCDC Goal 2, Part II.

7. Encourage the multiple use of forest lands consistent with intensive forest management for forest products.

8. Encourage the use of intensive forest management techniques that will result in the greatest economic benefit of forest products and other forest values through land division regulations and other appropriate techniques.

9. Encourage the use of forest management practices that assure the continuous growing and harvesting of forest tree species; protect soil, air, and water resources; provide habitat for wildlife and aquatic life.

10. Encourage forest management activities that provide for and enhance the protection of forest land from fire, insects, and disease.

11. Encourage industrial practices which result in the optimum utilization of forest resources.

12. Encourage the development of assistance programs, tax laws, educational programs and research that will assist small woodland owners with the management of their forest land.

13. The effects of a projected shortfall in timber supplies within the near future are of considerable concern to Lane County. The County supports efforts by state and federal agencies in developing plans that will address this situation. The County intends to be an active, committed participant in such plan development.

14. Regard nonforest uses within or adjacent to forest lands as being subject to the normal and accepted forest practices in the locality.

15. Lane County recognizes that the Oregon Forest Practices Act shall be the only mechanism regulating the growing and harvesting of forest tree species on commercial forest lands. No other findings, assumption, goal, policy or other planning regulation shall be construed as additional regulation of forest management activities.

GOAL FIVE: OPEN SPACES, SCENIC AND HISTORIC AREAS AND NATURAL RESOURCES

A. Historical Resources

1. An ad hoc committee shall be designated to develop appropriate criteria which shall be used to evaluate and designate historic sites and places in the County, and shall report its findings to the Planning Commission in order that the Planning Commission may develop a final list of historic resources in the County. This will be accomplished by the time of the next Plan review.

2. The County shall establish an Ordinance to preserve historic sites now on the National Register of Historic Places, and applicable to other sites not on the NRHP which the County may determine should be added to the list of sites.

3. The Goal 5 conflict resolution process shall be applied, where appropriate, to historic sites and places prior to regulation of them.

4. The County shall seek to enlist voluntary compliance with individual landowners in the addition of their property as historical sites, and landowners shall be notified of Public Hearings, including information about inclusion as a Historical Site.

5. The County shall encourage its own agencies, and communities within the County, to emphasize their historical, geographic and other unique qualities.

6. The County shall review proposals for development or changes in land use for possible impacts with designated historical sites. When proposed development or land use changes will cause harm or degradation of a designated site, such effects shall be mitigated in a satisfactory manner.

7. The County shall continually develop and refine, through review, and update, its inventory of historic sites and resources. A long-term objective shall be in the inclusion of historical sites in the County's geo-data system.

8. The County shall take advantage, where practical, of state and federal programs to assist in the identification and protection of historical resources, including the use of financial assistance from these programs.

9. The County, within its resources, shall make substantive efforts to educate and involve the public in a historical resources protection program and stimulate public interest in its objectives.

10. The County shall work with concerned local, state and federal agencies to coordinate efforts to identify and protect historical resources.

11. The County will protect archeological sites through a process of review and voluntary cooperation rather than zoning controls. This process will be structured to 1) keep specific site locations confidential,

2) work in concert with the State Archeologist and the University of Oregon Museum of Natural History, 3) notify individual property owners and urge their cooperation, and 4) review major land use changes for possible impact on sites.

B. Mineral and Aggregate Resources

1. The known mineral resources within the County shall be conserved for present and future use through appropriate land use measures. Known sites shall be designated on Plan Diagrams and zoned in a manner suitable for the needs of the resource and the area.

2. Exploration for mineral resources (in contrast to actual mining) shall be a permitted activity in the rural portions of the County. Areas designated primarily for residential purposes are to be excluded from this policy as are areas that, having undergone analysis in accordance with OAR 660-16-000, are deisgnated as having some unique natural, historical or cultural value. Exploratory drilling for gas, oil or other hydrocarbons is not within the scope of this policy.

3. Mining operations are regulated by state and federal government agencies. County regulations shall supplement these actions only as necessary to ensure compatibility in the area, or to protect other resources.

4. Conserve and manage land, soil and mineral resources by respecting their physical limitations and environmental assets.

5. Update, in cooperation with local aggregate operators, federal, state and local agencies, past sand and gravel inventories to ensure supply/demand information is current.

6. Protect aggregate desposits from encroachment of incompatible uses and ensure that aggregate material in close proximity to its point of use will be available when needed.

7. Present and future land use controls shall be implemented to allow for the discovery of new mineral and aggregate resources when it is demonstrated that the projected demand for those resources in a given area will exceed available supply and conflict with adjacent uses can be minimized. Conflict analysis and resolution shall follow the methodology set forth in Appendix J of Working Paper: Mineral & Aggregate Resources; however possible impact on agricultural lands, forest lands and residential development (existing or planned) must also be considered. For sites within the Willamette Greenway or near Goal 5 inventoried resources, notification of the potential conflict shall be sent to the appropriate body (e.g., Pioneer Museum, Oregon Department of Transportation, Oregon Department of Fish and Wildlife, etc.).

8. Encourage farm and forestry use of aggregate land prior to extraction; minimize negative environmental impacs during extraction; require reclamation after extraction which is compatible with adjacent uses.

9. Lane County shall apply the appropriate district (SG, SG/CP, /QM) to the sites listed in Appendix J of the Mineral and Aggregate Working Paper. Those sites with potential conflicts shall be placed in the SG/CP or QM/SR Districts.

GOAL FIVE (cont.)

C. Flora and Fauna

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Provide special consideration to protection of sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies are encouraged to work with landowners to conserve wildlife habitats.

5. Lane County is encouraged to investigate fee acquisitions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to protect Goal 5 resources.

6. Riparian vegetation along all Class I streams is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Maintenance of this vegetation shall be encouraged with setbacks from Class I streams and shall be a consideration in Special Use Permits and Zone Changes.

7. Because of the inadequate inventory in Lane County, freshwater wetlands are being placed in a 1B category (insufficient data existing, per Goal 5 requirements, to decide on preserving the resource or not). When National Wetland Inventory (or equivalent) maps are available for all private lands in the County, these wetlands will be evaluated for quality and quantity as per the Goal 5 administrative rule (OAR 660-16-000). If the wetlands are determined to be significant, they will be evaluated against the rule's standardized set of ESEE (Environmental-Special-Economic-Energy) factors and conflict resolution proposed. This action will take place within one plan update period after the maps are available.

8. Lane County shall rely on the Oregon Forest Practices Act for protection of wildlife habitats and areas on lands zoned for the primary use of commercial growing and harvesting of forest tree species. Such habitats and areas shall include sensitive fish and waterfowl areas, riparian vegetation, wetlands areas, and big game ranges.

9. Sensitive Fish and Waterfowl Areas, as identified in the 1982 Lane County Working Paper on Flora and Fauna, are recognized as the most valuable habitat of their type in the County. Maintenance of riparian vegetation shall be a prime consideration in zoning districts in these areas.

10. Residential building permits issued within Major or Peripheral Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna, shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

11. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna.

12. Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000.

13. If uses are identified (which were not previously identified in the plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

GOAL FIVE (cont.)

D. Open Space and Scenic Areas

1. Lane County has determined that all resource lands in the County are also open space lands. Resource related activities shall predominate on these lands. Where proposals for developed land uses are made consistent with the Comprehensive Plan and Statewide Goals, development standards shall be applied which minimize loss of open space.

2. Lane County recommends that no new wilderness areas be designated in the County without a complete analysis of the revenue and employment impacts on Lane County. Where designations are made, negative employment and revenue impacts should be mitigated by increasing allowable timber harvest on other public lands.

3. Initiate a program to identify areas of outstanding scenic value, identify and resolve conflicts after consideration of social, economic, energy and environmental consequences and protect sites for which conflict resolution indicates protection is desirable. This program will be initiated prior to the next scheduled Plan update (five years from adoption of revised plan). The County is encouraged to investigate and utilize fee acquisition, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to implement this policy.

4. The County shall acknowledge recreational trails which are developed by the Oregon Parks Outdoor Recreation Plan and shall display the routes on its Plan documents.

5. The County shall cooperate with appropriate state and federal agencies in the selection of scenic and wild rivers.

GOAL FIVE (cont.)

E. Energy

1. Lane County shall identify energy resource areas within the County and encourage protection of these areas through the use of existing ordinances and regulations.

2. Lane County shall encourage the exploration and development by other agencies of renewable energy resources such as geothermal, wind, biomass, hydroelectric and solar, and shall monitor such development to ensure that the development does not cause adverse effects within the County.

3. Lane County will initially rely on the L-COG Committee on Energy to identify energy resources within the County and to recommend such measures as may be appropriate to protect these sites.

GOAL FIVE (cont.)

F. Water Resources

1. State policy normally promotes multiple use of surface waters throughout Lane County. Under such policy, use conflicts can and do occur. As the first step in addressing this problem, the County urges the Oregon Water Policy Review Board and the Department of Environmental Quality to update the existing water basin plans and establish priorities among the various beneficial uses for specific water areas. The economic, social, environmental and energy consequences of each use should be considered in establishing priorities and resolving any identified conflicts. Lane County will cooperate to the maximum extent practicable in such a program.

2. The County supports congressional reauthorization of upper Willamette basin reservoirs, to reflect actual use priorities. To the extent practicable, the County will cooperate with the Corps of Engineers in resolving existing use conflicts and accommodating the needs of competing uses.

3. The primary means of evaluating groundwater resources for land use planning purposes shall be through the land division review process. The Little Butte Volcanics, Eugene Formation, Fisher Formation, Spencer Formation, Flourney Formation, Alluvium and Older Dunes geological units shall be designated as quality and/or quantity limited aquifers. As such the provisions of Chapter 13, Lane Code (Land Divisions) regarding areas so designated will apply.

4. Adequacy of water supply, particularly those relying on groundwater sources, shall be a major concern in reviewing major land use changes. For the purpose of applying this policy, major land use change shall be any application reviewed by the Hearings Official or the Planning Commission.

5. Land use designations in the Comprehensive Plan and implementing zoning shall be commensurate with groundwater aquifer capacities.

GOAL SIX; AIR, WATER AND LAND RESOURCES

A. Water Quality

1. Avoidance and/or control of soil erosion shall be a major criterion to be addressed in all applicable County review procedures and County construction activity.

2. The re-establishment of vegetative cover by standard erosion control practices shall be required as part of the land development process.

3. Lane County shall cooperate with the Department of Environmental Quality and other State and Federal agencies in maintaining domestic water supplies to the existing standards of the appropriate governing body.

4. Lane County shall promote watershed practices which protect and enhance water quality and quantity though land use planning, Public Works projects and management of County facilities.

5. Lane County shall cooperate with the Lane Council of Governments and Oregon Department of Environmental Quality in identifying sources of water pollution and controlling or abating them. The County's primary emphasis will be the possible degradation of ground and surface water quality by onsite sewage disposal systems.

6. Lane County shall cooperate with the Oregon Water Policy Review Board to evaluate flow requirements necessary to maintain water quality in critical streams and support the establishment of minimum flow designations for those streams.

7. In basins where consumptive flow appropriations result in water quality problems due to low flows, the County shall encourage the construction of small storage reservoirs for flow augmentation of sites with minimal use conflicts. The County will also encourage conservation practices among water consumers in those basins.

GOAL SIX (cont.)

B. Air Quality

1. The County shall support programs which reduce air pollution primarily through continued active participation in Lane Regional Air Pollution Authority (LRAPA).

2. The County shall encourage practices and developments which can meet air quality standards.

3. The County shall cooperate with State and Federal agencies to achieve enforcement of existing noise control regulations.

4. The County shall be committed to, and shall participate in, programs of the Lane Regional Air Pollution Authority to monitor air quality in the County and ensure that federal, state and local standards are being met; the County shall cooperate in the same manner with the State Department of Environmental Quality with respect to air quality and noise control standards for which that agency is responsible.

5. Lane County shall, working in cooperation with LRAPA and DEQ, maintain an inventory of air pollution sources, and noise pollution sources where information is available, and shall update such inventory periodically.

6. Lane County shall develop a procedure of regular, routine referral of major land development and/or building permit requests to LRAPA and/or DEQ for review for air quality and noise implications, and shall consider the responses of those agencies to the referrals when action is being taken on the requests.

GOAL EIGHT: RECREATIONAL NEEDS

1. Lane County shall use the adopted Parks Master Plan as its chief guide for recreational development and service provision, to be supplemented by information obtained from the US Forest Service, the State Department of Transportation, the State Marine Board and other agencies.

2. Private recreational development in areas predominated by public recreational amenities and facilities shall be encouraged, provided that development is complimentary to or supplements public facilities.

3. Proposals for major recreational developments which exceed projected needs contained in the Recreational Working Paper or the Parks Master Plan shall be accompanied by a demand analysis.

4. Increase recreation opportunities, as needed, throughout the County.

5. Encourage private recreational development as an important component of the County's total supply of recreational facilities and services.

6. Encourage the development of recreation facilities in community development centers.

7. Encourage the development of environmentally compatible tourist and recreational facilities which enhance the economic prospects of rural areas while serving the recreational needs of tourists and County residents.

8. Continue development of a Countywide system of paths and trails for nonmotorized travel--pedestrian, bicycle and equestrian--interconnecting development centers, recreation sites and scenic areas.

9. Increase public access to public outdoor recreation sites that can tolerate the pressure of increased use.

10. Encourage public and private participation to increase access to waterways, where needed, without infringing upon private property rights.

11. Encourage exchange of public lands of comparable value to offset acquisition of private lands for public use.

12. The County should develop additional guidelines to encourage the private lease and development of existing County-owned land for public recreational facilities.

GOAL NINE: ECONOMY OF THE STATE

1. Within the framework of these policies, the County shall encourage the diversification and growth of the local economy. Primary efforts will be in the following areas:

   i. Cooperation and participation with efforts and programs established by public agencies and private concerns to promote and enhance economic development throughout the County.

   ii. Recognition of the value of local resources such as timber and agricultural lands as the primary source of raw materials for the manufacturing and processing sectors of the economy.

   iii. Establishment of land use policies that provide a supportive environment for industrial and commercial activities.

2. The County's primary responsibility in economic development shall be to ensure the necessary land area is available throughout the County and appropriate levels of service can be obtained, consistent with the needs of industry and commerce, the area and other County policy.

3. Most industrial and commercial development shall be concentrated within the urban growth boundaries of the various cities throughout the County. The County shall work closely with city governments to improve economic conditions within their areas. During County review and adoption of city plans, particular attention shall be given to the identification and protection of industrial and commercial sites, both large and small scale.

4. Commercial and service facilities in rural, unincorporated communities shall be supported commensurate with increases in rural population and where necessary to insure continued operation of industrial activity. Such facilities shall be located within rural communities unless justified by appropriate plan amendment and exception to Statewide Planning Goals.

5. Existing parcels of land within UGBs which are suitable for large-scale industrial development shall be protected through the County's review and acknowledgment of city plans.

6. The County shall work closely with incorporated city governments to improve local economic conditions, including land and service provision.

7. New industrial development shall normally take place within adopted Urban Growth Boundaries, unless such development a) is clearly rural oriented (e.g., canneries, logging operations, processing of resource material); b) is necessary for the continuation of existing industrial operations, including plant or site expansion; c) will be located in an area either built upon or committed to nonresource use where necessary services can be provided; d) the industrial activity is dependent on a unique site-specific resource; e) the use is too hazardous or is incompatible in densely populated areas; f) the industrial activity creates by-products which are used to a significant level in resource activities in the immediate area; or g) where a significant comparative advantage could be gained in locating in a rural area. Any development approved under this policy that requires a

plan amendment shall be justified by an exception to applicable Statewide Planning Goals.

8. Existing industrial and commercial uses shall be designated on the plan diagram. Uses so identified shall be zoned to allow for continued operation and routine expansion commensurate with their character, provided significant conflicts with other land uses (existing and planned) do not result.

9. Tourism shall be considered as a base industry having high potential for growth throughout the County. Development of facilities oriented towards tourists shall be given maximum support within the framework of these policies.

10. As a stimulus to the tourist industry, the County shall maintain and where possible improve public recreational facilities such as parks, boat ramps, etc. Wherever possible, private operations and contracts will be used in these endeavors.

11. Specific standards for rural economic development shall be developed, which include the use of economic inventory data such as population and employment trends.

GOAL TEN: HOUSING

1. "The adopted Lane County Housing Plan is a special function plan concerned with Goal 10 requirements, and containing a number of policy statements specifying the County's position toward these requirements. The 1978 Housing Plan, as amended, shall continue to be used as the primary guideline toward Housing matters, and policy statements within it shall be considered to be mandatory actions which are ultimately binding on the County."

GOAL ELEVEN: PUBLIC FACILITIES AND SERVICES

1. Lane County shall provide an orderly and efficient arrangement for the provision of public utilities, services and facilities. The primary means of establishing such an arrangement will be by the requirement of minimum acceptable levels of service for various areas throughout the County. Appropriate minimum service levels are attached to the various Plan Diagram land use categories and are stated in the Plan Diagram documents.

2. Designation of land into any given use category, either initially or by subsequent plan amendment, shall be consistent with the minimum level of services established for that category. The required minimum level of services must be attainable through either (a) the existing level of public facilities and services within the area, or (b) the capability of facility and service providers to supply the increased levels necessary to properly support such designation.

3. Any increases in the levels of public facilities and services generated by the application of new or revised land use designations within an area shall, to the extent practicable, be financed and maintained by revenues generated within or as a result of those designated land uses. Those land uses benefiting from increased levels of public facilities or services shall be expected to provide a significant share of the costs associated with providing such facilities and services, recognizing that in some instances, resources for such provision must be obtained on a widespread geographic or revenue basis and may involve capital investments exceeding the immediate needs of the area being served.

4. Lane County shall actively support and assist progressive solid waste management efforts. The Lane County Solid Waste Management Plan shall be the primary instrument to effect this policy.

5. Lane County shall maintain an active role to provide the facilities and services needed to make quality health, social and cultural services available and accessible to all Lane County residents. The County's specific objectives at any given time in these areas are contained in the work program objectives of the Departments of Community Health and Social Services, Planning and Community Development and the County Fair Board.

6. Lane County shall participate in the coordination of planning and development for various public facilities and utility services. The primary means of effecting this policy shall be through a system whereby land use applications shall be referred to the various providers of services including cities, utilities, special districts, County and other public agencies, as well as the Lane County Boundary Commission.

GOAL TWELVE: TRANSPORTATION

1. Lane County shall strive for a coordinated and balanced transportation system which complies with LCDC Goal 12 and is responsive to the economic, social and environmental considerations, and which will work toward the following objectives:

   a. Safe, convenient and economical transportation for all people, materials and services.

   b. An effective distribution of transportation options.

   c. A transportation system responsive to changing needs and conditions.

   d. Consideration of direct and indirect impacts of proposed transportation projects on the environment, energy resources, economy and general livability.

   e. Public participation in the transportation planning process.

   f. Coordination with the development of statewide comprehensive transportation plans.

   g. Encouragement of energy-efficient modes of transportation.

   h. Safe and convenient opportunities for bicycle and pedestrian travel throughout populated areas of Lane County.

   i. An efficient public transportation service which meets demonstrated needs for alternative transportation.

   j. An appropriate level of general and commercial aviation development.

   k. The development of the Port of Siuslaw consistent with adopted policies and plans.

2. In managing the transportation system toward the fulfillment of adopted County land use goals and plans, Lane County shall:

   a. Provide transportation services as necessary to accommodate growth concentrated within existing communities.

   b. Discourage the spread of residential development in agricultural and forest areas.

   c. Guide the transportation pattern of newly developing areas and rural communities.

   d. Ensure that transportation improvements are consistent with adopted public policies and plans.

   e. Ensure that road development or improvement is consistent with adopted plans and policies.

3. Lane County shall seek an efficient, safe and attractive highway network to serve the existing and future arrangement of land uses by striving toward the following objectives:

   a. Make improved safety for the traveling public a primary consideration in the expenditure of resources.

   b. Ensure that all road construction meets adopted uniform standards unless excepted for substantial reason.

   c. Provide for timely development of streets and roads in community development centers.

   d. Include aesthetic considerations in maintenance, construction or improvement within County road rights-of-way.

   e. Minimize frontage access onto the County's collector and arterial roads.

   f. Ensure that future route selection considers the indirect costs as well as the direct costs of construction.

   g. Discourage strip development between the County's urban service areas and their satellite communities.

   h. To the extent possible, coordinate implementation of new highway facilities with land development needs to minimize stimulation of untimely land development.

   i. Ensure that street and highway development or improvement is integrated with and complementary to other transportation modes.

   j. Maintain County roads and bridges adequately to meet the needs of the trucking industry consistent with adopted land use plans for the area.

   k. Establish priority trucking routes which minimize conflicts with incompatible land uses and areas of congestion.

4. The adopted Lane County Rural Transportation Plan is a special-function Plan concerned with Goal 12 requirements, and containing a number of Goals, Objectives and Recommendations on various components of the County's transportation system and Goal 12 requirements. The 1980 Rural Transportation Plan, as amended, shall continue to be used as the primary guideline toward transportation matters. Goal and Objective statements within it are incorporated into the above County Policies, and Recommendations within it shall be applied where appropriate; these Recommendations shall be considered to be mandatory actions which are ultimately binding on the County.

GOAL THIRTEEN: ENERGY CONSERVATION

1. Lane County shall work to implement the Lane County Energy Task Force recommendations as soon as practical and feasible. Among them are the four broad programs listed below as well as a number of detailed recommendations, including ones to encourage efficiency in land use, building and transportation.

   a. Develop staff capability to implement recommended programs.

   b. Promote public education/awareness/motivation.

   c. Provide and promote interjurisdictional cooperation and coordination.

   d. Develop and publicize financial incentives/assistance for energy efficient project.

2. Lane County shall encourage energy conservation in the development and use of public facilities, services and utilities and in the development and use of electrical and communication systems.

3. Lane County shall establish programs when financially feasible to promote the stated goal through intergovernmental cooperation, to increase public awareness of the benefits of energy conservation and to revise existing programs concerning land use, transportation, existing and new buildings.

GOAL FOURTEEN: URBANIZATION

1. The County shall encourage new residential, commercial and industrial development to locate within existing incorporated cities or rural communities. Any growth outside Urban Growth Boundaries must:

   a. Be restricted to committed or developed areas including approved new development centers; or

   b. Under certain specified conditions set forth in this plan, industrial, commercial and residential development is appropriate outside of developed and committed areas provided a valid exception is taken and/or all Statewide Goal requirements are met.

   c. Any community designated in the plan that does not have an adopted Urban Growth Boundary, or any addition to such community that may be proposed, shall be justified by a valid exception pursuant to Statewide Goal 2, Part II.

   This and subsequent policies do not apply to the Eugene-Springfield Metropolitan Area, which is governed by the Metro Area Plan.

2. The County shall provide for orderly and efficient transition from rural to urband land use while insuring the supply of housing, employment, livability and other amenities, in order to accommodate the long-range growth of each city.

3. The County shall provide for a cooperative UGB management process between the County and cities in the County in the following:

   a. The establishment and periodic revision of urban growth boundaries and the planning and implementation of common policies and procedures within the boundaries;

   b. The planning and implementation of city policies for lands inside city boundaries which may affect the County.

4. The County shall continue to comply with the planning coordination requirements, and the "urban growth management program" requirements, of the Oregon Land Conservation and Development Commission.

5. The County will seek agreement with each city to commonly determine the location of urban growth boundaries and the interim and long-term land use designations and public improvement project designations within the growth boundaries.

6. Each city is regarded as the logical and ultimate provider of urban services within its urban growth boundaries; Lane County will not approve any development nor encourage or abet the establishment of urban services or

facilities within the city's urban growth boundary, which are contrary to city policy or agreement excepting established service districts.

7. It is the County's position that ultimate urban-level density within a city's urban growth boundary should occur only where all essential public facilities and services (water, sewer, etc.) are or will be shortly available. Cities are encouraged and expected to prepare and publish facilities plans and schedules for all facilities.

8. The County will encourage the orderly and logical annexation of territory to each city.

9. Any County approval of the division and/or development of land within a city's urban growth boundary will be consistent with provisions of the applicable city plan within the area. If necessary, the County may take one or more of the following actions to enforce this policy for decisions applicable to land outside the city's jurisdiction:

   a. On an interim basis, limiting the level of development to less than the planned urban density or intensity, based on iterim standards to be adopted and published.

   b. Determining that the design and operation of an interim land use will allow for later conversion to full urban densities in an orderly and efficient manner (e.g., land divisions to be approved in such a way as to permit later redivision into greater and urban-level densities), and that the interim land use will not otherwise preempt the subject or other properties from the future orderly provision of urban services and facilities;

   c. Requiring that interim and long-term development be consistent with existing master sewer and/or water plans for the urban growth area;

   d. Requiring city service connection, where agreeable to the city and consistent with applicable law, and where consistent with approved master facility plans for the urban growth area.

10. Lane County will apply where appropriate applicable city public improvement standards within urban growth boundaries when it is determined that those standards are more rigorous than those of the County. Where city standards are not practicable, County approvals will be given in such a way as to permit each conversion in the future to city standards.

11. Use of utility easements and natural drainageways within the urban growth area shall be consistent with applicable plans, will have multiple uses where practicable and will be based on County-city agreement.

12. The County will provide each city the opportunity to review and comment upon County consideration of plans, ordinances, development proposals (zoning and land division), public improvement projects, sale of County lands and other similar matters of city interest which occur within the city's area of influence and/or urban growth boundary, via "joint agreements for planning coordinator" executed with each city.

13. Lane County will expect to review city proposals for, or consideration of, matters of County interest through established procedures. Matters to be reviewed may include those listed above in Policy No. 12, plus other matters such as annexations, as governed by joint agreements.

14. Lane County shall attempt to achieve coordinated establishment of city urban growth boundaries and land use/public improvement approaches (including plan land use designations, development policies, zoning, etc.). Plan coordination may take one of the following forms:

    a. Co-adoption, with each city, of a common comprehensive plan; or

    b. Adoption of the city's comprehensive plan as a part of the County's plan(s); or

    c. Approval of any supplemental policies or procedures which will accomplish the intent of this section of the Policies, which may be mutually agreed upon by the County and each city.

15. Lane County shall regard itself as "caretaker" for lands within city UGBs but outside of city limits and will administer County land use and other regulations toward that objective, within the parameters established by the preceding Policies. Conflicts between city and County interpretations of plans or appropriate County actions shall be resolved temporarily in favor of County until the conflict is fully resolved through plan amendment or clarification, or other action.

16. Unincorporated communities shall be considered and treated as part of the County Plan with due consideration for community needs and values. Urban-level development requiring or ultimately likely to require urban services such as sewer and water systems shall not be approved unless the community itself, by public or private installation, can supply these services, and the development is in the form of an acceptable new development center proposal.

17. Within established UGBs, city plans ratified or adopted by the County are to be considered the governing land use documents, but do not pre-empt final County legal responsibilities or authority. Contract annexation agreements between cities and the County may modify this position as acceptable to both parties.

GOAL FIFTEEN: WILLAMETTE RIVER GREENWAY

1. Maintain and support continuation of existing uses within the Greenway Boundary.

2. Intensification and change of use of lands within the Greenway Boundary shall remain compatible with the protection, conservation and enhancement of the natural, scenic, historic, agricultural, economic and recreational qualities of the Willamette River Greenway Program.

3. Recognize that the Greenway consists of a multitude of resources and due to continued growth, 100 percent protection to all resources will never be realized.

4. Protect, conserve and preserve important economic uses such as, but not limited to, agriculture, sand and gravel, tourism and recreation, fish and wildlife, urban lands and timber within the Greenway.

5. Maintain sufficient water flows to support water uses such as municipal, agricultural,industrial, natural resources (i.e., fish, aquatic life, wildlife) and recreation within the Greenway.

6. Prioritize water quality management controls along the Coast Fork and the Main Stem, especially in the Metropolitan area.

7. Acquisitions for Greenway purposes must be consistent with noninterference or interruption of farm uses.

8. Recognize that DOT cannot condemn for a scenic or use easements on lands devoted to farm use; however, easements may be given by owners of lands being used for farm purposes.

9. Protect water rights and access to the river for irrigation purposes.

10. Development shall be directed away from the river, to the greatest degree possible.

11. A setback line shall be established in order to protect, maintain, preserve and enhance the natural, scenic, historic and recreational qualities of the Greenway.

12. The partial harvest of timber shall be permitted beyond the vegetative fringes in areas not covered by a scenic easement when the harvest is consistent with an approved plan under the Forest Practices Act, or, if not covered by the FPA, then with an approved plan under the Greenway compatibility review provisions. Such a plan shall insure that the natural scenic qualities of the Greenway will be maintained to the greatest extent feasible or restored within a brief period of time.

13. Active, zoned, or designated aggregate extraction and/or processing sites shall be protected from noncompatible uses which would preclude future utilization of the resource.

14. Where feasible, point bar removal shall be accommodated by temporary access points.

15. In assessing the impact which an extraction and/or processing operation has on the natural and cultural attributes of the Greenway, consideration shall be given to mining methods which reduce or mitigate adverse impacts, as well as to the economic and other benefits which will accrue in both short and long terms.

16. Aggregate operations occurring within the Greenway shall comply with the provisions of applicable state statutes and local zoning ordinances in regard to safety, operational standards, public review, reclamation and protection of Greenway values.

17. The relationship between the demand for the resource and the amount and location of land available for aggregate extraction and/or processing shall be closely monitored, so as to ensure the future availability of aggregate material in close proximity to urban areas and other points of use. Such monitoring shall be conducted in conjunction with the industry and state and local efforts.

18. Protect vegetation resources which are identified as having unique recreational, aesthetic, scientific or wildlife habitat values. Encourage acquisition of these areas or obtain a protective scenic easement.

19. Encourage the reestablishment of vegetative cover as part of the land development process.

20. Conserve the rural character of the river bank as a primary objective within the Greenway.

21. Encourage a river-related mixture of industrial, commercial, residential and public land uses where appropriate in the Greenway.

22. In instances where a public agency has acquired productive farmlands or other resource lands as long-range reserve for recreational use, if possible, such property should be leased back for agricultural or other resource use until it is required for public purposes.

23. Provide and encourage use of public lands within the Greenway.

24. Accommodate public access to the river and to public lands within the Greenway by:

    - Controlled, clearly designated, access points;

    - Establishment of an integrated system of safe river landings, hiking and cycle paths, and public roads leading in and out of the Greenway at strategic locations;

    - Use of a limited number of access points, each with improved facilities, good roads and high-visibility connectors.

25. Provide appropriate levels of police protection in those areas subject to public use.

26. Encourage additional police security for private and publicly owned lands within the Greenway.

27. Protect, conserve or preserve the scenic and recreational qualities of the lands within the Greenway Boundary.

28. Public recreation use areas shall be located in or near the more populated urban areas and shall emphasize access to the river.

29. The sensitivity of lands within the Greenway shall determine the level of human activity.

30. Recreation development shall include a variety of river-oriented opportunities in urban areas but shall be limited in rural areas to those river-oriented recreation uses that are compatible with the sensitive character of the river and other important resources.

31. Consider and minimize the possibility that public recreation use might disturb adjacent private property owners.

32. Scenic easements shall not be acquired through the exercise of the power of eminent domain on lands in farm use.

33. Control vehicle access to the river.

34. Consider and adopt policies that would not hinder the physically handicapped from using public recreation facilities within the Greenway Boundary.

35. Emphasize public access to the river in the metropolitan area and other urban areas while discouraging upland access in rural areas.

36. Measures should be taken to minimize disturbance to private property, including the implementation of programs to eliminate trespass and vandalism on private lands and destruction of ecological fragile areas.

FINDINGS

1. The Oregon Land Conservation and Development Commission has reviewed Lane County's Comprehensive Plan and implementing measures for conformance to Statewide Planning Goals. The Commission concluded the plan did not comply with the Goals and ordered deficiencies corrected. These conclusions and directives are set forth in an Order dated February 26, 1982.

2. The Board of County Commissioners adopted a work program intended to revise the Cou Comprehensive Plan so it would comply with Statewide Planning Goals. An element of the work program was to evaluate the General Plan Goals and Policies and prepare suc revisions as may be necessary. To carry out this task the Planning Commissibn has followed a process of publishing Working Papers on various subjects, conducting hearings on the Papers and adopting reports containing the Planning Commission conclusions regarding each Working Paper.

3. The Working Papers reviewed by the Planning Commission together with corresponding State Goal is as follows:

LCDC Goal	Working Paper
1 - Citizen Involvement	Citizen Involvement
2 - Land Use Planning	Planning Process, Population
3 - Agricultural Lands	Agricultural Lands
4 - Forest Lands	Forest Lands
5 - Open Spaces, Scenic and Historic Areas and Natural Resources	Historical Resources, Mineral and Aggregate Resources, Flora and Fauna, Recreation, Energy
6 - Air, Water and Land Resources	Water Resources, Air Quality
7 - Areas Subject to Natural Disasters and Hazards	Natural Hazards
8 - Recreational Needs	Recreation
9 - Economy of the State	Economy
10 - Housing	Housing
11 - Public Facilities and Services	Public Facilities and Services
12 - Transportation	Transportation
13 - Energy Conservation	Energy
14 - Urbanization	Urban Growth Management
15 - Willamette River Greenway	Willamette Greenway
16 - Estuarine Resources	Coastal Resources
17 - Coastal Shorelands	Coastal Resources
18 - Beaches and Dunes	Coastal Resources
19 - Ocean Resources	Coastal Resources

4. Each Working Paper has resulted in a separate policy background file for that topic. The components of each background file are:

   a) The Working Paper
   b) Comments and testimony received
   c) Record of the Planning Commissions deliberation and action
   d) Planning Commission report and recommendation

The Board relies on the policy background files together with all data and material referenced in those files as support for the recommended Lane County General Plan Policies.

5. Each Working Paper was reviewed separately and conclusions were reached without regard for other Working Papers. Also, each Planning Commission conducted their review independently. To resolve the conflicts that were inherent in this process the two Planning Commissions created a joint Committee to review the various reports and present a single common body of policies for consideration. The document titled Lane County General Plan Policies Draft, dated June 1982 represented the efforts of the joint committee.

6. Each Planning Commission has conducted a public hearing on the June Draft proposal and forwarded a recommendation to the Board. Changes recommended by the Planning Commission were incorperated into the text of Ordinance 870, Exhibit A prior to first reading of the ordinance.

CONCLUSIONS

1. A change in circumstances has occurred since adoption of Ordinance No. 804 (General Plan Goals and Policies). Specifically rejection of the County Comprehensive Plan by LCDC requires revision of that document.

2. The revised policies as adopted by the Board are adequate to comply with Statewide Planning Goals and meet the objections raised during the previous LCDC review.

PART 1: INTRODUCTORY MATERIAL

A. INTRODUCTION TO THE RURAL COMPREHENSIVE PLAN

The Lane County Rural Comprehensive Plan applies to all unincorporated lands within the County beyond the Urban Growth Boundaries of incorporated cities in the County and beyond the boundary of the Eugene-Springfield Metropolitan Area Plan. Where these lands are beyond County jurisdiction (such as National Forest lands), the Plan applies but its application is regulated by federal law. In addition, it does contain provisions and representations of County positions on various issues, to be used by those agencies, such as the US Forest Service, in their own management actions, and also used in the event that lands not in County jurisdiction enter County jurisdiction.

The Plan follows the format of the LCDC Statewide Planning Goals, recognizing that they must be met by all local jurisdictions in Oregon. It is composed of two major elements:

1. County General Plan Policies: For each LCDC Goal, there are one or more Policies to be applied by the County toward land use and other planning and resource-management issues, in the interests of compliance with sound planning principles and statewide planning law. Policies are binding commitments, but will be carried out within established work programs and over all County priorities. The application of Policies which call for any programs or studies will occur as County resources in terms of both staff and budgetary allocations permit.

2. Plan Diagrams: Two major planning regions are identified for Lane County--the Coastal Region and the Inland Region. For each, detailed representations of land use are depicted on maps, on Plan Diagrams. Land use regulation methods, such as zoning, are applied to carry out the intent of the designations. The application of the general plan is primarily through zoning. In fact planning and zoning designations are set forth on the same map.

Chart One diagrams the relationship of these elements, and also indicates relationships with other portions of the County Comprehensive Plan.

The document now before the reader is one of the two above components--the County General Plan Policies document. The Policies document is the broad, direction-setting portion of the Plan, and lays out approaches for interpretation of County planning needs and means of complying with State of Oregon planning law. This law attaches great importance to local jurisdictions having adopted comprehensive plans which in turn meet the requirements of Statewide Planning Goals. Accordingly, matters of interpretation concerning the General Plan are to be resolved in favor of compliance with these Goals, and the Plan itself shall be recognized as representing the County's best effort in meeting the requirements of LCDC and its policy expressions, including Goals.

- SOLID WASTE MANAGEMENT PLAN
- PARKS AND OPEN SPACE PLAN
- COASTAL RESOURCES MANAGEMENT PLAN

LANE COUNTY GENERAL PLAN
(includes all unincorporated lands beyond Metropolitan Plan Boundary and small City Urban Growth Boundaries)
- PLAN POLICIES
- COASTAL PLAN DIAGRAM
- INLAND PLAN DIAGRAM

B. INTRODUCTION TO THE COUNTY POLICIES COMPONENT OF THE GENERAL PLAN

County Policies are broad, somewhat generalized statements that provide direction to County decision makers in their efforts to choose between competing uses for given resources, and in their efforts to solve historic problems and prevent new ones from occurring. The Policies cover complex topics and lay the groundwork for future actions of various kinds. The Policies expressed here apply to rural Lane County, outside of the Urban Growth Boundaries of cities and beyond the Plan Diagram Boundary of the Eugene-Springfield Metropolitan Area General Plan. They are designed to be compatible with similar Policies--and planning efforts--of other governmental jurisdictions in the County.

In some respects, the Policies can be considered the basis of the County plan, in that they provide the lead, or the general direction, for subsequent County actions to deal with various land use and resource management decisions. In doing so, they are directly intended to fulfill the mandate of the LCDC statewide planning Goals.

Four statewide planning Goals are not addressed in this document: the four "Coastal Goals" (LCDC Goals 16-19). These, and Policies connected with them, are located in a special-purpose Coastal Resource Management Plan developed and adopted for use in the Coastal portion of the County. They should be used in concert with the "basic fifteen" Goals. Since they are special-purpose in nature, and deal more specifically with particular concerns of the Coastal area, conflicts may arise or be generated between the Coastal Policies and the "basic fifteen" and should be resolved in favor of the Coastal Policies until, and if one or the other conflicting statement is c@changed to eliminate the conflict.

The Willamette Greenway Goal is considered to be part of the "basic fifteen".

C. HISTORY OF THE POLICIES DOCUMENT

The Policies contained in this document were developed during a period of more than a year, beginning in early 1983. A process was devised at the beginning of the period to utilize existing working papers and to prepare a series of new working papers which, along with other sources, were to serve as the technical data based for the Policies. The Working Papers were written and published from mid-1981 to early 1984. Each Working Paper contained information on a given topic or topics, and a number of them contained preliminary Policies which were drawn from the information in the Papers and which were presented for initial discussion purposes.

Hearings were held on the Papers as they were published. Each Planning Commission reported to the Board of County Commissioners containing its reaction to the Paper and draft Policies. Often the Policy statements drew on sources other than the Working Papers--existing County Plan information (such as special-purpose plans or technical studies),comments or testimony of individuals or groups appearing at the hearings, the judgment and views

of Planning Commission members and so on--and so represented a broad array of perspectives and attitudes. Each Planning Commission Report cited information used in Policy development, in order to provide a firm basis for Policy use. The background information, including the Working Papers, is to be used to help interpret and understand General Plan approaches but is not itself designed to be adopted as legislative law. The Board formally adopted the Policies in February of 1984.

D. CITIES, COMMUNITIES AND RURAL LANDS

While the Policies in this document are directed at Lane County government, it is clearly recognized that the County has a responsibility to, and must coordinate efforts closely with, the incorporated cities within its boundaries. Statewide planning law requires that each incorporated city develop and adopt its own land use plan which must itself comply with LCDC Goals. The plan must contain essentially the same elements as the County General Plan, with an additional element of an identified Urban Growth Boundary (required by Goal 14). Future urban growth for each city is to take place within that Boundary. In the case of the Eugene-Springfield Metropolitan Area Plan, a mutual Boundary is adopted by both cities and the County. For all other cities, the County must ratify the cities UGBs by independent evaluation of, and adoption of, appropriate city plan provisions.

Through this method, the County becomes responsible for administering the provisions of city plans within the city UGBs but outside of the corporate city limits. "Joint Agreements for Planning Coordination" drawn up between the County and each city lay the framework for cooperative action in the effort. Policies concerning Goal 14 in this document further indicate County" posture toward city plans. County adoption of city plans--or amendments thereto--ensures that conflicts between city plans and County Plan do not readily occur.

Unincorporated communities are treated differently. They are identified as "community" on the Plan Diagrams, but are not given official Urban Growth Boundaries. Instead, the probable limits of growth over the planning period are reflected in the area within the "community" designation. Since lands within these areas are under County jurisdictions, no Joint Agreements are required, but development there must be justified by "committed lands" exceptions.

Areas within rural Lane County qualifying as Exception areas on the basis of precommitted uses are not necessarily "communities" as such, but do have some of the characteristics of community development--higher densities, for example. These areas are treated much as unincorporated communities are within the General Plan, in that they are solely under the County jurisdiction, and they are provided with specific land use designations and zoning reflective of their characteristics. They are not portrayed, however, with the broad "community" designation in most cases. For purposes of Plan administration, a parcel of land is either within a UGB or designated: community or it is not--the deciding factor is the portrayal on

the Plan Diagram. Lands adjacent to such "boundaries are not considered to be within them until and if the boundaries are adjusted to accommodate them.

Finally, lands considered as agricultural, forest or natural resource are lands not within any of the above classifications. These lands include the vast majority of total Lane County acreage, and are under the jurisdiction of the County plus state and federal governments (National Forests). The Statewide Planning Goals and the Policies of this Plan limited substantial rural development. However, it is recognized that such development may occur provided it is consistent with the policies contained in this document.

E. IMPLEMENTATION

As stated earlier, the County Policies are intended to guide actions and decisions. Although the policies have a common feature (i.e., relating to one or more aspects of land use) they cover a broad range of topics and concerns. Because of this wide range, it is not reasonable to assume all policies are to be implemented in the same manner. Visualizing a policy as being in one or more of the following categories will provide a better understanding as to its application.

Advisory Policies

These are statements describing the County's position on a certain topic or issue; generally but not always, relating to a subject nor under the direct jurisdiction of the County. These policies are primarily intended to inform or influence the actions of other parties. They do not have direct influence on the implementation of the General Plan through Plan Map designation, zoning of land or County Regulations.

Examples: "Lane County recommends that no new wilderness areas be designated without a complete analysis of the revenue and employment impacts on Lane County. Where designations are made, negative employment and revenue impacts should be mitigated by increasing allowable timber harvests on other public lands."

Commitment Policies

These are statements describing a future action the County intends to undertake. The policies cover a variety of topics including (a) guidance in County operations, procedures and relationships with other agencies, (b) recognition of state and federal requirements. and (c) general direction or intent. Where the County believes the action is necessary to carry out State Planning Goals or the General Plan the commitment will be in a mandatory, binding form (i.e., Lane County shall . . .). Where the action may be desirable, however, not absolutely necessary, the statement may be phrased in a nonmandatory, advisory manner (i.e., Lane County is encouraged to. ..). As with advisory policies, the commitment policies do not have a direct influence in plan diagram designations or zoning. Actions resulting from the commitment may, however, have a direct influence. Inasmuch as

these policies are describing a future action, lack of achievement at any particular point in time due to lack of resources shall not be construed as a failure to carry out the plan.

Examples: "Lane County shall actively support and assist progressive solid waste management efforts. The Lane County Solid Waste Management Plan shall be the primary instrument to effect this policy".

"Lane County is encouraged to investigate and utilize fee acquisition, easements, cluster development, preferential assessment, development rights acquisition and similar techniques to implement these policies."

"Avoidance and/or control of soil erosion shall be a major criterion addressed in all applicable County review procedures."

Plan Conformity Policies

These are directives applicable to land use designations. They are intended to guide designations on both plan diagrams and zoning maps. These policies are initially implemented by the adoption of the plan diagrams and zoning maps. Subsequent rezoning and/or plan diagram amendments must be in accord with these policies (i.e., an action that would be inconsistent with policies in this category is consistent with the plan). The policies are applicable to both legislative and quasi-judicial actions:

Example: "Land use designations in the Comprehensive Plan and implementing zoning shall be commensurate with groundwater aquifer capacities."

Depending on the circumstances, a given policy may fall into more than one category. The purpose of establishing these classifications is 1) provide a better understanding of how the plan will be implemented, and 2) provide a review standard for future land use changes. This latter purpose is accomplished by requiring any future rezoning and/or plan diagram be in accord with the Plan Conformity Policies. This review standard is considered to be the minimum level of review. As a minimum threshold, however, it should not be construed to mean that compliance with the plan conformity policies is the sole criterion and other policies cannot be taken into consideration. If it can be demonstrated that approval of a change, even though satisfying the plan conformity policies, is in conflict with other policies or State Planning Goals, the request may be denied. The classification of the Policies will be set forth as an appendix to this document.

GOAL THREE: AGRICULTURAL LANDS

1. Encourage agricultural activities by preserving and maintaining agricultural lands through the use of an exclusive agricultural zone which is consistent with ORS 215.

2. In Agricultural Rent zones 1 and 2 preference will be given to Goal 3. In Rent Zone 3, unless commercial agricultural enterprises exist, preference will be given to Goal 4.

3. Reserve the use of the best agricultural soils exclusively for agricultural purposes.

4. To insure that zoning districts applied to agricultural lands encourage valid agricultural practices in a realistic manner; emphasis shall be placed on minimum parcel sizes which are based upon a countywide inventory and which are adequate for the continuation of commercial agriculture. As minimum parcel sizes decrease to accommodate more specialized commercial agricultural activities, the burden of proof upon the applicant shall increase in order to substantiate the proposed agricultural activity and restrictions shall increase in order to obtain a residence on the commercial farm unit. Deviation from minimum parcel sizes of the Exclusive Farm Use land for the creation of a parcel not smaller than 20 acres may be allowed when at least 19 acres of the parcel being created are currently managed or planned to be managed by a farm management plan for a farm operation consisting of one or more of the following: berries, grapes or horticultural specialties. A temporary mobile home which is accessory to the farm management may be conditionally located upon the farm parcel for a reasonable length of time to allow for substantial implementation of the farm management plan. Upon evidence that the farm management plan has been substantially implemented, the mobile home may be allow on a permanent basis or may be converted to a permanent dwelling.

5. Use planning and implementation techniques that reflect appropriate uses and treatment for each type of land.

6. Encourage irrigation, drainage and flood control projects that benefit agricultural use with minimum environmental degradation in accordance with existing state and federal regulations.

7. Some agricultural land in the County is not suitable or available for agricultural use by nature of being built upon, committed to or needed for nonagricultural uses by using applicable comprehensive plan policies and the exceptions process of LCDC Goal 2, Part II.

8. Provide maximum protection to agricultural activities by minimizing activities, particularly residential, that conflict with such use. Whenever possible planning goals, policies and regulations should be interpreted in favor of agricultural activities.

9. Actively explore better methods of identifying agricultural lands than those currently used. Such methods should accurately reflect the productive capacity of the land taking into account fertility, suitability for management, climatic conditions, availability of water, land use patterns, and accepted farm practices.

10. Such minimum lot sizes or land division criteria as are used in exclusive farm use zones shall be appropriate for the continuation of the existing commercial agricultural enterprise in the region. The commercial agricultural, minimum field or parcel sizes and corresponding farming regions identified in Addendum to Working Paper: Agricultural Lands shall be used to determine the appropriate division requirements for lands zoned Exclusive Farm Use (E).

11. Conversion of rural agricultural land to urbanizable land shall follow the process and criteria set forth in LCDC Goal 3.

12. Regard nonagricultural uses within or adjacent to agricultural lands as being subject to the normal and accepted agricultural practices of that locality.

13. No County policy shall be construed to exclude permitted and specially permitted nonfarm uses, as defined in ORS Chapter 215.213, from the EFU zones. Implementing ordinances shall provide for such uses, consistent with the statutory requirements. Special permits for commercial uses in conjunction with farm use shall have the same effect as making the use an outright permitted use on the affected parcel.

14. Land may be designated as marginal land if it complies with the following criteria:
    a. The requirements of ORS 197.247, and
    b. Lane County General Plan Policies, Goal 5, Flora and Fauna, policies numbered 11 and 12.

15. Lane County recognizes ORS 215.253 shall apply on land-zoned EFU.

16. Recreational activities in the Park and Recreation (PR/RCP) Zone District within agricultural areas that are outside lands for which a built or committed exception to a Statewide Planning Goal has been taken shall be limited to those uses consistent with Statewide Planning Goals 3 and 4.

GOAL 4: FOREST LANDS

1. Conserve forest lands by maintaining the forest land base and protect the state's forest economy by making possible economically efficient forest practices that assure the continuous growing and harvesting of forest tree species as the leading use on forest land consistent with sound management of soil, air, water, and fish and wildlife resources and to provide for recreational opportunities and agriculture.

   Forest land shall include lands which are suitable for commercial forest uses including adjacent or nearby lands which are necessary to permit forest operations or practices and other forested lands that maintain soil, air, water, and fish and wildlife resources.

2. Forest lands will be segregated into two categories, Non-impacted and Impacted and these categories shall be defined and mapped by the general characteristics specified in the Non-Impacted and Impacted Forest Land Zones General Characteristics.

3. Forest lands that satisfy the requirements of ORS 197.247 may designated as Marginal Lands and such designations shall also made in accordance with other Plan policies. Uses and land divisions allowed on Marginal Lands ands shall be those allowed by ORS 197.247.

4. Forest operations, practices and auxiliary uses shall be allowed on forest lands subject only to such regulation of uses as are found in the Oregon Forest Practices Act, ORS 527.722.

5. Prohibit residences on Non-Impacted Forest Lands except for the maintenance, repair or replacement of existing residences.

6. Dwellings shall be allowed in the Impacted Forest Land (F-2/RCP) Zone District as provided in OAR 660-06.

7. The minimum land division size for the Nonimpacted Forest Lands (F-1/RCP) Zone shall be 80 acres pursuant to OAR 660-06-026(2)(a) except parcels smaller than 80 acres may be authorized for certain uses pursuant to OAR 660-06-026(3) and (4). Area requirements for Impacted Forest Land must be adequate to conserve forest land for impacted farm and forest uses and be consistent with the following criteria:

   (a) Except as provided in subsection (2) below, for the creation of a wood lot for the purpose of the propagation or harvesting of a forest product, the minimum area shall be at least 20 acres, and that which is consistent with the Douglas fir cubic foot site indexes and minimum area computations promulgated by the Oregon Department of Forestry and specified below, and additional area to accommodate a homesite, access and fire breaks, and a logical parcel layout and use of the parcel. There shall be presented for each application sufficient factual documentation to verify that each proposed tract meets the above requirements.

Cubic Foot Site Class	Potential Yield cu.ft./acre/yr	Acreage Minimum
6	20-49 cf/ac	64
5	40-84 cf/ac	43
4	85-119 cf/ac	34
3	120-164 cf/ac	24
2	165-224 cf/ac	17

(b) To substantially limit any adverse impacts upon commercial forest management which might result from land divisions and subsequent residential development (accessory and necessary to commercial forest management) a minimum area of 80 acres shall be required for the division of large forest tracts:

(i) Zoned F-2
(ii) Containing at least 160 acres
(iii) For the creation of lots or parcels adjacent to F-1, RCP zoned lands.

(c) Deviation from the standard specified in subsections 7(a) and 7(b) above, for a 40 acre parcel on impacted forest land to be used for farm land may be allowed.

(d) Deviation from the standard specified in subsections 7(a) and 7(b) above, of the impacted forest land for the creation of a parcel not smaller than 20 acres may be allowed when at least 19 acres of the parcel being created are currently managed or planned to be managed by a farm management plan for a farm operation consisting of one or more of the following: berries, grapes, or horticultural specialities.

(e) Lot line adjustments consistent with the definition of "divide" in LC 16.090 are permissible.

(f) Parcels smaller than specified in subsections (1)-(4) above may be authorized for certain uses pursuant to OAR 660-06-026(3) and (4).

8. New structures must comply with the Siting and Fire Safety Standards of OAR 660-06-029 and 660-06-035.

9. Recreational activities in the Park and Recreation (PR/RCP) Zone District within resource areas that are outside lands for which a built or committed exception to a Statewide Planning Goal has been taken shall be limited to those uses consistent with Statewide Planning Goals 3 and 4.

10. The effects of a projected shortfall in timber supplies within the near future are of considerable concern to Lane County. The County supports efforts by state and federal agencies in developing plans that will

address this situation. The County intends to be an active, committed participant in such plan development.

11. Encourage the consolidation of forest land ownership in order to form larger more viable forest resource units.

12. Encourage the conversion of under-productive forest lands through silvicultural practices and reforestation efforts.

13. Encourage the development of assistance programs, tax laws, educational programs and research that will assist small woodland owners with the management of their forest land.

14. Lane County recognizes that the Oregon Forest Practices Act shall be the only mechanism regulating the growing and harvesting of forest tree species on commercial forest lands unless Goal #5 resource sites have been recognized and identified as being more important through an analysis of ESEE consequences and conflict resolution as per Goal #5. No other findings, assumptions, goal policy or other planning regulation shall be construed as additional regulation of forest management activities.

15. Minimum parcel sizes and land division standards for Impacted Forest Lands should be the subject of additional study in future plan revisions and updates.

16. Lands designated within the Rural Comprehensive Plan as forest land shall be zoned Non-Impacted Forest Lands (F-1, RCP) or Impacted Forest Lands (F-2, RCP). A decision to apply one of the above zones or both of the above zones in a split zone fashion shall be based upon:

    a. A conclusion that characteristics of the land correspond more closely to the characteristics of the proposed zoning than the characteristics of the other forest zone. The zoning characteristics referred to are specified below in subsections b and c. This conclusion shall be supported by a statement of reasons explaining why the facts support the conclusion.

    b. Non-impacted Forest Land Zone (F-1,RCP) Characteristics:
        (1) Predominantly ownerships not developed by residences or nonforest uses.
        (2) Predominantly contiguous, ownerships of 80 acres or larger in size.
        (3) Predominantly ownerships contiguous, to other lands utilized for commercial forest or commercial farm uses.
        (4) Accessed by arterial roads or roads intended primarily for forest management.
        (5) Primarily under commercial forest management.

    c. Impacted Forest Land Zone (F-2, RCP) Characteristics
        (1) Predominantly ownerships developed by residences or nonforest

uses

(2) Predominantly ownerships 80 acres or less in size.

(3) Ownerships generally contiguous to tracts containing less then 80 acres and residences and/or adjacent to developed or committed areas for which an exception has been taken in the Rural Comprehensive Plan.

(4) Provided with a level of public facilities and services, and roads, intended primarily for direct services to rural residences.

GOAL FIVE: OPEN SPACES, SCENIC AND HISTORIC AREAS AND NATURAL RESOURCES

Historical Resources

1. A group known as the "Lane County Historic Resource Committee" is to be established and given permanent status by the Board of County Commissioners. The Committee shall represent a wide array of historical interests and the interests of property owners. Its tasks shall include: general concern with historical matters in Lane County; to monitor conditions affecting such resources; to devise criteria and methods for the selection of newly-designated historical resources; to advise the staff and officials of the County on proposed new historical sites and structures; to oversee the administration of the Historic Structures or Sites ordinance; and other related tasks and duties. Outputs of the Commissions and subsequently to the Board of County Commissioners.

2. The County shall administer the "Historic Structures or Sites" section of Lane Code Chapter 10 as a means of protecting historic resources. These regulations shall be applied to all sites contained in list of "Historic Structures or Sites" referenced by the the ordinance, which are sites deemed significant by the County, and therefore meriting protection from conflicting uses by a limitation of such conflicting uses.

3. The Goal 5 conflict resolution process (OAR 660-16-000 through 660-16-025) which has been applied in the selection of historical sites and structures contained in the General Plan and implemented through the "Historic Structures or Sites" ordinance, shall continue to be applied, where appropriate, to historic sites and places prior to regulation of them.

4. The County shall seek to enlist voluntary compliance with individual landowners in the addition of their property as historical sites, and landowners shall be notified of Public Hearings, including information about inclusion as a Historical Site.

5. The County Shall encourage its own agencies, and communities within the County, to emphasize their historical, geographic and other unique qualities.

6. The County shall review proposals for development or changes in land use for possible impacts with designated historical sites. When proposed development or land use changes will cause harm or degradation of a designated site, such effects shall be mitigated in a satisfactory manner.

7. The County shall continually develop and refine, through review, and update, its inventory of historical sites and resources. A long-term objective shall be in the inclusion of historical sites

in the County's geo-data system.

8. The County shall take advantage, where practical, of state and federal programs to assist in the identification and protection of historical resources, including the use of financial assistance from these programs.

9. The County shall work with concerned local, state, and federal agencies to coordinate efforts to identify and protect historical resources.

10. Archaeological sites identified in the Historical Resources Working Paper and Addendum to the Historic Resources Working Paper shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. These significant sites shall be incorporated into the Lane County General Plan Policies document as Historic Resources Exhibit A.

Mineral and Aggregate Resources

1. Known mineral resource sites within the County, which are limited to those identified in Appendix "D" of the "Mineral and Aggregate Resources Working Paper", shall be conserved for both present and future uses through the application of Plan designations and compatible land use regulation measures. Such designation and regulation is to take place after the requirements of the Goal 5 rule (OAR 660-16-000 through 660-16-025), which is addressed in Appendix "J" of the "Mineral and Aggregate Resources Working Paper".

2. Exploration for mineral resources (in contrast to actual mining) shall be a permitted activity in the rural portions of the County. Areas designated primarily for residential purposes are to be excluded from this policy as are areas that, having undergone analysis in accordance with OAR 660-16-000, are designated as having some unique natural, historical or cultural value. Exploratory drilling for gas, oil, or other hydrocarbons in not within the scope of this policy.

3. Mining operations are regulated by state and federal government agencies. County regulations shall supplement these actions only as necessary to ensure compatibility in the area, or to protect other resources.

4. Conserve and manage land, soil, and mineral resources by respecting their physical limitations and environmental assets.

5. Update, in cooperation with local aggregate operations, federal, state and local agencies, past sand and gravel inventories to ensure supply/demand information is current.

6. Protect aggregate deposits from encroachment of incompatible uses and ensure that aggregate material in close proximity to its point of use will be available when needed.

7. Mineral and aggregate resource sites, which, on the basis of substantial evidence, are considered for inclusion in Appendix "D" of the "Mineral and Aggregate Resources Working Paper" pursuant to the application of the Goal 5 rule (OAR 660-16-000/025), shall also show evidence of substantial resource utility over time. Any site evaluation shall also address possible impacts on agricultural lands, forest lands and residential development (existing or planned). For sites within the Willamette Greenway or near Goal 5 inventoried resources, notification of the potential conflict shall be sent to the appropriate body (e.g., Pioneer Museum, Oregon Department of Transportation, Oregon Department of Fish and Wildlife, etc.).

8. Encourage farm and forestry use of aggregate land prior to extraction; minimize negative environmental impacts during extraction; require reclamation after extraction which is compatible with adjacent uses.

9. Lane County shall apply the appropriate district (SG, SG/CP, /QM) to the sites listen in Appendix "J" of the Mineral and Aggregate Working Paper. Those sites with potential conflicts shall be placed in the SG/CP or QM/SR Districts.

10. Newly discovered or known or suspected sites, for which there is inadequate substantive information to allow a determination of quality, quantity, significance and conflicts with other uses, are identified in Appendix "F" of the "Mineral and Aggregate Resources Working Paper." All sites listed in Appendix "F", including sites used pursuant to Special Use Permits issued after the effective dated of this Policy, shall be examined pursuant to the Goal 5 rule (OAR 660-16-000 through 660-16-025), for inclusion in the County's resource inventory no later than the time of completion of the next Periodic Review of the Lane County Rural Comprehensive Plan. Until then, the alternative procedures of Special Use Permits may be used to authorize mineral and aggregate extraction and accessory activities on a short-term, limited or intermittent basis as provided by Lane Code Chapter 16. In addition to meeting the criteria specified in Lane Code Chapter 16. mineral and aggregate extraction and accessory uses shall be substantially compatible with the livability of existing development of abutting property and the surrounding vicinity, and the duration of the permit shall not extend beyond the next Periodic Review unless found appropriate during Periodic Review. Conditions enhancing compatibility may be adopted as required.

11. Mineral and aggregate extraction activities within the Willamette

Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with sections C.3.d and C.3.i of the Goal. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

Flora and Fauna

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies are encourage to work with landowners to conserve wildlife habitats.

5. Lane County shall investigate fee acquisitions, easements, cluster developments, preferential assessment, development right acquisition and similar techniques to protect Goal 5 resources.

6. Riparian vegetation along Class I streams in the County is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Riparian lands shall be defined as the lands within 100 feet of ordinary high water on Class I streams, and shall be considered "Significant" "1C" areas (in the language of OAR 660-16-000/025); "3C" protection of the riparian resource shall be achieved through development setbacks and vegetation management regulations within the riparian strip. The setback distance will vary from 100 feet from ordinary high water in rural resource zones to 50 feet from ordinary high water in developed and committed areas; provided a means is made available fro review and modification of these requirements where it can be demonstrated that an unduly restrictive burden would be placed on the property owner or that riparian vegetation does actually extend all the way into the 50 foot or 100 foot setback to the location of the proposed improvements.

   Such review and modification shall be spelled out in the zoning districts affected, and shall involve consultation with officials of the Oregon Department of Fish and Wildlife.

7. Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be

considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal/state ownership; where these do not occur, an appropriate wetlands zoning district shall be developed and applied. Other wetlands from the National Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per Goal 5 requirements if it is clearly demonstrated that an unprotected significant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction. (Modification in process)

8. Sensitive Fish and Waterfowl Areas as identified in the 1983 Revision the Flora and Fauna Working Paper, shall be considered "significant" "1C" resources per OAR 660-16-000/025, and protected per "3C" requirements through protection of riparian and wetland resources as described in the above Policy statement.

9. Residential building permits issued within Major or Peripheral Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna, and as revised and updated in 1983, shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

10. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna and as revised and updated in 1983.

11. Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resource zoning program.

12. If uses are identified (which were not previously identified in the Plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

13. In its program of protecting "1C" resources, the County shall make

maximum practical use of existing land use regulations (e.g., Willamette Greenway Permit, Coastal Resources Zoning overlays, rural forest and agricultural resource zones) to achieve such protection. Duplication of existing standards shall be avoided wherever practicable, provided County-determined Goal 5 and OAR 660-16-000/025 objectives are met.

14. A group known as the "Lane County Flora and Fauna Committee" is to be established and given permanent status by the Board of County Commissioners. The committee shall represent a wide array of environmental interests and the interests of property owners. Its tasks shall include: evaluation of LCDC Goal 5 concerns and resources, development of information to help the County comply with OAR 660-16-000/025 ("Goal 5 Rule"), research and provision of resource site data to the County, and response to work in progress. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

15. Rare and endangered vascular plants, identified in a 1/8/84 list prepared by the Native Plant Society of Oregon shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. This list of rare and endangered vascular plants in included into the Lane County General Plan Policies document as Flora and Fauna Exhibit B.

16. Lane County recognizes that Douglas fir old growth stands provide valuable and unique wildlife habitat and will encourage the Forest Service and Bureau of Land Management to maintain acreage in this age class sufficient to ensure viable populations of dependent wildlife species.

17. The Cooperative Agreement between Oregon State Board and Forestry and Oregon State Fish and Wildlife Commission shall constitute Lane County's means of protection sensitive bird habitat site sites form conflicts which may result from forest practices as regulated by the Forest Practices Act. Within two years of the date of acknowledgment of the Rural Comprehensive Plan, Lane County shall evaluate the effectiveness of the use of this agreement in providing actual protection to sensitive bird habitat sites and, if necessary, shall consider the adoption of more effective means of protecting sensitive bird habitat sites. This agreement is incorporated into the Lane County General Plan Policies as Flora and Fauna Exhibit 'A'.

18. Owners of property designated as a sensitive bird habitat and as identified in LM 11.400 shall be encouraged to develop a management plan in conjunction with the Oregon Department of Fish and Wildlife prior to beginning any development which may adversely affect the habitat. Such management plans shall consider nesting trees, perch trees, critical nesting period, roosting sites, flight pathways and

buffer zones, and shall demonstrate how the proposed development will not adversely affect the sensitive bird habitat site. The policy shall not apply to forest practices covered by the above Flora and Fauna Policy 17.

Open Space and Scenic Areas

1. Lane County has determined that all resource lands in the County are also open space lands. Resource related activities shall predominate on these lands. Where proposals are developed land uses are made consistent with the Comprehensive Plan and Statewide Goals, development standards shall be applied which minimize loss of open space.

2. Lane County will recommend that no new wilderness areas be designated in the County without a complete analysis of the revenue and employment impacts to Lane County. Where designations are made, negative employment and revenue impacts should be mitigated by increasing allowable timber harvest on other public lands. Lane County will cooperate to the extent of its jurisdictional authority in the maintenance of existing Wilderness Areas located within Lane County. Should any of these Wilderness Areas ever revert to private ownership, the County will apply the Goal 5 evaluation process as required by Goal 5.

3. The 1983 Revision to the 1981 Recreational Resources Working Paper identifies six major areas of outstanding scenic value in Lane County. These areas are to be considered '3C' resources in the terms of OAR 660-16-000/025 ('Coastal Strip', 'McKenzie Valley', Willamette Highway/Salt Creek Corridor' and 'Coburg Ridge'), '3B' resources ('Willamette Greenway') and '2A' resources ('ODOT Scenic Areas'). Conflicting uses in '3C' areas shall be regulated by the management activities of the Siuslaw and Willamette National Forests, the Oregon Forest Practices Act and the County's rural resource and Coastal zones (on private land). Scenic resources beyond those referenced shall be considered '1B' resources until the County can initiate a program to identify areas of outstanding scenic value.

   Initiate a program to identify areas of outstanding scenic value, identify and resolve conflicts after consideration of social, economic, energy and environmental consequences and protect sites for which conflict resolution indicates protection is desirable.

   This program will be initiated prior to the next scheduled Plan update (five years form adoption of revised Plan). The County is encouraged to investigate and utilize fee acquisition, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to implement this policy.

4. The County shall recognize and acknowledge existing and potential

recreational trails designated by the Oregon Parks Outdoor Recreation Plan, shall cooperate with the Oregon Department of Transportation in the identification of specific routes for potential trails, and in the completion of applicable steps of OAR 660-16-000/025. Existing developed trails shall be displayed on the County's planning documents.

5. The County shall cooperate with appropriate state and federal agencies in the selection of wild and scenic rivers, and will cooperate with these agencies in the completion of applicable steps of OAR 660-16-000/025 in making such selections.

Energy

1. lane County shall identify energy resource areas within the County and protect such areas through the use of existing ordinances and regulations. Such regulations shall address hydroelectric, geothermal, and wind power sites.

2. Lane County shall encourage the exploration and development by other agencies of renewable energy resources such as geothermal, wind, biomass, hydroelectric and solar, and shall monitor such development to ensure that the development does not cause adverse effects within the County.

3. Lane County will use the work of the L-COG Committee on Energy, and its report, "Lane County Electric Energy Planning Program, Final Report (1983)" as a source of resource identification and site protection measures. This will supplement the County's own measure expressed in Policy and Zoning Statements.

4. The County shall protect the sites of hydroelectric resources through conditional or special use provisions of its resource zones. Sites for which a license has been applied for with federal and state authorities, or for which water impoundments of more that 100 acre-feet are proposed, or which will generate power in excess of 75 KW, shall be shown on the Plan as special designation, an Exception to applicable LCDC Goals taken if necessary, and a special zoning district applied. At that time, the Goal 5 rule conflict analysis shall also be carried out.

5. For additional energy policies see Goal 3.

Water Resources

1. State policy normally promotes multiple use of surface waters throughout Lane County. Under such policy, use conflicts can and do occur. As the first step in addressing this problem, the County urges the Oregon Water Policy Review Board and the Department of Environmental Quality to update the existing water basin plans and

establish priorities among the various beneficial uses for specific water areas. The economic, social, environmental and energy consequences of each use should be considered in establishing priorities and resolving any identified conflicts. Lane County will cooperate to the maximum extent practicable in such a program.

2. The County supports congressional reauthorization of upper Willamette basin reservoirs, to reflect actual use priorities. To the extent practicable, the County will cooperate with the Corps of Engineers in resolving existing use conflicts and accommodating the needs of competing uses.

3. Adequacy of water supply, particularly those relying on groundwater sources, shall be a major concern in reviewing major land use changes. For the purpose of applying this policy, major land use change shall be any application reviewed by the Hearings Official or the Planning Commission.

4. The primary means of evaluating groundwater resources for land use planning purposes shall be through the land division review process.. The Little Butte Volcanics, Eugene Formation, Fisher Formation, Spencer Formation, Flourney Formation, Alluvium and Older Dunes geological units shall be designated as quality and/or quantity limited aquifers. As such the provisions of Chapter 13, Lane Code (Land Divisions) regarding areas so designated will apply.

5. Land use designations in the Comprehensive Plan and implementing zoning shall be commensurate with groundwater aquifer capacities.

FLORA & FAUNA EXHIBIT "A"

COOPERATIVE AGREEMENT

BETWEEN

OREGON STATE BOARD OF FORESTRY

and

OREGON STATE FISH AND WILDLIFE COMMISSION

This agreement made and entered into upon the dates hereinafter indicated, by and between the Oregon State Board of Forestry, hereinafter referred to as OSBF, and the Oregon State Fish and Wildlife Commission, hereinafter referred to as OF&WC.

PREAMBLE

Whereas, the policy of OSBF as required by ORS 527.630 is to encourage forest practices that maintain and enhance the multiple forest benefits and resources while recognizing various forest conditions; and,

Whereas, the policy of OF&WC as required by ORS 496.012 is to maintain all species of wildlife at optimum levels and prevent the serious depletion of any indigenous species, and

Whereas, the various counties, under the provisions of ORS 197.175, are required to provide for protection of certain resources under Goal 5 and 17 of the Statewide Planning Goals and Guidelines, and may use the Oregon Forest Practices Act to implement the Goals; and

Whereas, Goal 5 identifies the need to protect and manage critical wildlife habitat and streamside wildlife habitat; and

Whereas, Goal 17 requires protection of major marshes, critical wildlife habitat, and riparian habitat in coastal shoreland areas:

Now, therefore, it is hereby understood and agreed by and between OSBF and OF&WC to implement the following process:

1. The OF&WC will furnish to the OSBF a current list of critical wildlife habitat sites (which will include major marshes in the coastal shoreland area) situated on lands subject to the provisions of the Forest Practices Act. The list will be updated as needed considering new information including those sites inventoried in

local comprehensive plans.

2. The OSBF will recognize the list furnished by OF&WC as critical wildlife habitat to be protected through administration of the Forest Practices Act.

3. The OF&WC will provide OSBF with the current policies and standards used by OF&WC to identify the quality, quantity, and location of critical habitat sites.

4. The OSBF will classify any operation near or within a listed critical wildlife habitat site as a high priority operation requiring a joint inspection between OSBF and OF&WC prior to commencement of the operation on the sites.

5. The OSBF, OF&WC, and landowner/representative will jointly inspect the site to determine if the planned use of the site is a conflict. If no conflict is identified, the operation is to be limited only be current Forest Practice Rules.

6. If the planned use of the site is identified as a conflict between the operation and the wildlife habitat, OSBF will require a plan to resolve the conflict. The plan will determine reasonable measures sufficient to resolve the conflict on the site by limiting conflicting practices. Reasonable measures may include limiting conflicting forest operations during the time of the year wildlife need the site, limiting operations to meet other wildlife needs or excluding forest operations on the site.

7. The OSBF and OF&WC will cooperate in the development of standards and procedures for streamside protection and management including riparian habitat within coastal shoreland areas, to be applied in administration of the Forest Practices Act on commercial operation. The OSBF will apply these procedures during administration and enforcement of the Forest Practices Act, consistent with the Forest Practices Act and Forest Practices Rules.

8. This Cooperative Agreement shall become effective upon execution of the parties hereto and shall be operative until terminated by either party by written notice to the other party and to DLCD and those local jurisdictions relying on the agreement for compliance to Goal 5. The notice to terminate shall be submitted at least thirty (30) days prior to the termination date.

GOAL SIX: AIR, WATER AND LAND RESOURCES

Water Quality

1. Avoidance and/or control of soil erosion shall be a major criterion to be addressed in all applicable County review procedures and County construction activity.

2. The re-establishment of vegetative cover by standard erosion control practices shall be required as part of the land development process.

3. Lane County shall cooperate with the Department of Environmental Quality and other state and federal agencies in maintaining domestic water supplies to the existing standards of the appropriate governing body.

4. Lane County shall promote watershed practices which protect and enhance water quality and quantity through land use planning, Public Works projects and management of County facilities.

5. Lane County shall cooperate with the Lane Council of Governments and Oregon Department of Environmental Quality in identifying sources of water pollution and controlling or abating them. The County's primary emphasis will be the possible degradation of ground and surface water quality by onsite sewage disposal system.

6. Lane County shall cooperate with the Oregon Water Policy Review Board to evaluate flow requirements necessary to maintain water quality in critical streams and support the establishment of minimum flow designations for those streams.

7. In basins where consumptive flow appropriations result in water quality problems due to low flows, the County shall encourage the construction of small storage reservoirs for flow augmentation of sites with minimal use conflicts. The County will also encourage conservation practices among water consumers in those basins.

Air Quality

1. The County shall support programs which reduce air pollution primarily through continued active participation in Lane Regional Air Pollution Authority (LRAPA).

2. The County shall encourage practices and developments which can meet air quality standards.

3. The County shall cooperate with State and Federal agencies to achieve enforcement of existing noise control regulations.

4. The County shall committed to, and shall participate in, programs

of the Lane Regional Air Pollution Authority to monitor air quality in the County and ensure that federal, state and local standards are being met; the County shall cooperate in the same manner with the State Department of Environmental Quality with respect to air quality and noise control standards for which that is responsible.

5. Lane County shall, working in cooperation with LRAPA and DEQ, maintain an inventory of air pollution sources, and noise pollution sources where information is available, and shall update such inventory periodically.

6. Lane County shall develop a procedure of regular, routine referral of major land development and/or building permit requests to LRAPA and/or DEQ for review of air quality and noise implications, and shall consider the responses of those agencies to the referrals when action is being taken on the requests.

GOAL SEVEN: AREAS SUBJECT TO NATURAL DISASTERS AND HAZARDS

1. The Natural Hazards Inventory, as contained in the 1982 Natural Hazards Working Paper and associated materials, shall be used as a guide for general land use decisions. Specific land use decisions shall be based upon the inventory and upon on-site or other evaluation as appropriate.

2. Development shall be commensurate with the type and degree of any natural hazard(s) present and appropriate safeguards against flooding, ponding, landslides, land slippage, erosion or other natural hazards applicable shall be assured. For purposes of evaluation and in the absence of any specific proposal, the provisions of the Oregon State Building Code shall be assumed to be the sole means of safeguard against natural hazards.

3. When extensive or drastic safeguards must be employed in conjunction with development proposals, the immediate and ultimate impact, (including financial and economic considerations) of such safeguards on the environment and the public shall be considered.

4. Lane County shall continue as a qualified participant in the Federal Flood Insurance Program through application of comprehensive flood hazards analysis and floodplain management data to general and specific land use decision.

GOAL EIGHT: RECREATIONAL NEEDS

1. Lane County shall use the adopted Parks Master Plan as its chief guide for recreational development and service provision, to be supplemented by information obtained from the US Forest Service, the State Department of Transportation, the State Marine Board and other agencies.

2. Private recreational development in areas predominated by public recreational amenities and facilities shall be encouraged, provided that development is complimentary to or supplements public facilities.

3. Proposals for major recreational developments which exceed projected needs contained in the Recreational Working Paper of the Parks Master Plan shall be accompanied by a demand analysis.

4. Increase recreation opportunities, as needed, throughout the County.

5. Encourage private recreational development as an important component of the County's total supply of recreational facilities and services.

6. Encourage the development of recreation facilities in community development centers.

7. Encourage the development of environmentally compatible tourist and recreational facilities which enhance the economic prospects of rural areas while serving the recreational needs of tourist and County residents.

8. Continue development of a Countywide system of paths and trails for nonmotorized travel (i.e. pedestrian, bicycle and equestrian) interconnecting development centers, recreation sites and scenic areas.

9. Increase public access to public outdoor recreation sites that can tolerate the pressure of increased use.

10. Encourage public and private participation to increase access to waterways, where needed, without infringing upon private property rights.

11. Encourage exchange of public lands of comparable value to offset acquisition of private lands for public use.

12. The County should develop additional guidelines to encourage the private lease and development of existing County-owned land for public recreational facilities.

GOAL NINE: ECONOMY OF THE STATE

1. Within the framework of these policies, the County shall encourage the diversification and growth of the local economy. Primary efforts will be in the following areas:
   a. Cooperation and participation with efforts and programs established by public agencies and private concerns to promote and enhance economic development throughout the County.
   b. Recognition of the value of local resources such as timber and agricultural lands as the primary source of raw materials for the manufacturing and processing sectors of the economy.
   c. Establishment of land use policies that provide a supportive environment for industrial and commercial activities.

2. The County's primary responsibility in economic development shall be to ensure the necessary land area is available throughout the County and appropriate levels of service can be obtained, consistent with the needs of industry and commerce, the area and other County policy.

3. Most industrial and commercial development shall be concentrated within the urban growth boundaries of the various cities throughout the County. The County shall work closely with city governments to improve economic conditions within their areas. During County review and adoption of city plans, particular attention shall be given to the identification and protection of industrial and commercial sites, both large and small scale.

4. Commercial and service facilities in rural, unincorporated communities shall be supported commensurate with increases in rural population and where necessary to insure continued operation of industrial activity. Such facilities shall be located within rural communities unless justified by appropriate plan amendment and exception to Statewide Planning Goals.

5. Existing parcels of land within UGBs which are suitable for large-scale industrial development shall be protected through the County's review and acknowledgment of city plans.

6. The County shall work closely with incorporated city governments to improve local economic conditions, including land and service provision.

7. New industrial development shall normally take place within adopted Urban Growth Boundaries, unless such development:

   a. Is clearly rural oriented (e.g., canneries, logging operations, processing of resource material);
   b. Is necessary for the continuation of existing industrial operations, including plan or site expansion;
   c. Will be located in an area either built upon or committed to

nonresource use where necessary services can be provided;

d. The industrial activity is dependent on a unique site-specific resource;
e. The use is too hazardous or is incompatible in densely populated areas;
f. The industrial activity creates by-products which are used to a significant level in resource activities in the immediate area; or
g. Where a significant comparative advantage could be gained in locating in a rural area. Any development approved under this policy that requires a plan amendment shall be justified by an exception to applicable Statewide Planning Goals.

8. Existing industrial and commercial uses shall be designated on the plan diagram. Uses so identified shall be zoned to allow for continued operation and routine expansion commensurate with their character, provided significant conflicts with other land uses (existing and planned) do not result.

9. Tourism shall be considered as a base industry having high potential for growth throughout the County. Development of facilities oriented towards tourists shall be given maximum support within the framework of these policies.

10. As a stimulus to the tourist industry, the County shall maintain and where possible, improve public recreational facilities such as parks, boat ramps, etc. Wherever possible, private operations and contracts will be used in these endeavors.

11. Specific standards for rural economic development shall be developed, which include the use of economic inventory data such as population and employment trends.

12. Destination Resorts siting enhances tourism and is encouraged within Lane County. Destination Resorts shall be sited consistent with guidance in Goal 2: Land Use Planning.

GOAL TEN: HOUSING

1. The adopted Lane County Housing Plan is a special function plan concerned with Goal 10 requirements, and containing a number of policy statements specifying the County's position toward these requirements. The 1978 Housing Plan, as amended, shall continue to be used as the primary guideline toward housing matters, and policy statements within it shall be considered to be mandatory action which are ultimately binding on the County.

GOAL ELEVEN: PUBLIC FACILITIES AND SERVICES

1. Lane County shall provide an orderly and efficient arrangement for the provision of public facilities, services and utilities. Designation of land into any given use category either initially or by subsequent plan amendment, shall be consistent with the minimum level of services established for that category.

2. Any increases in the levels of public facilities and services generated by the application of new or revised land use designations within an area shall, to the extent practicable, be financed and maintained by revenues generated within or as a result of those designated land uses. Those land uses benefiting from increased levels of public facilities or services shall be expected to provide a significant share of the costs associated with providing such facilities and services, recognizing that in some instances, resources for such provision must be obtained on a widespread geographic or revenue basis and may involve capital investments exceeding the immediate needs of the area being served.

3. Lane County shall actively support and assist progressive solid waste management efforts. The Lane County Solid Waste Management Plan shall be the primary instrument to effect this policy.

4. Lane County shall maintain an active role to provide the facilities and services needed to make quality health, social and cultural services available and accessible to all Lane County residents. The County's specific objectives at any given time in these areas are contained in the work program objectives of the Departments of Community Health and Social Services, Public Work and the County Fair Board.

5. Lane County shall participate in the coordination of planning and development for various public facilities and utility services. The primary means of effecting this policy shall be through a system whereby land use applications shall be referred to the various providers of services including cities, utilities, special districts, County and other public agencies, as well as the Lane County Boundary Commission.

6. Land designations and service levels:

   a. Forest Land: Non-Impacted Forest Land (F-1)

      Description: Forest land that requires the highest degree of protection from intrusion by nonforest uses. This land has a high value as commercial forest land or is valuable for one or more other forest uses. Use of the land should be directly related to existing or potential forest uses. Nonforest uses should be prohibited or severely restricted.

e. Rural Residential (RR-1, RR-2, RR-5, RR-10) (Outside Community Designations)

Description: Lands outside communities and not identified as Forest Land, Agricultural Land or Natural Resource: Mineral. These lands may have some productive capability, however, not to the degree warranting designation as resource land. This land can be used for low-density rural residences, part-time farming and similar activities. Settlement patterns will be primarily a factor of on-site conditions. (Refer to Goal #2, Policy #11, for criteria used to determine the application of the Rural Residential designation.)

Service Level: Schools, on-site sewage disposal, individual water supply system, electrical service, telephone service, rural level fire and police protection, reasonable access to solid waste disposal facility.

f. Community (RR-1, RR-2, RR-5, RR-10, RA, RG, C1, C2, C3, M2, M3)

Description: Land that has an existing cohesive, dense settlement and development pattern to the degree that it may no longer be considered available for other uses. (Refer to Goal #2, Policy #10, for the characteristics an exception area must have to receive a Community designation.)

Service Level: Schools, on-site or community sewage disposal, individual or community water supply, electrical service, telephone service, rural level of fire and police protection, reasonable access to solid waste disposal facility.

g. Rural Commercial (CR)

Description: Existing facilities providing goods and services. The category includes a broad range of such activities from a small isolated store to a large shopping complex. Only existing uses are shown as new commercial uses are expected to locate in development centers. New commercial establishments seeking to locate outside of a Community can do so only by a plan amendment or by justifying the location through the refinement process.

Service Level: Schools, on-site sewage disposal, individual water supply, electrical service, telephone service, rural level of fire and police protection, reasonable access to solid waste disposal facility.

h. Industrial (M2, M3) (Outside Community Designations)

Description: Existing facilities engaged in the production of goods. The full range of such activities from small to large is included in this category. Only existing locations shown as new industrial uses are expected to locate in community centers. New industrial uses seeking to locate outside of a community can do so only through a plan amendment or by justifying the location through the refinement process. Expansion of existing uses will require justification through the exception process.

Service Level: Schools, on-site sewage disposal, individual water supply system, electrical service, telephone service, rural level of fire and police protection, reasonable access to solid waste disposal facility.

i. Park or Recreation (PR)

Description: Lands or buildings devoted to public or semi-public recreational use. Included are such uses as golf courses, parks, reservoirs and surrounding land, etc.

Service Level: No minimum level of services is established for Park or Recreation areas outside committed areas. Service level for Park or Recreation areas inside committed areas shall be consistent with that level required for the Community or committed area outside of a Community.

j. Marginal Lands (ML)

Description: Lands that satisfy the requirements of ORS 197.247 may be designated Marginal Lands in accordance with other Plan policies.

Service Level: Consistent with service levels for Rural Residential outside a Community designation.

k. Non-resource Lands (NRES)

Description: Lands that are not farm or forest lands as defined by Statewide Planning Goals #3 and #4. (Refer to Goal #2, Policy 16.)

Service Level: Consistent with service levels for Rural Residential outside a Community designation. The service level for cluster subdivisions of nonresource shall be consistent with Goal #2, Policy 24.

GOAL TWELVE: TRANSPORTATION

1. Lane County shall shall strive for a coordinated and balanced transportation system which complies with LCDC Goal 12 and is responsive to the economic, social and environmental considerations, and which will work toward the following objectives:
   a. Safe, convenient and economical transportation for all people, materials and services.
   b. An effective distribution of transportation options.
   c. A transportation system responsive to changing needs and conditions.
   d. Consideration of direct and indirect impacts of proposed transportation projects on the environment, energy resources, economy and general livability.
   e. Public participation in the transportation planning process.
   f. Coordination with the development of statewide comprehensive transportation plans.
   g. Encouragement of energy-efficient modes of transportation.
   h. Safe and convenient opportunities for bicycle and pedestrian travel throughout population areas of Lane County.
   i. An efficient public transportation service which meets demonstrated needs for alternative transportation.
   j. An appropriate level of general and commercial aviation development.
   k. The development of the Port of Siuslaw consistent with adopted policies and plans.
2. In managing the transportation system toward the fulfillment of adopted County land use goals and plans, Lane County shall:
   a. Provide transportation services as necessary to accommodate growth concentrated within existing communities.
   b. Discourage the spread of residential development in agricultural and forest areas.
   c. Guide the transportation pattern of newly developing areas and rural communities.
   d. Ensure that transportation improvements are consistent with adopted public policies and plans.
   e. Ensure that road development or improvement is consistent with adopted plan and policies.
3. Lane County shall seek an efficient, safe and attractive highway network to serve the existing and future arrangement of land uses by striving toward the following objectives:
   a. Make improved safety for the traveling public a primary consideration in the expenditure of resources.
   b. Ensure that all road construction meets adopted uniform standards unless excepted for substantial reason.
   c. Provide for timely development of streets and roads in community development centers.
   d. Include aesthetic considerations in maintenance, construction or improvement within County road right-of-way.
   e. Minimize frontage access onto the County's collector and

GOAL THIRTEEN: ENERGY CONSERVATION

1. Lane County shall work to implement the Lane County Energy Task Force recommendations as soon as practical and feasible. Among them are the four broad programs listed below as well as a number of detailed recommendations, including ones to encourage efficiency in land use, building and transportation.
   a. Develop staff capability to implement recommended programs.
   b. Promote public education/awareness/motivation.
   c. Provide and promote interjurisdictional cooperation and coordination.
   d. Develop and publicize financial incentives/assistance for energy efficient project.
2. Lane County shall encourage energy conservation in the development and of public facilities, services and utilities and in the development and use of electrical and communication systems.

3. Lane County shall establish programs when financially feasible to promote the stated goal through intergovernmental cooperation, to increase public awareness of the benefits of energy conservation and to revise existing programs concerning land use, transportation, existing and new building.

GOAL FOURTEEN: URBANIZATION

1. The County shall encourage new residential, commercial and industrial development to locate within existing incorporated cities or rural communities. Any growth outside Urban Growth Boundaries must:
   a. Be restricted to committed or developed areas including approved new development centers; or
   b. Under certain specified conditions set forth in this plan, industrial, commercial and residential development is appropriate outside of developed and committed areas provided a valid exception is taken and/or all Statewide Goal requirements are met.
   c. Any community designated in the plan that does not have an adequate Urban Growth Boundary, or any addition to such community that may be proposed, shall be justified by a valid exception pursuant to Statewide Goal 2, Part II.

   This and subsequent policies do not apply to the Eugene-Springfield Metropolitan Area, which is governed by the Metro Area Plan.

2. The County shall provide for orderly and efficient transition from rural to urban land use while insuring the supply of housing, employment, livability and other amenities, in order to accommodate the long-range growth of each city.

3. The County shall provide for a cooperative UGB management process between the County and cities in the County in the following:
   a. The establishment and periodic revision of urban growth boundaries and the planning and implementation of common policies and procedures within the boundaries;
   b. The planning and implementation of city policies for lands inside city boundaries which may effect the County.

4. The County shall continue to comply with the planning coordination requirements, and the "urban growth management program" requirements of the Oregon Land Conservation and Development Commission.

5. The County will seek agreement with each city to commonly determine the location of urban growth boundaries and the interim and long-term land use designations and public improvement project designations within the growth boundaries.

6. Each city is regarded as the logical and ultimate provider of urban services within its urban growth boundaries; Lane County will not approve any development nor encourage or abet the establishment of urban services or facilities within the city's urban growth boundary, which are contrary to city policy or agreement excepting establishment service districts.

7. It is the County's position that ultimate urban-level density within a city's urban growth boundary should occur only where all essential public facilities and services (water, sewer, etc.) are or will be shortly available. Cities are encouraged and expected to prepare and publish facilities plans and schedules for all facilities.

8. the County will encourage the orderly and logical annexation of territory to each city.

9. Any County approval of the division and/or development of land within a city's urban growth boundary will be consistent with provisions of the applicable city plan within the area. If necessary, the County may take one or more of the following actions to land outside the city's jurisdiction:
   a. On an interim basis, limiting the level of development to less than the planned urban density or intensity, based on interim standards to be adopted and published.
   b. Determining that the design and operation of an interim land use will allow for later conversion to full urban densities in an orderly and efficient manner (e.g., land divisions to be approved in such a way as to permit later redivision into greater and urban-level densities), and that the interim land use will not otherwise pre-empt the subject or other properties from the future orderly provision of urban services and facilities;
   c. Requiring that interim and long-term development be consistent with existing master sewer and/or water plans for the urban growth area;
   d. Requiring city service connection, where agreeable to the city and consistent with applicable law, and where consistent with approved master facility plans for the urban growth area.

10. Lane County will apply where appropriate applicable city public improvement standards within urban growth boundaries where it is determined that those standards are more rigorous than those of the County. Where city standards are not practicable, County approvals will be given in such a way as to permit each conversion in the future to city standards.

11. Use of utility easements and natural drainageways within the urban growth area shall be consistent with applicable plans, will have multiple uses where practicable and will be based on County-city agreement.

12. The County will provide each city the opportunity to review and comment upon County consideration of plans, ordinances, development proposals (zoning and land division), public improvement projects, sale of County lands and other similar matters of city interest which occur within the city's area of influence and/or urban growth boundary, via "joint agreements for planning coordinator" executed

with each city.

13. Lane County will expect to review city proposals for, or consideration of, matters of County interest through established procedures. Matters to be reviewed may include those listed above in Policy No. 12, plus other matters such as annexations, as governed by joint agreement.

14. Lane County shall attempt to achieve coordinated establishment approaches (including plan land use\public improvement approaches (including plan land use designations, development policies, zoning, etc.). Plan coordination may take one of the following forms:
    a. Co-adoption, with each city, of a common comprehensive plan;or
    b. Adoption of the city's comprehensive plan as a part of the County's plan(s); or
    c. Approval of any supplemental policies or procedures which will accomplish the intent of this section of the Policies, which may be mutually agreed upon by the County and each city.

15. Lane County shall regard itself as "caretaker" for lands within city UGBs but outside of city limits and will administer County land use and other regulations toward that objective, within the parameters established by the preceding Policies. Conflicts between city and County interpretations of plans or appropriate County actions shall be resolved temporarily in favor of County until the conflict is fully resolved through plan amendment or clarification, or other action.

16. Unincorporated communities shall be considered and treated as part of the County Plan with due consideration for community needs and values. Urban-level development requiring or ultimately likely to require urban services such as sewer and water systems shall not be approved unless the community itself, by public or private installation, can supply these services, and the development is in the form of an acceptable new development center proposal.

17. Within established UGB's, city plans ratified or adopted by the County are to be considered the governing land use documents, but do not pre-empt final County legal responsibilities or authority. Contract annexation agreements between cities and the County may modify this position as acceptable to both parties.

GOAL FIFTEEN: WILLAMETTE RIVER GREENWAY

1. Maintain and support continuation of existing uses within the Greenway Boundary.

2. Intensification and change of use of lands within the Greenway Boundary shall remain compatible with the protection, conservation and enhancement of the natural, scenic, historic, agricultural, economic and recreational qualities of the Willamette River Greenway Program.

3. Recognize that the Greenway consists of a multitude of resources and due to continued growth, 100 percent protection to all resources will never be realized.

4. Protect, conserve and preserve important economic uses such as, but not limited to, agriculture, sand and gravel, tourism and recreation, fish and wildlife, urban lands and timber within the Greenway.

5. Maintain sufficient water flows to support water uses such as municipal, agricultural, industrial, natural resources (i.e., fish, aquatic life, wildlife) and recreation within the Greenway.

6. Prioritize water quality management controls along the Coast Fork and the Main Stem, especially in the Metropolitan area.

7. Acquisitions for Greenway purposes must be consistent with noninterference or interruption of farm uses.

8. Recognize that ODOT cannot condemn for a scenic or use easements on lands devoted to farm use; however, easements may be given by owners of lands being used for farm purposes.

9. Protect water rights and access to the river for irrigation purposes.

10. Development shall be directed away from the river, to the greatest degree possible.

11. A setback line shall be established in order to protect, maintain, preserve and enhance the natural, scenic, historic and recreational qualities of the Greenway.

12. The partial harvest of timber shall be permitted beyond the vegetative fringes in areas not covered by a scenic easement when the harvest is consistent with an approved plan under the Forest Practices Act, or, if not covered by the FPA, then with an approved plan under the Greenway compatibility review provisions. Such a plan shall insure that the natural scenic qualities of the Greenway will be maintained to the greatest extent feasible or restored

within a brief period of time.

13. Active, zoned, or designated aggregate extraction and/or processing sites shall be protected from noncompatible uses which would preclude future utilization of the resource.

14. Where feasible, point bar removal shall be accommodated by temporary access points.

15. In assessing the impact which an extraction and/or processing operation has on the natural and cultural attributes of the Greenway, the County shall require (within its realm of authority) mining methods which reduce or mitigate adverse impacts, as well as considering the economic and other benefits which will accrue in both short and long term.

16. Aggregate operations occurring within the Greenway shall comply with the provisions of applicable state statutes and local zoning ordinances in regard to safety, operational standards, public review, reclamation and protection of Greenway values.

17. The relationship between the demand for the resource and the amount and location of land available for aggregate extraction and/or processing shall be closely monitored, so as to ensure the future availability of aggregate material in close proximity to urban areas and other points of use. Such monitoring shall be conducted in conjunction with the industry and state and local efforts.

18. Protect vegetation resources which are identified as having unique recreational, aesthetic, scientific or wildlife habitat values. Encourage acquisition of these areas or obtain a protective scenic easement.

19. The County shall require to the maximum feasible extent the protection of the vegetative fringe within the Greenway, and shall require the re-establishment of vegetative cover where it has been significantly removed during the land development process.

20. Conserve the rural character of the river bank as a primary objective within the Greenway.

21. Encourage a river-related mixture of industrial, commercial, residential and public land uses where appropriate in the Greenway.

22. In instances where a public agency has acquired productive farmlands or other resource lands as long-range reserve for recreational use, if possible, such property should be leased back for agricultural or other resource use until it is required for public purposes.

23. Provide and encourage use of public land within the Greenway.

24. Accommodate public access to the river and to public lands within the Greenway by:
    a. Controlled, clearly designated, access points;
    b. Establishment of an integrated system of safe river landings, hiking and cycle paths, and public roads leading in and out of the Greenway at strategic locations;
    c. Use of a limited number of access points, each with improved facilities, good roads and high-visibility connectors.

25. Provide appropriate levels of police protection in those areas subject to public use.

26. Encourage additional police security for private and publicly owned lands within the Greenway.

27. Protect, conserve or preserve the scenic and recreational qualities of the lands within the Greenway Boundary.

28. Public recreation use areas shall be located in or near the more populated urban areas and shall emphasize access to the river.

29. The sensitivity of lands within the Greenway shall determine the level of human activity.

30. Recreation development shall include a variety of river-oriented opportunities in urban areas but shall be limited in rural areas to those river-oriented recreation uses that are compatible with the sensitive character of the river and other important resources.

31. Consider and minimize the possibility that public recreation use might disturb adjacent private property owners.

32. Scenic easements shall not be acquired through the exercise of the power of eminent domain on lands in farm use.

33. Control vehicle access to the river.

34. Consider and adopt policies that would not hinder the physically handicapped from using public recreation facilities within the Greenway Boundary.

35. Emphasize public access to the river in the metropolitan area and other urban areas while discouraging upland access in rural areas.

36. Measures should be taken to minimize disturbance to private property, including the implementation of programs to eliminate trespass and vandalism on private lands and destruction of ecological fragile areas.

37. Mineral and aggregate extraction activities within the Willamette

Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with sections C.3.d. and C.3.i. of the Goal. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

PART III: "COASTAL RESOURCES MANAGEMENT PLAN" POLICIES

Adopted 6/19/80, Ord. 803

Revised 1/82, Ord. 862

Revised 3/16/82, Ord. 876

Revised 6/6/91, Ord. 1000

The policies listed on the following pages have been excerpted from the Lane County Coastal Resources Management Plan which explains the policies and defines how the policies should be used. Therefore, the Coastal Resources Management Plan must be used in conjunction with any application of the policies.

GOAL SIXTEEN: ESTUARINE RESOURCES

Natural

1. Log storage on existing sites should continue subject to the requirements of state and federal regulations. Log storage in the waters of the Siuslaw has been the practice of wood processing firms for many years. Storage and handling of logs by use of water is an integral part of the present facilities' manufacturing processes and is therefore water dependent. However, due to impacts of log storage in intertidal areas, Lane County recommends against expansion of existing sites or creation of new storage sites in the Natural MU.

2. Low-intensity grazing on high salt marshes is consistent within the capacity of the marsh to accommodate such use and retain significant natural characteristics.

3. Commercial clamming and fishing shall only be allowed to the extent that the productivity of the resource is not endangered. The Oregon Department of Fish and Wildlife shall be the proper consulting agency in this regard.

4. Riprap to protect structures existing prior to October 7, 1977, to protect unique natural resources, historical and archaeological values and public facilities such as bridge support structures, shall be allowed provided other protection measures less harmful to the estuary have been considered and found by the County not to be feasible. Short-term fills for temporary alterations are permissible, provided such alterations satisfy Goal 16 and Lane Code standards concerning such activities, and provided the estuarine areas impacted can be restored following removal of the fill. |All other fills, regardless of volume, are prohibited in this MU.

5. Provided they comply wit Goal 16 and Lane Code 16 provisions concerning the protection of the resource capabilities of the areas in which they are to be located, uses involving he maintenance and/or installation of public facilities (bridge crossing, tidegates, temporary alterations and other similar uses identified in the Goal) are appropriate within this Management Unit.

6. Temporary alterations are permitted in the Management Unit only to allow minor and reversible alterations to areas and resources that Goal 16 otherwise requires to be preserved or conserved. This exemption is limited to alterations in support of uses permitted by the Goal; it is not intended to allow uses which are not otherwise permitted by the Goal. A resource capabilities test shall e applied to temporary alteration proposals to ensure:
   a. That the short-term damage to resources is consistent with resource capabilities of the area; and

b. That the area and affected resources can be restored to their original condition.

Conservation

1. Log storage on existing sites is subject to the requirements of state and federal regulations. Log storage in the waters of the Siuslaw has been the practice of wood processing facilities for many years. Storage and handling of logs by use of water is an integral part of the present facilities' manufacturing processes and are therefore water dependent.

   Expanded or new log storage leases shall be allowed only if:

   1. It is determined that the storage is water dependent;
   2. A public need is demonstrated;
   3. No alternative upland locations are feasible;
   4. Adverse impacts are minimized as much as feasible;
   5. The storage meets all applicable state and federal regulations;
   6. The storage does not pre-empt long-established recreational use of the site; and
   7. Logs will not ground at low water.

2. Single-family, single-purpose piers are discouraged in favor of public, multiple-purpose or commercial piers. Mooring buoys, floating piers, launching ramps and dry-land storage are potential alternatives.

3. Filling, dredging and other activities which degrade natural estuarine values will be allowed only:

   a. If required for navigation or other water-dependent uses that require an estuarine location or if specifically allowed by the applicable management unit requirements of this goal; and
   b. If a need (i.e., a substantial public benefit) is demonstrated and the use or alteration does not unreasonably interfere with public trust rights; and
   c. If no alternative upland locations exist; and
   d. If adverse impacts are minimized.
   e. I in compliance with mitigation requirement of ORS 541.605 to 541.695 (Fill and Removal Law).

   Other uses and activities which could alter the estuary shall only be allowed if the requirements in (b).(c) and (d) are met.

4. Temporary alterations are permitted in this Management Unit only to allow minor and reversible alterations to areas and resources that Goal 16 otherwise requires to be preserved or conserved. This exemption is limited to alterations in support of uses permitted by the Goal; it is not intended to allow uses which are not otherwise

permitted by the Goal. A resource capabilities test shall be applied to temporary alteration proposals to ensure:

a. That the short-term damage to resources is consistent with resource capabilities of the area; and
b. That the area and affected resources can be restored to their original condition.

Normal maintenance dredging or existing facilities and dredging of minor channels between such facilities and the main Siuslaw River channel constitute minor estuarine alterations.

Development

1. New dredging projects, any project which requires filling of the estuary, or other degradation of natural biological values, shall be allowed only:

   a. if required for navigation or other water-dependent uses that require an estuarine location or if specifically allowed by the applicable management unit requirements of Goal 16; and
   b. if a need (i.e., a substantial public benefit) is demonstrated and the use or alteration does not unreasonably interfere with public trust rights; and
   c. if no feasible alternative upland locations exist; and
   d. if adverse impacts are minimized.
   e. if in compliance with mitigation requirements of ORS 541.605 to 541.695.

2. Dredge or fill activities, as otherwise approved, must be mitigated, if found to be subject to the mitigation requirement, by creation, restoration or enhancement of an estuarine area to maintain the functional characteristics and processes of the estuary such as its natural biological productivity, habitats and species diversity, unique features and water quality.

3. Maintenance dredging of the navigation channel, as authorized in the Siuslaw River Dredge Material Disposal Plan, is automatically approved and need not go through an impact assessment for each individual project.

4. Proposals must consider and not be detrimental to natural characteristics of value in the adjacent estuary.

5. Flood and erosion control structures such as jetties, bulkheads and seawalls, shall meet the requirements of Policy #1 and shall be designed and sited to minimize:

   (1) erosion or man-induced sedimentation in adjacent areas, and
   (2) other adverse impacts on water currents, water quality, and fish and wildlife habitat.

6. Temporary alterations are permitted in this management unit only to allow minor and reversible alterations to areas ad resources that Goal 16 otherwise requires to be preserved or conserved. This exemption is limited to alterations in support of uses permitted by the Goal; it is not intended to allow uses which are not otherwise permitted by the Goal. A resource capabilities test shall be applied to temporary alteration proposals to ensure:
   a. That the short-term damage to resources is consistent with resource capabilities of the area; and
   b. That the area and affected resources can be restored to their original condition.

GOAL SEVENTEEN: COASTAL SHORELANDS

Significant Natural Areas

1. Uses shall fall within Priority 1 of the General Priority Statement (page 43). No use shall be permitted within a Significant Natural Shorelands Management Unit unless that use is determined to be consistent with protection of natural values identified in the Coastal Resources Management Plan's description of the Management Unit.

2. Artificial bank stabilization shall be allowed only to protect structures existing as of October 7, 1977 and only after other methods of bank stabilization which are less destructive to the resource have been considered, or unless the unique value of the resource itself is in danger.

3. Dredge spoil disposal is appropriate only on the dunes in MU along the estuary, as indicated in the Siuslaw Dredged Material Disposal Plan.

4. Development shall not result in the clearance of natural vegetation in excess of that which is necessary for the actual structure(s), required access, fire safety requirements and the required septic or sewage disposal system. Parcels which exhibit vegetation removal shall be replanted as soon as possible.

5. Filling in coastal lakes adjacent to this MU is not allowed.

6. Timber harvesting activities shall be consistent with Forest Practices Act rules. Lane County recommends that timber harvest plans consider both scenic and biologic values of the MU.

   Where major marshes and significant wildlife habitat or riparian vegetation are identified by the Lane County Coastal Inventory on lands subject to forest operations governed by the Forest Practice Act, the act and forest practice rules administered by the Oregon Department of Forestry will be used to protect the natural values of these resources and to maintain riparian vegetation.

7. Land division The development of water-dependent commercial or industrial land uses, water-related land uses. and other similar land uses, shall be allowed only upon a finding by the governing body of the County Approval Authority that such uses satisfy a need, fulfill a substantial public benefit which cannot reasonably be accommodated at other upland locations. within rural areas acknowledged as developed or committed to development, or in urban or urbanizable areas and are compatible with identified shorelands values.

8. Development on lots less than 10 acres in size shall be prohibited.

Where lots less than 10 acres existed on the date of adoption of this report, development may occur if in conformance with the requirements of the parent zone and this Management Unit.

9. For any approved development on coastal lake or estuarine shoreland in this management unit, a minimum 100' building setback from the shoreline is required wherever practicable. Setback requirements on ocean shorelands in this MU will vary depending on the rate of erosion at the site and will require a County site review. Furthermore:
   a. A band of natural vegetation no less than one-half the width of the setback shall be left in natural vegetation.
   b. Existing lots which are too small to accommodate both the required management unit setback, the construction of a residence and other development requirements such as septic and replacement fields will be allowed to build in this setback zone following a County site inspection, providing clearance of vegetation on the remainder of the lot is kept to an absolute minimum, and other County requirements are met, and hazard to life and property is minimal and acceptable.

   c. Within the shoreside belt of natural vegetation, the following kinds of modifications are allowable:
      1) unsurfaced foot paths;
      2) removal of hazardous vegetation as unstable streambank trees or trees otherwise vulnerable to blowdown may allowed in unusual circumstances following review by the County or Oregon Department of Fish and Wildlife. Streambank trees, snag and shorefront brush are necessary for wildlife habitat.
      3) replanting of areas modified in "c." above or other areas which have been previously cleared.

10. Construction or expansion of single-family, single-purpose piers is discouraged in favor of multiple-use, public or commercial piers.

    Applicants for such single-purpose piers shall be required to demonstrate that no viable alternatives (cooperative use of existing piers, nearby public facilities, mooring buoys, etc.) exist before approval of construction. Docks and piers existing on the date of Plan adoption may be rebuilt (not expanded) if damaged or destroyed.

11. New development proposed of this management unit shall blend to the maximum degree feasible with the surrounding vegetation and topography in terms of color, form and location. Design and site shall be reviewed to ensure that visual harmony is achieved consistent with the purposes of the management unit.

12. The filling in of freshwater marshes within this MU is not allowed. Freshwater marsh areas are found south of Sutton Lake between the

two portions (MU 4) and in estuary shoreland's MUs 4 and 27.

13. Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

Prime Wildlife Area

1. Uses shall fall within Priority 1 of the General Priority Statement (page 43). "No use shall be permitted within a Prime Wildlife Shorelands Management Unit unless that use is determined to be consistent with protection of natural values identified in the Coastal Resources Management Plan's description of the Management Unit.

2. Artificial bank stabilization shall be allowed only in unusual circumstances where natural erosion processes are threatening critical wildlife habitat or structures existing on or before October 7, 1977, provided that natural bank stabilization methods have been considered. Riprap used for bank stabilization must meet Army Corps of Engineers strength, size an design criteria unless the County Engineer determines this to be unnecessary and inadvisable.

3. For any approved development in this MU, a minimum 50' horizontal setback from the shoreline of the estuary or coastal lakes is required. Ocean shoreland setback will vary depending on current rate of erosion and will require a site review. Implementation will include the following:
   a. Existing lots which are too small to accommodate both the required Management Unit setback, the construction of a residence and other development requirements such as septic and replacement fields which will be allowed to build in this setback zone following a County site inspection, providing clearance of vegetation on the remainder of the lot is kept to an absolute minimum and other County requirements are met.
   b. Within the 50' setback, 30' adjacent to the shore shall be left in natural vegetation. Brush may be removed from the remaining 20' if revegetated and, decks and similar structures may project into this area.
   c. Within the 30' of natural vegetation the following kinds of modifications are allowable:
      1) unsurface foot paths;
      2) removal of hazardous vegetation such as unstable streambank trees or trees otherwise vulnerable to blowdown may be allowed in unusual circumstances following review by the County or Oregon Department of Fish and Wildlife. Streambank trees, snags and shorefront brush are necessary for wildlife habitat.
      3) replanting of areas modified in "c." above or other areas which have been previously cleared.

4. Development shall not result in the clearance of natural vegetation in excess of that which is necessary for the actual structure(s), required access, fire safety requirements and the required septic or sewage disposal system. Parcels which exhibit vegetation-free areas suitable for development should utilize such areas for the building site where feasible. Areas of excessive vegetation removal shall be replanted as soon as possible.

5. State Fish and Wildlife biologists shall have a 14-day "review and comment" period to evaluate the impact of any development on critical habitats and to make suggestions concerning ways to avoid or mitigate identified adverse impacts.

6. Filling in coastal lakes adjacent to this MU in not allowed.

7. Development on lots less than five acres in size shall be prohibited. Where lots less than five acres existed on the date of adoption of this report, development may occur if in conformance with the requirements of the parent zone and this management unit.

8. Timber harvesting shall be consistent with Forest Practices Act rules. Lane County recommends that timber harvesting activities be allowed in the Prime Wildlife Area under Forest Practices Act rules after consultation with Oregon Department of Fish and Wildlife to determine a harvest plan which will result in the least impact on wildlife inhabiting the designated area.

   Where major marshes and significant wildlife habitat or riparian vegetation are identified by the Lane County Coastal Inventory on lands subject to forest operations governed by the Forest Practice Act, the act and forest practice rules administered by the Oregon Department of Forestry will be used to protect the natural values of these resources and to maintain riparian vegetation.

9. No dredge spoils deposition shall be allowed in the Prime Wildlife management unit.

10. Construction of expansion of single-family, single-purpose piers is discouraged in favor of multiple-use, public or commercial piers. Applicants for such single-purpose piers shall be required to demonstrate that no viable alternatives (cooperative use of existing piers, nearby public facilities, mooring buoys, etc.) exist before approval of construction. Docks and piers existing on the date of Plan adoption may be rebuilt (not expanded) if damaged or destroyed.

11. Land divisions The development of water-dependent commercial or industrial land uses, water-related land uses, and other similar land uses, shall be allowed only upon finding by the governing body of the County Approval Authority that such uses satisfy a need, fulfill a substantial public benefit which cannot reasonably be

accommodated at other upland locations, within rural areas acknowledged as developed or committed to development, or in urban or urbanizable areas and are compatible with identified shoreland values.

12. The filling in of freshwater marshes within this management unit is not allowed. Freshwater marsh areas are found within Estuarine shorelands MU 21 opposite the east end of Duncan Island, in section 18-11-12, and within Woahink Lake shorelands MU 2 (19-12-11) and Siltcoos Lake MU 4 (19-11-19 and 30) and MU 5 (19-12-35). Smaller freshwater marsh areas are also found on Siltcoos Lake within MU 5 (19-12-25).

13. Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

Natural Resources Conservation

1. Uses shall fall within, and respect, Priorities 1-4 of the General Priority Statement (page 43).

2. Dredge spoil disposal must provide adequate run-off protection and, whenever possible, maintenance of a riparian strip along the water. Those sites adopted as part of the Siuslaw River Dredged Material Disposal Plan are automatically approved.

3. Artificial bank stabilization shall be used only to protect public and private roads, bridges or railroads, or when natural erosion processes are threatening a structure which existed on October 7, 1977.

4. Construction or expansion of single-family, single-purpose piers is discouraged in favor of multiple-use, public or commercial piers. Mooring buoys, floating piers, launching ramps and dryland storage are potential alternatives. If this MU exists adjacent to a natural estuarine MU, no pier development shall be allowed. Recently destroyed or damaged piers may be replaced if destroyed.

5. Filling in coastal lakes adjacent to this MU shall be allowed only in very rare instances and after a complete study of potential physical or biological impacts upon the lake. The cumulative effects of all such fills shall be considered. Positive benefits must outweigh negative effects.

6. Forestry and agricultural practices shall take place in such a manner as to retain the flexibility of future shore land uses and to maintain the natural integrity of the estuary.

   Where major marshes and significant wildlife habitat or riparian vegetation are identified by the Lane County Coastal Inventory on lands subject to forest operations governed by the Forest Practice

Act, the act and forest practice rules administered by the Oregon Department of Forestry will be used to protect the natural values of these resources and to maintain riparian vegetation.

7. Land divisions. The development of water-dependent commercial or industrial land uses, water-related land uses, and other similar land uses, shall be allowed only upon a finding by the governing body of the County Approval Authority that such uses satisfy a need, fulfill a substantial public benefit which cannot reasonably be accommodated at other upland locations, within rural areas acknowledged as developed or committed to development, or in urban or urbanizable area and are compatible with identified shorelands values.

8. For any approved development on coastal lake or estuarine shoreline in this MU, a minimum 50' building setback from the shoreline is required. Setback requirements on ocean shorelands in this MU will vary depending on the rate of erosion in the area and will be determined by County site review. Furthermore:

   a. Within the 50' setback, 30' adjacent to the shore shall be left in natural vegetation. Brush may be removed from the remaining 20' if revegetated and, decks and similar structures may project into this area.
   b. Existing lots which are too small to accommodate both the required management unit setback, the construction of a residence and other development requirements such as septic and replacement fields will be allowed to build in this setback zone following a County site inspection providing clearance of vegetation on the remainder of the lot is kept to an absolute minimum, and other County requirements are met and hazard to life and property in minimal and acceptable.
   c. Within the 30' of natural vegetation, the following kinds of modifications are allowable:
      1) Unsurfaced foot paths;
      2) Removal of hazardous vegetation such as unstable streambank trees or trees otherwise vulnerable to blowdown may be allowed in unusual circumstances following review by the County or Oregon Department of Fish and Wildlife. Streambank trees, snags and shorefront brush are necessary for wildlife habitat.
      3) Replanting of areas modified in "c." above or other areas which have been previously cleared.

9. The District Forester of the Oregon Department of Forestry shall have a 14-day "review and comment" period to evaluate the impact of development proposed on lands zoned for timber production within the management unit. The ODF may make suggestions concerning ways to avoid or mitigate adverse impacts.

10. Only developments and activities which do not pose a threat to life

or property from land instability, erosion or other natural hazards shall be allowed. Where the property is zoned for timber production, it is the responsibility of ;the Forest Practice Act to ensure that timber harvest activities pose no hazard to life or property.

11. Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

Residential Development

1. Uses shall fall within, and respect, Priorities 1 and 4 of the General Priority Statement (page 43).

2. A minimum building setback of 50' from the shoreline of coastal lakes or estuaries shall be required. The shoreward 30' of this setback area shall be maintained in natural vegetation wherever currently existing. Where not presently existing, it should be encouraged to develop. Setback needs along ocean shorelands will vary due to rate or erosion in the area and will require a County site review. Furthermore:

   a. Existing lots which are too small to accommodate both the required management unit setback, the construction of a residence and other development requirements such as septic and replacement fields will be allowed to build in this setback zone following a County site inspection providing clearance of vegetation on the remainder of the lot is kept to an absolute minimum, and other County requirements are met, and hazard to life and property is minimal and acceptable.
   b. Within the shoreside belt of natural vegetation, the following kinds of modifications are allowable:
      1) unsurfaced foot paths;
      2) removal of hazardous vegetation such as unstable streambank trees or trees otherwise vulnerable to blowdown may be allowed in unusual circumstances following review by the County or Oregon Department of Fish and Wildlife. Streambank trees, snags and shorefront brush are necessary for wildlife habitat.
      3) replanting of areas modified in "c." above or other areas which have been previously cleared.

3. Construction or expansion of single-family, single-purpose piers is discouraged in favor of multiple-purpose, public or commercial piers. If destroyed, existing or previously existing docks or piers may be rebuilt but not expanded.

4. Dredge soil disposal sites approved as part of the Siuslaw River Dredged Material Disposal Plan are automatically approved and need no additional review.

5. Filling in coastal lakes adjacent to this MU is not allowed.

6. Land divisions The development of water-dependent commercial or industrial land uses, water-related uses, and other similar land uses, shall be allowed only upon a finding by the governing body of the County Approval Authority that such uses satisfy a need fulfill a substantial public benefit which cannot reasonably be accommodated at other upland locations, within rural areas acknowledged as developed or committed to development, or in urban or urbanizable areas and are compatible with identified shorelands values.

7. Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

Mixed Development

1. Uses shall respect the priorities set out in the General Priority statement (page 43 & 44).

2. All lands within this management unit which have the potential for water-dependent commercial and industrial and water-related uses have priority over other uses within this management unit. However, new water-related and water-dependent development in rural shoreland areas shall be allowed only upon a finding by the governing body of the County that such uses cannot be accommodated within an urban or urbanizable area or within areas which are acknowledged as developed or committed to development.

3. Short-term economic gain or convenience in development shall be evaluated in relation to potential long-term effects on the estuary and shoreland, as well as the long-term economy of the area.

4. Promotion of visual attractiveness shall be a consideration in any commercial or industrial development.

5. Natural riparian vegetation should be maintained or encouraged to provide erosion control, bank stabilization, aesthetic quality and to maintain water quality and temperature, except where maintenance of vegetation would preclude use of the site for a water-dependent use and removal will not be detrimental to erosion control, bank stabilization or water quality.

6. Construction or expansion of single-family, single-purpose piers is discouraged in favor of multiple-use, public or commercial piers. If destroyed, existing or previously existing docks and piers may be rebuilt but not expanded.

7. Dredge spoil disposal sites which were approved as part of the Siuslaw River Dredged Material Disposal Plan are automatically approved and need no additional review.

8. Filling in coastal lakes adjacent to this MU is allowed only to protect water-dependent uses and only after a complete study of the potential physical or biological impacts upon the lake. Cumulative effects of all such fills shall be considered.

9. New residential development shall be permitted within this Management Unit only on parcels determined to be unsuited to water-dependent or water-related uses and only if consistent with the parent zoning district.

10. Land divisions The development of water-dependent commercial or industrial land uses, water-related land uses, and other similar land uses, shall be allowed only upon a finding by the governing body of the County Approval Authority that such uses satisfy a need, fulfill a substantial public benefit which cannot reasonably be accommodated at other upland locations, within rural areas acknowledged as developed or committed to development, or in urban or urbanizable areas and are compatible with identified shorelands values.

11. Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

GOAL EIGHTEEN: BEACHES AND DUNES

General Policies

1. Ensure the protection and conservation of coastal beach and dune resources.

2. Prevent economic loss by encouraging development consistent with the natural capability of beach and dune landforms.

3. Provide for clear procedures by which the natural capability of dune landforms can be assessed prior to development.

4. Prevent cumulative damage to coastal dune resources due to the incremental effects of development.

5. Protect areas of scenic, scientific or biological importance, significant wildlife habitat, and other critical environmental areas through use of appropriate underlying zoning.

6. When federal lands are converted to nonfederal ownership, plan and zone designations shall become effective.

Beaches

1. Development on the beach is not allowed, with the exception of certain features such as necessary jetties or beachfront protective structures.

2. Permits for beachfront protective structures shall be issued only for those developments that existed on January 1, 1977. Criteria for the issuance of such permits shall include, at least, that:

   a. visual impacts are minimized,
   b. necessary public access to the beach is maintained,
   c. negative impacts on adjacent property are minimized as much as possible,
   d. long-term or recurring costs to the public are avoided, and
   e. riprap materials must meet Army Corps of Engineers strength and design standards.

3. No sand mining shall be allowed on the beach.

4. Certain access points to beaches shall be closed to off-road vehicle traffic seasonally or temporarily upon findings by the appropriate agency that such closure is necessary.

5. Driftlog removal should be limited.

6. Access to the two documented sites of snowy plover nesting habitat at the mouths of Sutton Creek and Siltcoos River should be

prohibited during the nesting season (April - June).

Foredune

1. Because the foredune is a highly impermanent landform and subject to a number of extreme hazards, no permanent development will be allowed here. Allowable development may include temporary raised boardwalks which provide beach access and avoid vegetation trampling.

2. Access to the two documented sites of snowy plover nesting habitat at the mouths of Sutton Creek and Siltcoos River should be prohibited during the nesting season (April - June).

3. Breaching of foredunes shall be allowed only to replenish sand supply in interdune areas or on a temporary basis in an emergency and only if the breaching and restoration after breaching is consistent with sound principles of conservation.

4. When allowed through the LCDC exception process, any residential infilling shall be required to maintain at least a 50-foot horizontal setback from the mean high tide line. A County site review shall be required.

5. Due to the extreme porosity of the sand (and in interdune areas, a high groundwater table), leaks in buried fuel oil or gasoline tanks could present a serious threat to the quality of the groundwater in the dunal aquifer. No new buried fuel tanks shall be permitted without a County inspection to determine proper placement and design standards so that water resources are protected.

Foredune

1. Because of ;the highly unstable nature of these landforms, development will be prohibited where they occur.

2. Recreational vehicular traffic should be prohibited on any County active sand dune areas north of the Siuslaw River.

Recently Stabilized Dune Forms

1. Development shall result in the least topographic modification of the site as is reasonable and possible.

2. Development shall not result in the clearance of natural vegetation in excess of that which is necessary for the actual structures, required access, fire safety requirements and the required septic or sewage disposal system. Parcels which exhibit vegetation-free areas suitable for development should utilize such areas for the building site where feasible. Areas which exhibit excessive vegetation removal shall be replanted as soon as possible.

3. Sand stabilization is required of the developer or owner: (1) using temporary stabilization techniques during all construction phases, and (2) through an ongoing maintenance program, including preliminary revegetation with beachgrass (or other species recommended by a recognized expert), fertilization and later plantings of appropriate secondary successional species at the appropriate time. Successional species reduce the extreme fire hazard associated with mature beachgrass.

4. In assessing new development, the cumulative effect of the combination of existing development, along with that proposed, has to be considered in assessing the feasibility of the new development.

5. All development proposals for recently stabilized sand dune areas, except proposals for minimum development, must be accompanied by a Lane County Sand Dune Hazards Checklist. Results of the completed Checklist will determine any need for a further Site Investigation Report.

6. Due to the extreme porosity of the sand (and in interdune areas, a high groundwater table), leaks in buried fuel oil or gasoline tanks could present a serious threat to the quality of the groundwater in the dunal aquifer. No new buried fuel tanks shall be permitted without a County inspection to determine proper placement and design standards so that water resources are protected.

Interdune Forms

1. Due to the severe limitations of the near shore deflation plain, and in order to protect the quality of the groundwater and the dunal aquifer, development, except for limited minor development, shall be prohibited.

2. Due to the extreme porosity of the sand (and in interdune areas, a high groundwater table) leaks in buried fuel oil or gasoline tanks could present a serious threat to the quality of the groundwater in the dunal aquifer. No new buried fuel tanks shall be permitted without the County inspection to determine proper placement and design standards so that water resources are protected.

3. To assure protection of groundwater and the dunal aquifer, nonsewered residential and other development proposed for interdune areas, other than near shore deflation plain:
   a. Shall require a staff investigation (Sand Dune Hazards Check-List) and, if deemed necessary by the Lane County Planning Department, a Site Investigation Report;
   b. Shall not result in the clearance of existing vegetation in excess of that which is necessary for the dwelling unit, required access, fire safety requirements and the required

septic or sewage disposal system. If possible, septic drain lines should be placed among existing vegetation to avoid unnecessary vegetation removal. Parcels which exhibit vegetation-free areas should utilize such areas for the building site where feasible. Sites which experience excessive vegetation removal shall be replanted as soon as possible.

Groundwater

1. Wells designed for municipal or community water supply purposes shall be sited such that bogs with plant assemblages dependent on water tables near the surface are not drained.

GOAL NINETEEN: OCEAN RESOURCES

1. Lane County shall participate fully in the review and decision-making process of state and/or federal agencies where ocean resources offshore of Lane County territory are likely to be affected.

2. Lane County shall cooperate with state and/or federal agencies in developing the necessary information, including inventories and impact assessment, to allow these agencies to properly evaluate proposed actions and make decisions about whether or not to allow such actions.

3. The County should consult with state and/or federal agencies having responsibilities under this Goal if actions are proposed within the County (and for which the County has all or partial approval authority) which are likely to impact the quality of ocean resources in the area.

4. The County should build and maintain an "information bank" consisting of state or federally generated information about ocean resources, using such information as it is supplied to the County. This information should be made available to County decision-makers in evaluating proposals which may affect ocean resources.

5. Programs or regulations arising from County compliance with LCDC Coastal Goals 16 through 18 should be cognizant of, and seek to enhance the quality of, ocean resources as defined in Goal 19.

IN THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY, OREGON

ORDINANCE NO. 1-84

IN THE MATTER OF ENACTING CHAPTER 16 OF THE LANE CODE AS THE RURAL DEVELOPMENT CODE AND ADOPT THE FOLLOWING NEW ZONES AS ELEMENTS OF THE RURAL COMPREHENSIVE PLAN:

a. FOREST ZONES
   (1) Nonimpacted Forest Lands (F-1, RCP)
   (2) Impacted Forest Lands (F-2, RCP)

b. AGRICULTURAL ZONE
   (1) Exclusive Farm Use - 25 acres (E-25, RCP), 30 acres (E-30, RCP), 40 acres (E-40, RCP), 60 acres (E-60, RCP)

c. RESOURCE ZONES
   (1) Natural Resource (NR--RCP)
   (2) Park and Recreation (PR-RCP)
   (3) Quarry and Mining (QM-RCP)
   (4) Sand and Gravel (SG-RCP)
   (5) Controlled Processing (/CP-RCP)

d. MARGINAL LAND ZONE
   (1) Marginal Lands - 10 acres (ML-10, RCP), 20 acres (ML-20, RCP)

e. COMMERCIAL ZONES
   (1) Limited Commercial (C-1, RCP)
   (2) Neighborhood Commercial (C-2, RCP)
   (3) Commercial (C-3, RCP)
   (4) Rural Commercial (C-R, RCP)

f. INDUSTRIAL ZONES
   (1) Limited Industrial (M-1,RCP)
   (2) Light Industrial (M-2, RCP)
   (3) Heavy Industrial (M-3, RCP)

g. AIRPORT ZONES
   (1) Airport Operation (AO-RCP)
   (2) Airport Safety District (/AS-RCP)
   (3) Commercial Airport Safety District (/CAS-RCP)

) h. RESIDENTIAL ZONES
) (1) Suburban Residential (RA-RCP)
) (2) Garden Apartment (RG-RCP)
) (3) Rural Residential - 1 acre (RR-1-RCP), 2 acres (RR-2-RCP), 5 acres (RR-5-RCP), 10 acres (RR-10-RCP)

) i. COASTAL OVERLAY ZONES
) (1) Shoreland Zones
) (a) Prime Wildlife (/PW-RCP)
) (b) Significant Natural (/SN-RCP)
) (c) Natural Resource (/NRC-RCP)
) (d) Residential Development (/RD-RCP)
) (e) Mixed Development (/MD-RCP)
) (f) Dredged Materials (/DMD-RCP)
) (2) Estuary Zones
) (a) Natural Estuary (/NE-RCP)
) (b) Conservation Estuary (/CE-RCP)
) (c) Development Estuary (/DE-RCP)

) j. FLOOD HAZARD AREAS OVERLAY ZONE
) (1) Floodplain Combining Zone (/FR-RCP)

) k. DESTINATION RESORT ZONE
) (1) Destination Resort (DR/RCP)

) l. HISTORIC RESOURCE ZONE
) (1) Historic Resource Combining District ((HR/RCP)

) m. GREENWAY
) (1) Greenway Development Permit (GP/RCP)

INSERT THESE PAGES

All of Chapter 16 (new Chapter)

Said pages are attached hereto and incorporated herein by reference. The purpose of the new Chapter is to adopt a Development Code for Rural Lane County.

If any section, subsection, sentence, clause, phrase or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions hereof.

The pending applications which on the effective date hereof have progressed through at least one public hearing shall be completed under procedures applicable at the time of said public hearing. All other applications shall be processed pursuant to these new provisions.

The application of Chapter 10 to rural Lane County repealed by this Ordinance shall remain in force to authorize prosecution of persons in violation thereof prior to the effective date of this Ordinance.

While not part of this Ordinance, the Board of County Commissioners adopt the Legislative Findings set forth in attached Exhibit "A" to explain and support this action.

Enacted this 29th day of February, 1984.

Chair, Lane County Board of Commissioners

Recording Secretary for this Meeting of the Board

Chapter 16

LANE COUNTY LAND USE AND DEVELOPMENT CODE

INTRODUCTORY AND GENERAL PROVISIONS

16.001 Authority. This Chapter is enacted pursuant to the provisions of ORS Chapters 92, 197, 203, 215 and the Lane County Home Rule Charter.

16.002 Title. This Chapter shall be known as the Lane County Land Use and Development Code.

16.003 Purpose. This Chapter is designed to provide and coordinate regulations in Lane County governing the development and use of lands to implement the Lane County Rural Comprehensive Plan. To these ends, it is the purpose of this Chapter to:

(1) Insure that the development of property within the County is commensurate with the character and physical limitations of the land and, in general, to promote and protect the public health, safety, convenience and welfare.

(2) Protect and diversify the economy of the County.

(3) Conserve the limited supply of prime industrial lands to provide sufficient space for existing industrial enterprises and future industrial growth.

(4) Conserve farm and forest lands for the production of crops, livestock and timber products.

(5) Encourage the provision of affordable housing in quantities sufficient to allow all citizens some reasonable choice in the selection of a place to live.

(6) Conserve all forms of energy through sound economical use of land and land uses developed on the land.

(7) Provide for the orderly and efficient transition from rural to urban land use.

(8) Provide for the ultimate development and arrangement of efficient public services and facilities within the County.

(9) Provide for and encourage a safe, convenient and economic transportation system within the County.

(10) Protect the quality of the air, water and land resources of the County.

(11) Protect life and property in areas subject to floods, landslides and other natural disasters and hazards.

(12) Provide for the recreational needs of residents of Lane County and visitors to the County.

(13) Conserve open space and protect historic, cultural, natural and scenic resources.

(14) Protect, maintain, and where appropriate, develop and restore the estuaries, coastal shorelands, coastal beach and dune area and to the conserve the nearshore ocean and continental shelf of Lane County.

16.004 Scope and Compliance.

(1) A tract of land may be used or developed, by land division or otherwise, and a structure may be used or developed, by construction, reconstruction, alteration, occupancy otherwise, only as this Chapter permits.

(2) In addition to complying with the criteria and other provisions within this Chapter, each development shall comply with the applicable standards adopted and published by the Director.

(3) The requirements of this Chapter apply to the person undertaking a development or the user of a development and to the person's or user's succesors in interest.

16.005 Use of a Development. A development may be used only for a lawful use. A lawful use is a use that is not prohibited by law or which is nonconforming pursuant to LC 16.251 below of this Chapter.

16.006 Compliance Required.

(1) No person shall engage in, or cause to occur, a development which does not comply with the Lane County Land Use and Development Chapter.

(2) A development shall be approved by the Director, or other Approving Authority, according to the provisions of this Chapter.

(3) Unless appealed, a decision on any application shall be final upon expiration of the period provided for filing an appeal or, if appealed, upon rendering of the decision by the reviewing body.

16.007 Compliance With Rural Comprehensive Plan. In the event of any conflict between any provision of this Chapter and provisions of the Rural Comprehensive Plan of Lane County, or duly adopted portions, elements or amendments of such Plan, the more restrictive provisions shall prevail.

16.008 Interpretation. When in the administration of this Chapter there is doubt regarding the intent of the Chapter or the suitability of uses not specified, the Director shall request an interpretation of the provision by the Board of County Commissioners. The Board shall issue an interpretation to resolve the doubt, but such interpretation shall not have the effect of amending the provisions of this Chapter. Any interpretation of the Chapter shall be deemed an administrative action and shall be based on the following considerations:

(a) The Lane County Comprehensive Plan.

(b) The purpose and intent of the Chapter as applied to the particular section in question.

(c) The opinion of the County Counsel.

Copies of such interpretations shall be indexed and kept on file in the Department and may be reviewed by the public upon request.

16.009 Restrictiveness. Where the conditions imposed by a provision of this Chapter overlap, the provisions which are more restrictive shall govern.

16.010 Severability. If any section, paragraph, subsection, clause, sentence or provision of this Chapter shall be adjudged by any court of competent jurisdiction to be unconstitutional or invalid, such judgment shall not affect, impair, invalidate or nullify the remainder of this Chapter, and the effect thereof shall be confined to the section, paragraph, subsection, clause, sentence or provision immediately involved in the controversy in which such judgment or decree shall be rendered, it being the intent of the governing body to enact the remainder of this Chapter notwithstanding the parts so declared unconstitutional or invalid. Further, should any section, paragraph, subsection, clause, sentence or provision of this Chapter be judicially declared unreasonable or inapplicable to a particular premises or to a particular use at any particular location, such declaration or judgment shall not affect, impair, invalidate or nullify such section, paragraph, subsection, clause, sentence or provision as to any other premises or use.

16.011 Introductory Provisions. In order to achieve the purposes outlined in LC 16.003, and to assure that the development and use of land in Lane County conforms to the Rural Comprehensive Plan, zone classifications have been established for all unincorporated areas outside of adopted urban growth boundaries and within Lane County. These zones specify regulations for the use of land and property development standards, and use applied by boundaries indicated on the Lane County Rural Comprehensive Plan Zoning Maps.

Attach 5 - Page 6

16.012 Zone Classifications. For the purpose of this Chapter of Lane Code, the following zones are hereby established:

Zone Classification	Abbreviation	Section No.
Nonimpacted Forest Lands	F-1, RCP	16.210
Impacted Forest Lands	F-2, RCP	16.211
Exclusive Farm Use	E-RCP	16.212
Natural Resource	NR-RCP	16.213
Marginal Lands	ML-RCP	16.214
Park and Recreation	PR-RCP	16.215
Quarry and Mining Operations Combining	/QM-RCP	16.216
Sand, Gravel and Rock Products	SG-RCP	16.217
Sand, Gravel and Rock Products Processing	/CP-RCP	16.218
Public Facility	PF-RCP	16.219
Limited Commercial	C-1, RCP	16.220
Neighborhood Commercial	C-2, RCP	16.221
Commercial	C-3, RCP	16.222
Rural Commercial	C-R, RCP	16.223
Limited Industrial	M-1, RCP	16.224
Light Industrial	M-2, RCP	16.225
Heavy Industrial	M-3, RCP	16.226
Suburban Residential	RA-RCP	16.229
Garden Apartment Residential	RG-RCP	16.230
Rural Residential	RR-RCP	16.231
Destination Resort	DR-RCP	16.232
Historic Structures or Sites Combining	/H-RCP	16.233
Natural Estuary	/NE-RCP	16.234
Conservation Estuary	/CE-RCP	16.235
Development Estuary	/DE-RCP	16.236
Significant Natural Shorelands Combining	/SN-RCP	16.237
Prime Wildlife Shorelands Combining	/PW-RCP	16.238
Natural Resources Conservation Combining	/NRC-RCP	16.239
Residential Development Shorelands Combining	/RD-RCP	16.240
Shorelands Mixed Development Combining	/MD-RCP	16.241
Dredge Material/Mitigation Site Combining	/DMS-RCP	16.242
Beaches and Dunes Combining	/BD-RCP	16.243
Floodplain Combining	/FP-RCP	16.244
Commercial Airport Safety District	/CAS-RCP	16.245
Airport Safety District	/AS-RCP	16.246
Airport Operation	AO-RCP	16.247

16.013 Location of Zones. The boundaries of the zones indicated on the Lane County Zoning Maps are hereby adopted by reference.

16.014 Plan Designation and Zoning Maps.

(1) The Plan Designation and Zoning Maps shall consist of a set of base maps and detailed map sheets. The base maps will cover the entire County and will indicate plan designation and zoning where an entire section is in a single designation and zone. Where more than one plan designation and zone is used within a section, the zoning shall be shown on a detailed map sheet and the base map shall reference the detailed map sheet. The Flood Insurance Rate Maps (FIRM) and Flood Hazard Boundary Maps shall constitute the zone maps for the /FP/RCP zone.

(2) Final maps sheets (i.e., the maps actually adopted) will be 8-1/2 x 14 inches overall. Working maps may be drawn at a larger size and reduced to produce a final map. Scale of the final maps will adhere to a standard engineer's scale to the maximum extent feasible, however, this shall not be an absolute requirement. A graphic representation of map scale must be shown on each map sheet. Final maps are to be on durable material and be of sufficient contrast to allow high quality reproduction through microfilming or standard office equipment.

(3) Each map sheet shall contain the following information:

(a) Sheet number.

(b) Scale.

(c) North Point.

(d) Adoption ordinance number, effective date and file reference number.

(e) Revision number, ordinance or order number and effective date of map amendment.

(f) Title "Lane County Official Plan Designation and Zoning Map".

(4) Base map sheets will be numbered sequentially (i.e., 1, 2, 3, etc.). Detailed map sheets will be numbered with the same numbering system used by the County Assessor (i.e., township, range, section, 1/4 section, 1/4 1/4 section). When two sections are shown on the same sheet, that sheet will be indentified by both County Assessor map numbers (i.e, 17-04-06/17-04-07.

(5) The exterior boundaries of the individual detailed map sheets shall be determined by the polygons used by the County Geographic Data System Parcel File to represent the properties within the sections being displayed.

(6) To the maximum extent feasible, plan designation and zone boundaries shall follow features recognizable or reproducible line preference shall be given to going from a known point to a known point (i.e., property corner, section corner, etc.). In the event a zone boundary does not or cannot conform to the above, angle points and intersection points of that boundary shall be annotated

with the coordinates of the points or with the distance and bearing of the boundary.

16.015 Amendments to the Lane County Plan Designation and Zoning Maps.

(1) All amendments to the Lane County Zoning Maps shall be made by Ordinance or Order of the Approval Authority as specified in this Chapter of Lane Code.

(2) The Lane County Plan Designation and Zoning Maps shall be amended by substituting new map sheets for existing map sheets, adding new map sheets, or removing existing map sheets.

(3) Each time a map sheet is added to or substituted for an existing map sheet in the Plan Designation and Zoning Map, that action shall be indicated by placing a revision number in parenthesis following the map sheet number. The revision numbers will represent the sequential changes made to that sheet as follows:

Original Map Sheet	17-04-06/17-04-07
1st Revision	17-04-06/17-04-07(1)
2nd Revision	17-04-06/17-04-07(2)
New Map Sheet Added	18-05-06/18-05-07(1)

16.020 Interim Plan Designation and Zoning Maps. For legislative plan and zone adoption or amendment proceedings, the maps initially adopted may be on regular paper (8 1/2" x 11"). In addition, CPR change request summaries may be used to modify these maps. Upon adoption, the County shall have 90 days to adopt Plan Designation and Zoning Maps in conformity with LC 16.014 above.

16.090 Definitions. For the purpose this Chapter, certain abbreviations, terms, phrases, words and their derivatives shall be construed as specified in this Chapter. Words used in the singular include the plural and the plural the singular. Words used in the masculine gender include the feminine and the feminine the masculine. Where terms are not defined, they shall have their ordinary accepted meanings within the context with which they are used. Webster's Third New International Dictionary of the English Language, Unabridged, Copyright 1961, shall be considered as providing ordinary accepted meanings.

Acceptance. Received by and considered by the Director as sufficiently complete to begin processing according to the application or appeal review procedures of this Chapter.

Accessory. Incidental, appropriate and subordinate to the main use of a tract or structure.

Agriculture. Synonymous with definition of "farm use".

Agricultural Building. A structure designed and constructed to house farm implements, hay, grain, poultry, livestock or other horticultural products. This structure shall not be a place of human habitation or a place of employment where agricultural products are processed, treated or packaged; nor shall it be a place used by the public.

Alter or Alteration. Any change, addition or modification in use construction or occupancy.

Amendment, Minor. A change to a preliminary plan, plat or map which:

(1) Does not change the number of lots or parcels created by the subdivision or partition;

(2) Does not "substantially enlarge or reduce" the boundaries of subdivided or partitioned area;

(3) Does not change the general location or amount of land devoted to a specific land use; or

(4) Includes only minor shifting of the proposed parcel or lot lines, location of buildings, proposed public or private streets, pedestrian ways, utility easements, parks or other public open spaces, septic tank drainfield locations and well locations.

Amendment, Major. A change to preliminary plan, plat or map which is not a minor amendment.

Animal Hospital. A place where animals or pets are given medical or surgical treatment and the boarding of animals is limited to short-term care incidental to the hospital use.

Appearance. Submission of testimony or evidence in the proceeding, either oral or written. Appearance does not include a name or address on a petition.

Approval Authority. A person, or a group of persons, given authority by Lane Code to review and/or make decisions upon certain applications according to the review procedures of Lane Code Chapter 14.

Approximate Flood Hazard Study Area. Flood hazard areas as shown on the Federal Flood Hazard Boundary Maps where base flooding elevations have not been determined.

Aquaculture. The raising, feeding, planting and harvesting of fish, shell fish or waterborne plants and associated facilities necessary for the use.

Area. The surface included within any set of lines which may be further defined in square feet or acres, exclusive of County or local access - public street.

Area of Flood Hazard. The land in the floodplain within a community subject to a one percent chance of flooding in any given year.

Base Flood. A flood that has a one percent chance of being equaled or exceeded in any given year.

Beach. Gently sloping area of loose material (e.g., sand, gravel and cobbles) that extends landward from the low waterline to the uppermost line of wave and tidal action.

Bed and Breakfast Accommodation. An accessory use to be carried on within a structure designed for and occupied as a single-family dwelling in which no more than two sleeping rooms are provided on a daily or weekly period, not to exceed 29 consecutive days, for the use of travelers or transients for a charge or fee. Provision of a morning meal is customary as implied by title. Bed and Breakfast shall be considered a Home Occupation where not specifically listed as a permitted or conditionally permitted use.

Board. Board of County Commissioners of Lane County.

Boarding of Horses. The boarding of horses for profit shall include the following:

(1) The stabling, feeding and grooming for a fee, or the renting of stalls for the care of horses not belonging to the owner of the property; and

(2) Related facilities, such as training arenas, corrals and exercise tracks.

The boarding of horses for profit does not include the following:

(1) The mere pasturage of horses or the boarding of horses not owned by the property owner for the purpose of breeding with the owner's stock.

(2) The incidental stabling of not more than four horses.

(3) The boarding of horses for friends or guests where no charge is made.

(4) Equestrian activities when the raising, feeding, training or grooming of horses is a farm use by the property owner of the land qualifying for farm assessment under regulations of the State Department of Revenue.

Boarding House. A dwelling or part thereof, in which lodging is provided by the owner which equals or exceeds the limitations of a bed and breakfast accommodation.

Building. The terms "building" and "structure" shall be synonymous, and shall mean that which is framed, erected, constructed or placed to stand temporarily or permanently on a tract of land. This definition shall specifically include a mobile home and accessories thereto. Driveways or walks not more than six inches higher than the ground on which they rest shall not be considered buildings.

Building Site. That portion of the lot, parcel or unpartitioned or unsubdivided tract of land upon which the building appurtenances are to be placed, or are already existing, including adequate areas for sewage disposal, light, air clearances, proper drainage, appropriate easements and, if applicable, other items required by the Lane Code.

Camp. An area designed for organizational recreation which may include facilities such as; swimming pools, meeting halls and indoor shelters for recreation.

Campground. An area designed for short-term recreational purposes and where facilities, except commercial activities such as grocery stores and laundromats, are provided to accommodate that use. Space for tents, campers, recreational vehicles and motor homes are allowed and permanent open air shelters (adirondacks) may be provided on the site by the owner of the development.

Camping Vehicle Park. Synonymous with definition of Recreational Vehicle Park.

Cemetery. Land used or intended to be used for the burial of the dead and dedicated for cemetery purposes, including

columbariums, crematoriums, mausoleums and mortuaries, when operated in conjunction with and within the boundary of such cemetery.

Church. A building, together with its accessory buildings and uses, where persons regularly assemble for worship, and which building, together with its accessory buildings and uses, is maintained and controlled by a religious body organized to sustain public worship. A church does not include a school.

Clinic. Single or multiple offices for physicians, surgeons, dentists, chiropractors, osteopaths and other members of the healing arts, including a dispensary in each such building to handle only merchandise of a nature customarily prescribed by occupants in connection with their practices.

Cluster Subdivision. A subdivision for which the applicable zoning district allows relaxed lot area, coverage and setback requirements and alternative types of dwellings as specified in Lane Code Chapter 16.

Communication Facilitie. A facility constructed for the purpose of transmitting telegraph, telephone, microwave, television, radio and other similar signals.

Comprehensive Plan. A generalized, coordinated land use map and policy statement of the governing body of a local government that interrelates all functional and natural systems and activities relating to the use of lands, including, but not limited to, sewer and water systems, transportation systems, educational facilities, recreational facilities and natural resources and air and water quality management programs. "Comprehensive" means all inclusive, both in terms of the geographic area covered and functional and natural activities and systems occurring in the area covered by the plan. "General nature" means a summary of policies and proposals in broad categories and does not necessarily indicate specific locations of any area, activity or use. A plan is "coordinated" when the needs of all levels of governments, semipublic and private agencies and the citizens or Oregon have been considered and accommodated as much as possible. "Land" includes water, both surface and subsurface, and the air.

Contiguous. Having at least one common boundary line greater than eight feet in length. Tracts of land under the same ownership and which are intervened by a street (local access, public, County, State or Federal street) shall not be considered contiguous.

County Official. The Director of a Lane County Department or Division, or any Lane County advisory committee or commission acting in its official capacity.

Day. A calendar day, computed consistent with ORS 174.120.

Day Care Nurseries. Any institution, establishment or place in which are commonly received at one time, six or more children not of common parentage, under the age of six years, for a period or periods not exceeding 12 hours, for the purpose of being

given board, care or training apart from their parents or guardians for compensation or reward.

Department. The Lane County Department of Public Works.

Depth. The horizontal distance between the front and rear boundary lines measured in the mean direction of the side boundary lines.

Development. The division of a parcel of land into two or more parcels; the construction, reconstruction, conversion, structural alteration, relocation or enlargement of any structure; any mining, excavation, landfill or grading.

Development, Minimal. Development which is of minimal economic value and is essentially impermanent. Examples are dune boardwalks, fences which do not substantially affect sand erosion or migration, temporary open-sided structures or approved septic drainfield serving permitted development.

Director. The Director of the Land Management Division of the Lane County Public Works Department, or the Director's delegated representative within the Department.

Divide. To separate a tract or contiguous tracts of land under the same ownership into smaller tracts and different ownerships by deed, contract or lease; and when used herein refers collectively to partitions and subdivisions. To divide land shall not include the following:

(1) Leasing or financing of apartments, offices, stores or similar spaces within an apartment building, industrial building.

(2) Renting or leasing of spaces within a mobile home park, vacation (recreational) trailer park, motel, tourist court, campground or industrial development.

(3) Minerals, oil or gas leases.

(4) A lease for agricultural purposes.

(5) Foreclosures of liens.

(6) Foreclosures of recorded contracts for sale of real property.

(7) The creation of cemetery lots.

(8) Any adjustment of a property boundary line where an additional parcel of land is not created and where the existing tract of land reduced in size by the adjustment is not reduced below the minimum area requirements of the applicable zoning.

(9) The transfer of ownership of a lot or parcel in an approved and recorded subdivision plat or partition map.

Dune. A hill or ridge of sand built up by wind along sandy coasts.

Dune, Active. A dune that migrates, grows and diminishes primarily according to the force of wind and supply of sand. The dune has no soil development and little, if any, cohesion of underlying sand. Active dunes include all open sand (vegetation-free) areas and active (sparsely vegetated) hummocks and foredunes. Soil types are 72K and occasionally Westport series soils.

Dune, Older Stabilized. A dune which presently has sufficient vegetation to be stabilized from wind erosion, but which exhibits little, if any, soil development or cohesion of underlying sand. This includes soilless dunes recently stabilized with beach grass and younger stabilized dunes which may possess forest communities and some soil development, but which lack consolidation of underlying sands. Soil types are of Westport and Netarts series soils.

Dwelling. A building or portion thereof which is occupied in whole or in part as a residence or sleeping place, either permanently or temporarily, by one or more families, but excluding hotels, motels, auto courts, mobile homes and camping vehicles.

Dwelling, Multiple. A building designed and used for occupancy by three or more families, all living independently of each other, and having separate housekeeping facilities for each family.

Dwelling, Single-Family. A detached dwelling designed or used exclusively for the occupancy of one family and having housekeeping facilities for one family.

Dwelling, Two-Family (Duplex). A building consisting of two separate dwelling units with a common roof and common foundation, designed and used exclusively for the occupancy of two families living independently of each other and having housekeeping facilities for each family.

Estuary. A body of water semienclosed by land, connected with the open ocean and within which salt water is usually diluted by fresh water derived from the land. The estuary includes: (a) estuarine water; (b) tidelands; (c) tidal marshes; and (d) submerged lands. Estuaries extend upstream to the head of tidewater.

Existing Mobile Home Park. Any lot where two or more permanent mobile homes are located or proposed to be located for the primary purpose of being rented or leased for residential purposes, for which the construction of facilities for servicing the lot on which the mobile home is to be affixed (including, at a minimum, the installation of utilities, either final site grading or the pouring of concrete pads, and the construction of streets) is completed.

Expansion of an Existing Mobile Home Park. The prepara-tion of additional sites by the construction of facilities for servicing the lots on which the mobile homes are to be affixed (including the installation of utilities, either final site grading or pouring of concrete pads, or the construction of streets).

Family. An individual or two or more persons related by blood or marriage or group of not more than five persons (excluding servants), who need not be related by blood or marriage, living together in a dwelling unit.

Farm Use. The current employment of land for the primary purpose of obtaining a profit in money by raising, harvesting and selling crops or by the feeding, breeding,

pruning, fertilizing, insect and disease control, stump culture, soil cultivation, irrigation.

Fill. The placement by humans of sand, gravel, earth, sediment or other material to create new uplands or raise the elevation of land. Activities such as diking, jetties, groins, breakwaters (nonfloating) and dredge material can also be considered fill if they: (a) involve the human placement of materials; and (b) create new uplands or raise the elevation of land.

Flood or Flooding. A general or temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland or tidal waters from any source.

Flood Elevation Determination. A determination by the Admnistrator of the water surface elevations of the base flood from the approved flood hazard studies.

Flood Hazard Boundary Map, (FHBM). An official map of the County furnished by the Federal Insurance Administration, labeled a Flood Hazard Boundary Map (FHBM) and delineating the boundaries of flood hazard areas.

Floodplain. A physical geographic term describing any land area susceptible to being inundated by water from any source.

Floodplain Management. The operation of an overall program of corrective and preventative measures for reducing flood damage, including, but not limited to, emergency preparedness plans, flood control works and floodplain management regulations.

Floodplain Management Regulations. This Floodplain ordinance, together with building code requirements, health regulations and any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

Floodproofing. Any combination of structural and nonstructural additions, changes or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

Floodway, Regulatory. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the waters of a base flood without cumulatively increasing the water surface elevation.

Floor, Habitable. A floor usable for living purposes, which includes working, sleeping, eating, cooking or recreation, or a combination thereof. A floor used only for storage purposes is not a habitable floor.

Foredune. The first ridge of sand or hummock dunes situated immediately above the highest tide line and parallel to the beach. This includes active foredunes, conditionally stable foredunes and older foredunes. These may be sparsely vegetated or vegetated to the degree that they are wind stable. Soil types are Heceta fine sand 204A and Westport soils 205C and 206D.

Forest Uses. Are (1) the production of trees and the processing of forest products; (2) open space, buffers from noise

and visual separation of conflicting uses; (3) watershed protection and wildlife and fisheries habitat; (4) soil protection from wind and water; (5) maintenance of clean air and water; (6) outdoor recreational activities and related support services and wilderness values compatible with these uses; and (7) grazing land for livestock.

Freeboard. A factor of safety usually expressed in feet above a flood level for purposes of floodplain management.

Garage, Private Parking. A publicly or privately-owned structure having one or more tiers of height used for the parking of automobiles for the tenants, employees or owners of the property for which the parking spaces contained in or on said garage are required by this Chapter, and which is not open for use by the general public.

Garage, Public Parking. A publicly or privately-owned structure having one or more tiers of height used for the parking of automobiles and open for use by the general public, either free or for remuneration. Public parking garages may include parking spaces for customers, patrons or clients which are required by this Chapter, provided said parking spaces are clearly identified as free parking space(s) for the building or use which is required to provide said space(s).

General Merchandise. Items for human use, including: books and stationary, newspapers and magazines, clothing, furniture, drugs, curios and antiques, plants and flowers, household goods and furnishings, musical instruments and supplies, seeds and garden supplies, sporting goods, jewelry, art objects and supplies, pottery, handicrafts, photographic supplies, optical goods.

Grazing. The use of land for the pasture of horses, cattle, sheep, goats and/or other domestic herbivorous animals alone or in conjunction with agricultural pursuits.

Grazing, Low Intensity. Low intensity grazing is the use of land for pasture of horses, cattle, sheep, goats and/or other domestic herbivores at levels which will not damage permanent ground cover.

Group Care Home. Any home or institution maintained and operated for the care, boarding, housing or training of six or more physically, mentally or socially handicapped persons or delinquent or dependent persons by any person who is not the parent or guardian of and who is not related by blood, marriage or legal adoption to such persons.

Guest House, Servants' Quarters. An accessory building without kitchen or cooking facilities and occupied solely by nonpaying guests or by servants employed on the premises.

Hearings Official. A person who has been appointed by the Board of County Commissioners to serve at its pleasure and at a salary fixed by it.

Horticultural Specialties. A crop distinguishable from typical commercial crops mentioned in the garm groupings of the EFU zone which are conducive to intensive management techniques.

Improvement Agreement. An agreement that under prescribed circumstances may be used in lieu of required improvements of a performance agreement. It is a written agreement that is executed between the County and a developer, in a form approved by the Board of County Commissioners, in which the developer agrees to sign at a time any and all petitions, consents, etc., and all other documents necessary to improve an abutting road or other required improvements to County standards and to waive all rights or remonstrances against such improvements, in exchange for which the County agrees that the execution of the improvement agreement will be deemed to be in compliance with the improvement requirements of the Code.

Intensification. Any additions which increase or expand the area or amount of an existing use or the level of activity. Remodeling of the exterior of a structure is an intensification when it will substantially alter the appearance of the structure. Intensification shall not include the completion of a structure for which a valid permit was issued as of December 5, 1975.

Interior Lot. A lot, other than a corner lot, having frontage on only one street.

Kennel; Commercial Breeding. A place of business for the breeding and/or selling of dogs. The term is not intended to include an animal hospital or noncommercial kennel.

Kennel; Commercial. A place of business for the breeding and/or selling of dogs. The term is not intended to include an animal hospital or noncommercial kennel.

Kennel; Noncommercial. An establishment or premises where three or more dogs, over six months of age, are kept or maintained. No more than two of the dogs shall be used for breeding. The term does not include any animal hospital.

Legal Interest. An interest in property not confined solely to ownership or possessory interst, but including all interests in property which in the discretion of the Planning Director, are not inconsistent with the intent and purposes of this Chapter. Such interests may include, but are not limited to, the following: owner, contract purchaser, lessee, renter, licensee, easement, resolution or ordinance of necessity to acquire or condemn adopted by a public or private condemnor.

Legal Lot. A tract of land which as been legally created in compliance with Lane County land division regulations and ORS Chapter 92:

(1) Any lot within a subdivision plat approved by the Board and recorded with Lane County Clerk.

(2) Any lot within a minor subdivision plat endorsed and dated by the Secretary of the Lane County Planning Commission.

(3) Any parcel within a final partition map approved and recorded by Lane County.

(4) A tract of land created as a result of a deed or real property sales contract, which was not created as a result of (1)-(3) above, but which at the date the conveyance occurred, the

creation of the tract was not subject to any Lane County land division regulations. However, contiguous units of unsubdivided or unpartitioned land under the same ownership shall constitute a single legal lot.

Loading Space. An off street space or berth on the same lot with a building for the temporary parking of a commercial vehicle while loading or unloading merchandise or materials and which abuts upon a street, alley or other appropriate means of access.

Lot. A unit of land that is created by a subdivision of land.

Lot Line, Front. The private property line contiguous with the public street line or place. For corner lots, the front lot line shall be the narrowest street frontage or as shown on the official plat of the property.

Lot Line, Rear. A lot line which is opposite and most distant from the front lot line. In the case of a triangular-shaped lot, the rear lot line for building purposes shall be assumed to be a line 10 feet in length within the lot, parallel to and at the maximum distance from the front lot line.

Lot Line, Side. Any lot line which is not a front or rear line.

Lot of Record. A legal lot which meets all of the lot of record standards specified in ORS Chapter 215 (Sections 9 to 13, Chapter 884, Oregon Laws) and is entitled to a dwelling or mobile home irrespective of land use regulations.

Low Intensity. An activity or use conducted at a level that does not require developed facilities and can be accommodated without change to an area or resource.

Map, Partition. A final diagram and other documentation relating to a major or minor partition.

Marsh, High Salt. Includes immature high marsh, mature high marsh and diked salt marsh. These marshes are from two to three feet above tide flat areas and are characterized by at least occasional tidal inundation at higher, high tides or, in the case of diked salt marshes, more infrequently with the opening of tide gates or with periodic flooding.

Mobile Home. A vehicle or structure constructed for movement on the public highways, that has sleeping, cooking and plumbing facilities, is intended for human occupancy and is being used for residential purposes.

Mobile Home Park. Any place where four or more mobile homes are located within 500 feet of one another on a lot, tract or parcel of land under the same ownership, the primary purpose of which is to rent space or keep space for rent to any person for a charge or fee paid or to be paid for the rental or use of facilities or to offer space free in connection with securing the trade or patronage of such person. "Mobile Home Park" does not include a lot or lots located within a subdivision being rented or leased for occupancy by no more than one mobile home per lot if the subdivision

was approved by the local government unit having jurisdiction under an ordinance adopted pursuant to ORS 92.010 to 92.160.

Natural Hazards. Natural events that are known to result in death or endanger the works of man, such as stream flooding, ocean flooding, groundwater, erosion and deposition, landslides, earthquakes, weak foundation soils and other hazards unique to local or regional areas.

Nursing Home. Any home, place or institution which operates and maintains facilities providing convalescent or chronic care, or both, which exceeds that as defined by "Residential Home".

100 Year Flood. See "Base Flood"

Ordinary High Water. The high water level is defined as that high level of a river which is attained during mean annual flood. It does not include levels attained during exceptional or catastropic floods. It is often identifiable by physical characteristics such as a clear natural line impressed on the bank, shelving, changes in character in the soil, destruction or absence of vegetation not adapted for life in saturated soils or the presence of flotsam and debris. In the absence of identifying physical characteristics, ordinary high water may be determined by Step backwater analysis upon a two-year frequency flood as determined by the US Army Corps of Engineers.

Ordinary Low Water. The low water mark of a river is that point to which the waters normally recede when the volume of water is at its low level, not determined by the extraordinary year, and further means the line to which the Willamette River ordinarily recedes annually in season even though the elevation of that line may be higher as a result of the Corps of Engineers' flood control structures than would otherwise be the case without such structures. Submersible lands are also considered that land or bank area between the ordinary low and high waterline.

Outdoor Advertising and Structure. Any card, cloth, paper, metal, wood, plastic or painted sign of any kind or character whatsoever, placed for outdoor advertising purpose on the ground, on any tree, wall, rock, post, fence, building or structure. The term "placed" as used in this definition of "Outdoor Advertising Sign" and "Outdoor Advertising Structure" shall include erecting, constructing, posting, painting, printing, tacking, nailing, gluing, sticking, carving or otherwise fastening, affixing or making visible in any manner whatsoever.

Panhandle. A narrow extension of a tract, 60 feet or less in width, which is used as access to the main portion of the tract.

Parcel. A unit of land that is created by a partitioning of land.

Parking Area, Automobile. Space within a public parking area or a building, exclusive of driveways, ramps, columns, office and work areas, for the temporary parking or storage of one automobile.

Parking Area, Private. Privately or publicly-owned property, other than streets and alleys, on which parking spaces are defined, designated or otherwise identified for use by the tenants, employees or owners of the property for which the parking area is required by this Chapter and which is not open for use by the general public.

Parking Area, Public. Privately or publicly-owned property, other than streets or alleys, on which parking spaces are defined, designated or otherwise identified for use by the general public, either free or for remuneration. Public parking areas may include parking lots for retail customers, patrons and/or clients as required by this Chapter.

Parking Space. A permanently maintained space with proper access for one standard sized automobile.

Partition. Either an act of partitioning land or an area or tract of land partitioned. Partitions shall be divided into the following two types:

(1) Major Partition. A partition which includes the creation of a road.

(2) Minor Parition. A partition that does not include the creation of any road.

Partition Land. Divide an area or tract of land into two or three parcels within a calendar year when such area or tract of land exists as a unit or contiguous units of land under single ownership at the beginning of such year.

Party. With respect to actions pursuant to LC 14.100 and LC 14.200, the following persons or entities are defined as parties:

(1) The applicant and all owners or contract purchasers of record, as shown in the files of the Lane County Department of Assessment and Taxation, of the property which is the subject of the application.

(2) Any County official.

(3) Any person, or his or her representative, and entity who is specially, personally or adversely affected by the subject matter, as determined by the Approval Authority.

Performance Agreement. A written agreement executed by a subdivider or partitioner in a form approved by the Board of Commissioners and accompanied by a security also approved by the Board. The security shall be of sufficient amount to ensure the faithful performance and completion of all required improvements in a specified period of time.

Person. A natural person, his heirs, executors, administrators or assigns, or a firm, partnership or corporation, its heirs or successors or assigns, or the agent of any of the aforesaid, or any political subdivision, agency, board or bureau of the State.

Personal Services. Laundering, dry cleaning and dyeing; rug cleaning and repair; photographic services; beauty and barber shops; apparel repair and alterations; shoe repair and maintenance; etc.

Planning Commission. The Planning Commission of Lane County, Oregon, which shall consist of two Planning Commissions referred to as the Lane County Planning Commission and the West Lane Planning Commission.

Plat. A final diagram and other documents relating to a subdivision.

Primary Processing Facility. A facility for the primary processing of forest products. The primary processing of a forest product means the use of a portable chipper, stud mill or other similar equipment for the initial treatment of a forest product, to facilitate its shipment for further processing. Forest products, as used in this definition, means timber and other resources grown upon the land or contiguous units of land where the primary processing facility is located.

Professional Services. Medical and health services, legal services and other professional services, including those related to: engineering, architecture, education, scientific research, accounting, planning, real estate, etc.

Received. Acquired by or taken into possession by the Director.

Recreational Vehicle. A vacation trailer or other unit, with or without motive power, which is designed for human occupancy and to be used temporarily for recreational or emergency purposes and has a floor space of less than 220 square feet, excluding built-in equipment, such as wardrobes, closets, cabinets, kitchen units or fixtures and bath or toilet rooms. The unit shall be identified as a recreational vehicle by the manufacturer.

Recreational Vehicle Park. A development designed primarily for transient service on which travel trailers, pickup campers, tent trailers and self-propelled motorized vehicles are parked and used for the purpose of supplying to the public a temporary location while traveling, vacationing or recreating.

Refinement Plan. Refinement plans are a detailed examination of the service needs and land use problems peculiar to a particular area. Refinements of the Comprehensive Plan can include specific neighborhood or community plans, or special purpose or functional plans (such as water, sewer or transportation plans). In addition, refinement plan can be in the form of major planned unit developments, annexation and zoning applications, or other special area studies.

Replacement in Kind. The replacement of a structure of the same size as the original and at the same location on the property as the original.

Residential Home. A residence for five or fewer unrelated physically or mentally handicapped persons and staff persons who need not be related to each other or to any other home resident. A "handicapped person" means an individual who has a physical or mental impairment which for the individual constitutes or results in a functional limitation to one or more major life activities. "Major life activity" means self-care, ambulation,

communication, transportation, education, sociaization, employment and the ability to acquire and maintain adequate, safe and decent shelter.

Restoration. Revitalizing, returning or replacing original attributes and amenities such as natural biological productivity, aesthetic and cultural resources which have been diminished or lost by past alterations, activities or catastrophic events.

Restoration, Active. Use of specific positive remedial actions, such as removing fills, installing water treatment facilities or rebuilding deteriorated urban waterfront areas.

Restoration, Passive. The use of natural processes, sequences and timing which occurs after the removal or reduction of adverse stresses without other specific remedial action.

Roadside Stand. A use providing for the retail sale of any agricultural produce where more than one-half of the gross receipts result from the sale of produce grown on the unit of land where the roadside stand is located.

School. A place or institution for learning and teaching in which regularly scheduled and suitable instruction meeting the standards of the Oregon State Board of Education is provided.

Service Station. Any building, land area or other premises, or portion thereof, used or intended to be used for the retail dispensing or sales of vehicular fuels; and including as an accessory use the sale and installation of lubricants, tires, batteries and similar accessories.

Sewerage Facility or Sewage Facility. The sewers, drains, treatment and disposal works and other facilities useful or necessary in the collection, treatment or disposal of sewage, industrial wastes, garbage or other wastes.

(1) Sewerage Facility, Community. A sewerage facility, whether publicly or privately owned, which serves more than one parcel or lot.

(2) Sewerage Facility, Individual. A privately owned sewage facility which serves a single parcel or lot for the purpose of disposal of domestic waste products.

(3) Sewerage Facility, Public. A sewerage facility, whether publicly or privately owned, which serves users for the purpose of disposal of sewage and which facility is provided for or is available for public use.

Sign. Any fabricated sign for use outdoors, including its structure, consisting of any letter(s), figure, character, mark, point, plane, design, poster, picture, stroke, stripe, line, trademark, reading matter or illuminating device which is constructed, attached, erected, fastened or manufactured in any manner whatsoever to attract the public in any manner for recognized purposes to any place, subject, person, firm, corporation, public performance, article, machine or merchandise display. However, the term "sign" shall not include any display of official, court or public notices, nor shall it include the flag, emblem or insignia of

a nation, government unit, school or religious group, except such emblems shall conform to illumination standards set forth in this Chapter.

Site, Residential. An area of more or less intensive development, surrounding a dwelling, not less than 60 feet wide, nor less than 6,000 square feet in area and comparable to a normal city lot.

Solid Waste Management. A planned program providing for the collection, storage and disposal of solid waste including, where appropriate, recycling and recovery.

Start of Construction. The first placement of permanent construction of a structure (other than a mobile home) on a site, such as the pouring of slabs or footings or any work beyond the stage of excavation. For mobile homes not within mobile home parks, "start of construction" is the date on which the construction of facilities for servicing the site on which the mobile home is to be affixed (including, at a minimum, the construction of streets, either final site grading or the pouring of concrete pads, and installation of utilities) is complete.

State Plane Coordinate System. The system of plane coordinates which has been established by the U.S. Coast & Geodetic Survey for defining and stating the positions or locations of points on the surface of the earth within the State of Oregon.

Structure. Synonymous with the definition of building.

Structure in a Flood Hazard Area. A walled and roofed building, a mobile home or a tank used in the storage of gas or liquid which is principally above ground.

Subdivide Land. To divide an area or tract of land into four or more lots within a calendar year when such area or tract of land exists as a unit or contiguous units of land under a single ownership at the beginning of such year.

Subdivision. Either an act of subdividing land or an area or a tract of land subdivided as defined in this section.

Substantial Improvement. Any repair, reconstruction or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either, (a) before the improvement or repair is started, or (b) if the structure has been damaged, and is being restored, before the damage occurred. For the purposes of this definition "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include either (1) any project or improvement of a structure to comply with existing state or local health, sanitary or safety code specifications which are solely necessary to assure safe living conditions, or (2) any alteration of a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

Tract. A lot, parcel or unsubdivided or unpartitioned land under the same ownership. Contiguous units of unsubdivided or

partitioned land under the same ownership shall be considered a single tract.

Urban. Those places which must have an incorporated city. Such areas may include lands adjacent to and outside the incorporated city and may also: (a) have concentrations of persons who generally reside and work in the area, and (b) have supporting public facilities and services.

Urbanizable. Those lands within an urban growth boundary and which are identified and (a) determined to be necessary and suitable for future urban use areas, and (b) can be served by urban services and facilities, and (c) are needed for the expansion of an urban area.

Use. The purpose for which land, submerged or submersible lands, the water surface or a building is arranged, designed or intended, or for which either land or building is or may be occupied or maintained.

Veterinary Clinic. Synonymous with the definition of "animal hospital".

Water Dependent Use. A use or activity which can be carried out only on, in or adjacent to water areas because the use requires access to the water body for waterborne transportation, recreation, energy production or source of water.

Water Related Use. Uses which are not directly dependent upon access to a water body, but which provide goods or services that are directly associated with water dependent land or waterway use, and which, if not located adjacent to water, would result in public loss of quality in the goods or services offered. Except as necessary for water dependent or water related uses or facilities, residences, parking lots, spoil or dump sites, roads and highways, restaurants, businesses, factories and trailer parks are not generally considered dependent on or related to water location needs.

Width. The horizontal distance between the side boundary lines measured in the mean direction of the front and rear boundary lines.

Yard. An open space on the same lot with a building unoccupied and obstructed from the ground upward, except as otherwise provided herein.

Yard, Front. A yard between the front line of the building (exclusive of steps) and the front property line.

Yard, Rear. An open, unoccupied space on the same lot with a building, between the rear line of the building (exclusive of steps, porches and accessory buildings) and the rear line of the lot.

Yard, Side. An open, unoccupied space on the same lot with a building, between the sidewall line of the building and the side line of the lot.

DEVELOPMENT APPROVAL PROCEDURES

RURAL COMPREHENSIVE PLAN

16.100 Development Approval Procedures - Relationship of Lane Code Chapter 14 into Lane Code Chapter 16. Lane Code Chapter 14 is the procedure for submittal, acceptance, investigation and review of applications for development of lands under the jurisdiction of the Lane County Rural Comprehensive Plan with these additions:

(1) Definitions. Abbreviations, terms, phrases, words and their derivatives shall be construed as specified in LC 16.090 above instead of as specified in LC 14.015.

(2) Special Notice and Review Requirements for a dwelling or Mobile Home Subject to Director Approval in the Exclusive Farm Use (E) Zone, LC 16.212(3)(c). When reviewing an application for a dwelling or mobile home conditionally permitted by LC 16.212(3)(c) below, the Director shall:

(a) In additon to the requirements of LC 14.070 (1) for a decision to approve an application in LC 16.100(2) above, specify in the notice that, "persons have 15 days following the date of postmark of the notice to file a written objection on the grounds only that the dwelling or mobile home, or activities associated with either residence, would force a significant change in or significantly increase the costs of accepted farming practices on nearby lands devoted to farm use."

(b) In addition to the requirements of LC 14.100(4), notice of a decision to approve an application in subsection LC 16.100(2) above shall be mailed to persons who have requested notice of such applications and who have paid a reasonable fee imposed by the County to cover the cost of such notice.

(c) In addition to the requirements of LC 14.515(3)(d), an objection received within 15 days of the notice which factually alleges a significant change in or significant increase in the costs of accepted farming practices on nearby lands devoted to farm uses shall constitute sufficient assignment of error by the Approval Authority.

(d) A decision to approve or deny an application identified in LC 16.100(2) above shall become final unless appealed in the manner provided in LC 16.100(2)(a)-(c) above and LC Chapter14, and unless the appeal is submitted to the Department within 15 days of the date of postmark for the notice of the decision by the Approval Authority.

(3) Ex Parte Contacts. A communication between County staff and the Planning Commission or Board shall not be considered an ex parte contact for the purposes of LC 14.200(5)(a).

NONIMPACTED FOREST LANDS ZONE (F-1, RCP)

RURAL COMPREHENSIVE PLAN

16.210 Nonimpacted Forest Lands Zone(F-1, RCP).

(1) **Purpose.** The purpose of the Nonimpacted Forest Lands District (F-1, RCP) is:

(a) To conserve forest land for forest uses in accordance with Statewide Planning Goal #4.

(b) To recognize that the preservation and protection of commercial forest lands within Lane County is necessary for the continuous production of forest crops, and that such are beneficial to the economy of the County and to the welfare of its people.

(c) To encourage multiple use of forest land for commercial timber management, watershed protection, maintenance and protection of fish and wildlife resources, livestock habitat and recreation.

(d) To protect commercial forest lands from intrusion of noncompatible uses by prohibiting or restricting nonforest uses that create potential impacts.

(e) To implement the forest land policies of the Lane County Rural Comprehensive Land Use Plan.

It is the County's policy to protect forest operations from conflicting land uses. Nothing in this section is intended to interfere with normal forestry practices that might result in conditions such as noise, dust, smoke, visual impacts or odors for temporary periods of time. Existing or proposed nonforest uses (i.e. dwellings) within the Forest Lands Zones must recognize the intent of the Zone is to protect resource management activities and that in the event of conflict between residential uses and forestry practices, this Chapter will be interpreted in favor of these resource management practices.

(2) **Permitted Uses.** The following uses and activities are permitted subject to the general provisions and exceptions set forth by this Chapter of Lane Code:

(a) Forest uses, not including a residence.

(b) Farm uses, not including a residence.

(c) Mining and quarrying and processing of rock as follows:

(i) Permitted in accordance with the Forest Practices Act (ORS 527.610 to 527.730) and for the purpose of forest road construction and other forest related uses, exclusive of the sale of rock for nonforest uses.

(ii) When used solely in conjunction with a farm use on which the mining and quarry activity occurs, exclusive of sales of the rock.

(d) Nonresidential uses necessary and accessory to the uses listed above, such as:

(i) Fire prevention, detection and suppression facilities;

(ii) Landing strips or heliports;

(iii) Roads for management and safety;

(iv) Maintenance, repair and storage of forest management and processing equipment, logging equipment, and farm equipment by the owner or operator of such equipment, exclusive of sales.

(v) Utility facilities and transmission lines limited in size for permitted or accessory use.

(vi) Log scaling and weigh stations.

(vii) Sorting yards and log storage areas located on the same unit of land from which the logs are harvested or on a nearby unit of land.

(viii) Solid waste disposal sites for industrial forest wastes on the same unit of land from which the wastes originated.

(ix) Communication facility necessary and accessory to forest uses.

(e) Public parks, campgrounds, boating facilities, camps and such other recreational facilities, including accessory parking areas.

(f) Water impoundments with less than 100 acre feet storage capacity and in conjunction with beneficial uses of water customarily associated with fire prevention, forest uses or farm uses.

(g) Operations conducted for the exploration of geothermal resources, aggregate and other mineral or subsurface resources.

(h) Maintenance and repair of any lawfully existing residence.

(i) Fish and wildlife habitat management and any necessary and accessory uses.

(j) Facilities for the primary processing of forest products.

(k) Facilities and test plots, excluding a residence, for experimental and research activities associated with forest management and forest products.

(l) A dwelling or mobile home on a lot of record as defined by ORS Chapter 15 provided such lot of record does not already have a residence on it. The applicant shall provide factual documentation of compliance with each lot of record criterian.

(3) Uses Subject to Director Approval. The following uses and activities are permitted subject to prior submittal of an application to LC 14.050 and subject to Director approval of such application pursuant to LC 14.100 and the general provisions and exceptions set forth by this Chapter of Lane Code:

(a) Replacement of any legal residence existing, occupied, suitable for occupancy or in the process of being constructed, and such replacement need not be in kind (i.e., a mobile home may replace a dwelling or vice-versa). Any replacement authorized under this subsection shall be for a dwelling or mobile home to be located on the same site as the previous residence or on a site that has less impact on surrounding uses, and such replacement shall commence within one year of the date of removal of the previous residence.

(b) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is lcoated.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in an existing dwelling or mobile home, or other existing buildings normally associated with uses permitted under LC 16.210(2)(j) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.210(2)(j) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval shall not receive extended approval by the Director, and the Director shall mail written

notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(4) Uses Subject to Hearings Official Approval. The following uses and activities are conditionally permitted subject to submittal of an application pursuant to LC 14.050 and approval of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the conditional use criteria of LC 16.210(5) below:

(a) Sorting yards and log storage areas exceeding the standards of an accessory use specified under LC 16.210(2)(d)(vii) above.

(b) Maintenance repair and storage of forest management and processing equipment, logging equipment, and farm equipment as a business enterprise operated by someone other than the owner of such equipment, exclusive of sales.

(c) Solid waste disposal sites exceeding the standards of an accessory use specified under LC 16.210(2)(d)(viii) above and not exceeding 10 acres in size.

(d) The mining, quarrying and processing of mineral, geothermal and other subsurface resources; and rock mining, quarrying and processing which exceeds the standards as specified under specified under LC 16.210(2)(c) above.

(e) Power distribution and/or telephone lines which exceed the standard as specified under LC 16.210(2)(d)(i) and (v) above.

(f) Communication facility.

(g) A hydroelectric generating facility with a water impoundment of less than 100 acre feet.

(h) A hydroelectric generating facility not exceeding 10 acres in size and located at an existing water impoundment which will not be increased in size because of the generating facility.

(i) Privately owned parks, campgrounds, boat facilities, lodges, camps and other such recreational facilities, including accessory parking areas where overnight lodging is provided upon satisfying the following conditions:

(i) Domestic water supplies for all development within designated forest lands shall emanate from surface or subsurface water sources contained within the boundary of the property in question; except as provided in LC 16.210(4)(i)(ii) below.

(ii) The domestic water supply is obtained from another source with the documented approval of all other affected parties, with the condition that

such use will not affect the right of the owner of that water source to undertake forest management practices on his or her property.

(iii) The water supply system shall: have a delivery capability of sustaining a volume of 20 gallons per minute for not less than 50 minutes; sufficient water outlets and serviceable hose not less than three-quarter inch inside diameter and a nozzle to reach nearby improvements; be maintained as a connected operating unit ready for immediate use during periods of fire danger.

(5) Conditional Use Criteria. Uses conditionally permitted under LC 16.210(4) above are subject to compliance with the following criteria:

(a) (i) Evidence is provided supporting reasons why the proposed use should be sited in forest lands, or;

(ii) That the proposed site is on land generally unsuitable for forest uses;

(b) That the proposed use will not significantly impact forest uses on adjacent and nearby forest lands;

(c) That the proposed use will not significantly increase the costs of forest management on adjacent and nearby forest lands;

(d) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use;

(e) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby forest lands, and these measures may be established as conditions of approval; and

(f) That the proposed use is consistent with the forest policies contained in the Rural Comprehensive Plan.

(6) Area. The minimum area requirement for the division of land shall be 40 acres or a 1/4 of a 1/4 section, except as provided below:

(a) A division of land to create a parcel of less than 40 acres may be conditionally allowed pursuant to compliance with Lane Code Chapter 13 if it is for the purpose of separating an existing residence from the adjoining forest land and the parcel containing the residence is limited to the least amount of area reasonably possible so as to maximize forest use on the other parcel.

(b) The adjustment of a common property boundary which results in no additional parcels and if, where the parent parcel reduced in size is below 40 acres, the adjusted common property boundary is the most conducive

one for forest management considering the unique physical characteristics of the land, including terrain, stream courses, soils, existing nonforest uses, etc.

(7) Property Development Standards. All uses or activities permitted or conditionally permitted above, except the growing and harvesting of tree species regulated by the Oregon Forest Practices act, shall be subject to the following development standards, etc.

(a) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100 foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 below with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(b) Maintenance, Removal and Replacement of Riparian Vegetaton. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall be conducted in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.210(7)(b)(i) above. Where vegetation removal beyond that allowed in LC 16.210(7)(b)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Vegetation removal necessary to provide water access for a water dependent use.

(b) Removal of dead or diseased vegetation that poses a safety or health hazards.

(c) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(c) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access public road and 10 feet from all other property lines, except as provided above.

(d) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

IMPACTED FOREST LANDS ZONE (F-2, RCP)

RURAL COMPREHENSIVE PLAN

16.211 Impacted Forest Lands Zone (F-2, RCP).

(1) **Purpose.** The purpose of the Impacted Forest Lands Zone (F-2, RCP) is:

(a) To implement the forest land policies of the Lane County Rural Comprehensive Plan which recognize that certain forest lands are impacted by nonforest uses and merit different treatment than nonimpacted forest lands.

(b) To conserve forest land for forest uses consistent with Statewide Planning Goal #4, including commercial timber management, watershed protection, maintenance and protection of fish and wildlife resources, livestock habitat and recreation.

(c) In areas of mixed farm/forest uses where forest uses do not predominate, to conserve such land for uses consistent with Statewide Planning Goals #3 and #4.

(d) To protect lands mentioned in LC 16.211(1)(b) and (c) above from the intrusion of noncompatible uses by restricting nonforest uses or nonforest and nonfarm uses that create potential impacts.

(2) **Permitted Uses.** The following uses and activities are permitted subject to the general provisions and exceptions prescribed by this Chapter of Lane Code, except that for any property designated in the Eugene-Springfield Metropolitan Plan as significant n terms of OAR 660-16-000/025 and designated as "1B", a Goal 5 ESEE consequences analysis per the Goal 5 Administrative Rule must first be completed. If the landowner and County do not agree on the method to achieve the Goal, the matter shall be forwarded to the Hearings Official for processing consistent with LC 16.100.

(a) Forest use.

(b) Farm uses as defined by ORS 215.203(2).

(c) Mining, quarrying and processing of rock for forest or farm road construction on the same tract on which the mining and quarrying occurs.

(d) Water impoundments with less than 100 acre feet storage capacity and in conjunction with beneficial uses of water customarily associated with fire prevention, forest uses or farm uses.

(e) Operations conducted for the exploration of geothermal resources, aggregate and other mineral or subsurface resources.

(f) Public parks, campgrounds, boating facilities, camps and such other recreational facilities, including accessory parking areas.

(g) Fish and wildlife habitat management and any necessary and accessory uses.

(h) A facility for the primary processing of forest products.

(i) Facilities and test plots, excluding a residence, for experimental and research activities associated with forest management and forest products.

(j) Maintenance and repair of a lawfully existing residence.

(k) Uses necessary and accessory to those listed above, such as:

(i) Fire prevention, detection and suppression facilities.

(ii) Landing strips or heliports.

(iii) Roads for management and safety.

(iv) Maintenance, repair and storage of forest management and processing equipment, logging equipment and farm equipment by the owner of such equipment, exclusive of sales.

(v) Utility facilities and transmission lines limited in size for permitted or accessory use.

(vi) Log scaling and weigh stations.

(vii) Sorting yards and log storage areas located on the same unit of land from which the logs were harvested or on a nearby unit of land under the same ownership as the land from which the logs were harvested on a temporary site not exceeding 10 acres in size.

(viii) Solid waste disposal sites for industrial forest wastes on the same unit of land from which the wastes originated.

(ix) Communication facility necessary and accessory to forest uses.

(l) A dwelling or mobile home on a lot of record as defined by ORS Chapter 215, provided such lot of record does not already have a residence on it. The applicant shall provide factual documentation of compliance with each lot of record criterian. Accessory structures for the residence may also be allowed.

(3) Uses Subject to Director Approval. The following uses are permitted subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 and subject to conformance with the applicable criteria and standards of this Chapter of Lane Code:

(a) Replacement of any legal residence existing, occupied, suitable for occupancy or in the process of being constructed, and such replacement need not be in kind (i.e., a mobile home may replace a dwelling or vice-versa). Any replacement authorized under this subsection shall be for a residence to be located on the same site as the previous residence or on one that has lessor impact on

surrounding forest uses, and such replacement shall commence within one year of the date of removal of the previous residence.

(b) A dwelling or mobile home, and any accessory structures, on a vacant legal lot shall be deemed accessory and necessary to the forest management of the legal lot provided:

(i) A detailed forest management plan is submitted for the legal lot which demonstrates forest production will be enhanced by on site forest management from the residence, and

(ii) Evidence is submitted indicating that the legal lot is qualified for and has a forest deferral pursuant to State Law, or

(iii) If the legal lot does not have a forest deferral pursuant to State law, then upon substantial completion of the details represented in the forest management in LC 16.211(3)(b)(i) above, the dwelling or mobile home shall be allowed on the property. Substantial completion of the details represented in the forest management plan shall be verified by a qualified private forestor and such verification shall be submitted in writing to the Department. During the interim, while the forest management plan is being implemented on the subject legal lot, a temporary mobile home in conjunction with the forest use shall be allowed for a period not to exceed five years. If the forest management plan is not implemented within the five-year period, the temporary mobile home shall be removed.

(c) A dwelling or mobile home, and any accessory structures, in conjunction with the propagation or harvesting of a forest product on a vacant legal lot that is managed as part of a woodlot meeting the Douglas-fir cubic foot site index and acreage requirements below, provided sufficient factual documentation concerning the forest management, the soils, cubic foot site indices and acreage of the legal lot is presented by the applicant to verify that the legal lot meets the minimum cubic foot site index/acreage requirements specified below:

Whenever a legal lot has cubic foot site indices which fall into more than one of the below categories, compliance with the minimum acreage requirements may be determined by:

(i) Identifying the number of acres in each cubic foot site index category.

(ii) Identifying the percentage of the acreage requirement met for each category. This percentage shall be determined by dividing the number of acres in each category by the acreage minimum number for the same category.

(iii) Adding the percentages identified in LC 16.211(3)(c)(ii) above. The minimum acreage requirement shall have been met if the percentage total is 100 or greater.

Cubic Foot Site Class	Potential Yield cu.ft./acre/yr	Acreage Minimum
6	(20-49 cf/ac)	64
5	(50-84 cf/ac)	43
4	(85-119 cf/ac)	34
3	(120-164 cf/ac)	24
2	(165-224 cf/ac)	17

(d) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in an existing dwelling or mobile home, or other existing buildings normally associated with uses permitted under LC 16.211(2) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.211(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions

of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(e) A dwelling when necessary and accessory to the use permitted in LC 16.211-10(i) above

(4) Uses Subject to Director Approval and Located in Mixed Agricultural and Forest Areas. The uses specified in LC 16.211(4)(c) through (m), are conditionally permitted upon:

(1) A positive determination that agricultural uses predominate on the subject property. This determination can be made either of two ways:

(i) The applicant demonstrates that generally accepted agricultural practices regularly occur over 50 percent of the property.

(ii) The applicant demonstrates that annual gross income for the subject property when obtained from farm use is greater than the annual gross income if managed for forest purposes. This will require a comparison of the actual annual gross farm income from accepted farm practices to the estimated annual gross income derived from accepted forest practice when managed on a sustained yield basis. In addition, the applicant must demonstrate that the area in which the subject property is located is characterized as a mixed farm forestry area.

(b) Prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 and compliance with the applicable approval criteria and standards of this Chapter of Lane Code.

(c) Public or private schools, including all buildings essential to the operation of a school.

(d) Churches.

(e) Utility facilities necessary for public service, except commercial facilities for the purpose of generating power for use by public sale.

(f) A dwelling or mobile home customarily provided in conjunction with farm use existing on the subject property and which complies with the requirements for such a residence specified within the Exclusive Farm Use (E) zone, LC 16.212(2)(f).

(g) A dwelling or mobile home customarily provided in conjunction with a farm use not yet existing on the subject property and which complies with the requirements for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(g).

(h) A dwelling or mobile home customarily provided in conjunction with farm use existing on the subject property, where another residence already exists on the

subject property, and which complies with the requirements for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(h).

(i) A dwelling or mobile home to be occupied by a relative of the farm operator which complies with the requirements for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(i).

(j) A mobile home in conjunction with an existing dwelling or mobile home, on the same legal lot as the existing residence, and as a temporary use for the term of a hardship suffered by the existing resident or a relative of the existing resident which is necessary and accessory to continued forest management or, complies with the requirements for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(j).

(k) A dwelling or mobile home in conjunction with farm use or the propagation or harvesting of a forest product on a legal lot that is managed as part of a farm operation or woodlot if the farm operation or woodlot:

(i) Consists of 20 or more acres.

(ii) Is not smaller than the average farm or woodlot in the County producing at least $2,500 in annual gross income from the crops, livestock or forest products to be raised on the farm operation or woodlot.

(iii) Does not already have a dwelling or mobile home on it.

(l) A dwelling or mobile home in conjunction with farm use or the propagation or harvesting of a forest product on a legal lot that is managed as part of a farm operation or woodlot smaller than required under LC 16.212(6) (Exclusive Farm Use Zone) if the legal lot:

(i) Has produced at least $10,000 in annual gross farm income in two consecutive calendar years out of the three calendar years before the year in which the application for the dwelling was made or is planted in perennials capable of producing upon harvest an average of at least $10,000 in annual gross farm income.

(ii) Is a woodlot capable of producing an average over the growth cycle of $10,000 in gross annual income.

(iii) Does not already have a dwelling or mobile home on it.

(m) A site for the disposal of solid waste that has been ordered to be established by the Environmental Quality Commission under ORS 459.049 together with equipment, facilities or buildings necessary for its operation.

(5) Special Uses - Hearings Official Approval. The following uses are conditionally permitted subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.300 and subject to compliance with the criteria specified in LC 16.211(6) below:

(a) Sorting yards and log storage areas on a temporary site not exceeding 10 acres in size and exceeding the standards specified under LC 16.211(2)(k)(vi) above.

(b) Maintenance, repair and storage of forest management and processing equipment, logging equipment and farm equipment as a business enterprise operated by someone other than the owner of such equipment, exclusive of sales.

(c) Solid waste disposal sites for industrial forest wastes exceeding the standards specified under LC 16.211(2)(k)(viii) above and not exceeding 10 acres in size.

(d) The mining, quarrying and processing of mineral, geothermal and other subsurface resources; and rock mining, quarrying and processing which exceeds the standards as specified under LC 16.211(2)(c) above.

(e) Power distribution and/or telephone lines which exceed the standard as specified under LC 16.211(2)(k)(v) above.

(f) Communication facility.

(g) A hydroelectric generating facility with a water impoundment of less than 100 acre feet.

(h) A hydroelectric generating facility not exceeding 10 acres in size and located at an existing water impoundment which will not be increased in size because of the generating facility.

(i) Privately owned parks, campgrounds, boat facilities, lodges, camps and other such recreational facilities, including accessory parking areas, where overnight lodging is provided, upon satisfying the following conditions:

(i) Domestic water supplies for all development within designated forest lands shall emanate from surface or subsurface water sources contained within the boundary of the property in question; except as provided in LC 16.211(5)(i)(ii) below.

(ii) The domestic water supply is obtained from another source with the documented approval of all other affected parties, with the condition that such use will not affect the right of the owner of that water source to undertake forest management practices on his or her property.

(iii) The water supply system shall: have a delivery capability of sustaining a volume of 20 gallons per minute for not less than 50 minutes; sufficient water outlets and serviceable hose not less than three-quarter inch inside diameter and a nozzle to reach nearby improvements; be maintained as a connected operating unit ready for immediate use during periods of fire danger.

(j) Commercial activities that are in conjunction with farm use.

(k) Operations conducted for the mining and processing of geothermal resources as defined by ORS 522.005, or exploration, mining and processing of aggregate and other mineral resources or other subsurface resources.

(l) Community centers owned and operated by a governmental agency or a nonprofit community organization, hunting and fishing preserves, parks, playgrounds and campgrounds.

(m) Golf courses.

(n) Commercial utility facilities for the purpose of generating power for public use by sale.

(o) Personal-use airports for airplanes and helicopter pads, including associated hanger, maintenance and service facilities. A personal-use airport as used in this section means an airstrip restricted, except for aircraft emergencies, to use by the owner, and, on an infrequent and occasional basis, by invited guests, and by commercial aviation activities in connection with agricultural operations. No aircraft may be based on a personal-use airport other than those owned or controlled by the owner of the airstrip. Exceptions to the activities permitted under this definition may be granted through waiver action by the Aeronautics Division in specific instances. A personal-use airport lawfully existing as of September 13, 1975, shall continue to be permitted subject to any applicable regulations of the Aeronautics Division.

(p) The boarding of horses for profit.

(q) A site for the disposal of solid waste approved by the governing body of a city or county or both and for which a permit has been granted under ORS 459.245 by the Department of Environmental Quality, together with equipment facilities or buildings necessary for its operation.

(r) A dwelling or mobile home which is not necessary and accessory to forest use or customarily provided in conjunction with farm use and which is located upon a vacant legal lot.

(6) Hearings Official/Special Use Approval Criteria. The uses specified in LC 16.211((5) above, as identified below, are subject to compliance with the following criteria:

(a) Uses under LC 16.211(5)(a),(b),(c),(e),(f),(g),(h) and (i) above subject to compliance with the criteria identified in LC 16.211(6)(f)(i) through (vi) below.

(b) Use under LC 16.211(5)(d) above subject to compliance with the criteria identified in LC 16.211 (6)(f)(i) through (vi) and (xi) below.

(c) Uses under LC 16.211(5)(j),(l),(m),(n),(o),(p) and (q) above subject to compliance with the criteria identified in LC 16.211(6)(f)(i) through (viii) below, and upon a positive determination that agricultural uses predominate on the subject property. This determination can be made either of two ways:

(i) The applicant demonstrates that generally accepted agricultural practices regularly occur over 50 percent of the property.

(ii) The applicant demonstrates that annual gross income for the for the subject property when obtained from farm use is greater than the annual gross income if managed for forest purposes. This will require a comparison of the actual annual gross farm income from accepted farm practices to the estimated annual gross income derived from accepted forest practice when managed on a sustained yield basis. In addition, the applicant must demonstrate that the area in which the subject property is located is characterized as a mixed farm forestry area.

(d) Use under LC 16.211(5)(k) above subject to compliance with the criteria identified in the LC 16.211(6)(c)(i) and (ii)above, and the criteria identified in LC 16.211(6)(f)(iii) through (viii) and (xi) below.

(e) Use under LC 16.211(5)(r) subject to compliance with the criteria identified in LC 16.211(6)(f)(v),(vii),(viii),(ix) and (x) below.

(f) Criteria.

(i) Evidence is provided supporting reasons why the proposed use should be sited in forest lands, or that the proposed site is on land generally unsuitable for forest uses.

(ii) That the proposed use will not significantly impact forest uses on adjacent and nearby forest land.

(iii) That the proposed use will not significantly increase the costs of forest management on adjacent and nearby forest lands.

(iv) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use.

(v) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby forest or agricultural lands, and these measures may be established as conditions of approval.

(vi) That the proposed use is consistent with the forest policies contained in the Rural Comprehensive Plan.

(vii) That the proposed use will not interfere seriously with forest practices as regulated by the Forest Practices Act on nearby or adjacent lands devoted to forest use, and that the proposed use will not interfere seriously with accepted farming practices, as defined in ORS 215.203(2)(c), on adjacent lands devoted to farm use.

(viii) That the proposed use does not materially alter the stability of the overall land use pattern of the area.

(ix) That the proposed use is situated upon land generally unsuitable for the production of farm crops, livestock and the growing and harvesting of tree species regulated by the Forest Practices Act, considering terrain, adverse soil or land conditions, drainage and flooding, vegetation, location and size of the tract.

(x) That the proposed use is compatible with farm use as described in ORS 215.103(2) and the purpose and intent set forth in ORS 215.243, and the proposed use is compatible with forest uses as regulated by the Forest Practices Act and the purpose and intent set forth in ORS 527.630.

(xi) That the proposed use will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity.

(7) Area. The minimum area requirement for the division of land shall be as follows:

(a) For the creation of a woodlot for the purpose of the propagation or harvesting of a forest product, the minimum area shall be at least 20 acres and that which is necessary to meet the acreage minimum requirements specified in LC 16.211(3)(c) above, and additional area to accommodate a homesite, access and fire breaks required by LC 16.211(8) below and a logical parcel layout or use of the parcel. The applicant shall submit sufficient factual documentation to verify that each

proposed tract meets the above requirements. Area computations shall be measured consistent with the LC 16.211 (3)(c) above.

(b) For the creation of a farm parcel, the minimum area shall be 40 acres. A farm management plan including the information required by the Exclusive Farm Use (E) Zone, LC 16.212(2)(g)(v)(e) below shall be presented by the applicant and shall factually demonstrate the suitability of the land for the intended use. A statement shall be placed on the face of the map for the partition disclosing that a dwelling or mobile home is not guaranteed unless the provisions of this zone for a residence in a mixed farm/forest area are met.

(c) For the creation of a farm parcel for the purpose of growing grapes, berries or horticultural specialities, the minimum area shall be 20 acres. The management plan and map statement requirements of LC 16.211(b) above shall also apply.

(d) The remaining portion of the parent parcel being divided must also comply with either LC 16.211(a),(b) or (c) above.

(8) Siting and Fire/Safety Standards for Dwellings.

All dwellings and mobile homes conditionally permitted above:

(a) The Approval Authority shall balance the setback standards of LC 16.211(8)(a) with the siting requirements and application approval criteria specified elsewhere in LC 16.211 in order to minimize adverse impacts and to assure optimal siting of proposed residences consistent with the purposes of the F-2 zone. Where possible, residences shall maintain a setback of 500 feet from the adjoining lines of property zoned F-1 or 300 feet from adjoining lines of property zoned F-2 or EFU. Residences should be sited on the least valuable forest and farm areas on the property, or clustered with residences on other tracts in order to lessen impacts on forest or farm uses, and should be sited to avoid intruding unnecessarily on acres free from existing roads and residences. In cases where residences are clustered, sited to avoid intruding onto resource areas, or where property dimensions do not allow it, the 500 foot or 300 foot setback may not be the most desirable or possible standard and should not be applied.

(b) Shall maintain a fuel break of 50 feet around the residence. Fuel breaks shall be free of hazardous fuels in the form of native vegetation. Irrigation or fire resistent vegetation shall be planted within the fuel break to prevent undue soil erosion. Fuel breaks shall be continually maintained and may contain individual tree specimens, however plant material shall

not provide a means of readily spreading fire. Fuel breaks shall shall comply with the riparian vegetation protection standards of LC 16.211(9)(b) and (c) below.

(c) Shall provide an adequate fire suppression system. Unless otherwise authorized by the local fire official, the minimum acceptable system shall include the following:

(i) A water supply such as a pond, stream, tank, well, sump or any combination thereof, together with a delivery system capable of sustaining a volume of 20 gallons per minute for not less than 20 minutes.

(ii) Sufficient water outlets, together with serviceable hose not less than three-quarter inch inside diameter and a nozzle to reach the dwelling and nearby improvements.

(iii) TThe water supply, pump, hose and nozzle shall be maintained as a connected, operating unit ready for immediate use during period of fire danger.

(d) Shall have a spark arrestor on any chimneys and a fire retardant roof.

(9) Other Property Development Standards. All uses or activities permitted or conditionally permitted above, except the growing and harvesting of tree species regulated by the Oregon Forest Practices Act, shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines except as provided below.

(b) Class I Stream Setbacks. A residence shall not be located closer than 100 feet from ordinary high water of a Class I stream and no other structure except a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to

LC 16.256 below with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.211(9)(c)(i) above. Where vegetation vegetation removal beyond that allowed in LC 16.211(9)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards;

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazards.

(d) Removal of vegetation necessary for the maintenance of placement of structural shoreline stabilization.

(d) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

EXCLUSIVE FARM USE ZONE (E-RCP)

RURAL COMPREHENSIVE PLAN

16.212 Exclusive Farm Use Zone (E-RCP)

(1) Purpose. The purpose of the Exclusive Farm Use (E-RCP) Zone is to provide areas for the continued practice of commercial agriculture, guarantee the preservation and maintenance of areas so classified and minimize activities that may be incompatible with commercial agriculture. The Exclusive Farm Use Zone is to be applied to land designated as agricultural by the Rural Comprehensive Plan.

It is the County's policy to protect forestry and agricultural operations from conflicting land uses. Nothing in this section is intended to interfere with normal forestry or agricultural management or practices that might result in conditions such as noise, dust, smoke, visual impacts or odors for temporary periods of time. Existing or proposed nonforest or nonfarm uses (i.e. dwellings) within the Exclusive Farm Use Zone must recognize that the intent of the Zone is to protect resource management activities and that, in the event of conflict between residential uses and farm forestry or forestry practices, this Chapter will be interpreted in favor of these resource management practices.

(2) Permitted Uses. In the EFU Zone, the following uses and activities are permitted subject to the general provisions and exceptions set forth by this Chapter.

(a) Farm Use (See farm use definition)

(b) Propagation or harvesting of a forest product.

(c) Public or private schools, including all buildings essential to the operation of a school.

(d) Churches.

(e) Utility facilities necessary for public service, except commercial facilities for the purpose of generating power for use by public sale and transmission towers over 200 feet in height.

(f) A dwelling or mobile home customarily provided in conjunction with farm use (existing), provided it complies with the following requirements:

(i) The proposed dwelling or mobile home will be the only dwelling or mobile home on the subject property, contiguous property in the same ownership and any noncontiguous property which is managed as part of the same farm operation.

(ii) The proposed dwelling or mobile home will be located on a legal lot that is currently managed as part of a farm operation of a size equal to or greater than that described in LC 16.212(6)(d) below, and will be located on a legal lot that is not

smaller than the minimum size allowed for the division of land as described in LC 16.212(7) below.

(iii) At least one occupant of the proposed dwelling or mobile home will be employed in conjunction with the current farm use of the farm operation.

(iv) Sufficient information is submitted by the person applying for the proposed dwelling or mobile home which factually documents compliance with the above criteria. Such information shall include, but not necessarily be limited to:

(a) The size, location and ownership of the total property involved in the farm operation.

(b) A copy of any farm use, lease agreements for the total property involved in the farm operation.

(c) Identification of the specific farm uses conducted on the total property involved in the farm operation and the number of acres for each specific farm use.

(d) Identification of the extent of involvement in the farm use activity by the occupants of the proposed dwelling or mobile home.

(e) Identification by reference to LC 16.212(6)(d below of the type of farm operation (i.e., farm group) that the proposed dwelling or mobile home would be customarily provided in conjunction with.

(g) A dwelling or mobile home customarily provided in conjunction with farm use (contemplated) which complies with the following requirements:

(i) The proposed dwelling or mobile home will be located on a legal lot which will be managed as part of a farm operation of a size equal to or greater than that described in LC 16.212(6)(d) below, but is not currently so managed.

(b) The proposed dwelling or mobile home will be located on a legal lot that is not smaller than the minimum size allowed for the division of land as described in LC 16.212(7) below.

(iii) At least one occupant of the proposed dwelling or mobile home would be employed in conjunction with the proposed farm operation.

(iv) There is no other dwelling or mobile home on the subject property, contiguous property in the same ownership and any noncontiguous property which would be managed as part of the same farm operation.

(v) Sufficient information is submitted by the persons applying for the proposed dwelling or mobile home which factually addresses the above criteria. Such information shall include:

(a) The size, location and ownership of the total property involved in the farm operation.

(b) A copy of any farm use lease agreements for the total property involved in the farm operation and the number of acres for each specific farm use.

(c) Identification by reference to LC 16.212(6)(d) below of the type of farm operation (farm group) that the proposed dwelling or mobile home would be in conjunction with.

(d) Identification of the planned extent of involvement in the proposed farm use activity by the occupants of the proposed dwelling or mobile home and the experience of the occupants in prior farm use activities.

(e) A copy of a farm management plan for the proposed farm operation which provides factual details addressing the farm operation concerns pertinent to the farm operation proposed, including:

Land preparation.
Ripping and plowing.
Fencing.
Surveying.
Crop cultivation.
Irrigation.
Herbicide; fungicide and/or fertilizer application.
Machinery.
Accessory farm buildings.
Breeding and livestock raising concerns.
Labor.
Projected expenses associated with the above.
Date by which the farm management plan would be substantially implemented.

(f) The residence shall be so located on the subject property as to provide the least interference with farming activities which will thereon occur. A site plan shall be submitted which shows the location of the residence and explains the rationale of the location in reference to the above criterion.

(vi) Upon substantial completion of the details represented in the above farm management plan, the dwelling or mobile home shall be allowed on the subject property. During the interim while the farm management plan is being implemented on the subject property, a temporary mobile home in conjunction with the farm use may be allowed for a period not to exceed five years. If the farm management plan is not implemented within the five-year period, the temporary mobile home shall be removed or another special permit under this subsection may be made.

(h) A dwelling or mobile home customarily provided in conjunction with farm use (existing) which complies with the following requirements:

(i) The proposed dwelling or mobile home would be in addition to another dwelling or mobile home already on the subject property, contiguous property in the same ownership and any noncontiguous property which is managed as part of the same farm operation.

(ii) The occupant or occupants of the proposed dwelling or mobile home will be employed in conjunction with the current farm use of the farm operation and the occupant or occupants of the existing dwellings or mobile homes are employed in conjunction with the current farm use of the farm operation.

(iii) The proposed dwelling or mobile home will be located on a legal lot that is currently managed as part of a farm operation of a size equal to or greater than that described in LC 16.212(6)(d) below, and will be located on a legal lot that is not smaller than the minimum size allowed for the division of land as described in LC 16.212(7) below.

(iv) Sufficient information is submitted by the person applying for the proposed dwelling or mobile home which factually documents compliance with the above criteria. Such information shall include, but not necessarily be limited to:

(a) The size, location and ownership of the total property involved in the farm operation.

(b) A copy of any farm use, lease agreements for the total property involved in the farm operation.

(c) Identification of the specific farm uses conducted on the total property involved in the farm operation and the number of acres for each specific farm use.

(d) Identification of the extent of involvement in the farm use activity by the occupant's of the proposed dwelling or mobile home, and by the occupant's of the existing dwellings or mobile homes.

(e) Identification by reference to LC 16.212(6)(d below to the type of farm operation (i.e., farm group) that the proposed dwelling or mobile home would be customarily provided in conjunction with.

(i) A dwelling or mobile home on real property used for farm use if the dwelling or mobile home is:

(i) Located on the same legal lot as the dwelling or mobile home of the farm operator; and

(ii) Occupied by a relative, which means grandchild, parent, child, brother or sister of the farm operator or the farm operator's spouse, whose assistance in the management of the farm use is or will be required by the farm operator.

(iii) Establishment of the second dwelling or mobile home may not be used for future justification of land division, and Lane County shall not approve any subdivision or partition of a lot or parcel for which such a second dwelling or mobile home has been approved.

(iv) The farm operator submits a statement that:

(a) The second dwelling or mobile home is necessary for his or her farm operation.

(b) Identifies the family relationship of the persons who will occupy the second dwelling or mobile home.

(c) He or she fully understands the conditions under which the building permit is being approved.

(j) One mobile home in conjunction with an existing dwelling or mobile home on the same legal lot as the existing dwelling or mobile home as a temporary use for the term of a hardship suffered by the existing resident or a relative of the existing resident subject to compliance with the following conditions:

(i) A resident of the existing dwelling or mobile home and a resident of the mobile home are family members.

(ii) One of the residents mentioned above suffers a hardship and needs the care of the other above-mentioned resident and family member.

(iii) Satisfactory evidence of the family member's hardship is furnished which shall include:

(a) A written statement, on a form provided by the Department, from the family member's physician, therapist, or other professional counselor, disclosing the existence and general nature of the hardship.

(b) A written statement, on the form provided by the Department, disclosing the family relationship of the person with the hardship and the person who will provide care.

(iv) The temporary mobile home will be located on the same legal lot as the existing dwelling or mobile home.

(v) The temporary mobile home will be connected to the same on-site sewage disposal system serving the existing dwelling or mobile home.

(vi) The temporary mobile home will comply with sanitation and building code requirements.

(vii) Approval of temporary mobile home permits shall be valid until December 31 of the year following the year of original permit approval and may be renewed once every two years until the hardship situations cease.

(k) Nonresidential buildings customarily provided in conjunction with farm use.

(l) Operations for the exploration of geothermal resources as defined by ORS 522.005.

(m) A site for the disposal of solid waste that has been ordered to be established by the Environmental Quality Commission under ORS 459.049, together with equipment, facilities or buildings necessary for its operation.

(3) Special Uses - Director Approval. The following uses are allowed subject to prior submittal of an application pursuant to LC 14.050 and approval of the application by the Director pursuant to LC 14.100 and LC Chapter 16, and subject to conformance with the applicable approval criteria:

(a) A dwelling or mobile home in conjunction with farm use or the propagation or harvesting of a forest product on a legal lot that is managed as part of a farm operation or woodlot if the farm operation or woodlot:

(i) Consists of 20 or more acres.

(ii) Is not smaller than the average farm or woodlot in the County producing at least $2,500 in annual gross income from the crops, livestock or forest products to be raised on the farm operation or woodlot.

(iii) Does not already have a dwelling or mobile home on it.

(b) A dwelling or mobile home in conjunction with farm use or the propagation or harvesting of a forest

product on a legal lot that is managed as part of a farm operation or woodlot smaller than required under LC 16.212(6)(d) below if the legal lot:

(i) Has produced at least $10,000 in annual gross farm income in two consecutive calendar years out of the three calendar years before the year in which the application for the dwelling was made or is planted in perennials capable of producing upon harvest an average of at least $10,000 in annual gross farm income; or

(ii) Is a woodlot capable of producing an average over the growth cycle of $10,000 in gross annual income.

(iii) Does not already have a dwelling or mobile home on it.

(c) One dwelling or mobile home, not provided in conjunction with farm use, on a vacant legal lot not larger than three acres provided:

(i) The dwelling or mobile home, or activities associated with the dwelling or mobile home, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use; and

(ii) If the legal lot is located within the Willamette Greenway, a floodplain or a geological hazard area, the dwelling complies with conditions imposed by Lane Code relating specifically to the Willamette Greenway, floodplains or geological hazard areas, whichever is applicable; and

(iii) The dwelling complies with other conditions considered necessary by the governing body or its designate; and

(iv) The legal lot was created between January 1, 1948 and before July 1,1983.

(iv) For the purposes of the above subsection, only one legal lot exists if:

(v) Notice and review of an application under LC 16.212(3)(c) above shall occur in compliance to LC 16.100(2).

(a) The legal lot is contiguous to one or more lots or parcels in which, on July 1, 1983, greater than possessory interests are held in those contiguous lots by the same person, spouses or a single partnership or business entity, separately or in tenancy in common.

(b) As used in the LC 16.212(3)(c)(vi) (a) above, contiguous means "lots, parcels or lots and parcels that have a common boundary, including but not limited to, lots, parcels or

lots and parcels separated only by a public road."

(d) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in a dwelling or mobile home, or other buildings normally associated with uses permitted under LC 16.212(2) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.212(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(vii) Will comply with any additional conditions of approval.

(viii) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(4) Special Uses - Hearings Official Approval. The following uses are allowed subject to prior approval of the Hearings Official pursuant to LC 14.300 and pursuant to compliance with the below approval criteria of this subsection and LC 16.212(5).

(a) Commercial activities that are in conjunction with farm use.

(b) Operations conducted for the mining and processing of geothermal resources as defined by ORS 522.005, or exploration, mining and processing of aggregate and other mineral resources or other subsurface resources.

(c) Community centers owned and operated by a governmental agency or a nonprofit community organization, hunting and fishing preserves, parks, playgrounds and campgrounds.

(d) Golf courses.

(e) Commercial utility facilities for the purpose of generating power for public use by sale.

(f) Personal-use airports for airplanes and helicopter pads, including associated hangar, maintenance and service facilities. A personal-use airport as used in this section means an airstrip restricted, except for aircraft emergencies, to use by the owner, and, on an infrequent and occasional basis, by invited guests, and by commercial aviation activities in connection with agricultural operations. No aircraft may be based on a personal-use airport other than those owned or controlled by the owner of the airstrip. Exceptions to the activities permitted under this definition may be granted through waiver action by the Aeronautics Division in specific instances. A personal-use airport lawfully existing as of September 13, 1975, shall continue to be permitted subject to any applicable regulations of the Aeronautics Division.

(g) A facility for the primary processing of forest products, provided that such facility is found to not seriously inferfere with accepted farming practices and is compatible with farm uses described in ORS 215.203(2). Such a facility may be approved for a one year period which is renewable. These facilities are intended to be only portable or temporary in nature. The primary processing of a forest product, as used in this section, means the use of a portable chipper or stud mill or other similar methods of initial treatment of a forest product in order to enable its shipment to market. Forest products, as used in this section, means timber growth upon a parcel of land or contiguous land where the primary processing facility is located.

(h) The boarding of horses for profit.

(i) A site for the disposal of solid waste approved by the governing body of a city or county or both and for which a permit has been granted under ORS 459.245 by the Department of Environmental Quality, together with equipment facilities or buildings necessary for its operation.

(j) A dwelling or mobile home not provided in conjunction with farm use provided:

(i) The dwelling or mobile home is situated upon a legal lot with soils predominantly in capability classes IV through VIII as determined by the Agricultural Capability Classification System in use by the United States Department of Agriculture Soil Conservation Service on Oct. 12, 1983.

(ii) The dwelling or mobile home, or the activities associated with the dwelling or mobile home, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use

(iii) The dwelling or mobile home is situated upon generally unsuitable land for the production of farm crops and livestock, considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of the tract. A lot or parcel shall not be considered unsuitable solely because of its size or location if it can reasonably be put to farm use in conjunction with other land.

(k) A transmission tower over 200 feet in height.

(5) **Hearings Official Special Use Approval Criteria.**

(a) Compatibility of the use or activities associated with the use with the Agricultural Lands Policies of the Rural Comprehensive Plan Policies, ORS 215.243 and the purpose of this zone.

(b) The use, or activities associated with the use, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use.

(c) The use, or activities associated with the use, complies with other conditions considered necessary by the Approval Authority in order to meet the applicable approval criteria.

(6) **Farm Operations.**

(a) A farm operation is all agricultural activities occurring under a single management. For purposes of this section, it is immaterial whether the activities occur on a single parcel of land, on contiguous parcels of land or on separate parcels of land. It is also immaterial if the operator has less than fee interest in the land on which the agricultural activity occurs.

(b) Farm operations shall be classified into one of the groups set forth in LC 16.212(6)(d) below. In the event a farm operation consists of agricultural activities described by more than one group, the activity that accounts for more than half of the gross revenue of the farm operation shall determine the group classifications.

(c) Farm operations of a size equal to or greater than the size shown for its respective group in LC 16.212(6)(d) below shall be deemed as contributing in a substantial way to the agricultural economy of the County.

(d) Farm Group ----------Size

Cash grains----------120 acres
Field crops (includes grass seed production--------160 acres
Tree fruit and nuts----------40 acres
Horticultural specialties-----20 acres
General farm, primarily crop----------320 acres
Extensive animal grazing-----120 acres
Itensive animal husbandary----40 acres
Dairy farm----------240 acres
General farm, primarily livestock----------80 acres
Berries and grapes----------20 acres
Vegetables and melons--------120 acres

(7) Area. Land within the Exclusive Farm Use District shall be designated as E-25, E-30, E-40 or E-60, consistently with Agricultural Lands Policy #10 of the Lane County Rural Comprehensive Plan, and the creation of a lot or parcel shall be subject to the following:

(a) Except as provided in LC 16.212(7)(b),(c) and (d) below, the minimum area shall be:

E-25------25 acres
E-30------30 acres
E-40------40 acres
E-60------60 acres

(b) A division of land may be allowed down to 20 acres for horticultural specialties, berries and grapes. A farm management plan including the factors identified in LC 16.212(2)(g)(v)(e) above shall address and establish the suitability of the land for the intended use.

(c) A division of land may be allowed for the nonfarm uses identified in LC 16.212(4)(c),(d),(e) and (i) above, provided the parcel for the nonfarm use is not larger than the minimum size necessary for the use.

(d) A division of land may be allowed for a dwelling not provided in conjunction with farm use if the dwelling has been approved pursuant to the above LC 16.212(4)(j) above and if the division would not conflict with the purpose of this zone.

(e) Divisions pursuant to LC 16.212(7)(a),(b),(c) or (d) above are subject to the applicable application procedures of LC Chapter 13 and the applicable review procedures of LC Chapter 14. Divisions under LC

16.212(7)(a) and (b) above shall also require that a statement be placed on the face of the map for the partition disclosing that a dwelling or mobile home is not guaranteed unless the provisions of this zone for obtaining a dwelling or mobile home are met.

(f) A person who sells or otherwise transfers real property zoned Exclusive Farm Use (E) may retain a life estsate in a dwelling or mobile home on that property and the tract of land under and around the dwelling or mobile home. Partition approval is not required for the creation of such a life estate.

(8) **Property Development Standards.** All uses or activities permitted or conditionally permitted above, except farm use, shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other proeprty lines except as provided below.

(b) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.212(8)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.212(8)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazards.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(9) **Residence Maintenance, Repair and Replacement Standards.**

(a) Maintenance and repair of lawfully existing residences shall be permitted in the Exclusive Farm Use (E) zone.

(b) Replacement of any residence lawfully existing, occupied, suitable for occupancy or in the process of being constructed shall be permitted. The replacement need not be in kind (i.e., a mobile home may replace a dwelling or vice versa). Any replacement authorized under this subsection shall be for a residence to be located on the same site as the previous residence and such replacement shall commence within one year of the date of removal of the previous residence.

NATURAL RESOURCE ZONE (NR-RCP)

RURAL COMPREHENSIVE PLAN

16.213 Natural Resource Zone (NR-RCP).

(1) **Purpose.** The Natural Resource Zone (NR-RCP) is intended to protect areas having unique or irreplaceable natural resource which are vital elements for a safe, healthful and pleasant environment for human life. The Natural Resource Zone may be applied to public and private lands where the Rural Comprehensive Plan requires natural resource site protection. The Zone is not intended to be applied to other types of resource land, such as agricultural land and forest land. To minimize the potential hazards of pollution, resource conversion and land development resulting from increases in human population, urbanization, income, leisure time and individual mobility, emphasis will be placed on limiting and regulating human activity in those areas where:

(a) The acceptable water quality of streams, lakes, estuaries of the ocean may be endangered;

(b) Watersheds and their streams or lakes are used for domestic water supplies;

(c) Vegetative cover is essential to maintain soil stability and prevent erosion;

(d) Natural conditions are vital for either unique vegetative ecosystems, aquatic or wildlife habitat; and

(e) Scenic quality or vistas or open space is unique and/or irreplaceable.

(2) **Permitted Buildings and Uses.** In the NR Zone, the following types of buildings and uses are permitted as hereinafter specifically provided for by this subsection, subject to the general provisions and exceptions set forth:

(a) The following recreational facilities and uses owned by a governmental agency or a nonprofit community organization limited to day use.

(i) Exhibitions of the natural conditions of shorelands, dunelands, forested areas, streams and lakes, marshlands, or similar areas of unique and irreplaceable value, and the vegetation and wildlife supported by such lands and waters, provided that in no event shall such activity destroy, or endanger the relationships between the natural conditions being exhibited.

(ii) Picnicking areas, day parks and playgrounds.

(iii) Accessory facilities for outdoor recreation activity such as fishing, clam digging and hunting (provided such activity is conducted only in those areas allowed pursuant to Federal,

State and Local fish and game regulations) and hiking and horseback riding.

(b) Fish and wildlife habitat management and the propagation of fish and wildlife.

(2) Special Uses - Director Approval. The following uses are subject to approval by the Director pursuant to LC 14.100:

(a) Single-family dwelling(s) or mobile home(s) for residential purpose for watchman, caretaker or operator in conjunction with use permitted in the district.

(4) Special Uses - Director Official Approval. The following uses are subject to approval by the Hearings Official pursuant to LC 14.300:

(a) Piers and boat houses.

(b) Single-family dwelling or mobile home and accessory structures.

(c) Farm uses as defined by ORS 215.203(2), and any accessory uses.

(d) Forest uses and any accessory uses.

(5) Conditional Use Criteria. Uses conditionally permitted under LC 16.213(4) above are subject to compliance with the following criteria:

(a) (i) Evidence is provided supporting reasons why the proposed use should be sited in a natural resource area.

(ii) That the proposed site is on land generally unsuitable for natural resource uses.

(b) That the proposed use will not significantly impact natural resource uses on adjacent and nearby natural resource lands, and will not significantly impact natural resources on the site of the proposed uses;

(c) That the proposed use will not significantly increase the costs of natural resource management on adjacent and nearby natural resource lands.

(d) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use;

(e) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby NR zoned lands, and these measures may be established as conditions of approval; and

(f) That the proposed use is consistent with the policies contained in the Rural Comprehensive Plan and the purpose of the NR zone.

(6) Property Development Standards.

(a) Front yard setback shall be 20 feet.

(b) Side yard setback shall be as follows:

(i) Interior yard -- 15 feet for a main building; five feet for an accessory building or structure.

(ii) Street side yard - 20 feet.

(c) Rear yard setback shall be 20 feet for a main building; five feet for an accessory building or structure.

MARGINAL LANDS ZONE (ML-RCP)

RURAL COMPREHENSIVE PLAN

16.214 Marginal Lands Zone (ML-RCP).

(1) Purpose. The Marginal Lands Zone (ML-RCP) is intended to:

(a) Provide an alternative to more restrictive farm and forest zoning.

(b) Provide opportunities for persons to live in a rural environment and to conduct intensive or part-time farm or forest operations.

(c) Be applied to specific properties consistently with the requirements of ORS 197.005 to 197.430 and the policies of the Lane County Rural Comprehensive Plan.

(2) Permitted Uses. The following uses are permitted subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) A dwelling or mobile home on a vacant legal lot created before July 1, 1983. If the legal lot is located within the Willamette Greenway, a flood plain area or a geological hazard area, approval of the mobile home or dwelling is subject to the provisions of Lane Code relating to the Willamette Greenway, floodplain or geological hazrds, whichever is applicable.

(b) A dwelling or mobile home on a vacant legal lot created pursuant to the requirements of LC 16.214(6) below.

(c) One mobile home in conjunction with an existing dwelling or mobile home on the same legal lot as the existing dwelling or mobile home as a temporary use for the term of a hardship suffered by the existing resident or a relative of the existing resident subject to compliance with the following conditions:

(i) A resident of the existing dwelling or mobile home and a resident of the mobile home are family members.

(ii) One of the residents mentioned above suffers a hardship and needs the care of the other above-mentioned resident and family member.

(iii) Satisfactory evidence of the family member's hardship is furnished which shall include:

(a) A written statement, on a form provided by the Department, from the family member's physician, therapist, or other professional counselor, disclosing the existence and general nature of the hardship.

(b) A written statement, on the form provided by the Department, disclosing the family relationship of the person with the hardship and the person who will provide care.

(iv) The temporary mobile home will be located on the same legal lot as the existing dwelling or mobile home.

(v) The temporary mobile home will be connected to the same on-site sewage disposal system serving the existing dwelling or mobile home.

(vi) The temporary mobile home will comply with sanitation and building code requirements.

(vii) Approval of temporary mobile home permits shall be valid until December 31 of the year following the year of original permit approval and may be renewed once every two years until the hardship situations cease.

(d) Part-time farms.

(e) Woodlots.

(f) Intensive farm or forest operations, including, but not limited to, farm use.

(g) Nonresidential buildings customarily provided in conjunction with farm use.

(h) Public or private schools, including all buildings essential to the operation of a school.

(i) Churches.

(j) Utility facilities necessary for public service, except commercial facilities for the purpose of generating power for use by public sale.

(k) Operations for the exploration of geothermal resources as defined by ORS 522.005.

(l) A site for the disposal of solid waste that has been ordered to be established by the Environmental Quality Commission under ORS 459.049, together with equipment and facilities or buildings necessary for its operation.

(m) The propagation or harvesting of a forest product.

(n) Community centers owned and operated by a governmental agency or a nonprofit organization, hunting and fishing preserves, parks, playgrounds and publicly owned campgrounds.

(o) Personal-use airport for airplanes and helicopter pads, including associated hanger, maintenance and service facilities. A personal- use airport as used in this section means an airstrip restricted, except for aircraft emergencies, to use by the owner, and, on an infrequent and occasional basis, by invited guests, and by commercial aviation activities in connection with agricultural operations. No aircraft may be based on a personal-use airport other than those owned or controlled by the owner of the airstrip. Exceptions to the activities permitted under this definition may be granted through waiver by the Aeronautics Division in specific

instances. A personal-use airport lawfully existing as of September 13, 1975, shall continue to be permitted subject to any applicable regulations of the Aeronautics Division.

(3) Uses Subject To Director Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, and approval of the application pursuant to LC 14.100 and compliance with the criteria and provisions of this Chapter of Lane Code.

(a) Privately owned campgrounds.

(b) Golf courses.

(c) Commercial utility facilities for the purpose of generating power for public use by sale.

(d) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in a dwelling or mobile home, or other buildings normally associated with uses permitted under LC 16.214(2) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.214(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions

of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(e) A facility for the primary processing of forest products, provided that such facility is found to not seriously interfere with accepted farming practices and is compatible with farm uses described in ORS 215.203(2). Such a facility may be approved for a one-year period which is renewable. These facilities are intended to be only portable or temporary in nature. The primary processing of a forest product, as used in this section, means the use of a portable chipper or stud mill or other similar methods of initial treatment of a forest product in order to enable its shipment to market. Forest products, as used in this section, means timber grown upon a parcel of land or contiguous land where the primary processing facility is located.

(f) The boarding of horses for profit.

(g) A site for the disposal of solid waste approved by the governing body of a city or county or both and for which a permit has been granted under ORS 459.245 by the Department of Environmental Quality together with equipment, facilities or buildings necessary for its operation.

(h) Commercial activities that are in conjunction with farm use.

(4) Criteria For Director Approval. Uses specified in LC 16.214 (3) and (4) may be allowed if found to comply with the following criteria:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character; to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding.

(5) Uses Subject To Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, approval of the application by the Hearings

Official pursuant to LC 14.300 and compliance with the approval criteria of LC 16.214(4) above and provisions of this Chapter of Lane Code:

(a) Operations conducted for the mining and processing of geothermal resources as defined by ORS 522.005 or exploration, mining and processing of aggregate or other mineral resources or other subsurface resources.

(6) Area. Land in a Marginal Land zone may be divided as follows:

(a) Into lots or parcels containing at least 10 acres if the lots or parcels are not adjacent to land zoned Exclusive Farm Use (E), Nonimpacted Forest Land (F-1), Impacted Forest Land (F-2), or if it is adjacent to such land, the land qualifies for designation as marginal land pursuant to ORS Chapter 197.

(b) Into lots or parcels containing 20 acres or more if the lots or parcels are adjacent to land zoned Exclusive Farm Use (E), Nonimpacted Forest Land (F-1) or Impacted Forest Land (F-2), and that land does not qualify as marginal land pursuant to ORS Chapter 197.

(c) A parcel of any size necessary to accommodate any of the nonresidential uses identified in LC 16.214(2)(h),(i),(j),(l) and (n) and LC 16.214(3)(a),(c),(f) and (g).

(7) Property Development Stamdards. All uses or activities permitted or conditionally permitted above shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines, except as provided below.

(b) Class I Stream and Riparian Vegetation Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 50-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to

LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenace, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of the riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.214(7)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.214(7)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazard.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Height. None.

(e) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(f) Parking. Off street parking shall be provided in accordance with LC 16.250.

PARK AND RECREATION ZONE (PR-RCP)

RURAL COMPREHENSIVE PLAN

16.215 Park and Recreation Zone (PR-RCP).

(1) Purpose. The purpose of the Park and Recreation Zone (PR-RCP) is:

(a) To establish districts within which a variety of recreational activities may be conducted as outright permitted uses without interference from other nonrecreational uses.

(b) To establish standards and criteria to permit and conditionally permit recreational activities within areas for which a built upon or committed exception to a Statewide Planning Goal has been taken, or within a designated nonresource area, or within resource areas for which an exception to a Satewide Planning Goal has not been taken.

(c) To provide protective measures for riparian vegetation along Class I streams designated as significant in the Rural Area Comprehensive Plan.

(d) To implement the policies of the Lane County Rural Area Comprehensive Plan.

(2) Permitted Uses. The following uses and activities are permitted in any area zoned PR-RCP subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) General Recreation Parks including picnic areas, camping grounds, hiking trails, playfields, bathing beaches and other similar outdoor, manmade recreation facilities.

(b) Leisure and Ornamental Parks largely for scenic or ornamental purposes, including monuments, statutes, beaches and children's play facilities.

(c) Group or Organized Camps for children and adults which may include any of the above uses and activities and other uses and activities, such as swimming pools, meeting halls, sleeping shelters, cafeterias and shelters for indoor recreation.

(d) Recreation vehicle parking spaces in conjunction with any of the above three permitted uses.

(e) One residence on the subject property for a caretaker.

(f) Marine terminals and associated areas that are primarily for recreational marine craft, excluding sale or land storage of marine craft, but including any incidental sale of gas or minor repair.

(g) Forest Uses.

(h) Farm Uses.

(i) Nonresidential uses necessary and accessory to the uses listed above such as:

(i) Fire prevention, detection and suppression facilities.

(ii) Access roads and roads for management and safety.

(iii) Storage buildings.

(iv) A carport or garage in conjunction with #5 above.

(v) Restroom, washroom or shower facilities.

(vi) Offices.

(3) Permitted Uses Within An Exception Area. The following uses and activities are permitted whenever the subject property is included within an area for which a built upon or committed exception has been taken to a Statewide Planning Goal and incorporated into the Lane County Rural Area Comprehensive Plan or which has been designated as nonresource land in the Lane County Rural Comprehensive Plan:

(a) Any of the uses permitted within the above LC 16.215(2).

(b) Retail trade of food or new general merchandise conducted within a building not exceeding 750 square feet in total floor area.

(c) Golf courses with or without a country club.

(d) Riding Stables.

(e) Bowling.

(f) Gymnasium or athletic club.

(g) Yachting Clubs.

(h) Motel, hotel, lodges and other forms of recreational lodging. Any of the above lodging uses may include a restaurant, retail trade of food or new general merchandise exceeding the standard set in LC 16.215(3)(b) above.

(i) Game rooms, miniature golf, go cart tracks.

(j) Boat rentals or boat storage and incidental minor repairs and sale of gas.

(k) Country clubhouse for a golf course which may include a restaurant, retail trade of food or new general merchandise exceeding the standard set in LC 16.215(3)(b) above.

(4) Uses Subject to Hearings Official Approval. The following uses and activities are conditionally permitted subject to submital of an application pursuant to LC 14.050, approval of the application by the Hearings Official pursuant to LC 14.300, and subject to the compliance with the conditional use criteria below:

(a) Race track.

(b) Amusement Park, carnival, circus.

(c) Stadium.

(d) Fairgrounds and Amusement Park.

(e) Recreational shooting.

(f) Airport and flying field.

(5) Conditional Use Permit Criteria. Uses conditionally permitted above shall be subject to compliance with the following criteria:

(a) The subject property is included within an area for which an exception has been taken to a Statewide Planning Goal and incorporated into the Lane County Rural Area Comprehensive Plan.

(b) The proposed use will not adversely affect the livability, appropriate use, natural resources or scenic character of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character; to the generation of traffic and capacity of surrounding streets; and to any other relevant impact to the use.)

(c) The proposed use will not be adversely affected by natural hazards, such as floods, slides, erosion.

(d) The proposed use will not alter the stability of the overall land use pattern in the area nor interfere with farm and forest practices and will be compatible with the retention of existing and potential forest uses on the surrounding forest lands.

(e) When a use is proposed in an area designated as Major or Peripheral Big Game Range or as Sensitive Fish and Water fowl Areas as shown on the Lane County Wildlife inventory, the Oregon Department of Fish and Wildlife shall be notified and their comments shall be considered in evaluating the proposed use.

(f) The proposed use will have a water supply of sufficient quantity and quality to meet reasonably foreseesable needs.

(6) Property Development Standards. All uses or activities permitted or conditionally permitted above, except commercial forest practices regulated by the Oregon Forest Practices Act, shall be subject to the following development standards:

(a) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in

violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(b) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.215(6)(b)(i) above. Where vegetation removal beyond that allowed in LC 16.215(6)(b)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Vegetation removal necessary to provide water access for a water dependent use.

(b) Removal of dead or diseased vegetation that poses a safety or health hazards.

(c) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(c) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

QUARRY AND MINE OPERATIONS COMBINING ZONE (/QM-RCP)

RURAL COMPREHENSIVE PLAN

16.216 Quarry and Mine Operatons Combining Zone (/QM-RCP).

() Purpose. The purpose of the Quarry and Mine Operations Combining Zone (/QM-RCP) is to:

(a) Recognize that minerals and materials within the County are an unrenewable resource, and that extraction and processing are beneficial to the economy of the County and the welfare of its people.

(b) Protect major deposits of minerals, rock and related material resources with appropriate zoning.

(c) Establish procedures for the protection of public health and safety on and adjacent to land where quarry and mine blasting operations are occurring.

(d) Establish County standards in the Lane Manual to be used in reviewing referrals from State and Federal Agencies of Operation and Reclamation Plans, pollution control permits and similar permits.

(e) Provide for cooperation between private and governmental entities in carrying out the purposes of this Chapter.

(f) To implement the policies of the Lane County Rural Comprehensive Plan.

((2) Intent. The Quarry and Mine Operations Combining Zone shall be available for consideration and use by the County for new or existing operations when requests are received as part of an areawide or legislative rezoning, or a specific property or quasi-judicial rezoning.

When property under consideration for /QM zoning is in close proximity to existing and planned uses potentially incompatible with /QM uses, the application of the Quarry and Mine Operations Combining Zone may be limited to a specific portion of a property in order to encourage the compatibility and proper management of land uses.

The Quarry and Mine Operations Combining Zone is intended to be applied only to those operations which have been evaluated through the Goal #5 Administrative Rule conflict resolution process. Other quarry and mining operations of short-term or intermittent duration should be provided pursuant to the special use provisions of the various zones.

(3) Definitions. For the purposes of this section only, the following words, terms and phrases are defined and supercede definitions otherwise provided in this Code:

Minerals. Includes soil, coal, clay, stone, crushes hard rock quarry products, metallic ore and any other solid material or substance excavated for commercial, industrial or construction use from natural deposits. "Minerals" do not include loam, sand,

gravel or other aggregate materials created and/or deposited by water movement.

Mining Refuse. All waste materials, soil, rock, mineral, liquid, vegetation and other materials resulting from or displaced by quarry and mining extraction operations within the operating permit area, including all waste materials deposited in or upon lands within such operating permit area.

Operations Plan. A written proposal submitted to the State Department of Geology and Mineral Industries under the requirements of ORS 517.790.

Operator. Any individual, public or private corporation, political subdivision, agency, board or department of this State, any municipality, partnership, association, firm, trust, estate or any other legal entity whatsoever that is engaged in quarry and extraction operations.

Overburden. The soil, rock and similar materials that lie above natural deposits or minerals.

Owner. The person possessing legal rights to the mineral deposit being mined.

Quarry and Mine Extraction. All or any part of the process of removing mineral deposits exposed by any method, including open-pit mining operations, auger mining operations, shaft mining, the construction of borrow pits, processing of extracted minerals and exploration activities.

Reclamation. The employment of procedures in a quarry and mining extraction operation designed to minimize as much as practicable the impact such operations have on the environment, and to provide for the rehabilitation of land affected by such operations. Reclamation includes the rehabilitation of plant cover, soil stabilization, water resource protection and other measure appropriate to the subsequent beneficial use of such mined and reclaimed lands.

Reclamation Plan. A written proposal for the reclamation of the land area affected by a quarry and mine extraction operation submitted to the State Department of Geology and Mineral Industries.

(4) Permitted Buildings and Uses. In the Quarry and Mine Operations Combining District, the following types of buildings and uses are permitted as hereafter specifically provided for by this section, subject to the provisions of the Quarry and Mining Operations Reclamation Permit and exceptions set forth in this Chapter;

(a) Uses permitted in the parent zone with which the /QM zone is combined.

(b) Extracting and storing of minerals, including equipment and materials necessary to carry out these functions.

(c) Plants for the processing of minerals from quarry and mine extraction operations.

(d) Sale of products generated from the quarrying and mining operation.

(e) Activities permitted as part of the reclamation process provided for in the Reclamation Plan.

(f) Structures and buildings used in conjunction with the extracting and storing of minerals.

(5) Permits for Quarry and Mine Extraction.

(a) General. No quarry or mining extraction or related operations may be initiated on land zoned as Quarry and Mine Operations Combining Zone (/QM) until a surface mining permit has been issued by the Oregon Department of Geology and Mineral Industries.

(i) Each permit application, Operation and Reclamation Plan referred to the Director shall be reviewed following the Operation Standards and Reclamation Standards set forth in Lane Manual.

(6) Blasting Notice and Records. Operators using explosives for quarry and mine extraction shall follow explosive regulations and use commonly acceptable engineering standards based on physical conditions and atmospheric conditions of the site so as to prevent injury to persons and damage to public and private property.

(a) Notice of Blasting. When blasting is to be done within 500 feet of an occupied building, the operator, or an authorized agent, shall notify all ocucpants that a blast is to be initiated. Such notice shall be given not more than six hours nor less than 30 minutes prior to detonation and shall include the approximate time of the blast.

(b) Blasting Records. Each operator shall maintain a record of each blast for at least two years. These records shall be available to the County, the State Department of Geology and Mineral Industries and other governmental agencies with appropriate jurisdiction upon request. Such records shall show the following for each blast:

(i) Name of quarry or mine.

(ii) Date, time and location of blast.

(iii) Description of type of explosives and accessories used.

(iv) Time interval of delay in milliseconds.

(v) Number of different delays.

(vi) Number of holes per delay.

(vii) Nominal explosive weight per hole.

(viii) Total explosive weight per delay.

(ix) Total weight of explosives per blast.

(x) Blast hole diameter, depth, spacing and stemming height.

SAND, GRAVEL & ROCK PRODUCTS ZONE (SG-RCP)

RURAL COMPREHENSIVE PLAN

16.217 Sand, Gravel & Rock Products Zone (SG-RCP).
LC 10.205-05 to -81 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as SG-RCP:

(1) Delete LC 10.205-10(3)(d) and (f).

(2) Delete LC 10.205-15.

(3) Add the following to LC 10.205-05:

"(9) Implement the policies of the Lane County Rural Comprehensive Plan.

(10) Be applied only to those sites which have been evaluated consistently with the Statewide Planning Goal #5 Administrative Rule conflict resolution process."

(4) Add the following to LC 10.205-05, at the end:

"The SG-RCP zone shall only be applied to those sites which have been evaluated consistently with the Statewide Planning Goal #5 Administrative Rule conflict resolution process."

(5) Insert "and any additional dollar amounts determined by the Director to be necessary for site restoration" as follows:

(a) In LC 10.205-52(1), fourth line, following "per acre".

(b) In LC 10.205-52(1), ninth line, following "per acre".

(c) In LC 10.205-52(3), last line, following "per acre".

(6) Add the following to subsection 10.205-81(1)(c):

"5. The County Hydrologist.

6. The County Floodplain Specialist."

(7) Amend LC 10.205-10 by deleting the first four lines and substituting the following:

"-10 Permitted Uses. In the SG-RCP zone, the following uses are permitted subsequent to the following restriction: For any property designated in the Eugene-Springfield Metropolitan Plan as significant in terms of OAR 660-16-000/025 and designated as '1B', a Goal 5 ESEE consequences analysis per the Goal #5 Administrative Rule must first be completed. If the landowner and County do not agree on the method to achieve the Goal, the matter shall be forwarded to the Hearings Official for processing consistent with LC 16.100."

SAND, GRAVEL & ROCK PRODUCTS-CONTROLLED PROCESSING ZONE (SG-CP-RCP) RURAL COMPREHENSIVE PLAN

16.218 Sand, Gravel & Rock Products-Controlled Processing Zone (SG-CP-RCP).

LC 10.210-05 to -20 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as SG-CP-RCP:

(1) Delete the following portion of -20(1) and substitute the following language:

DELETION: "...for conditional use permits in this Chapter (LC 10.230-20)."

SUBSTITUTE: "...in LC 10.210-25 below."

(2) Add "-25. Operational Plan Approval Criteria. Compliance to the following criteria is required as provided in LC 10.210-20(1) above:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity; and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverge and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding."

(3) Add the following to LC 10.210-05, at the end:

"The SG-CP-RCP zone shall only be applied to those sites which have been evaluated consistently with the Statewide Planning Goal #5 Administrative Rule conflict resolution process."

(4) Amend LC10.210-10 by deleting the first four lines and substituting the following:

"-10 Permitted Uses. In the SG-CP-RCP zone, the following uses are permitted subject to the

following restriction: For any property designated in the Eugene-Springfield Metropolitan Plan as significant in terms of OAR 660-16-000/025 and designated as '1B', a Goal #5 ESEE consequences analysis per the Goal #5 Administrative Rule must first be completed. If the landowner and County do not agree on the method to achieve the Goal, the matter shall be forwarded to the Hearings Official for processing consistent with LC 16.100."

PUBLIC FACILITIES ZONE (PF/RCP)

RURAL COMPREHENSIVE PLAN

16.219 Public Facilities Zone (PF-RCP).

(1) Purpose. The Public Facilities Zone (PF-RCP) is intended to provide land for those public and semipublic functions that provide a service and are by nature an intensive or unusual use not normally associated with other zones. The zone is not intended for facilities that are primarily for an open space recreational nature, and is intended for those areas that have been included in an exception as part of the Rural Comprehensive Plan.

(2) Permitted Uses. The following uses are permitted subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) Utilities essential to the physical, economic and social welfare of an area such as:

(i) Electric utility: electric transmission right-of-way, electric generation plant, electricity regulating substations.

(ii) Gas utility: gas pipeline right-of-way, natural or manufactured gas storage and distribution points, gas pressure control stations.

(iii) Water utility: water pipeline right-of-way, water treatment plants, water storage.

(iv) Sewage disposal: sewage treatment plants, sewage sludge drying beds, sewage pressure control stations.

(v) Solid waste disposal: refuse incineration, central garbage grinding stations, compositing plants, sanitary landfills and refuse disposal.

(b) Educational services such as:

(i)ttNursery, primary and secondary education.

(ii) Colleges and professional schools.

(iii) Special training schools such as those for: vocational, trade, business, art, music, dancing, driving, gymnastics, correspondence, etc.

(c) Religious activities including churches, synagogues, temples, monastary or convent, etc.

(d) Welfare and charitable services.

(e) Professional membership organizations.

(f) Labor unions and similar labor organizations.

(g) Civic, social and fraternal associations.

(h) Business assocations.

(i) Sports assembly such as stadium, arenas and race tracks.

(j) Governmental services such as: post office, fire station and police station.

(k) Cemeteries.

(l) Fairgrounds which may include a race track.

(m) Health Services such as: dental, hospital, medical laboratory, dential laboratory, sanitarium, convalescent and rest home services, medical clinics.

(n) Communication and facilities such as:

(i) Telephone: exchange stations, relay towers.

(ii) Telegraph: message centers, transmitting and reciving stations.

(iii) Radio: broadcasting studios, stations, towers.

(iv) Television: broadcasting studio, transmitting stations and relay tower.

(o) Heliport.

(p) A dwelling or mobile home for one or more persons employed on the premises.

(3) **Siting Requirements.** Development of all uses in LC 16.219(2) above is subject to the requirements of LC 16.257 site review procedures.

(4) **Property Development Standards.** All uses or activities permitted or conditionally permitted above shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines, except as provided below.

(b) Class I Stream and Riparian Vegetation Setbacks. No structure other than a fence or sign shall be located closer than 50 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lessor setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 50-foot setback to the location of the proposed structure, and the riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Rural Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.219(4)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.219(4)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provice water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazards.

(d) Removal of vegetation necessary for the maintenance or placement of structure shoreline stabilization.

(d) Height. None.

(e) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(f) Parking. Off street parking shall be provide in accordance with LC 16.250.

LIMITED COMMERCIAL ZONE (C-1, RCP)

RURAL COMPREHENSIVE PLAN

16.220 Limited Commercial Zone (C-1, RCP). LC 10.155-10 to -40 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as C-1/RCP:

(1) Delete LC 10.155-10(1) and revise it to read, "(1) Any use permitted in the RG-RCP zone (LC 16.230) in accordance with the requirements of this zone."

(2) Delete "(LC 10.300-05)" in LC 10.155-10(6) and substitute "(LC 16.250)" in its place.

(3) Delete LC 10.155-15 and revise it to read:

"-15. Uses Subject to Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, review of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the criteria and standards specified in this Chapter of Lane Code:

(1) Heliport, together with accessory land uses relevant and appropriate to the operation.

(2) Commercial breeding kennel or commercial kennel.

(3) Amusemnet park, carnival or circus.

(4) Radio and television stations.

(5) Recreation vehicle park.

(6) Campground or picnic area."

(4) Delete "(Also see LC 10.300-10)" in LC 10.155-21 and substitute "(Also see LC 16.250)".

(5) Delete "(Also see LC 10.300-15 and LC 15.065)" LC 10.155-23 and substitute "(Also see LC 16.250 and LC Chapter 15).

(6) Delete "(Also see LC 10.300-20)" in LC 10.155-40 and substitute, "(Also see LC 16.250)".

(7) Add the following subsection:

"-20. Special Use Approval Criteria. Uses allowed under the above subsection -15 shall comply with the following criteria:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be

given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding.

(8) Add the following to LC 10.155-23:

"(3) The Class I Stream and Riparian Vegetation requirements of LC 16.299-35(2) and (3) shall apply to development of property in the C-1, RCP Zone."

NEIGHBORHOOD COMMERCIAL ZONE (C-2, RCP)

RURAL COMPREHENSIVE PLAN

16.221 Neighborhood Commercial Zone (C-2, RCP). LC 10.160-10 to -35 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as C-2, RCP.

(1) In LC 10.160-10(27), delete "(LC 10.300-05)" and substitute "LC 16.250)" in its place.
"LC 16.250)" in its place.

(2) Delete LC 10.160-15 and revise it to read:

"-15. Uses Subject to Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, review of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the criteria and standards specified in this Chapter of Lane Code:

(1) THeliport, together with accessory land uses relevant and appropriate to the operation.

(2) Commercial breeding kennel or commercial kennel.

(3) Amusement park, carnival or circus.

(4) Radio and television stations.

(5) Recreation vehicle park.

(6) Campground or picnic area.

(3) Delete "(Also see LC 10.300-15 and LC 15.065)" in LC 10.160-23 and substitute "(Also see LC 16.250 and LC Chapter 15)" in its place.

(4) Delete "(LC 10.300-05)" in LC 10.160-35(1) and substitute "(LC 16.250)" in its place.

(5) Delete "(LC 10.145)" in LC 10.160-35(2) and substitute "(LC 16.230) in its place.

(6) Add the following subsection:

"-20. Special Use Approval Criteria. Uses specified under the above LC 10.160-15 shall comply with the following criteria:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public

facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding."

(7) Add the following to LC 10.160-23:

"(3) The Class I Stream and Riparian Vegetation requirements of LC 16.299-35(2) and (3) shall apply to development of property in the C-2, RCP Zone."

COMMERCIAL ZONE (C-3, RCP)

RURAL COMPREHENSIVE PLAN

16.222 Commercial Zone (C-3, RCP). LC 10.165-10 to -35 is incorporated as fully set forth with the following exceptions, and shall be designated on the zoning map as C-3, RCP:

(1) Delete LC 10.165-10(1) and revise it to read, "(1) Any use permitted in the RG-RCP and C-2, RCP zones (LC 16.230 and 16.221) in accordance with the requirements of this zone."

(2) Delete LC 10.165-15 and revise it to read:

"-15. Uses Subject to Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, review of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the criteria and standards specified in this Chapter of Lane Code:

(1) Heliport, together with accessory land uses relevant and appropriate to the operation.

(2) Commercial breeding kennel or commercial kennel.

(3) Amusement park, carnival or circus.

(4) Radio and television stations.

(5) Recreation vehicle park."

(6) Campground or picnic area.

(3) Add the following subsection:

"-20. Special Use Approval Criteria. Uses allowed under the above LC 10.165-15 shall comply with the following criteria:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable and neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding."

(4) In LC 10.165-23, delete "(Also see LC 10.300-15 and LC 15.065)" and substitute "(Also see LC 16.250 and LC Chapter 15)" in its place.

(5) In LC 10.165-35(1), delete "(LC 10.300-05)" and substitute "(LC 16.250)" in its place.

(6) Add the following to LC 10.165-23:

"(4) The Class I Stream and Riparian Vegetation requirements of LC 16.299-35(2) and (3) shall apply to development of property in the C-3, RCP Zone."

RURAL COMMERCIAL ZONE (C-R, RCP)

RURAL COMPREHENSIVE PLAN

16.223 Rural Commercial Zone (C-R, RCP).

(1) Purpose. The purpose of the Rural Commercial Zone (C-R, RCP) is:

(a) To provide goods and services needed by rural residents.

(b) To provide services and facilities for tourists and travelers.

(c) To implement the policies of the Lane County Rural Area Comprehensive Plan, primarily those policies related to commercial development of areas identified as committed or built upon.

(d) To provide protective measures for riparian vegetation along Class I streams designated as significant in the Rural Area Comprehensive Plan.

(2) Permitted Uses. The following uses and activities are permitted subject to the general provisions and exceptions sepcified by this Chapter of Lane Code:

(a) Retail trade of food.

(b) Retail trade of new general merchandise.

(c) Retail trade of building materials, hardware or farm equipment conducted within an enclosed building.

(d) Restaurants.

(e) Service stations.

(f) Personal services.

(g) Finance, insurance, banking and real estate services.

(h) Professional services.

(i) Retail trade of secondhand general merchandise within an enclosed building.

(j) Bus passenger terminal.

(k) Civic, social and fraternal meeting places.

(l) Boat charter and rental, including fishing equipment.

(m) Hotel, motel or lodge, and related recreational facilities.

(n) Bed and breakfast accommodation.

(o) Veterinarian clinic.

(p) Bars, night clubs and taverns.

(q) Retail trade of hay, grains or goods for animal consumption.

(r) Day camp and picnic areas.

(s) Outdoor tourist attractions featuring displays of educational or historical value.

(t) Indoor or outdoor recreational activities including: tennis courts, ice skating, roller skating, riding stables, bowling, skiing and tobogganing, play

lots or tot lots, playgrounds, game rooms, gymnasium, swimming pools, etc.

(u) A dwelling or mobile home in conjunction with an above permitted use.

(v) Uses accessory to an above permitted use.

(w) A noncommercial kennel.

(x) Indoor or outdoor theaters.

(3) Special Uses Subject To Director Approval. The following uses and activities are permitted subject to prior submittal of an application pursuant to LC 14.050 and subject to Director approval of such application pursuant to LC 14.100 and the general provisions and considerations specified by this Chapter of Lane Code:

(a) Uses and activities:

(i) Retail trade of building materials, hardware or farm equipment conducted partially or wholly outdoors.

(ii) Equipment rental and leasing service.

(iii) Overnight campground and picnic areas.

(iv) Recreational Vehicle Park.

(v) Vehicle repair service.

(vi) Recreational vehicle and boat storage.

(vii) Marina.

(viii) A commercial kennel or a commercial breeding kennel.

(b) Criteria. The above uses should substantially conform to the following criteria:

(i) That the location, design, size, shape and arrangement of the uses and structures are sufficient for the proposal intent and are compatible with the surrounding vicinity.

(ii) That there is no unnecessary destruction of existing healthy trees or other major vegetation, and that due consideration is given to the preservation of distinctive historical or natural features.

(iii) That the quantity, location, height and materials of walls, fences, hedges, screen planting and landscape areas are such that they serve their intended purpose and have no undue adverse effect on existing or contemplated abutting land use.

(iv) The suitable planting of ground cover or other surfacing is provided to prevent erosion and reduce dust.

(v) That the location, design and size of the uses are such that the residents or establishments to be accommodated will be adequately served by community facilities and services or by other facilities suitable for the intend uses.

(vi) That, based on anticipated traffic generation, adequate additional right-of-way and road improvements must be provided by the development in order to promote traffic safety and reduce traffic congestion. Consideration shall be given to the need and feasibility of widening and improving abutting streets to specifications of Lane Code, Chapter 15, "Roads", and also to the necessity for such additional requirements as lighting, sidewalks and turn and deceleration/acceleration lanes.

(vii) That there is a safe and efficient circulation pattern within the boundaries of the development. consideration shall include the layout of the site with respect to the location and dimensions of vehicular and pedestrian entrances, exits, drives, walkways, buildings and other related facilities.

(viii) That there are adequate off street parking and loading/unloading facilities provided in a safe, efficient and pleasant manner. Consideration shall include the layout of the parking and loading/unloading facilities, and their surfacing, lighting and landscaping.

(ix) That all signs and illumination are in scale and harmonious with the site and area.

(x) That adequate methods are provided to ensure continued maintenance and normal replacement of facilities, landscaping and other improvements etc. that are required.

(4) Area. No minimum established, except what is necessary to accommodate any necessary sewerage and potable water concerns. Divisions shall comply with Lane Code, Chapter 13.

(5) Property Development Standards. All uses or activities permitted or conditionally permitted above shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines except as provided below.

(b) Class 1 Stream and Riparian Vegetation Setbacks. No structure other than a fence or sign shall be located closer than 50 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 50-foot setback to the location of the proposed structure and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.133(5)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.233(5)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of deed or diseased vegetation that poses a safety or health hazards.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Heights. Maximum height of any structure shall be 45 feet.

(e) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be flashing or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(iv) No sign shall project above the height of the tallest structure on the property.

(f) Parking. Off street parking shall be provided in accordance with LC 16.250.

LIMITED INDUSTRIAL ZONE (M-1, RCP)

RURAL COMPREHENSIVE PLAN

16.224 Limited Industrial Zone (M-1, RCP). LC 10.170-05 to -35 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as M-1, RCP.

(1) Delete the first four lines of LC 10.170-15 and substitute in its place the following:

"-15. Uses Subject to Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, review of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the criteria and standards specified in this Chapter of Lane Code."

(2) Add the following subsection:

"-20. Special Use Approval Criteria. Uses allowed under the above LC 10.170-15 shall comply with the following criteria:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will no create a hazardous natural condition such as erosion, landslide, flooding."

(3) TIn LC 10.170-23 delete "(Also see LC 10.300-15 and LC 15.065)" and substitute in its place "(Also see LC 16.250 and LC 15)".

(4) In LC 10.170-35, delete "(Also see LC 10.300-05)" and substitute in its place "(Also see LC 16.250)."

(5) Add the following to LC 10.170-23:

"(3) The Class I Stream and Riparian Vegetation requirements of LC 16.299-35(2) and (3) shall apply to development of property in the M-1, RCP Zone."

LIGHT INDUSTRIAL ZONE (M-2, RCP)

RURAL COMPREHENSIVE PLAN

16.225 Limited Industrial Zone (M-2, RCP. LC 10.175-05 to -35 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as M-2, RCP.

(1) In LC 10.175-10(2), delete "(LC 10.170-10)" and substitute in its place "(LC 16.224-10)".

(2) Delete LC 10.175-15 entirely and add the following:

"-15. Uses Subject to Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, review of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the criteria and standards specified in this Chapter of Lane Code:

(1) Any of the special uses allowed in the M-1, RCP zone (LC 16.224-15)".

(3) Add the following subsection:

"-20. Special Use Approval Criteria. Uses allowed under the above LC 10.175-15 shall comply with the following criteria:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate develoment of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding."

(4) In LC 10.175-23, delete "(Also see LC 10.300-15)" and substitute in its place "(Also see LC 16.250 and LC Chapter 15)."

(5) In LC 10.175-35, delete "(Also see LC 10.300-05)" and substitute in its place "(Also see LC 16.250)".

(6) Add the following to LC 10.175-23:

"(4) The Class I Stream and Riparian Vegetation requirements of LC 16.299-35(2) and (3) shall apply to development of property in the M-2/RCP Zone."

HEAVY INDUSTRIAL ZONE (M-3, RCP)

RURAL COMPREHENSIVE PLAN

16.226 Heavy Industrial Zone (M-3, RCP). LC 10.180-05 to -35 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as M-3, RCP.

(1) In LC 10.180-10(2), delete "(LC 10.175-10)" and substitute in its place "(LC 16.225-10)".

(2) Delete LC 10.180-15 entirely and substitute in its place:

"15. Uses Subject to Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, review of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the criteria and standards specified in this Chapter of Lane Code:

(1) Any of the special uses allowed in the M-1, RCP zone (LC 16.224-15)."

(3) Add the following subsection:

"-20. Special Use Approval Criteria. Uses allowed under the above LC 10.180-15 shall comply with the following criteria:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operation characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding."

(4) In LC10.180-23, delete "(Also see LC 10.300-15 and LC 15.065)" and substitute in its place "(Also see LC 16.250 and LC Chapter 15)."

(5) In LC 10.180-35, delete "(Also see LC 10.300-05)" and substitute in its place "(Also see LC 16.250)."

(6) Add the following to LC 10.180-23:

"The Class I Stream and Riparian Vegetation requirements of LC 16.299-35(2) and (3) shall apply to development of property in the M-3, RCP Zone."

SUBURBAN RESIDENTIAL ZONE (RA-RCP)

RURAL COMPREHENSIVE PLAN

16.229 Suburban Residential Zone (RA-RCP).

(1) Purpose. The purpose of the Suburban Residential Zone (RA-/RCP) is:

(a) To provide opportunities for people to live in a rural area.

(b) To allow primary and accessory residential uses and nonresidential uses which may be compatible with primary residential uses.

(c) To implement the policies of the Rural Comprehensive Plan, primarily those policies related to the residential development of areas identified as committed or built upon and located within a community area.

(d) To provide protective measures for riparian vegetation along Class I streams designated as significant in the Rural Comprehensive Plan.

(2) Permitted Uses. The following uses and activities are permitted subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) One single-family dwelling, mobile home or duplex on a legal lot.

(b) One single-family dwelling or mobile home on a legal lot, in addition to the above, to provide residence for an immediate family member or members of the owner, provided that the minimum average density per residential unit complies with the following standards:

(i) Where a community sewerage system and community water system is available, the ratio of residences to area shall not exceed one residence per 10,000 square feet.

(ii) Where an on-site sewage disposal system and community water system is available, the ratio of residences to area shall not exceed one residence per 20,000 square feet.

(iii) Where an individual water system and on-site sewage disposal system is available, the ratio of residences to area shall not exceed one residence per acre.

(iv) In all cases, an approved means of sewerage must be obtained.

(c) One temporary mobile home in conjunction with an existing dwelling or mobile home subject to compliance with the following conditions:

(i) A resident of the existing dwelling or mobile home and a resident of the mobile home are family members.

(ii) One of the residents mentioned above suffers a hardship and needs the care of the other above-mentioned resident and family member.

(iii) Satisfactory evidence of the family member's hardship is furnished which shall include:

(a) A written statement, on a form provided by the Department, from the family member's physician, therapist, or other professional counselor, disclosing the existence and general nature of the hardship.

(b) A written statment, on the form provided by the Department, disclosing the family relationship of the person with the hardship and the person who will provide care.

(iv) The temporary mobile home will be located on the same legal lot as the existing dwelling or mobile home.

(v) The temporary mobile home will be connected to the same on-site sewage disposal system serving the existing dwelling or mobile home.

(vi) The temporary mobile home will comply with sanitation and building code requirements.

(vii) Approval of temporary mobile home permits shall be valid until December 31 of the year following the year of original permit approval and may be renewed once every two years until the hardship situations cease.

(d) Residential Home.

(e) Buildings accessory to a dwelling, mobile home or duplex, such as garages, storerooms, woodsheds, laundry, playhouses, greenhouses, hobby shop, animal or fowl shelter, or similar and related accessory uses.

(f) Bed and breakfast accommodation.

(g) Farm use, subject to conditions and limitations provided herein:

(i) The total number of livestock allowed on a property shall be limited to the area of the property divided by the total minimum area required for each animal listed below:

(a) One horse, cow or swine per acre; or,

(b) One goat or sheep per half acre.

(ii) A minimum of 500 square feet of area shall be required for each chicken, other fowl or rabbit kept on the property.

(iii) The number of colonies of bees allowed on a property shall be limited to one colony for each 10,000 square feet of lot area and shall be located no closer than 50 feet from any property line.

(h) Forest uses, including the propagation and harvesting of forest products.

(i) Roadside stand.

(j)tTPublic and semipublic buildings, structures and uses rendering direct service to the public in local areas, such as fire stations, utility substations, pump stations and wells.

(k) Noncommercial dog kennels, subject to conditions and limitations provided herein:

(i) For more than three dogs over four months of age, there shall be at least 5,000 square feet of lot area for each dog on the lot.

(ii) Where the lot area is 20 acres or less, the maximum number of dogs over four months of age shall be eight.

(iii) Where the lot area exceeds 20 acres and where more than eight dogs over four months of age are accommodated, kennel structures and fenced runs shall be required for all such dogs in excess of eight and shall be located at least 100 feet from any adjoining property.

(iv) All dogs shall be owned by the kennel owner, except those temporarily kept for purposes of breeding.

(l) Rock, sand, gravel or loam excavation or extraction, subject to conditions and limitations herein:

(i) The materials excavated or extracted are to be used solely on the subject property and are not offered for sale or remuneration.

(ii) The materials excavated or extracted do not exceed 500 cubic yards annually per acre of the subject property.

(m) Guest house.

(n) A mobile home park lawfully existing on a property prior to February 29, 1984.

(o) Noncommercial kennel.

(3) Uses Subject to Director Approval. The following uses and activities are permitted subject to prior submittal of an application pursuant to LC 14.050 and subject to Director approval of such application pursuant to LC 14.100 and the general provisions and criteria specified by this Chapter of Lane Code:

(a) One dwelling or mobile home for a person employed on the same legal lot as the owner's dwelling or mobile home, provided:

(i) The minimum acreage density per residence unit as specified in the above LC 16.229(2)(b) is maintained.

(ii) The location of the additional residence would not preclude the future parititoning of the property, if the residence and property on which it

is to be located would be partitioned from the parent parcel. A site plan locating the proposed residence and delineating the feasibility of the partition shall be submitted with the application.

(b) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in a dwelling or mobile home, or other buildings normally associated with uses permitted under the above LC 16.229(2).

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under the above LC 16.229(2).

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(c) More intensive farm use than those specified in LC 16.229(2)(c) above.

(4) Uses Subject to Hearings Official Approval. The following uses and activities are permitted subject to prior

submittal of an application pursuant to LC 14.050 and subject to Hearings Official approval pursuant to LC 14.300 and the general provisions and criteria specified by this Chapter of Lane Code:

(a) Animal hospitals.
(b) Commercial Breeding Kennel.
(c) Commercial Kennel.
(d) Campgrounds, camping vehicle parks, tourist parks.
(e) Cemeteries, human or animal.
(f) Churches.
(g) Group Care home.
(h) Day Care nurseries.
(i) Golf courses.
(j) Lodges and grange halls.
(k) Nursing homes.
(l) Parks, playgrounds, community centers.
(m) Public and private schools.
(n) Radio and television transmission facilities.
(o) Solid waste disposal facilities.
(p) Stables, riding academies and commercial riding.
(q) Storage facilities for boats and recreational vehicles.
(r) Sewage treatment facilities.
(s) Dams, water storage facilities; power generation or transmission facilities; electric transmission lines which require a right-of-way of 25 feet in width or wider; canals, flumes and pipelines; flood control facilities and irrigation projects.
(t) Fish and wildlife habitat management and any accessory uses including a dwelling or mobile home.
(u) Mobile home parks.
(v) Amusement park, carnival or circus.
(w) Correctional institution.
(x) Garbage dump, sanitary landfill or solid waste management.
(y) Jail or penal farm.
(z) TRace track.
(aa) Sewage treatment plant.
(bb) Boarding of horses for profit.

(5) Hearings Official Approval Criteria. Uses identified in LC 16.229(4) above must comply with the following criteria:

(a) Will not significantly impact existing uses on adjacent and nearby lands and other uses permitted in the zone in which the subject property is located.
(b) Where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby lands.
(c) The proposed use is consistent with the policies contained in the Rural Comprehensive Plan.

GARDEN APARTMENT RESIDENTIAL ZONE (RG-RCP)

RURAL COMPREHENSIVE PLAN

16.230 Garden Apartment Residential Zone (RG-RCP). LC 10.145-10 to-40 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as RG-RCP.

(1) Delete LC 10.145-10(12).

(2) Delete LC 10.145-15 and revise it to read:

"-15. Uses Subject to Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, review of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the criteria and standards specified in this Chapter of Lane Code:

(1) Heliport, together with accessory land uses relevant and appropriate to the operation.

(2) Commercial breeding kennel or commercial kennel.

(3) Amusement park, carnival or circus.

(4) Radio and television stations.

(5) Sewage treatment plant.

(6) Recreation Vehicle Park.

(7) Campground or picnic area.

(8) Home occupations meeting the requirements of LC 16.231-15(2) (RR-RCP Zone).

(9) Clinic.

(10) Day nursery school.

(11) Group care home.

(12) Hospital.

(13) Nursing home.

(14) Private and public park, playground or community center.

(15) Telephone or telegraph exchange, excluding outdoor storage of vehicles or materials."

(3) Add the following subsection:

"-20. Special Use Approval Criteria. Uses allowed under LC 10.145-15 above shall comply with following criteria:

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the

surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding."

(4) In LC 10.145-21, delete "(Also see LC 10.300-10)" and substitute in its place "(LC 16.250).

(5) In LC 10.145-23, delete "(Also see LC 10.300-15 and LC 15.065)" and substitute in its place "(Also see LC 16.250 and LC 15)."

(6) In LC 10.145-25, delete "(Also see LC 10.300-20)" and substitute in its place "(Also see LC 16.250)."

(7) In LC 10.145-36(4), delete "(See LC 10.345 for permit provision)" and substitute in its place "(See LC 16.259 for permit provision)."

(8) In LC 10.145-40, delete "(Also see LC 10.300-20)" and substitute in its place "(Also see LC 16.250)."

(9) In LC 10.145-40(4), delete "...LC 10.300-20" and substitute in its place "...LC 16.250."

(10) Add the following to LC 10.145-23:

"(5) The Classs I Stream and Riparian Vegetation requirements of LC 16.299(2) and (3) shall apply to development of property in the RG-RCP zone."

(d) Where necessary, adequate provisions for access, sewerage and potable water would be provided for the intended use.

(6) **Area.** The creation of a parcel or lot for RA zoned property shall be subject to the following minimum area requirements:

(a) Where a community sewerage system and community water system is available, the minimum area requirement shall be 10,000 square feet.

(b) Where an on-site sewage disposal system and community water system is available, the minimum area requirement shall be 20,000 square feet.

(c) Where an individual water system and on-site sewage disposal system is available, the minimum area requirement shall be one acre.

(d) In all cases, an approved means of sewerage must be obtained.

(e) There is no minimum lot size for a parcel to accommodate uses allowed by LC 16.229(2)(j) above.

(7) **Property Development Standards.** All uses or activities permitted or conditionally permitted above shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines, except as provided below.

(b) Class I Stream and Riparian Vegetation Setbacks. No structure other than a fence or sign shall be located closer than 50 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 50-foot setback to the location of the proposed structure, and the riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.229(7)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.229(7)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazards.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Height. 45 feet shall be the maximum allowable structural height.

(e) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(f) Parking. Off street parking shall be provided in accordance with LC 16.250.

RURAL RESIDENTIAL LANDS ZONE (RR-RCP)

RURAL COMPREHENSIVE PLAN

16.231 Rural Residential Lands Zone (RR-RCP).

(1) Purpose. The purpose of the Rural Residential Zone (RR-RCP) is:

(1) To provide opportunities for people to live in a rural area.

(2) To allow primary and accessory residential uses, and nonresidential uses which may be compatible with primary residential uses.

(3) To implement the policies of the Rural Comprehensive Plan, primarily those policies related to the residential development of areas identified as committed, built upon, or as nonresource land.

(4) To provide protective measures for riparian vegetation along Class I streams designated as significant in the Rural Comprehensive Plan.

-10. Permitted Uses. The following uses and activities are permitted subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) One single-family dwelling, mobile home, or duplex on a legal lot.

(b) A single-family dwelling or mobile home on a legal lot, in addition to the above, to provide residence for an immediate family member or members of the owner, provided that the minimum average density per residential unit (i.e., residences in relationship to acreages: one, two, five or ten acres, whichever is specified by the zoning map) is maintained, and proper sanitation approvals are obtained.

(c) One temporary mobile home in conjunction with an existing dwelling or mobile home subject to compliance with the following conditions:

(i) A resident of the existing dwelling or mobile home and a resident of the mobile home are family members.

(ii) One of the residents mentioned above suffers a hardship and needs the care of the other above-mentioned resident and family member.

(iv) Satisfactory evidence of the family member's hardship is furnished which shall include:

(a) A written statement, on a form provided by the Department, from the family member's physician, therapist, or other professional counselor, disclosing the existence and general nature of the hardship.

(b) A written statement, on the form provided by the Department, disclosing the family relationship of the person with the hardship and the person who will provide care.

(iv) The temporary mobile home will be located on the same legal lot as the existing dwelling or mobile home.

(v) The temporary mobile home will be connected to the same on-site sewage disposal system serving the existing dwelling or mobile home.

(vi) The temporary mobile home will comply with sanitation and building code requirements.

(vii) Approval of temporary mobile home permits shall be valid until December 31 of the year following the year of original permit approval and may be renewed once every two years until the hardship situations cease.

(d) Residential home.

(e) Buildings accessory to a dwelling, mobile home or duplex, such as garages, storerooms, woodsheds, laundry, playhouses, greenhouses, hobby shop, animal or fowl shelter or similar and related accessory uses.

(f) Bed and breakfast accommodation.

(g) Farm use, subject to conditions and limitations provided herein:

(i) The total number of livestock allowed on a property shall be limited to the area of the property divided by the total minimum area required for each animal listed below:

(a) One horse, cow or swine per acre; or,

(b) One goat or sheep per half acre.

(ii) A minimum of 500 square feet of area shall be required for each chicken, other fowl or rabbit kept on the property.

(iii) The number of colonies of bees allowed on a property shall be limited to one colony for each 10,000 square feet of lot area and shall be located no closer than 50 feet from any property line.

(h) Forest uses, including the propagation and harvesting of forest products.

(i) Roadside stand.

(j Public and semipublic buildings, structures and uses rendering direct service to the public in local areas, such as fire stations, utility substations, pump stations and wells.

(k) Noncommercial dog kennels, subject to conditions and limitations provided herein:

(i) For more than three dogs over four months of age, there shall be at least 5,000 square feet of lot area for each dog on the lot.

Attach 5 - Page 109

(ii) Where the lot area is 20 acres or less, the maximum number of dogs over four months of age shall be eight.

(iii) Where the lot area exceeds 20 acres and where more than eight dogs over four months of age are accommodated, kennel structures and fenced runs shall be required for all such dogs in excess of eight and shall be located at least 100 feet from any adjoining property.

(iv) All dogs shall be owned by the kennel owner, except those temporarily kept for purposes of breeding.

(l) Rock, sand, gravel or loam excavation or extraction, subject to conditions and limitations herein:

(i) The materials excavated or extracted are to be used solely on the subject property and are not offered for sale or remuneration.

(ii) The materials excavated or extracted do not exceed 500 cubic yards annually per acre of the subject property.

(m) Guest house.

(n) A mobile home park lawfully existing on a property prior to February 29, 1984.

(3) Uses Subject to Director Approval. The following uses and activities are permitted subject to prior submittal of an application pursuant to LC 14.050 and subject to Director approval of such application pursuant to LC 14.100 and the general provisions and criteria specified by this Chapter of Lane Code:

(a) One dwelling or mobile home for a person employed on the same legal lot as the owner's dwelling or mobile home, provided:

(i) The minimum acreage density per residence unit is maintained (i.e., not more than one residence per whatever the area requirement is as specified by the zoning map).

(ii) The location of the additional residence would not preclude the future partitioning of the property, if the residence and property on which it is to be located would be partitioned from the parent parcel. A site plan locating the proposed residence and delineating the feasibility of the partition shall be submitted with the application.

(b) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in a dwelling or mobile home, or other buildings normally associated with uses permitted under the above subsection -10.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.231(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(c) More intensive farm use than those specified in LC 16.231(2)(g) above.

(4) Uses Subject to Hearings Official Approval. The following uses and activities are permitted subject to prior submittal of an application pursuant to L 14.050 and subject to Hearings Official approval pursuant to LC 14.300 and the general provisions and criteria specified by this Chapter of Lane Code:

(a) Animal hospitals.

(b) Commercial breeding kennel.

(c) Commercial kennel.

(d) Campgrounds, camping vehicle parks, tourist parks.

(e) Cemeteries.

(f) Churches.

(g) Group care home.

(h) Day care nurseries.

(i) Golf courses.

(j) Lodges and grange halls.

(k) Nursing homes.

(l) Parks, playgrounds, community centers.

(m) Public and private schools.

(n) Radio and television transmission facilities.

(o) Solid waste management.

(p) Stables, riding academies and commercial riding.

(q) Storage facilities for boats and recreational vehicles.

(r) Sewage treatment facilities.

(s) Dams, water storage facilities; power generation or transmission facilities; electric transmission lines which require a right-of-way of 25 feet in width or wider; canals, flumes and pipelines; flood control facilities and irrigation projects.

(t) Fish and wildlife habitat management and any accessory uses including a dwelling or mobile home.

(u) An expansion of a mobile home park meeting the requirements of a permitted use under LC 16.231(2)(n) above and which does not exceed 50 percent of the area and number of mobile home spaces lawfully existing as of February 29, 1984, provided the expansion includes adequate provisions for access to and within the mobile home park and provided adequate provisions are made for sewerage and potable water.

(v) A mobile home park on property for which a conditional use permit for a mobile home park had previously been approved by Lane County and not denied on appeal to the State, provided:

(i) The previous conditional use permit was approved after January 1, 1982.

(ii) The proposed mobile home park is not substantially different than the one previously approved in LC 16.231(4)(v)(ii) above.

(iii) The application for the proposed mobile home park is received and accepted prior to January 1, 1982.

(iv) There are adequate provisions for access to and within the proposed mobile home park and adequate sewerage and potable water.

(5) Conditional Use Criteria. Uses conditionally permitted under LC 16.231(4) above are subject to compliance with the following criteria:

(a) Will not significantly impact existing uses on adjacent and nearby lands and other uses permitted in the zone in which the subject property is located.

(b) Where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby lands.

(c) The proposed use is consistent with the policies contained in the Comprehensive Plan.

(6) **Area.** Land within the Rural Residential Zone shall be designated and adopted on the zoning map as RR-1, RR-2, RR-5 or RR-10, and the creation of a parcel or lot shall be subject to compliance with Lane Code Chapter 13 and the following minimum area requirements:

(a) RR-1: 1 acre
(b) RR-2: 2 acres
(c) RR-5: 5 acres
(d) RR-10: 10 acres

(e) In either RR-1, RR-2, RR-5 or RR-10, the minimum acreage may be less than required above and whatever size is necessary to accommodate uses specified in LC 16.231(2)(j) above.

(7) **Property Development Standards.** All uses or activities permitted or conditionally permitted above shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines, except as provided below.

(b) Class 1 Stream and Riparian Vegetation Setbacks. No structure other than a fence or sign shall be located closer than 50 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 50-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenace, Removal and Replacment of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area

than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) TConstruction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.231(7)(c)(i) above Where vegetation removal beyond that allowed in LC 16.231(7)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum ot 25 percent of existing natural vegetation may be removed from the setback area.

(iv The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of deed or diseased vegetation that poses a safety or health hazard.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Height. None

(e) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(f) Parking. Off street parking shall be provided in accordance with LC LC 16.250.

DESTINATION RESORT ZONE (DR-RCP)

RURAL COMPREHENSIVE PLAN

16.232 Destination Resort Zone (DR-RCP).

(1) Purpose. The purpose of the Destination Resort Zone (DR-RCP) is:

(a) To recognize that large-scale, destination oriented, multi-use recreational facilities are appropriate in Lane County.

(b) To implement the policies of the Lane County Rural Area Comprehensive Plan which address Destination Resorts.

(c) To establish a procedure and standards for the development of Destination Resort facilities.

(2) Permitted Uses. The following uses and activities are permitted subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) Living accommodations, including lodges, hotels, motels, cabins, condominiums, single-family and multi-family dwelling units, and structures, such as garages normally subordinate to such accommodations, provided at least 75 percent of the living accommodations shall be for other than year-round residents.

(b) All manner of outdoor and indoor recreational facilities, including, but not limited to, golf courses, tennis courts, swimming pools, racquetball and handball courts, riding stables and trails, nature trails, and pathways for walking/running/bicycling, campgrounds or camps, and parks.

(c) Convention facilities and meeting rooms.

(d) When incidential to and together with the uses described in LC 16.232(2)(a),(b) and (c) above, the following uses;

(i) Restaurants, lounges and nightclubs.

(ii) Theaters and performing arts auditoriums.

(iii) Health clubs, spas and exercise studios.

(iv) Craft and art studios and galleries.

(v) Gift shops and rtail convenience stores.

(vi) Kennels as a service to resort guests only.

(vii) Commercial services and speciality shops to provide only for the needs of vacationers and visitors.

(viii) Airport or heliport.

(ix) First aid station or infirmary.

(x) Facilities necessary for utility service.

(xi) Sewer and water treatment plant.
(xii) Farm and forest uses.
(xiii) Personal services.

(3) Special Criteria and Conditions. Application for, and decisions concerning, the Destination Resort Zone shall follow the procedures and criteria defined in LC .16.400 for amendments to the Rural Comprehensive Plan. Conditions may be established in the approval of an application for the one, such conditions to be directed toward the zoning itself, the preliminary design of the proposed development or the final design/implementation of the proposed development. A means of ensuring compliance with such condiitons may be established, such as Letter of Credit, Bond, Assignment of Savings or Contact between the applicant and the County.

(4) Special Siting and Fire/Safety Standards for Structures. All structures within an approved Destination Resort Zone shall adhere to the following:

(a) Setbacks shall comply with LC 16.211(8)(a) of the F-2 zone.

(b) Shall maintain a fuel break 50 feet around each structure, and around the entire developed portion of the proposed development, in forested and agricultural areas where measurable fire hazard exits. Such fuel breaks may contain vegetation of a type which will not readily spread fire, and shall be continually maintained for their intended uses.

(c) Shall incorporate a fire suppression system acceptable to the local fire official and to the County.

(d) Shall incorporate fireproof and fire-resistant materials in structures to the maximum feasible extent.

(5) Other Property Development Standards. All uses or activities permitted or conditionally permitted above shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local-access road and 10 feet from all other property lines, except as provided below.

(b) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure,

and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standards has been approved pursuant to LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following strandards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Rural Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.232(5)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.232(5)(c)(i) above cannot be avoided, the site shall be replaced during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazards.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Development Orientation. Any commercial, cultural or entertainment services provided as a part of the Destination Resort shall be contained within the development and shall not be oriented to public highways adjacent to the property. The buildings shall be designed to be compatible in appearance with the living

accommodations and shall be constructed of similar materials.

(e) Impact on Adjacent Properties. A Destination Resort shall not significantly alter the character of the surrounding area in a manner which substantially limits, impairs or prevents the normal permitted uses of the surrounding properties. It shall not force a significant change in or significantly increase the cost of farming or forestry practices on nearby lands devoted to such uses.

(f) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be flashing or capable of movement.

(iii) Signs shall be of a design compatible with the surrounding natural area.

(iv) Signs shall be limited to 100 square feet in area.

(6) Area. The ratio of developed (structures, paved surfaces, facilities) to undeveloped land shall not exceed 50 percent.

HISTORIC STRUCTURES OF SITES COMBINING ZONE (/H-RCP)

RURAL COMPREHENSIVE PLAN

16.233 Historic Structures Of Sites Combining Zone (/H-RCP). LC 11.300-05 to -35 is incorporated as fully set forth with the following excpetions, and shall be designated on the zoning maps as /H-RCP:

(1) Delete LC 11.300-10.

(2) In LC 11.300-15, delete "...the Building and Sanitation Division of ..." and "...of Planning and Community Development."

(3) In LC 11.300-25, delete "LC 10.316" and insert in its place "LC 14.100".

NATURAL ESTUARY ZONE (/NE-RCP)

RURAL COMPREHENSIVE PLAN

16.234 Natural Estuary Zone (/NE-RCP). LC 10.225-05 to -30 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /NE-RCP:

(1) In LC 10.225-15, delete "LC 10.275" and substitute in its place "LC 16.248".

(2) In LC 10.225-15, delete "LC 10.280" and substitute in its place "LC 16.249".

(3) In LC 10.225-20(1), delete "LC 10.305" and substitute in its place "LC 16.251".

(4) In LC 10.225-20(2), delete "LC 10.305" and substitute in its place "LC 16.251".

(5) In LC 10.225-25, delete "LC 10.315-90" and substitute in its place "LC 16.252(8)".

CONSERVATION ESTUARY ZONE (/CE-RCP)

RURAL COMPREHENSIVE PLAN

16.235 Conservation Estuary Zone (/CE-RCP). LC 10.230-05 to -35 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /CE-RCP:

(1) In LC 10.230-15, delete "LC 10.275" and substitute in its place "LC 16.248".

(2) In LC 10.230-15, delete "LC 10.280" and substitute in its place "LC 16.249"

(3) In LC 10.230-20, second sentence, delete "LC 10.275" and substitute in its place "LC 16.248".

(4) In LC 10.230-20, second sentence, delete "LC 10.280" and substitute in its place "LC 16.249".

(5) In LC 10.230-25, delete "LC 10.315-90" and substitute in its place "LC 16.252(8)".

DEVELOPMENT ESTUARY ZONE (/DE-RCP)

RURAL COMPREHENSIVE PLAN

16.236 Development Estuary Zone (/DE-RCP). LC 10.235-05 to -35 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /DE-RCP":

(1) In LC 10.235-15, delete "LC 10.275" and substitute in its place "LC 16.248".

(2) In LC 10.235-15, delete "LC 10.280" and substitute in its place "LC 16.249".

(3) In LC 10.235-20, delete "LC 10.275" and substitute in its place "LC 16.248".

(4) In LC 10.235-20, delete "LC 10.280" and substitute in its place "LC 16.249".

(5) In LC 10.235-30, delete "LC 10.315-90" and substitute in its place "LC 16.252(8)".

SIGNIFICANT NATURAL SHORELANDS COMBINING ZONE (/SN-RCP)

RURAL COMPREHENSIVE PLAN

16.237 Significant Natural Shorelands Combining Zone (/SN-RCP). LC 10.240-05 to -75 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /SN/RCP:

(1) In LC 10.240-10(6), delete "/DMR Combining District" and substitute in its place "/DMS".

(2) In LC 10.240-65, delete "LC 10.305-20" and substitute in its place "LC 16.251".

PRIME WILDLIFE SHORELANDS COMBINING ZONE (/PW-RCP)

RURAL COMPREHENSIVE PLAN

16.238 Prime Wildlife Shorelands Combining Zone (/PW-RCP). LC 10.245-05 to -75 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /PW/RCP:

(1) In LC 10.245-45(2)(c), delete "/BD District LC 10.270" and substitute in its place "/BD Zone LC 16.243".

(2) In LC 10.245-65, delete "LC 10.305-20" and substitute in its place "LC 16.251".

NATURAL RESOURCES CONSERVATION COMBINING ZONE (/NRC-RCP)

RURAL COMPREHENSIVE PLAN

16.239 Natural Resources Conservation Combining Zone (/NRC-RCP). LC 10.250-05 to -75 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /NRC-RCP:

(1) In LC 10.250-45(2)(c), delete "LC 10.270" and substitute in its place "LC 16.243".

(2) In LC 10.250-65, delete "LC 10.305-20" and substitute in its place "LC 16.251".

RESIDENTIAL DEVELOPMENT SHORELANDS COMBINING ZONE (/RD-RCP)

RURAL COMPREHENSIVE PLAN

16.240 Residential Development Shorelands Combining Zone (/RD-RCP). LC 10.255-05 to -75 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /RD-RCP:

(1) In LC 10.255-45(2)(c), delete "LC 10.270" and substitute in its place "LC 16.243".

(2) In LC 10.255-65, delete "LC 10.305-20" and substitute in its place "LC 16.251".

SHORELANDS MIXED DEVELOPMENT COMBINING ZONE (/MD-RCP)

RURAL COMPREHENSIVE PLAN

16.241 Shorelands Mixed Development Combining Zone (/MD-RCP). LC 10.260-05 to -75 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as /MD-RCP:

(1) In LC 10.260-45(2)(c), delete "LC 10.270" and substitute in its place "LC 16.243".

DREDGE MATERIAL/MITIGATION SITE COMBINING ZONE (/DMS-RCP)

RURAL COMPREHENSIVE PLAN

16.242 Dredge Material/Mitigation Site Combining Zone (/DMS-RCP). LC 10.265-05 to -25 is incorporated as fully set forth,
with the following exceptions, and shall be designated on the zoning maps as /DMS-RCP:.

(1) In LC 10.265-15, fifth line, delete "LC 10.316" and substitute in ints place "LC 14.100".

(2) In LC 10.265-15, ninth line, delete "LC 10.317 and 10.318" and substitute in its place "LC 14.300".

BEACHES AND DUNES COMBINING ZONE (/BD-RCP)

RURAL COMPREHENSIVE PLAN

16.243 Beaches and Dunes Combining Zone (/BD-RCP). LC 10.270-05 to -95 is incorporated as fully set forth, with the following exceptions and shall be designated on the zoning maps as BD/RCP:

(1) In LC 10.270-90, delete "LC 10.315-90" and substitute in its place "LC 16.___".

(c) Controlling the alteration of natural floodplains, stream channels and natural protective barriers, which help accommodate or channel flood waters.

(d) Controlling filling, grading, dredging and other development, which may increase flood damage.

(e) Preventing or regulating the construction of flood barriers, which will unnaturally divert flood waters or which may increase flood hazards in other areas.

(3) Lands to Which This Subchapter Applies. This subchapter shall apply to all areas of flood hazard within Lane County, and overlay the regulations of the underlying zone.

(4) Basis for Establishing Areas of Flood Hazard. Areas of flood hazard for Lane County under the jurisdication of the Rural Comprehensive Plan are areas designated as special flood hazard areas (A Zones) or areas within a floodway.

Special flood hazard areas and floodways are identified by the Federal Insurance Administration in a scientific and engineering report entitled "THE FLOOD INSURANCE STUDY FOR LANE COUNTY, OREGON UNINCORPORATED AREAS", with accompanying Flood Insurance Rate Maps (FIRM) and Flood Hazard Boundary Maps.

Flood hazard studies shall be adopted by Board Order, made a part of Lane Manual (LM 11.020) and filed in the office of the Department. Such studies shall form the basis for the administration and implementation of this subchapter.

These publications shall be used as the basis for determinating which flood district applies to the property. Where these publications fail to provide data sufficient to determine the applicble flood district, the applicable flood district shall be determined on the basis of the best available information.

Areas of flood hazard shall also include any land area designated by the Director as susceptible to inundation of water from any source where the above-referenced maps have not identified any special flood areas.

(5) Compliance. No structure shall hereafter be constructed, located, extended, converted or altered, nor shall any land be developed, subdivided or partitioned without full compliance with the terms of this subchapter and other applicable regulations.

(6) Abrogation and Greater Restrictions. It is not intended by this subchapter to repeal, abrogate or impair any existing easements, covenants or deed restrictions. However, where this subchapter imposes greater restrictions, the provisions of this subchapter shall prevail.

(7) Warning and Disclaimer of Libability. The degree of flood protection required by this subchapter is considered reasonable for regulatory purposes. Larger floods can occur on rare occasions. The flood height may be increased by human-made or natural causes, such as log jams and bridge openings restricted by debris. This subchapter does not imply that areas outside floodways

and floodway fringe district boundaries or land uses pemritted within such districts will be free from flooding or flood damages. This subchapter shall not create liability on the part of Lane County, or any officer or employee thereof, for any flood damages that may result from reliance on this or any administrative decision lawfully made thereunder.

(8) Required Permits. A permit shall be obtained before construction or development begins within any area of flood hazard established in LC 16.244(12)(a) below. Application for such permit shall be filed with the appropriate agency of government having jurisdiction over such development. Applications required by the Director shall include the following information:

(a) Where base flood elevation data has been provided:

(i) Elevation in relation to mean sea level, of the lowest flood (including basement) of all structures;

(ii) Elevation in relation to mean sea level to which any structure has been floodproofed;

(iii) Where required, certification by a registered professional engineer or architect that criteria specified in LC 16.244(11)(f) thru (h) and LC 16.244(12)(b) below have been met;

(iv) Description of the extent to which any watercourse will be altered or relocated as a result of proposed development;C

(v) Plot plan drawn to scale showing the nature, location and dimensions and elevation referenced to mean sea level, of the area in question, including existing and proposed structures, fill, storage of materials and drainage facilities. Applicants shall submit certification by an Oregon registered professional engineer or land surveyor of the site's ground elevation and whether or not the development is located in a flood hazard district. If so, the certification shall include which flood hazard district applies, the location of the floodway at the site, and the 100-year flood elevation at the site. A reference mark shall be set at the elevation of the 100-year flood at the site. The location, description and elevation of the reference mark shall be includedin the certification; and

(vi) Any other information required by the Director.

(b) When base flood elevation data has not been provided by "THE FLOOD INSURANCE STUDY FOR LANE COUNTY, OREGON," the Director shall obtain, review and reasonably utilize any base flood elevation data available from a Federal, State or other source, in order to administer this subchapter.

(c) All building and mobile home placement permits shall also be reviewed to determine the flood hazard for the proposal. Where elevation data is not available, permits shall be reviewed to assure that the proposed construction will be reasonably safe from flood. Reasonableness shall be determined on the basis of the best available information on flood conditions affecting the land. The best available information may include, but shall not be limited to, the use of historical data, high water marks, etc.

(9) Designation of Administrator. The Director shall administer and implement this subchapter by granting or denying development permit applications in accordance with its provisions. The Director shall:

(a) Review all development applications to determine that the permit requirements of this subchapter have been satisfied.

(b) Review all development applications to determine that all necessary permits have been obtained from those Federal, State or Local governmental agencies from which prior approval is required.

(c) Ensure that all provisions of this subchapter are met.

(d) Obtain and record the actual elevation (in relation to mean sea level) of the lowest habitable floor (including basement) of all new or substantially improved structures, and whether or not the structure contains a basement.

(e) For all new or substantially improved floodproofed structures:

(i) Verify and record the actual elevation (in relation to mean sea level); and

(ii) Maintain the floodproofing certifications required in LC 16.244(8) above.

(f) Maintain for public inspection all records pertaining to the provisions of this subchapter.

(g) Notify adjacent communities and the Division of State Lands prior to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Insurance Administration upon request.

(h) Require that a program of periodic inspection and maintenance be provided with the altered or relocated portion of said watercourse so that the flood carrying capacity of the watercourse is not diminished.

(i) Make interpretation, where needed, as to exact location of the boundaries of areas of special flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field conditions). The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in LC 14.500.

(j)tTAlleged errors of any requirement, decision or determination made by the Director in the enforcement or administration of this subchapter can be appealed pursuant to LC 14.500.

(10) Variance Procedures. Requests for variances to any standard, procedure or requirement of this subchapter shall be filed pursuant to LC 14.050 and shall be reviewed by the Hearings Official pursuant to LC 14.300.

(a) Criteria. In passing upon such applications, the Approval Authority shall consider all technical evaluations, all relevant factors and standards specified in other sections of this subchapter, and;

(i) The danger that materials may be swept onto other lands to the injury of others;

(ii) The danger to life and property due to flooding, debris or erosion damage;

(iii) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;

(iv) The importance of the services provided by the proposed facility to the community;

(v) The necessity to the facility of a waterfront location, where applicable;

(vi) The availability of alternative locations for the proposed use, which are not subject to flooding or erosion damage;

(vii) The compatibilty of the proposed use with existing and anticipated development;

(viii) The relationship of the proposed use to the Comprehensive Plan and floodplain management program for that area;

(ix) The safety of access to the property in times of flood for ordinary and emergency vehicles;

(x) The expected heights, velocity, duration, rate of rise and sediment and debris transported by the floodwaters and the effects of wave action, if applicable, expected at the site; and

(xi) The costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical and water systems, and streets and bridges.

(xii) Generally, variances may be issued for construction, development and substantial improvements to be erected on a parcel of land of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the 100-year flood level, providing that the criteria above have been fully considered. As the parcel size increases beyond one-half acre, the technical justification required for issuing the variance increases.

Upon consideration of the above factors and purposes of this subchapter, the Approval Authority may attach such conditions to the granting of variance as he or she deems necessary to further the purposes of this subchapter.

(b) Conditions of Variances. Upon consideration of the above criteria and purposes of this subchapter, the Approval Authority may attach such conditions to the granting of variances as he or she deems necessary to further the purposes of this subchapter.

(i) Variances may be issued for the reconsideration, rehabilitation or restoration of structures listed on the National Register of Historic Places of the State Inventory of Historic Places, without regard to the procedures set forth in the remainder of this section.

(ii) Variances shall not be issued within any desigated floodway if any increase in flood levels during the base flood discharge would result.

(iii) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(iv) Variances shall only be issued upon:

(a) A showing of good and sufficient cause;

(b) A determination that failure to grant the variance would result in exceptional hardship to the applicant; and

(c) A determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local laws or ordinances.

(v) Any applicant to whom a variance is granted shall be given written notice of the approval and any conditions of the variance. In cases where a variance is granted to allow construction with a lowest floor elevation below the 100-year flood

elevation, applicant will also be notified, in writing, that the cost of flood insurance will be commensurable with the increased risk resulting from the reduced lower floor elevation.

(c) Application. Application for a variance shall be made as provided by LC 14.050.

(d) Review Procedure. Applications for variances shall be reviewed by the Director pursuant to LC 14.100.

(e) Records. The Director shall maintain the records of all appeal actions and report any variances to the Federal Insurance Administration upon request.

(11) **Provisions for Flood Hazard Reduction.** In areas of flood hazard, the provisions of LC 16.244-11(a) through (h) below shall apply.

(a) Anchoring.

(i) All new construction and substantial improvements shall be anchored to prevent flotation, collapse or lateral movement of the structure.

(ii) All mobile homes shall be anchored in accordance with standards of the State of Oregon Department of Commerce, Mobile Home Division.

(b) Construction Materials and Methods.

(i) All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.

(ii) All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.

(c) Utilities.

(i) All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Public water systems which utilize wells for a source(s) shall be constructed such that the top well elevation is at least one foot above the 100-year flood elevation.

(ii) New and replacement sanitary systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharged from the systems into flood waters.

(d) Roads. Adequate provisions shall be made for accessibilty during a 100-year flood, so as to ensure ingress and egress for ordinary and emergency vehicles and services during potential future flooding.

(i) No road surface of any street, road or access road shall be at an elevation less than one foot below the base flood height.

(e) Subdivison and Partitioning Proposals.

(i) All subdivision and partitioning proposals shall be consistent with the need to minimize flood damage.

(ii) All subdivision and partitioning proposals shall have public utilities and facilities such as sanitary and storm sewers, gas, electrical and water systems located and constructed and maintained to minimize flood damage.

(iii) All subdivision proposals shall have adequate drainage to reduce exposure to flood damage, including returning water.

(iv) No portion of any stream or road surface in any subdivision shall be at an elevation less than one foot below the base flood heights. The road surface is that portion of a street or way available for vehicular traffic or where curbs are laid, the portion between curbs.

(v) 100-year flood elevation data shall be provided and shown on final partition maps and subdivision plats. Application must show the boundaries of the 100-year flood and floodway on the final subdivision plat.

(vi) A permanent monument shall be established and maintained on land partitioned or subdivided, showing the elevation in feet above mean sea level. The location of such monument shall be shown on the final partition map or subdivision plat.

(f) Nonresidential Construction. New construction and substantial improvement of any commercial, industrial or other nonresidential structure shall have either:

(i) The lowest floor, including basement, elevated to a level at least one foot above the base flood height; or

(ii) Be floodproofed:

(a) As provided in State Structural Specialty Code, Chapter 56, to one foot above the base flood level so that the structure is watertight with walls substantially impermeable to the passage of water;

(b) Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and,

(iii) Be certified by an Oregon licensed registered professional engineer or architect that the standards of this subsection are satisfied. Such certifications shall be provided to the Official as set forth in LC 16.244(8) above.

(g) Residential Construction. All residential construction and substantial improvements shall:

(i) Have the lowest habitable floor height (including basement) at least one foot above the base flood height.

(b) Be certified by an Oregon licensed registered professional surveyor, engineer or architect that the standards of this subsection are satisfied. Such certifications shall be provided to the Official as set forth in LC 16.244(8) above.

(h) Mobile Home Standards.

(i) All mobile homes and approved mobile home additions shall:

(a) Have the lowest habitable floor height at least one foot above the base flood height and be certified by an Oregon licensed registered professional surveyor, engineer or architect that the standards of this subsection are satisfied, except mobile homes in existing mobile home parks. Such certifications shall be provided to the Official as set forth in LC 16.244(8) above.

(b) Be anchored with an approved tie down system to resist flotation, collapse or lateral movement, to standards set forth by the State of Oregon, Department of Commerce, Mobile Home Division.

(c) Alternative methods of anchoring may be utilized provided certification is provided by a licensed Oregon professional engineer or architect that the system is designed to conform to Federal anchor design load requirements as specified by the State of Oregon, Department of Commerce, Mobile Home Division.

(ii) For new mobile home parks and mobile home subdivisions; for expansions to existing mobile home parks and mobile home subdivisions; for existing mobile home parks and mobile home subdivisions where the repair, reconstruction or improvement of the streets, utilities and pads equals or exceeds 50 percent of value of the streets, utilities and pads before the repair, reconstruction or improvement has commenced; and for mobile homes not placed in a mobile home park or mobile home subdivision, it shall be required that:

(a) Stands or lots are elevated on compacted fill or on pilings so that the lowest floor of the mobile home will be at least one foot above the base flood height;

(b) Adequate surface drainage and access for hauler are provided; and

(c) In the instance of elevation on pilings, that lots are large enough to permit steps, piling foundations are placed in stable

soil no more than 10 feet apart, and reinforcement is provided for pilings more than six feet above the ground level.

(iii) No mobile home shall be placed in a floodway district, except in an existing mobile home park or existing mobile home subdivision.

(12) Establishment of Flood Districts. Flood hazard areas of Lane County are hereby divided into the following districts:

100-Year Flood District
Floodway District

Criteria for determining district boundaries are set forth in LC 16.244(4) above.

(a) 100-Year Flood District. The following uses shall be permitted in the 100-Year District to the extent they are not prohibited by any other provision of this Chapter.

(i) Structures and substantial improvements designed for human occupancy provided the lowest habitable flood (including basement) elevation is at least one foot above the base flood height.

(ii) Other structures provided they are floodproofed or otherwise protected to an elevation at least one foot above the base flood height.

(iii) Subdivision and partitioning of land provided that the development meets the standards set forth in LC 16.244(11)(e) above.

(b) Floodway District. In the Floodway District, the following restrictions shall apply:

(i) Encroachments. Including, but not limited to, fill, new construction, substantial improvements and other development are not permitted unless an Oregon registered professional engineer or architect certifies that such encroachments (and cumulative like encroachments) when combined with all other existing and anticipated encroachments shall not result in any increase in flood levels during the occurrence of a base flood. If such certification is obtained, all construction development and substantial improvements shall comply with all applicable provisions of LC 16.244(11) above.

(ii) Subdivision and partitioning of land for residential purposes is prohibited if land is located entirely within the Floodway District.

(iii) No mobile home may be placed in the Floodway District, except in an existing mobile home park. Any mobile homes placed, or additions thereto, shall conform to standrds of LC 16.244(11)(h) above.

COMMERCIAL AIRPORT SAFETY COMBINING ZONE (/CAS-RCP)

RURAL COMPREHENSIVE PLAN

16.245 Commercial Airport Safety Combining Zone (/CAS-RCP).

(1) **Purpose.** The Commercial Airport Safety Combining Zone is applied to those lands adjacent to and within the Mahlon Sweet Field airport. The /CAS Combining Zone is intended to carry out the following purposes:

(a) Prevent the creation or establishment of obstructions that are a hazard to air navigation and flight.

(b) Prevent the creation or establishment of other hazards to air navigation and flight such as distracting light and glare producing surfaces, radio interference, smoke, steam and dust, areas which attract birds and hazards of a similar nature.

(2) **Applicability.** The Commercial Airport Safety Combining Zone is applied to those lands encompassed by the surfaces set forth and described in LC 16.245(4)(ii) below and diagramed in LC 16.245(5) below.

(3) **Use Limitations.** In the /CAS Combining Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /CAS Zone is combined:

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /CAS Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the height limitations of the various areas described in LC 16.245(4)(ii) below.

(b) No use may be made of land or water in such a manner as to create electrical interference with navigational signals or radio for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(4) **Surfaces Described.**

(a) Primary Surfaces.

(i) The Primary Surface is a plan longitudinally centered on the runway centerline and extending 200 feet beyond the ends of prepared runway surfaces. The width of the Primary Surface for each runway is the same as the width of the inner portion of the Approach Surface for that runway.

(ii) For purpose of this section, the centerpoints at the ends of each runway primary

surface shall be considered as having the following coordinates and elevations:

Runway	Centerpoint Coordinates		Centerpoint Elevation
	North	East	feet above sea level
16R-34L	909410	1286622	358.2
	902848	1286530	361.54
3-21	903976	1284706	365.1
	907764	1288797	359.9
16L-34R	907793	1290513	360.0
	9044165	1290501	370.0

(iii) The elevation at any point on the Primary Surface is the same as the elevation of the nearest point on the runway centerline. For purposes of this section, the runway centerline shall be considered as having a straightline grade between the two centerpoints for that runway as described in LC 16.245(4)ii) above.

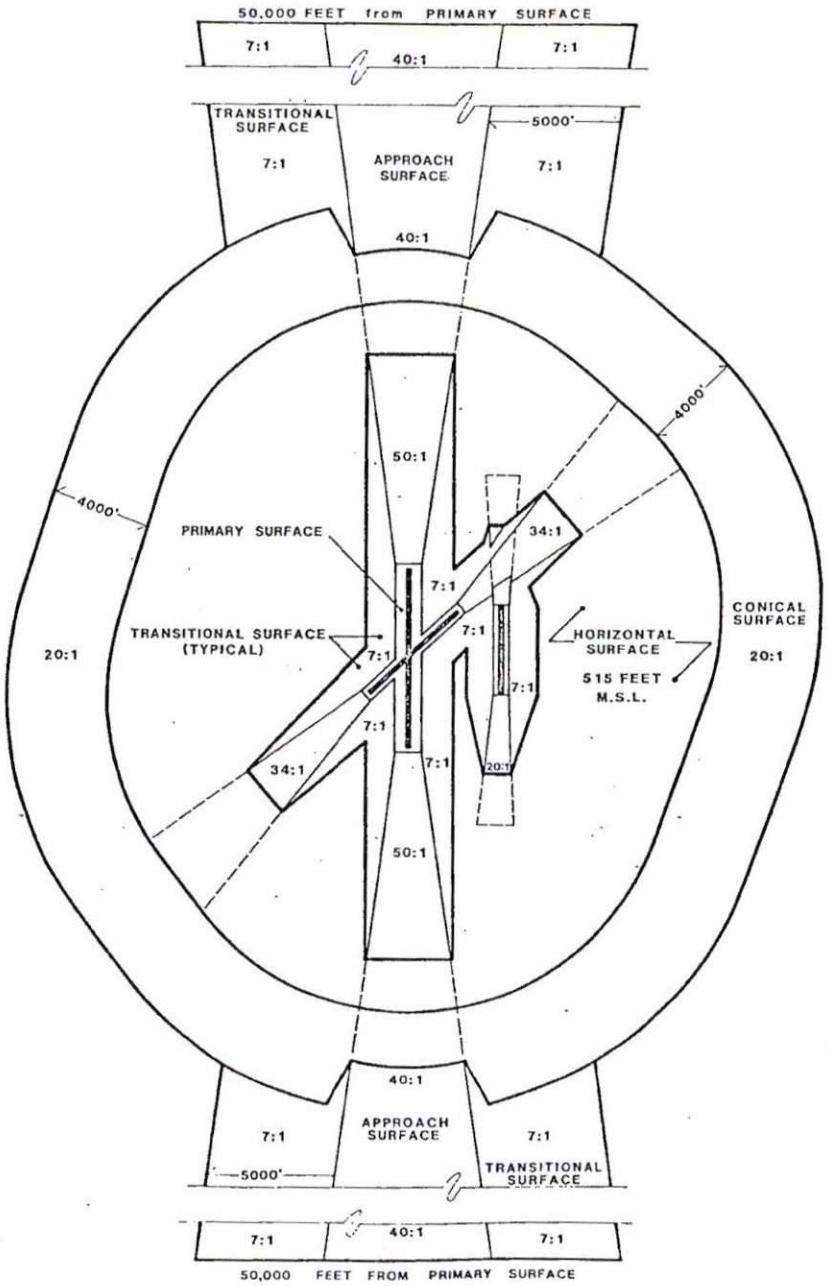
(b) Runway 16R-34L Approach Surface. This runway is a precision instrument runway aligned in a north-south direction and is designated as a primary runway. The inner edge of the Approach Surfaces coincide with the width of the Primary Surface at the ends of Runway 16R-34L and are 1,000 feet wide. Each Approach Surface extends outward uniformly to a width of 16,000 feet from the Primary Surface, its centerline being a continuation of the runway centerline. Each Approach Surface extends outward and upward at a slope of 50 horizontal feet to one vertical foot beginning at the end of and at the same elevation as the Primary Surface and extending to a horizontal distance of 10,000 feet along the extended runway centerline, thence slopes upward 40 horizontal feet to one vertical foot to an additional distance of 40,000 feet along the extended runway centerline.

(c) Runway 3-21 Approach Surface. This runway is a nonprecision instrument runway, aligned in an east-west direction and designated as a crosswind runway. The inner edge of the Approach Surfaces coincide with the width of the Primary Surface at the ends of Runway 3-21 and are 500 feet wide. Each Approach Surface extends outward uniformly to a width of 4,000 feet at a horizontal distance of 10,000 feet from the Primary Surface, its centerline being the continuation of the runway centerline. The Approach Surface extends outward and upward at a slope of 34 horizontal feet to one vertical foot, beginning at the end of and at the same elevation as the Primary Surface.

(d) Runway 16L-34R. This is a future runway to be aligned in a north-south direction and will be designated as a secondary runway. The inner edge of the Approach Surface coincides with the width of the Primary Surface

of the ends of Runway 16L-34R and are 250 feet wide. Each Approach Surface extends outward uniformly to a width of 1,250 feet at a horizontal distance of 5,000 feet from the Primary Surface, its centerline being the continuation of the runway centerline. The Approach Surface extends outward and upward at a slope of 20 horizontal feet to one vertical foot, beginning at the end of and at the same elevation as the Primary Surface.

(e) Transitional Surfaces. These surfaces are adjacent to the primary surfaces and the approach surfaces. The surfaces slope upward and outward seven horizontal feet to one vertical foot, beginning at the side of and at the same elevation as the Primary Surfaces and the Approach Surfaces, and extend to where they intercept the Horizontal Surface at a height of 150 feet above the airport elevation. Where the Runway 16R-34L Approach Surfaces pass through the Conical Surface, there are Transitional Surfaces sloping outward and upward seven horizontal feet to one vertical foot, beginning at the sides of and at the same elevation Approach Surface, and extending to where they intersect the Conical Surface. Where the Runway 16R-34L Approach Surface extends beyond the Conical Surface, there are Transitional Surfaces sloping outward and upward seven horizontal feet to one vertical foot, beginning at the sides of and at the same elevation as the Approach Surface, and extending to a horizontal distance of 5,000 feet measured horizontally from the edge of the Approach Surface and at right angles to the runway centerline.



(f) Horizontal Surface. The Horizontal Surface is described by swinging arcs of 10,000 feet radii from the center of each end of the Primary Surfaces of Runway 16R-34L and Runway 3-21, and connecting the arcs with tangent lines. The Horizontal Surface is a horizontal plane 150 feet above the elevation of the airport and for purposes of this section shall be considered as having an elevation of 515 feet above mean sea level. The Horizontal Surface does not include the Approach and Transitional Surfaces.

(g) Conical Surface. The Conical Surface begins at the outer periphery of the Horizontal Surface and slopes outward and upward 20 horizontal to one vertical, starting at the elevation of the Horizontal Surface and extends outward a horizontal distance of 4,000 feet.

(5) **Marking and Lighting.** The owner of any existing structure or object that does not conform to the height limitations of this section shall be required to permit the installation, operation and maintenance thereon of such markers and lights as may be deemed necessary by the City of Eugene to indicate to the operators of aircraft in the vicinity of the airport, of the

presence of such aircraft obstructions. Such markers and lights shall be installed, operated and maintained at the expense of the City of Eugene.

(6) **Surfaces Diagramed.** The surfaces described in LC 16.245(4) above are as illustrated in the diagram below:

AIRPORT SAFETY COMBINING ZONE (/AS-RCP)

RURAL COMPREHENSIVE PLAN

16.246 Airport Safety Combining Zone (/AS-RCP).

(1) Purpose. The Airport Safety Combining Zone is applied to those lands adjacent to the Creswell Airport (Hobby Field), the Cottage Grove Airport, the Oakridge Airport, the McKenzie Airport and the Florence Airport. The /AS Zone is intended to safeguard land uses adjacent to these airports from noise and hazards associated with aircraft operations and to protect existing use and potential expansion of the airport itself from incompatible development. Specifically, the /AS Zone is intended to carry out the following purposes:

(a) Prevent the creation or establishment of obstructions that are a hazard to air navigation and flight.

(b) Prevent the creation or establishment of other hazards to air navigation and flight such as distracting light and glare producing surfaces, radio interference, smoke, steam and dust, areas which attract birds and hazards of a similar nature.

(c) Restrict new development of land uses not normally compatible with noise and safety hazards associated with airport operations.

(2) Applicability. The Airport Safety Combining Zone is applied to those lands adjacent to the Creswell Airport, the Cottage Grove Airport, the McKenzie Airport, the Oakridge Airport and Florence Airport which are encompassed by the surfaces set forth and described in LC 16.246(5) below and diagramed in LC 16.246(9) below. For purposes of this Chapter, the elevations of the five runways are established as follows:

(a) Cottage Grove - 641 feet above sea level.
(b) Creswell - 535 feet above sea level.
(b) Florence - 12 feet above sea level.
(c) Oakridge - 1419 feet above sea level.
(d) McKenzie - 1620 feet above sea level.

(3) Use Limitations. In a /AS Combining Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS Zone is combined:

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

(b) All structures and uses within the /AS Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airpot lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

(4) Uses Prohibited. The area lying beneath the Approach Surface beginning at the end of the Primary Surface and extending outward a horizontal distance of 1,000 feet shall be considered to be a clear zone. Within this clear zone, no structure or object, except for fences and navigational aids approved by the airport operator, shall be erected, placed, altered, allowed to grow or be maintained above the surface of the ground.

(5) Surface Described.

(a) Approach Surface. A surface longitudinally centered on the runway centerline, extending outward and upward from the ends of the primary surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 5,000 feet and widening from the width of 250 feet to 1,250 feet at its outer edge.

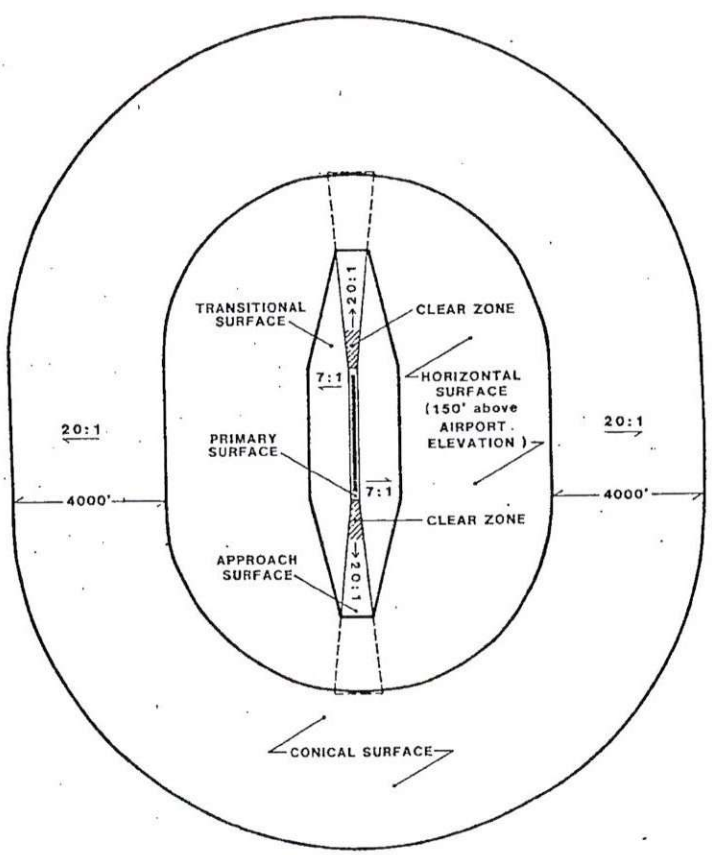
(b) Conical Surface. A surface extending outward and upward from the periphery of the horizontal surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 4,000 feet. This surface rises from 150 feet above the runway and extends to a height of 350 feet above the runway.

(c) Horizontal Surface. A horizontal plan 150 feet above the airport runway, the perimeter of which is established by swinging arcs of 5,000 feet radii from the center of each end of the primary surface and connecting the arcs with tangent lines.

(d) Primary Surface. The Primary Surface is a plane longitudinally centered on the runway centerline and extending 200 feet beyond the ends of the prepared runway surface and having a width of 250 feet. For

purposes of this subsection, the primary surface shall be considered as having the same elevation as its respective runway as the same are specified in LC 16.246(2) above. The centerpoints at the ends of each primary surface shall be considered as having the following coordinates:

	North Coordinate	East Coordinate
Cottage Grove Airport	787358	1331306
	790828	1331606
Creswell Airport	833934	1339698
	836415	1339781
Oakridge Airport	766146	1472836
	767325	1469017
McKenzie Bridge Airport	920159	1582521
	920810	1585438
Florence Airport	868731	1050341
	869823	1049883



(e) Transitional Surfaces. These surfaces extend outward at 90 degree angles from the sides of the primary surface and Approach Surface at a slope of one horizontal foot to seven vertical feet to their intersection with the Horizontal Surface. This surface extends to a height of 150 feet above the runway.

(6) Marking and Lighting. The owner of any existing structure or object that does not conform to the height limitations of this subsection shall be required to permit the installation, operation and maintenance thereon of such markers and lights as may be deemed necessary by the airport operator to indicate to the operators of aircraft in the vicinity of the airport, of the presence of such aircraft obstructions. Such markers and lights shall be installed, operated and maintained at the expense of the airport operator.

(7) Special Requirements for Construction Permits. Within the area beneath the Approach Surface, no construction permit shall be issued for any building, mobile home or other structure designed and intended for human occupancy until the property owner has agreed to waive action against the County and the airport for noise, property damage or personal injuries resulting from activities connected with the airport. Such waiver shall apply only when such activities are conducted in conformance with rules and regulations of the airport and applicable Federal and State air regulations and no negligence on the part of the County or the airport is involved. The waiver shall be in a form prescribed by the Planning Director and shall be binding on the grantees, their heirs, assigns and successors in title.

(8) Area. Established by underlying, parent zone.

(9) **Surfaces Diagramed.** The surfaces described in LC 16.246(5) above are as illustrated in the diagram below:

AIRPORT OPERATIONS ZONE (AO-RCP)

RURAL COMPREHENSIVE PLAN

16.247 Airport Operatons Zone (AO-RCP). LC 10.200-05 to -23 is incorporated as fully set forth, with the following exceptions, and shall be designated on the zoning maps as AO-RCP.

(1) In LC 10.200-15, delete the first sentence and substitute in its place: "Airport related uses not specified in LC 10.200-10 above are special uses, subject to submittal of an application pursuant to LC 14.050 and approval of the application by the Hearings Official pursuant to LC 14.300."

(2) Insert the following subsection:

"-17. Special Use Approval Criteria. Uses allowed in LC 10.200-15 above must comply with the following criteria:

(a) Conformity with the Rural Comprehensive Plan for Lane County.

(b) The location, size, design and operating characteristics of the proposed use:

(i) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity.

(ii) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(iii) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(iv) Will not create a hazardous natural condition such as erosion, landslide, flooding."

16.248 Resource Capability Determination. LC 10.275-05 to -30 is incorporated as fully set forth, with the following exceptions, and shall become LC 16.248:

(1) In LC 10.275-15(2), delete "LC 10.280" and substitute in its place "LC 16.248".

16.249 Estuarine Impact Assessment. LC 10.280-05 to -20 is incorporated as fully set forth and shall become LC 16.249.

PARKING SPACE, HEIGHT, AREA, GENERAL BUILDING AND GENERAL LOT AREA AND WIDTH SETBACK REQUIREMENTS

RURAL COMPREHENSIVE PLAN

16.250 Parking Areas. Required garages and parking areas for residential and industrial development will be found under the zoning classification.

(1) Residential Properties. The regulations of this subsection are in addition to off street parking requirements of specific zones.

(a) When a single-family residence is located on a site inaccessible by automobile due to topographic conditions or excessive grades, a private garage or parking space shall not be required.

(b) Unless otherwise allowed by the zoning district, and exclusive of recreational vehicles, off street parking shall be limited to passenger cars, vans and pickups of not more than one ton manufacturer's capacity rating or comparable size. This size limitation does not apply to vehicles being used in conjunction with Rural Home Occupations.

(c) Commercial vehicles other than allowed by LC 16.250(b) above may be parked on residential properties only for reasonable periods of time for deliveries, structural repair and similar purposes.

(d) Recreational or utility vehicles, including, but not limited to, boats and boat trailers, campers and residential-type utility trailers, shall not be parked or stored on the property at any time in a location obstructing motorists' vision clearance of roadways.

(e) Unless otherwise allowed by the zoning district, off street parking areas shall not be used for the dismantling of any vehicle for the purpose of selling, trading or dealing in any manner with components thereof as a primary or secondary business.

(f) (i) Inoperable vehicles and parts thereof, junk or salvage materials may be visibly stored on the premises unless such storage interferes with the reasonable use and enjoyment of other lots within 300 feet of the lot use for storage. In that event, all automotive parts, junk, salvage material and all but one inoperable vehicle shall be stored in a location not visible from any adjacent road or from ground level of lots within 300 feet which are of similar elevation as the lot upon which the storage is taking place, or shall be screened to prevent such visibility. The allowable inoperable vehicle

may be stored within the structural setback area, but shall not be parked or stored at any time in a location obstructing motorists' vision clearance of roadways. Nothing in this subsection shall be construed as allowing storage within the front structural setback area except as otherwise allowed herein.

(ii) Names of residents filing complaints under provisions of LC 16.250(1)(f)(i) above shall be a matter of public record.

(g) Except as allowed by this Chapter, vehicles belonging to persons other than those residing on the lot shall not be stored or repaired for remuneration, traded, sold or offered for sale from the property. This includes vehicles left on consignment and vehicles owned temporarily primarily for resale. The sale of more than two vehicles per family member from one lot within a 12-month period shall be interpreted as "temporary ownership" unless the family member has owned said vehicles longer than 12 months.

(h) Storage of refrigerators, freezers or other airtight compartments containing more than one and one-half cubic feet shall not occur at any time until the doors have been removed or secured, latches removed or other precautions taken so the compartment can be easily opened from the inside. Any appliance stored in violation of this subsection may be removed by the County from the premises and stored elsewhere at the owner's expense, or other remedial action taken to secure immediate compliance.

(2) Nonresidential Private Parking.

(a Automobile parking space allowing 300 square feet per automobile (parking, plus driving space) shall be provided and maintained for any new or enlarged building as listed below:

(i) Churches, auditoriums, theaters, stadiums, clubs and business schools or similar places of assembly, at least one permanently maintained parking space for every four seats provided in said building or structure; provided that 50 percent of the require number may be supplied by off street parking facilities for other kinds of commercial establishments or uses not normally open, used or operated during the principal operating hours of the place of assembly.

(ii) For hotels and apartment hotels, at least one permanently maintained parking space for each of the first 20 individual guest rooms, and one additional parking space for every three guest rooms in excess of 20.

(iii) Auto courts shall provide at least one parking space for each lodging unit.

(iv) For fraternity, sorority and student houses, at least one parking space for each lodging unit.

(v) For hospitals and welfare institutions, at least one permanently maintained parking space for each 300 square feet of floor area.

(vi) Clinics shall provide at least two parking spaces for each consultation and operating room.

(vii) For business or commercial buildings or structures, at least one permanently maintained parking space for every 300 square feet or fraction thereof of floor space within the building, exclusive of automobile parking space.

(viii) Mortuaries shall provide parking spaces for all people employed therein, plus at least one parking space for each 200 square feet of building floor area.

(b) Parking spaces shall be on the lot with the main building or structure, or located not more than 800 feet therefrom.

(1) Loading Space. In addition to the 10-foot setback requirement from the centerline of the alley, every hospital, hotel, institution, commercial or industrial building hereafter erected or established which abuts upon an alley or is surrounded on all sides by streets shall have one permanently maintained loading space for commercial vehicles of not less than 10 feet in width and 22 feet in length for each 4,000 square feet of lot area or fraction thereof upon which the building is located; provided that not more than two such loading spaces shall be required.

(4) Public Parking Areas. Land hereafter used for public parking areas shall be developed according to the following standards:

(a) Asphaltic, concrete or other approved type of surfacing.

(b) Bumper guards where needed.

(c) An ornamental fence, wall or hedge enclosing the parking area to a height not less than three feet nor more than six feet, but adhering to the vision clearance and front and side yard setbacks established for the district in which it is located. Said fence, wall or hedge shall be maintained in good condition.

(d) When a parking lot adjoins property classified in an "R" District, the setback for the parking lot shall conform to the requirements for the adjacent "R" District and the parking lot shall be six feet in height.

(5) Height.

(a) Height limits established for the various zones or districts refer to the height of the building proper. Roof structures, such as housing for elevators, tanks, ventilating fans, towers, steeples, flagpoles, chimneys, smokestacks, wireless masts or similar structures, may exceed the height limit herein prescribed.

(b) On lots sloping downhill from the street, buildings may have an additional story, provided the ceiling of the lowest story is not more than two feet above the average curb level along the front of the lot.

(6) General Building Setback Requirements.

(a) Side Yard.

(i) No building or structure shall be hereafter erected or altered so that any portion thereof shall be nearer to the side lot line than the distance indicated under the District or Zone classification, except that eaves or cornices may extend over the required side yard for a distance of not more than two feet.

(ii) Fences, walls or hedges which tend to serve as a wall or yard enclosure may be maintained in a side yard, provided they do not exceed six feet in height.

(7) General Lot Area and Width Requirements.

(a) The site area requirements of Chapter 16 shall not apply to prohibit the erection of a single-family dwelling on a lot separately owned on or before January 8, 1969, or on any numbered lot in an approved and filed major or minor subdivision plat of record on or before January 8, 1969, except for the EFU, F-1 and F-2 Districts, where use of preexisting parcels is provided for in a different manner.

(b) The minimum area requirements of Chapter 16 shall not be construed to govern in situations where greater minimum area requirements are imposed or required by State law, State rules and regulations, the provisions of this Code, or other County rules and ordinances.

(c) Refer also to LC 13.050 to 13.105 Design and Development Standards for other lot area, width and depth requirements which may be applicable.

NONCONFORMING USES

RURAL COMPREHENSIVE PLAN

16.251 Nonconforming Uses. Except as is hereinafter provided in this Chapter, the lawful use of a building or structure or of any land or premises lawfully existing at the time of the effective date of this Chapter or at the time of a change in the official zoning maps may be continued although such use does not conform with the provisions of this Chapter.

(1) Verification of Nonconforming Use. The verification of a nonconforming use may be obtained subject to Director approval pursuant to LC 14.100. Verification of a nonconforming use is required prior to requesting approval to increase, restore, alter or repair a nonconforming use. When evaluating a request for verification, the following criteria shall apply:

(a) To be valid, a nonconforming use must have been lawfully established prior to the enactment of an ordinance restricting or prohibiting the use.

(b) The use must have been in actual existence prior to the enactment of an ordinance restricting or prohibiting the use or have proceeded so far toward completion that a right to complete and maintain the use is deemed to have vested in the landowner.

(c) The nonuse of a nonconforming use of a structure or property for a period in excess of one year will prohibit the resumption of the nonconforming use.

The burden of proof for the verification of a nonconforming use is upon the applicant.

(2) Change in Nonconforming Use. A nonconforming use may be changed only insofar as it applies to the zone in which it is located. Once changed to a conforming use, no building or land shall be permitted to revert to a nonconforming use.

(3) Increase of Nonconforming Use. A nonconforming use shall not be increased, except that permission to extend the use to any portion of a building or lot which portion was arranged or designed for such nonconforming use at the time of the passage of this Chapter may be granted subject to Director approval pursuant to LC 14.100.

(4) Vested Right. Nothing contained in this Chapter shall require any change in the plans, construction, alteration or designated use of a structure on which construction has physically, lawfully and substantially commenced prior to the adoption of this Chapter, provided the structure, if nonconforming or intended for a nonconforming use, is completed and in use within two years from the time construction was commenced.

(5) Discontinuance of Nonconforming Use. When a nonconforming use of a structure or property is discontinued for a period in excess of one year, the structure or property shall not thereafter be used, except in conformance with the zone in which it is located.

(6) Unlawful Use Not a Nonconforming Use. No unlawful use of property existing at the time of passage of this Chapter shall be deemed a nonconforming use.

(7) Restoration of Nonconforming Building or Structure.

(a) A nonconforming building or structure which is damaged by fire, flood, wind, earthquake or other calamity or act of God or the public enemy, may be restored and the occupancy or use of such building or structure or part thereof, which existed at the time of such partial destruction may be resumed, provided that the restoration is commenced within a period of one year and is diligently prosecuted to completion and verification of the nonconforming use has been obtained.

() The restoration or reconstruction of a nonconforming building or structure may not increase the flood area or create a greater nonconformance than existed at the time of damage or destruction.

(8) Conveyance of Nonconforming Use. Nothing in this Chapter shall be construed to limit the sale, transfer, other conveyance of property on which exists a nonconforming building, structure or use, so long as such sale, transfer or other conveyance does not otherwise violate the provisions of this Chapter.

(9) Restoration of Conforming Use on Nonconforming Lot. Nothing in this Chapter shall be construed to prevent the reconstruction or replacement of a preexisting building or structure conforming as to use on a nonconforming lot, so long as such lot did not become nonconforming in violation of the provisions of this Chapter.

(10) Alterations or Repairs of a Nonconforming Use. Alterations or repairs of a nonconforming use may be permitted to continue the use in a reasonable manner subject to Director approval pursuant to LC 14.100 and consistent with the intent of ORS 215.130(5-8). Alteration of any such use shall be permitted when necessary to comply with any lawful requirement for alteration in the use.

(11) Criteria for Decision. When evaluating a proposal for increase, restoration, alteration or repair, the following criteria shall apply:

(a) The change in the use will be of no greater adverse impact to the neighborhood.

(b) The change in a structure or physical improvements will cause no greater adverse impact to the neighborhood.

(c) Other provisions of this Chapter, such as property development standards, are met.

(12) Conditions of Approval. In order to assure compatibility of the proposed development with the surrounding area, any of the following conditions may be imposed as conditions of approval:

(a) Special yards and spaces.
(b) Fences and walls.
(c) Special parking and/or loading provisions.
(d) Street dedication and improvements or bonds in lieu of improvements.
(e) Control of points of vehicular ingress and egress.
(f) Special provisions for signs.
(g) Landscaping and the maintenance of grounds.
(h) Control of noise, vibration, odors or other similar nuisances.
(i) Limitation of time for certain activities.
(j) A time period in which a proposed use shall be developed.
(k) A limit of total duration of use.

PROCEDURES FOR ZONING, REZONING AND AMENDMENTS TO REQUIREMENTS

RURAL COMPREHENSIVE PLAN

16.252 Purpose. As the Comprehensive Plan for Lane County is implemented, changes in District and other requirements Of this Chapter will be required. Such Amendments shall be made in accordance with the procedures of this section.

(1) Criteria. Zonings, rezonings and changes in the requirements of this Chapter shall be enacted to achieve the general purpose of this Chapter and shall not be contrary to the public interest. In addition, zonings and rezonings shall be consistent with the specific purposes of the Zone District classification proposed, applicable Comprehensive Plan elements and components, and Statewide Planning Goals for any portion of Lane County which has not been acknowledged for compliance with the Statewide Planning Goals by the Land Conservation and Development Commission. Any zoning or rezoning may be effected by Ordinance or Order of the Board of County Commissioners, the Planning Commission or the Hearings Official in accordance with the procedures in this section.

(2) Initiation/Applicaton.

(a) By Planning Commission. The zoning of unzoned properties, the rezoning of properties and amendment of this Chapter may be initiated by the Planning Commission upon its own motion or upon petition by the Planning Commission upon request of the Board as provided in LC 16.252(2)(b) below.

(b) By Board. The zoning of unzoned properties, the rezoning of properties and the amendment of this Chapter may be initiated by the Board in the form of a request to the Planning Commissions that they consider the proposed zoning, rezoning or amendment.

(c) By Applicant. Application for the zoning or rezoning of properties may be made by any person as provided in LC 14.050.

(3) Moratorium on Permits and Applications-Legis-lative Matters.

(a) After any matter for zoning, rezoning or amendment to this Chapter affecting particular property has received tentative action by the Board, but has not yet become final and effective, no Zoning, Land Division or Building Code Application or request shall be accepted, granted, issued or approved, except as herein provided.

(b) After such final action, granting of pending or subsequent Applications or requests shall be in accordance with the requirements of the zoning classification or requirements as amended by the final action.

(c) The provisions of this subsection shall not be applicable to the issuance of Building, Plumbing Permits, or on-site sewage for normal repairs or corrections, nor shall the provisions apply when the proposed Application or request meets both the requirements of the existing zoning requirement and the proposed change or amendment, or to the approval of a final minor partition, a major partition map, or subdivision plant.

(4) Planning Commission Public Hearing and Notice -- Legislative Matters.

(a) The Planning Commission shall hold not less than one public hearing on each proposed legislative zoning or rezoning and amendment to the requirements of this Chapter.

(b) Notice of the time and place of hearing shall be given at least 10 days in advance by publication in a newspaper of general circulation in the County or in the territory concerned.

(c) The Planning Commission shall review the Application or proposal and shall receive pertinent evidence and testimony as to why or how the proposed change is inconsistent with the criteria provided in LC 16.252(1) above for zoning, rezoning and amendment to the requirements of this Chapter. The Commission shall determine whether the testimony at the hearing supports a finding that the proposal does or does not meet the required criteria, and shall recommend to the Board accordingly that the proposal be adopted or rejected. The Planning Commission and Board may hold one concurrent hearing.

(5) Review Procedures. Applications for zoning or rezoning of specific properties shall be heard by the Hearings Official pursuant to LC 14.300.

(6) Action by the Board.

(a) Unless the Board and Planning Commission hold a concurrent hearing, upon receipt of an affirmative Planning Commissoin recommendation for legislative matters provided in LC 16.252(5) above, the Board shall schedule a public hearing as provided in LC 16.252(6)(b) below. The Board may schedule such a public hearing in the absence of an affirmative Planning Commission recommendation.

(b) Prior to taking any action which would alter or modify a Planning Commission recommendation or Hearings Official's Order, the Board may first refer the proposed alteration or modification to the Planning Commission or Hearings Official for a recommendation. Failure of the Commission or Hearings Official to report within 20 days after the referral, or such longer period as may be designated by the Board, shall be deemed to be approval of

the proposed alteration or modification. It shall not be necessary for the Commission or Hearings Official to hold a public hearing on the proposed alteration or modification.

(7) Conditional Approval. The approving authority may impose reasonable conditions if the application is approved to be completed within one year.

(8) Official Zoning Map.

(a) The location and boundaries of the various zones established by this Chapter shall be shown and delineated on maps covering portions of the County. These maps, upon their final adoption, shall be known as the Official Zoning Map.

(b) The Zoning Map shall be established by ordinance. Subsequent amendments, either for establishing zoning for previously unzoned property or for rezoning may be made by Ordinance or Order of the Hearing Authority in accordance with the provisions of this section. Upon final adoption, the Zoning Map and all subsequent amendments thereto shall be filed with the County Recorder.

(i) Boundaries indicated as approximately following the centerlines of streets, highways or alleys shall be construed to follow such centerlines.

(ii) Boundaries indicates as approximately following property lines shall be construed as following such property lines.

(iii) Boundaries indicated as approximately following the city limits shall be construed as following such city limits.

(iv) Boundaries indicated as following railroad lines and public utility shall be construed to be a midway between the main tracks or utility easements, whichever is applicable.

(v) Boundaries indicated as parallel to or extensions of features indicated in LC 16.252(8)(c)(i) through (iv) above shall be so construed.

(vi) Boundaries indicated as following shorelines shall be construed as following the ordinary low waterline, except where the body of water is specifically zoned Natural Estuary (/NE-RCP), Conservation Estuary (/CE-RCP) or Development Estuary (/DE, RCP) Zones in which case the boundary shall be construed as following the ordinary high waterline. In the event of a change of high or low waterline, the boundary will follow that line no matter how it shifts.

(vii) Where zones are separated by a body of water, the boundary between the zones shall be construed as being the centerline of such body of water. No matter how such centerline may shift, the boundary shall remain the centerline as shifted.

(viii) Except as hereinafter noted, where a zoning boundary divides an ownership of property, unless the same is indicated by dimensions, map coordinates, or digitized boundary or similar notation, the boundary shall be determined by the use of the scale appearing on the Zoning Map. In case of the /SN-RCP; /PW-RCP; /NRC-RCP; /RD-RCP; /MD-RCP; /DMS-RCP and /BD-RCP Combining Zones, and the/ NE-RCP; /CE-RCP and /DE-RCP Zones, the boundaries shall be determined through interpretation of the Coastal Resources Management Plan.

(ix) Where physical features existing on the ground are at variance with those shown on the Zoning Map, or in other circumstances not covered by LC 16.252(8)(c)(i) through (viii) above, the Planning Commission shall interpret the zone boundaries.

(9) Treatment of Vacated Property. Where a public street or alley is officially vacated, the Zone requirements applicable to the property to which the vacated area becomes a part shall apply to the vacated property.

(10) Error in Legal Description. Notwithstanding any other provision in this Chapter, where the sole basis for a zoning or rezoning, whether initiated by Application, the Planning Commission or the Board, is in error in a legal description, if applicable in the Ordinance or Order zoning or intended to zone the property, the zoning or rezoning shall be referred to the Planning Director for investigation and a report. After such investigation and report, the zoning or rezoning shall be considered in accordnce with the procedures for hearings provided in LC 16.252(4) and (5) above.

GREENWAY DEVELOPMENT PERMIT

RURAL COMPREHENSIVE PLAN

16.254 **Purpose.** To establish Greenway Development procedures for certain land use activities as required by the Statewide Willamette River Greenway Goal and the Lane County Willamette River Greenway Plan.

(1) **Definitions.** For the purposes of this subchapter, except as otherwise provided below, the definitions provided in LC 16.090 and the Goal adopted by the Oregon Land Conservation and Development Commission shall be used:

(a) Ordinary High Water. The high water level is defined as that high level of a river which is attained during mean annual flood. It does not include levels attained during exceptional or catastrophic floods. It is often identifiable by physical characteristics such as a clear natural line impressed on the bank, shelving, changes in character in the soil, destruction or absence of vegetation not adapted for life in saturated soils or the presence of flotsam and debris. In the absence of identifying physical characteristics, ordinary high water may be determined by Step backwater analysis upon a two-year frequency flood as determined by the U. S. Army Corps of Engineers.

(b) Ordinary Low Water. The low watermark of a river is that point to which the waters normally recede when the volume of water is at its low level, not determined by the extraordinary year, and further means the line to which the Willamette River ordinarily recedes annually in season even though the elevation of that line may be higher as a result of the Corps of Engineers' flood control structures than would otherwise be the case without such structures. Submersible lands are also considered that land or bank area between the ordinary low and high waterline.

(c) Water Dependent Use. A use or activity which can be carried out only on, in or adjacent to water areas because the use requires access to the water body for waterborne transportation, recreation, energy production or source of water.

(d) Water Related Use. Uses which are not directly dependent upon access to a water body, but which provide goods or services that are directly associated with water dependent land or waterway use, and which, if not located adjacent to water, would result in public loss of quality in the goods or services offered. Except as necessary for water dependent or water related uses or facilities, residences, parking lots, spoil or dump sites, roads and highways, restaurants, businesses, factories and trailer

parks are not generally considered dependent on or related to water location needs.

(e) Greenway Development Permit; Permit. A permit authorized pursuant to this subchapter or pursuant to a permit authorized in accordance with the provisions of prior Greenway Permit Ordinances 4-76 and 11-76.

(f) Change of Use. Making a different use of the land or water than that which existed on December 5, 1975. It includes a change which requires construction, alterations of the land, water or other areas outside of existing buildings or structures and which substantially alters or affects the land or water. It does not include a change of use of a building or other structure which does not substantially alter or affect the land or water upon which it is situated. Change of use shall not include the completion of a structure for which a valid permit has been issued as of December 5, 1975. The sale of property is not in itself considered to be a change of use. An existing open storage area shall be considered to be the same as a building. Landscaping, construction of driveways, modifications of existing structures or the construction or placement of such subsidiary structures or facilities as are usual and necessary to the use and enjoyment of existing improvements shall not be considered a change of use for the purposes of this subchapter.

(g) Intensificaton. Any additions which increase or expand the area or amount of an existing use or the level of activity. Remodeling of the exterior of a structure is an intensification when it will substantially alter the appearance of the structure. Intensification shall not include the completion of a structure for which a valid permit was issued as of December 5, 1975.

(h) Develop. To construct or alter a structure, to conduct a mining operation, to make a physical change in the use or appearance of land, to divide land into parcels or to create or terminate rights of access.

(i) Development. To act, process or result of developing.

(j) Boundaries. The boundaries for the Willamette River Greenway are those adopted by the Land Conservation and Development Commission in 1977, together with any changes when and as approved by LCDC.

(2) Uses and Activities Subject to Greenway Development Permits. Greenway Development Permits shall be required for new intensifications, change of use or developments allowed in applicable zones , including public improvements and including

partitions and subdivisions as defined in LC 13.020, which are proposed for lands within the boundaries of the Willamette River Greenway adopted and as revised from time to time by the Oregon Land Conservation and Development Commission, except as provided below:

(a) Where the location is within areas designated as "urban" on Greenway maps adopted by the Oregon Land Conservtion and Development Commission and is beyond 150 feet of the ordinary low waterline.

(b) Customary dredging and channel maintenance conducted under permit from the State of Oregon.

(c) Seasonal increases in gravel operations as provided under permit from the State of Oregon.

(d) The placing by a public agency of signs, markers, aids, etc. to serve the public.

(e) Activities to protect, conserve, enhance and maintain public lands, except that a substantial increase in the level of development of existing public recreational, scenic, historical or natural uses on public lands shall require review as provided by this subchapter.

(f) Erosion control operations required in emergency situations for the safety and protection of property.

(g) Construction or use of a building other than a dwelling whether or not within 150 feet of the ordinary low waterline when the building is customarily provided in conjunction with a farm use, provided the structure does not exceed 12 feet in height nor exists for longer than six months.

(h) Farm use.

(i) Reasonable emergency procedures necessary for the safety or protection of property.

(j) Maintenance and repair usual and necessary for the continuance of an existing use. Landscaping, construction of driveways, modification of existing structures or facilities adjacent to a residence as are usual and necessary to such use and enjoyment.

(k) The propagation of timber or the cutting of timber which is done for public safety or personal noncommercial use or where the harvest is consistent with an approved permit under the Forest Practices Act:

(i) for a farm woodlot of less than 20 acres, or

(ii) consistent with recommendations made by Oregon Department of Transportation to Oregon Department of Forestry which are designed to address criteria set forth in Statewide Goal 15, sections c-h.

(l) Irrigation pumps and water intakes and other utility lines in conjunction with an agricultural use.

(m) Uses which are pursuant to one of the following Lane County Land Development actions when such action has been approved or adopted consistent with the Greenway Development Permit approval requirements of 16.254(3) below and notification requirements of LC 16.252(6) below.

(i) Planned Unit Developments, as provided in 10.700.

(ii) Unzoned Area Development Permits, as provided in LC 9.700.

(3) Greenway Development Permit Approval. A decision to approve a Greenway Development Permit shall require findings that the proposed intensification, change of use or development conforms to the following criteria, guidelines and setback requirements"

(a) Criteria.

(i) The development protects or enhances the existing vegetative fringe between the activity and the river. Where such protective action is shown to be impractical under the circumstances, the maximum landscaped area or open space shall be provided between the activity and the river and the development provides for the reestablishment of vegetative cover where it will be significantly removed during the process of land development.

(ii) Public access to and along the river either is not necessary or the necessary access will be provided by appropriate legal means.

(iii) A development which is mining or a mineral extraction and/or processing operation must include mining or extraction and/or processing methods which reduce or mitigate adverse impacts to the natural and cultural attributes of the Greenway.

(b) Guidelines. Affirmative findings of compatibility with the Willamette River Greenway based upon due consideration and the relative importance of the following applicable guidelines:

(i) Preservation and maintenance of land designated "agriculture" in the adopted Willamette River Greenway Plan for farm use and minimize interference with the long-term capacity of lands for farm use.

(ii) Protection, conservation or preservation of significant scenic areas, viewpoints and vistas.

(iii) Protection, preservation, rehabilitation, reconstruction or restoration of significant historic and archeological resources.

(iv) Preserve areas of annual flooding, floodplains and wetlands.

(v) Protection, conservation or preservation of areas along the alluvial bottomlands and lands with severe soil limitations from intensive development.

(vi) Consideration of the impacts from consumptive uses of water (i.e., domestic, agriculture, industrial) and nonconsujptive uses (i.e., recreation and natural resources) in efforts of maintaining sufficient flows to support water users.

(vii) Sustenance and enhancement of water quality by managing or controlling sources of water pollution from uses such as: domestic and industrial wastes, agricultural and timber runoff, septic tank seepage, gravel operations and other intermittent sources.

(viii) Maintenance and sustenance of natural riparian vegetation found upon the lower alluvial bottomlands and upper terraces bordering the river for the following reasons: provide habitat, food and shade for wildlife; protect natural areas; anchor river bank soils and protect agricultural land from seasonal erosion; ensure scenic quality and screening of uses from the river; control trespass; and to control pollution sources to the river.

(ix) Harvesting of timber in a manner that wildlife habitat, riparian and other significant vegetation and the natural scenic qualities of the Greenway will be preserved, conserved or restored and otherwise result in only the partial harvest of timber beyond the vegetative fringe.

(x) Minimize vandalism and trespass.

(xi) Location of nonwater dependent and nonwater related development away from the river.

(xii) Protection from erosion.

(xiii) Compatibility with the site and surrounding area.

(xiv) Protection of significant fish, wildlife habitat and natural areas.

(xv) Protection and conservation of lands designated aggregate resources within the adopted Willamette Greenway Plan.

(c) Setback Requirement; Exceptions. New intensificatins, developments and changes of use shall be set back 100 feet from ordinary high waterline of the river, except for those in conjunction with a water related or water dependent use. Exceptions to this requirement shall be allowed when affirmative findings are made to satisfy the following criteria:

(i) The proposal would provide better protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway than would occur by observance of the setback requirement; or

(ii) The protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway are not applicable to the proposal.

(4) Conditions. Reasonable conditions may be imposed in connection with a Greenway Development Permit as necessary to meet the purposes of this subchapter. Guarantees and evidence may be required that such conditions will be or are being complied with. Such conditions may include, but are not limited to, requiring:

(a) Special yards and spaces.

(b) Fences and walls.

(c) Special off street parking and loading requirements.

(d) Street and road dedications and improvements (or bonds).

(e) Control of points of vehicular ingress and egress.

(f) Special provisions on signs.

(g) Landscaping and maintenance thereof.

(h) Maintenance of grounds.

(i) Control of noise vibration, odors or other similar nuisances.

(j) A time period within which the proposed use shall be developed.

(k) A limit on total duration of use.

(l) Control of scale, bulk and coverage of proposal.

(5) Application and Review Procedure. Application for a Greenway Development Permit shall be made as provided by LC 14.040 and reviewed by the Hearings Official as provided by LC 14.300.

(6) Additional Notice. Immediate notice of an application shall be given the State Department of Transportation by certified mail, return receipt requested, and provision shall be made to provide notice to any individual or group requesting notice in writing.

(7) Conflicting Provisions. In the case of any conflict between the provisions of this subchapter and other provisions in Lane Code, the more restrictive provisions shall apply.

(8) Nonauthority for Public Use of Private Property. Nothing in this subchapter is intended to authorize public use of private property. Public use of private property is a trespass unless appropriate easements and access have been acquired in accordance with law to authorize such use.

(9) Nonconforming Uses. Except as modified in this section, LC 16.251(1) to (8) shall apply to properties within the Willamette Greenway Boundaries. Any change or intensification as those terms discussed in LC 16.254(1)(f) and (g) above of a nonconforming use shall be prohibited unless a Greenway Development Permit is issued for it.

TEMPORARY PERMITS

RURAL COMPREHENSIVE PLAN

16.255 Temporary Permits.

(1) Purpose. The purpose of the Temporary Permit procedure is to allow on an interim basis:

(a) Temporary uses in undeveloped areas of the County not otherwise allowable in the applicable Zone.

(b) Use of existing structures designed and intended for a use not allowable in a Zone and not otherwise a Nonconforming Use, and

(c) Erection of Temporary structures for activities necessary for the general welfare of an area,

provided such uses and activities are consistent with the intent of this Chapter.

No temporary Permit can be granted which would have the effect of permanently rezoning and granting a special privilege not shared by other property in the same Zone.

(2) Allowable Temporary Uses, Criteria, and Limitations.

(a) The following are allowable Temporary Uses and may be permitted in any Zone, subject to the following criteria and limitations:

(i) A different use for existing structures or structures and premises in a combination which are occupied or have been occupied by a Nonconforming Use, provided it is determined by the Hearings Official that the character and nature of the proposed use will be less incompatible to the surrounding vicinity than the existing or previous Nonconforming Use.

(ii) Use of existing structures and premises which are designed and intended for a use which is not allowable in the applicable Zone and new structures and premises and use thereof necessary for the physical and economic welfare of an area, provided it is determined by the Hearings Official that the location, size, design and operating characteristics of the proposed use and new structure, if applicable:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity; and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity.

(iii) Open land uses which do not involve structures with a combined value in excess of $1,000, provided it is determined by the Hearings

Official that the location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity.

(b) In applying the criteria for allowable Temporary Uses provided in LC 16.255(2) above

(b) In applying the criteria for allowable Temporary Uses provided in LC 16.255(2)(a)(i) and (ii) above, consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character; to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.

(c) No structural alterations may be made to a Nonconforming structure to be utilized by a Temporary Use which would materially prolong the economic life of the structure.

(d) Where new structures and use thereof and new open land uses are permitted, the premises shall be required to be restored to the prior state within three months of the termination of the Permit. A performance bond shall be required, if determined necessary by the Hearings Official, at the time of approval in sufficient amount to cover the estimated cost such restoration.

(e) Temporary Permits for any one Permit shall be approved for a maximum of five years.

(3) **Conditions.** Reasonable conditions may be imposed in this section. Guarantees and evidence may be required that such conditions will be or are being complied with. Such conditions may include, but are not limited to, requiring:

(a) Special yards and spaces.

(b) Fences and walls.

(c) Control of points of vehicular ingress and egress.

(d) Special provisions on signs.

(e) Lanscaping and maintenance thereof.

(f) Maintenance of the grounds.

(g) Control of noise, vibrations, odors or other similar nuisances.

(h) Limitation of time for certain activities.

(i) A time period within which the proposed use shall be developed.

(j) A limit on total duration of use.

(4) Application. Application for a Temporary Permit shall be made as provided by LC 14.050.

(5) Review Procedure. Applications for Temporary Permits shall be reviewed by the Hearings Official pursuant to LC 14.300.

VARIANCES

RURAL COMPREHENSIVE PLAN

16.256 Variances.

(1) Scope. Variances to a requirement of this Chapter with respect to dimensions, setback, yard uses, lot coverage, height of structures, vision clearance, fences and walls, and other quantitative requirements may be approved by the Planning Director if:

(a) An application is submitted pursuant to LC 14.050.

(b) The application is reviewed pursuant to LC 14.100.

(c) The application complies with the criteria of LC 16.256(2) below.

(2) Criteria.

(a Exceptional or extraordinary circumstances apply to the property which do not apply generally to other properties in the same zone or vicinity which result from lot size or shape, topography or other circumstances over which the property owner, since the enactment of this Chapter, has had no control.

(b) The variance is necessary for the preservation of a property right of the applicant which is the same as that enjoyed by other property owners in the same zones in the area.

(c) The variance would conform with the purposes of this Chapter and would not be materially detrimental to property in the same zone or vicinity in which the property is located, or otherwise conflict or reasonably be expected to conflict with the Comprehensive Plan.

(d) The variance requested is the mionimum variance which would alleviate the difficulty.

(e) The variance is not the result of a self-created hardship.

(f) The variance would not have the effect of rezoning and granting a special privilege not shared by other property in the same zone.

SITE REVIEW PROCEDURES

RURAL COMPREHENSIVE PLAN

16.257 Site Review Procedures.

(1) Purpose. It is the purpose of this section to establish a site review permit procedure for specified uses or applications requiring comprehensive review of proposed site development in orer to encourage the most appropriate development of the site compatible with the neighborhood, to prevent undue traffic and pedestrian hazards or congestion, to reduce adverse impacts upon public facilities and services, and to provide a healthful, stable, efficient and pleasant on-site environment.

(2) Site Review Permits Required. A Site Review Permit shall be required when:

(a) Nonresidential uses, except those customarily provided in conjunction with farm uses, are proposed for properties where the proposed uses and/or structures are within 200 feet of the boundaries of an RR-RCP; RA-RCP; R-2-RCP; RG-RCP or RP-RCP zone.

(b) Incidental to conditional approval to rezone as provided in this Chapter.

(c) Incidental to any Zoning or Rezoning Application approval when it is determined by the Board, Planning Commissin or Hearings Official that a Site Review Permit would be necessary to ensure that such approval would be consistent with the intent and purposes of this Chapter.

(d) Incidental to an expansion of a Nonconforming Use of land and structures as permitted in this Chapter.

(e) Superceded provisions of this Chapter for property zoned with an Architectural Control ("X") suffice require approval of initial plans, or approval of a modification of or addition to approved plans.

(f) A Zone in this Chapter specifically requires a Site Review Permit for uses permitted outright or conditionally in said Zone.

Any properties requiring a Site Review Permit pursuant to LC 16.257(2)(c) above shall be designated "SR" in the amending Ordinance or Order, on a map attached as an exhibit to the Ordinance or Order, and on the Zoning Map, as applicable.

No Building Permit shall be issued until a Site Review Permit has been obtained as required by this section. Further, said Building Permit can be issued only for development as approved according to the Site Review Permit requirements.

(3) Site Review Permits Not Required. It is not necessary to require a Site Review Permit when:

(a) The proposed uses or improvements are for a residential use or a use customarily provided in conjunction with a farm use.

(b) A Conditional Use Permit or Special Use Permit is required for the proposed uses or improvements.

(c) The proposed uses or improvements are located at least 200 feet from all exterior boundaries of the subject property.

(d) The proposed improvement is a sign for a use permitted by the parent zone and such sign is not illuminated, does not occupy more than 100 square feet in sign surface area on one side, is of no greater height than the primary buildings on the same property, and is not within the structural setback area designated by Lane Code Chapters 10 and 15.

(e) When the proposed use or improvement is a minor addition to an existing commercial or industrial use or improvement where the minor addition does not exceed 25 percent of the area of the existing use and will not be closer to a property line than the closest portion of the existing structures meeting legal setbacks required by the appropriate zone. For purposes of this section, the area of the existing use shall be calculated by including all improvements, on-site private drives and outside areas which are a part of the use (such as off street parking and loading areas and outside storage areas.)

(4) Criteria for Site Review Evaluation. The following minimum criteria should be considered in evaluating Site Review Applications:

(a) That the location, design, size, shape and arrangement of the uses and structures are sufficient for the proposal intent and are compatible with the surrounding vicinity.

(b) That there is no unnecessary destruction of existing healthy trees or other major vegetation, and that due consideration is given to the preservation of distinctive historical or natural features.

(c) That the quantity, location, height and materials of walls, fences, hedges, screen planting and landscape areas are such that they serve their intended purpose and have no undue adverse effect on existing or contemplated abutting land use.

(d) That suitable planting of ground cover or other surfacing is provided to prevent erosion and reduce dust.

(e) That the location, design and size of the uses are such that the residents or establishments to be accommodated will be adequately served by community facilities and services or by other facilities suitable for the intended uses.

(f) That, based on anticipated traffic generation, adequate additional right-of-way and road improvements must be provided by the development in order to promote traffic safety and reduce traffic congestion. Consideration shall be given to the need and feasibility of widening and improving abutting streets to specifications of Lane Code, Chapter 15, "Roads", and also to the necessity for such additional requirements as lighting, sidewalks and turn and deceleration/acceleration lanes.

(g) That there is a safe and efficient circulation pattern within the boundaries of the development. Consideration shall include the layout of the site with respect to the location and dimensions of vehicular and pedestrian entrances, exists, drives, walkways, buildings and other related facilities.

(h) That there are adequate off street parking and loading/unloading facilities provided in a safe, efficient and pleasant manner. Consideration shall include the layout of the parking and loading/unloading facilities and their surfacing, lighting and landscaping.

(i) That all signs and ilumination are in scale and harmonious with the site and area.

(j) That adequate methods are provided to ensure continued maintenance and normal replacement of facilities, landscaping and other improvements, etc. that are required by Site Review Permit.

(5) Conditions. Reasonable conditions may be established in connection with a Site Review Permit as deemed necessary to secure the purpose and requirements of this section. Guarantees, evidence, dedications or bonding may be required to ensure that such conditions will be met.

(6) Applicatoin. Application for a Site Review shall be made as provided by LC 14.050.

(7) Review Procedure. Applicatins for Site Reviews shall be reviewed by the Director pursuant to LC 14.100.

SUBDIVISION AND DIRECTION SIGNS

RURAL COMPREHENSIVE PLAN

16.259 Subdivision and Direction Signs.

(1) Standards.

(a) Subdivision signs announcing the division and improvement of property may be erected within the platted subdivision area as follows:

(i) For the first acre or fraction thereof: One sign not exceeding 64 square feet, which may have a surface area on a single-face sign of 64 square feet or a surface area on a double-face sign of 128 square feet.

(b) Two directional signs, each being six square feet or less, being either single- or double-faced, may be erected outside the platted subdivision area, not within the public right-of-way.

(c) No sign shall be constructed, erected or maintained which:

(i) Bears or contains statements, words or pictures of an obscene, indecent or immoral character, such as will offend public morals or decency.

(ii) Purports to be or is an imitation of, or resembles an official traffic sign or signal, or which bears the words "STOP", "GO SLOW", "CAUTION", "DANGER", "WARNING" or similar words.

(iii) By reason of its size, location, movement, content, coloring or manner of illumination may be confused with or construed as a traffic control device, or which hides from view any traffic of street sign or signal.

(iv) Advertises or publicizes an activity, business product or service no longer conducted on the premises upon which such signs are maintained.

(v) Carries a message on a rotating or moving part. Only minor decorative parts of signs may move or rotate.

(v) Uses banners, flags, posters, pennants, ribbons, streamers, strings, light bulbs or spinners.

(2) Procedure. A request for a permit to erect a sign or signs in accordance with the provisions of this section may be initiated by submitting an application in writing, on a standard form issued by the Planning Director, duly signed by the applicant and filed with the Planning Department.

CLUSTER SUBDIVISIONS

RURAL COMPREHENSIVE PLAN

16.260 Cluster Subdivisions.

(1) Purpose. Cluster subdivisions are explicitly permitted and encouraged by various zones as an alternative to standard subdivision development. They are intended to promote a more efficient use of land, retain more land in its natural state, reduce the overall land use impact of the subdivision process and reduce the amount of roads, services and facilities needed to serve a development.

(2) Applicability. Cluster subdivisions are permitted uses in the following zones: RR-RCP and RA-RCP.

(3) Permitted Uses.

(a) Mobile homes shall only be permitted in a cluster subdivision, if the zone applicable to the subdivision allows mobile homes as a permitted use.

(b) Two-family and multiple- family residences are permitted within a cluster subdivision provided they comply with the Development Standards of this subsection.

(4) Development Standards.

(a) Lot Density.

(i) The number of lots intended for dwellings or mobile homes within a cluster subdivision shall not exceed the density of zones and shall be determined by dividing the gross acreage by the minimum area requirement permitted by the zone.

(ii) In addition to lots intended for dwellings or mobile homes, a cluster subdivision may include a lot not intended for dwelling or mobile home use and intended for private open space and recreation purposes.

(b) Living Unit Density.

(i) A single living unit shall be considered to be a single-family dwelling, a mobile or one living unit with kitchen facilities and designed for the occupancy of one family, but sharing a common foundation, walls and roof with one or more other units in a duplex or multiple-family dwelling.

(ii) The ultimate number of living units permitted in a cluster subdivision shall be determined by multiplying the number of lots permitted for dwellings or mobile homes by:

(a) Two, if the zone permits duplexes; or

(b) One, if only single-family dwelling or mobile homes are permitted by the zone.

(iii) A cluster subdivision lot shall be limited to one of the following living units:

(a) A mobile home.

(b) A single-family dwelling.

(c) A two-family dwelling or duplex.

(d) A multiple-family dwelling.

(c) Setbacks and Lot Coverage.

(i) Except for the setback requirements of the zone for the exterior boundaries of the cluster subdivision, the setback and lot coverage requirements of the zone shall not apply.

(ii) Where cluster subdivision lots intended for dwellings or mobile homes abut a zone which does not permit a cluster subdivision, a special building setback may be established for one or more lots. Special building setback requirements shall be established only for the purposes of reducing potential conflicts relating to fire, traffic, noise or similar human-made or natural hazards, nuisances and for protection of natural resources and open space. The special building setback requirement may consist of, but is not limited to, the setback requirements of the abutting zone which does not permit cluster subdivisions.

(5) Applicaton and Additional Requirements. Cluster subdivisions shall be processed in the same manner and conform to the applicable provisions, standards and procedures as required for subdivisions as provided in LC Chapter 13.

AUTHORITY TO CHARGE FEES

RURAL COMPREHENSIVE PLAN

16.261 Authority To Charge Fees.

(1) The Department shall have the authority to charge fees for the purposes of defraying expenses involved in processing applications required by this Chapter.

(2) All fees are nonrefundable, except in cases when the processing of an application was terminated prior to the incurring of any substantial administrative expenses. Refunds shall be made for the amount of the fee remaining after the subtraction of processing expenses incurred by the Department.

ENFORCEMENT REQUIREMENTS

RURAL COMPREHENSIVE PLAN

16.262 Enforcement Requirements.

(1) Title, Purpose and Applicability. The provisions of this section shall be known as the Enforcement Requirements. The purpose of these requirements is to ensure compliance with the zoning requirements. These provisions shall apply to the enforcement of the zoning requirements, but shall not be deemed exclusive.

(2) Official Action. All officials, Departments and employees of Lane County vested with authority to issue permits, certificates or licenses, shall adhere to and require conformance with the zoning requirements.

(3) Inspection and Right of Entry. Whenever they shall have cause to suspect a violation of any provision of the zoning requirements, or when necessary to investigation of an application for or revocation of any zoning approval under any of the procedures prescribed in this Chapter, officials responsible for enforcement or administration of this Chapter, or their duly authorized representatives, may enter on any site or into any structure for the purpose of investigation, provided they shall do so in a reasonable manner. No secured building shall be entered without the consent of the owner or occupant unless under authority of a lawful warrant.

(4) Abatement. Any use which is established, operated, erected, moved, altered, enlarged, painted or maintained contrary to the zoning requirements shall be, and is hereby declared to be, unlawful and a public nuisance and may be abated as such.

(5) Enforcement Official. It shall be the duty of the Director of the Lane County Land Management Division, or said Director's duly authorized representative, to enforce the provisions of this Chapter pertaining to land use and to the erection, construction, enlargement, alteration, repair, moving, removal, conversion, demolition, occupance, equipment, use, height, area and maintenance of buildings or structures in the County. The enactment of this Chapter shall not invalidate any prior existing or future prosecutions for violation of the zoning requirements committed under previous applicable County ordinances then in effect.

(6) Legal Proceedings by District Attorney. In addition to the enforcement provisions of this Chapter, upon request of the Chief Building Inspector, the District Attorney or County Counsel may institute any additional proceedings, including, but not limited to, seeking injunctive relief to enforce the provisions of this Chapter.

(7) Enforcement by Department of Public Safety. The Director of the Department of Public Safety, or said Director's authorized representatives, shall have the power, upon request of the Chief Building Inspector, District Attorney or County Counsel, to assist in the enforcement of the provisions of this Chapter.

(8) Remedies Cumulative. It is the intent of this Chapter that the remedies provided be cumulative and not mutually exclusive.

VIOLATIONS

RURAL COMPREHENSIVE PLAN

16.263 Violations. Violations of any of the requirements of this Chapter constitute a County Infraction. Continued violations of this Chapter after 10 days from the mailing of notice of the violation by certified mail to the last known address of the alleged violator, and continued violations after an Order has been entered by the County Infractions Section for the same violation, constitute a separate County Infraction for each day the violation continues. The Director of the Lane County Land Management Division, Department of Public Works, or said Director's duly authorized representatives, shall have the authority to sign County Infraction complaints for violations of this Chapter.

LAND DIVISIONS

RURAL COMPREHENSIVE PLAN

16.300 Land Divisions.

(1) Relationship of Lane Code Chapter 13 into Lane Code Chapter 16. Lane Code Chapter 13 is the procedure for partitioning or subdividing lands under the jurisdiction of the Lane County Rural Comprehensive Plan with the following addition:

(a) Definitions. Abbreviations, terms, phrases, words and their derivatives shall be construed as specified in LC 16.090 instead of as specified in LC 13.010.

RURAL COMPREHENSIVE PLAN AMENDMENTS

RURAL COMPREHENSIVE PLAN

16.400 Rural Comprehensive Plan Amendments.

(1) Purpose. The Board shall adopt a Rural Comprehensive Plan. The general purpose of the Rural Comprehensive Plan is the guiding of social, economic and physical development of the County to best promote public health, safety, order, convenience, prosperity and general welfare. The Rural Comprehensive Plan shall be considered to be a dynamic policy instrument that can be modified to reflect changing circumstances and conditions as well as to correct errors and oversights. It is recognized that the Rural Comprehensive Plan affects the people of Lane County, and it is, therefore, important that the ability by individuals to propose amendments be free of restraint.

(2) Scope and Organization. The Rural Comprehensive Plan shall conform to the requirements of Statewide Planning Goals. The Rural Comprehensive Plan shall consist of components which shall be organized into categories by Plan type or geographic area as described in LC 16.400(3) below.

(3) Plan Categories.

(a) Rural Comprehensive Plan. This category includes all plans relating to lands beyond the Eugene-Springfield Metropolitan Area General Plan boundary and the urban growth boundaries of the cities within Lane County.

(b) Special Purpose Plan. This category includes Plans addressing a single or special need. The Plans may apply County wide or to a limited area.

(4) Rural Comprehensive Plan Described. The Rural Comprehensive Plan of Lane County shall consist of the following components:

(a) Rural Comprehensive Plan.

(i) General Plan Policies and Plan Designations applying throughout Lane County outside of the Metropolitan Area General Plan and outside of all urban growth boundaries (Adopted by Ordinance No. 883).

(b) Special Purpose Plans.

(i) Rural Transportation Plan (Adopted by Ordinance No. 3-80).

(ii) Willamette Greenway Plan (Adopted by Ordinance No. 783).

(iii) Parks and Open Space Plan (Adopted by Ordinance No. 850).

(iv) Solid Waste Management Plan (Adopted by Ordinance No. 771) (Amended by Ordinance No. 79-80).

(v) Coastal Resources Management Plan (Adopted by Ordinance No. 803) (Amended by Ordinance Nos. 862 and 876).

(vi) Siuslaw River Dredged Material Disposal Plan (Adopted by Ordinance 749) (Amended by Ordinance Nos. 861 and 877).

(vii) Housing Plan (Adopted by Ordinance No. 1-78).

(5) Interrelationship of Plan Components. New Comprehensive Plan components shall include a description of relationship to other Plan components within the respective Plan category and to the overall Rural Comprehensive Plan. Existing Plan components not containing such a description of relationship shall, at the next update of that Plan, be amended to include such a description.

(6) Plan Adoption or Amendment - General Procedures. The Rural Comprehensive Plan, or any component of such Plan, shall be adopted or amended in accordance with the following procedures:

(a) Referral to Planning Commission. Before the Board takes any action on a Rural Comprehensive Plan component, or an amendment to such Plan component, a report and recommendation thereon shall be requested from the County Planning Commission and a reasonable time allowed for the submission of such report and recommendation. In the event the Rural Comprehnsive Plan component, or amendment applies to a limited geographic area, only the Planning Commission having jurisdiction of that area need receive such referral.

(b) Planning Commission - Hearing and Notice.

(i) The Planning Commission shall hold at least one public hearing before making a recommendation to the Board on a Rural Comprehensive Plan component, or an amendment to such Plan component, and the hearing shall be conducted pursuant to LC 14.300.

(ii) Notice of the time and place of hearing shall be given, pursuant to LC 14.300.

(iii) If an exception to State Planning Goals is to be considered during the hearing, such exception shall be specifically noted in the notices of such hearing.

(iv) The proposed Rural Comprehensive Plan component, or an amendment to such Plan component, shall be on file with the Director and available for public examination for at least 10 days prior to the time set for hearing thereon.

(c) Planning Commission - Consideration With Other Agencies.

(i) In considering a Rural Comprehensive Plan component, or an amendment to such Plan component, the Planning Commission shall take account of and seek to harmonize, within the framework of the needs of the County, the Comprehensive Plans of cities, and the Plans and

planning activities of local, state, federal and other public agencies, organizations and bodies within the County and adjacent to it.

(ii) The Planning Commission, during consideration of a Rural Comprehensive Plan component or an amendment to such Plan component, shall consult and advise with public officials and agencies, public utility companies, civic, educational, professional and other organizations, and citizens generally to the end that maximum coordination of Plans may be secured.

(iii) Whenever the Planning Commission is considering a Rural Comprehensive Plan component, or an amendment to such Plan component, it shall be referred to the planning agency of every city and county affected to uniform them and solicit their comments.

(iv) The provisions of this subsection are directory, not mandatory, and the failure to refer such Plan, or an amendment to such Plan, shall not in any manner affect its validity.

(d) Planning Commission - Recommendation and Record.

(i) Recommendation of the Planning Commission on a Rural Comprehensive Plan component, or an amendment to a Plan component, shall be by resolution of the Commission and carried by the affirmative vote of not less than a majority of its total voting members.

(ii) The record made at the Planning Commission hearings on a Rural Comprehensive Plan component, or an amendment to such Plan component and all materials submitted to or gathered by the Planning Commission for its consideration, shall be forwarded to the Board along with the recommendation.

(e) Board Action - Hearing and Notice.

(i) After a recommendation has been submitted to the Board by the Planning Commission on the Rural Comprehensive Plan component, or an amendment to such Plan component, all interested persons shall have an opportunity to be heard thereon at a public hearing before the Board conducted pursuant to LC 14.300.

(ii) Notice of the time and place of the hearing shall be given pursuant to LC 14.300.

(iii) If an exception to Statewide Planning Goals is to be considered during the hearing, such exception shall be specifically noted in the notice of such hearing.

(iv) Hearings to consider amendments of the Plan Diagram that affect a single property, small group of properties or have other characteristics of a quasi-judicial proceeding shall be noticed pursuant to LC 14.300.

(f) Concurrent Consideration. The Board and Planning Commission may hold a single joint meeting to consider the proposed Plan amendment consistent with the requirements of LC 16.400(6)(e)(ii),(iii) and (iv) above.

(g) Board Referral. Before the Board makes any change or addition to a Plan component, or Plan component amendment recommended by the Planning Commission, it may first refer the proposed change or addition to the Planning Commission for an additional recommendation. Failure of the Planning Commission to report within 21 days after the referral, or such longer period as may be designated by the Board, shall be deemed to be approval of the proposed change or addition. It shall not be necessary for the Planning Commission to hold a public hearing on such change or addition.

(h) Method of Adoption and Amendment.

(i) The adoption or amendment of a Rural Comprehensive Plan component shall be by Ordinance.

(ii) The adoption or amendment shall be concurrent with an amendment to LC 16.400(4) above. In the case of a Rural Comprehensive Plan adoption, the Code amendment shall place such Plan in the appropriate category. In the case of a Rural Comprehensive Plan amendment, the Code amendment shall insert the number of the amending Ordinance.

(iii) The Board may amend or supplement the Rural Comprehensive Plan upon a finding that:

(a) The Plan component or amendment meets all requirement of local and state law including Statewide Planning Goals.

(b) The Plan amendment is made necessary by and error in the Plan, a change in circumstances pertaining to the Plan, a change in public policy, or a change in public need based on a reevaluation of the factors affecting the Plan.

(c) The proposed Plan component amendment is consistent with the unamended portions of the Plan component being amended.

(i) A change of zoning to implement a proposed Plan amendment may be considered concurrently with such amendment. In such case, the Board shall also make the final zone change decision, and the Hearings Official's consideration need not occur.

(7) Validation of Prior Action. The adoption of a Rural Comprehensive Plan component, or an amendment to such Plan component under the authority of prior acts, is hereby validated and shall continue in effect until changed or amended under the authority of these provisions.

(8) Additional Amendment Provisions. In addition to the general procedures set forth in LC 16.400(6) above, the following provisions shall apply to any amendment of Rural Comprehensive Plan components.

(a) Amendments to the Rural Comprehensive Plan shall be classified according to the following criteria:

(i) Minor Amendment. An amendment limited to the Plan Diagram only and, if requiring an exception to Statewide Planning Goals, justifies the exception solely on the basis that the resource land is already built upon or is irrevocably committed to other uses not allowed by an applicable goal.

(ii) Major Amendment. Any amendment that is not classified as a minor amendment.

(b) Amendment proposals, either minor or major, may be initiated by the County or by individual application. Individual appliations shall be subject to a fee established by the Board and submitted pursuant to LC 14.050.

(9) Addition Amendment Provisions - Special Purpose Plans. In addition to the general provisions set forth in LC 16.400(6) above, the following provisions shall apply to any amendment of Rural Comprehensive Plan components classified in LC 16.400(4) above as Special Purpose Plans. Amendments to Special Purpose Plans may only be initiated by the County. Any individual, however, may request the Board to initiate such amendment. Requests must set forth compelling reasons as to why the amendment should be considered at this time, rather than in conjunction with a periodic Plan update. An offer to participate in costs incurred by the County shall accompany the request.

(10) Periodic Review of Plan Components. All components of the Rural Comprehensive Plan shall contain a provision requiring the Plan be reviewed and, as needed, revised on a periodic cycle to take into account changing public policies and circumstances. Any Plan component adopted under the authority of prior acts be assumed to require a review every five years.

VICTOR ATIYEH
GOVERNOR

Department of Land Conservation and Development

1175 COURT STREET N.E., SALEM, OREGON 97310-0590 PHONE (503) 378-4926

June 28, 1984

The Honorable Peter DeFazio, Chairman
Board of Commissioners
Lane County Courthouse
125 East Eighth
Eugene, OR 97401

Dear Chairman DeFazio:

Enclosed is the Department's report on Lane County's request for Acknowledgment of Compliance with the Statewide Planning Goals. The Department's recommendation to the Commission is that your request be continued to the August 17, 1984 Commission meeting to complete necessary revisions to your plan and land use regulations for Goals 2, 3, 4, 7 and 11. The Department has found the plan to be thorough, innovative and well documented. Although we do not recommend acknowledgment at this time, the majority of the plan is in compliance. It is clear that the plan has significantly improved since the 1981 review, and that acknowledgment could be achieved in the near future.

The Commission will consider your acknowledgment request on July 19, 1984, at the State Capitol, Hearing Room E. You and other officials and citizens are welcome to attend this meeting and participate in the Commission's review of your acknowledgment request. The Department recommendation on Goals 5 and 15 has been postponed until the August 17, 1984 Commission meeting. However, the recommendation on these Goals will be available prior to the July 19 meeting. The Department is also recommending that the Commission hear all testimony on Goals 1-4, 5-14 and 15-18 at the July meeting, but postpone final action until the August meeting.

You have 10 calendar days from the date the attached report was mailed to file written exceptions to the report with the Commission at the Salem office (OAR 660-03-025(2)). We would urge you to send copies of any exceptions to commentors or objectors affected by exceptions.

Please contact your Field Representative, Bob Rindy at 378-4095, if you have any questions and for the time when your item will appear on the agenda.

Sincerely,

James F. Ross

LAND CONSERVATION AND DEVELOPMENT COMMISSION
ACKNOWLEDGMENT OF COMPLIANCE

Lane County
and
Rural Portion of Eugene/Springfield Metro Plan

Response from Denial Order of November 6, 1981
and from Continuance Order of November 6, 1981

DATE RECEIVED:
March 15, 1984

DATE OF COMMISSION ACTION:
July 19, 1984

I. REQUEST

The County has requested that its comprehensive plan and implementing measures be acknowledged as in compliance with the Statewide Planning Goals for areas outside adopted urban growth boundaries. Also, the County and the Cities of Eugene and Springfield request acknowledgment of compliance for the rural portions of the Eugene/Springfield Area General Plan.

II. SUMMARY OF RECOMMENDATIONS

Staff

Recommends the Commission continue Lane County's request to allow amendments to the plan to comply with Statewide Planning Goals 2-4, 7 and 11. The Commission should hear testimony on these issues July 19, 1984, but not take final action until the August hearing.

Recommends the Commission continue the request to allow amendments to the Eugene/Springfield Metro Area General Plan under Goals 2 and 4. The Commission should not take final action on this until the August Commission hearing.

Recommends the Commission postpone consideration of Goals 5 and 15 for both plans until the August Commission hearing.

III. BACKGROUND INFORMATION

Geography

Lane County is located at the southern end of the Willamette Valley and extends from the crest of the Cascades to the Pacific Ocean.

Governing Body

The County is governed by a five-member Commission elected from separate districts.

Population

2000 - 377,500 (projection)
1980 - 273,266 (102,200 unincorporated)
1976 - 240,792

General Overview

Lane County has a long history of land use planning. A General Plan was adopted in 1972. Between 1974 and 1977, the County developed separate plans for each of 13 "sub-areas." These were incorporated into a revised General Plan adopted in 1980. The Commission denied the Lane County submittal in February 1981, stating:

> Goal deficiencies are in many cases major and widespread. Goal 2 failures touch nearly every requirement of the Land Use Planning Goals . . ." (Denial Report).

As this report demonstrates, planning in Lane County has made a quantum leap since 1981. The County has moved from 13 subarea plans into a consolidated policy document. This document is based on "Working Papers"--each containing detailed inventory and analysis information suporting the County's land use decisions and implementing ordinances.

The County has recently completed "digitizing" information on all land in the County. This will allow sophisticated computer generated maps and other data analyses. Since this process was not completed until very recently, the submital contained poor maps.

This report finds compliance with Goals 1, 6, 8-10, 12-14 and 16-18. Also, a major portion of the County's "exceptions" areas are recommended for approval, along with a significant portion of the County's forest lands (F-1 areas). It is staff's opinion that the work remaining for the County, under the recommendations of this report, could be acommplished in a very short time period.

This report also addresses the Eugene/Springfield Metro Area General Plan. The "urban" portion of that plan is acknowledged (i.e., that area inside the urban growth boundary). However, the Commission should note that Metro plan jurisdiction applies to rural areas outside the UGB and these areas are not under the Lane County Plan. Also the rural Metro Plan is under a continuance rather than a denial. Most of these continuance requirements have been met. However, some Goal 2 and 4 issues remain, necessitating an additional continuance for the rural Metro Plan as well.

Due to time constraints in completing this review for the July Commission meeting, Goals 5 and 15 reviews for both plans are not contained in this report. These reviews will be completed and distributed prior to July 19, 1984. However, the Commission will not be able to complete Goal 5 and 15 testimony on those Goals at that time due to notice requirements requiring distribution of this material three weeks prior to Commission action. Staff recommends that the Commission hear these Goal 5 and 15 issues at a subsequent hearing (August).

The Department recommends that the County's request be continued (but with postponement of final action until August) based on the following issues:

GOAL 2: Inadequate plan maps, plan/zone consistency problems and inadequate findings justifying built and committed exceptions.4

GOAL 3: Lack of plan amendment policy and inadequate findings and reasons for most areas designated Marginal Lands.

GOAL 4: Justification of minimum lot sizes is inadequate. Misapplication of the County's "Impacted Area" (F-2) Zone plan policy deficiencies for applying the F-1 and F-2 zones ordinance deficiencies in both the F-1 and F-2 Zones.

GOAL 7: Lack of implementing measures for developments in Geologic Hazard Areas.

GOAL 11: Lack of policy establishing appropriate levels of service in rural areas. Lack of assurances that authorized development in areas where subsurface sewage problems exist will not further aggrevate this problem.

VICTOR ATIYEH
GOVERNOR

Department of Land Conservation and Development

1175 COURT STREET N.E., SALEM, OREGON 97310-0590 PHONE (503) 378-4926

July 19, 1984

The Honorable Peter DeFazio
Chairman, Board of Commissioners
Lane County Courthouse
125 East Eighth
Eugene, OR 97401

Dear Chairman DeFazio:

Enclosed is the Department's report on the Lane County and the Eugene/Springfield Metro area request for Acknowledgment of Compliance with Statewide Planning Goals 5 and 15. The Department's recommendation to the Commission is that your request be continued to the August 16-17, 1984 meeting to complete necessary revisions to your plan and land use regulations for Goals 5 and 15.

The Commission will consider your acknowledgment request on August 16 or 17, 1984, at the State Capitol. You and other officials and citizens are welcome to attend this meeting and participate in the Commission's review of your acknowledgment request. You have 10 calendar days from the date the attached report was mailed to file written exceptions to the report with the Commission at the Salem office (OAR 660-03-025(2)). We would urge you to send copies of any exceptions to commentors or objectors affected by exceptions.

Please contact your Field Representatives, Bob Rindy at 378-4095 or Glen Hale at 265-8869, if you have any questions and for the time when your item will appear on the agenda.

Sincerely,

James F. Ross
Director

LAND CONSERVATION AND DEVELOPMENT COMMISSION
ACKNOWLEDGMENT OF COMPLIANCE

Lane County
and
Rural Portion of Eugene/Springfield Metro Plan
Goal 2--Nonresource Lands, Goal 5, Goal 15

Response from Denial Order of November 6, 1981
and from Continuance Order of November 6, 1981

DATE RECEIVED:
March 15, 1984

DATE OF COMMISSION ACTION:
August 17, 1984

REQUEST

The County has requested that its comprehensive plan and implementing measures be acknowledged as in compliance with the Statewide Planning Goals for areas outside adopted urban growth boundaries. Also, the County and the Cities of Eugene and Springfield request acknowledgment of compliance for the rural portions of the Eugene/Springfield Area General Plan.

SUMMARY OF RECOMMENDATIONS

Staff

Recommends the Commission continue Lane County's request to allow amendments to the plan to comply with Statewide Planning Goals 2, 5, and 15. The Commission should hear testimony on these issues July 19, 1984, but not take final action until the August hearing.

Recommends the Commission continue the request to allow amendments to the Eugene/Springfield Metro Area General Plan under Goals 2, 5, and 15. The Commission should not take final action on this until the August Commission hearing.

FIELD REPRESENTATIVES: Bob Rindy/Glen Hale (Coastal)

LEAD REVIEWERS: Mike Rupp (Goals 2--Nonresource Lands
Claire Puchy (Goals 5 and 15)
Phone: 378-4926

COORDINATOR: Gary Darnielle
Phone: 687-4283

Date of Report: July 19, 1984

GOAL 5: OPEN SPACES, SCENIC AND HISTORIC AREAS, AND NATURAL RESOURCES

This Goal 5 report is divided into two major parts. The first part is the review for all areas of Lane County outside the Metro Plan Boundary. The second part is for those areas inside the Metro Plan Boundary, but outside the Metro Area UGB.

PART I--AREAS OUTSIDE THE METRO PLAN BOUNDARY

Introduction

All Goal 5 resource categories are applicable to Lane County, and are addressed in separate subsections of this report.

According to Section 660-16-025 of the Goal 5 Administrative Rule (OAR 660-6-000 through 660-16-025), the Goal 5 Rule requirements apply to jurisdictions under denial orders as of the date the adoption of the Rule (June 1981). Lane County was issued a denial order in March of 1981. Therefore, the Goal 5 Rule has been used during this review for purposes of judging compliance.

In the following discussion, the numbers and letters in parentheses refer to sections of the Goal 5 Administrative Rule (e.g., (1A), (1B), (1C), (2A), (3A), (3B), (3C)). It should be noted, however, that these are the citations used by the Commission in its June 1981 adoption of the Rule. Since that time, the Secretary of State's office has recodified the Rule and has assigned different numbers and letters to its various subsections. The references in this report are to the Commission's 1981 version, since it is the one with which most readers are familiar. A copy of this Rule is attached to this report for reference.

Goals 16 and 17 establish more specific inventory and protection requirements for some Goal 5 resources that are located in estuarine or coastal shorelands areas.

Lane County's plan and implementing measures were acknowledged as being in compliance with the Coastal Goals in July, 1983. Therefore, this Goal 5 review does not address the following Goal 5 resources in those areas:

	Addressed Under	
Goal 5 Resource	Goal 16	Goal 17
Open Space	X	
Mineral and Aggregate Resources		
Energy Sources		

Fish and Wildlife	X	X (only "riparian," "major marshes and significant wildlife habitats")
Ecologically Significant Natural Areas	X	X
Scientifically Significant Natural Areas	X	
Outstanding Scenic Views and Sites		X (where the quality is primarily derived from or related to the association with coastal water areas)
Watersheds		
Groundwater Resources		
Wetlands	X	X (only "major marshes," "significant wildlife habitat," and wetlands with "exceptional aesthetic quality")
Historic/Archaeological Sites		X
Wilderness	X	X
Oregon Recreation Trails		
Wild and Scenic Rivers and Waterways		

Land Needed or Desirable for Open Space

Inventory

Lane County's Recreational Resources Working Paper contains a section addressing open space (pp. 4-5). The County discusses the various kinds of open space, and the benefits of preserving open space. The County indicates that it considers "all lands designated for agricultural or forest use, or for other clearly similar resource-production use" to be open space (p. 5). Additionally, the County concedes that recreational

areas, including parks, and significant or scientific natural areas also contain open space qualities. Because of "its broad nature, open space is not mapped as a site-specific, separate resource item. Instead...other designations with open space qualities are mapped..." (p. 5). Please refer to the Goal 3, 4, 9, 15 and other Goal 5 portions of this report for more detailed information about Lane County's inventories of lands possessing open space values. See also the July 1983 staff report adopted by the Commission for a discussion of compliance with inventory requirements of Goals 16-18.

Policies

Lane County has adopted one policy which addresses open space resources, per se (Open Space and Scenic Areas Policy 1, Plan, p. 16):

> Lane County has determined that all resource lands in the County are also open space lands. Resource related activities shall predominate on these lands. Where proposals are developed land uses are made consistent with the Comprehensive Plan and Statewide Goals, development standards shall be applied which minimize loss of open space.

In addition, the County has adopted numerous policies regarding agricultural and forest lands, a variety of Goal 5 resources which possess open space values, the Willamette Greenway recreation areas, and coastal resources. Please refer to the Goal 3, 4, 8, 15 and remaining Goal 5 sections of this report for details. See also the July, 1983 Commission action for a discussion of policies addressing Goals 16-18.

Implementing Measures

As noted in the Goal 3 and 4 sections of this report, Lane County has several resource zones which it has applied throughout the County. It has also adopted and applied a Greenway Permit ordinance to lands within the Willamette Greenway (see the Goal 15 section of this report for details). However, these Goals have not yet been fully satisfied, nor have some Goal 2 exceptions been justified. Several coastal zones have been developed and applied in coastal shorelands, estuarine, and beaches and dunes areas (see the July, 1983 staff report adopted by the Commission regarding compliance with Goals 16-18).

Finally, as noted in the remaining subsections of the Goal 5 section of this report, the County has adopted several implementing measures for the protection and/or resolution of conflicts with Goal 5 resource sites containing open space values.

In particular, the County has adopted a Natural Resource Zone (NR-RCP) (Lane Code, Section 16.213), which is intended to protect areas having unique and irreplaceable natural resources which are vital elements for a safe, healthful and pleasant environment for human life. The Natural Resource Zone states that it may be applied to public and private lands where the Rural Comprehensive Plan requires natural resource site

protection, but that the zone is not intended to be applied to other types of resource land, such as agricultural land and forest land. This is not to say, however, that the Natural Resource Zone cannot be applied to agricultural and forest lands. If a Goal 5 resource site is located on agricultural or forest land, Natural Resource zoning will be applied after an analysis of the ESEE consequences of conflicting uses has been completed demonstrating the appropriateness of Natural Resource zoning (confirmed by Jim Mann, Senior Planner, personal communication, June 20, 1984).

Emphasis of the Natural Resource Zone will be placed on limiting and regulating human activity in areas where:

(a) The acceptable water quality of streams, lakes, estuaries of the ocean may be endangered;
(b) Watersheds and their streams or lakes are used for domestic water supplies;
(c) Vegetative cover is essential to maintain soil stability and prevent erosion;
(d) Natural conditions are vital for either unique vegetative ecosystems, aquatic or wildlife habitat; and
(e) Scenic quality or vistas or open space is unique and/or irreplaceable.

In the NR Zone, the following uses are allowed outright (Section 16.213(2):

(a) The following recreational facilities and uses owned by a governmental agency of a nonprofit community organization limited to day use.

(i) Exhibitions of the natural conditions of shorelands, dunelands, forested areas, streams and lakes, marshlands, or similar areas of unique and irreplaceable value, and the vegetation and wildlife supported by such lands and waters provided that in no event shall such activity destroy, or endanger the relationships between the natural conditions being exhibited.

(ii) Picnicking areas, day parks and playgrounds.

(iii) Accessory facilities for outdoor recreation activity such as fishing, clam digging and hunting (provided such activity is conducted only in those areas allowed pursuant to Federal, State and Local fish and game regulations) and hiking and horseback riding.

(b) Fish and wildlife habitat management and the propagation of fish and wildlife.

Single family dwellings or mobile homes for residential purposes for a watchman, caretaker or operator in conjunction with a permitted use, in the NR Zone above, are considered "Special Uses" subject to approval by the Planning Director (Section 16.213(3)). The following "Special Uses" are subject to approval by a Hearings Officer (Section 16.213(4)):

(a) Piers and boat houses.
(b) Single-family dwelling or mobile home and accessory structures.
(c) Farm uses as defined by ORS 215.203(2), and any accessory uses.
(d) Forest uses and any accessory uses.

Uses in Section 16.213(4) above are subject to compliance with the following conditional use criteria (Section 16.213(5)):

(a) (i) Evidence is provided supporting reasons why the proposed use should be sited in a natural resource area.
(ii) That the proposed site is on land generally unsuitable for natural resource uses.
(b) That the proposed use will not significantly impact natural resource uses on adjacent and nearby natural resource lands, and will not significantly impact natural resources on the site of the proposed uses;
(c) That the proposed use will not significantly increase the costs of natural resource management on adjacent and nearby resource lands;
(d) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use;
(e) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby NR zoned lands, and these measures may be established as conditions of approval; and
(f) That the proposed use is consistent with the policies contained in the Rural Comprehensive Plan and the purpose of the NR zone.

Property development standards for all uses allowed in the NR Zone are set forth in Section 16.213(6) and include setbacks from front, side and rear yards.

Specific application of the Natural Resource Zone is discussed in the other Goal 5 sections of this report. A review of the County's zoning maps indicates that the NR Zone has been applied to a number of Goal 5 areas in the County.

Section 16.215 of the Zone Code is the County's Park and Recreation (PR-RCP) zone which has been applied to a number of sites in the County. The zone permits a number of recreational uses outright and conditionally. However, as noted in the Goal 2 Section of this report, the PR Zone allows a number of uses which could conflict with the purpose of the zone. Some of these uses could also conflict with a number of

Goal 5 resources including open space. This issue is dealt with in the Goal 2 portion of this report.

Conclusion--Open Space

Lane County has not inventoried any specific open space areas, per se. However, it considers farm and forest lands, recreation areas as well as natural areas to possess open space values. These have been inventoried as part of other Goal requirements. The County has a policy recognizing all resource lands as open space lands and indicating that resource-related activities shall predominate in these areas. Open space loss will be minimized where development is proposed, according to the County's policy. Resource zoning has been applied to most of the County, along with special zoning districts which help protect open space (e.g., Willamette Greenway, Natural Resource Zones).

Mineral and Aggregate Resources

Inventory

Lane County's inventory of mineral and aggregate resources is contained in its Mineral and Aggregate Working Paper.

Mineral Resources: The Working Paper addresses the following minerals: clay, copper, lead, gold, zinc, silver, mercury, antimony, arsenic, tourmaline, molybdenum, and pumice (pp. 3-5). The general locations of these mineral deposits are shown on a map (Appendix A), and are concentrated in four main areas: Hobart Butte, Bohemia, Fall Creek, and Blue River. The locations of these four areas are shown on the map as well. Information about the general quality, and quantity of these resources is provided. The County has not provided information on the location, quality, and quantity of specific sites, however.

Aggregate Resources: Lane County inventoried its aggregate supplies by examining permit lists from the Department of Geology and Mineral Industries and the Division of State Lands, by conducting telephone searches, taking on-site tours of aggregate-producing areas; and by talking with industry representatives (p. 6). The locations of 30 identified sites appear on a map in Appendix C and are listed by legal descriptions and tax lot numbers in Appendix D. A more extensive list of all tax parcels having any record of previous aggregate extraction is included in Appendices E and F. Appendix D is considered the County's (1C) inventory for lands outside the Metro Planning Area. Appendix E is the (1B) inventory for lands inside the Metro Area. Appendix F is the (1B) inventory for lands outside the Metro Area (confirmed by Mike Copely, Lane County Planner, personal communication, July 16, 1984).

Information on quantity of (1C) sites is presented in cubic yards, but the County cautions that the accuracy of this information is limited. In many cases, individual suppliers had only a cursory knowledge of the extent of their resources (p. 7). Quality of the supplies was not evaluated, due to time and budget constraints as well as the variability of resource materials.

Supply estimates were compiled by region (there are four regions in the County) and then coupled with demand estimates for each region in order to assess localized needs and supply/demand situations (p. 7). Demand forecasts were based on population projections and a per capita consumption figure of 22 tons annually (p. 7). Based on these estimates, cumulative demands for each region were projected. This analysis shows that existing supplies will be sufficient to satisfy demand to the year 2000. This will be particularly true if actual population growth rates are on the low side of the estimates. The available supply for the non-metropolitan area of the County is about three times the figure for projected consumption even when assuming the high population projections (p. 8). However, in terms of the supply/demand situation for each region, the margin of supply over demand for the southern section is relatively small. This is true also (but less so) for the western region. Also, the Metro Area will use some of the County supplies. Similarly, 5 to 10 percent of the U.S. Forest Service and BLM needs are supplied by the private market (p. 9).

Conflicting Uses/ESEE Consequences Analyses

Mineral Resources: Lane County reports that most of the mineral areas are on public lands (either the BLM or U.S. Forest Service). As such, federal laws govern prospecting, claims, and mining activities. Current forest resource designation and zoning for these areas "do not appear to preclude their development potential. Forest management and mining activities are considered to be compatible activites by most authorities" (p. 5).

Aggregate Resources: Each of the 30 inventoried sites was evaluated in terms of the following potential conflicts:

1. Areas of significant natural value contained in the Oregon Natural Heritage Program inventory;
2. Historical resources contained in the Working Paper on Historical Resources;
3. Willamette Greenway;
4. Park and recreation sites contained in the Lane County Parks and Open Space Master Plan;
5. Sensitive fish and waterfowl habitat identified in the Working Paper on Flora and Fauna; and
6. Existing or planned residential development.

Appendix J summarizes the results of the County's analysis. No conflicts were noted for any of the sites. Sites were not evaluated in terms of conflicts with agricultural or forest lands, since all of the sites are existing sites and therefore no longer available for these uses (p. 10).

Policies

A number of mineral and aggregate resources policies have been adopted (Plan, pp. 13-14). These include:

1. Known mineral resource sites within the County, which include those identified in Appendix "D" of the "Mineral and Aggregate Resources Working Paper," shall be conserved for both present and future uses through the application of Plan designations and compatible land use regulation measures. Such designation and regulation is to follow the requirements of the Goal 5 rule (OAR 660-16-000 through 660-16-025), which is addressed in Appendix "J" of the "Mineral and Aggregate Resources Working Paper."

2. Exploration for mineral resources (in contrast to actual mining) shall be a permitted activity in the rural portions of the County. Areas designated primarily for residential purposes are to be excluded from this policy as are areas that, having undergone analysis in accordance with OAR 660-16-000, are designated as having some unique natural, historical or cultural value. Exploratory drilling for gas, oil or other hydrocarbons is not within the scope of this policy.

3. Mining operations are regulated by state and federal government agencies. County regulations shall supplement these actions only as necessary to ensure compatibility in the area, or to protect other resources.

4. Conserve and manage land, soil and mineral resources by respecting their physical limitations and environmental assets.

5. Update, in cooperation with local aggregate operations, federal, state and local agencies, past sand and gravel inventories to ensure supply/demand information is current.

6. Protect aggregate deposits from encroachment of incompatible uses and ensure that aggregate material in close proximity to its point of use will be available when needed.

7. Present and future land use controls shall be implemented to allow for the discovery of new mineral and aggregate resources when it is demonstrated that the projected demand for those resources in a given area will exceed available supply and conflict with adjacent uses can be minimized. Conflict analysis and resolution shall follow the methodology set forth in Appendix "J" of the Working Paper: Mineral and Aggregate Resources; however possible impact on agricultural lands, forest lands and residential

development (existing or planned) must also be considered. For sites within the Willamette Greenway or near Goal 5 inventoried resources, notification of the potential conflict shall be sent to the appropriate body (e.g., Pioneer Museum, Oregon Department of Transportation, Oregon Department of Fish and Wildlife, etc.).

8. Encourage farm and forestry use of aggregate land prior to extraction; minimize negative environmental impacts during extraction; require reclamation after extraction which is compatible with adjacent uses.

9. Lane County shall apply the appropriate district (SG, SG/CP, /QM) to the sites listed in Appendix "J" of the Mineral and Aggregate Working Paper. Those sites with potential conflicts shall be placed in the SG/CP or QM/SR Districts.

10. Sites for which not enough information is presently available to determine quality, quantity and conflicts with other uses which include those sites listed in Appendix "F" of the "Mineral and Aggregate Working Paper," shall be considered "Significant" in terms of OAR 660-16-000 through 660-16-025, but requiring that the Goal 5 evaluation process be delayed (the "1B" option). At such a time as it is clear that these sites will be needed within the County's advance framework, they shall be evaluated per the Goal 5 rule including conflict analysis and implementation of protective measures. Such evaluation will take the form of Plan amendment or revision studies. Notwithstanding the above schedule, all "1B" sites will be evaluated within five years of the date of this Policy adoption. These sites are included herein as Goal #5 Mineral and Aggregate Exhibit A.

11. Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with section C.3.i. of the Goal. Major adverse effects of extraction on water quality, fish and wildlife, vegetation, bank stabilization, streamflow, scenic quality, noise and safety are to be minimized, and such values reclaimed where possible. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

Policy 11 above indicates that significant fish and wildlife habitat areas in the Greenway shall be protected in accordance with Section C.3.i. of Goal 15. Section C.3.i. requires that aggregate extraction be allowed only when "subject to compliance with local regulations designated to minimize adverse effects on water quality,

fish and wildlife, vegetation, bank stabilization, streamflow, visual quality, noise, safety and to guarantee necessary reclamation" (emphasis added). The Goal standard for significant fish and wildlife habitat areas, however, is stronger. It is spelled out in Section C.3.d. of Goal 15, rather than simply Section C.3.i. (This is also addressed in the Goal 15 section of this report).

Implementing Measures

Lane County has adopted a Quarry and Mine Operations Combining (/QM-RCP) Zone to protect major deposits of minerals, rock, and related material resources, and to resolve conflicts with surrounding uses (Lane Code, Section 16.216).

The Quarry and Mine Operations Combining Zone shall be available for use by the County for new or existing operations when requests are received as part of an areawide or legislative rezoning, or a specific property or quasi-judicial rezoning. When property under consideration of /QM zoning is in close proximity to existing and planned uses potentially incompatible with /QM uses, the application of the zone may be limited to a specific portion of a property in order to encourage the compatibility and proper management of land uses.

The Quarry and Mine Operations Combining Zone is intended to be applied only to those operations which have been evaluated through the Goal 5 Administrative Rule process. Other quarry and mining operations of short-term or intermittent duration should be provided pursuant to the special use provisions of the various zones.

In the Quarry and Mine Operations Combining Zone, the following types of buildings and uses are permitted, subject to the provisions of the Quarry and Mining Operation Reclamation Permit and exceptions set forth in the code (Section 16.216(4)).

(a) Uses permitted in the parent zone with which the /QM zone is combined.
(b) Extracting and storing of minerals, including equipment and materials necessary to carry out these functions.
(c) Plants for the processing of minerals from quarry and mine extraction operations.
(d) Sale of products generated from the quarrying and mining operation.
(e) Activities pemitted as part of the reclamation process provided for in the Reclamation Plan.
(f) Structures an buildings used in conjunction with the extracting and storing of minerals.

The zone requires that a surface mining permit first be obtained from the Department of Geology and Mineral Industries (Section 16.216(5). Section 16.216(6) sets forth blasting notice and records requirements.

Section 16.217 of the Lane Code is the County's Sand, Gravel, and Rock Products (SG-RCP) Zone. The SG Zone "shall only be applied to those sites which have been evaluated consistently with the Statewide Planning Goal No. 5 Administrative Rule conflict resolution process (Sec. 16.217(4)). In the SG-RCP Zone, sand and gravel operations are permitted subsequent to the following restrictions: For any property designated in the Eugene-Springfield Metropolitan Plan as significant in terms of OAR 660-16-000/025 and designated as '1B', a Goal 5 ESEE consequences analysis per the Goal No. 5 Administrative Rule must first be completed. If the landowner and County do not agree on the method to achieve the Goal, the matter shall be forwarded to the Hearings Official for processing consistent with LC 16.100.

A number of uses are allowed in the SG-RCP Zone when conducted in conjunction with a sand and gravel operation (Sec. 16.217), including asphalt paving-mix plant and accessory buildings; cement concrete batching plant; aggregate products fabrication and sale; sand and gravel resource-related equipment storage yard, maintenance and storage buildings, offices and warehouses "appropriate to the uses permitted in this District"; retail or wholesale sales of products related to the use of sand, gravel and related products; agriculture, grazing or timber raising; dwellings for owners, operators or help required; and signs. The zone contains site improvement standards, as well as setback standards, cover, planting, drainage and topsoil standards, and operating standards.

The SG-RCP Zone establishes a Sand and Gravel Review Committee to determine if operating plans or revised plans comply with the requirements of the zone or with "a river plan which may be adopted by the Board." The committee is made up of the Planning Director, the Public Works Director, the Parks and Recreation Director, the Chief Sanitarian, the County Hydrologist, and the County Floodplain Specialist. The Review Committee is notified of all operating plans and revised plans, and has seven days to approve the plan or require modification of the plan.

It appears, from an examination of zoning maps, that the SG Zone has been applied to a number of sites that are not included on any plan inventory of (1C) sites. Yet, contrary to the zone's purpose statements, the County has not applied the Goal 5 process to these sites to justify SG zoning.

Section 16.218 of the Lane Code is the County's Sand, Gravel and Rock Products-Controlled Process (SG-CP-RCP) Zone. The zone is intended to provide more restrictive control of processing activities than the SG-RCP Zone (described above) for the protection of surrounding properties or for greater control over the location and operation of processing activities. The SG-CP-RCP Zone shall apply only to sites which have been evaluated via the Goal 5 Rule process (Sec. 16.216(3)).

The requirements of the SG-CP-RCP Zone are the same as in the SG-RCP Zone except that the Sand and Gravel Review Committee, in its evaluation of operational plans, must evaluate "the location for the erection or enlargement of all processing equipment and activities, including, but not limited to asphalt paving mix and cement concrete batching plants" according to the following "Operational Plan Approval Criteria":

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity; and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverge and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding.

Among the permitted uses in the F-1 Zone are (1) mining and quarrying and processing of rock permitted in accordance with the FPA for forest road construction or other forest related uses, or when used solely in conjunction with a farm use on which the mining or quarrying occurs, and (2) operations conducted for the exploration of aggregate or other mineral and subsurface resources (Lane Code, Section 16.210(2)(c) and (g)). Mining, quarry, and processing of mineral, geothermal and other subsurface resources; and rock mining, quarrying and processing which exceeds the standards in 16.210(2)(c), above, are allowed conditionally subject to a Hearings Official approval. Conditional use criteria in the F-1 Zone have been discussed in the Goal 4 section of this report.

In the F-2 Zone, mining, quarrying, and processing of rock for forest or farm road construction is permitted outright on the same tract as the mining or quarrying occurs (Sec. 16.211(2)(c)), as are operations for the exploration for aggregate or other mineral or subsurface resources (Sec. 16.211(2)(e)). The mining, quarrying, and processing of mineral and other subsurface resources; and rock mining and quarrying and processing that exceeds the standards in Section 16.211(2)(c), above are

considered Special Uses, subject to Hearings Official approval (Sec. 16.211(5)(d)). This is also the case for operations conducted for the exploration, mining and processing of aggregate or other mineral resources or other subsurface resources (Sec. 16.211(5)(k)). Criteria for permitting these uses are found in Section 16.211(6).

In the Exclusive Farm Use Zone, operations for the exploration, mining and processing of aggregate and other mineral resources or other subsurface resources are Special Uses, subject to Hearings Official Approval (Sec. 16.212(4)(b)).

Please refer to the Goal 15 section of this report for a discussion of the County's approach to mineral and aggregate sites located within the Willamette Greenway.

Objections

1. Oregon Department of Fish and Wildlife (ODFW), 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the sand and gravel plan and zone designations given to a site known as the Pudding Creek Heronry. Since this site is within the Willamette River Greenway, please refer to the Goal 15 section of this report for details about these objections.

2. 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the County's plan and zone designations for the Big Island (or Confluence) Heronry at the confluence of the McKenzie and Willamette Rivers. Inasmuch as this site is within the Willamette Greenway Boundary, the objections are presented in greater detail in the Goal 15 section of this report.

3. James Spickerman (on behalf of Leon Funke and Michael Horton) has objected to the zoning of farm lands for sand and gravel extraction and processing uses.

   a. Objectors are specifically concerned about the following parcels:

      17-03-06 TL 400, 500, 300, 201
      17-03-05 TL 300, 1500, 1300, 1900
      16-03-31 TL 901, 500 and 101

      The 455 acres in these parcels are primarily agricultural land and have been zoned SG-RCP according to objectors. Allowed uses include sand and gravel extraction as well as asphalt paving mix plant, concrete batching plant, aggregate products fabrication and sale, and retail or wholesale sales of products. The land was previously designated EFU. Objectors point out that in Westerburg v. Linn County, LUBA held that a Goal 2 exception to Goal 3 was required when a zone change was made from EFU to aggregate extraction and processing where the new zone permitted

manufacturing processes and activities. Objectors believe, therefore, that Lane County should have taken an exception prior to rezoning these parcels.

b. Objectors claim that the County applied SG zoning to parcel 16-03-31 Tax Lot 601 and 602 without the necessary ESEE consequences analysis of conflicts with Goal 3 uses and other Goal 5 uses. Objectors point out that the site has a "long history of documented conflict between the sand and gravel extraction use and adjacent agricultural and residential uses. Objectors further point out that in Olsen et al. vs. Scappoose Sand and Gravel Co., LUBA indicated that the Goal 5 Rule requires that, where conflicting uses have been identified, the Goal 5 resource site (e.g., mining) may itself have an impact on other uses and these impacts must be considered in analyzing the ESEE consequences.

c. Objectors believe that plan policies do not address the Goals adequately because there is no method set forth in the plan for Goal 5 conflict resolution analysis. The plan states that such analysis and resolution of conflicts shall follow the methodology in Appendix J of the Mineral and Aggregate Working Paper. Objectors, however, state that Appendix J contains no such methodology, but only a statement of conclusions regarding particular sites.

d. Objectors point out that the plan policies set forth no method to reconcile Goal 5 and Goal 3 conflicts (specifically, where agricultural soils are underlaid with aggregate resources).

e. Objectors claim that plan policies make no provision for ESEE analysis of conflicting Goal 5 uses.

f. Objectors claim that the plan does not comply with Goal 5 Guideline B9 which states:

> Areas identified as having non-renewable mineral and aggregate resources should be planned for interim, transitional and "second use" utilization, as well as for the primary use.

g. Objectors claim that, although a number of sites are to be considered under the (1B) process at a later date, the sites are not included on the plan inventory as a "special category," as required by the Goal 5 Rule.

h. Objectors believe the plan is not internally consistent. Specifically, objectors point out that EFU lands are zoned SG-RCP, but there is no basis for this in policies or in working papers. A number of parcels are zoned for sand and gravel extraction, but not all have been designated for such uses.

Objectors also point out that SG-RCP zoning is contrary to agricultural lands policies (to provide maximum protection for agricultural activities by minimizing activities that could conflict with such uses.

i. Objectors point out that no consideration is given to the effects of SG-RCP zoning on the groundwater resources of agricultural lands adjacent to the land designated SG-RCP.

Response to Objections

1. The response to the objections regarding the Pudding Creek heronry is presented in the Goal 15 section of this report.

2. The response to the objections regarding the Confluence Heronry is presented in the Goal 15 section of this report.

3. a. Objectors contend that sites 17-03-06, TL 400, 500, 300, 201; 17-03-05 TL 300, 1500, 1300, 1900; 16-03-31 TL 901, 500, and 1001 were all rezoned from EFU to S-G-RCP without an exception. Objectors cite Westerberg vs. Linn County as requiring this be done where the new zone permits processing activities. This was based on the fact that ORS 215.213 allows processing conditionally, but at the time of Westerberg vs. Linn County, "processing" did not include the batching and blending of aggregate. However, the 1983 Legislature changed the statutory definition of "processing" (ORS 517.750(9)) to include "crushing, washing, milling, screening as well as the batching and blending of mineral aggregate into asphaltic and portland cement concrete product . . .". Therefore, objectors are not correct in suggesting that a Goal 2 exception be taken for such sites. However, this is not to say that the Goal 5 Rule process does not apply. In the case of the parcels cited by objectors, this process has been completed for only 17-03-06 TL 400, 17-03-05 TL 300, 16-03-31 TL 901, and 16-03-31 TL 1001. The Mineral and Aggregate Working Paper (p. 10) indicates that, because these are existing operating sites, these sites are no longer available for agricultural use. No conflicts were found to exist for any of these four sites.

b. Objectors are correct that parcel 16-03-31 TL 601 has not been analyzed according to the Goal 5 process. Site 16-03-31 TL 602, however, is included as Site No. 21 in Appendix D of the County's Mineral and Aggregate Working Paper. No conflicts were found to exist with Site No. 21. Conflicts with agricultural uses for the site were not analyzed because the site is an operating site and it is assumed it is no longer available for agricultural use (Working Paper, p. 10). Objectors are correct, however, that the County did not address conflicts with adjacent agricultural and residential uses. This has not been required except when a new site or expansion of an existing site is

proposed. Policies 7 and 10 require Goal 5 analysis in such circumstances, including analyzing and resolving conflicts with surrounding uses.

c. Objectors are not correct that the County lacks a method for analyzing and resolving conflicts pertaining to (1C) mineral and aggregate resources in Appendix D. The County indicates that there are no conflicting uses for these sites, and therefore either the SG ,/QM or SG/CP zone will apply. It also indicates that sites with potential conflicts shall be placed in the SG/CP or QM/SR Districts (Mineral and Aggregate Policy 9). All (1B) sites require a full Goal 5 evaluation, including conflict resolution and plan amendments or revision studies before extraction activities are allowed, according to Mineral and Aggregate Policy 10.

Objectors are correct that Appendix J is a statement of conclusions about the conflicts with the 30 (1C) sites, and not a methodology for analyzing and resolving conflicts per se. However, the policy should be interpreted as requiring that the same methodology used in producing Appendix J will be used in future conflict/resolution situations (i.e., determining whether there are conflicts with other Goal 5, 8, and 15 resources, or with planned or existing development). The policy would also require consideration of possible impact or agricultural and forest lands in approval of any new site or expansion of an existing site.

d. Objectors are not correct that there is no plan policy method to reconcile conflicts on agricultural lands that contain aggregate resources for those (1B) sites in Appendix F. Specifically, Mineral and Aggregate Policy 10 requires a full Goal 5 Rule evaluation of (1B) sites. This will require a site-by-site analysis of conflicts (including those with agricultural lands), an ESEE consequences determination of those conflicts, and application of measures to resolve conflicts.

e. There is no specific Goal 5 requirement to adopt plan policies which require analysis of ESEE consequences of identified conflicting uses. Rather, such conflicts are to be resolved during the planning process, based on such an analysis which is to be incorporated into the plan. (The exception to this is for (1B) sites. Jurisdictions must adopt policies to apply all applicable steps of the Goal 5 Rule to such sites. Lane County has such a policy for its (1B) mineral and aggregate resources--Mineral and Aggregate Policy 10).

f. Guidelines do not carry the same weight as the Goals, and therefore, this objector's concern is not a Goal requirement. However, objectors do raise an important concern, and the County is urged to plan such sites for interim, transitional and "second" use.

g. Contrary to objector's statements, the County has placed its (1B) sites on a special category inventory--Appendix E and F of the Mineral and Aggregate Resources Working Paper. It also has expressed this in Mineral and Aggregate Policy 10.

h. Objectors are correct that some lands are zoned SG that are not on the (1C) inventory, nor has the Goal 5 process been applied to them to justify SG zoning rather than EFU, or some other zoning.

SG zoning for a particular site may be counter to the County's policy of providing maximum protection for agricultural activities by minimizing activities that could conflict with such uses. However, Goal 5 requires protection of mineral and aggregate resources. These Goal requirements must be balanced. This is done through the Goal 5 process. When analyzing the ESEE consequences of conflicting uses for a particular site, the requirements of other Statewide Goals must be considered and balanced against Goal 5 requirements.

i. Objectors have not provided information demonstrating how SG zoning will have an effect on groundwater resources of adjacent agricultural lands. Other state statutes require that this concern be addressed.

Conclusion--Mineral and Aggregate Resources

Lane County has inventoried its mineral and aggregate resources and has identified 30 specific aggregate sites which are considered (1C) sites. The amount of aggregate contained in these 30 sites is sufficient to satisfy the demand to the year 2000. The County indicates there are no conflicting uses with any of these sites, and has applied QM-RCP, SG-RCP, or SG-CP-RCP zoning to those sites. These zones assure that extraction can occur, subject to appropriate conditions regarding such things as setbacks, drainage, traffic and operation.

The County has identified a number of (1B) sites which will be evaluated according to the Goal 5 process (including plan amendments, where necessary), within the next five years.

A number of sites not in any plan inventory have been zoned for sand and gravel extraction, but have not been justified as such, based on an analysis of ESEE consequences of conflicting uses.

Energy Sources

Inventory

Lane County has adopted an Energy Working Paper which describes energy consumption and both conventional and alternative energy sources. Conventional sources includes electrical energy from seven utility

companies and natural gas and petroleum from out-of-state sources (pp. 7-15). Alternative sources include solar, hydroelectric, biomass, cogeneration, wind, and geothermal energy (pp. 15-29). Of these, the County considers only hydro power and geothermal sites to be site-specific (p. 39).

The Working Paper identifies eight dams currently generating power or having the potential to do so (p. 18), as well as eight existing nonpower dams with hydroelectric generation potentials exceeding 200kW (p. 18). Maps showing the general locations of these sites are on page 19 of the Working Paper. Information about the dam height, hydraulic head and capacity for each site is presented on page 18. Proposed dams with generation potentials exceeding 25MW and those with potentials between 200kW and 25MW are identified on page 21 of the Working Paper and mapped on page 22. Information about dam height (where known), hydraulic head, system head, and capacity is presented (p. 21).

Wind potential in Lane County is through to be highest along the Coast and Coast Range. Eugene Water and Electric Board (EWEB) and 19 public utilities operate an experimental windmill in the Coast Range north of Lane County, and PP&L operates a wind turbine near Coos Bay. Average wind speeds in Lane County, however are too low to power such windmills (p. 26).

There are two known Geothermal Resource Areas (KGRA's), both of which are in the eastern portion of the County on federal land. Both are under study by the Oregon Department of Geology and Mineral Industries (p. 29). The locations of the two KGRA's--Belknap-Foley KGRA and McCredie KGRA--are shown on Map 7 (p. 30). Information regarding their reservoir temperatures, mean reservoir volume, wellhead thermal energy and thermal power, and resource to land distance is presented in Table 11 (p. 31). The Energy Working Paper also describes the stages of geothermal energy development and discusses the constraints upon geothermal power generation (pp. 28-29). Although the potential for geothermal energy development in Lane County is "significant," further information is needed regarding its potential in the two KGRA's and the environmental impacts associated with such development (p. 29).

A cogeneration facility capable of producing 28,000 kilowatts of power exists at the Weyerhaeuser plant in Springfield, and another facility capable of producing 800 kilowatts is being installed in the Lane Plywood Company of Eugene (pp. 25-26).

The Working Paper disucsses the potential for biomass as an energy source in Lane County (pp. 23-25). There are two major sources--forest lands and farm lands. The potential for energy generation from these sources is great, but economic feasibility and environmental impacts are primary constraints to development of these sources at this time (p. 25).

Conflicting Uses/ESEE Consequences Analyses

General, non-site-specific conflicts are discussed for each of the major energy source categories identified (i.e., hydroelectric, biomass, solar, cogeneration, wind).

Regarding hydro sites, the County states:

> Maps have been presented illustrating a number of alternative hydro sites on various rivers in the County. Since these sites are, at present, in the proposal stage, it is premature to evaluate conflicting uses for each one, but the sites need to be acknowledged by designation on Plan Diagrams, and some effort made to ensure their availability when needed. Conflicting uses will be examined and resolved at such a time as the sites are actually being proposed for development; this could probably be done most efficiently as part of the elaborate permitting process hydro power must undergo before approved. In most cases, conflict resolution is a major factor in hydro development even through many of the sites are located on public land, or lands presently set aside for resource uses--especially timber lands. Existing resource-based zoning can do much to prevent them from being subjected to development if energy considerations are incorporated into the zoning requirements. In Goal 5 language, the "1B" option should be taken at this time (p. 39).

Regarding geothermal sites, the County indicates that because they are located on federal lands, they will have to go through a series of state and federal permit approvals. Zoning "only reflects the County's desire that the sites be protected from conflicting uses." Therefore, the County has not conducted an analysis of conflicting uses (p. 39).

Solar access does not appear to be endangered at this time in the rural areas. However, this is not the case in newly developing residential and commercial areas (p. 39).

Policies

Five Energy Resource policies have been adopted by Lane County (Plan, p. 17):

1. Lane County shall identify energy resource areas within the County and protect such areas through the use of existing ordinances and regulations. Such regulations shall address hydroelectirc, geothermal, and wind power sites.

2. Lane County shall encourage the exploration and development by other agencies of renewable energy resources such as geothermal, wind, biomass, hydroelectric and solar, and shall monitor such development to ensure that the development does not cause adverse effects within the County.

3. Lane County will use the work of the L-COG Committee on Energy, and its report, "Lane County Electic Energy Planning Program, Final Report (1983)" as a source of resource identification and site protection measures. This will supplement the County's own measure expressed in Policy and Zoning Statements.

4. The County shall protect the sites of hydroelectric resources through conditional or special use provisions of its resource zones. Sites for which a license has been applied for with federal and state authorities, or for which water impoundments of more than 100 acre-feet are proposed, or which will generate power in excess of 75KW, shall be shown on the Plan as a special designation, an Exception to applicable LCDC Goals taken if necessary, and a special zoning district applied. At that time, the Goal 5 rule conflict analysis shall also be carried out.

5. For additional energy policies see Goal 3.

Implementing Measures

Hydroelecric generating facilities with water impoundments of less than 100 acre-feet are allowed conditionally subject to Hearing Official approval in the F-1 and F-2 Zones (Lane Code, Sections 16.210(4)(g), 16.211(5)(g)).

A hydroelectric generating facility not exceeding 10 acres in size and located at an existing water impoundment which will not be increased in size because of the generating facility is also permitted conditionally (subject to Hearings Official approval) in the F-1 and F-2 zones (Section 16.210(4)(h), 16.211(5)(h)).

The conditional use criteria for approving or denying these hydroelectric facilities are those for other nonforest uses (Sec. 16.210(5)(a) through (f); 16.211(5)(f)(i) through (vi)).

Hydroelectric facilities having impoundments over 100 acre-feet are not permitted outright or conditionally in the Lane Code. Instead, the County shall analyze the conflicts per the Goal 5 Rule, take an Exception to the applicable Goal if necessary, and apply a special zone to those sites, as specified in Energy Policy 4.

As noted in the Working Paper, resource zoning will help prevent possible sites from being developed for other uses.

Conclusion - Energy Sources

Lane County has identified a number of potential energy sources, many of which are on federal land, and all of which are (1B) sites at this time. There is potential for hydroelectric developments on nonfederal land, but the County contends that it is premature to evaluate conflicting uses.

Nevertheless, the County has decided to allow small sites in its F-1 and F-2 Zones conditionally. Larger sites will require plan amendments, along with application of the Goal 5 Rule, exceptions to appropriate goals and possible development and application of a special zone. The County has adopted a policy commitment to this effect. In the meantime, resource zoning will help prevent potential sites from being lost to other uses. (See, however, the Goal 4 section of this report for a discussion of problems with the F-2 Zone.)

Fish and Wildlife Areas and Habitats

Inventory

Information about Lane County's fish and wildlife resources is contained in its Flora and Fauna Working Paper and the addendum to that working paper. Pages 5-10 describe in general each of the 11 major habitat types in the County, along with a discussion of the value of the habitat type to wildlife, and general location of each habitat type. These include:

1. Estuary and Bay
2. Inland Marsh
3. Wet Meadows
4. Lakes and Reservoirs
5. Riparian Vegetation
6. Annual and Perennial Grasslands
7. Coastal Shore Pine/Spruce
8. Douglas Fir/Trailing Blackberry
9. True Fir/Alpine
10. Deciduous Hardwoods
11. Agricultural Lands.

The County prefaces this material by stating that this information "is not considered an inventory and is not accompanied by maps. It is intended merely as background information."

The Working Paper and its addendum contain special sections addressing endangered, threatened, and special concern species, riparian and wetland areas, sensitive fish and waterfowl areas, and big game range. These are discussed separately below.

Endangered, Threatened and Special Concern Species: The Working Paper lists plants and animals which are threatened, endangered, or of special interest (pp. 11-12). Further information is provided for six of these species--northern spotted owl, northern bald eagle, wolverine, silverspot

butterfly, western snowy plover, and American osprey (pp. 12-13). This information does not provide location, quality, or quantity information on any specific habitat areas or sites. However, the County indicates that:

1. No spotted owl or bald eagle nests are known to occur on private property;

2. Wolverine habitat is in high elevation, remote areas and therefore in federal ownership;

3. Snowy plover habitat is within state jurisdiction.

4. Osprey nests are found throughout the County, although not in great numbers. The County indicates the ODFW maps show their locations, but these maps have not been adopted or submitted for review.

5. Silverspot butterfly habitat is found only "along a small section of the Oregon Coast." It is recognized in the Coastal Resource Management Plan of Lane County.

Lane County has indicated that Silverspot butterfly habitat occurs on federal land adjacent to the Big Creek (Reneghan) Exception Area as well as on the Renaghan property itself (Exhibit E--Renaghan Amendment, pp. 27, 31). It should be noted that the Exception document contains one statement (Finding 37e) on page 27 which appears to contradict this. Specifically, finding 37e states there are no sensitive species on the property, and that the Silverspot butterfly habitat is located on adjacent federal land only. The Exception document contains several other statements indicating that such habitat occurs in the northwest corner of the property.

The County provides no information at all regarding great blue heron rookeries or pigeon mineral springs, which are considered sensitive bird habitat areas by the Department of Fish and Wildlife. (The exception to this is for two rookeries in the Willamette Greenway. They are addressed in the Goal 15 section of this report.) The inventory of sensitive bird sites developed by ODFW and provided to the Department of Forestry (DOF) as part of a recent management agreement between those agencies, identifies 15 great blue heron rookeries, 21 osprey nest sites, three pigeon mineral springs, and at least one bald eagle nest site in Lane County, most of which are on nonfederal land. According to Flora and Fauna Policy 15, "currently known pigeon springs, heron and raptor (hawk, osprey, and eagle) nest sites. . . shall be placed in a '1B' category."

Riparian and Wetland Areas: Riparian lands are defined by the County as all lands along both banks of Class I streams in Lane County, to a setback line of 100 feet from ordinary high water (Addendum, p. 7).

The County indicates in its Flora and Fauna Working Paper (p. 16) that all lakes, reservoirs, and Class I streams in Lane County have been mapped, but were not included because of budgetary limitations. They are

available in the Planning Department offices. The Addendum to the Working Paper (p. 6) states that ODFW has provided maps of all Class I streams, as well as major significant wetland areas. Detailed maps are available for review in County offices, and a generalized summary map is included in the Addendum (p. 20).

The Flora and Fauna Working Paper discusses the values associated with wetlands and riparian areas for both fish and other wildlife types (pp. 14-15). The County notes that the U.S. Fish and Wildlife Service has identified a number of wetland types in its National Wetland Inventory. Currently, about half of the County has been mapped, enabling identification of major wetlands. These include:

1. Fern Ridge periphery, exclusive of parkland;

2. Old Long Tom River channel below Fern Ridge dam, including lands between it and new channel;

3. North Fork Siuslaw fresh-water marsh;

4. Maple Creek marsh;

5. Amazon Canal at its confluence with the waters of Fern Ridge Reservoir.

The County indicates that these areas are mapped in detail on the Plan Diagram maps. More specific location, quality, and quantity information for each of these five wetland areas is contained in the Working Paper Addendum (pp. 11-13).

The County has not inventoried a wetland south of Sutton Lake and east of Highway 101, or a Darlingtonia bog east of Florence. As noted in the 1983 Coastal Goals review of Lane County (p. 8), these wetland were to be addressed under Goal 5:

> The County notes there are only two Goal 18 resource areas east of Highway 101 which do not fall within the coastal shorelands boundary. They are two wetland habitat areas identified in the coastal resource inventory maps. The County should note that it will have to adequately address these two areas later under Goal 5 when it brings the remainder of the County plan into compliance.

The Darlingtonia bog is addressed in more detail in the Natural Areas section of this report.

Sensitive Fish and Waterfowl Areas: The County notes that this is a subcategory of the previous section, Riparian and Wetland Areas (p. 20). Maps have been provided the County by ODFW showing important waterfowl nesting habitat and streams that receive high use by anglers and/or game fish (p. 20), but were not submitted for review. A large-scale map is available in the County Planning offices (Addendum, p. 5). A

generalized, small-scale map is included on page 20 of the Addendum which shows the locations of important streams and stream reaches. A list of these specific reaches, by basin, is included in the Addendum (pp. 2-4). All identified areas are of high quality and are considered important (Working Paper, p. 21). The extent of riparian vegetation is described in the previous subsection of this report. The County notes that there are native anadramous fish runs in Big Creek within the Big Creek Exception Area (Exhibit E--Renaghan Amendment, p. 44). These include coho salmon, cutthroat trout and steelhead.

Big Game Range: The County notes that ODFW divides big game range in Lane County into three categories--Major, Peripherial, and Impacted. The Major Range supports the majority of big game and, in general, consists of sparcely developed commercial forest lands. Peripheral Range is generally located on foothill areas between commercial forest lands and valley floors. Peripheral Range supports substantial big game populations and serves as wintering areas for animals in severe winters. Impacted Range consists of those areas that have existing levels of development which preclude future wildlife management options for maintaining viable wildlife populations and recreational opportunity, although they frequently contain big game populations.

All three big game range areas are depicted on Lane County Wildlife Inventory Maps, according to the Flora and Fauna Working Paper (p. 23). However, these maps were not submitted for review because of budget constraints. They are available in the Planning Department Office (p. 23). The Working Paper notes that the highest quality big game range is in the Major Range because development is limited. Peripheral Range is important, but has enough development to limit big game use and managment options. Impacted Range is of the lowest quality because of existing development (p. 23). The County provides acreages for these three categories (p. 24).

The County recognizes major elk habitat on a portion of the Big Creek Exception site (Exhibit E-Renaghan Amendment, p. 52).

Conflicting Uses/ESEE Consequences Analyses

Endangered, Threatened and Special Concern Species: As indicated earlier, Lane County knows of no spotted owl or bald eagle nest sites on private land. Similarly, wolverine habitat is on federal land. The County notes that the State Parks Division of ODOT regulates vehicular uses in snowy plover habitat (Working Paper pp. 12-13). Specific conflicts with osprey nest areas are not identified, but the County notes that protective measures in riparian areas (e.g., Willamette Greenway permit requirements, coastal shorelands overlays, riparian and wetland area provisions) will resolve conflicts (Addendum, p. 15).

The Working Paper indicates that the Coastal Resources Management Plan of Lane County recognizes the Silverspot butterfly and applies a prime wildlife managment unit to its habitat (p. 13). Specific conflicts and ESEE consequences are not discussed in the Working Paper, however.

It should be noted that a portion of the critical habitat for the Silverspot butterfly is included in the Rock Creek Federal Wilderness Area, recently approved by Congress. Another portion of the habitat is located within the County's Big Creek Exception Area. That exception indicates that the applicant "will enter into contractual arrangements with the Siuslaw National Forest or Western Oregon State College to take whatever measures are necessary to mitigate any potential conflicts or adverse impacts associated with the development" (Exhibit E--Renaghan Amendment, p. 27). According to the Exception (p. 28), the U.S. Fish and Wildlife Service's Endangered Species Office indicates that this project will have not significant adverse impact on the Silverspot's habitat.

Conflicting uses and ESEE consequences analysis have not been conducted for sensitive bird habitat areas, since these resource sites have been placed in a (1B) category.

Inasmuch as the County failed to inventory a number of nonfederal sites as (1C) resource sites (e.g., great blue heron rookeries, pigeon mineral springs, bald eagle nest, osprey nests), the County has not identified conflicting uses or ESEE consequences of those conflicting uses with these sites. Information does exist for these sites, however, as indicated earlier, enabling the County to conduct such analyses.

Riparian and Wetland Areas: Two major activities conflict with riparian and wetland habitat areas, according to the County's Working Paper (p. 17)--destruction of vegetation for any purpose (e.g., forestry, agriculture, construction, recreation, aggregate extraction), and draining surface or subsurface water which then changes the vegetative structure and generally the habitat value. The County has developed separate ESEE consequence analyses for riparian lands and wetlands.

The riparian lands ESEE consequence analysis is further divided into three categories--(1) resource areas (forest and agricultural lands), (2) rural lands (partially or sparsely developed), and (3) developed and committed lands, including communities (Addendum, pp. 7-10). Based on these analyses, the County decided to develop a (3C) approach in order to limit conflicting uses. ODFW has recommended a 50 foot setback along all class I streams in rural development zones and a 100 foot setback in rural resource zones (Addendum, p. 10).

Separate conflicting uses/ESEE consequences analyses have been conducted for each of the five major wetlands identified (Addendum, pp. 11-13). Based on these analyses, the County has determined that areas owned by the Corps of Engineers (Fern Ridge Reservoir, part of Lower Long Tom, Amazon Canal) have sufficient protection, and furthermore, cannot be regulated by the County since they are in federal ownership. Areas under Coastal Resources Zoning (North Fork Siuslaw, Maple Creek Marsh) are also assumed to be adequately protected. A (3C) approach (e.g., Natural Resource Zoning) is appropriate for all other privately-owned areas (part of Lower Long Tom) (p. 13).

Sensitive Fish and Waterfowl Areas: Removal of riparian vegetation in identified sensitive areas is considered the major conflicting use with these resources (Working Paper, p. 21). The County notes that the ESEE consequences analysis is generally the same as that for riparian areas and wetlands, summarized in the previous section of this report (Working Paper, p. 21). However, the County indicates that since the sensitive fish and waterfowl areas are considered more valuable than others in the County, the effects of vegetation removal can be more significant (p. 21). Based on these analyses, Lane County has chosen a (3C) approach to protect riparian vegetation in such areas "whenever possible" (p. 22). The County notes that ODFW has recommended setbacks of 50 to 100 feet along waterways designated as sensitive fish habitat, plus natural resource zoning for wetlands not within that riparian strip (Addendum, p. 5).

Conflicting uses and ESEE consequences of conflicting uses with fish habitat in the Big Creek Exception Area are addressed on pages 54-56 of the Exception. Based on this analysis, the applicant will be required to protect the anadromous fish through development of a management plan and protection or riparian vegetation (pp. 27, 55).

Big Game Range: The primary conflict with big game range is identified as residential use at densities over one dwelling unit per 40 acres in Peripheral Range, and one unit per 80 acres in Major Range (Working Paper, p. 24). The County indicates that its 80-acre commercial timber zoning is very restrictive in terms of dwelling unit placement, and therefore, "it is unlikely that conflicts will occur" in Major Range areas (Addendum, p. 14). Similarly, the County believes its 40-acre zone will satisfy ODFW's recommended density in Peripheral Range (p. 14). Developed and committed exception areas are considered impacted, and the County has decided that conflicting uses should be permitted in those areas (p. 14).

The conflicts and ESEE consequences of conflicts with major elk habitat in the Big Creek Exception area are discussed on pages 53-54, and 56 of the Exception document. Based on this analysis, the applicant will be required to protect elk winter forage areas (p. 27) and to develop an elk managment plan (p. 32).

Policies

Lane County has adopted numerous policies regarding its fish and wildlife resources (Flora and Fauna Policies, Plan, pp. 14-16). These policies include the following:

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies are encouraged to work with landowners to conserve wildlife habitats.

5. Lane County shall investigate fee acquisitions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to protect Goal 5 resources.

6. Riparian vegetation along all Class I streams in the County is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Riparian lands shall be defined as the lands within 100 feet of ordinary high water on Class I streams, and shall be considered "Significant" "1C" areas (in the language of OAR 660-16-000/025); "3C" protection of the riparian resource shall be achieved through development setbacks and vegetation management regulations within the riparian strip. The setback distance will vary from 100 feet from ordinary high water in rural resource zones to 50 feet from ordinary high water in developed and committed areas; provided a means is made available for review and modification of these requirements where it can be demonstrated that an unduly restrictive burden would be placed on the property owner or, that riparian vegetation does actually extend all the way into the 500 foot or 100 foot setback to the location of the proposed improvements.

   Such review and modification shall be spelled out in the zoning districts affected, and shall involve consultation with officials of the Oregon Department of Fish and Wildlife.

7. Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal state ownership; where these do not occur, an appropriate wetlands zoning district shall be developed and applied. Other wetlands from the National Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per

Goal 5 requirements if it is clearly demonstrated that an unprotected signficiant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction. (Modification in process.)

8. Sensitive Fish and Waterfowl Areas as identified in the 1983 Revision the Flora and Fauna Working Paper, shall be considered "significant" "1C" resources per OAR 660-16-000/025, and protected per "3C" requirements through protection of riparian and wetland resources as described in the above Policy statement.

9. Residential building permits issued within Major or Peripheral Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna, and as revised and updated in 1983, shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

10. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna and as revised and updated in 1983.

11. Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resource zoning program.

12. If uses are identified (which were not previously identified in the Plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

13. In its program of protecting "1C" resources, the County shall make maximum practical use of existing land use regulations (e.g., Willamette Greenway Permit, Coastal Resources Zoning overlays, rural forest and agricultural resource zones) to achieve such protection. Duplication of existing standards shall be avoided wherever practicable, provided County-determined Goal 5 and OAR 660-16-000/025 objectives are met.

14. A group known as the "Lane County Flora and Fauna Committee" is to be established and given permanent status by the Board of County Commissioners. The committee shall represent a wide array of environmental interests and the interests of property owners. Its tasks shall include: evaluation of LCDC Goal 5 concerns and resources, development of information to help the County comply with OAT [sic] 660-16-000/025 ("Goal 5 Rule"), research and provision of resource site data to the County, and response to work in progress. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

15. Currently known pigeon springs, heron and raptor (hawk, osprey and eagle) nest sites shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluation per "1B" requirements within two years of the date of plan adoption. Lane County shall consider enlarging the list of significant nest sites whenever information about additional sites becomes available. The significant nest sites shall be those identified by Jim Greer and Jim Hutchison (Department of Fish and Wildlife biologists) in a 12/20/83 letter to Jim Mann (Senior Planner, Lane County Land Management Division), and these sites shall be incorporated into the Lane County General Plan Policies document as Flora and Fauna Exhibit A.

16. Rare and endangered vascular plants, identified in the 1/8/84 list prepared by the Native Plant Society of Oregon shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. This list of rare and endangered vascular plants is included into the Lane County General Plan Policies document as Flora and Fauna Exhibit B.

17. Lane County recognizes that Douglas fir old growth stands provide valuable and unique wildlife habitat and will encourage the Forest Service and Bureau of Land Management to maintain acreage in this age class sufficient to ensure viable populations of dependent wildlife species.

Policy 22 (Plan. p. 5) states:

> Sites considered 'significant' in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement

process for the "significant" sites and after sufficient information is available regarding the location, quality and quantity of the "significant" sites.

Lane County's Forest Lands Policy 17 (Plan, p. 10) states:

Lane County recognizes that the Oregon Forest Practices Act shall be the only mechanism regulating the growing and harvesting of forest tree species on commercial forest lands unless Goal 5 resource sites have been recognized and identified as being more important through an analysis of ESEE consequences and conflict resolution as per Goal 5. No other findings, assumption, goal policy, or other planning regulation shall be construed as additional regulation of forest management activities.

Implementing Measures

Lane County has adopted the following riparian setback standards and riparian vegetation maintenance standards in its F-1, F-2, E-RCP, ML-RCP, PR-RCP, and DR-RCP Zones (Lane Code, Sections 16.210(7)(a) and (b), 16.211 (9)(b) and (c), 16.212 (8)(b) and (c), 16.214(7)(b) and (c), 16.215(6)(a) and (b), and 16.232(5)(b) and (c), respectively):

(b) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.212(8)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.212(8)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazard.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

In the PF/RCP C-R, RCP, RA-RCP, and RR-RCP Zones (Sections 16.219(4)(b) and (c); 16.223(5)(b) and (c); 16.229(7)(b) and (c); and 16.231(7)(b) and (c), respectively), the setback is 50 feet, rather than 100 feet.

The following zones indicate the Class I Stream and Riparian Vegetation requirements of LC 16.229-35(2) and (3) shall apply: C-1, RCP (Section 16.220); C-2, RCP (Section 16.221); C-3,RCP (Section 16.222); M-1, RCP (Section 16.224); M-2, RCP (Section 16.225); and M-3, RCP (Section 16.226). The RG-RCP Zone (Section 16.230) indicates that Section 16.299(2) and (3) shall apply. However, the Lane Code does not contain any section with the numbers 16.299-35(2) and (3) or 16.229 (2) and (3).

As discussed in the open space section of this report, Lane County has adopted a Natural Resource Zone (NR-RCP) (Lane Code, Section 16.213) which is, in part, intended to protect aquatic and other wildlife habitat areas. Please refer to that section of this report for details. It should be pointed out that the NR zone does not contain riparian setback and vegetative maintenance standards. Although major development in the NR zone is not anticipated, the NR zone permits a variety of structures. These structures should be required to be set back in order to protect riparian vegetation, just as they are in other zoning districts. In fact, since the purpose of the NR zone is to protect wildlife and aquatic habitats, there is even more reason why such setbacks should be required.

A review of the County's zoning maps indicates that the NR Zone has been applied to a number of habitat areas in the County. One of the sites zoned NR is the Big Creek Exception Area, which contains fish and big game habitat, and habitat for the endangered Silverspot butterfly.

According to the Exception (p. 27), no alteration of the riparian vegetation will occur, and the owner has agreed to enter into contractual arrangements to protect elk winter forage areas. The applicant will also take measures that may be necessary to protect the habitat of the Silverspot butterfly.

Contrary to statements contained in the Flora and Fauna Working Paper, Lane County's F-1 (Nonimpacted Forest Lands) Zone establishes a 40-acre (rather than an 80-acre) minimum lot size (Lane Code, Section 16.210(6)), except that (a) a land division to create a parcel of less than 40 acres may be allowed conditionally if it is for separating an existing residence from adjoining forest land, and (b) a common property boundary may be adjusted so long as no additional parcels are created. As noted in the Flora and Fauna Working Paper (p. 24), and as discussed earlier in this report, ODFW's recommended density in Major Big Game Range (which, according to the County, is mostly zoned F-1) is one unit per 80 acres. Inasmuch as the F-1 zone does not allow dwellings, this density standard has less meaning in Lane County's F-1 Zone.

The F-2 (Impacted Forest Lands) Zone (Lane Code, Section 16.211) requires a minimum of 20 acres for creation of a woodlot or farm parcel for growing grapes, berries, or horticultural specialties, and 40 acres for creation of a farm parcel. However, there is no requirement that, in the Big Game Range portions of that zone, densities will not exceed those recommended by ODFW (i.e., one unit per 40 acres in the Peripheral Range, or one unit per 20 acres with clustering and siting standards; one unit per 80 acres in the Major Range, or one unit per 40 acres with clustering and siting standards).

In the Exclusive Farm Use Zone (Lane Code, Section 16.212), a dwelling or mobile home not in conjunction with farm use may be approved if it meets certain criteria; similarly, a division of land may be allowed for a dwelling not in conjunction with farm use if it meets those criteria and does not conflict with the purpose of the zone. However, none of the criteria address ODFW's dwelling density recommendations, and the purpose statement of the zone does not refer to maintaining wildlife habitat values. As noted in the Goal 3 section of this report, minimum lot size is from 20 to 60 acres, depending upon location. As noted in the Flora and Fauna Working Paper (p. 24) and as discussed earlier in this report, ODFW's recommended density in Peripheral Big Game Range (which, according to the County, is mostly zoned Exclusive Farm Use) is one unit per 40 acres. There are no standards in the zone which require lot sizes to be 40 acres or greater in the Peripheral Big Game Range portions of the zone, or alternatively, that require clustering of dwellings (to allow densities as great as one unit per 20 acres.

Lane County has adopted a Marginal Lands (ML-RCP) Zone (Lane Code, Section 16.214) which appears to have been applied to wildlife habitat areas, and could be applied to other areas in the future. (The County did not submit maps showing the locations of its big game habitat areas, so it cannot be determined with certainty whether it has been applied in big game habitat areas). ORS 197.247(8) requires that application of

such a zone satisfy all requirements of other Goals, in this case, Goal 5. The County has not adopted findings demonstrating how the specific applications of the ML zone comply with the Goal 5 Rule. Criteria for approval of future ML zoning (Section 16.214(4)) do not include compliance with Goal 5.

Section 16.215 of the Lane Code is the County's Park and Recreation (PR-RCP) zone which has been applied to a number of sites in the County. The zone permits a number of recreational uses and activities outright, and a number of others if within a built and committed exception area that is designated as nonresource land. The zone also lists uses that are subject to hearings official approval. Section 16.215(5)(e) of the zone contains the following conditional use approval critera:

> When a use is proposed in an area designated as Major Peripheral Big Game Range or as Sensitive Fish and Waterfowl areas as shown on the Lane County Wildlife inventory, the Oregon Department of Fish and Wildlife shall be notified and their comments shall be considered in evaluating the proposed use.

The PR zone allows a number of uses that could conflict with wildlife habitat and other Goal 5 values, and with the purpose of the zone, as noted in the Goal 2 section of this report.

The County has not adopted any implementing measures to protect and/or resolve conflicts with sensitive bird habitat sites.

As noted in previous acknowledgment reviews (e.g., Tillamook County), the Commission has allowed counties to adopt plan policies and ordinance language which clearly expresses the intent to rely on the FPA, Rules, and the March 1984 agreement between the Board of Forestry (BOF) and the Fish and Wildlife Commission (F&WC) to resolve conflicts between timber management activities and sensitive bird sites. Lane County has no such policy commitment, and it has not inventoried all sites on the BOF/F&WC list of sites covered by this agreement. However, even if such a policy is adopted by counties, they are still required to adopt implementing measures to resolve conflicts between other uses (e.g., development) and sensitive bird sites. Lane County has not adopted such measures.

Lane County has not identified sites that are considered to be more important than commercial forest operations based on a Goal 5 ESEE consequences analysis, per Forest Lands Policy 17 (Plan, p. 10), nor has it adopted and applied any implementing mesures to such sites which regulate timber management activities.

Objections

1. The Oregon Department of Fish and Wildlife (ODFW), 1000 Friends of Oregon and the Legue of Women Voters of Central Lane County (LWV) have objected to the County's approach to sensitive bird nesting and use sites. Specifically objectors point out that the Flora and Fauna Working Paper discusses only some of the species considered

sensitive. Missing are designations of heron rookeries and pigeon mineral springs. Policy 15 addresses all sensitive species (bald eagle nests, heron rookeries, snowy plover habitat, spotted owl nests, osprey nests and pigeon mineral springs). Further, objectors point out that Policy 15 places these species in a (1B) category. Both ODFW and 1000 Friends indicate that the County possesses inventory information (including recent ODFW updated information) which is sufficient to complete the Goal 5 process for this resource category. ODFW indicates that the location, quality, and quantity information provided the County is similar to that provided to other counties which have completed the Goal 5 process and which have been acknowledged. The League of Women Voters is concerned that two years is too long for these resource sites to be without protection. Most are not in the Greenway, and therefore do not even receive minimal protection.

1000 Friends also objects to the fact that neither Flora and Fauna Policy 2 or 3 provides adequate protection for these sensitive species. Policy 2 simply indicates the County will recognize existing programs that protect species; it does not bind the County to any particular course of action. 1000 Friends believes the County must make an affirmative commitment to protect threatened and endangered fish and wildlife species. Policy 3 also fails to guarantee protection of sensitive species since it requires the County to seek to minimize adverse impacts through County regulations (including zoning). 1000 Friends suggests that present zoning may be construed to "minimize adverse impacts" but this may not necessarily provide adequate protection for particular sites.

1000 Friends also objects to the use of the definition of "sensitive species" used in Policy 3. Objectors believe it is overly general and could be construed by decision-makers to exclude certain species. Objectors believe that County Policy 3 should reference the list of "species of special concern" that appears in the Working Paper, rather than use a vague term in the policy. Similar comments have been filed by Oregon Forest Industries Council.

2. ODFW and 1000 Friends have objected to Flora and Fauna Policy 11 since it regards densities above ODFW's recommendations in big game areas to constitute a conflict. ODFW regards its recommended densities as the approach to resolve conflicts between dwellings and game range. 1000 Friends states that Policy 11 allows residential densities to exceed ODFW recommendations "if conflicts can be resolved in accordance with OAR 660-16-000." Objectors believe this allows the County to justify density levels which exceed those recommended by ODFW through an analysis of ESEE consequences. Objectors do not believe this exclusion is consistent with the Goal 5 Rule.

3. ODFW objects because, contrary to Policy 11 which adopts ODFW's density recommendations in big game habitat areas, the County's F-1 and F-2 zones do not provide the siting or clustering requirements

that need to accompany the density levels allowed in those zones. Similar objections have been filed by 1000 Friends of Oregon. Objectors point out the the F-1 zone establishes a minimum lot size of 40 acres, but smaller divisions can be made without regard to big game impacts. The F-2 zone establishes minimum lot sizes of 20 and 40 acres for forest and farm uses, which also fail to meet ODFW's recommended densities for Peripheral Range, according to objectors. 1000 Friends points out that the Flora and Fauna Working Paper Addendum and Policy 11 prescribe clustering and siting of standards, but these are not carried out in the F-2 zone. The Addendum (p. 14) also references forest land minimum lot sizes which are no longer current.

4. ODFW and 1000 Friends object because Goal 5 has apparently not been applied in the process of designating marginal and nonresource lands. Objectors are particularly concerned how this affects big game range areas. ODFW contends that the County's plan provisions for lots of record, resource and nonresource-related dwellings, marginal lands, and nonresource lands could allow considerable development in game range. The County's F-1 and F-2 zones do not adequately assure that recommended densities will be maintained. This is further complicated by the fact that it is unclear where marginal and nonresource lands are located, and therefore the extent to which they are in game range areas, since the zone map format and resource inventory map formats are not easily comparable. 1000 Friends points out the Goal 5 must be applied whereever Goal 5 resources occur, even in areas designated marginal or nonresource land.

5. ODFW, 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the County's treatment of the Pudding Creek Heronry. Objectors point out that the County conducted a Goal 5 ESEE consequences analysis, but that inasmuch as the sand and gravel plan and zone designations have been retained on the site, conflicts have not been resolved. Please refer to the Goal 15 section of this report for further details concerning objections to the zoning of this site.

6. 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the County's plan and zone designations for the Big Island (or Confluence) Heronry at the confluence of the McKenzie and Willamette Rivers. Objectors indicate that the County has not adopted a program that is adequate to protect and/or resolve conflicts with the site under Section (3C) of the Goal 5 Rule. Objectors point out that the 1981 LCDC order for the Eugene/Springfield Metro area include a requirement that the ESEE consequences of designating the island for sand and gravel use must be evaluated in the context of regional aggregate supply and demand. The IOTC further required that if the island were to retain a partial sand and gravel designation, the Metro Area Plan and the Lane Code (Section 10.210) must be amended to require that limited aggregate extraction will minimize the impact on scenic and wildlife values.

The IOTC also referenced Goal 15 requirements and IOTCs. Objectors contend that neither the Goal 5 nor Goal 15 IOTCs have been adequately addressed. These objections are also contained in the Goal 15 section of this report.

7. 1000 Friends of Oregon has objected to the fact that Lane County has placed only five noncoastal wetlands in its (1C) inventory, and has placed all others in a (1B) category. 1000 Friends believes the County has sufficient information to be able to classify the others as either (1A) or (1C), since such information was given to the County by ODFW, interested citizens, and the Lane County Flora and Fauna Committee. Objectors indicate that Goal 2 Policy 22 is inadequate for these (1B) sites since it requires only that interim protection be applied at the beginning of the plan refinement process --no sooner. Objectors point out that Goal 15 requires protective measures be applied as soon as their significance has been determined.

   Finally, 1000 Friends indicates that the U.S. Fish and Wildlife Service's National Wetland Inventory is the basis for Lane County's wetland inventory. Flora and Fauna Policy 7 states that this inventory, although incomplete in Lane County, will be used to evaluate (1B) wetlands within two years of the date of plan adoption or when the national inventory is completed. 1000 Friends points out, however, that such an inventory is not scheduled for completion for another 5-10 years, and Lane County is not within a priority inventory area. Objectors believe the County should amend Policy 7 and the Addendum to the Flora and Fauna Working Paper (p. 6) to recognize alternative sources of data shall be used to assess the significance of wetlands and to identify their boundaries.

8. 1000 Friends has objected because the County definition of wetlands in its Working Paper is much narrower than that contained in the Statewide Planning Goals or the U.S. Fish and Wildlife Service, but the County has not justified how such a definition is consistent with Goal 5. The Working Paper states that a wetland is "an area in which open, standing water is present for at least six months out of the year and is a minimum size of one acre." Objectors indicate the County has no definition of wetlands in either its plan policy document or in its zoning ordinance.

9. 1000 Friends objects to the fact that Lane County is relying on the FPA to maintain riparian corridors along Class I streams and wetlands, and will take no actions to limit conflicting uses in areas subject to the FPA. Objectors state that there is no analysis in the submittal materials which demonstrates how the FPA and Rules provide protection for riparian resources consistent with Goal 5. Therefore, 1000 Friends objects to LC 16.210(7) and 16.211(9).

10. 1000 Friends objects to the County's failure to apply riparian protection measures around lakes and along Class II streams. Objectors point out that Class II streams regulate water temperature, quality, and quantity of downstream Class I streams.

11. Friends of the Oregon Coast has objected to the County's Renaghan Amendment (Big Creek Exception) for a number of reasons, some of which relate to fish and wildlife concerns. These are as follows:

    a. Objectors believe that many of the findings are "contractory and irrelevant." Objectors cite two examples. The first is that finding 37d (p. 27) conflicts within finding 37e (p. 27). One calls for establishing permanent elk forage areas; the other calls for maintaining the property in forest. Objectors also indicate that the County's claim that there are no sensitive species on the property contradicts findings 40a (5) and 44b(6) which state that the northwest corner of the property contains Silverspot butterfly habitat.

    b. Objectors claim that because the applicant retained a consulting wildlife biologist, his statements in the record should be expected to support the establishment of a destination resort. Objectors believe that his statements are treated by the County as findings of fact although they sometimes "are argumentative of the County's Coastal Sub-Area Plan and of the Oregon Department of Fish and Wildlife's Management plans."

    c. Objectors believe that, although the applicant and ODFW will be required to work together to mitigate adverse impacts on fish and wildlife, these efforts will be "experimental" and therefore cannot justify the resort complex in the the middle of prime and sensitive habitats.

    d. Objectors point out that the Exception recognizes ODFW's concerns about increased fishing pressure on Big Creek as a result of the development, and that potential harm can only be mitigated by regulating sport fishing (through reductions) on the creek. Objectors feel that long-time anglers will therefore be penalized by the development.

Response to Objections

1. Objectors are correct in pointing out deficiencies in the County's inventory of sensitive bird nesting and use sites. Information on location, quality, and quantity is available, yet the County has taken a (1B) approach to several of the species identified. Sufficient information exists for the County to be able to complete the Goal 5 process for this resource category.

   Objectors are also correct that Flora and Fauna Policies 2 an 3, themselves, do not guarantee protection for sensitive species, particularly in light of the absence of implementing measures to provide such protection. The adequacy of these policies can be judged only after the County completes the Goal 5 process for the habitat areas of these species. Lane County has erroneously placed such species in a (1B) category, and has not yet completed the Goal 5

process. Depending upon this analysis, the policies may have to be modified, and implementing measures will have to be adopted. The concern that Policy 3 is unclear as to which species or habitat areas are covered by the policy is valid.

2. Policy 11 states:

> Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similiar activities which are already a part of the County's rural resource zoning program.

Objectors are not correct that this policy violates Goal 5. Densities above those recommended by ODFW would certainly constitute a conflict with big game habitat. The County has, through this policy, however, simply indicated that it intends to resolve them by applying the entire Goal 5 process when such proposals are made. This would require a plan amendment and could only take place if justified based on the Goal 5 analysis. However, as noted previously, the County still needs to adopt measures in its F-2, ML, and EFU Zones which ensure that ODFW's density standards will be achieved.

The second part of the policy requires the County to work with ODFW in preventing conflicts from occurring through land use regulations in resource areas and such things as siting requirement. ODFW is correct that its recommended density standards (if adopted in the ordinance) would constitute an approach to resolve and/or prevent conflicts between dwellings and big game habitat. However, as discussed below, the County has not adopted such standards in its zoning ordinance.

3. ODFW is correct that the County's F-1 and F-2 zones do not incorporate ODFW's development density recommendations, nor do they set forth siting or clustering requirements. Without siting and clustering requirements, the minimum lot sizes in the F-1, F-2 and E zones are half that recommended by ODFW (i.e., the minimum lot sizes would have to be doubled to be acceptable). This is a problem in the F-2 and EFU zones in particular, but not in the F-1 Zone, since in general, dwellings are not permitted in that zone.

4. Objectors are correct that Goal 5 has not been applied by the County in the process of designating marginal lands. ORS 197.247(8) requires that applications of a marginal lands zone must satisfy all requirements of other Goals, including Goal 5.

5. The response to the objections regarding Pudding Creek Heronry is presented in the Goal 15 section of this report.

6. The response to the objections regarding Big Island is presented in the Goal 15 section of this report.

7. The County has indicated it has sufficient inventory information on only five noncoastal wetlands at this time. 1000 Friends has not provided location, quality, or quantity information on specific wetlands it believes should be (1C) sites, rather than (1B) sites.

   ODFW has not objected to the County's determination that only five wetlands are (1C) and the remainder are (1B) sites. 1000 Friends is correct that Policy 22 calls for protection of (1B) sites only at the beginning of the plan refinement process. However, the Goal 5 Rule does not require any interim protection for (1B) sites.

   Although the incomplete National Wetlands Inventory is the basis for the County's wetlands inventory, 1000 Friends is not correct that the County must wait until the National Inventory is completed before it can apply the Goal 5 process to (1B) sites. Furthermore, Policy 7 does not prevent the County from considering information about other sites not on the national inventory during its plan update process. 1000 Friends, or other parties may supply the County with information about wetlands, and the County would be required to apply the Goal 5 process to those sites. Plan Policy 7 states:

   > Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal; state ownership; where these do not occur, an appropriate wetlands zoning district shall be developed and applied. Other wetlands from the national Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per Goal 5 requirements if it is clearly demonstrated that an unprotected significant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction. (Modification in process).

While the policy does not permit the use of alternative sources of information during the update process, 1000 Friends is correct in suggesting that the policy could be improved by actually stating that other sources of information (besides the National Inventory) will be used.

8. 1000 Friends is correct in pointing out that the County's Working Paper definition of "wetlands" is narrower than that contained in the Statewide Planning Goals. Wetlands very often do not have open, standing water present at least six months out of the year. Reliance on the County's definition could result in some wetlands possibly being excluded from the County's (1C) inventory.

9. 1000 Friends is correct that the County is relying on the FPA to resolve conflicts between timber management activities and riparian areas along Class I streams and wetlands, although the County has not made a statement to this effect. It is clear in Forest Lands Policy 17 and in various sections of the Zone Code that the County is not regulating harvest activites. Objectors are also correct that the County has not provided an analysis demonstrating how the FPA and Rules provide protection for the Goal 5 resource. However, it has been Commission practice not to require counties to adopt implementing measures to resolve conflicts between timber management activities and riparian corridors.

10. 1000 Friends is correct that the County has not applied riparian protection measures around lakes or along Class II streams, or otherwise justified not providing such protection, based on an ESEE consequences analysis of conflicting uses. Information in the Flora and Fauna Working Paper (pp. 6 and 15) suggests that these are important Goal 5 resources.

11. The objections of Friends of the Oregon Coast are not sustained with regard to fish and wildlife concerns for the following reasons:

    a. Objectors are correct that the Exceptions document contains some conflicting statements, particularly whether the property contains Silverspot butterfly habitat. Specifically, finding 37e (p. 27) is misleading, since the site does contain Silverspot habitat. In light of the fact that the County's intent is clearly to take whatever actions are necessary to protect the Silverspot butterfly, this inconsistency is not a Goal violation.

       With regard to the Exception documents' statements regarding elk forage, it can be assumed that, although the main intent is to keep the property in forest, portions of the property will be in other uses. These findings are broadly written, and, as such, are not contradictory.

    b. Objectors have not indicated how findings 47d(1) through (13) violate Goal 5, only that they are sometimes "argumentative" of other documents.

c. Objectors have not indicated why they believe ODFW's attempt to mitigate impacts on habitats will be experimental, or otherwise why they cannot suceed in providing adequate protection.

d. Objectors have not indicated how regulating sport fishing on Big Creek to protect the resource long-term violates Goal 5. While it is unfortunate that long-term anglers may be "penalized," this is not a Goal issue.

Comments

Oregon Forest Industries Council (OFIC) and the Lane County Landowners Association have commented that Policy 22's intent is unclear, since it calls for interim protection measures for "significant" Goal 5 resource sites. However, the policy addresses (1B) sites. The association indicates that (1B) applies where some information exists but is inadequate for purposes of identifying a site and determining its significance. Commentors also point out that interim protective measures are neither required nor appropriate for Goal 5 compliance.

Response to Comments

Policy 22 (Plan p. 5) states:

> Sites considerd 'significant' in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement process for the 'significant' sites and after sufficient information is available regarding the location, quality, and quantity of the 'significant sites.

While it is true that Policy 22 is somewhat ambiguous, the policy appears to recognize the fact that certain Goal 5 resource categories have significance (e.g., all eagle nests are significant), although their specific locations may not be known at this time. Therefore a (1B) classification is appropriate. The Goal 5 Rule does not require interim protection measures for (1B) sites. However, the Rule does not prohibit jurisdictions from adopting and applying interim measures to (1B) sites.

Conclusion -- Fish and Wildlife Habitats

Lane County has adopted inventory information for a number of fish and wildlife habitat areas, and has identified conflicting uses and ESEE consequences of those conflicting uses. Implementing measures including riparian setbacks and vegetation maintenance standards and a Natural Resource Zone have been adopted. However, a number of deficiencies still remain and must be corrected before acknowledgement can be granted. These are summarized below.

Lane County has placed all sensitive bird habitat sites in a (1B) category, even though information is currently available and is adequate for completing the Goal 5 Rule process. The County needs to adopt a (1C) inventory for known sites and complete the Goal 5 process.

Implementing measures which carry out ODFW's development density recommendations in Major and Peripheral Big Game Range areas have not been adopted, particularly in the F-2, ML and EFU zones. The County has not applied the Goal 5 process to "nonresource" lands.

The County's three commercial, three industrial, and its garden-apartment zones reference a nonexisting code section for their riparian setback and vegetation maintenance standards. It is obvious that the County intended to apply such standards in those zones but until the zones are amended to either (1) reference the correct section of the code containing those standards, or (2) incorporate such standards themselves, there are no riparian standards in effect in those seven zones. Riparian protection measures have not been applied around lakes, in the Natural Resources Zone, or along Class II streams, or justified as not being necessary, based on an analysis of ESEE consequences of conflicting uses.

The County uses a narrower definition of "wetlands" than in the Goals, and therefore, some wetlands may be left off any future (1C) inventory.

The Parks and Recreation zone allows a number of uses which could conflict with the purpose of that zone, and with Goal 5 resources present (including fish and wildlife habitat values).

A Natural Resources Zone has been developed and applied to lands in the County, but it is unclear which habitat sites have been given NR zoning or whether it has been appropriately applied.

Ecologically and Scientifically Significant Natural Areas

Inventory

The County's Flora and Fauna Working Paper contains the County's inventory information on natural areas (pp. 26-32). This working paper indicates that the County evaluated the 86 sites on the Natural Heritage Inventory and the nine sites identified by the Natural Areas Preserves Advisory Committee. (Note: The Committee is now known as the Natural Heritage Advisory Council). These sites were evaluated by Lane County, first of all, to determine whether there was adequate information on location, quality and quantity. If this was the case, and that information suggested that a site was "significant," it was placed in a (1C) category. If information existed, but the site was determined to be not significant, it was classified (1A). If there was inadequate information, sites were placed in a (1B) category (pp. 26-27).

The County placed six sites in the (1B) category:

1. Booth Island/Siltcoos Lake
2. McKenzie River Island (not be confused with the island at the confluence of the McKenzie and Willamette Rivers)
3. South Fork Gate Creek
4. Swamp Creek
5. Marshall Island Heronry
6. Willamette Valley Quaking Aspen Grove

The County has provided justification why it believes the (1B) classification is appropriate for each of the site sites (pp. 27-28). The Nature Conservancy has indicated it has no updated information for any of the six sites at this time and that a (1B) classification is appropriate (Curt Soper, personal communication, June 15, 1984).

Fifty-six other sites were determined to be in a (1C) category and therefore constitute the County's natural areas inventory (p. 28). The County has grouped these sites according to their ownership. There are 23 sites on U.S. Forest Service land, six on BLM land, four sites within state parks, and 25 that are either in the Willamette Greenway or covered by the Coastal Resources Management Plan (pp. 30-32). Two additional sites (Upper Yachats Elk Pasture and Fern Ridge) are also (1C) sites, but do not fall into the above categories (p. 32).

No information regarding location, quality or quantity of the federally-owned sites is provided in the Working Paper. Information regarding the natural features present in the State park sites and at the 25 Greenway or Coastal sites is summarized (pp. 30-32). All are significant in terms of quality. Locations of these sites have not been provided.

It should be noted that, during the review of the coastal portion of the Lane County plan, a privately-owned Darlingtonia bog, east of Highway 101 and east of the City of Florence, was identified. The bog did not quailify as an ecologically significant natural area under the Coastal Goal requirements. It does, however, possess natural values that could qualify it as a Goal 5 (1C) natural area. However, Lane County has not addressed this site in its Working Paper or other submittal materials.

Conflicting Uses/ESEE Consequences Analyses

Because of their ownership by the U.S. Forest Service or the BLM, the County believes no conflicts exist for the 29 federal sites (Flora and Fauna Working Paper, p. 28).

The County indicates that no conflicts exist for the four state park sites based on uses allowed in zoning districts applied to those sites (p. 29). The Flora and Fauna Working Paper Addendum (p. 15) states, "the State of Oregon Parks and Recreation Division has, in a letter to Lane County, stated that the natural area values of these parks are being and will be protected, and that no conflicts with the resource are foreseen." However, as noted in the Goal 2 section of this report, the Parks and Recreation zone which has been applied to these state parks, allows a number of uses which could conflict with natural area values.

No conflicts have been identified for the Coastal or Greenway sites because of programs and zoning districts applied to them (p. 30).

With regard to the two remaining sites (the Elk Pasture and Fern Ridge), the County indicates there are no conflicts. The Siuslaw National Forest and ODFW own the site and have an agreement concerning use of the site as an elk wintering area. Fern Ridge is owned by the Corps of Engineers and, under a 1980 management plan for the reservoir, the natural values present will be protected (p. 32).

It should be pointed out that public ownership, in and of itself, does not necessarily mean there are no conflicting uses, nor does it guarantee site protection. Although several of the U.S. Forest Service and BLM sites are formally protected by those agencies (e.g., wilderness areas, designated research natural areas), others are not. Unless the federal agencies have formal protection programs in place for natural areas, it cannot be assumed that no conflicts exist, nor can they be considered "2A" (protected) Goal 5 resource sites. However, since the Commission has not required counties to complete steps (2) and (3) of the Goal 5 Rule for sites on federal land, it is recommended--but not required--that Lane County correct the statement on page 28 of the Flora and Fauna Working Paper regarding conflicts on federal land.

Policies

Lane County has adopted the following policies regarding natural areas (Flora and Fauna Policies, Plan, pp. 14-16):

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification).

12. If uses are identified (which were not previously identified in the Plan which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

16. Rare and endangered vascular plants, identified in a 1/8/84 list prepared by the Native Plant Society of Oregon shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. This list of rare and endangered vascular plants is included into the Lane County General Plan Policies document as Flora and Fauna Exhibit B.

Policy 22 (Plan, p. 5) states:

> Sites considerd "significant" in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement process for the "significant" sites and after sufficient information is available regarding the location, quality, and quantity of the "significant sites".

See also the Goal 15 section of this report and the coastal review of the Lane County Plan for a discussion of other relevant plan policies which address natural area.

Implementing Measures

As indicated by the County, a number of natural area sites are located on federal land, over which the County lacks jurisdiction. A number of other sites are significant natural areas within the Coastal Planning Area and the implementing measures applied to them have been acknowledged as being in compliance with the Coastal Goals. The two Greenway sites are actually riparian areas along the Middle Fork and the Coast Fork of the Willamette River. The County's Greenway Permit ordinance and its riparian setback and maintenance standards provide a degree of protection for these areas. (See, however, the Goal 15 section of this report for a discussion of specific deficiencies in the Greenway ordinance).

The four state parks have been zoned Parks and Recreation. However, as noted in the Goal 2 section of this report, the PR zone allows a number of uses that could conflict with the natural area values of the sites. ODOT has indicated it does not forsee conflicts with the four sites, according to the County. However, there are no management plans for the sites, or letters from ODOT which confirm that this is the case.

Objections

1. The League of Women Voters of Central Lane County (LWV) has objected to the fact that the County has placed rare and endangered plant species in a (1B) category with a two year time delay for their evaluation through the Goal 5 process. The LWV is concerned because it believes two years it too long for these resources to be without protection. Objectors point out that since most of these resources are not within the Willamette Greenway, they will not receive even minimum interim protection.

2. Lane County Audubon Society and 1000 Friends of Oregon have objected because the County has not provided adequate protection to a natural area known as Russel Creek Basin. This objection is described in more detail in Part II of this Goal 5 Report.

Response to Objections

1. Flora and Fauna Policy 16, which requires Lane County to evaluate the (1B) rare and endangered plant species list in two years does not refer to any particular sites containing these species, nor have objectors provided a list of sites which they believe should have been placed in a (1C) rather that a (1B) category. If sites are not known at this time, then a (1B) classification is appropriate, including policy commitment to address them in the future.

2. Objectors are correct that protection and/or conflict resolution measures have not been applied to the Russel Creek Basin natural area, in spite of an ESEE consequences analysis and recommendations regarding protection of the site in the Metro Working Paper. This issue is addressed in greater detail in the Part II section of this Goal 5 report.

Comments

1. Lane County Landowners Association has pointed out that the County's list of rare and endangered plants is simply a list of species and does not address any specific or general sites. Commentors believe, therefore, the Goal 5 Rule does not apply to these species until sites are identified. (Flora and Fauna Policy 16 indicates that certain plants are considered significant and shall be placed in a (1B) category and evaluated with two years).

2. Lane County Landowners Association also comments that, contrary to Flora and Fauna Policy 7, wetland resources cannot be considered "significant" while placed in a (1B) category.

Response to Comments

1. Commentors are correct that Policy 16 refers only to a list of species, and does not address any sites. Therefore, the Goal 5 Rule will apply if and when sites containing these species are identified.

Objection

Friends of the Oregon Coast object because they believe the proposed development in the Big Creek Exception Area will not enhance the outstanding scenic view associated with the site, and would, in fact, destroy the "picture-book" setting.

Response to Objection

Objectors have not provided specific information as to why the combination of plan and zone designations for the site, site review and the requirement for 87 percent open space is not sufficient to protect scenic resources associated with the site.

Determining what is sufficient to protect scenic views and sites is more difficult and more subjective than for other Goal 5 resource categories. However, in the absence of more specific information from objectors, the objection cannot be sustained.

Conclusion--Scenic Views and Sites

Lane County has not inventoried outstanding scenic views or sites, nor has it identified conflicting uses and ESEE consequences of conflicting uses. No implementing measures addressing this resource category have been adopted or applied on the ground. Instead, the County has a policy to initiate a program to address this resource category prior to the next plan update (five years from adoption of the revised plan).

Lane County should be commended for the serious thought and consideration it has given to this subject, and for its commitment to initiate a comprehensive program to identify and protect outstanding scenic resources. Understandably, such a program can be complex and time-consuming, particularly as it is outlined in the County's Working Paper. However, the Goal 5 Rule requires counties to develop programs prior to acknowledgment, based on information that is currently available. According to the County's own Working Paper, several inventories already exist. For example, the County recognizes that there are several state scenic highways, sites recognized in its own Parks and Open Space Master Plan, as well as sites within federal wilderness areas or on other federal lands. It should be noted that, in the 1981 denial order for Lane County, there were in-order-to-comply requirements directing the County to inventory scenic resources and to apply Goal 5 to those sites.

Neither the Goal nor the planning process itself requires that new information be generated or that information be perfect before planning decisions are made. If this were to case, nearly all planning decisions would be put off until the post-acknowledgment period. It is recommended that Lane County embark on a comprehensive scenic resources program during post-acknowledgment, as called for in its plan. However, prior to

acknowledgment, the County must, at a minimum, inventory known sites, and complete the Goal 5 process for those sites. This work may be refined during post-acknowledgment as part of the County's more detailed, comprehensive scenic resources program work.

Water Areas, Wetlands, Watersheds and Groundwater Resources

Inventory

Lane County has developed a separate document, Water Resources Working Paper, which contains inventory information, and conflicting uses/ESEE consequences analyses for this Goal 5 topic.

Watersheds: A map showing the locations of Lane County's water basins is contained in the Appendix to the Working Paper (Map 2). The County does not provide quality or quantity information for each individual basin, but rather indicates that quality and size vary (p. 5). The County does note, however, that the Upper Middle Fork Willamette, Mosby Creek, and the entire Siuslaw River have severe sedimentation problems. The remainder of the Willamette and the tributary streams to the Willamette and the Siuslaw have moderate sedimentation problems. According to DEQ, the Siuslaw River basin is a "regional hot spot," (i.e., a considerable portion has a severe problem but is not as important as compared to other hot spots, statewide). DEQ has indicated that 410 miles of streams in Lane County have streambank erosion problems, 67 of them having severe erosion. This is particularly true in the Siuslaw Basin, and in tributary streams to the Willamette and short reaches of the Willamette River itself (p. 4).

Wetlands: Please refer to the Fish and Wildlife section of this report for a discussion of the County's wetlands inventory.

Surface Waters: Lane County streams are shown on Map 2 in the Appendix to the Water Resources Working Paper. More complete mapping of surface water is available in the Planning Department office, however (p. 7). Based on a 1974 Water Quality Report and its 1981 update, the County reports that the quality of water in Lane County is generally quite high (p. 7) However, the Mowhawk, Long Tom, and portions of the Coast Fork and Main Stem of the Willamette have slow, meandering reaches and are affected by extensive development (p. 7). Specific problems along these rivers are discussed briefly (pp. 7-8). The Water Resources Working Paper contains a brief discussion of minimum stream flows, particularly those on the Willamette which are regulated by reservoir releases determined by the Corps of Engineers (pp. 8-9).

The Flora and Fauna Working Paper (p. 16) indicates that all lakes and reservoirs have been mapped and are available in the County Planning Department offices. There are about 300 Alpine Cascade Lakes in the County, varying in size from Waldo Lake (6,420 acres) to Mouse Lake (.05 acres) (Water Resource Working Paper, p. 8).

Groundwater: The principal aquifiers which yield moderate to high volumes of water are located on the coast near Florence in dunal sands, along the lower McKenzie Valley, the lower Middle Fork Willamette Valley, the Lower Coast Fork Willamette Valley, and on the valley floor north of Eugene along the Willamette River (p. 10). Map 3 in the Working Paper shows the quantity of groundwater in Lane County; groundwater quality is depicted on Map 3.

Conflicting Uses/ESEE Consequences Analyses

Watersheds: The County states that the only conflict that is specifically a watershed conflict, and not a surface or groundwater conflict, is contamination or possible contamination of surface water supplies used for domestic purposes. Timber propagation and harvesting activities, particularly herbicide use and erosion caused by ground disturbance can affect municipal water sources (p. 5) Residential development and road construction also cause erosion problems (p. 5). The County notes that resolution of timber harvesting conflicts is beyond its regulatory scope. It also points out that several watersheds used for domestic water supplies are "substantially within federal owernship." The County notes that the watershed for the City of Cottage Grove is almost entirely within federal ownership. The Umpqua National Forest and the U.S. EPA have adopted a plan to address problems, yet these problems continue (p. 5). The County indicates that the potential for similar problems exist for domestic suppies from federally-owned watersheds such as Mapleton, Tide, London Springs, and Eugene's supply, the McKenzie River (p. 5).

The County has not conducted an ESEE consequences analysis because the problem is outside its jurisdiction to resolve. However, the County supports adoption of policies or amendments to state and federal laws (including the FPA) which provide greater levels of protection for watershed (p. 6).

Development -- which is regulated by the County -- could impact the Clear Lake watershed. This watershed serves the Heceta Water District and provides a portion of the water for the City of Florence (p. 6). The County discusses the possibility of designating a "protected watershed" but has decided to take no action until sufficient information is gathered on the sources of pollutants. (p. 6). An intensive study is presently underway in response to a temporary DEQ rule (p. 6).

Wetlands: Please refer to the Fish and Wildlife section of this report for a discussion of the County's conflicting uses/ESEE consequences analysis for wetlands.

Surface Waters: A number of conflicts exist for surface waters of the County, but the County asserts they are not consequences of County actions. Rather, it believes they are the result of federal agency management programs (e.g., reservoirs have certain congressioally authorized uses, but these often do not include some uses that are of importance of the County, such as waste dilution, fish and wildlife and recreation). The Corps of Engineers is in the process of reviewing authorized uses on six reservoirs, and could propose reauthorization (p. 9).

Similarly, certain streams such as the Coast Fork Willamette, Coyote Creek, Long Tom River and Lost Creek, appear to have been overallocated. The County recognizes that the State Water Resources Department (WRD) has responsibility for establishing minimum streamflows. The County believes WRD should initiate adjudication, including establishing minimum streamflows for major waterways (p. 9).

Erosion from forest lands is also a conflict with water quality, but the County points out that it is regulated by the FPA or federal regulations. (p. 9). Agriculturally caused water quality problems are being addressed by DEQ and soil and water conservation districts, although three SWDs in the County have not yet adopted model Best Management Practices by DEQ (p. 9). Outside UGBs, urban runoff is primarily from industrial facilities, especially hazardous materials stored at this sites (p. 9-10). This is also regulated by DEQ.

Groundwater: Two conflicts have been identified for groundwater resources -- development in quantity-limited aquifers, and development in areas where groundwater quality may be polluted. Separate ESEE consequences analyses are presented for these two types of conflicts. The County has concluded that:

1. For a quality-limited aquifer, otherwise acceptable development should be allowed if there is an adequate showing that water will be available for a forseeable period in the future, and that the additional withdrawal will not negatively impact surrounding water users. A number of specific code revisions are recommended to carry out these requirements (p. 12).

2. For groundwater quality problem areas, the County has determined that resolution of conflicts should be different for different types of contaminants (p. 14). These include:

    a. For development in aquifers contaminated by natural means, there should be a system to inform people of potential problems, and to suggest that well drilling and testing take place prior to construcion. Areas of quality limitation could be placed on a computerized land file, and could be checked when a building permit application is reviewed. Similarly, notification would be a matter of public record and would be available to future parties interested in these properties as well.

b. Old and smaller solid waste sites in the County are mapped, but not enough is known about specific leachate problems or groundwater characteristics to designate hazard notification areas around them. The Working Paper recommends inventorying each site, including period of operation, type of wastes deposited, and groundwater characteristics. Based on the information, a hazard notification system should be established (p. 14).

c. Two sensitive aquifers are currently subject to DEQ rules for sewage system installation -- the River Road/Santa Clara area, and the North Florence area. For other developed areas located on sensitive aquifers and which have known or suspected contamination problems (Mapleton, Noti, Elmira, Crow, Coburg, Goshen, Creswell urbanizing area, Saginaw, Marcola, Dexter, Cedar Flats, Walterville, Leaburg, Vida, Blue River, and McKenzie Bridge), current County policy calls for a minimum parcel size of one acre if community water is available, or two acres if individual wells are used. The County points out that this policy does not correct the existing situation, but should prevent aggravation of the situation (p. 15). These quality-limited aquifier areas will be placed on the County computer file, and applicants for building permits involving new wells will be informed of possible sewage contamination in the groundwater.

Policies

The following policies address water resource issues in Lane County (Water Resources Policies, Plan, pp. 17-18):

1. State policy normally promotes multiple use of surface waters throughout Lane County. Under such policy, use conflicts can and do occur. As the first step in addressing this problem, the County urges the Oregon Water Policy Review Board and the Department of Environmental Quality to update the existing water basin plans and establish priorities among the varous beneficial uses for specific water areas. The economic, social, environmental and energy consequences of each use should be considered in establishing priorities and resolving any identified conflicts. Lane County will cooperate to the maximum extent practicable in such a program.

2. The County supports congressional reauthorization of upper Willamette basin reservoirs, to reflect actual use priorities. To the extent practicable, the County will cooperate with the Corps of Engineers in resolving existing use conflicts and accommodating the needs of competing uses.

3. Adequacy of water supply, particularly those relying on groundwater sources, shall be a major concern in reviewing major land use changes. For the purpose of applying this policy, major land use change shall be any application reviewed by the Hearings Official or the Planning Commission.

4. The primary means of evaluating groundwater resources for land use planning purposes shall be through the land division review process. The Little Butte Volcanics, Eugene Formation, Fisher Formation, Spencer Formation, Flourney Formation, Alluvium and Older Dunes geological units shall be designated as quality and/or quantity limited aquifers. As such the provisions of Chapter 13, Lane Code (Land Divisions) regarding areas so designated will apply.

5. Land use designations in the Comprehensive Plan and implementing zoning shall be commensurate with groundwater aquifer capacities.

Additional policies regarding water resources, including wetlands, are discussed in the Fish and Wildlife section of this report, as well as in the Goal 6 and 11 sections.

Implementing Measures

As noted in the Fish and Wildlife section of this report, the County has adopted riparian setback and vegetation maintenance standards in a number of zoning districts.

A Natural Resources Zone has been applied to several wetlands (confirmed by Mike Copely, County Planner, personal communication, July 16, 1984).

Section 13.050(13) of the Lane Code addresses the provision of water in the County. This section requires lots and parcels to be served by an approved public, community, or individual water system. Aquifer and quality tests are required for public and community systems, and may be required for individual water sytems. These tests are as follows (Section 13.050(13)):

(c) Aquifer and quality tests or geological evaluation may be required by Lane County for any lot or parcel. These requirements may include, but need not be limited to, evaluation of existing well logs and preparation of a geological report on the area, and evaluation of the site by a professional geologist, or engineering geologist or full scale aquifer tests as required. In determining the detail of analysis required, the following apply:

(i) Areas designated by Board order as having problems in the quantity or quality of available water as adopted, documented in Lane Manual and filed in the office of the Department shall meet

the following requirements for all parcesl less than 20 acres in size. The applicant must affirmatively demonstrate, in a manner acceptable to Lane County, that the proposed subdivision/partition is capable of sustaining the devlopment anticipated with sufficient potable water. This demonstration must include, but need not be limited to, aquifer tests. More specifically, the aquifer test shall show coefficient of transmissivity, permeabiltiy, storage and the specific yield. The bacteriology/ chemical tests shall show compliance with standards set by the Oregon State Health Division and Lane County. The test procedure shall utilize standard acceptable practices for aquifer tests using pumped and observation wells and records of static water level, date, clock, elapsed time (in min.), depth of water, drawdown and recovery. Analysis using the non-equilibrium method (or other methods where appropriate) must be performed by a licensed geologist or engineer. A copy of all field notes and test results shall be submitted with the report, together with summary statements which indicate whether the proposed use of the aquifer could adversely impact the neighboring wells or properties or deplete the aquifer and the general impact of the proposed use.

(d) For all areas not designated as problem areas by the procedures documented in LC 13.050(13)(a) above, a pump test report or a well log report shall be supplied, unless determined by Lane County to be not necessary.

Pump test and well log reports shall be prepared according to criteria in the ordinance.

Conclusion -- Water Resources

The County has done a good job of inventorying its water resources and problems associated with those resources. The County has analyzed the ESEE consequences of conflicting uses, and has adopted some excellent implementing measures to help resolve conflicts, particularly riparian setback and vegetation maintenance standards and aquifer and quality requirements.

Wilderness Areas

Inventory

Lane County's inventory of designated wilderness areas is contained in its Recreational Resources Working Paper on a map entitled, Recreational Resources. The locations of three wilderness areas are depicted--Mt. Washington Wilderness, Three Sisters Wilderness, and Diamond Park Wilderness.

Page 4 of the Working Paper describes in general the County's role in managing such areas.

It should be noted that recently, new wilderness legislation was passed by the U.S. Congress, establishing a number of new wilderness areas in Oregon. Several of these are within Lane County. These include Rock Creek, Cummins Creek, Three Sisters Additions, Diamond Peak Additions, and Waldo Lake.

Because of the fact that Congressional action occurred so recently (after Lane County submitted its plan), it is suggested--but not required until first plan update--that the plan be amended to inventory these new areas.

Conflicting Uses/ESEE Consequences Analyses

Because of their federal ownership, remote locations and federal protection for wilderness values, the County indicates that wilderness areas are "free from County-generated conflicts" (p. 4).

Policies

Lane County has one policy addressing wilderness areas (Open Space and Scenic Areas Policy 2; Plan, p. 17):

> Lane County will recommend that no new wilderness areas be designated in the County without a complete analysis of the revenue and employment impacts to Lane County. Where designations are made, negative employment and revenue impacts should be mitigated by increasing allowable timber harvest on other public lands.

Implementing Measures

Forest resource zoning has been applied to wilderness areas. The County explains in its Recreational Resources Working Paper (p. 4) that this zoning "will pay homage to the concept of County 'protection' of them, but in practical fact they are simply out of the relm of County authority."

Conclusion--Wilderness Areas

Lane County has inventoried the three wilderness areas within its boundaries and has adopted a plan policy recommending that no new wilderness areas be designated without an analysis of revenue and employment impacts. The areas have been given forest resource zoning. It is recommended that, by first plan update, the County amend its plan to inventory the recently designated new wilderness areas.

Historic and Cultural Resources

Inventory

The Working Paper identifies each of the approximately 500 sites identified in Lane County on a preliminary inventory and survey of historic and archaeological resources. Each is identified by site number or name, by location (township, range, section) and by map symbol. Each appears on a quad map included in that document. A map symbol for each site indicates whether it is an archaeological site, a transportation site or route, a settlement feature, an agricultural site, a mining site, a logging site, a marine site, an historical site, or a natural feature.

Lane County has adopted an Historical Resources Working Paper which explains the process and criteria used in evaluating the "significance" of the 500 sites identified in the County (Addendum to the Working Paper, pp. 1-2). All sites on the National Register of Historic Places are considered significant and are in the (1C) category of the Goal 5 Rule. All sites or structures still in existence contained in the Statewide Inventory are also considered significant, and where sufficient information is available to carry out a conflicting uses analysis, a (1C) label has been given. Archaeological sites are considered (1B) sites, but the County indicates they should be given special interim protection until a data and a protective program for them are developed. All other sites identified are (1A) sites (pp. 1-2).

In all, the County determined there are 63 (1C) sites. These are listed on pages 3 and 4 of the Working Paper Addendum, along with their locations and map numbers. These sites are mapped on quadrangle maps that are included in the Working Paper. Each site has been given a map code which specifies the "theme" of the site (i.e., archaeological, transportation, settlement features, cemetery, century farm, grange hall, old barn, mining, logging, marine industry, historical site, natural landmark, and hot springs). Further information about each (1C) site that is also on the Statewide Inventory is appended to the addendum to the Working Paper. The Addendum to the Working Paper also summarizes the quality and quantity of these (1C) sites (pp. 5-9).

It should be noted that the County has indicated that several (1C) sites on the historic sites inventory in the Working Paper Addendum (pp. 3-4) were deleted by the Board of Commissioners during final plan adoption, including sites # 32, 34, 39, and 42 (Mike Copely, County Planner, personal communication, June 15, 1984). There is no indication of this in any of the resubmittal materials. Site 34 is within the Creswell UGB. However, there are no reasons presented supporting deletion of sites # 32, 39, or 42 (the Andrew Keeney House, the Paschelke House, and Fall Creek Christian Church, respectively).

Conflicting Uses/ESEE Consequences Analyses

Pages 5-9 of the Addendum to the Working Paper contain the County's conflicting uses identification and ESEE consequences analyses for the (1C) sites. These analyses are presented by category for the following categories: Transportation Sites (bridges), Settlement Features, Barns, Marine Sites, Historical Sites/Landmarks, and Archaeological Sites.

In its Working Paper, the County recognizes destruction of the structural sites as a conflict, but fails to recognize major exterior alteration as a conflicting activity. However, it is clear in the County's zoning ordinance that the County considers major exterior alteration as an activity which could conflict with historic resources. For archaeological sites, the County identifies any land use or activity which damages the integrity of the site as a conflict.

Policies

Lane County has adopted a number of plan policies which address historic and archaeological resources (Plan, pp. 12-13). These include the following:

1. A group known as the "Lane County Historic Resource Committee" is to be established and given permanent status by the Board of County Commissioners. The Committee shall represent a wide array of historical interests and the interest of property owners. Its tasks shall include: general concern with historical matters in the County; to monitor conditions affecting such resources; to devise criteria and methods for the selection of newly-designated historical resources; to advise the staff and officials of the County on proposed new historical sites and structures; to oversee the administration of the Historic Structures or Sites ordinance; and other related tasks and duties. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

2. The County shall administer the "Historic Structures or Sites" section of Lane Code Chapter 10 as a means of protecting historic resources. These regulations shall be applied to all sites contained in [the] list of "Historic Structures or Sites" referenced by the ordinance, which are sites deemed significant by the County, and therefore meriting protection from conflicting uses by a limitation of such conflicting uses.

3. The Goal 5 conflict resolution process (OAR 660-16-000 through 660-16-025) which has been applied in the selection of historical sites and structures contained in the General Plan and implemented through the "Historic Structures or

Sites" ordinance, shall continue to be applied, where appropriate, to historic sites and places prior to regulation of them.

4. The County shall seek to enlist voluntary compliance with individual landowners in the addition of their property as historical sites, and landowners shall be notified of Public Hearings, including information about inclusion as a Historical Site.

5. The County shall encourage its own agencies, and communities within the County, to emphasize their historical, geographic and other unique qualities.

6. The County shall review proposals for development or change in land use for possible impacts with designated historical sites. When proposed development or land use changes will cause harm or degradation of a designated site, such effects shall be mitigated in a satisfactory manner.

7. The County shall continually develop and refine, through review, and update, its inventory of historic sites and resources. A long-term objective shall be in the inclusion of historical sites in the County's geo-data system.

8. The County shall take advantage, where practical, of state and federal programs to assist in the identification and protection of historical resources, including the use of financial assistance from these programs.

9. The County shall work with concern local, state and federal agencies to coordinate efforts to identify and protect historical resources.

10. Archeological sites identified in the Historical Resources Working Paper and Addendum to the Historic Resources Working Paper shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. These significant sites shall be incorporated into the Lane County General Plan Policies document as Historical Resources Exhibit A.

Note: Policy 2, above, incorrectly refers to Lane Code Chapter 10, rather than Chapter 16 as its implementing measure for historic sites.

Implementing Measures

Section 16.233 of the Lane County Development Code is the Historic Structures of Sites Combining Zone (/H-RCP), the stated purpose of which is to allow the County to review building and demolition permits to

ensure historic resources are preserved. The Code specifies that "no person may alter or demolish any Historic Structure or Site" unless a permit to do so has been issued. Upon receipt of an application for such a permit, the Planning Director shall notify the Lane County Museum Director and the State Historic Preservation Officer.

A demolition permit shall be approved only if evidence is submitted demonstrating that "every reasonable effort shall be made to maintain the Historic Structure by acquisition, protection, stabilization, rehabilitation, restoration or reconstruction project (a demonstrated lack of private and public funding for maintenance of a structure is sufficient cause to allow demolition)." A permit to alter an historic site or structure shall be approved only upon submission of evidence that (a) any use or change "should be compatible with the historical nature of the property," and (2) only the minimum alteration of the structure or site and its environment necessary to achieve the intended use shall be allowed. Consideration shall be given to four alteration guidelines in satisfying the second criteria, above. These guidelines are as follows:

(1) Only the minimum alteration of the designated historic building, structure or site and its environment necessary to achieve the intended use shall be allowed.

(2) The distinguishing original qualities or character of a designated building, structure or site and its environment should not be destroyed. The removal or alteration of any historical material or distinctive architectural features should be avoided.

(3) All designated buildings, structures and sites shall be recognized as products of their own time. Alterations which have no historical basis and which seek to create an earlier appearance should be discouraged.

(4) Changes which may have taken place in the course of time are evidence of the history and development of a building, structure or site and its environment. These changes may have acquired significance in their own right and this significance shall be recognized and respected.

It must be noted that the zoning maps do not show that the combining zone has been applied to all 63 inventoried (IC) sites as intended. Specifically, the maps do not show that the combining zone is applied to (IC) sites 1-20, 24, 35, 38, 44, 45, 46, 48, 55, 57, 59 or 61. The ordinance also does not indicate which sites fall within that zone designation. This is also contrary to Historic Policy 2, which states that the zone shall be applied to all sites on a list referenced in the ordinance.

Objections

1. The Oregon Department of Transportation (ODOT) has objected because of a conflict between the historic resources working papers and the ordinance. Specifically, ODOT finds that the historic ordinance applies only to sites and structures on the National Register of Historic Places, and does not cover other (1C) sites identified in the working papers.

2. Friends of the Oregon Coast object because of the failure of Lane County to address cultural and archaeological resources of the Big Creek Exception Area. Specifically, objectors indicate that Goal 5 requires such resources to be inventoried. Yet, according to objectors, the Exception does not address this topic "in any way." Objectors provide information indicating that such resources are common at the mouths of coastal rivers. Due to the probability of Indian graves and/or a significant archeological site at the mouth of Big Creek, and the fact that, based on the County's own definition of conflicting uses, road building, building construction and land clearing for a destination resort are considered conflicting uses, objectors believe that "the new zoning of the Renaghan property is in violation of Goal 5 until an intenstive cultural resources inventory has been conducted and this portion of Goal 5 addressed."

Response to Objections

1. ODOT has misread the Lane Code with regarding to the County's Historic Structures of Sites Combining Zone. ODOT has apparently reviewed the County ordinance which applies inside UGBs. That zone does limit the zone's application to National Register sites. However, ODOT has failed to note that the ordinance which applies outside UGB's (in rural Lane County) is somewhat different. Specifically, the rural zone does not contain language that limits application to National Register sites. Therefore, the objection is not sustained.

2. Objectors are correct that the exception for the Renaghan property does not address historic or cultural resources. However, as pointed out by the objectors themselves, the State Historic Preservation Office knows of no site on the property, nor do anthropoligists at Oregon State University. County's are required, under Goal 5, to rely on whatever information is available in producing comprehensive plans. They are not required to conduct extensive archaeological surveys. Therefore, the County's exception does not violate Goal 5 for cultural or archeological resources. If, in the event, such resources are discovered during site development, the Goal 5 Rule would have to be applied by the County, including possible plan amendments.

Conclusion--Historic Resources

Lane County has adopted an inventory of historic resources and has analyzed conflicts and ESEE consequences of conflicts with these resources. The County has a combining zone which is intended to be applied to historic sites.

The zone provides procedures and criteria for resolving conflicts with inventoried sites, particularly major exterior alterations and demolitions. However, the County has not applied the zone to all 63 (1C) sites identified in its plan, as intended.

Oregon Recreation Trails

Inventory

Lane County's inventory of Oregon Recreation Trails is included in its Recreational Resources Working Paper (p. 15, Recreational Resources Map).

The County describes these trails as follows:

1. Coast Range Trail--not developed. Funding limitations and the desire of the state not to condemn private land for trail development suggests that it will be some time before it is completed. Mapped route is general in nature.

2. TransAmerica Bike Trail--fully signed and marked, with route maps published by the state.

3. Eugene to Pacific Crest Trail--a few portions are developed with work now underway by a local chapter of the Sierra Club. Uses bikeways in Eugene Area.

4. High Divide Trail--proposal only, same as #1 above.

5. Coast Trail--Lane County developed portions occur in Cape Perpetua and Heceta Head recreational areas, with preparations being made for inclusion of Oregon Dunes National Recreation Area lands. No private lands involved at this point.

6. Coast Bicycle Trail--designated, signed and mapped.

7. Pacific Crest Trail--fully developed. No private lands involved in Lane County. Located in Willamette National Forest.

These descriptions are basically accurate. It should be noted that, according to Jack Remington, State Trails Coordinator, ODOT has proposed general routes for the unbuilt portions of the Eugene to Pacific Crest Trail and the Coast Trail. Portions of the High Divide Trail already exist since they follow several other developed trails. However, only general routes have been proposed for the unbuilt portions of the High Divide Trail (personal communication, June 20, 1984).

The general location of each of the seven trails is depicted on the County's Recreational Resources Map in the Working Paper. No specific locations have been provided in either the text or on the map, however, for existing trails. Specific routes for the Pacific Crest Trail, the TransAmerica Bike Trail, the Coast Bike Route, and portions of the High Divide Trail and the Eugene to Pacific Crest Trail are known, since these trails are developed.

Conflicting Uses/ESEE Consequences Analyses

The County has not identified specific conflicting uses with the seven proposed or existing Oregon Recreation Trails.

However, the Coast Bicycle Trail, TransAmerica Bike Trail and the Pacific Crest Trail are fully developed and are either on federal or other public lands or on public rights-of-way, as are portions of Eugene to Pacific Crest Trail and portions of the Coast Trail. Therefore, the County concludes that they are likely to experience few conflicts.

No specific routes for the Coast Range Trail or the unbuilt segments of the Coast Trail, the Eugene to Pacific Crest Trail, or the High Divide Trail have been determined by ODOT. Although most of these proposed trails would cross public lands, segments of these trails are proposed to cross private lands, and conflicts could occur. However, since their locations are only generally known at this time, specific conflicts cannot be determined.

Policies

Lane County's recreational trails policy (Open Space and Scenic Areas Policy 4, Plan, p. 17) is:

> The County shall acknowledge recreational trails which are developed by the Oregon Parks Outdoor Recreation Plan and shall display the routes on its Plan documents.

Lane County lacks a policy to cooperate with ODOT in the protection of existing trails. The County also lacks a policy to coordinate with the Oregon Department of Transportation in applying the steps of the Goal 5 Rule during any future identification or establishment of proposed trails or trail segments.

Implementing Measures

No specific implementing measures have been adopted by Lane County for the protection and/or resolution of conflicts with existing or proposed trails.

Conclusion--Recreation Trails

Lane County has identified the seven existing or potential state recreation trails in its Recreational Resources Working Paper, but has not provided a description or map of the specific locations of existing trails. It has, however, recognized the fact that ODOT has maps of these trails. The County lacks a plan policy to coordinate with ODOT in applying the Goal 5 Rule if and when any of the unbuilt trail segments are identified or proposed for construction or designation. The County also lacks a policy to cooperate with ODOT in the protection of existing trails.

No conflicts exist with developed trails and trail segments, and therefore, special implementing measures are not necessary in those areas. Implementing measures have not been adopted for the protection and/or resolution of conflicts with the proposed trails and trail segments, nor are any appropriate at this time since their specific locations are not yet known.

Potential and Approved Scenic Rivers and Waterways

Inventory

The County's Recreational Resources Working Paper briefly describes both the State Scenic Waterways Program and the Federal Wild and Scenic Rivers Program (p. 16). The County correctly notes that there are no designated federal rivers in Lane County at this time. However, the County fails to note that during the 1983 Legislative Session, a bill was passed (HB 2435) designating Waldo Lake and the North Fork of the Middle Fork of the Willamette River (from Waldo Lake to about one mile upstream from Westfir) as a State Scenic Waterway. The County's working paper incorrectly indicates there are no state designated waterways.

The Working Paper correctly recognizes that five river stretches are on the U.S. Interior Department's inventory of potential scenic rivers (p. 17):

1. Upper McKenzie (from Tamolitch Falls to McKenzie Bridge);

2. Steamboat Creek (from its source to its confluence with the Umpqua River);

3. Alsea (entire length; only a small upper portion in Lane County);

4. Siuslaw (from its source to Lake Creek confluence); and

5. Willamette (from Eugene to Corvallis).

All five of these river segments are shown in a general fashion on the Recreational Resources Map contained in the County's Recreational Resources Working Paper.

The County correctly notes that the Upper McKenzie (from Tamolitch Falls to McKenzie Bridge) is also on the state potential scenic waterways list. However, the County fails to mention that Steamboat Creek and Alsea River (the same stretches as on the federal potential list) are also on the state potential list.

The County recognizes that the area affected along each of the inventoried rivers is one-quarter mile on each side measured from ordinary high water (p. 16).

Policies

The following policy has been adopted regarding wild and scenic rivers (Open Space and Scenic Areas Policy 5, Plan, p. 17):

> The County shall cooperate with appropriate state and federal agencies in the selection of scenic and wild rivers.

This policy does not commit the County to coordinate with those agencies in applying the Goal 5 Rule process in studying rivers for possible state or federal designation and in making such selections.

Conflicting Uses/ESEE Consequences Analyses

Lane County suggests that conflicting uses and ESEE/consequences should be identified at the time a river is studied for designation (pp. 17-18). The County also suggests that resource zoning should provide protection for such rivers (p. 17).

Implementing Measures

Waldo Lake and the stretch of the North Fork of the Middle Fork of the Willamette River that is designated as a State Scenic Waterway are located entirely on federal land (confirmed by Jim Payne, State Rivers Program Coordinator, personal communication, June 14, 1984). The portion of the Alsea River that is on the state and federal potential lists is also in federal ownership. The Willamette River is within the Willamette River Greenway, to which the County has applied a Greenway Development ordinance (see the Goal 15 section of this report for details).

Portions of the McKenzie River, Steamboat Creek, and the Siuslaw River flow through federally-owned lands. However, some stretches are in non-federal, private ownership. Developed and committed exceptions have been taken along all of these stretches of the McKenzie and Siuslaw Rivers and Steamboat Creek, most of which have been found to be valid under the Goal 2 analysis in this report. However, as noted in that report section, exceptions in plats 23, 204, 230 (Siuslaw River), 627, 628, 629, 630 and 631 (McKenzie River) have not been justified. No needs exceptions have been taken along the McKenzie River, Steamboat Creek, or the Siuslaw River. It has been the practice of the Commission to require jurisdictions to analyze the ESEE consequences of taking needs exceptions along potential federal or state scenic rivers and waterways, but not to require such an analysis for built and committed exceptions.

Conclusion--Scenic Rivers and Waterways

Lane County has inventoried five federal potential scenic rivers and one state potential scenic waterway (the McKenzie River) but has failed to note that, besides the McKenzie River, two of the federal potential rivers are also potential state waterways (i.e., the Alsea River and Steamboat Creek). The County has also failed to mention that Waldo Lake and the North Fork of the Middle Fork of the Willamette River are designated State Scenic Waterways.

The County lacks a policy commitment to coordinate with appropriate state and federal agencies in applying the Goal 5 Rule process in studying rivers for possible designation as well as in the actual selection of rivers for designation.

Built and committed exceptions have been taken along all nonfederal lands along state and federal potential scenic rivers, some of which have not been found to be valid under Goal 2. The County needs to either not take these exceptions, or justify them as being built or committed.

PART II--EUGENE/SPRINGFIELD METROPOLITAN AREA OUTSIDE THE METRO UGB

In August, 1982, the Commission reviewed and acknowledged the Eugene/Springfield Metro Area Plan and implementing measures for lands within the Metro UGB. However, the cities of Eugene and Springfield as well as Lane County were granted a continuance for lands outside the UGB but within the Metro Planning Area Boundary in order to comply with Goal 5, (as well as several other Goals). The following section of this report analyzes Lane County's responses to the "in-order-to-comply" requirements contained in the August, 1982 staff report, adopted by the Commission.

Requirement

1. Amend the Metro Plan to include a separate evaluation of the "ESEE" consequences of allowing conflicting uses for those sites which are the subject of a Goal 5 objection filed pursuant to OAR 660-116-00 (i.e., Sites 4, 5, 7, 12, 19, 21 and 28 shown on Figure D-3). For specific direction on individual sites see underscored portions of Comments and Objections subsection, preceeding.

Response

The following sites were to be addressed under this requirement:

Site	Name
4	Bertelsen Slough
5	Willow Creek Wetlands
7	Confluence Heronry
12	Gillespie Butte
19	Spencer Butte Ridgetop
21	Russel Creek Basin
28	Pudding Creek Heronry

Sites 4, 5, 12 and 19 are located within the Metro UGB and have been acknowledged by the Commission (see the August 19, 1982 Commission action, pp. 10-11). Therefore, they are not addressed in this report.

The Confluence Heronry, Pudding Creek Heronry and Russel Creek Basin are outside the Metro UGB and inside the Metro Planning Area Boundary and were therefore addressed in this plan submittal. Specific Goal 5 analyses for each of the three sites are presented separately below.

Confluence (Big Island) Heronry: The Lane County Rural Comprehensive Plan, Plan Diagram Zoning Maps and Metro Area of Influence document (January 1984) contains a 1982 working paper entitled, "Metropolitan Plan Update, Natural Resource Areas: Conflict Resolution For Potential Significant Areas." Part V of that working paper addresses a site known as the Confluence Heronry, or the Big Island Heronry. This working paper supplements Lane Council of Governments' (L-COG's) inventory in the Natural Assets and Constraints working papers of April 1978.

As explained in the 1982 working papers, p. V-1, the 235-acre island is located in the Willamette River near the confluence with the McKenzie River. The County has specifically mapped the location of the island as well as a large Great Blue Heron rookery located on the island. The heronry has been determined to be of local and statewide significance, and is on the State Natural Heritage Inventory. The island's other resources (e.g., agricultural land, vegetation, wildlife and wildlife habitats, sand and gravel resources, scenery and water are described (pp. V-1 through V-5). The island is within the Willamette Greenway and is a potential Greenway acquisition site in the ODOT Greenway Plan (Working Paper, p. V-7).

L-COG has reassessed the significance of the resources on the island and has provided more detailed locational information about the heronry and its significances, statewide, based on information on other heronries (p. V-8). More refined information has also been adopted regarding vegetation, soils, agricultural values, and sand and gravel resources (pp. V-8, V-11 through V-17).

Conflicting uses are identified (pp. V-8 through V-10) as recreation, sand and gravel extraction, timber harvest, agricultural practices, wildlife and wildlife habitat, scenic assets and public improvements. Each of these uses is described, particularly as it could affect the heronry. Pages V-11 through V-17 contain L-COG's ESEE consequences analysis.

The analysis concludes that the heronry and vegetative fringe of the island are significant resources that should be protected. However, not allowing sand and gravel extraction on the island would result in negative impacts on property owners and the public. Extraction can be conducted in a manner that is compatible with the heronry (p. V-18). Recommendations regarding the island are made on page V-18. Among these are recommendations to:

1. Designate the heronry and buffer area as "natural resource" and designate the fringe of the island as "park and open space." The interior of the island should be designated "sand and gravel."

2. Exchange land (between property owners and the state) so that the heronry and buffer are in perpetual public ownership.

3. Protect the riparian habitat on the island periphery by maintaining an adequate Willamette River Greenway vegetative fringe.

4. Develop controls on sand and gravel extraction between the operator and ODFW in order to protect the heronry.

5. Rely on state and County permits for addressing the details of sand and gravel operations.

See also the Goal 15 section of this report.

Pudding Creek Heronry: The Lane County Rural Comprehensive Plan, Plan Diagram Zoning Maps and Metro Area of Influence document (January 1984) contains a 1982 working paper entitled, "Metropolitan Plan Update, Natural Resource Areas: Conflict Resolution For Potential Significant Areas." Part VI of that working paper as well as 1984 Addendum to Part VI addresses a site known as the Pudding Creek Heronry. These working appears supplement L-COG's inventory in the Natural Assets and Constraints working papers of April 1978.

The heronry is one of the largest in Western Oregon (about 54 nests) and continues to be productive (Addendum, p. 1). The heronry is currently designated and zoned "sand and gravel," and potential mining operations

could conflict with the heronry. The site is on the Middle Fork of the Willamette River (Working Paper, p. VI-5). The Addendum indicates that the site is also within the Willamette Greenway.

The 1982 Working Paper summarizes in greater detail the resource values of the site (pp. VI-1 through VI-5), as well as the nature of the potential conflicts (pp. VI-6 though VI-7). Inasmuch as the heronry is in the middle of the potential extraction operation, and the owner has an operating permit from the Oregon Department of Geology and Mineral Industries, this appears to be the greatest conflict. Timber harvest and vegetative clearing, which normally precede extraction, would also conflict with the heronry (pp. VI-5, V-6).

Pages VI-7 through VI-12 analyze the ESEE consequences of the various competing uses for the site, and conflict-resolution alternatives ranging from no protection for the heronry to full protection of the heronry through public acquisition or land trade are analyzed (pp. VI-13 and VI-14).

The Working Paper recommends interim protection for the heronry, plus possible land exchange or transfer of mining rights. It also recommends that ODFW cooperate with the landowner to develop a management plan for the site (should no land exchange take place).

The 1984 Addendum to the 1982 Working Paper reassesses the significance of the heronry, updates the inventory, and summarizes the results of negotiations which have taken place between Lane County, ODFW and the landowner (Wildish Land Company).

The 1984 Addendum to the Working Paper contains a discussion of the conflict-resolution process that took place in 1983 (pp. 1-2). ODFW drafted a trade agreement for an exchange of land and mineral rights of like value between State Parks Division, Lane County, and the Wildish Land Company (pp. 1-2). Such a trade would result in protection of the heronry and protection of the landowner's ability to extract aggregate (p. 3). Based on the analysis of conflicts, ESEE consequences, and the possibility of a land exchange, the Addendum contains the following updated recommendations (p. 4):

1. Change the plan designation for the heronry and surrounding buffer area from "sand and gravel" and "park and open space" to "natural resources."

2. Change the plan designation for an equal value land within Buford Park from "parks and open space" to "sand and gravel."

3. Lane County should rezone each area to correspond to these plan designations.

4. The potential land exchange area should be contiguous to existing Wildish holdings to avoid creating noncontiguous park boundaries.

See also the Goal 15 section of this report.

Russel Creek Basin: The Lane County Rural Comprehensive Plan, Plan Diagram Zoning Map and Metro Area of Influence document (January 1984) contains a working paper which is entitled, "Metropolitan Plan Update, Natural Resource Areas: Conflict Resolution For Potential Significant Areas--Russel Creek Basin Addendum." This working paper supplements Lane Council of Governments' inventory in the Natural Assets and Constraints working appers of 1978 and the 1982 Natural Assets: Conflict Resolution for Significant Areas.

The 1984 working paper provides a history of the treatment of Russel Creek in the Metro Plan update process (pp. 1-5), and notes that LCDC's 1981 review of the plan required an ESEE consequences analysis of the site (p. 4). The working paper describes the natural features of the five subbasins comprising Russel Creek Basin as well as the specific ownerships and conflicting uses present (pp. 5-10). Maps are also provides showing the specific location of the basin, its subbasins, and vaious natural features. Species lists--both plant and animal--are appended to the working paper as well. The site is a significant natural area and, among other things, contains at least one threatened plan species, and several other species of special significance. Major conflicting uses on the 410-acre site include timber harvesting, agriculture, and certain types of recreation (p. 10).

The ESEE consequences of these conflicting uses are presented on pages 11-12 of the working paper, and, based on this analysis, the following recommendations are made (p. 14):

1. Lane County should adopt interim protective measures that prohibit grazing, logging and any other activity that may adversely affect future protection of the proposed natural area.

2. Conflict resolution and resulting plan amendments required for preserving Russel Creek should occur in conjunction with the Metropolitan Plan mid-period review.

3. Russel Creek property owners should be contacted, and negotiations should commence regarding conflict resolution for the proposed natural area.

4. The options of acquisition, donation or long-term lease should be explored along with the possibility of a joint program of interest among identified groups and governments.

Conclusion: Requirement 1 has been satisfied.

The Metro Plan has been amended to include separate evaluations of ESEE consequences of allowing conflicting uses for sites within the Metro Planning Area Boundary but outside the Metro UGB, namely, Confluence Heronry, Pudding Creek Heronry, and Russel Creek Basin.

Requirement

2. Amend the Metro Plan to include mandatory policy language requiring local governments to adopt resource protection/conflict resolution measures consistent with the plan's adopted text and findings.

Response

The Metro Plan was amended to include mandatory policy language requiring local governments to adopt implementing measures consistent with the plan's text and findings. These amendments were made and acknowledged by the Commission in August 1982 as part of the review of Metro Area (see Commission action, p. 12). Since these policies also apply outside the Metro UGB and inside the Metro Planning Area Boundary, this requirement has been satisfied.

Conclusion: Requirement 2 has been satisfied.

The Metro Plan has been amended as required, and acknowledged in August 1982.

Requirement

3. Eugene, Springfield and Lane County must amend their implementing measures to clarify the meaning of Policy 12 in habitat/scenic areas, as applied in the "Forest" and "Parks and Open Space" plan designation outside the UGB.

Response

Policy 12 referred to in this IOTC is on page III-C-8 of the 1980 Metro Plan. It reads:

> When evaluating the desirability of harvesting commercial timber on forest lands within the jurisdictional boundary but outside the urban growth boundary, great emphasis shall be placed on preserving scenic and water quality, as well as protection of wildlife, open space, and recreational potential.

In its most recent submittal, Lane County has not amended its implementing measures to clarify how this policy will be carried out in habitat or scenic areas that are designated "Forest" or "Parks and Open Space."

The meaning of Policy 12 is further confused by the more recent adoption by Lane County of Forest Lands Policy 17 (Plan, p. 10) which states:

> Lane County recognizes the Oregon Forest Practices Act shall be the only mechanism regulating the growing and harvesting of forest trees species on commercial forest lands unless Goal 5 resource sites have been recognized and identified as being more important through an analysis of ESEE consequences and conflict

resolution as per Goal 5. No other findings, assumption, goal policy, or other planning regulation shall be construed as additional regulation of forest management activities.

As noted in Part I of the Goal 5 section of this report, the County has not indicated which sites are "more important" based on a Goal 5 ESEE consequences analysis, nor has it adopted implementing measures to protect such sites through the regulation of forest management activities, or to otherwise resolve such conflicts, per Policy 12.

The Cities of Eugene and Springfield have adopted "tree-cutting" ordinances in response to this IOTC and have been acknowledged by the Commission.

Conclusion: Requirement 3 has not been satisfied.

Lane County has not amended its implementing measures to clarify how Policy 12 is to be carried out in habitat and scenic areas designated "Forest" and "Parks and Open Space."

Requirement

4. Eugene, Springfield and Lane County must ensure that Metro Area Plan policies are implemented in all natural resource areas as mapped in accordance with compliance requirements outlined above.

Response

As noted earlier, the plans for lands within the cities of Springfield and Eugene and lands within the Metro UGB have been acknowledged as being in compliance with Goal 5. Implementing measures that are adequate for protection and/or conflict resolution for the resource sites outside the Metro UGB but inside the Metro Planning Area Boundary (i.e., Russel Creek Basin, Confluence Heronry, Pudding Heronry) have not been adopted. The Russel Creek site is designated and zoned for forestry and residential use. Recommendations contained in the Working Paper of the Metro Plan Update document have not been carried out. Implementing measures for Pudding Creek and Confluence Heronries are addressed in the Goal 15 section of this report, since they are located within the Willamette River Greenway, and Goal 15 implementation requirements are more stringent than--and therefore supercede--those for Goal 5. As explained in the Goal 15 section of this report, adequate implementing measures for these two Greenway sites have not yet been adopted.

Objections

1. 1000 Friends of Oregon and Lane County Audubon Society have objected to the fact that Russel Creek Basin has been designated "Forest" and has been zoned for forest and residential uses. Specifically, objectors point out that in its 1981 review of the Metro Plan, LCDC found that the County identified this 410-acre site as a significant Goal 5 resource (because of its diversity, wetland, riparian

vegetation, unique species, wildlife, and climax ecosystems, including old growth). LCDC also found, however, that the County needed to analyze the ESEE consequences of conflicting uses with the site, and to complete the Goal 5 process. Objectors contend that although the County's resubmittal indicates that continued logging and future grazing may destroy these values, and the site is designated "forest" in the Metro Plan, and zoned for forest and residential uses. This would allow timber harvest, grazing and development which could adversely affect the resource. Objectors indicate the County has not taken steps to resolve these conflicts in accordance with the Goal 5 Rule, or with recommendations in the plan itself. Objectors also indicate that the County's "conflict resolution" document simply postpones the resolution of conflicts by recommending a negotiation phase and because interim protection (which is also recommended) has not been implemented.

2. Oregon Department of Fish and Wildlife (ODFW), 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the sand and gravel plan and zone designations given to a site known as the Pudding Creek Heronry. Since this site is within the Willamette River Greenway, please refer to the Goal 15 section of this report for details about these objections.

3. 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the County's plan and zone designations for the Big Island (or Confluence) Heronry at the confluence of the McKenzie and Willametter Rivers. Inasmuch as this site is within the Willamette Greenway Boundary, the objections are presented in greater detail in th Goal 15 section of this report.

Response to Objections

1. Objectors are correct that Lane County has taken no action to resolve conflicting uses for Russel Creek Basin, based on its own ESEE consequences analysis.

2. The response to the objections regarding the Pudding Creek Heronry is presented in the Goal 15 section of this report.

3. The response to the objections regarding the Confluence Heronry is presented in the Goal 15 section of this report.

Conclusion: Requirement 4 has not been satisfied.

Adequate implementing measures have not yet been adopted for the Confluence Heronry, Pudding Creek Heronry, or Russel Creek Basin.

Conclusion - Goal 5

Lane County does not comply with Goal 5.

Lane County has compiled inventory information for most Goal 5 resource categories and has made (1A), (1B) and (1C) decisions, based on this information. Conflicting uses for most categories have been analyzed. Based upon this work, the County has made protection/nonprotection decisions and has adopted plan policies and applied several implementing measures to many Goal 5 sites. Most noteworthy of these implementing measures are the County's riparian setback and vegetation maintenance standards, its groundwater protection provisions, and its Natural Resource zone. However, there are a number of deficiencies in the County's Goal 5 element which must be corrected before acknowledgement can be granted. These deficiencies have been summarized in the previous sections of this report.

In order to comply with Goal 5, Lane County and the Cities of Springfield and Eugene must:

1. Mineral and Aggregate Resources: Apply the Goal 5 process to sites zoned SG which are not included on the County's (1C) inventory and, based on an analysis of the ESEE consequences of conflicting uses, either (1) add them to the (1C) inventory if justified, or (2) rezone the sites for other uses.

2. Fish and Wildlife Habitats:

   a. Amend the Natural Resource Zone to include riparian setback and vegetation maintenance standards.

   b. Amend the C-1, C-2, C-3, M-1, M-2, M-3, and RG zones to either (1) include riparian setback and vegetation maintenance standards, or (2) incorporate by reference another section of the Lane Code which contains such standards.

   c. Apply riparian setback and vegetation maintenance requirements along lakes and Class II streams, or otherwise justify not providing such protection, based on an ESEE consequences analysis of conflicting uses.

   d. Amend the F-2 and EFU zones to carry out the intent of Flora and Fauna Policy 11. Specifically, the zones must either require larger minimum lot sizes in the Big Game Habitat portions of those zones, or contain clustering requirements in those areas.

   e. Amend the Flora and Fauna Working Paper to include location, quality and quantity information for sensitive bird habitat areas, including great blue heron rookeries, bald eagle and osprey nests, and pigeon mineral springs. Apply all applicable steps of the Goal 5 process to all known sensitive bird sites. Flora and Fauna Policy 15 must also be modified, consistent with these tasks.

f. Modify the definition of "wetlands" used in the Flora and Fauna Working Paper to be consistent with the definition contained in the Statewide Planning Goals.

g. Amend the Flora and Fauna Working Paper to identify the Goal 5 wetland area east of Highway 101 and south of Sutton Lake. Apply all applicable steps of the Goal 5 Rule to this site.(*)

h. Amend the ML Zone to require compliance with the Goal 5 Administrative Rule in future applications of the zone. For those sites currently zoned ML, identify the Goal 5 resources present, identify conflicting uses and ESEE consequences, and develop a program to achieve the Goal, consistent with the Goal 5 Rule.

i. Carry out Forest Lands Policy 17 (Plan, p. 10) by identifying sites that are considered more important than commercial timber management activities, based on a Goal 5 ESEE consequences analysis, and adopt appropriate implementing measures to protect and/or resolve timber management conflicts with those sites, consistent with that policy.

4. Natural Areas: Amend the Flora and Fauna Working Paper to include inventory information on the Goal 5 Darlingtonia natural area east of the City of Florence. Apply all applicable steps of the Goal 5 Rule to this site.(*)

5. Scenic Views and Sites: Inventory known scenic views and sites and apply all applicable steps of the Goal 5 Administrative Rule to those sites.

6. Historic Sites:

   a. Amend the zoning maps to show that the Historic Structures of Sites Combining Zone has been applied to all (1C) sites identified in the Working Paper, and amend the Zoning Code to make it clear that the combining zone applies to all (1C) sites.

   b. Justify deletion of sites 32, 39, and 42 from the inventory of historic sites, and amend the Historic Sites Working Paper to reflect these deletions; or apply the Historic Sites Combining Zone to those sites.

7. Oregon Recreation Trails:

   a. Amend the Recreational Resources Working Paper to provide more detailed locational information (text or maps) for all the existing trails and trail segments.

b. Adopt policies to:

(1) Cooperate with ODOT in the protection of existing trails; and

(2) Coordinate with ODOT in applying the Goal 5 Rule during any future identification, or establishment of proposed trail segments.

8. Scenic Rivers and Waterways:

a. Amend the Recreational Resources Working Paper to recognize that:

(1) Waldo Lake and the North Fork of the Middle Fork of the Willamette River to about one mile upstream from Westfir are within the designated State Scenic Waterway system; and

(2) The portions of the Alsea River, and Steamboat Creek that are on the federal potential list are also on the state list of potential scenic waterways.(*)

b. Amend Open Space and Scenic Areas Policy 5 (p. 17) to also indicate that the County will coordinate with appropriate state and federal agencies in applying all applicable steps of the Goal 5 Administrative Rule in studying rivers for possible designation and in actually selecting wild and scenic rivers for designation.(*)

9. Adopt implementing measures to resolve conflicting uses for the area known as Russel Creek Basin, based on the ESEE consequences analysis and conflict-resolution recommendations contained in the Metro Plan Update Working Paper.

Note: Those IOTC's which pertain only to Lane County are followed by an asterisk (*).

Suggestions for Plan and Implementing Measures Improvement

It is suggested that on or before the first plan update, Lane County:

1. Amend the plan to inventory the recently designated wilderness areas (Rock Creek, Cummins Creek, Three Sisters Additions, Diamond Peak Additions, and Waldo Lake).

2. Amend page 28 of the Flora and Fauna Working Paper to indicate that not all sites on federal land are necessarily protected (i.e., there may be conflicts with sites unless they are formally protected by the federal resource agency).

3. Amend Flora and Fauna Policy 7 to indicate that in evaluating (1B) wetland sites for possible inclusion on its (1C) inventory, information sources besides the National Wetlands Inventory will be used.

4. Adopt implementing measures to carry out Flora and Fauna Policy 9 (requiring residential building permits in Big Game Range areas to include a note indicating that the site is in Big Game Range and conflicts may occur).

GOAL 15: WILLAMETTE RIVER GREENWAY

This Goal 15 report is divided into two major parts. The first part is the review for all areas within the Willamette Greenway Boundary in Lane County outside the Metro Plan Boundary. The second part is for those Greenway areas inside the Metro Plan Boundary, but outside the Metro UGB.

PART I--GREENWAY AREAS
OUTSIDE THE METRO PLAN BOUNDARY

Inventory

Lane County has adopted a Willamette Greenway Working Paper which states (p. 7) that inventories of various Greenway resources are contained in the Greenway Plan. This Greenway Plan is incorporated into the Working Paper by reference (p. 7). As noted in the 1981 review of the Lane County plan and ordinances, the County's Greenway inventories are contained in its Greenway Technical Report, and are summarized in its Greenway Plan. This information was determined to adequately address the fifteen resource topics listed in Section B of Goal 15.

Greenway Boundary

Lane County has displayed the LCDC-approved Greenway Boundary on both its plan maps and its zoning maps, as required under sections E.1 and F.1 of the Goal. The boundary is clearly labeled and, for the most part, its location is accurately drawn. However, there are several minor inconsistencies on map Nos. 304, 304A, 305, 347, 437, and 528. The boundary is not shown on map Nos. 330, 332, 396, 411, 417, 418, 425, 440, 448, 471, 1005, 1006, 1008, 1010, 1011, 1012, and 1013.

The recently adopted Willamette Greenway Working Paper (p. 8) states that the Greenway Boundary is correctly displayed in the County's Greenway Plan and in the Eugene-Springfield Metro Area General Plan (which supercedes the 1990 Plan).

The County notes that the separate subarea plans and diagrams are being replaced by single documents for Coastal and Inland Regions. The Greenway is in the Inland Region (p. 8). The County indicates that in future documents, the LCDC-approved Greenway Boundary maps will be referenced and the Boundary will be shown on the Plan Diagram (p. 8).

Section 16.254(1)(j) of the Lane Code (the Greenway Development Ordinance) states that the boundaries for the Willamette River Greenway are those adopted by the Land Conservation and Development Commission in 1977, together with any changes when and as approved by LCDC.

Policies

Lane County has adopted 37 policies address the Willamette Greenway (Plan, pp. 33-35). These policies address all Use Management Considerations of Goal 15 (Section C.3.). Among these policies are the following:

1. Maintain and support continuation of existing uses within the Greenway Boundary.

2. Intensification and change of use of lands within the Greenway Boundary shall remain compatible with the protection, conservation and enhancement of the natural, scenic, historic, agricultural, economic and recreational qualities of the Willamette River Greenway Program.

3. Recognize that the Greenway consists of a multitude of resources and due to continued growth, 100 percent protection to all resources will never be realized.

4. Protect, conserve and preserve important economic uses such as, but not limited to agriculture, sand and gravel, tourism and recreation, fish and wildlife, urban lands and timber within the Greenway.

5. Maintain sufficient water flows to support water uses such as municipal, agricultural, industrial, natural resources (i.e., fish, aquatic life, wildlife) and recreation within the Greenway.

6. Prioritize water quality management controls along the Coast Fork and the Main Stem, especially in the Metropolitan area.

7. Acquisitions for Greenway purposes must be consistent with noninterference or interruption of farm uses.

8. Recognize that DOT cannot condemn for a scenic or use easements of lands devoted to farm use; however, easements may be given by owners of lands being used for farm purposes.

9. Protect water rights and access to the river for irrigation purposes.

10. Development shall be directed away from the river, to the greatest degree possible.

11. A setback line shall be established in order to protect, maintain, preserve and enhance the natural, scenic, historic and recreational qualities of the Greenway.

12. The partial harvest of timber shall be permitted beyond the vegetative fringes in areas not covered by a scenic easement when the harvest is consistent with an approved plan under the Forest Practices Act, or, is not covered by the FPA, then with an approved plan under the Greenway compatibility review provisions. Such a plan shall insure that the natural scenic qualities of the Greenway will be maintained to the greatest extent feasible or restored within a brief period of time.

13. Active, zoned, or designated aggregate extraction and/or processing sites shall be protected from noncompatible uses which would preclude future utilization of the resource.

14. Where feasible, point bar removal shall be accommodated by temporary access points.

15. In assessing the impact which an extraction and/or processing operation has on the natural and cultural attributes of the Greenway, the County shall require (within its realm of authority) mining methods which reduce or mitigate adverse impacts, as well as considering the economic and other benefits which will accrue in both short and long terms.

16. Aggregate operations occuring within the Greenway shall comply with the provisions of applicable state statutes and local zoning ordinances in regard to safety, operational standards, public review, reclamation and protection of Greenway values.

17. The relationship between the demand for the resource and the amount and location of land available for aggregate extraction and/or processing shall be closely monitored, so as to ensure the future availability of aggregate material in close proximity in conjunction with the industry and state and local efforts.

18. Protect vegetation resources which are identified as having unique recreational, aesthetic, scientific or wildlife habitat values. Encourage acquisition of these areas or obtain a protective scenic easement.

19. The County shall require to the maximum feasible extent the protection of the vegetative fringe within the Greenway, and shall require the re-establishment of vegetative cover where it has been significantly removed during the land development process.

20. Conserve the rural character of the river bank as a primary objective within the Greenway.

21. Encourage a river-related mixture of industrial, commercial, residential and public land uses where appropriate in the Greenway.

22. In instances where a public agency has acquired productive farmlands or other resource lands as long-range reserve for recreational use, if possible, such property should be leased back for agricultural or other resource use until it is required for public purposes.

23. Provide and encourage use of public lands within the Greenway.

24. Accommodate public access to the river and to public lands within the Greenway by:
    a. Controlled, clearly designated, access points;
    b. Establishment of an integrated system of safe river lands, hiking and cycle paths, and public roads leading in and out of the Greenway at strategic locations;
    c. Use of a limited number of access points, each with improved facilities, good roads and high-visibility connectors.

25. Provide appropriate levels of police protection in those areas subject to public use.

26. Encourage additional police security for private and publicly owned lands within the Greenway.

27. Protect, conserve or preserve the scenic and recreational qualities of the land within the Greenway Boundary.

28. Public recreation use areas shall be located in or near the more populated urban areas and shall emphasize access to the river.

29. The sensitivity of lands within the Greenway shall determine the level of human activity.

30. Recreation development shall include a variety of river-oriented opportunities in urban areas but shall be limited in rural areas to those river-oriented recreation uses that are compatible with the sensitive character of the river and other important resources.

31. Consider and minimize the possibility that public recreation use might disturb adjacent private property owners.

32. Scenic easements shall not be acquired through the exercise of the power of eminent domain on lands in farm use.

33. Control vehicle access to the river.

34. Consider and adopt policies that would not hinder the physically handicapped from using public recreation facilities within the Greenway Boundary.

35. Emphasize public access to the river in the metropolitan area and other urban areas which discouraging upland access in rural areas.

36. Measures should be taken to minimize disturbance to private property, including the implementation of programs to eliminate trespass and vandalism on private lands and destruction of ecological fragile areas.

37. Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with Sections C.3.d. and C.3.i. of the Goal. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

Mineral and Aggregate Policy 11 also addresses mineral and aggregate sites within the Greenway:

> Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with Section C.3.i. of the Goal. Major adverse effects of extraction on water quality, fish and wildlife, vegetation, bank stabilization, streamflow, scenic quality, noise, and safety are to be minimized, and such values reclaimed where possible. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

As discussed in the Goal 5 section of this report, the policy fails to reference Section C.3.d. of Goal 15 regarding the protection of significant fish and wildlife habitats. Therefore, the policy is inconsistent with Goal 15 as well as with the County's Greenway Policy 37.

Plan Designations

In the 1981 review of Lane County's Greenway element, the Commission determined that plan designations in subarea plans, the 1990 Plan, and the County Greenway Plan were inconsistent in several locations. The new Greenway Working Paper explains that subarea plans in the Greenway are

being replaced by the Inland Region document, whose Plan Diagram will show land use designation "in a manner consistent with other County and metro area plan documents" (p. 8). See the Goal 2 section of this report for further discussion regarding the County's plan designations.

Implementing Measures

Included in the Lane Code are Greenway Development Permit procedures for the review of certain land use activities in the Willamette River Greenway (Lane Code, Section 16.254). A Greenway Development Permit is required for any new intensification, change of use or development, including public improvements and partitions and subdivisions. The County's ordinance defines the terms "intensification," "change of use," and "development" consistent with definitions contained in Goal 15.

Section 16.254(2) of the Lane Code lists those uses and activities that do not require a Greenway Development Permit. All are consistent with Goal 15 except subsections (a) and (k). Subsection (a) exempts uses "where the location is within areas designated as 'urban' on Greenway maps adopted by the Oregon Land Conservation and Development Commission and is beyond 150 feet of the ordinary low waterline." As noted in the 1981 denial order for Lane County, any intensification, change of use or development in "urban" Greenway areas, as defined in Goal 15, and as designated in the ODOT Greenway Plan, is subject to local Greenway review. (Note: The term, "urban" as used in the context of Goal 15 is not the same as that used in Goal 14. In this case, "urban" refers to designations in the ODOT Greenway Plan). However, as noted in the 1981 review of the County's ordinance, there was only one area where this provision applies--just outside of the Cottage Grove UGB. The County has not requested that LCDC change the designation of this area from "urban" to "rural" nor has it deleted Section 16.254(2)(a).

Subsection 16.254(2)(k) exempts the propagation of timber or the cutting of timber for public safety or personal noncommercial use or where the harvest is consistent with an approved permit under the FPA "(i) for a farm woodlot of less than 20 acres, or (ii) consistent with recommendations made by" ODOT to the Department of Forestry, designed to address Goal 15, Sections c-h. It is acceptable to exempt timber propagation and harvest for public safety or personal noncommercial use, under Goal 15. However, subsection (i) in the second part of subsection (k) appears to be based on language in the Greenway Interim Order. Such language was eliminated in the adoption of Goal 15. Subsection (ii) of subsection (k) has no procedure for implementation, since, according to the Department of Forestry's directive for operations in the Greenway, it can make recommendations to operations regarding Greenway concerns, but cannot enforce them.

A decision to approve a Greenway Development Permit--where one is required by the Code--requires findings that the proposed intensification, change of use or development conforms to certain criteria, guidelines and setback requirements set forth in Sections 16.254(3)(a), (b), and (c), respectively. Specifically, the "criteria" in subsection (a) include the following:

(i) The development protects or enhances the existing vegetative fringe between the activity and the river. Where such protective action is shown to be impractical under the circumstances, the maximum landscaped area or open space shall be provided between the activity and the river and the development provides for the re-establishment of vegetative cover where it will be significantly removed during the process of land development.

(ii) Public access to and along the river either is not necessary or the necessary access will be provided by appropriate legal means.

(iii) A development which is mining or a mineral extraction and/or processing operation must include mining or extraction and/or processing methods which reduce or mitigate adverse impacts to the natural and cultural attributes of the Greenway.

Affirmative findings of compatibility with the Willamette River Greenway "based on due consideration and the relative importance" of guidelines must also be made. These "Guidelines" under subsection (b) are as follows:

(i) Preservation and maintenance of land designated "agricultural" in the adopted Willamette River Greenway Plan for farm use and minimize interference with the long-term capacity of lands for farm use.
(ii) Protection, conservation or preservation of significant scenic areas, viewpoints and vistas.
(iii) Protection, preservation, rehabilitation, reconstruction or restoration of significant historic and archeological resouces.
(iv) Preserve areas of annual flooding, floodplains and wetlands.
(v) Protection, conservation or preservation of areas along the alluvial bottomlands and lands with severe soil limitations from intensive development.
(vi) Consideration of the impacts from consumptive uses of water (i.e., domestic, agriculture, industrial) and nonconsumptive uses (i.e., recreation and natural resources) in efforts of maintaining sufficient flows to support water users.
(vii) Sustenance and enhancement of water quality by managing or controlling sources of water pollution from uses such as: domestic and industrial wastes, agricultural and timber runoff, septic tank seepage, gravel operations and other intermittent sources.
(viii) Maintenance and sustenance of natural riparian vegetation found upon the lower alluvial bottomlands and upper terrances bordering the river for the following reasons: provide habitat, food and shade for wildlife; protect natural areas; anchor river bank soils and protect agricultural land from seasonal erosion; ensure scenic quality and screening of uses from the river; control trespass; and to control pollution sources to the river.

(ix) Harvesting of timber in a manner that wildlife habitat, riparian and other significant vegetation and the natural scenic qualities of the Greenway will be preserved, conserved or restored and otherwise result in only the partial harvest of timber beyond the vegetative fringe.
(x) Minimize vandalism and trespass.
(xi) Location of nonwater dependent and nonwater related development away from the river.
(xii) Compatibility with the site and surrounding area.
(xiv) Protection of significant fish, wildlife habitat and natural areas.
(xv) Protection and conservation of lands designated aggregate resources within the adopted Willamette Greenway Plan.

It must be noted that compliance with these "Guidelines" is to be judged based on their "relative importance." However, there is no clear guidance as to how "relative importance" will be determined. This is particularly a problem where Goal 15 requires certain types of resources to be protected, regardless of other completing values (e.g., significant fish and wildlife habitats, agricultural lands, and identified scenic qualities and viewpoints) (Goal 15, Sections C.3.d., a., and e.). To the extent that the County's "Guidelines" do not require protection of such areas, the County's Greenway ordinance does not comply with Goal 15.

Section 16.254(c) requires new intensifications, developments and changes of use to be set back 100 feet from ordinary high waterline of the river "except for those in conjunction with a water related or water dependent use" (emphasis added). Exceptions to this requirement shall be allowed when affirmative findings are made to satisfy two criteria:

(i) The proposal would provide better protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway than would occur by observance of the setback requirment; or
(ii) The protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway are not applicable to the proposal.

It should be noted that, according to the Goal, only water-dependent and water-related intensifications, developments, or changes of use themselves are exempt from Greenway setback requirements. However, Lane County also exempts uses in conjunction with water-related and water-dependent uses. As noted in a number of other reviews, this is inconsistent with the Goal, since it would allow a number of uses to be exempt from the setback which are not envisioned by the Goal. The County's ordinances also identify two ways in which exceptions to the 100-foot setback are permitted. One of these is if a proposal would provide better protection of Greenway values, and the other is if such protection is not applicable to the proposal. The Goal does not permit exceptions to the setback, except for water-dependent and water-related uses, even if a proposal might enhance Greenway values. This is because the intent of the Goal is to keep structures separated from the river and

to protect areas immediately adjacent to the river for water-dependent and water-related uses. For example, a restaurant, including landscaping and other amenities may, in the opinion of a Hearings Officer, enhance Greenway values. However, it is not, by definition, a water-related or water-dependent use and therefore is not permitted within the established Greenway setback.

The Commission amended its administrative rule on exceptions to set forth standards for taking exceptions to the Greenway setback. These standards apply to urban areas only. The Commission did not adopt standards for taking exceptions to the setback requirement in rural areas. It should be pointed out that juridictions may structure their Greenway ordinances to permit establishment of a setback on a case-by-case basis, as long as it meets the requirements of Section C.3.k. of the Goal. Alternatively, jurisdictions may adjust established setback standards through the plan amendment process.

Conditions may be imposed in conjunction with a Greenway Development Permit, as necessary (Section 16.254(4).

Section 16.254(5) sets forth the application and review procedure by a Hearings Officer for Greenway Development Permits.

Section 16.254(6) requires the County to notify the Department of Transportation when an application is made. The ordinance does not require the County to also notify that agency of actions taken on an application. This is required by Goal 15 (Section G).

As noted in the Goal 7 section of this report, Lane County has adopted adequate flood hazard provisions.

Objections

1. The Oregon Department of Transportation (ODOT), Parks and Recreation Division, has objected to an inconsistency between the inventoried aggregate sites within the Greenway, and those which are shown on plan maps and designated Sand/Gravel. ODOT states there are a number of aggregate sites in the ODOT Greenway Plan which are not included in the County's inventory. Further, the County's plan maps show a Sand/Gravel designation for some areas which are not in the County's aggregate sites inventory, according to objectors.

2. ODOT objects because of the lack of an inventory of sites for potential acquisition within the Greenway. ODOT points out that this is required by Section E.3. of the Goal, and that the ODOT Greenway Plan identifies such areas.

3. ODOT objects because Plan Policy 7 conflicts with Goal 15. Policy 7 states that acquisitions for Greenway purposes must be consistent with non-interference or interruption of farm uses. ODOT points out that Goal 15 is intended to protect farm uses, but does not prohibit farmland acquisition for public Greenway purposes. Objectors believe Policy 7 also conflicts with Policy 24 (which encourages development of a system of river access points).

4. ODOT objects because Policy 8 and Policy 32 are inconsistent with ORS 390.334, which allows condemnation of scenic easements on farmland. Objectors recommend that the policies be deleted or amended to be consistent with that statute.

5. ODOT objects to the County's inadequate compatibility review provisions for commercial timber harvest. Objectors indicate adequate provisions are a requirement of Goal 15. Further, ODOT believes the zoning ordinance fails to carry out Policy 12.

6. ODOT objects because Policy 13 is inconsistent with Policies 2, 4, 18, 20, 21, 23, 24, 27, 29 and 37. ODOT indicates that Policy 13 appears to give the highest use protection to sites designated and zoned for sand and gravel. However, objectors state that Policy 13 does not consider Greenway river processes and values.

7. ODOT objects to Policies 28, 30 and 35 because they conflict with Policy 24. Specifically, Policies 28, 30, and 35 call for a Greenway public access program aimed at serving urban residents in urban areas, and discouraging access to the river in the more attractive rural settings with greater recreational amenities. Policy 24 calls for a system of access points and trails, which is inconsistent with Policies 28, 30 and 35, according to ODOT.

8. ODOT objects to the lack of an inventory of "significant natural and scenic areas and vegetative cover," as required in Section B, Subsection 6 of the Goal. Without such an inventory, ODOT believes Policies 2, 4, 11, 12, 18 an 27 an the zoning ordinance "cannot be carried out with consistency.

9. ODOT objects to Section 16.254(2) (Exemptions from Permits) of the County's zoning ordinance. Objectors believe it should be deleted. Specifically, subsection (k) exempts certain timber harvest operations from Greenway Development Permit requirements. ODOT believes all commercial timber harvest activities must obtain such a permit. Objectors point out that the Forest Practices Act (FPA) notification does not cover scenic, recreational or historical impacts of harvesting. The Comprehensive Plan requires ODOT to make recommendations to the Department of Forestry (DOF). However, objectors point out that DOF is not required to act on ODOT's recommendations. Objectors feel this establishes a complex and misleading enforcement process.

10. ODOT objects to the County's Greenway setback provisions because it does not believe exceptions to the 100-foot requirement should be allowed unless criteria in LCDC's Exception Rule for the Greenway are met.

Response to Objections

1. Goal 15 (Section B.2) requires Greenway jurisdictions to inventory "all current aggregate excavation and processing sites, and all known extractable aggregate sources." The Goal also requires local

plans to be consistent with the ODOT Greenway Plan, which shows the location of such sites. ODOT has not specified which aggregate sites have been omitted from the County's inventory which are included in the ODOT Greenway Plan. In the 1981 review of Lane County's plan, the Commission found the County's inventory of Greenway sites to be adequate. The County has adopted this inventory by reference as part of its new Working Paper for the Greenway. ODOT is correct that a number of sites which are not included on the County's inventory of aggregate sites have been given a sand and gravel plan and zone designation, however. As indicated in the Goal 5 section of this report, the County has not justified such designations. This is more of a Goal 5 than a Goal 15 concern, however.

2. Aquisition sites were inventoried by Lane County in its 1981 Greenway Plan. In its 1981 review of that plan, the Commission found that inventory to be in compliance with Goal 15. The County has adopted its Greenway Plan by reference as part of its new Greenway Working Paper. Therefore, the objection is not sustained.

3. ODOT is correct that the Goal does not prohibit acquisition of farmland for public Greenway purposes. However, Section C.4.b. of the Goal indicates that areas to be acquired must "to the maximum extent practicable, be consistent with non-interference or non-interruption of farm uses as defined in ORS Chapter 215.203(2)." Policy 7 indicates such acquisitions must be consistent with non-interference or non-interruption of farm uses. While Policy 7 certainly carries out the intent of Section C.4.b. of the Goal, ODOT is apparently concerned that neither the County nor ODOT would be able to acquire farmland for Greenway purposes in the future unless Policy 7 is modified to use the term "should," rather than "shall." ODOT is also concerned that because Policy 7 is so restrictive, Policy 24 cannot be carried out, since it calls for providing public access to the river and public lands through access points, establishment of river lands, hiking and cycle paths, and public roads. There is no Goal violation in County Policy 7 being more restrictive and protective of farmland than the Goal, unless this restrictiveness prevents the County from meeting other Goal requirements or carrying out other policies. While Policy 7 certainly limits the County's options (as well as ODOT's options) in implementing Greenway programs, there are other means available, short of acquiring land which results in interfering with, or interrupting farm uses. The County is therefore urged, but not directed, to modify Policy 7 to use the term, "should," rather than "shall."

4. ODOT is incorrect in its interpretation of ORS 390.334. That provision (particularly subsection (2)) expressly prohibits the use of condemnation for acquiring scenic easements on farmland in the Greenway. Therefore, County Greenway Policy 32 is consistent with ORS 390.334. The objection is not sustained.

f. Modify the definition of "wetlands" used in the Flora and Fauna Working Paper to be consistent with the definition contained in the Statewide Planning Goals.

g. Amend the Flora and Fauna Working Paper to identify the Goal 5 wetland area east of Highway 101 and south of Sutton Lake. Apply all applicable steps of the Goal 5 Rule to this site.(*)

h. Amend the ML Zone to require compliance with the Goal 5 Administrative Rule in future applications of the zone. For those sites currently zoned ML, identify the Goal 5 resources present, identify conflicting uses and ESEE consequences, and develop a program to achieve the Goal, consistent with the Goal 5 Rule.

i. Carry out Forest Lands Policy 17 (Plan, p. 10) by identifying sites that are considered more important than commercial timber management activities, based on a Goal 5 ESEE consequences analysis, and adopt appropriate implementing measures to protect and/or resolve timber management conflicts with those sites, consistent with that policy.

4. Natural Areas: Amend the Flora and Fauna Working Paper to include inventory information on the Goal 5 Darlingtonia natural area east of the City of Florence. Apply all applicable steps of the Goal 5 Rule to this site.(*)

5. Scenic Views and Sites: Inventory known scenic views and sites and apply all applicable steps of the Goal 5 Administrative Rule to those sites.

6. Historic Sites:

   a. Amend the zoning maps to show that the Historic Structures of Sites Combining Zone has been applied to all (1C) sites identified in the Working Paper, and amend the Zoning Code to make it clear that the combining zone applies to all (1C) sites.

   b. Justify deletion of sites 32, 39, and 42 from the inventory of historic sites, and amend the Historic Sites Working Paper to reflect these deletions; or apply the Historic Sites Combining Zone to those sites.

7. Oregon Recreation Trails:

   a. Amend the Recreational Resources Working Paper to provide more detailed locational information (text or maps) for all the existing trails and trail segments.

b. Adopt policies to:

(1) Cooperate with ODOT in the protection of existing trails; and

(2) Coordinate with ODOT in applying the Goal 5 Rule during any future identification, or establishment of proposed trail segments.

8. Scenic Rivers and Waterways:

a. Amend the Recreational Resources Working Paper to recognize that:

(1) Waldo Lake and the North Fork of the Middle Fork of the Willamette River to about one mile upstream from Westfir are within the designated State Scenic Waterway system; and

(2) The portions of the Alsea River, and Steamboat Creek that are on the federal potential list are also on the state list of potential scenic waterways.(*)

b. Amend Open Space and Scenic Areas Policy 5 (p. 17) to also indicate that the County will coordinate with appropriate state and federal agencies in applying all applicable steps of the Goal 5 Administrative Rule in studying rivers for possible designation and in actually selecting wild and scenic rivers for designation.(*)

9. Adopt implementing measures to resolve conflicting uses for the area known as Russel Creek Basin, based on the ESEE consequences analysis and conflict-resolution recommendations contained in the Metro Plan Update Working Paper.

Note: Those IOTC's which pertain only to Lane County are followed by an asterisk (*).

Suggestions for Plan and Implementing Measures Improvement

It is suggested that on or before the first plan update, Lane County:

1. Amend the plan to inventory the recently designated wilderness areas (Rock Creek, Cummins Creek, Three Sisters Additions, Diamond Peak Additions, and Waldo Lake).

2. Amend page 28 of the Flora and Fauna Working Paper to indicate that not all sites on federal land are necessarily protected (i.e., there may be conflicts with sites unless they are formally protected by the federal resource agency).

3. Amend Flora and Fauna Policy 7 to indicate that in evaluating (1B) wetland sites for possible inclusion on its (1C) inventory, information sources besides the National Wetlands Inventory will be used.

4. Adopt implementing measures to carry out Flora and Fauna Policy 9 (requiring residential building permits in Big Game Range areas to include a note indicating that the site is in Big Game Range and conflicts may occur).

GOAL 15: WILLAMETTE RIVER GREENWAY

This Goal 15 report is divided into two major parts. The first part is the review for all areas within the Willamette Greenway Boundary in Lane County outside the Metro Plan Boundary. The second part is for those Greenway areas inside the Metro Plan Boundary, but outside the Metro UGB.

PART I--GREENWAY AREAS
OUTSIDE THE METRO PLAN BOUNDARY

Inventory

Lane County has adopted a Willamette Greenway Working Paper which states (p. 7) that inventories of various Greenway resources are contained in the Greenway Plan. This Greenway Plan is incorporated into the Working Paper by reference (p. 7). As noted in the 1981 review of the Lane County plan and ordinances, the County's Greenway inventories are contained in its Greenway Technical Report, and are summarized in its Greenway Plan. This information was determined to adequately address the fifteen resource topics listed in Section B of Goal 15.

Greenway Boundary

Lane County has displayed the LCDC-approved Greenway Boundary on both its plan maps and its zoning maps, as required under sections E.1 and F.1 of the Goal. The boundary is clearly labeled and, for the most part, its location is accurately drawn. However, there are several minor inconsistencies on map Nos. 304, 304A, 305, 347, 437, and 528. The boundary is not shown on map Nos. 330, 332, 396, 411, 417, 418, 425, 440, 448, 471, 1005, 1006, 1008, 1010, 1011, 1012, and 1013.

The recently adopted Willamette Greenway Working Paper (p. 8) states that the Greenway Boundary is correctly displayed in the County's Greenway Plan and in the Eugene-Springfield Metro Area General Plan (which supercedes the 1990 Plan).

The County notes that the separate subarea plans and diagrams are being replaced by single documents for Coastal and Inland Regions. The Greenway is in the Inland Region (p. 8). The County indicates that in future documents, the LCDC-approved Greenway Boundary maps will be referenced and the Boundary will be shown on the Plan Diagram (p. 8).

Section 16.254(1)(j) of the Lane Code (the Greenway Development Ordinance) states that the boundaries for the Willamette River Greenway are those adopted by the Land Conservation and Development Commission in 1977, together with any changes when and as approved by LCDC.

Policies

Lane County has adopted 37 policies address the Willamette Greenway (Plan, pp. 33-35). These policies address all Use Management Considerations of Goal 15 (Section C.3.). Among these policies are the following:

1. Maintain and support continuation of existing uses within the Greenway Boundary.

2. Intensification and change of use of lands within the Greenway Boundary shall remain compatible with the protection, conservation and enhancement of the natural, scenic, historic, agricultural, economic and recreational qualities of the Willamette River Greenway Program.

3. Recognize that the Greenway consists of a multitude of resources and due to continued growth, 100 percent protection to all resources will never be realized.

4. Protect, conserve and preserve important economic uses such as, but not limited to agriculture, sand and gravel, tourism and recreation, fish and wildlife, urban lands and timber within the Greenway.

5. Maintain sufficient water flows to support water uses such as municipal, agricultural, industrial, natural resources (i.e., fish, aquatic life, wildlife) and recreation within the Greenway.

6. Prioritize water quality management controls along the Coast Fork and the Main Stem, especially in the Metropolitan area.

7. Acquisitions for Greenway purposes must be consistent with noninterference or interruption of farm uses.

8. Recognize that DOT cannot condemn for a scenic or use easements of lands devoted to farm use; however, easements may be given by owners of lands being used for farm purposes.

9. Protect water rights and access to the river for irrigation purposes.

10. Development shall be directed away from the river, to the greatest degree possible.

11. A setback line shall be established in order to protect, maintain, preserve and enhance the natural, scenic, historic and recreational qualities of the Greenway.

12. The partial harvest of timber shall be permitted beyond the vegetative fringes in areas not covered by a scenic easement when the harvest is consistent with an approved plan under the Forest Practices Act, or, is not covered by the FPA, then with an approved plan under the Greenway compatibility review provisions. Such a plan shall insure that the natural scenic qualities of the Greenway will be maintained to the greatest extent feasible or restored within a brief period of time.

13. Active, zoned, or designated aggregate extraction and/or processing sites shall be protected from noncompatible uses which would preclude future utilization of the resource.

14. Where feasible, point bar removal shall be accommodated by temporary access points.

15. In assessing the impact which an extraction and/or processing operation has on the natural and cultural attributes of the Greenway, the County shall require (within its realm of authority) mining methods which reduce or mitigate adverse impacts, as well as considering the economic and other benefits which will accrue in both short and long terms.

16. Aggregate operations occuring within the Greenway shall comply with the provisions of applicable state statutes and local zoning ordinances in regard to safety, operational standards, public review, reclamation and protection of Greenway values.

17. The relationship between the demand for the resource and the amount and location of land available for aggregate extraction and/or processing shall be closely monitored, so as to ensure the future availability of aggregate material in close proximity in conjunction with the industry and state and local efforts.

18. Protect vegetation resources which are identified as having unique recreational, aesthetic, scientific or wildlife habitat values. Encourage acquisition of these areas or obtain a protective scenic easement.

19. The County shall require to the maximum feasible extent the protection of the vegetative fringe within the Greenway, and shall require the re-establishment of vegetative cover where it has been significantly removed during the land development process.

20. Conserve the rural character of the river bank as a primary objective within the Greenway.

21. Encourage a river-related mixture of industrial, commercial, residential and public land uses where appropriate in the Greenway.

22. In instances where a public agency has acquired productive farmlands or other resource lands as long-range reserve for recreational use, if possible, such property should be leased back for agricultural or other resource use until it is required for public purposes.

23. Provide and encourage use of public lands within the Greenway.

24. Accommodate public access to the river and to public lands within the Greenway by:
    a. Controlled, clearly designated, access points;
    b. Establishment of an integrated system of safe river lands, hiking and cycle paths, and public roads leading in and out of the Greenway at strategic locations;
    c. Use of a limited number of access points, each with improved facilities, good roads and high-visibility connectors.

25. Provide appropriate levels of police protection in those areas subject to public use.

26. Encourage additional police security for private and publicly owned lands within the Greenway.

27. Protect, conserve or preserve the scenic and recreational qualities of the land within the Greenway Boundary.

28. Public recreation use areas shall be located in or near the more populated urban areas and shall emphasize access to the river.

29. The sensitivity of lands within the Greenway shall determine the level of human activity.

30. Recreation development shall include a variety of river-oriented opportunities in urban areas but shall be limited in rural areas to those river-oriented recreation uses that are compatible with the sensitive character of the river and other important resources.

31. Consider and minimize the possibility that public recreation use might disturb adjacent private property owners.

32. Scenic easements shall not be acquired through the exercise of the power of eminent domain on lands in farm use.

33. Control vehicle access to the river.

34. Consider and adopt policies that would not hinder the physically handicapped from using public recreation facilities within the Greenway Boundary.

35. Emphasize public access to the river in the metropolitan area and other urban areas which discouraging upland access in rural areas.

36. Measures should be taken to minimize disturbance to private property, including the implementation of programs to eliminate trespass and vandalism on private lands and destruction of ecological fragile areas.

37. Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with Sections C.3.d. and C.3.i. of the Goal. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

Mineral and Aggregate Policy 11 also addresses mineral and aggregate sites within the Greenway:

> Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with Section C.3.i. of the Goal. Major adverse effects of extraction on water quality, fish and wildlife, vegetation, bank stabilization, streamflow, scenic quality, noise, and safety are to be minimized, and such values reclaimed where possible. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

As discussed in the Goal 5 section of this report, the policy fails to reference Section C.3.d. of Goal 15 regarding the protection of significant fish and wildlife habitats. Therefore, the policy is inconsistent with Goal 15 as well as with the County's Greenway Policy 37.

Plan Designations

In the 1981 review of Lane County's Greenway element, the Commission determined that plan designations in subarea plans, the 1990 Plan, and the County Greenway Plan were inconsistent in several locations. The new Greenway Working Paper explains that subarea plans in the Greenway are

being replaced by the Inland Region document, whose Plan Diagram will show land use designation "in a manner consistent with other County and metro area plan documents" (p. 8). See the Goal 2 section of this report for further discussion regarding the County's plan designations.

Implementing Measures

Included in the Lane Code are Greenway Development Permit procedures for the review of certain land use activities in the Willamette River Greenway (Lane Code, Section 16.254). A Greenway Development Permit is required for any new intensification, change of use or development, including public improvements and partitions and subdivisions. The County's ordinance defines the terms "intensification," "change of use," and "development" consistent with definitions contained in Goal 15.

Section 16.254(2) of the Lane Code lists those uses and activities that do not require a Greenway Development Permit. All are consistent with Goal 15 except subsections (a) and (k). Subsection (a) exempts uses "where the location is within areas designated as 'urban' on Greenway maps adopted by the Oregon Land Conservation and Development Commission and is beyond 150 feet of the ordinary low waterline." As noted in the 1981 denial order for Lane County, any intensification, change of use or development in "urban" Greenway areas, as defined in Goal 15, and as designated in the ODOT Greenway Plan, is subject to local Greenway review. (Note: The term, "urban" as used in the context of Goal 15 is not the same as that used in Goal 14. In this case, "urban" refers to designations in the ODOT Greenway Plan). However, as noted in the 1981 review of the County's ordinance, there was only one area where this provision applies--just outside of the Cottage Grove UGB. The County has not requested that LCDC change the designation of this area from "urban" to "rural" nor has it deleted Section 16.254(2)(a).

Subsection 16.254(2)(k) exempts the propagation of timber or the cutting of timber for public safety or personal noncommercial use or where the harvest is consistent with an approved permit under the FPA "(i) for a farm woodlot of less than 20 acres, or (ii) consistent with recommendations made by" ODOT to the Department of Forestry, designed to address Goal 15, Sections c-h. It is acceptable to exempt timber propagation and harvest for public safety or personal noncommercial use, under Goal 15. However, subsection (i) in the second part of subsection (k) appears to be based on language in the Greenway Interim Order. Such language was eliminated in the adoption of Goal 15. Subsection (ii) of subsection (k) has no procedure for implementation, since, according to the Department of Forestry's directive for operations in the Greenway, it can make recommendations to operations regarding Greenway concerns, but cannot enforce them.

A decision to approve a Greenway Development Permit--where one is required by the Code--requires findings that the proposed intensification, change of use or development conforms to certain criteria, guidelines and setback requirements set forth in Sections 16.254(3)(a), (b), and (c), respectively. Specifically, the "criteria" in subsection (a) include the following:

(i) The development protects or enhances the existing vegetative fringe between the activity and the river. Where such protective action is shown to be impractical under the circumstances, the maximum landscaped area or open space shall be provided between the activity and the river and the development provides for the re-establishment of vegetative cover where it will be significantly removed during the process of land development.

(ii) Public access to and along the river either is not necessary or the necessary access will be provided by appropriate legal means.

(iii) A development which is mining or a mineral extraction and/or processing operation must include mining or extraction and/or processing methods which reduce or mitigate adverse impacts to the natural and cultural attributes of the Greenway.

Affirmative findings of compatibility with the Willamette River Greenway "based on due consideration and the relative importance" of guidelines must also be made. These "Guidelines" under subsection (b) are as follows:

(i) Preservation and maintenance of land designated "agricultural" in the adopted Willamette River Greenway Plan for farm use and minimize interference with the long-term capacity of lands for farm use.
(ii) Protection, conservation or preservation of significant scenic areas, viewpoints and vistas.
(iii) Protection, preservation, rehabilitation, reconstruction or restoration of significant historic and archeological resouces.
(iv) Preserve areas of annual flooding, floodplains and wetlands.
(v) Protection, conservation or preservation of areas along the alluvial bottomlands and lands with severe soil limitations from intensive development.
(vi) Consideration of the impacts from consumptive uses of water (i.e., domestic, agriculture, industrial) and nonconsumptive uses (i.e., recreation and natural resources) in efforts of maintaining sufficient flows to support water users.
(vii) Sustenance and enhancement of water quality by managing or controlling sources of water pollution from uses such as: domestic and industrial wastes, agricultural and timber runoff, septic tank seepage, gravel operations and other intermittent sources.
(viii) Maintenance and sustenance of natural riparian vegetation found upon the lower alluvial bottomlands and upper terrances bordering the river for the following reasons: provide habitat, food and shade for wildlife; protect natural areas; anchor river bank soils and protect agricultural land from seasonal erosion; ensure scenic quality and screening of uses from the river; control trespass; and to control pollution sources to the river.

(ix) Harvesting of timber in a manner that wildlife habitat, riparian and other significant vegetation and the natural scenic qualities of the Greenway will be preserved, conserved or restored and otherwise result in only the partial harvest of timber beyond the vegetative fringe.
(x) Minimize vandalism and trespass.
(xi) Location of nonwater dependent and nonwater related development away from the river.
(xii) Compatibility with the site and surrounding area.
(xiv) Protection of significant fish, wildlife habitat and natural areas.
(xv) Protection and conservation of lands designated aggregate resources within the adopted Willamette Greenway Plan.

It must be noted that compliance with these "Guidelines" is to be judged based on their "relative importance." However, there is no clear guidance as to how "relative importance" will be determined. This is particularly a problem where Goal 15 requires certain types of resources to be protected, regardless of other completing values (e.g., significant fish and wildlife habitats, agricultural lands, and identified scenic qualities and viewpoints) (Goal 15, Sections C.3.d., a., and e.). To the extent that the County's "Guidelines" do not require protection of such areas, the County's Greenway ordinance does not comply with Goal 15.

Section 16.254(c) requires new intensifications, developments and changes of use to be set back 100 feet from ordinary high waterline of the river "except for those in conjunction with a water related or water dependent use" (emphasis added). Exceptions to this requirement shall be allowed when affirmative findings are made to satisfy two criteria:

(i) The proposal would provide better protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway than would occur by observance of the setback requirment; or
(ii) The protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway are not applicable to the proposal.

It should be noted that, according to the Goal, only water-dependent and water-related intensifications, developments, or changes of use themselves are exempt from Greenway setback requirements. However, Lane County also exempts uses in conjunction with water-related and water-dependent uses. As noted in a number of other reviews, this is inconsistent with the Goal, since it would allow a number of uses to be exempt from the setback which are not envisioned by the Goal. The County's ordinances also identify two ways in which exceptions to the 100-foot setback are permitted. One of these is if a proposal would provide better protection of Greenway values, and the other is if such protection is not applicable to the proposal. The Goal does not permit exceptions to the setback, except for water-dependent and water-related uses, even if a proposal might enhance Greenway values. This is because the intent of the Goal is to keep structures separated from the river and

to protect areas immediately adjacent to the river for water-dependent and water-related uses. For example, a restaurant, including landscaping and other amenities may, in the opinion of a Hearings Officer, enhance Greenway values. However, it is not, by definition, a water-related or water-dependent use and therefore is not permitted within the established Greenway setback.

The Commission amended its administrative rule on exceptions to set forth standards for taking exceptions to the Greenway setback. These standards apply to urban areas only. The Commission did not adopt standards for taking exceptions to the setback requirement in rural areas. It should be pointed out that juridictions may structure their Greenway ordinances to permit establishment of a setback on a case-by-case basis, as long as it meets the requirements of Section C.3.k. of the Goal. Alternatively, jurisdictions may adjust established setback standards through the plan amendment process.

Conditions may be imposed in conjunction with a Greenway Development Permit, as necessary (Section 16.254(4).

Section 16.254(5) sets forth the application and review procedure by a Hearings Officer for Greenway Development Permits.

Section 16.254(6) requires the County to notify the Department of Transportation when an application is made. The ordinance does not require the County to also notify that agency of actions taken on an application. This is required by Goal 15 (Section G).

As noted in the Goal 7 section of this report, Lane County has adopted adequate flood hazard provisions.

Objections

1. The Oregon Department of Transportation (ODOT), Parks and Recreation Division, has objected to an inconsistency between the inventoried aggregate sites within the Greenway, and those which are shown on plan maps and designated Sand/Gravel. ODOT states there are a number of aggregate sites in the ODOT Greenway Plan which are not included in the County's inventory. Further, the County's plan maps show a Sand/Gravel designation for some areas which are not in the County's aggregate sites inventory, according to objectors.

2. ODOT objects because of the lack of an inventory of sites for potential acquisition within the Greenway. ODOT points out that this is required by Section E.3. of the Goal, and that the ODOT Greenway Plan identifies such areas.

3. ODOT objects because Plan Policy 7 conflicts with Goal 15. Policy 7 states that acquisitions for Greenway purposes must be consistent with non-interference or interruption of farm uses. ODOT points out that Goal 15 is intended to protect farm uses, but does not prohibit farmland acquisition for public Greenway purposes. Objectors believe Policy 7 also conflicts with Policy 24 (which encourages development of a system of river access points).

4. ODOT objects because Policy 8 and Policy 32 are inconsistent with ORS 390.334, which allows condemnation of scenic easements on farmland. Objectors recommend that the policies be deleted or amended to be consistent with that statute.

5. ODOT objects to the County's inadequate compatibility review provisions for commercial timber harvest. Objectors indicate adequate provisions are a requirement of Goal 15. Further, ODOT believes the zoning ordinance fails to carry out Policy 12.

6. ODOT objects because Policy 13 is inconsistent with Policies 2, 4, 18, 20, 21, 23, 24, 27, 29 and 37. ODOT indicates that Policy 13 appears to give the highest use protection to sites designated and zoned for sand and gravel. However, objectors state that Policy 13 does not consider Greenway river processes and values.

7. ODOT objects to Policies 28, 30 and 35 because they conflict with Policy 24. Specifically, Policies 28, 30, and 35 call for a Greenway public access program aimed at serving urban residents in urban areas, and discouraging access to the river in the more attractive rural settings with greater recreational amenities. Policy 24 calls for a system of access points and trails, which is inconsistent with Policies 28, 30 and 35, according to ODOT.

8. ODOT objects to the lack of an inventory of "significant natural and scenic areas and vegetative cover," as required in Section B, Subsection 6 of the Goal. Without such an inventory, ODOT believes Policies 2, 4, 11, 12, 18 an 27 an the zoning ordinance "cannot be carried out with consistency.

9. ODOT objects to Section 16.254(2) (Exemptions from Permits) of the County's zoning ordinance. Objectors believe it should be deleted. Specifically, subsection (k) exempts certain timber harvest operations from Greenway Development Permit requirements. ODOT believes all commercial timber harvest activities must obtain such a permit. Objectors point out that the Forest Practices Act (FPA) notification does not cover scenic, recreational or historical impacts of harvesting. The Comprehensive Plan requires ODOT to make recommendations to the Department of Forestry (DOF). However, objectors point out that DOF is not required to act on ODOT's recommendations. Objectors feel this establishes a complex and misleading enforcement process.

10. ODOT objects to the County's Greenway setback provisions because it does not believe exceptions to the 100-foot requirement should be allowed unless criteria in LCDC's Exception Rule for the Greenway are met.

Response to Objections

1. Goal 15 (Section B.2) requires Greenway jurisdictions to inventory "all current aggregate excavation and processing sites, and all known extractable aggregate sources." The Goal also requires local

plans to be consistent with the ODOT Greenway Plan, which shows the location of such sites. ODOT has not specified which aggregate sites have been omitted from the County's inventory which are included in the ODOT Greenway Plan. In the 1981 review of Lane County's plan, the Commission found the County's inventory of Greenway sites to be adequate. The County has adopted this inventory by reference as part of its new Working Paper for the Greenway. ODOT is correct that a number of sites which are not included on the County's inventory of aggregate sites have been given a sand and gravel plan and zone designation, however. As indicated in the Goal 5 section of this report, the County has not justified such designations. This is more of a Goal 5 than a Goal 15 concern, however.

2. Aquisition sites were inventoried by Lane County in its 1981 Greenway Plan. In its 1981 review of that plan, the Commission found that inventory to be in compliance with Goal 15. The County has adopted its Greenway Plan by reference as part of its new Greenway Working Paper. Therefore, the objection is not sustained.

3. ODOT is correct that the Goal does not prohibit acquisition of farmland for public Greenway purposes. However, Section C.4.b. of the Goal indicates that areas to be acquired must "to the maximum extent practicable, be consistent with non-interference or non-interruption of farm uses as defined in ORS Chapter 215.203(2)." Policy 7 indicates such acquisitions must be consistent with non-interference or non-interruption of farm uses. While Policy 7 certainly carries out the intent of Section C.4.b. of the Goal, ODOT is apparently concerned that neither the County nor ODOT would be able to acquire farmland for Greenway purposes in the future unless Policy 7 is modified to use the term "should," rather than "shall." ODOT is also concerned that because Policy 7 is so restrictive, Policy 24 cannot be carried out, since it calls for providing public access to the river and public lands through access points, establishment of river lands, hiking and cycle paths, and public roads. There is no Goal violation in County Policy 7 being more restrictive and protective of farmland than the Goal, unless this restrictiveness prevents the County from meeting other Goal requirements or carrying out other policies. While Policy 7 certainly limits the County's options (as well as ODOT's options) in implementing Greenway programs, there are other means available, short of acquiring land which results in interfering with, or interrupting farm uses. The County is therefore urged, but not directed, to modify Policy 7 to use the term, "should," rather than "shall."

4. ODOT is incorrect in its interpretation of ORS 390.334. That provision (particularly subsection (2)) expressly prohibits the use of condemnation for acquiring scenic easements on farmland in the Greenway. Therefore, County Greenway Policy 32 is consistent with ORS 390.334. The objection is not sustained.

5. Lane County's Greenway Policy 12 states:

> The partial harvest of timber shall be permitted beyond the vegetative fringes in areas not covered by a scenic easement when the harvest is consistent with an approved plan under the Forest Practices Act, or if not covered by the FPA, then with an approved plan under the Greenway compatibility review provisons. Such a plan shall insure that the natural scenic qualities of the Greenway will be maintained to the greatest extent feasible or restored within a brief period of time.

This above policy language repeats language in Goal 15, Section C.3.1. Section 16.254(3)(ix) of the Lane Code specifies that affirmative findings must be made, including "Harvesting of timber in a manner that wildlife habitat, riparian and other significant vegetation and the natural scenic qualities of the Greenway will be preserved, conserved, or restored and otherwise result in only the partial harvest of timber beyond the vegative fringe." This is consistent with Goal 15. However, Section 16.254(2)(k) of the ordinance specifically exempts certain harvest activities, not consistent with the Goal. These problems are addressed in the response to ODOT's objection 9.

6. Greenway Policy 13 states:

> Active, zoned, or designated aggregate extraction and/or processing sites shall be protected from noncompatible uses which would preclude future utilization of the resources.

Policies 2, 4, 18, 20, 21, 23, 24, 27, 29, and 37 are aimed at preserving other values in the Greenway (e.g., vegetation, fish and wildlife habitat, scenic qualities, recreational opportunities), and where appropriate, balancing such uses with the need for sand and gravel resources. Policy 13 in and of itself would not preclude protection of other Greenway values present. Presumably, the County's Greenway ordinance should ensure that extraction will not occur unless adequate safeguards for other resources are provided. Policy 13 simply indicates that uses that are incompatible with extraction activities will not be permitted on sites that are either active, zoned, or designated for aggregate extraction or processing. This policy presumes that the plan and zone designations for aggregate extraction and processing have been applied appropriately. However, even if the plan and zone designations are applied correctly, the policy does seem to ignore the fact that such operations can be allowed only if they are conducted in a manner consistent with the Goal's intent of protecting natural, scenic, historic, and recreational values. Other plan policies for the Greenway do express this, however (e.g., Policies 2, 3, 4, 15, 16, and 37). Therefore, the objection is not sustained. However, it is recommended that the policy be clarified to indicate that such operations are still subject to local Greenway Permit review or must be conducted in a manner consistent with the protection of other Greenway values.

5. Lane County's Greenway Policy 12 states:

> The partial harvest of timber shall be permitted beyond the vegetative fringes in areas not covered by a scenic easement when the harvest is consistent with an approved plan under the Forest Practices Act, or if not covered by the FPA, then with an approved plan under the Greenway compatibility review provisons. Such a plan shall insure that the natural scenic qualities of the Greenway will be maintained to the greatest extent feasible or restored within a brief period of time.

This above policy language repeats language in Goal 15, Section C.3.1. Section 16.254(3)(ix) of the Lane Code specifies that affirmative findings must be made, including "Harvesting of timber in a manner that wildlife habitat, riparian and other significant vegetation and the natural scenic qualities of the Greenway will be preserved, conserved, or restored and otherwise result in only the partial harvest of timber beyond the vegative fringe." This is consistent with Goal 15. However, Section 16.254(2)(k) of the ordinance specifically exempts certain harvest activities, not consistent with the Goal. These problems are addressed in the response to ODOT's objection 9.

6. Greenway Policy 13 states:

> Active, zoned, or designated aggregate extraction and/or processing sites shall be protected from noncompatible uses which would preclude future utilization of the resources.

Policies 2, 4, 18, 20, 21, 23, 24, 27, 29, and 37 are aimed at preserving other values in the Greenway (e.g., vegetation, fish and wildlife habitat, scenic qualities, recreational opportunities), and where appropriate, balancing such uses with the need for sand and gravel resources. Policy 13 in and of itself would not preclude protection of other Greenway values present. Presumably, the County's Greenway ordinance should ensure that extraction will not occur unless adequate safeguards for other resources are provided. Policy 13 simply indicates that uses that are incompatible with extraction activities will not be permitted on sites that are either active, zoned, or designated for aggregate extraction or processing. This policy presumes that the plan and zone designations for aggregate extraction and processing have been applied appropriately. However, even if the plan and zone designations are applied correctly, the policy does seem to ignore the fact that such operations can be allowed only if they are conducted in a manner consistent with the Goal's intent of protecting natural, scenic, historic, and recreational values. Other plan policies for the Greenway do express this, however (e.g., Policies 2, 3, 4, 15, 16, and 37). Therefore, the objection is not sustained. However, it is recommended that the policy be clarified to indicate that such operations are still subject to local Greenway Permit review or must be conducted in a manner consistent with the protection of other Greenway values.

7. Policy 24 states:

> Accommodate public access to the river and to public lands within the Greenway by:
> a. Controlled, clearly designated, access points;
> b. Establishment of an integrated system of safe river landings, hiking and cycle paths, and public roads leading in and out of the Greenway at strategic locations;
> c. Use of a limited number of access points, each with improved facilities, good roads and high-visibility connectors.

Policies 28, 30, and 35 are:

> Public recreation use areas shall be located in or near the more populated urban areas and shall emphasize access to the river.
>
> Recreation development shall include a variety of river-oriented opportunities in urban areas but shall be limited in rural areas to those river-oriented recreation uses that are compatible with the sensitive character of the river and other important resources.
>
> Emphasize public access to the river in the metropolitan area and other urban areas while discouraging upland access in rural areas.

Section C.3.b. of Goal 15 indicates that recreational needs must be provided for, but must be consistent with the carrying capacity of the land, must not substantially interfere with the long-term capacity of the land for farm use, and must minimize disturbance to adjacent property. Section C.3.c. of Goal 15 indicates that adequate public access to the river shall be provided for, with emphasis on urban and urbanizable uses. County Policies 24, 28, 30, and 35 are consistent with these Goal directives. The objection is not sustained.

8. As indicated earlier, the County's inventory of Greenway values and resources is the same as the one submitted and reviewed in 1981. The Commission found the inventory to be adequate.

9. ODOT is in error in requesting that the entirety of Section 16.254(2) be deleted from the Greenway ordinance. The Goal 15 definitions of "intensification," "change of use" and "development" specify certain uses and activities that may be exempt from local Greenway permit review. Most of Lane County's exemptions are consistent with the Goal and are similar to those exempted by other Greenway jurisdictions whose plans and ordinances have been acknowledged by the Commission.

ODOT is correct, however, that subsection (k), which exempts certain kinds of timber harvest activities, is inappropriate. That subsection is consistent with the Greenway Interim Order, but the Goal itself does not exempt such activities from local Greenway review. It has been the Commission's practice to allow propagation of timber or cutting of timber for public safety or personal non-commercial use to be exempt from local Greenway permit review. To that extent, the first part of subsection (k) is acceptable. However, the second part (which exempts harvest activities if consistent with an approved permit under the FPA, for a farm woodlot less than 20 acres, or if consistent with recommendations of ODOT to DOF), is not. Therefore the objection is only partly sustained.

10. ODOT is correct that the County's Greenway setback exceptions are not consistent with the Goal. However, ODOT is not correct in suggesting that the LCDC Exception Rule be followed to allow such exceptions. This is because the Commission's Exception Rule contains criteria for taking exceptions to the Greenway setback requirement in urban areas only. Therefore, they do not apply to most of the Lane County planning area.

PART II--EUGENE/SPRINGFIELD METROPOLITAN AREA OUTSIDE THE METRO UGB

In August 1982, the Commission reviewed and acknowledged the Eugene/Springfield Metro Area Plan for lands within the Metro UGB. However, the cities of Eugene and Springfield as well as Lane County were granted a continuance for lands within the UGB but within the Metro Planning Area Boundary in order to comply with Goal 15 (as well as several other Goals).

The following section of this report analyzes Lane County's responses to the Goal 15 'in-order-to-comply" requirements contained in the August 1982 staff report, adopted by the Commission.

Requirement

1. Ensure that the LCDC-approved Greenway Boundary is shown or referenced in the appropriate subarea plans.

Response

As noted in Part I of this report, the County is replacing subarea plans with two documents--one for the Coastal region and one for the Inland Region. The Greenway is within the Inland Region. The County indicates in its Greenway Working Paper (p. 8) that the LCDC-approved Greenway boundary will be referenced in that document and the Boundary will be shown on the Plan Diagram. Please refer to Part I of this Goal 15 report for a discussion of the County's plan and zone maps and the extent to which they correctly display the Greenway Boundary.

Mining and processing activities in the Greenway must comply with provisions in the County's Greenway ordinance, including the following:

> A development which is mining or mineral extraction and/or processing operation must include mining or extraction and/or processing methods which reduce or mitigate adverse impacts to the natural and cultural attributes of the Greenway (Section 16.254(3)(a)(iii)).

In addition, affirmative findings of compatibility must be made with regard to a number of "Guidelines," including those addressing the protection of scenic and historic resources, areas of flooding and wetlands, the protection and enhancement of water quality, maintenance of natural riparian vegetation, erosion, protection of significant fish and wildlife habitat and natural areas, and compatibility with the site and the surrounding area (Section 16.254(3)(b)).

At the same time, Guideline (xv) calls for protection and conservation of lands designated aggregate resources within the adopted Willamette Greenway Plan. However, Section 16.254(3)(b)(i) through (xv) are "Guidelines" and compliance with them is to be judged according to their "relative importance." To this intent, the County does not have a clear procedure for assuring protection of significant fish and wildlife habitat areas within the Greenway on sites that also have sand and gravel resources. This is most evident in two particular areas--the Confluence Heronry and the Pudding Creek Heronry. Both have unquestionably significant wildlife resources present, and both contain significant aggregate resources. Application of plan policies, the Greenway ordinance, and various other zones does not result in clear policy direction for these sites. In that respect, the conflicts between these various resource uses have not been resolved.

Conclusion

Requirement 8 has not been satisfied.

Lane County has not adopted satisfactory procedures for carrying out Requirements C.3.d. and C.3.i. of Goal 15.

Requirement

9. Amend the Metro Area General Plan or the Lane County Willamette Greenway Plan to assure that land use designations are consistent.

Response

A new Metro Area General Plan Map was submitted as part of the 1982 Metro Plan review. It corrects the inconsistencies identified in 1981.

Response

The County has adopted the following Greenway policies regarding sand and gravel extraction and significant fish and wildlife habitats (Plan, pp. 33-35):

4. Protect, conserve, and preserve important economic uses such as, but not limited to agriculture, sand and gravel, tourism and recreation, fish and wildlife, urban lands, and timber within the Greenway.

13. Active, zoned, or designated aggregate extraction and/or processing sites shall be protected from noncompatible uses which would preclude future utilization of the resource.

14. Where feasible, point bar removal shall be accommodated by temporary access points.

15. In assessing the impact which an extraction and/or processing operation has on the natural and cultural attributes of the Greenway, the County shall require (within its realm of authority) mining methods which reduce or mitigate adverse impacts, as well as considering the economic and other benefits which will accrue in both short and long terms.

16. Aggregate operations occurring within the Greenway shall comply with the provisions of applicable state statutes and local zoning ordinances in regard to safety, operational standards, public review, reclamation and protection of Greenway values.

17. The relationship between the demand for the resource and the amount and location of land available for aggregate extraction and/or processing shall be closely monitored, so as to ensure the future availability of aggregate material in close proximity to urban areas and other points of use. Such monitoring shall be conducted in conjunction with the industry and state and local efforts.

18. Protect vegetation resources which are identified as having unique recreational, aesthetic, scientific or wildlife habitat values. Encourage acquisition of these areas or obtain a protective scenic easement.

37. Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with sections C.3.d. and C.d.i. of the Goal. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

Conclusion

Requirement 4 has been satisfied.

Lane County has adopted "shall" policies regarding sand and gravel extraction and significant fish and wildlife habitats in the Greenway. However, as noted in Part I of the Goal 15 section of this report, as well as in several of the following sections, not all of them have been implemented consistent with Goal 15.

Requirement

5. Adopt policies that address Sections C.3.h., j., and k. of Goal 15 (regarding timber resources, development away from the river, and Greenway setback).

Response

The following Greenway policies have been adopted by Lane County (Plan, pp. 33-35):

10. Development shall be directed away from the river, to the greatest degree possible.

11. A setback line shall be established in order to protect, maintain, preserve and enhance the natural, scenic, historic and recreational qualities of the Greenway.

12. The partial harvest of timber shall be permitted beyond the vegetative fringes in areas not covered by a scenic easement when the harvest is consistent with an approved plan under the Forest Practices Act, or, it not covered by the FPA, then with an approved plan under the Greenway compatibility review provisions. Such a plan shall insure that the natural scenic qualities of the Greenway will be maintained to the greatest extent feasible or restored within a brief period of time.

Conclusion

Requirement 5 has been satisfied.

Lane County has adopted Greenway policies that adequately address Sections C.3.h., j., and k. of the Goal.

Requirement

6. Amend Section 10.322 of the Lane Code to require either:

a. Greenway permits in areas designated "urban" beyond 150 feet of ordinary low water.

b. Some other mechanism which ensures protection of Greenway values in "urban" areas beyond 150 feet of ordinary low water.

This could also be accomplished by LCDC amendment of the DOT Greenway Plan to change the designation of the area south of the Cottage Grove UGB from "urban" to "rural."

Response

As indicated in the 1981 denial of the County's Greenway ordinance, any intensification, change of use or development in "urban" Greenway areas, as defined in Goal 15 and designated in the ODOT Greenway Plan, must either be reviewed locally according to Greenway Permit review procedurs or must comply with other measures designed to ensure protection of Greenway values. (Note: The term "urban" as used in the context of Goal 15 is not equivalent to "urban" as used in Goal 14, or to areas within UGB's. In this case, "urban" refers to designations in the ODOT Greenway Plan. In Lane County, there is land outside the Cottage Grove UGB which has an "urban" designation in the ODOT Greenway Plan.)

The County's Greenway Working Paper recommends requesting that the "urban"/"rural" boundary line be relocated to coincide with the adopted UGB of Cottage Grove (p. 10). However, neither the County nor ODOT have reguested LCDC change this designation.

As noted in the Metro Area Acknowledgment Report, approved by LCDC in August 1982, Section 10.322-15(1)(b) of the Lane Code was amended so that it no longer distinguishes between "rural" and "urban" areas.

Conclusion

Requirement 6 has been satisfied.

The Greenway Ordinance has been amended to require Greenway permits or other measures in "urban" areas beyond 150 feet of ordinary low water.

Requirement

7. Apply EFU zoning to all agricultural lands in the Greenway (see also the Goal 3 section of this report).

Response

The County has not applied EFU zoning to 85 acres of agricultural lands on the "Confluence Island." Instead, the majority of this land is zoned "sand and gravel." All other agricultural lands in the Greenway have been zoned EFU.

Conclusion

Requirement 7 has not been satisfied.

Requirement

8. Adopt a procedure for minimizing the impacts of sand and gravel extraction on significant fish and wildlife so that the Goal's requirements (Section C.3.d. and C.3.i.) are met.

Response

Section C.3.d. of Goal 15 states: "Significant fish and wildlife habitats shall be protected."

Section C.3.i. states that aggregate extraction:

> . . . may be permitted when compatible with the purposes of the Willamette River Greenway, and when economically feasible, subject to compliance with ORS 541.605 to 541.695; ORS 517.750 to 517.900 and subject to compliance with local regulations designed to minimize adverse effects on water quality, fish and wildlife, vegetation, bank stabilization, streamflow, visual quality, noise, safety, and to guarantee necessary reclamation.

Lane County has adopted several plan policies which address this issue. The first set of policies address Section C.3.d. They include the following:

> Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with Sections C.3.d. and C.3.i. of the Goal. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose (Greenway Policy 37).

As noted earlier (in the Mineral and Aggregate portion of the Goal 5, and the previous section of the Goal 15 sections of this report), Mineral and Aggregate Policy 11 is similar, except that it refers only to Section C.3.i. of Goal 15 for the protection of significant fish and wildife habitat areas. Section C.3.d. is the appropriate section of this Goal regarding significant habitat areas, whereas Section C.3.i. covers other less significant habitat areas and is less protective than Section C.3.d. (i.e., it requires only that the impacts of mining are minimized). Section C.3.d., on the other hand, requires that all significant habitat areas to be protected. The County needs to amend Mineral and Aggregate Policy 11 to be consistent with Goal 15 as well as with Greenway Policy 37.

The second set of Greenway policies address Section C.3.i. of the Goal, since they are aimed at minimizing the impact of any intensification, change of use, or development on Greenway values (e.g., Policies 2, 5, 15, 16, 18, 19, 27, 29).

Mining and processing activities in the Greenway must comply with provisions in the County's Greenway ordinance, including the following:

> A development which is mining or mineral extraction and/or processing operation must include mining or extraction and/or processing methods which reduce or mitigate adverse impacts to the natural and cultural attributes of the Greenway (Section 16.254(3)(a)(iii)).

In addition, affirmative findings of compatibility must be made with regard to a number of "Guidelines," including those addressing the protection of scenic and historic resources, areas of flooding and wetlands, the protection and enhancement of water quality, maintenance of natural riparian vegetation, erosion, protection of significant fish and wildlife habitat and natural areas, and compatibility with the site and the surrounding area (Section 16.254(3)(b)).

At the same time, Guideline (xv) calls for protection and conservation of lands designated aggregate resources within the adopted Willamette Greenway Plan. However, Section 16.254(3)(b)(i) through (xv) are "Guidelines" and compliance with them is to be judged according to their "relative importance." To this intent, the County does not have a clear procedure for assuring protection of significant fish and wildlife habitat areas within the Greenway on sites that also have sand and gravel resources. This is most evident in two particular areas--the Confluence Heronry and the Pudding Creek Heronry. Both have unquestionably significant wildlife resources present, and both contain significant aggregate resources. Application of plan policies, the Greenway ordinance, and various other zones does not result in clear policy direction for these sites. In that respect, the conflicts between these various resource uses have not been resolved.

Conclusion

Requirement 8 has not been satisfied.

Lane County has not adopted satisfactory procedures for carrying out Requirements C.3.d. and C.3.i. of Goal 15.

Requirement

9. Amend the Metro Area General Plan or the Lane County Willamette Greenway Plan to assure that land use designations are consistent.

Response

A new Metro Area General Plan Map was submitted as part of the 1982 Metro Plan review. It corrects the inconsistencies identified in 1981.

Conclusion

Requirement 9 has been satisfied.

Requirement

10. Amend the Lane County Greenway ordinance to ensure that the only erosion control activities that are exempt from Greenway review are those for emergency situations, safety, and protection of property.

Response

Lane County's Greenway ordinance has been amended so that the only erosion control activities that are exempt from Greenway Permit review are those "erosion control operations required in emergency situations for the safety and protection of property" (Lane Code, Section 16.254(2)(f)).

Conclusion

Requirement 10 has been satisfied.

Objections

1. A number of objections have been received regarding the County's treatment of the 300-acre area known as "Big Island" or "Confluence Island" at the confluence of the McKenzie and Willamette Rivers. Specifically, 1000 Friends of Oregon, League of Women Voters of Central Lane County (LWV), Harold Chapman, and Lane County Audubon Society have objected because the County has failed to provide adequate protection for the great blue heron rookery on the island. The heronry is one of the largest in the Willamette River Basin (about 55 nests) and is identified in the State Natural Heritage Inventory. Objectors point out that the County has zoned the site for sand and gravel use except for the heronry itself and an unspecified buffer area. Objectors feel this is not only inadequate, but also fails to carry out specific in-order-to-comply requirements adopted by the Commission. Specifically:

   a. Objectors note that Goal 15 (Section C.3.a.) requires that agricultural land in the Greenway be protected. Further, the denial order of Lane County's plan issued in 1981 as well as the 1982 continuance order for the Eugene/Springfield Metro Area specified that EFU zoning had to be applied to all agricultural lands in the Greenway. Several objectors have provided information demonstrating that a large portion of the island contains soils which are SCS Class II and IV. The area has been farmed historically, and about 85 acres are currently farmed. The County has not applied EFU zoning to all these areas. Some areas with these soils are zoned Natural Resource, but the majority are not. Instead, they have been zoned for sand and gravel.

year 2000. In the island alone, there is about five to ten times the total Metro Area demand to the year 2000. Therefore, objectors contend that the County cannot demonstrate the need to zone Big Island for sand and gravel extraction.

f. Objectors indicate that the entire island is within the floodway as determined by FEMA. County adoption of the current zoning for the island was based on a misunderstanding that the island was in the floodway fringe. Objectors indicate that a sand and gravel operation on the island will require dikes and other protective construction projects. FEMA standards do not normally permit dikes or other above-grade type development to be constructed in a floodway. Objectors also point out that Goal 7, Guideline 2 indicates that uses that do not require protection through dams, dikes and levies should be given preference over uses requiring such protection.

g. Objectors contend that the noise from a sand and gravel operation on the island would not be compatible with the purpose of the Greenway relative to a County park on the opposite bank. This is the only site with public access to the river in a natural state in the River Road-Santa Clara area.

2. A number of objections have been received regarding the County's treatment of the Pudding Creek Heronry on the Middle Fork of the Willamette River, within the Willamette Greenway. Specifically, Oregon Department of Fish and Wildlife (ODFW), 1000 Friends of Oregon, League of Women Voters of Central Lane County (LWV), and Lane County Audubon Society have objected to the Sand and Gravel Zone designation applied to the site.

Objectors point out that this great blue heron rookery is one of the largest in the Greenway and in Western Oregon (54 nests in 31 trees), and is on the State Natural Heritage Inventory. The site is within the Metro Planning area but outside the UGB. Objectors note that the heronry is recognized by the Lane Council of Governments (LCOG) as a significant wildlife resource. Objectors state that, during 1983, extensive negotiations occurred between Lane County, ODFW and the Wildish Land Company regarding the site, and that a land trade agreement was drafted in order to protect the heronry. Objectors point out that the Metro Plan Update Addendum indicates that a "Natural Resource" plan designation is to be applied to the site and buffer area and that land exchange is to be the means to resolve sand and gravel use conflicts. However, objectors indicate that Lane County has not zoned the rookery for natural resource protection and instead has applied Sand and Gravel zoning.

Several objectors note the similarity between the Pudding Creek Heronry and the Big Island Heronry (i.e., both are in the Greenway, and both have sand and gravel operation conflicts). Objectors note Goal 15 requirements regarding protection of significant fish and wildlife habitats and conditions which must be satisfied in order to allow mining activities.

Several objectors note that the County's failure to evaluate the Pudding Creek Heronry site in terms of the Goal 5 Administrative Rule process also violates Goal 5 as well as LC 10.205-05 and Ordinance 16.217 (Sand, Gravel and Rock Products Zone, SG-RCP). The Code states that the SG-RCP Zone shall only apply to sites which have been evaluated consistently with the Statewide Planning Goal 5 Administrative Rule conflict resolution process.

Response to Objections

1. Many of the objections regarding the Big Island Confluence Heronry are valid. Specifically,

   a. Objectors are correct that EFU zoning has not been applied to the 85 acres of agricultural lands on Big Island. Goal 15 (Section C.3.a.) requires this to be done.

   b. There is no evidence in the County's policies or implementing measures that a 300 foot buffer around the heron rookery was adopted, although such a buffer was proposed in the Metro Plan update document. Objectors are correct, however, that there is not sufficient information in that document as to why a 300 foot buffer--as opposed to a 400 foot or 700 foot buffer (for example) is adequate to protect the heronry. This is particularly true if, as objectors point out, such a proposed buffer was based upon incorrect information about the location of the rookery.

      On the other hand, objectors have indicated what buffer distances would not be acceptable, but have not recommnded a specific buffer in this case. In light of these facts, the objection is sustained in part. If sand and gravel extraction is to be permitted on the island, the County needs to reexamine what would constitute an adequate buffer for protection of the rookery, based on accurate locational information, and based on advice from objectors as well as ODFW biologists. Based on this re-examination, the County needs to adopt justification for an appropriate buffer, and must adopt such a buffer in plan policies and implementing measures for the site (see, however, response (e) below).

   c. Objectors are correct that the County has not discussed the importance of providing future habitat, such as trees in the inland portion of the island, although the County does recognize that the entire island has habitat value. The County needs to address this when developing a program to protect the site.

   d. Objectors are correct that neither the SG Zone nor the County's Greenway ordinance clearly require protection for significant wildlife habitats, such as the Confluence Heronry. Objectors are correct in saying that the Greenway ordinance does not contain provisions for carrying out Section C.3.i. of Goal 15, inasmuch as it is unclear that extraction will be allowed to occur only if certain conditions are met (these are spelled out

in Section C.3.i. of the Goal). The ordinance refers to most of the topics in Section C.3.i. in its "Guidelines" but does not relate these guidelines to aggregate extraction activities per se. It only requires that findings of compatibility be made based on the "relative importance" of individual Guidelines in any given case. This is not sufficient to ensure that Sections C.3.d. and C.3.i. of Goal 15 will be achieved. Objectors are not correct that Mineral and Aggregate Policy 11 contains adequate assurance, since it fails to reference Section C.3.d. of Goal 15.

e. Objectors are correct that the ESEE consequences analysis for designation of the island did not take into account the regional aggregate supply and demand, although the County's analysis does indicate that "from 3-7 times the amount of land needed for urban aggregate consumption during the planning period has been allocated for this use" (p. V-7). Objectors are correct that the County has not demonstrated a need to zone the island for sand and gravel extraction.

f. Objectors are correct that the entire island is within the floodway. However, this is not a Goal 15 compliance issue, per se, since Goal 15 simply requires floodplain zoning of all areas subject to flooding. As noted in the Goal 7 section of this report, this has been accomplished. Such zoning, plus FEMA regulations will limit activities that can take place on the island.

g. The County has not assessed the impact of noise from a sand and gravel operation in the County park on the opposite bank. However, this would be required according to Sections 16.254(3)(a)(iii) and (3)(b)(xiii) of the Greenway ordinance.

2. Goal 15 (Section C.3.d.) states: "Significant fish and wildlife habitats shall be protected" (emphasis added). Section C.3.i. of the Goal addresses aggregate extraction, and indicates that it "may be permitted when compatible with the purposes of the Willamette River Greenway, and when economically feasible, subject to compliance with ORS 541.605 to 541.695; ORS 517.750 to 517.900 and subject to compliance with local regulations designed to minimize adverse effects on water quality, fish and wildlife, vegetation, bank stabilization, streamflow, visual quality, noise, safety and to guarantee necessary reclamation."

Although the heronry is a significant Goal 5 resource as well as a significant Goal 15 resource, the requirements of Goal 15 are stricter than those for Goal 5 and the Goal 5 Administrative Rule. Goal 15 requires protection of significant fish and wildlife habitats; it does not allow the "balancing" that is permitted under Goal 5, based on specific circumstances and ESEE consequences of conflicting uses. Extraction in the Greenway may occur only when certain criteria are satisfied. In no instance can it occur if it results in non-protection of a significant habitat area.

There is apparently some confusion as to the actual zoning of the Pudding Creek Heronry, based on the comments and objections received, the various plan and zoning maps submitted for review, and information from the Planning Department itself. This is probably due to the fact that the zoning of the site has changed several times. The plot maps submitted indicate that part of the Pudding Creek Heronry site has been zoned for sand and gravel extraction, and part has been zoned NR. However, the Planning Department indicates that the entire site is zoned SG (Jim Mann, personal communication, July 17, 1984). Criteria in the County's Sand and Gravel Zone and Greenway ordinance do not ensure that the requirement of Section C.3.i. of Goal 15 will be satisfied for reasons discussed earlier. The adopted background materials which analyze the conflicts and ESEE consequences for the site call for protection of the heronry. There is no basis for SG zoning of the entire site, not is there any basis for the current configuration of NR zoning and SR zoning shown on the plot maps. There is no assurance that this configuration would be adequate to protect the heronry. The objections are sustained.

It should be noted that in 1983, extensive negotiations took place between the landowner, Lane County, ODOT, and ODFW for resolution of these conflicts. A proposal for a land exchange (involving land in a nearby state park being rezoned for sand and gravel, and the rookery to be zoned for protection) was drafted, but never executed. The draft proposal was not submitted as part of this current review, but a review of the proposal submitted informally to DLCD by LCOG indicates that, if adopted, it would satisfy Goal 5 and 15 concerns. Other implementing strategies and measures may also be available which would satisfy these Goals as well.

Comment

Wildish Land Company supports the County's plan and zone designations for the Pudding Creek Heronry, as submitted. Wildish (the property owner) indicates that, although the LCOG Working Paper, "Natural Resource Areas: Conflict Resolution for Significant Areas," recommends a land exchange or transfer of mining rights in order to resolve conflicts, redsignation and rezoning proposals were part of a preliminary draft and unadopted addendum to the Working Paper. To date, there has been no land exchange or rezoning. Wildish indicates that Policy 32 of the Environmental Resources Element of the Metro Plan simply requires further study of this issue. Wildish indicates that such a study has been completed and a decision made. The Mineral and Aggregate Resources Element of the County Plan specifies that the Goal 5 Rule will be followed (Policy 1, p. 13). Wildish indicates that LC10.205-10 of the Sand, Gravel and Rock Products Zone implements this policy.

Response

As noted earlier, while the Pudding Creek Heronry is a significant Goal 5 resource, it is also a significant Goal 15 habitat area. As such, the more restrictive standards of Goal 15 must be applied (i.e., the rookery

must be protected). Mining can occur only if the rookery is protected and other Goal 15 criteria are met. Contrary to the Wildish Land Company's statement in its letter, the County must be directed to amend its plan and implementing measures to protect the site.

Conclusion - Goal 15

Lane County does not comply with Goal 15.

Lane County has made many improvements to its Greenway element, in terms of both policies and implementing measures. However, there remain several deficiencies which must be corrected in both the rural plan element and in the Metro Planning Area outside the Metro UGB, in order to fully satisfy Goal 15. Summaries of these deficiencies have been presented in the previous subsections of this report.

In order to comply with Goal 15, Lane County and the Cities of Eugene and Springfield must:

1. Amend zoning maps 304, 304A, 305, 330, 332, 347, 396, 411, 417, 418, 425, 437, 440, 448, 471, 528, 1005, 1006, 1008, 1010, 1011, 1012, and 1013 to display the correct LCDC-approved Greenway Boundary.

2. Amend the Greenway ordinance to clearly require protection of significant fish and wildlife habitats, agricultural lands, and identified scenic qualities and viewpoints, per Sections C.3.d., a., and e. of the Goal.

3. Amend Section 16.254(2)(k) of the Greenway Ordinance to eliminate all language following the phrase, "or personal noncommercial use."

4. Amend Section 16.254(c) of the Lane Code to ensure that only water-dependent and water-related uses themselves are exempt from the 100-foot Greenway setback requirement.

5. Amend Section 16.254(6) of the Lane Code to require notification of ODOT of actions taken on applications for intensification, change of use or development in the Willamette Greenway.

6. Amend Section 16.254(2)(a) of the Greenway Ordinance to require either:

   a. Greenway permits in areas designated "urban" beyond 150 feet of the ordinary low water line, or

   b. Some other mechanism which ensures protection of Greenway values in these areas.

   (Note: This could also be accomplished by LCDC amendment of the ODOT Greenway Plan by changing the designation of the area south of the Cottage Grove UGB from "urban" to "rural.")

7. Adopt implementing measures that protect the Pudding Creek Heronry.

8. Adopt implementing measures that protect the Confluence Heronry.

In order to comply with Goal 15, Lane County must:

Modify Mineral and Aggregate Resources Policy 11 to also reference Section C.3.d. of Goal 15 to ensure protection of significant fish and wildlife habitats in the Willamette Greenway.

Suggestions for Plan and Implementing Measures Improvement

It is suggested that, by the first plan update, Lane County:

Amend Greenway Policy 13 to indicate that such operations are subject to local Greenway Permit review, or (alternatively) they must be conducted in a manner consistent with protection of other Greenway values.

Lane County's Nonresource Lands Process (Part II)

In the Lane County Acknowledgment Review of June 29, 1984, Lane County's Nonresource/Nonexception Lands designation process is reviewed. Information presented in the June 29 review includes (1) the County's plan policies for designating lands as nonresource/nonexception and applying residential densities to these lands (Policies 16(a) and 17, respectively, Plan, p. 4) and (2) the "general criteria" for determining nonresource lands contained in the County's marginal lands working paper (Marginal Lands Working Paper, pp. 7-9).

The County's process for determining that Goals 3 and 4 do not apply was found to be consistent with applicable Goal requirements. The information regarding Lane County's nonresource/nonexception lands contained on pages 47 through 50 of the June 29 review is considered Part I of a two part review of the issue. Part II of the review consists of an evaluation of six site specific areas for which information has been adopted indicating that these six areas qualify for the nonresource/nonexception designations.

The County's findings and record regarding these six areas were submitted for review in two parts. Part I was submitted with the rest of Lane County's plan on May 24, 1984. On June 25, 1984, Part II of the County's record regarding nonresource/nonexception lands was received by the Department. The information received on June 25, 1984, was adopted by the Lane County Commissioners without proper notification of objectors as required by OAR 660-03-032(1) (Expedited Review Requirements).

Therefore, Lane County must satisfy the requirements of OAR 660-03-032, before the Commission can formally accept relevant findings contained in materials submitted for review on June 25, 1984.

Evaluation of the Six Site Specific Areas Found to Qualify as Nonresource by the County

Lane County indicates that (1) Agate Creek Planned Unit Development (Wolf), (2) McKenzie Ridge (Thurmond), (3) Addition to Dillard and Highlands (Hemmenway), (4) Second Addition to Dillard Highlands (Hemmenway), (5) Meltebeke's on Van Duyn Road, and (6) Cerro Gordo (Canfield) qualify as nonresource lands. In assessing whether these six areas do qualify as lands for which Goals 3 and 4 do not apply, the Department found that in some cases, a determination could be made based on the information submitted in May of 1984. In other cases, the information submitted on June 25 was necessary to complete the record. The Department also found that adequate justification to support the County's "nonresource" claim for a couple of the areas in question was lacking despite the additional June 25 information. The following matrix will assist in clarifying this issue discussed above:

	Original Submittal (5-24-84)		Supplemental Findings (6-25-84)	
	Adequate	Deficient	Adequate	Deficient
1. Agate Creek PUD		X	X	
2. McKenzie Ridge	X			
3. Addition to Dillard Highlands		X	X	
4. Second addition to Dillard Highlands	No information submitted			X
5. Meltebeke's on Van Duyn Road	X			
6. Cerro Gordo	X			

Agate Creek Planned Unit Development (PUD)

This proposal is for 16 lots to be developed in two stages. Findings for this designated nonresource site consist of two pages of supplementary findings, the official public hearing notice and a memorandum to the Lane County Hearings Official from staff member George Currin regarding the PUD (5/5/83). Contained in the "original submittal" (5-24-84) is the following information addressing the Commission's requirements for substantiating that Goals 3 and 4 do not apply:

1. A statement that the "majority of soils on the subject property possess no woodland suitability." (NOTE: reference is made to an "Attachment A"--LCPC staff report PZC-82-190. This attachment was not furnished as part of the original submittal.)

2. Statements are provided indicating that 1) no site characteristics are present which make this site desirable for open space, 2) no mineral or energy resources are present, 3) no known ecological or scientifically significant natural areas are identified, 4) designation of this land for non-resource will not affect management of the land for wildlife habitat, 5) this site does not contain or impact scenic areas, 6) the site is not part of a water area, wilderness, wetland, groundwater resource area, or watershed, or 7) this site is not part of a known historical area or a potential or approved recreation trail or scenic waterway. (Supplementary Findings);

Contained in the "supplemental findings" of June 25, 1984, is the following information addressing the Commission's requirements for substantiating that Goals 3 and 4 do not apply:

that a clustering of dwelling through a Planned Unit Development will significantly minimize the impact on black-tail deer habitat. Such a development will offer better protection to the habitat than scattering dwellings on the acreage which could occur under current land divisions. The dwelling density allowed under this proposal will not exceed the overall dwelling to acre ratio of 1-40 recommended by the State Fish and Wildlife Department for this type of black-tail deer habitat. The overall dwelling to acre ratio will not be exceeded in that the habitat in question is only a part of the total black-tail deer habitat in this area. Adjacent habitat areas will be maintained due to other prime forest land qualities. It is preferable to accommodate dwellings in this location given the poor resource soils and impact of surrounding development than on surrounding lands which are not impacted or of marginal capability.

With regard to the Fish and Wildlife Department's concern about deer damage to gardens and shrubs and the state's obligation to respond to complaints, the applicant will include deed provisions with all sales of property that black-tail deer inhabit the area and that the associated risks should be recognized.

Objection

1000 Friends of Oregon objects to the claim that Goals 3 and 4 do not apply to the Agate Creek PUD because the findings submitted on March 15, 1984, fail to address Goal 3. Regarding Goal 4, 1000 Friends objects to the conclusion that "the majority of soils on the subject property possess no woodland suitability" without specific soils and specific acreages as supportive evidence.

In addition, specific referenced attachments were not included in the County's original submittal of May 24, 1984.

Response to Objection

This objection is partially sustained. 1000 Friends' objection is generally correct with respect to the information contained in the original May 24, 1984, submittal. However, objectors will find that their specific objection is addressed by the Supplemental Findings submitted for review on June 25, 1984.

Conclusion for Agate Creek PUD

The claim that Goals 3 and 4 do not apply is not sustained.

Substantial evidence is provided in the record supporting the claim that Goals 3 and 4 do not apply to the property in question and that Goal 5 big game habitat value will be protected through clustering provisions.

McKenzie Ridge (also known as Camp Creek Ridge)

This PUD proposal would establish 79 dwellings on 385 acres of land north of Springfield.

Information in the record includes: (1) an affidavit by the applicant, Robert E. Thurmond, detailing the history of and expenses incurred for this development; and (2) a statement of findings, reasons and conditions. This latter statement includes findings addressing all applicable Statewide Planning Goals as well as applicable County requirement and conditions of approval.

This particular claim that Goals 3 and 4 do not apply to this property has been previously before LUBA and the Commission in Osborne v. Lane County [LUBA No. 81.107].

In their March 18, 1982 decision, LUBA found and the Commission affirmed, that the land in question is not subject to Goal 3 because it is not agricultural land be definition. Also, LUBA found that this land is not subject to Goal 4 primarily because the land is not predominantly forested nor suitable for commercial forest use.

Objection

1000 Friends objects to the McKenzie Ridge PUD because the assumptions regarding the interpretation of soils information are correct. The County has relied totally on SCS soils maps even though such maps can be incorrect.

Response to Objection

This objection is not sustained.

Objectors do not present any specific information regarding the property in question to justify invalidating the Commission's earlier decision in Osborne v. Lane County.

Conclusion for McKenzie Ridge

The County's decision indicating that Goals 3 and 4 do not apply to the 385 acres in question is sustained (see Osborne v. Lane County [LUBA No. 81.107]) and the County's finding contained in the May 24, 1984, submittal.

Dillard Highlands Addition

This subdivision is located approximately two miles south of the Eugene city limits. Phase 1 of Dillard Highlands consists of 14 parcels on 100 acres and is "committed" to non-resource use. The second phase of this development consists of 24 parcels.

Findings from the "original" May 24, 1984, submittal supporting this

nonresource/nonexception claim consist of a five-page statement (prepared by David Pedersen and Associates for applicant David Hemenway) titled "Application For Addition to Dillard Highlands Subdivision."

Information from the "original" submittal (5-24-84) relevant to the requirements for substantiating that Goals 3 and 4 do not apply are as follows:

1. A statement indicating "that the predominant soils on the property consist of:

   Dixonville-Philomath Hazelair complex (SCS Class VIe); Philomath SC (SCS Class VIs; Panther CL (SCS Class VIw) and Witzel CL (SCS Class VIs). These non-agricultural soils comprise approximately 92% of the subject property. A small patch (about 10 acres) of Hazelair soils is located on 20-30% slopes on the northern edge of the proposed division. These soils have SCS Classes IVe, subject to severe erosion (Pederson Statement, p. 3).

   Reference is made to an attached soils map which was not forwarded as part of the original submittal (May 24, 1984).

2. Regarding the "other land suitable for farm use" and "lands in other classes which are necessary to permit farm practices to be undertaken on adjacent or nearby lands," the following statement is provided:

   This land does not meet the second definition of agricultural land. That is, it cannot be used for farm use (the current employment of land for the primary purpose of obtaining a profit) nor is it related to the continuation of agricultural activities on adjacent or nearby lands. Other lands in this area are either developed as rural residential or have physical characteristics similar to the subject proprty: gently rolling to steep terrain, a predominance of SCS Class VI soils and little if any potential "farm use". In addition, there is very little physical connection between the subject property and surrounding lands because of the variation in topography. Thus, even if farm use were possible on nearby lands, this proposal would not impact on or adversely affect such activities.

   In summary, the subject property is not agricultural land either in terms of its soil classification or its relationship to other surrounding lands. The surrounding lands are also not agricultural lands as defined by Goal 3 (Pedersen Statement, p. 4).

3. In response to Goal 4 requirements, statements are made that (1) the subject property has no timber site class ratings; (2) that it is predominantly open land; (3) that adjacent lands are similar in character and not used for commercial forest purposes; (4) that other forest uses (i.e., watershed protection, wildlife and fisheries

habitat, recreation, extreme conditions of climate, forested lands in urban and agricultural areas) are not applicable or present on the subject property.

In support of the above statement, the following is provided:

The general area slopes south and east towards Dillard Road and Camas Swale. It contains no rivers or creeks and only a small water natural drainage channel flows southeast towards Dillard Road and into Camas Swale. This drainage basin has no watershed value, nor would the proposed subdivision at the low densities proposed impact on any watershed if one were present. The subject property lies in a low, open area surrounded by steep hillsides. The Significant Vegetation and Wildlife Areas working paper indicates that the vegetation on the property is not unique and contains no elements which contribute to making it a signicant Wildlife Area.

4. Additional statements are provided indicating that (1) the subject property has not been considered for nor does it have recreational value; (2) no extreme climatic conditions exist; (3) this land is not needed for open space, wind breaks; and (4) no scenic values are present on the property.

Contained in the "supplementary findings" submittal of June 25, 1984, are (1) a chart titled "Soil Types on Dillard Highlands, 1st Addition," (2) a SCS Soils map for the subject property, and (3) a soils investigation report apparently prepared by Lane County including soils maps. The chart is relevant to the review of this proposed nonresource site summarized as follows:

1. The chart indicates that of the approximately 107 acres of the Dillard Highlands, 1st Addition, (a) 31.5 acres consists of the Dixonville-Philomath-Hazelaire Complex which has no woodland suitability and has SCS Class IVe agricultural soils; (b) 27 acres consists of Panther Silty Clay Loam which has no woodland suitability and has SCS Class VIw agricultural soils; and (c) 22.4 acres consists of Hazelaire Silty Clay Loam which has not woodland suitability and has SCS Class IVe agricultural soils.

   Of the approximate 107 acres, only 2.6 acres have a woodland suitability while only 22.4 acres are SCS agricultural suitability Class IV.

Objections

1000 Friends of Oregon objects because the findings presented are actually conclusionary statements for which supporting factual information is lacking.

Response to Objection

This objection is not sustained. Additional soils information contained in the supplementary findings submitted for review on June 25, 1984 supports the statements presented by the County in their original submittal indicating that Goals 3 and 4 do not apply. (Also see conclusion)

Conclusion for Dillard Highlands Addition

The claim that Goals 3 and 4 do not apply is sustained. Findings contained in the original submittal of May 24, 1984, are supported by information contained in the "supplemental findings" submitted for review on June 25, 1984, of particular significance is the information indicating that only 22.4 acres of the soils present on this property are SCS Class IV with no SCS Class I-III soils and that only 2.6 acres of the 107 acres in question have any woodland suitability rating at all.

Dillard Highlands, 2nd Addition

This proposal involves approximately 154 acres consisting of 29 five acre lots. It is located approximately one third of a mile southeast of the Eugene city limits and the UGB (application for the Second Addition to the Dillard Highlands Subdivision, p. 3).

Findings addressing this proposal were submitted for review on June 25, 1984 (supplementary findings). Included within the County's record for Dillard Highlands 2nd Addition review as lands for which Goals 3 and 4 do not apply is (1) a document titled "Application for the Second Addition to the Dillard Highlands Subdivision," (2) a list of soils with marginal woodland potential, and (3) a soils investigation report (apparently prepared by Lane County) which includes "forest" and "Ag" soils mapping.

Findings indicating why Goal 3 does not apply to the subject property are as follows:

1. Based on SCS soils mapping, the subject property is composed of 53 percent "nonagricultural soils"--Classes V-VIII--Exhibits A, B, and D are referenced.

2. Table 1 on page 11 indicates that 64% of the property is Class I-IV soils.

3. The soils investigation and accompanying "Ag" soils maps appear to indicate that the majority of the property in question is in fact composed of SCS Class I-IV soils. Also, handwritten statements on the "soils investigation report" indicate that "the application is general concerning soils if there are several more than mentioned" (Request for Soils Investigation, pp. 1 and 2).

4. The subject property is not "other lands" suitable for grazing "because of a combination of problems affecting the growth of pasture and the adverse effects of erosion which would accompany the grazing cattle." The County continues its assesssment of agricultural capabilities by stating the following:

The various limitations on grazing described upon the applicable SCS soil sheets include low fertility, strong acidity, seasonal high water table, clayey topsoil susceptible to compaction when wet, summer droughtiness, slow permeability, and susceptibility to erosion. Climatic conditions of winter rainfall and summer drought lead to the aforementioned soils problems and do not lead to favorable grazing conditions. The soils can become very dry in the summer, and given the high cost of drilling wells and the restricted grazing time, the prospect of irrigation for this purpose is rendered infeasible now and in the future. Existing rural residential land use patterns within the area and the subject property's proximity to the Metropolitan area make it most valuable for rural residential development. The technological and energy inputs required to farm the subject property due to the combination of soils and slope render it not farmable by a reasonable and prudent farmer for the primary purpose of obtaining a profit in money. Even if there were accepted farming practices which made grazing profitable on this site, the erosion potential of this activity makes this property unsuitable for grazing (Application for Dillard Highlands 2nd Addition, pp. 10 and 12--hereby referenced on Application).

5. The subject property is not lands in other classes necessary to permit farm practices to be undertaken on adjacent or nearby lands "as none of the adjacent lands are engaged in farming practices" (Application, p. 12).

Findings indicating why Goal 4 does not apply to the subject property are as follows:

1. In assessing whether this land is lands composed of existing and potential forest lands which are suitable for commercial forest uses the County indicates that of the 154 acrs, 57 acres is composed of Site Class III (site index 140), 31 acres is composed of Site Class IV (site index 110), 43 acres is composed of noncommercial forest lands, 18 acres is used for utility easements, and 5 acres is "deemed" as necessary lands for management (Application, p. 14). The County indicates that for this discussion, Site Class 125 (borrowed from Douglas County) was used to assess commercial forest land suitability (Application, p. 16).

   The County concludes that "only 57 acres, or 37 percent of the subject property has any commercial forest potential" (Application, p. 16).

2. The soils investigation and accompanying "Forest" soils maps indicate that additional soils not discussed by the County exist on the subject property (Request for Soils Investigation, pp. 1 and 2).

2. Exhibit B is a copy of the Lane county Planning Commission's findings in support of this zone change.

3. Exhibit C is a map of the subject property depicting its soil types.

4. Exhibit D is a list of the soil types along with each soil's SCS classification and percentage of occurance on the subject property.

5. Lane County Planning Commission--Addendum to Staff Report (8/23/83).

6. Area map depicting the property to be rezoned.

7. Applicant's supplemental statement to the Lane County Planning Commission.

Contained in this "original" submittal is the following information addressing the Commission's requirements for substantiating that Goals 3 and 4 do not apply:

1. That the land is not SCS Class I-IV agricultural lands. Lane County Exhibit B--Lane County Planning Commission (LCPC), Findings of Fact--is referenced. Some of the findings addressing this issue are as follows:

   A detailed soils investigation of the subject property was undertaken for the applicant by Consulting Environmental Sanitarians, Ltd. (See June 21, 1983, transmittal letter from Terry M. Rahe of CES, Ltd. to Bob Meltebeke.) The results of the soils analysis are summarized in the Applicants' Statement at 5-7.)

   Only 5.9% of the 258 acres proposed for rezoning are SCS Class I-IV soils.

   When the entire Meltebeke ownership of 598 acres is considered together, ony 27.1% has an SCS Class of IV or better (LCPC, p. 2).

2. That the land is not other lands suitable for farm uses . . . suitable for grazing . . . some finding addressing this issue are as follows:

   Almost all of the Bashaw Clay and Conser Silty Clay Loam (Class III and IV soils) occupy the flat field in the northwest portion of the property that is not to be rezoned. These soils have drainage and overflow problems, based upon SCS data. They are subject to winter flooding and are very droughty in summer. (SCS soils tables.)

   The Dixonville/Philomath/Hazelaire complex and Panther Silty Clays (Class VI soils) are the predominate soil types. They occupy 33.7 percent of the entire ownership

and 42 percent of the area propoed to be rezoned. These soils have low permeability, low available water capacity, moderate erosion potential, high plasticity, thin and rocky soils, and droughty conditions. They are poorly suited for production of conifers, which tend to suffer from root rot and windthrow. (SCS soils tables.)

The present lessee of the Meltebeke property raises cattle on this and several other tracts in the vicinity. The property is suitable for grazing less than six months a year due to wetness in winter (which causes cattle to destroy the pasture) and dryness in summer (which inhibits growth of grass). (Letter from DuWayne Penfold, July 10, 1983).

The entire Meltebeke property is not a viable economic unit as a farm. It is incapable of producing a cash crop, including grazing of animals, that would be sufficient to cover operating expenses and retire indebtedness on the land. (See letter of Floyd W. Holbrook, Agricultural Management Specialist, August 4, 1983.) (LCPC, p. 3).

On page 9 of "Attachment 2," Meletebeke supplemental zoning App. Statement, the County provides the following assessment of this property's agricultural suitability:

In addition, Floyd Holbrook, Agricultural Management Specialist, has submitted a report stating that, while the property can be grazed, it would be necessary to do intensive clearing and planting, with a resulting production level that would not support an income adequate to retire the debt on the property, based on current farmland values in the area:

"The major problem with improving the property for grazing is that the acreage can not support enough animals in either beef or sheep in order to pay operating expenses and retire the land debt. The main reason for not being able t (sic) support adequate livestock is due to the moisture availability and the shallow soil depth. The soil types are such that fertilizers are restrictedby (sic) chemical bonds and do not allow for maximum pasture production."

"These figures [see letter] clearly show that the subject property will not support an economic unit." August 4 Holbrook letter.

3. That the land is not "lands in other classes . . . necessary to permit farm practices to be undertaken on adjacent or nearby lands. Some findings regarding this issue are as follows:

No adjacent or nearby farmer has voiced opposition to this rezoning proposal.

Dr. Penfold leases Meltebeke land to the northwest of the area to be rezoned. It is a hayfield on which he raises cattle. Dr. Penfold also raises cattle on several other tracts near the Coburg/I-5 interchange.

The Meltebeke property leased by Penfold has little value for grazing, and the proposed rezoning will have little impact on the productivity of the Penfold farm. (Letter of DuWayne Penfold, July 10, 1983.)

The area to the north of the subject property is scrub hillside and part of the Coglietti ranch. The immediately abutting area is not cultivated and receives limited grazing use.

All other agricultural lands are isolated from the subject property by the ridge to the east and south, and the residential land to the west.

A Wildlife Management Plan has been submitted by the Applicant and is a condition on zoning approval. Under this management plan there will be protective corridors running the length of the property which will buffer residential and farm uses. Under the plan animals will be restrained through fencing and deed restrictions.

Purchase of the subject property by adjacent farmers might increase their total income but reduce their return per acre. (Letter of Floyd W. Holbrook, Agricultural Management Specialist, August 4, 1983.)

4. That the land is not inventoried as forest land, not predominantly forested, and is not suitable for commercial forest production. County Exhibit B--Lane County Planning Commission (LCPC)--Findings of Fact--is referenced. Some of the findings addressing this issue are as follows:

Neither the 258 acres to be rezoned nor the entire 598 acres is inventoried as forest land.

Neither the 258 acres nor the 598 acres is presently "forested" in the meaning of the goal. A majority of neither acreage is covered with a commercial stand of conifers. Neither is a greater portion of either acreage covered with oak or similar noncommercial species.

The vast majority of both the 258 acres and the 598 acres has no forest site class at all.

Only 54 acres or 21 percent of the 258 acres to be rezoned has soil with commercial forest potential, and this acreage is in four scattered locations. (Letter from Robert Hoenhaus, Consulting Forester, June 28, 1983.)

5. That the land is not forested land based on the following findings:

The upland areas between the subject property and the crest of the Coburg Hills, which contains the most densely wooded area, will be left in forest use, and will be managed under a management plan submitted by the applicnt's consulting forester.

Wildlife corridors provided in the wildlife management plan will provide protection for wildlife resources. (See Goal 3 findings above.)

The proposed 24 units will be clustered. Clustering will minimize impacts on wildlife and will permit protection of vegetative cover.

Development density will be more than 10 acres per unit on the property to be rezoned, about 30 acres per unit for all the Meltebeke property, and far more than 40 acres per unit in the surrounding area.

Grazing on the dry slopes of the subject property is a use that presently conflicts with goals of protecting vegetative cover and preventing soil erosion.

Conversion of the property to low density, clustered residential use with extensive wildlife corridors under the wildlife management plan will displace grazing, a use that conflicts with vegetation, soil, watershed and wildlife protection, with a use that will improve forest land, open space, wildlife values that the site does possess.

County General Plan Policy 5C13 requires application of Goal 5 conflict-resolution procedures and administrative (OAR 660-16-000) when, as here, the proposed development density is below that recommended by the Oregon Department of Fish and Wildlife for big game (LCPC, Exhibit B, pp. 5-6).

Some information contained in the record, contlicts with the findings adopted by the County. No specific discussion is contained in the "original submittal" clarifying the relationship of this information to that used by the County in making its decision is provided. (However, information contained in the supplemental findings--letter from Rober A. Holenhaus--indicates that the revised proposal of 258 acres excludes the majority forest soils discussed on page two of the "LCPC Addendum."

Relevant information regarding the "Nonresource" claim included in the "supplementary findings" submitted on June 25, 1984, are:

1. An area map showing the proposed 258 acres;

2. An aerial photo and a series of overlays which consists of a soils map, a colored overlay showing "Ag and forest soils" and the development area;

3. A sheet listing specific soils and acreages;

4. A large scale soils map prepared by Terrance Rahe;

5. Another aerial map containing soil lines;

6. A letter from R. Holenhaus, professional forester;

7. A letter from T. Rahe, soil scientist, describing the soils found on the property; and

8. A letter from J. Lockard, SCS District Conservationist, discussing the soil known as the Dixonville-Philomath-Hazelaire complex.

With the exception of a statement indicating that only 54 scattered acres are suitable for commercial forest use (Hoenhaus) specific findings or conclusions were contained in the supplemental findings. This information apparently was supplied to corroborate the statements contained in the "original submittal."

Objection:

1000 Friends of Oregon objects because information in the record contradicts findings that Goal 4 does not apply. Also, the County relies on soils mapping for this determination.

Response to Objection

This objection is partially sustained.

The objectors are correct that information in the record (page 2 of the "Lane County Planning Commission Addendum to Staff Report") indicates that Goal 4 does apply to this land or a portion of the property in question. However, information contained in the supplementary findings of June 25, 1984, addresses this issue (letter from R. Hohenhaus and also personal communication from J. Mann, Lane County Planning Department, 7/16/84).

Regarding the County's reliance on soils mapping, this objection is not sustained. In order to complete inventory requirements for both Goals 3 and 4, most counties have had to rely on such information to satisfy their land use planning obligations. The Commission has found acceptable

on numerous occasions, soils mapping prepared by the U.S. Soil Conservation Service (or other governmental agencies--e.g., BLM) provided it is the best information available at that time.

Conclusion for Meltebecke's on Van Duyn Road

When considering both the original submittal of "May 24, 1984" and the "supplementary findings" of June 25, 1984, substantial evidence is provided to sustain the claim that Goals 3 and 4 do not apply to the 258 acres in question.

Cerro Gordo

This proposal is for 60 residential lots and one common area lot on 604 acres on Dorena Reservoir in southern Lane County. Findings for this designated nonresource site were submitted with the County's original submittal of March 15, 1984, as well as with the supplemental findings submitted on June 25, 1984.

The "original" submittal for Cerro Gordo consists of a number of exhibits which are as follows:

1. A map of the property displaying (a) the nonforest soils, forest soils, and committed lands; (b) ridge lines, Row River Road, and Dorena Lake; and (c) adjacent ownerships and the area zoned RR-10 for which the nonresource claim is made.

2. Findings and conclusions in support of nonresource designation for Cerro Gordo Ranch--CPR Application No. 1102.

This statement consists of 173 pages including a 44 page wildlife management plan, a forest lands assessment by Woodland Management, Inc., an appraisal by Terrance Rahe (registered sanitarian) of the area's suitability for subsurface sewage disposal, and a detailed discussion addressing each Statewide Planning Goal as well as numerous letters generally in support of the proposed development.

The "supplemental findings" (June 25, 1984) for Cerro Gordo consists of (1) a five page document labeled "Incorporation of Applicant's Findings and Conclusions," (2) the "Cerro Gordo Preliminary Cluster Subdivision Plan," as well as (3) a number of letters addressing a range of issues, some of which not directly associated with the Goal 3 and 4 applicability question while others are duplicate information contained in the original submittal.

Contained in the "original" submittal (3-15-84) is the following information addressing the Commission's requirement for substantiating that Goals 3 and 4 do not apply:

1. In addressing Goal 3, the County indicates that 76 acres of the 604 acres consists of soils with SCS agricultural suitability Classes III-IV (12 percent). The dominant soil type (302.6 acres) is the Dixonville-Philomath-Hazelaire Complex (Findings and Conclusions . . ., p. 12).

2. Regarding the other aspects of the Goal 3 defintion, the County indicates:

   a. That there is no evidence of recent agricultural activity;

   b. Due to the lack of rainfall in the summer, the southern exposure of this site and no source for water for irrigation agricultural productivity is limited;

   c. The Dixonville-Philomath-Hazelaire Complex is rated three to six AUMs per acre for grazing and no suitability for crop production while the soils;

   d. Ninety percent of the property products less than ten AUMs of pasture per acre;

   e. Two hundred ten acres (35 percent) of the property is situated on Cerro Gordo Mountain which rises 1,200 feet above the lowest elevation point.

   Based on the preceding findings, the County concluded that the property as a whole would not be an economic farming unit (nor would be purchased for agricultural use) under Goal 3's "other lands suitable for agricultural use . . .definition (Findings and Conclusions . . ., pp. 12-14).

3. Regarding whether this site qualifies as "lands in other classes necessary to permit farm practice to be undertaken on adjacent or nearby lands," Lane County indicates that (a) there are no agricultural lands or agricultural uses in the imediate vicinity of the subject property, (b) Dorena Lake and the ridges of the mountain combine to surround the property, and (c) the nearest agricultural uses are approximately one mile from the property in question. Given the preceding facts, the County concludes that this site does not qualify as "lands in other classes necessary to permit farm practice on adjacent or nearby lands" (Findings and Conclusions . . ., p. 14).

4. Regarding whether the site is composed of existing and potential forest land suitable for commercial forest use, the County indicates that 507 acres of the 604 acres is composed of soils with no woodland suitability indicated by the U.S. Soil Conservation Service (Findings and Conclusions . . ., p. 16).

5. In addressing the other aspects of the Forest Lands definition, the County responds as follows:

   a. From aerial photographs, the forested and nonforested acreages were calculated. Douglas Fir is growing on 198 or 32.8 percent of this site. Oak is growing on 119 acres or 19.7 percent of this site while 287 acres or 47.5 percent remains nonforested. Fifty-two point five percent of the site is covered by trees. The County recites from LUBA's Osborne v. Lane County decision

(5 Or LUBA 172) that LUBA does "not view the fact that trees may be growing on the property in various places, as the record seems to indicate, to mean the land is forested within the meaning of Goal 4." The County indicates that the opinion implies that when considering species such as oak, not a simple majority, but rather " the far greater area" must be covered by trees to conclude that a property is forested (Findings and Conclusions . . ., p. 17). Thus, the County indicates that 52 percent forest cover alone does automatically qualify this land under the forest land definition. The County concludes by stating, "Considering the total extent of tree cover, the subject property is not forested within the meaning of Goal 4.

b. With regard to "lands where extreme conditions of climate, soil, and topography require vegetative cover irrespective of use," and "other forested lands in urban and agricultural areas which provide buffers, windbreaks, wildlife and fisheries habitat, livestock habitat, scenic corridors, and recreational use, the County indicates the following:

(1) The property is not (a) identified as an important watershed, (b) an agricultural or urban area, (c) needed for recreation, (d) necessary to be maintained in its present condition to provide buffers, scenic corridors, livestock habitat, or windbreaks (Findings and Conclusions . . ., pp. 18-21).

(2) The conditions imposed during this development's approval will resolve any potential problems presented by extreme soil and slope conditions as well as conflicts with big game (Findings and Conclusions . . ., pp. 18-20).

Also, findings addressing other relevant Statewide Planning Goals were included. Of particular significance to the "nonresource" designation issue are findings addressing wildlife habitat and the "Goal 5 process." The following are findings contained within the "Findings and Conclusions" document presented in the County's original submittal (5-24-84):

1. On pages 123 and 123, a detailed statement of potential consequences on big game habitat from residential development is presented.

2. A series of recommendations for mitigating asdverse impacts from residential development on big game habitat are presented on pages 125-127.

3. A discussion of residential densities and deer habitat is presented on page 217. As stated, the recommended density for big game is one unit per 80 acres preferred; one unit per 40 acres is acceptable with clustering. The County states that, "The Cerro Gordo property is requesting a subdivision of 100 lots with clustering, thus maintaining an average lot size of 10 acres" (p. 217).

4. The County indicates that "residential development in rural areas rarely acts to exclude or reduce deer populations," "the contrary usually occurs (Jim Greer, 1983)." The main impact of development is the loss of hunting lands. Cerro Gordo prohibits hunting (p. 128).

5. On page 125, the County concludes its discussion of density as follows:

> The Cerro Gordo project, which calls for a density of one lot for every 10 acres, can be thought of in the larger ecological context of the drainage basin (approximately 2000 acres) as resulting in a density approaching one lot for 20 acres. Again considering the clustered design of the development this leaves considerable land for natural processes to occur.

6. On pages 129-131, the County discusses the wildlive habitat and the Goal 5 Rule requirements. These are excerpts from this discussion:

   a. In identifying conflictihg uses there has previously been discussion as to whether residential development actually negatively impacts wildlife. Experts tend to feel that deer populations usually are minimally affected by rural residential development and tend to adapt to people's presence quite rapidly (Jim Greer, ODF&W; Lane County Extension Service, 1983) (p. 130).

   b. The ESEE consequences on both wildlfe and rural residents have been fully detailed in the previous section--"Potential Impacts of Development in Wildlife." The primary consequence on wildife is loss of habitat (environmental) while the primary consequence on rural residents is damage to landscaping and gardens (economic) and ultimately not being allowed to live in a rural setting (social). The section on "Mitigation of Impacts" gives recommendations for resolving these issues.

      Therefore, in section 660-16-010 of LCDC's interpretive rules the way to resolve the conflict of uses is seen as (3) limiting conflicting uses (pp. 130-131).

7. On pages 133 through 147, present a detailed "wildlife and development plan" which was designed to satisfy OAR 660-16-010(3), "Limit Conflicting Uses."

   As indicated, Lane County also submitted information regarding this developmental in their "supplemental findings" received by the Department on June 25, 1984. The information regarding Cerro Gordo contained within the supplemental findings was a reiteration of the conclusions and findings already present in the original submittal of May 24, 1984.

Objection

1000 Friends objects to the designation of Cerro Gordo as "nonresource" because of the County's reliance on SCS soils mapping information. Objectors claim that this information is inappropriate to judge the capability of this land for commercial forest use.

Response to Objection

This objectin is not sustained. In order to complete inventory requirements for both Goals 3 and 4, most counties have had to rely on such information to satisfy their land use planning obligations. The Commission has found acceptable on numerous occasions, soils mapping prepared by the U.S. Soil Conservation Service (or other governmental agencies--e.g., BLM) provided it is the best information available at that time.

Conclusion for Cerro Gordo

The claim that Goals 3 and 4 do no apply is sustained; however, one unresolved Goal 3 issue as well as a Goal 14 issue (see Goal 2) remains substantial evidence is contained within the "original submittal" to indicate that this land is not agricultural land under the Goal 3 definition. The approximately 604 acres in question is not predominantly SCS Class I-IV soils nor do findings indicate that it is reasonable to conclude that this property is "other lands" suitable for farm use or "lands in other classes" necessary to permit farm practices to be undertaken or adjacent or nearby lands.

Substantial evidence is provided also indicating that the property in question is not (1) "lands composed of existing and potential forest lands which are suitable for commercial forest uses and (2) other forested lands in urban and agricultural areas which provide urban buffers, wind breaks, wildlife and fisheries habitat, livestock, scenic corridors, and recreational use.

Also, the County has adequately addressed through open space requirements and developmental conditions the issue raised regarding extreme conditions of soil and topography where maintenance of vegetative cover qualifies as forest lands.

The question of whether this property qualifies as "other forested lands needed for wildlife habitat" has also been addressed. Substantial evidence has been provided showing that this two part definition, ((1) other forested land and needed for wildlife habitat) does not apply as the County's findings adequately address OAR 660-16-000 requirements; thus, indicating tht this land is not needed for wildlife habitat.

However, one unresolved Goal 5 issue remains. The County needs to address the issue of how the "acceptable" density of one unit per 40 acres with clustering is satisfied by authorizing one dwelling per ten acres as zoned or 60 lots under a cluster provision allowing duplexes (or 120 units per 600 acres or one unit per five acre overall density.

In order to comply, Lane County must:

1. Amend the plan (a) to include additional fundings justifying the claim that Goals 3 and 4 do not apply to property known as Dillard Highland's 2nd Addition, or (b) justify an exception to Goals 3 and 4, or (c) rezone the subject property with a suitable resource zone. If the county chooses option (a) or (b), Goal 5 wildlife habitat issues must also be addressed.

2. Amend the plan to justify the potential one dwelling unit per 5 acre density authorized for Cerro Gordo's 600 acres in view of ODFW's accepted wildlife habitat density standard for cluster developments of one dwelling unit per 40 acres. (see also Goal 2's cluster development issue)

IN THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY, OREGON

ORDINANCE NO. 9-84

IN THE MATTER OF REVISING CHAPTER 16 THE RURAL DEVELOPMENT CODE OF LANE COUNTY TO:

1. MAKE CERTAIN HOUSEKEEPING RE - VI S IONS .
2. ESTABLISH EXPLOSIVE STORAGE AS A SPECIAL USE IN THE IMPACTED FOREST ZONE (HEREINAFTER RE- FERRED TO AS F-2) ZONING DISTRICT.
3. MAKE NUMEROUS REVISIONS TO THE DEVELOPMENT CODE TO BRING IT INTO COMPLIANCE WITH THE REQUIREMENTS OF THE DLCD STAFF REPORTS DATED JUNE 28, 1984 AND JULY 19, 1984 THESE REVI SI ONS I NCLUDE :
   - A. CHANGING THE EFU DISTRICT TO REQUIRE DISQUALIFICATION FROM THE TAX DEFERRAL PROGRAM IF NON-FARM DWELLING PERMITS ARE ISSUED.
   - B. CONDITIONING DEVELOPMENT IN AREAS OF KNOWN GEOLOGIC HAZARDS.
   - C . ADDING A NEW DIVISION STAN- DARD OF 80 ACRES FOR CERTAIN PARCELS OF LAND ZONED F-2 WHICH ARE IN EXCESS OF 160 ACRES.
   - D. REQUIRING "LODGES" TO MEET THE GENERALLY UNSUITABLE TEST BEFORE PERMIT ISSUANCE.
   - E. ESTABLISHING A MINIMUM OF 10 ACRES BEFORE A PARCEL IS ELI- GIBLE FOR A FOREST RELATED DWELLING.
   - F . REVISING THE PARKS AND REC- REATION ZONE TO MAKE IT CON- SISTENT WITH ORS 215 .213 (2) .
   - G. CONDITIONING DEVELOPMENT IN UNINCORPORATED RURAL COM- MUNITIES WITH KNOWN OR SUS- PECTED SEWAGE PROBLEMS.
   - H. CLARIFYING THE STANDARD FOR DWELLINGS IN THE F-,2 DIS- TRICT.
   - I. ESTABLISHING ADDITIONAL

CRITERIA WHEN DETERMINING THE APPROPRIATE DENSITY OF CLUSTER SUBDIVISIONS, AND

4. ADOPT A SAVINGS AND SEVERABILITY CLAUSE

WHEREAS, on March 1, 1983, Lane County submitted its Rural Comprehensive Plan to the Land Conservation and Development Commission for acknowledgment, and

WHEREAS, since submitted, objections to the plan have been received, and the Department of Land Conservation and Development Commission staff have reviewed the plan, and

WHEREAS. we have now received DLCD's staff reports dated June 28, 1984 and July 19, 1983, and we are now in a position to revise the Development Code to bring it to an acknowledgeable standard, now, therefore

THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY ORDAINS AS FOLLOWS:

The attached complete copy of Chapter 16, is hereby adopted in total replacement of the Chapter 16 enacted on February 29, 1984, via Ordinance No. 1-84.

If any section, subsection, sentence, clause, phrase or portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions thereof.

The application of Chapte 16 to rural Lane County repealed by this Ordinance shall remain in force to authorize prosecution of persons in violation thereof prior to the effective date of this Ordinance.

While not part of this Ordinance, we adopt the attached Exhibit "A" as finding in support of this decision.

Enacted this _____ dav of August 1984.

Chair, Lane County Board of Commissioners

APPR 9/6/84

4)p sew/W(6a)
Recording Secretary for this Meeting of the Board

amending the provisions of this Chapter. Any interpretation of the Chapter shall be deemed an administrative action and shall be based on the following considerations:

(1) The Lane County Comprehensive Plan.

(2) The purpose and intent of the Chapter as applied to the particular section in question.

(3) The opinion of the County Counsel.

Copies of such interpretations shall be indexed and kept on file in the Department and may be reviewed by the public upon request.

16.009 Restrictiveness. Where the conditions imposed by a provision of this Chapter overlap, the provisions which are more restrictive shall govern.

16.010 Severability. If any section, paragraph, subsection, clause, sentence or provision of this Chapter shall be adjudged by any court of competent jurisdiction to be unconstitutional or invalid, such judgment shall not affect, impair, invalidate or nullify the remainder of this Chapter, and the effect thereof shall be confined to the section, paragraph, subsection, clause, sentence or provision immediately involved in the controversy in which such judgment or decree shall be rendered, it being the intent of the governing body to enact the remainder of this Chapter notwithstanding the parts so declared unconstitutional or invalid. Further, should any section, paragraph, subsection, clause, sentence or provision of this Chapter be judicially declared unreasonable or inapplicable to a particular premises or to a particular use at any particular location, such declaration or judgment shall not affect, impair, invalidate or nullify such section, paragraph, subsection, clause, sentence or provision as to any other premises or use.

16.011 Introductory Provisions. In order to achieve the purposes outlined in LC 16.003, and to assure that the development and use of land in Lane County conforms to the Rural Comprehensive Plan, zone classifications have been established for all unincorporated areas outside of adopted urban growth boundaries and within Lane County. These zones specify regulations for the use of land and property development standards, and use applied by boundaries indicated on the Lane County Rural Comprehensive Plan Zoning Maps.

16.012 Zone Classifications. For the purpose of this Chapter of Lane Code, the following zones are hereby established:

Zone Classification	Abbreviation	Section No.
Nonimpacted Forest Lands	F-1, RCP	16.210
Impacted Forest Lands	F-2, RCP	16.211
Exclusive Farm Use	E-RCP	16.212
Natural Resource	NR-RCP	16.213
Marginal Lands	ML-RCP	16.214
Park and Recreation	PR-RCP	16.215
Quarry and Mining Operations Combining	/QM-RCP	16.216
Sand, Gravel and Rock Products	SG-RCP	16.217
Sand, Gravel and Rock Products Combining Processing	SG-CP-RCP	16.218
Public Facility	PF-RCP	16.219
Limited Commercial	C-1, RCP	16.220
Neighborhood Commercial	C-2, RCP	16.221
Commercial	C-3, RCP	16.222
Rural Commercial	C-R, RCP	16.223
Limited Industrial	M-1, RCP	16.224
Light Industrial	M-2, RCP	16.225
Heavy Industrial	M-3, RCP	16.226
Suburban Residential	RA-RCP	16.229
Garden Apartment Residential	RG-RCP	16.230
Rural Residential	RR-RCP	16.231
Destination Resort Historic Structures or Sites Combining	DR-RCP /H-RCP	16.232 16.233
Natural Estuary	/NE-RCP	16.234
Conservation Estuary	ICE-RCP	16.235
Development Estuary	/DE-RCP	16.236
Significant Natural Shorelands Combining	/SN-RCP	16.237
Prime Wildlife Shorelands Combining	/PW-RCP	16.238
Natural Resources Conservation Combining	/NRC-RCP	16.239
Residential Development Shorelands Combining	/RD-RCP	16.240
Shorelands Mixed Development Combining	/MD-RCP	16.241
Dredge Material/Mitigation Site Combining	/DMS-RCP	16.242
Beaches and Dunes Combining	/BD-RCP	16.243
Floodplain Combining	/FP-RCP	16.244
Commercial Airport Safety District	/CAS-RCP	16.245'
Airport Safety District	/AS-RCP	16,246
Airport Operation	AO-RCP	16.247

16.013 Location of Zones. The boundaries of the zones indicated on the Lane County Zoning Maps are hereby adopted by reference.

16.014 Plan Designation and Zoning Maps.

(1) The Plan Designation and Zoning Maps shall consist of a set of base maps and detailed map sheets. The base maps will cover the entire County and will indicate plan designation and zoning where an entire section is in a single designation and zone. Where more than one plan designation and zone is used within a section, the zoning shall be shown on a detailed map sheet and the base map shall reference the detailed map sheet. The Flood Insurance Rate Maps (FIRM) and Flood Hazard Boundary Maps shall constitute the zone maps for the /FP-RCP zone.

(2) Final maps sheets (i.e., the maps actually adopted) will be 8-1/2 x 14 inches overall. Working maps may be drawn at a larger size and reduced to produce a final map. Scale of the final maps will adhere to a standard engineer's scale to the maximum extent feasible, however, this shall not be an absolute requirement. A graphic representation of map scale must be shown on each map sheet. Final maps are to be on durable material and be of sufficient contrast to allow high quality reproduction through microfilming or standard office equipment.

(3) Each map sheet shall contain the following information:

(a) Sheet number.
(b) Scale.
(c) North Point.
(d) Adoption ordinance number, effective date and file reference number.
(e) Revision number, ordinance or order number and effective date of map amendment.
(f) Title "Lane County Official Plan Designation and Zoning Map".

(4) Base map sheets will be numbered sequentially (i.e., 1, 2, 3, etc.). Detailed map sheets will be numbered with the same numbering system used by the County Assessor (i.e., township, range, section, 1/4 section, 1/4 1/4 section). When two sections are shown on the same sheet, that sheet will be indentified by both County Assessor map numbers (i.e, 17-04-06/17-04-07).

(5) The exterior boundaries of the individual detailed map sheets shall be determined by the polygons used by the County Geographic Data System Parcel File to represent the properties within the sections being displayed.

(6) To the maximum extent feasible, plan designation and zone boundaries shall follow features recognizable or reproducible line preference shall be given to going from a known point to a known point (i.e., property corner, section corner, etc.). In the event a zone boundary does not or cannot conform to the above, angle points and intersection points of that boundary shall be annotated

with the coordinates of the points or with the distance and bearing of the boundary.

(7) Where uncertainty exists as to the boundaries of any zone shown upon the Zoning Map, the following rules shall apply:

(a) Boundaries indicated as approximately following the centerlines of streets, highways or alleys shall be construed to follow such centerlines.

(b Boundaries indicated as approximately following property lines shall be construed as following such property lines.

(c) Boundaries indicated as approximately following the city limits shall be construed as following such city limits.

(d) Boundaries indicated as following railroad lines and public utility shall be construed to be midway between the main tracks or utility easements, whichever is applicable.

(e) Boundaries indicated as parallel to or extensions of features indicated in LC 16.014(7)(a) through (d) above shall be so construed.

(f) Boundaries indicated as following shorelines shall be construed as following the ordinary low waterline, except where the body of water is specifically zoned /NE-RCP, /CE-RCP or /DE-RCP, in which case the boundary shall be construed as following the ordinary high waterline. In the event of a change of high or low waterline, the boundary will follow that line no matter how it shifts.

(g) Where zones are separated by a body of water, the boundary between the zones shall be construed as being the centerline of such body of water. No matter how such centerline may shift, the boundary shall remain the centerline as shifted.

(h) Except as hereinafter noted, where a zone boundary divides an ownership of property, unless the same is indicated by dimensions, map coordinates or similar notation, the boundary shall be determined by the use of the scale appearing on the Zoning Map. In the case of the /SN-RCP, /PW-RCP, /NRC-RCP, /RD-RCP, /MD-RCP, /DMS-RCP and /BD-RCP Zones and the /NE-RCP, /CE-RCP and /DE-RCP Zones, the boundaries shall be determined through interpretation of the Coastal Resources Management Plan.

(i) Where physical features existing on the ground are at variance with those shown on the Zoning Map, or in other circumstances not covered by LC 16.014(7)(a) through (h) above, the Planning Commission shall interpret the zone boundaries.

(j) Treatment of Vacated Property. Where a public street or alley is officially vacated, the Zone requirements applicable to the property to which the

vacated area becomes a part shall apply to the vacated property.

16.015 Amendments to the Lane County Plan Designation and Zoning Maps.

(1) All amendments to the Lane County Zoning Maps shall be made by Ordinance, for legislative matters, and by Order, for quasi-judicial matters, of the Approval Authority as specified in this Chapter of Lane Code.

(2) The Lane County Plan Designation and Zoning Maps shall be amended by substituting new map sheets for existing map sheets, adding new map sheets, or removing existing map sheets.

(3) Each time a map sheet is added to or substituted for an existing map sheet in the Plan Designation and Zoning Map, that action shall be indicated by placing a revision number in parenthesis following the map sheet number. The revision numbers will represent the sequential changes made to that sheet as follows:

Original Map Sheet	17-04-06/17-04-07
1st Revision	17-04-06/17-04-07(1)
2nd Revision	17-04-06/17-04-07(2)
New Map Sheet Added	18-05-06/18-05-07(1)

16.020 Interim Plan Designation and Zoning Maps. For legislative plan and zone adoption or amendment proceedings, the maps initially adopted may be on regular paper (8 1/2" x 11"). In addition, CPR change request summaries may be used to modify these maps. Upon adoption, the County shall have 120 days to adopt Plan Designation and Zoning Maps in conformity with LC 16.014 above.

16.090 Definitions. For the purpose this Chapter, certain abbreviations, terms, phrases, words and their derivatives shall be construed as specified in this Chapter. Words used in the singular include the plural and the plural the singular. Words used in the masculine gender include the feminine and the feminine the masculine. Where terms are not defined, they shall have their ordinary accepted meanings within the context with which they are used. Webster's Third New International Dictionary of the English Language, Unabridged, Copyright 1961, shall be considered as providing ordinary accepted meanings.

Acceptance. Received by and considered by the Director as sufficiently complete to begin processing according to the application or appeal review procedures of this Chapter.

Accessory. Incidental, appropriate and subordinate to the main use of a tract or structure.

Agriculture. Synonymous with definition of "farm use".

Agricultural Building. A structure designed and constructed to house farm implements, hay, grain, poultry, livestock or other horticultural products. This structure shall not be a place of human habitation or a place of employment where agricultural products are processed, treated or packaged; nor shall it be a place used by the public.

Alter or Alteration. Any change, addition or modification in use construction or occupancy.

Amendment, Minor. A change to a preliminary plan, plat or map which:

(1) Does not change the number of lots or parcels created by the subdivision or partition;

(2) Does not "substantially enlarge or reduce" the boundaries of subdivided or partitioned area;

(3) Does not change the general location or amount of land devoted to a specific land use; or

(4) Includes only minor shifting of the proposed parcel or lot lines, location of buildings, proposed public or private streets, pedestrian ways, utility easements, parks or other public open spaces, septic tank drainfield locations and well locations.

Amendment, Major. A change to preliminary plan, plat or map which is not a minor amendment.

Animal Hospital. A place where animals or pets are given medical or surgical treatment and the boarding of animals is limited to short-term care incidental to the hospital use.

Appearance. Submission of testimony or evidence in the proceeding, either oral or written. Appearance does not include a name or address on a petition.

Approval Authority. A person, or a group of persons, given authority by Lane Code to review and/or make decisions upon certain applications according to the review procedures of Lane Code Chapter 14.

Approximate Flood Hazard Study Area. Flood hazard areas as shown on the Federal Flood Hazard Boundary Maps where base flooding elevations have not been determined.

Aquaculture. The raising, feeding, planting and harvesting of fish, shell fish or waterborne plants and associated facilities necessary for the use.

Area. The surface included within any set of lines which may be further defined in square feet or acres, exclusive of County or local access - public street.

Area **of Flood Hazard.** The land in the floodplain within a community subject to a one percent chance of flooding in any given year.

Base Flood. A flood that has a one percent chance of being equaled or exceeded in any given year.

Beach. Gently sloping area of loose material (e.g., sand, gravel and cobbles) that extends landward from the low waterline to the uppermost line of wave and tidal action.

Bed and Breakfast Accommodation. An accessory use to be carried on within a structure designed for and occupied as a single-family dwelling in which no more than two sleeping rooms are provided on a daily or weekly period, not to exceed 29 consecutive days, for the use of travelers or transients for a charge or fee. Provision of a morning meal is customary as implied by title. Bed and Breakfast shall be considered a Home Occupation where not specifically listed as a permitted or conditionally permitted use.

Board. Board of County Commissioners of Lane County.

Boarding of Horses. The boarding of horses for profit shall include the following:

(1) The stabling, feeding and grooming for a fee, or the renting of stalls for the care of horses not belonging to the owner of the property; and

(2) Related facilities, such as training arenas, corrals and exercise tracks.

The boarding of horses for profit does not include the following:

(1) The mere pasturage of horses or the boarding of horses not owned by the property owner for the purpose of breeding with the owner's stock.

(2) The incidental stabling of not more than four horses.

(3) The boarding of horses for friends or guests where no charge is made.

(4) Equestrian activities when the raising, feeding, training or grooming of horses is a farm use by the property owner of the land qualifying for farm assessment under regulations of the State Department of Revenue.

Boarding House. A dwelling or part thereof, in which lodging is provided by the owner which equals or exceeds the limitations of a bed and breakfast accommodation.

Building. The terms "building" and "structure" shall be synonymous, and shall mean that which is framed, erected, constructed or placed to stand temporarily or permanently on a tract of land. This definition shall specifically include a mobile home and accessories thereto. Driveways or walks not more than six inches higher than the ground on which they rest shall not be considered buildings.

Building Site. That portion of the lot, parcel or unpartitioned or unsubdivided tract of land upon which the building appurtenances are to be placed, or are already existing, including adequate areas for sewage disposal, light, air clearances, proper drainage, appropriate easements and, if applicable, other items required by the Lane Code.

Camp. An area designed for organizational recreation which may include facilities such as; swimming pools, meetinglialls and indoor shelters for recreation.

Campground. An area designed for short-term recreational purposes and where facilities, except commercial activities such as grocery stores and laundromats, are provided to accommodate that use. Space for tents, campers, recreational vehicles and motor homes are allowed and permanent open air shelters (adirondacks) may be provided on the site by the owner of the development.

Camping Vehicle Park. Synonymous with definition of Recreational Vehicle Park.

Cemetery. Land used or intended to be used for the burial of the dead and dedicated for cemetery purposes, including

columbariums, crematoriums, mausoleums and mortuaries, when operated in conjunction with and within the boundary of such cemetery.

Church. A building, together with its accessory buildings and uses, where persons regularly assemble for worship, and which building, together with its accessory buildings and uses, is maintained and controlled by a religious body organized to sustain public worship. A church does not include a school.

Clinic. Single or multiple offices for physicians, surgeons, dentists, chiropractors, osteopaths and other members of the healing arts, including a dispensary in each such building to handle only merchandise of a nature customarily prescribed by occupants in connection with their practices.

Cluster Subdivision. A subdivision for which the applicable zoning district allows relaxed lot area, coverage and setback requirements and alternative types of dwellings as specified in Lane Code Chapter 16, and which is consistent with the cluster subdivision Policy #24 set forth under Goal 2, Land Use Planning of the Lane County General Plan Policies.

Communication Facility. A facility constructed for the purpose of transmitting telegraph, telephone, microwave, television, radio and other similar signals.

Comprehensive Plan. A generalized, coordinated land use map and policy statement of the governing body of a local government that interrelates all functional and natural systems and activities relating to the use of lands, including, but not limited to, sewer and water systems, transportation systems, educational facilities, recreational facilities and natural resources and air and water quality management programs. "Comprehensive" means all inclusive, both in terms of the geographic area covered and functional and natural activities and systems occurring in the area covered by the plan. "General nature" means a summary of policies and proposals in broad categories and does not necessarily indicate specific locations of any area, activity or use. A plan is "coordinated" when the needs of all levels of governments, semipublic and private agencies and the citizens of Oregon have been considered and accommodated as much as possible. "Land" includes water, both surface and subsurface, and the air.

Contiguous. Having at least one common boundary line greater than eight feet in length. Tracts of land under the same ownership and which are intervened by a street (local access, public, County, State or Federal street) shall not be considered contiguous.

County Official. The Director of a Lane County Department or Division, or any Lane County advisory committee or commission acting in its official capacity.

Day. A calendar day, computed consistent with ORS 174.120.

Day Care Nurseries. Any institution, establishment or place in which are commonly received at one time, six or more

children not of common parentage, under the age of six years, for a period or periods not exceeding 12 hours, for the purpose of being given board, care or training apart from their parents or guardians for compensation or reward.

Department. The Lane County Department of Public Works.

Depth. The horizontal distance between the front and rear boundary lines measured in the mean direction of the side boundary lines.

Development. The division of a parcel of land into two or more parcels; the construction, reconstruction, conversion, structural alteration, relocation or enlargement of any structure; any mining, excavation, landfill or grading.

Development, Minimal. Development which is of minimal economic value and is essentially impermanent. Examples are dune boardwalks, fences which do not substantially affect sand erosion or migration, temporary open-sided structures or approved septic drainfield serving permitted development.

Director. The Director of the Land Management Division of the Lane County Public Works Department, or the Director's delegated representative within the Department.

Divide. To separate a tract or contiguous tracts of land under the same ownership into smaller tracts and different ownerships by deed, contract or lease; and when used herein refers collectively to partitions and subdivisions. To divide land shall not include the following:

(1) Leasing or financing of apartments, offices, stores or similar spaces within an apartment building, industrial building.

(2) Renting or leasing of spaces within a mobile home park, vacation (recreational) trailer park, motel, tourist court, campground or industrial development.

(3) Minerals, oil or gas leases.

(4) A lease for agricultural purposes.

(5) Foreclosures of liens.

(6) Foreclosures of recorded contracts for sale of real property.

(7) The creation of cemetery lots.

(8) Any adjustment of a property boundary line where an additional parcel of land is not created and where the existing tract of land reduced in size by the adjustment is not reduced below the minimum area requirements of the applicable zoning.

(9) The transfer of ownership of a lot or parcel in an approved and recorded subdivision plat or partition map.

Dune. A hill or ridge of sand built up by wind along sandy coasts.

Dune, Active. A dune that migrates, grows and diminishes primarily according to the force of wind and supply of sand. The dune has no soil development and little, if any, cohesion of underlying sand. Active dunes include all open sand (vegetation-free) areas and active (sparsely vegetated) hummocks and foredunes. Soil types are 72K and occasionally Westport series soils.

Dune, Older Stabilized. A dune which presently has sufficient vegetation to be stabilized from wind erosion, but which exhibits little, if any, soil development or cohesion of underlying sand. This includes soilless dunes recently stabilized with beach grass and younger stabilized dunes which may possess forest communities and some soil development, but which lack consolidation of underlying sands. Soil types are of Westport and Netarts series soils.

Dwelling. A building or portion thereof which is occupied in whole or in part as a residence or sleeping place, either permanently or temporarily, by one or more families, but excluding hotels, motels, auto courts, mobile homes and camping vehicles.

Dwelling, Multiple. A building designed and used for occupancy by three or more families, all living independently of each other, and having separate housekeeping facilities for each family.

Dwelling, SingleFamily. A detached dwelling designed or used exclusively for the occupancy of one family and having housekeeping facilities for one family.

Dwelling, TwoFamily (Duplex). A building consisting of two separate dwelling units with a common roof and common foundation, designed and used exclusively for the occupancy of two families living independently of each other and having housekeeping facilities for each family.

Estuary. A body of water semienclosed by land, connected with the open ocean and within which salt water is usually diluted by fresh water derived from the land. The estuary includes: (a) estuarine water; (b) tidelands; (c) tidal marshes; and (d) submerged lands. Estuaries extend upstream to the head of tidewater.

Existing Mobile Home Park. Any lot where two or more permanent mobile homes are located or proposed to be located for the primary purpose of being rented or leased for residential purposes, for which the construction of facilities for servicing the lot on which the mobile home is to be affixed (including, at a minimum, the installation of utilities, either final site grading or the pouring of concrete pads, and the construction of streets) is completed.

Expansion of an Existing Mobile Home Park. The preparation of additional sites by the construction of facilities for servicing the lots on which the mobile homes are to be affixed (including the installation of utilities, either final site grading or pouring of concrete pads, or the construction of streets).

Exploration. Surficial survey measures which do not include active seismic surveys or prospect well drilling.

Family. An individual or two or more persons related by blood or marriage or group of not more than five persons (excluding servants), who need not be related by blood or marriage, living together in a dwelling unit.

Farm Use. The current employment of land for the primary purpose of obtaining a profit in money by raising, harvesting and selling crops or by the feeding, breeding, management and sale of, or the produce of, livestock, poultry, furbearing animals or honeybees or for dairying and the sale of dairy products or any other agricultural or horticultural use or animal husbandry or any combination thereof. "Farm use" includes the preparation and storage of the products raised on such land for human use and animal use and disposal by marketing or otherwise. It does not include the use of land subject to the provisions of ORS Chapter 321, except land used exclusively for growing cultured Christmas trees as defined in subsection (3) of this section.

(1) "Current employment" of land for farm use includes:

(a) Land subject to the soil-bank provisions of the Federal Agricultural Act of 1956, as amended (P.L. 84-540,70 Stat. 188);

(b) Land lying fallow for one year as a normal and regular requirement of good agricultural husbandry;

(c) Land planted in orchards or other perennials prior to maturity;

(d) Any land constituting a woodlot of less than 20 acres contiguous to and owned by the owner of land specially valued at true cash value for farm use even if the land constituting the woodlot is not utilized in conjunction with farm use;

(e) Wasteland, in an exclusive farm use zone, dry or covered with water, lying in or adjacent to and in common ownership with a farm use land and which is not currently being used for any economic farm use;

(f) Land under dwellings customarily provided in conjunction with the farm use in an exclusive farm use zone; and

(g) Land under buildings supporting accepted farm practices.

(2) As used in this subsection, "accepted farming practice" means a mode of operation that is common to farms of a similar nature, necessary for the operation of such farms to obtain a profit in money, and customarily utilized in conjunction with farm use.

(3) "Cultured Christmas trees" means trees:

(a) Grown on lands used exclusively for that purpose, capable of preparation by intensive cultivation methods such as plowing or turning over the soil;

(b) Of a species for which the Department of Revenue requires a "Report of Christmas Trees Harvested" for purposes of ad valorem taxation;

(c) Managed to produce trees meeting U.S. No. 2 or better standards for Christmas trees as specified by the Agriculture Marketing Services of the United States Department of Agriculture; and

(d) Evidencing periodic maintenance practices of shearing for Douglas fir and pine species, weed and brush control and one or more of the following practices: Basal pruning, fertilizing, insect and disease control, stump culture, soil cultivation, irrigation.

Fill. The placement by humans of sand, gravel, earth, sediment or other material to create new uplands or raise the elevation of land. Activities such as diking, jetties, groins, breakwaters (nonfloating) and dredge material can also be considered fill if they: (a) involve the human placement of materials; and (b) create new uplands or raise the elevation of land.

Flood or Flooding. A general or temporary condition of partial or complete inundation of normally dry land areas from the overflow of inland or tidal waters from any source.

Flood Elevation Determination. A determination by the Admnistrator of the water surface elevations of the base flood from the approved flood hazard studies.

Flood Hazard Boundary Map, (FHBM). An official map of the County furnished by the Federal Insurance Administration, labeled a Flood Hazard Boundary Map (FHBM) and delineating the boundaries of flood hazard areas.

Floodplain. A physical geographic term describing any land area susceptible to being inundated by water from any source.

Floodplain Management. The operation of an overall program of corrective and preventative measures for reducing flood damage, including, but not limited to, emergency preparedness plans, flood control works and floodplain management regulations.

Floodplain Management Regulations. This Floodplain ordinance, together with building code requirements, health regulations and any combination thereof, which provide standards for the purpose of flood damage prevention and reduction.

Floodproofing. Any combination of structural and nonstructural additions, changes or adjustments to structures which reduce or eliminate flood damage to real estate or improved real property, water and sanitary facilities, structures and their contents.

Floodway, Regulatory. The channel of a river or other watercourse and the adjacent land areas that must be reserved in order to discharge the waters of a base flood without cumulatively increasing the water surface elevation.

Floor, Habitable. A floor usable for living purposes, which includes working, sleeping, eating, cooking or recreation, or a combination thereof. A floor used only for storage purposes is not a habitable floor.

Foredune. The first ridge of sand or hummock, dunes situated immediately above the highest tide line and parallel to the beach. This includes active foredunes, conditionally stable foredunes and older foredunes. These may be sparsely vegetated or vegetated to the degree that they are wind stable. Soil types are Heceta fine sand 204A and Westport soils 205C and 206D.

Forest Uses. Are (1) the production of trees and the processing of forest products; (2) open space, buffers from noise and visual separation of conflicting uses; (3) watershed protection and wildlife and fisheries habitat; (4) soil protection from wind and water; (5) maintenance of clean air and water; (6) outdoor recreational activities and related support services and wilderness values compatible with these uses; and (7) grazing land for livestock.

Freeboard. A factor of safety usually expressed in feet above a flood level for purposes of floodplain management.

Garage, Private Parking. A publicly or privately-owned structure having one or more tiers of height used for the parking of automobiles for the tenants, employees or owners of the property for which the parking spaces contained in or on said garage are required by this Chapter, and which is not open for use by the general public.

Garage, Public Parking. A publicly or privately-owned structure having one or more tiers of height used for the parking of automobiles and open for use by the general public, either free or for remuneration. Public parking garages may include parking spaces for customers, patrons or clients which are required by this Chapter, provided said parking spaces are clearly identified as free parking space(s) for the building or use which is required to provide said space(s).

General Merchandise. Items for human use, including: books and stationary, newspapers and magazines, clothing, furniture, drugs, curios and antiques, plants and flowers, household goods and furnishings, musical instruments and supplies, seeds and garden supplies, sporting goods, jewelry, art objects and supplies, pottery, handicrafts, photographic supplies, optical goods.

Grazing. The use of land for the pasture of horses, cattle, sheep, goats and/or other domestic herbivorous animals alone or in conjunction with agricultural pursuits.

Grazing, Low Intensity. Low intensity grazing is the use of land for pasture of horses, cattle, sheep, goats and/or other domestic herbivores at levels which will not damage permanent ground cover.

Group Care Home. Any home or institution maintained and operated for the care, boarding, housing or training of six or more physically, mentally or socially handicapped persons or delinquent or dependent persons by any person who is not the parent or guardian of and who is not related by blood, marriage or legal adoption to such persons.

Guest House, Servants' Quarters. An accessory building without kitchen or cooking facilities and occupied solely by nonpaying guests or by servants employed on the premises.

Hearings Official. A person who has been appointed by the Board of County Commissioners to serve at its pleasure and at a salary fixed by it.

Horticultural Specialties. A crop distinguishable from typical commercial crops mentioned in the farm groupings of the EFU zone which are conducive to intensive management techniques.

Improvement Agreement. An agreement that under prescribed circumstances may be used in lieu of required improvements of a performance agreement. It is a written agreement that is executed between the County and a developer, in a form approved by the Board of County Commissioners, in which the developer agrees to sign at a time any and all petitions, consents, etc., and all other documents necessary to improve an abutting road or other required improvements to County standards and to waive all rights or remonstrances against such improvements, in exchange for which the County agrees that the execution of the improvement agreement will be deemed to be in compliance with the improvement requirements of the Code.

Intensification. Any additions which increase or expand the area or amount of an existing use or the level of activity. Remodeling of the exterior of a structure is an intensification when it will substantially alter the appearance of the structure. Intensification shall not include the completion of a structure for which a valid permit was issued as of December 5, 1975.

Interior Lot. A lot, other than a corner lot, having frontage on only one street.

Kennel; Commercial Breeding. A place of business for the breeding and/or selling of dogs. The term is not intended to include an animal hospital or noncommercial kennel.

Kennel; Commercial. A place of business for the breeding and/or selling of dogs. The term is not intended to include an animal hospital or noncommercial kennel.

Kennel; Noncommercial. An establishment or premises where three or more dogs, over six months of age, are kept or maintained. No more than two of the dogs shall be used for breeding. The term does not include any animal hospital.

Legal Interest. An interest in property not confined solely to ownership or possessory interest, but including all interests in property which in the discretion of the Planning Director, are not inconsistent with the intent and purposes of this Chapter. Such interests may include, but are not limited to, the following: owner, contract purchaser, lessee, renter, licensee, easement, resolution or ordinance of necessity to acquire or condemn adopted by a public or private condemnor.

Legal Lot. A tract of land which has been legally created in compliance with Lane County land division regulations and ORS Chapter 92:

(1) Any lot within a subdivision plat approved by the Board and recorded with the Lane County Clerk.

(2) Any lot within a minor subdivision plat endorsed and dated by the Secretary of the Lane County Planning Commission.

(3) Any parcel within a final partition map approved and recorded by Lane County.

(4) A tract of land created as a result of a deed or real property sales contract, which was not created as a result of (1)-(3) above, but which at the date the conveyance occurred, the creation of the tract was not subject to any Lane County land division regulations. However, contiguous units of unsubdivided or unpartitioned land under the same ownership shall constitute a single legal lot.

Loading Space. An off street space or berth on the same lot with a building for the temporary parking of a commercial vehicle while loading or unloading merchandise or materials and which abuts upon a street, alley or other appropriate means of access.

Lot. A unit of land that is created by a subdivision of land.

Lot Line, Front. The private property line contiguous with the public street line or place. For corner lots, the front lot line shall be the narrowest street frontage or as shown on the official plat of the property.

Lot Line, Rear. A lot line which is opposite and most distant from the front lot line. In the case of a triangular-shaped lot, the rear lot line for building purposes shall be assumed to be a line 10 feet in length within the lot, parallel to and at the maximum distance from the front lot line.

Lot Line, Side. Any lot line which is not a front or rear line.

Lot of Record. A legal lot which meets all of the lot of record standards specified in ORS Chapter 215 (Sections 9 to 13, Chapter 884, Oregon Laws) and is entitled to a dwelling or mobile home irrespective of land use regulations.

Low Intensity. An activity or use conducted at a level that does not require developed facilities and can be accommodated without change to an area or resource.

Map, Partition. A final diagram and other documentation relating to a major or minor partition.

Marsh, High Salt. Includes immature high marsh, mature high marsh and diked salt marsh. These marshes are from two to three feet above tide flat areas and are characterized by at least occasional tidal inundation at higher, high tides or, in the case of diked salt marshes, more infrequently with the opening of tide gates or with periodic flooding.

Mobile Home. A vehicle or structure constructed for movement on the public highways, that has sleeping, cooking and plumbing facilities, is intended for human occupancy and is being used for residential purposes.

Mobile Home Park. Any place where four or more mobile homes are located within 500 feet of one another on a lot, tract or parcel of land under the same ownership, the primary purpose of which is to rent space or keep space for rent to any person for a charge or fee paid or to be paid for the rental or use of facilities or to offer space free in connection with securing the trade or

patronage of such person. "Mobile Home Park" does not include a lot or lots located within a subdivision being rented or leased for occupancy by no more than one mobile home per lot if the subdivision was approved by the local government unit having jurisdiction under an ordinance adopted pursuant to ORS 92.010 to 92.160.

Natural Hazards. Natural events that are known to result in death or endanger the works of man, such as stream flooding, ocean flooding, groundwater, erosion and deposition, landslides, earthquakes, weak foundation soils and other hazards unique to local or regional areas.

Nursing Home. Any home, place or institution which operates and maintains facilities providing convalescent or chronic care, or both, which exceeds that as defined by "Residential Home".

100 Year Flood. See "Base Flood".

Ordinary High Water. The high water level is defined as that high level of a river which is attained during mean annual flood. It does not include levels attained during exceptional or catastrophic floods. It is often identifiable by physical characteristics such as a clear natural line impressed on the bank, shelving, changes in character in the soil, destruction or absence of vegetation not adapted for life in saturated soils or the presence of flotsam and debris. In the absence of identifying physical characteristics, ordinary high water may be determined by Step backwater analysis upon a two-year frequency flood as determined by the US Army Corps of Engineers.

Ordinary Low Water. The low watermark of a river is that point to which the waters normally recede when the volume of water is at its low level, not determined by the extraordinary year, and further means the line to which the Willamette River ordinarily recedes annually in season even though the elevation of that line may be higher as a result of the Corps of Engineers' flood control structures than would otherwise be the case without such structures. Submersible lands are also considered that land or bank area between the ordinary low and high waterline.

Outdoor Advertising and Structure. Any card, cloth, paper, metal, wood, plastic or painted sign of any kind or character whatsoever, placed for outdoor advertising purpose on the ground, on any tree, wall, rock, post, fence, building or structure: The term "placed" as used in this definition of "Outdoor Advertising Sign" and "Outdoor Advertising Structure" shall include erecting, constructing, posting, painting, printing, tacking, nailing, gluing, sticking, carving or otherwise fastening, affixing or making visible in any manner whatsoever.

Panhandle. A narrow extension of a tract, 60 feet or less in width, which is used as access to the main portion of the tract.

Parcel. A unit of land that is created by a partitioning of land.

Parking Area, Automobile. Space within a public parking area or a building, exclusive of driveways, ramps, columns, office

and work areas, for the temporary parking or storage of one automobile.

Parking Area, Private. Privately or publicly-owned property, other than streets and alleys, on which parking spaces are defined, designated or otherwise identified for use by the tenants, employees or owners of the property for which the parking area is required by this Chapter and which is not open for use by the general public.

Parking Area, Public. Privately or publicly-owned property, other than streets or alleys, on which parking spaces are defined, designated or otherwise identified for use by the general public, either free or for remuneration. Public parking areas may include parking lots for retail customers, patrons and/or clients as required by this Chapter.

Parking Space. A permanently maintained space with proper access for one standard sized automobile.

Partition. Either an act of partitioning land or an area or tract of land partitioned. Partitions shall be divided into the following two types:

(1) Major Partition. A partition which includes the creation of a road.

(2) Minor Parition. A partition that does not include the creation of any road.

Partition Land. Divide an area or tract of land into two or three parcels within a calendar year when such area or tract of land exists as a unit or contiguous units of land under single ownership at the beginning of such year.

Party. With respect to actions pursuant to LC 14.100 and LC 14.200, the following persons or entities are defined as parties:

(1) The applicant and all owners or contract purchasers of record, as shown in the files of the Lane County Department of Assessment and Taxation, of the property which is the subject of the application.

(2) Any County official.

(3) Any person, or his or her representative, and entity who is specially, personally or adversely affected by the subject matter, as determined by the Approval Authority.

Performance Agreement. A written agreement executed by a subdivider or partitioner in a form approved by the Board of Commissioners and accompanied by a security also approved by the Board. The security shall be of sufficient amount to ensure the faithful performance and completion of all required improvements in a specified period of time.

Person. A natural person, his heirs, executors, administrators or assigns, or a firm, partnership or corporation, its heirs or successors or assigns, or the agent of any of the aforesaid, or any political subdivision, agency, board or bureau of the State.

Personal Services. Laundering, dry cleaning and dyeing; rug cleaning and repair; photographic services; beauty and barber shops; apparel repair and alterations; shoe repair and maintenance; etc.

Planning Commission. The Planning Commission of Lane County, Oregon, which shall consist of two Planning Commissions referred to as the Lane County Planning Commission and the West Lane Planning Commission.

Plat. A final diagram and other documents relating to a subdivision.

Primary Processing Facility. A facility for the primary processing of forest products. The primary processing of a forest product means the use of a portable chipper, stud mill or other similar equipment for the initial treatment of a forest product, to facilitate its shipment for further processing. Forest products, as used in this definition, means timber and other resources grown upon the land or contiguous units of land where the primary processing facility is located.

Professional Services. Medical and health services, legal services and other professional services, including those related to: engineering, architecture, education, scientific research, accounting, planning, real estate, etc.

Received. Acquired by or taken into possession by the Director.

Recreational Vehicle. A vacation trailer or other unit, with or without motive power, which is designed for human occupancy and to be used temporarily for recreational or emergency purposes and has a floor space of less than 220 square feet, excluding built-in equipment, such as wardrobes, closets, cabinets, kitchen units or fixtures and bath or toilet rooms. The unit shall be identified as a recreational vehicle by the manufacturer.

Recreational Vehicle Park. A development designed primarily for transient service on which travel trailers, pickup campers, tent trailers and self-propelled motorized vehicles are parked and used for the purpose of supplying to the public a temporary location while traveling, vacationing or recreating.

Refinement Plan. Refinement plans are a detailed examination of the service needs and land use problems peculiar to a particular area. Refinements of the Comprehensive Plan can include specific neighborhood or community plans, or special purpose or functional plans (such as water, sewer or transportation plans). In addition, refinement plan can be in the form of major planned unit developments, annexation and zoning applications, or other special area studies.

Replacement in Kind. The replacement of a structure of the same size as the original and at the same location on the property as the original.

Residential Home. A residence for five or fewer unrelated physically or mentally handicapped persons and staff persons who need not be related to each other or to any other home

resident. A "handicapped person" means an individual who has a physical or mental impairment which for the individual constitutes or results in a functional limitation to one or more major life activities. "Major life activity" means self-care, ambulation, communication, transportation, education, sociaization, employment and the ability to acquire and maintain adequate, safe and decent shelter.

Restoration. Revitalizing, returning or replacing original attributes and amenities such as natural biological productivity, aesthetic and cultural resources which have been diminished or lost by past alterations, activities or catastrophic events.

Restoration, Active. Use of specific positive remedial actions, such as removing fills, installing water treatment facilities or rebuilding deteriorated urban waterfront areas.

Restoration, Passive. The use of natural processes, sequences and timing which occurs after the removal or reduction of adverse stresses without other specific remedial action.

Roadside Stand. A use providing for the retail sale of any agricultural produce where more than one-half of the gross receipts result from the sale of produce grown on the unit of land where the roadside stand is located.

School. A place or institution for learning and teaching in which regularly scheduled and suitable instruction meeting the standards of the Oregon State Board of Education is provided.

Service Station. Any building, land area or other premises, or portion thereof, used or intended to be used for the retail dispensing or sales of vehicular fuels; and including as an accessory use the sale and installation of lubricants, tires, batteries and similar accessories.

Sewerage Facility or Sewage Facility. The sewers, drains, treatment and disposal works and other facilities useful or necessary in the collection, treatment or disposal of sewage, industrial wastes, garbage or other wastes.

(1) Sewerage Facility, Community. A sewerage facility, whether publicly or privately owned, which serves more than one parcel or lot.

(2) Sewerage Facility, Individual. A privately owned sewage facility which serves a single parcel or lot for the purpose of disposal of domestic waste products.

(3) Sewerage Facility, Public. A sewerage facility, whether publicly or privately owned, which serves users for the purpose of disposal of sewage and which facility is provided for or is available for public use.

Sign. Any fabricated sign for use outdoors, including its structure, consisting of any letter(s), figure, character, mark, point, plane, design, poster, picture, stroke, stripe, line, trademark, reading matter or illuminating device which is constructed, attached, erected, fastened or manufactured in any manner whatsoever to attract the public in any manner for recognized

purposes to any place, subject, person, firm, corporation, public performance, article, machine or merchandise display. However, the term "sign" shall not include any display of official, court or public notices, nor shall it include the flag, emblem or insignia of a nation, government unit, school or religious group, except such emblems shall conform to illumination standards set forth in this Chapter.

Site, Residential. An area of more or less intensive development, surrounding a dwelling, not less than 60 feet wide, nor less than 6,000 square feet in area and comparable to a normal city lot.

Solid Waste Management. A planned program providing for the collection, storage and disposal of solid waste including, where appropriate, recycling and recovery.

Start of Construction. The first placement of permanent construction of a structure (other than a mobile home) on a site, such as the pouring of slabs or footings or any work beyond the stage of excavation. For mobile homes not within mobile home parks, "start of construction" is the date on which the construction of facilities for servicing the site on which the mobile home is to be affixed (including, at a minimum, the construction of streets, either final site grading or the pouring of concrete pads, and installation of utilities) is complete.

State Plane Coordinate System. The system of plane coordinates which has been established by the U.S. Coast & Geodetic Survey for defining and stating the positions or locations of points on the surface of the earth within the State of Oregon.

Structure. Synonymous with the definition of building.

Structure in a Flood Hazard Area. A walled and roofed building, a mobile home or a tank used in the storage of gas or liquid which is principally above ground.

Subdivide Land. To divide an area or tract of land into four or more lots within a calendar year when such area or tract of land exists as a unit or contiguous units of land under a single ownership at the beginning of such year.

Subdivision. Either an act of subdividing land or an area or a tract of land subdivided as defined in this section.

Substantial Improvement. Any repair, reconstruction or improvement of a structure, the cost of which equals or exceeds 50 percent of the market value of the structure either, (a) before the improvement or repair is started, or (b) if the structure has been damaged, and is being restored, before the damage occurred. For the purposes of this definition "substantial improvement" is considered to occur when the first alteration of any wall, ceiling, floor or other structural part of the building commences, whether or not that alteration affects the external dimensions of the structure. The term does not, however, include either (1) any project or improvement of a structure to comply with existing state or local health, sanitary or safety code specifications which are solely necessary to assure safe living conditions, or (2) any alteration of

a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

Tract. A lot, parcel or unsubdivided or unpartitioned land under the same ownership. Contiguous units of unsubdivided or partitioned land under the same ownership shall be considered a single tract.

Urban. Those places which must have an incorporated city. Such areas may include lands adjacent to and outside the incorporated city and may also: (a) have concentrations of persons who generally reside and work in the area, and (b) have supporting public facilities and services.

Urbanizable. Those lands within an urban growth boundary and which are identified and (a) determined to be necessary and suitable for future urban use areas, and (b) can be served by urban services and facilities, and (c) are needed for the expansion of an urban area.

Use. The purpose for which land, submerged or submersible lands, the water surface or a building is arranged, designed or intended, or for which either land or building is or may be occupied or maintained.

Veterinary Clinic. Synonymous with the definition of "animal hospital".

Water Dependent Use. A use or activity which can be carried out only on, in or adjacent to water areas because the use requires access to the water body for waterborne transportation, recreation, energy production or source of water.

Water Related Use. Uses which are not directly dependent upon access to a water body, but which provide goods or services that are directly associated with water dependent land or waterway use, and which, if not located adjacent to water, would result in public loss of quality in the goods or services offered. Except as necessary for water dependent or water related uses or facilities, residences, parking lots, spoil or dump sites, roads and highways, restaurants, businesses, factories and trailer parks are not generally considered dependent on or related to water location needs.

Width. The horizontal distance between the side boundary lines measured in the mean direction of the front and rear boundary lines.

Yard. An open space on the same lot with a building unoccupied and obstructed from the ground upward, except as otherwise provided herein.

Yard, Front. A yard between the front line of the building (exclusive of steps) and the front property line.

Yard, Rear. An open, unoccupied space on the same lot with a building, between the rear line of the building (exclusive of steps, porches and accessory buildings) and the rear line of the lot.

Yard, Side. An open, unoccupied space on the same lot with a building, between the sidewall line of the building and the side line of the lot.

DEVELOPMENT APPROVAL PROCEDURES

RURAL COMPREHENSIVE PLAN

16.100 Development Approval Procedures - Relationship of Lane Code Chapter 14 into Lane Code Chapter 16. Lane Code Chapter 14 is the procedure for submittal, acceptance, investigation and review of applications for development of lands under the jurisdiction of the Lane County Rural Comprehensive Plan with these additions:

(1) Definitions. Abbreviations, terms, phrases, words and their derivatives shall be construed as specified in LC 16.090 above instead of as specified in LC 14.015.

(2) Special Notice and Review Requirements for a dwelling or Mobile Home Subject to Director Approval in the Exclusive Farm Use (E) Zone, LC 16.212(3)(c). When reviewing an application for a dwelling or mobile home conditionally permitted by LC 16.212(3)(c) below, the Director shall:

(a) In addition to the requirements of LC 14.070 (1) for a decision to approve an application in LC 16.100(2) above, specify in the notice that, "persons have 15 days following the date of postmark of the notice to file a written objection on the grounds only that the dwelling or mobile home, or activities associated with either residence, would force a significant change in or significantly increase the costs of accepted farming practices on nearby lands devoted to farm use."

(b) In addition to the requirements of LC 14.100(4), notice of a decision to approve an application in LC 16.100(2) above shall be mailed to persons who have requested notice of such applications and who have paid a reasonable fee imposed by the County to cover the cost of such notice.

(c) In addition to the requirements of LC 14.515(3)(d), an objection received within 15 days of the notice which factually alleges a significant change in or significant increase in the costs of accepted farming practices on nearby lands devoted to farm uses ,shall constitute sufficient assignment of error by the Approval Authority.

(d) A decision to approve or deny an application identified in LC 16.100(2) above shall become final unless appealed in the manner provided in LC 16.100(2)(a)-(c) above and LC Chapter 14, and unless the appeal is submitted to the Department within 15 days of the date of postmark for the notice of the decision by the Approval Authority.

(3) **Ex Parte Contacts.** A communication between County staff and the Planning Commission or Board shall not be considered an ex parte contact for the purposes of LC 14.200(5)(a).

NONIMPACTED FOREST LANDS ZONE (F.1, RCP)

RURAL COMPREHENSIVE PLAN

16.210 Nonimpacted Forest Lands Zone(F-1, RCP).

(1) Purpose. The purpose of the Nonimpacted Forest Lands District (F-1, RCP) is:

(a) To conserve forest land for forest uses in accordance with Statewide Planning Goal #4.

(b) To recognize that the preservation and protection of commercial forest lands within Lane County is necessary for the continuous production of forest crops, and that such are beneficial to the economy of the County and to the welfare of its people.

(c) To encourage multiple -use of forest land for commercial timber management, watershed protection, maintenance and protection of fish and wildlife resources, livestock habitat and recreation.

(d) To protect commercial forest lands from intrusion of noncompatible uses by prohibiting or restricting nonforest uses that create potential impacts.

(e) To implement the forest land policies of the Lane County Rural Comprehensive Land Use Plan.

It is the County's policy to protect forest operations from conflicting land uses. Nothing in this section is intended to interfere with normal forestry practices that might result in conditions such as noise, dust, smoke, visual impacts or odors for temporary periods of time. Existing or proposed nonforest uses (i.e. dwellings) within the Forest Lands Zones must recognize the intent of the Zone is to protect resource management activities and that in the event of conflict between residential uses and forestry practices, this Chapter will be interpreted in favor of these resource management practices.

(2) **Permitted Uses.** The following uses and activities are permitted subject to the general provisions and exceptions set forth by this Chapter of Lane Code:

(a) Forest uses, not including a residence.

(b) Farm uses, not including a residence.

(c) Mining and quarrying and processing of rock as follows:

(i) Permitted in accordance with the Forest Practices Act (ORS 527.610 to 527.730) and for the purpose of forest road construction and other forest related uses, exclusive of the sale of rock for nonforest uses.

(ii) ,When used solely in conjunction with a farm use on the same property on which the mining and quarry activity occurs, exclusive of sales of the rock.

(d) Nonresidential uses necessary and accessory to the uses listed above, such as:

(i) Fire prevention, detection and suppression facilities;

(ii) Landing strips or heliports;

(iii) Roads for management and safety;

(iv) Maintenance, repair and storage of forest management and processing equipment, logging equipment, and farm equipment by the owner or operator of such equipment, exclusive of sales.

(v) Utility facilities and transmission lines limited in size for permitted or accessory use.

(vi) Log scaling and weigh stations.

(vii) Sorting yards and log storage areas located on the same unit of land from which the logs are harvested or on a nearby unit of land.

(viii) Solid waste disposal sites for industrial forest wastes on the same unit of land from which the wastes originated.

(ix) Communication facility necessary and accessory to forest uses.

(e) Public parks, campgrounds, boating facilities, camps and such other recreational facilities, including accessory parking areas.

(f) Water impoundments with less than 100 acre feet storage capacity and in conjunction with beneficial uses of water customarily associated with fire prevention, forest uses or farm uses.

(g) Operations conducted for the exploration of geothermal resources, aggregate and other mineral or subsurface resources.

(h) Maintenance and repair of any lawfully existing residence.

(i) Fish and wildlife habitat management and any necessary and accessory uses.

(j) Facilities for the primary processing of forest products.

(k) Facilities and test plots, excluding a residence, for experimental and research activities associated with forest management and forest products.

(l) A dwelling or mobile home on a lot of record as defined by ORS Chapter 215 provided such lot of record does not already have a residence on it. The applicant shall provide factual documentation of compliance with each lot of record criterian.

(3) **Uses Subject to Director Approval.** The following uses and activities are permitted subject to prior submittal of an application pursuant to LC 14.050 and subject to Director approval of such application pursuant to LC 14.100 and the general provisions and exceptions set forth by this Chapter of Lane Code:

(a) Replacement of any legal residence existing, occupied, suitable for occupancy or in the process of being constructed, and such replacement need not be in kind (i.e., a mobile home may replace a dwelling or vice-versa). Any replacement authorized under this subsection shall be for a dwelling or mobile home to be located on the same site as the previous residence or on a site that has less impact on surrounding uses, and such replacement shall commence within one year of the date of removal of the previous residence.

(b) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is lcoated.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in an existing dwelling or mobile home, or other existing buildings normally associated with uses permitted under LC 16.210(2)(j) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.210(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification"for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval shall not receive extended approval by the Director, and the Director shall mail written

notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(4) **Uses Subject to Hearings Official Approval.** The following uses and activities are conditionally permitted subject to submittal of an application pursuant to LC 14.050 and approval of the application by the Hearings Official pursuant to LC 14.300 and subject to compliance with the conditional use criteria of LC 16.210(5) below:

(a) Sorting yards and log storage areas exceeding the standards of an accessory use specified under LC 16.210(2)(d)(vii) above.

(b) Maintenance repair and storage of forest management and processing equipment, logging equipment, and farm equipment when incidental to a forest repair and storage facility, as a business-enterprise operated by someone other than the owner of such equipment, exclusive of sales.

(c) Solid waste disposal sites exceeding the standards of an accessory use specified under LC 16.210(2)(d)(viii) above and not exceeding 10 acres in size.

(d) The mining, quarrying and processing of mineral, geothermal and other subsurface resources; and exploration, rock mining, quarrying and processing which exceeds the standards as specified under specified under LC 16.210(2)(c) above.

(e) Power distribution and/or telephone lines which exceed the standard as specified under LC 16.210(2)(d)(i) and (v) above.

(f) Communication facility.

(g) A hydroelectric generating facility with a water impoundment of less than 100 acre feet.

(h) A hydroelectric generating facility not exceeding 10 acres in size and located at an existing water impoundment which will not be increased in size because of the generating facility.

(i) Privately owned parks, campgrounds, , boat facilities, camps and other such recreational facilities, including accessory parking areas where overnight lodging is provided upon satisfying the following conditions:

(j) Lodges and any accessory facilities.

(i) Domestic water supplies for all development within designated forest lands shall emanate from surface or subsurface water sources contained within the boundary of the property in question; except as provided in LC 16.210(4)(i)(ii) below.

(ii) The domestic water supply is obtained from another source with the documented approval of

all other affected parties, with the condition that such use will not affect the right of the owner of that water source to undertake forest management practices on his or her property.

(iii) The water supply system shall: have a delivery capability of sustaining a volume of 20 gallons per minute for not less than 50 minutes; sufficient water outlets and serviceable hose not less than three-quarter inch inside diameter and a nozzle to reach nearby improvements; be maintained as a connected operating unit ready for immediate use during periods of fire danger.

(5) **Conditional Use Criteria.** Uses conditionally permitted under LC 16.210(4) above are subject to compliance with the following criteria; except that uses conditionally permitted under LC 16.210(4)(j) above are subject to compliance with the below criteria (a)(ii) and (b-(f).

(a) (i) Evidence is provided supporting reasons why the proposed use should be sited in forest lands, or;

(ii) That the proposed site is on land generally unsuitable for forest uses;

(b) That the proposed use will not significantly impact forest uses on adjacent and nearby forest lands;

(c) That the proposed use will not significantly increase the costs of forest management on adjacent and nearby forest lands;

(d) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use;

(e) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby forest lands, and these measures may be established as conditions of approval; and

(f) That the proposed use is consistent with the forest policies contained in the Rural Comprehensive Plan.

(6) **Area.** The minimum area requirement for the division of land shall be 40 acres or a 1/4 of a 1/4 section, except as provided below:

(a) A division of land to create a parcel of less than 40 acres may be conditionally allowed pursuant to compliance with Lane Code Chapter 13 if it is for the purpose of separating an existing residence from the adjoining forest land and the parcel containing the residence is limited to the least amount of area reasonably possible so as to maximize forest use on the other parcel.

(b) The adjustment of a common property boundary which results in no additional parcels and if, where the

parent parcel reduced in size is below 40 acres, the adjusted common property boundary is the most conducive one for forest management considering the unique physical characteristics of the land, including terrain, stream courses, soils, existing nonforest uses, etc.

(7) **Property Development Standards.** All uses or activities permitted or conditionally permitted above, except the growing and harvesting of tree species regulated by the Oregon Forest Practices act, shall be subject to the following development standards, etc.

(a) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(1) The Department -of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100 foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 below with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(b) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall be conducted in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.210(7)(b)(i) above. Where vegetation removal beyond that allowed in LC 16.210(7)(b)(i) above cannot be avoided,, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(aa) Vegetation removal necessary to provide water access for a water dependent use.

(bb) Removal of dead or diseased vegetation that poses a safety or health hazards.

(cc) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(c) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access public road and 10 feet from all other property lines, except as provided above.

(d) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

IMPACTED FOREST LANDS ZONE (F-2, RCP)

RURAL COMPREHENSIVE PLAN

16.211 Impacted Forest Lands Zone (F-2, RCP).

(1) **Purpose.** The purpose of the Impacted Forest Lands Zone (F-2, RCP) is:

(a) To implement the forest land policies of the Lane County Rural Comprehensive Plan which recognize that certain forest lands are impacted by nonforest uses and merit different treatment than nonimpacted forest lands.

(b) To conserve forest land for forest uses consistent with Statewide Planning Goal #4, including commercial timber management, watershed protection, maintenance and protection o4 fish and wildlife resources, livestock habitat and recreation.

(c) In areas of mixed farm/forest uses where forest uses do not predominate, to conserve such land for uses consistent with Statewide Planning Goals #3 and #4.

(d) To protect lands mentioned in LC 16.211(1)(b) and (c) above from the intrusion of noncompatible uses by restricting nonforest uses or nonforest and nonfarm uses that create potential impacts.

(2) **Permitted Uses.** The following uses and activities are permitted subject to the general provisions and exceptions prescribed by this Chapter of Lane Code, except that for any property designated in the Eugene-Springfield Metropolitan Plan as significant in terms of OAR 660-16-000/025 and designated as "1B", a Goal 5 ESEE consequences analysis per the Goal #5 Administrative Rule must first be completed. If the landowner and County do not agree on the method to achieve the Goal, the matter shall be forwarded to the Hearings Official for processing consistent with LC 16.100.

(a) Forest use.

(b) Farm uses as defined by ORS 215.203(2).

(c) Mining, quarrying and processing of rock for forest or farm road construction on the same tract on which the mining and quarrying occurs.

(d) Water impoundments with less than 100 acre feet storage capacity and in conjunction with beneficial uses of water customarily associated with fire prevention, forest uses or farm uses.

(e) Operations conducted for the exploration of geothermal resources, aggregate and other mineral or subsurface resources.

(f) Public parks, campgrounds, boating facilities, camps and such other recreational facilities, including accessory parking areas.

shall be for a residence to be located on the same site as the previous residence or on one that has lessor impact on surrounding forest uses, and such replacement shall commence within one year of the date of removal of the previous residence.

(b) A dwelling or mobile home, and any accessory structures, on a vacant legal lot containing at least 10 acres shall be deemed accessory and necessary to the forest management of the legal lot provided:

(i) A detailed forest management plan sufficient to obtain a tax deferral is submitted for the legal lot which demonstrates forest production will be enhanced by on site forest management from the residence, and

(ii) Based upon the above-referred forest management plan, the property has qualified for a tax deferral pursuant to State law, and

(iii) The forest management plan shall specify how the following practices, when applicable, are to be addressed: road and fire trail construction and maintenance, site preparation, reforestation, stand conversion, planting of nonstocked openings, competition reduction/release, precommercial thinning, harvest scheduling/rotation and special site treatments for topography and other concerns.

(iv) If the legal lot does not have a forest deferral pursuant to State law, then upon substantial completion of the details represented in the forest management in LC 16.211(3)(b)(i) above, the dwelling or mobile home shall be allowed on the property. Substantial completion of the details represented in the forest management plan shall be verified by a qualified private forester and such verification shall be submitted in writing to the Department. During the interim, while the forest management plan is being implemented on the subject legal lot, a temporary mobile home in conjunction with the forest use shall be allowed for a period not to exceed five years. If the forest management plan is not implemented within the five-year period, the temporary mobile home shall be removed.

(c) A dwelling or mobile home, and any accessory structures, in conjunction with the propagation or harvesting of a forest product on a vacant legal lot that is managed as part of a woodlot meeting the Douglas-fir cubic foot site index and acreage requirements below, provided sufficient factual documentation concerning the forest management, the soils, cubic foot site indices and acreage of the legal lot is presented by the applicant to verify that the legal lot meets the minimum cubic foot site index/acreage requirements specified below:

Whenever a legal lot has cubic foot site indices which fall into more than one of the below categories, compliance with the minimum acreage requirements may be determined by:

(i) Identifying the number of acres in each cubic foot site index category.

(ii) Identifying the percentage of the acreage requirement met for each category. This percentage shall be determined by dividing the number of acres in each category by the acreage minimum number for the same category.

(iii) Adding the percentages identified in LC 16.211(3)(c)(ii) above. The minimum acreage requirement shall have been met if the percentage total is 100 or greater.

Cubic Foot Site Class	Potential Yield Acreage cu.ft./acre/yr	Minimum
6	(20-49 cf/ac)	64
	(50-84 cf/ac)	43
5	(85-119 cf/ac)	34
	(120-164 cf/ac)	24
4	(165-224 cf/ac)	17

subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in an existing dwelling or mobile home, or other existing buildings normally associated with uses permitted under LC 16.211(2) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.211(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications fore. home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as

provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located. –

(e) A dwelling when necessary and accessory to the use permitted in LC 16.211-2(i) above

(4) **Uses Subject to Director Approval and Located in Mixed Agricultural and Forest Areas.** The uses specified in LC 16.211(4)(c) through (m) below, are conditionally permitted upon:

(1) A positive determination that agricultural uses predominate on the subject property. This determination can be made either of two ways:

(i) The applicant demonstrates that generally accepted agricultural practices regularly occur over 50 percent of the property.

(ii) The applicant demonstrates that annual gross income for the subject property when obtained from farm use is greater than the annual gross income if managed for forest purposes. This will require a comparison of the actual annual gross farm income from accepted farm practices to the estimated annual gross income derived from accepted forest practice when managed on a sustained yield basis. In addition, the applicant must demonstrate that the area in which the subject property is located is characterized as a mixed farm forestry area.

(b) Prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 and compliance with the applicable approval criteria and standards of this Chapter of Lane Code.

(c) Public or private schools, including all buildings essential to the operation of a school.

(d) Churches.

(e) Utility facilities necessary for public service, except commercial facilities for the purpose of generating power for use by public sale.

(f) A dwelling or mobile home customarily provided in conjunction with farm use existing on the subject

property and which complies with the requirements for such a residence specified within the Exclusive Farm Use (E) zone, LC 16.212(2)(f).

(g) A dwelling or mobile home customarily provided in conjunction with a farm use not yet existing on the subject property and which complies with the requirements for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(g).

(h) A dwelling or mobile home customarily provided in conjunction with farm use existing on the subject property, where another residence already exists on the subject property, and which complies with the requirements, for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(h).

(i) A dwelling or mobile home to be occupied by a relative of the farm operator which complies with the requirements for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(i).

(j) A mobile home in conjunction with an existing dwelling or mobile home, on the same legal lot as the existing residence, and as a temporary use for the term of a hardship suffered by the existing resident or a relative of the existing resident which is necessary and accessory to continued forest management or, complies with the requirements for such a residence specified within the Exclusive Farm Use (E) Zone, LC 16.212(2)(j).

(k) A dwelling or mobile home in conjunction with farm use or the propagation or harvesting of a forest product on a legal lot that is managed as part of a farm operation or woodlot if the farm operation or woodlot:

(i) Consists of 20 or more acres.

(ii) Is not smaller than the average farm or woodlot in the County producing at least $2,500 in annual gross income from the crops, livestock or forest products to be raised on the farm operation or woodlot.

(iii) Does not already have a dwelling or mobile home on it.

(l) A dwelling or mobile home in conjunction with farm use or the propagation or harvesting of a forest product on a legal lot that is managed as part of a farm operation or woodlot smaller than required under LC 16.212(6) (Exclusive Farm Use Zone) if the legal lot:

(i) Has produced at least $10,000 in annual gross farm income in two consecutive calendar years out of the three calendar years before the year in which the application for the dwelling was made or is planted in perennials capable of producing upon harvest an average of at least $10,000 in annual gross farm income.

(ii) Is a woodlot capable of producing an average over the growth cycle of $10,000 in gross annual income.

(iii) Does not already have a dwelling or mobile home on it.

(m) A site for the disposal of solid waste that has been ordered to be established by the Environmental Quality Commission under ORS 459.049, together with equipment, facilities or buildings necessary for its operation.

(5) Special Uses - Hearings Official Approval. The following uses are conditionally permitted subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.300 and subject to compliance with the criteria specified in LC 16.211(6) below:

(a) Sorting yards and log storage areas on a temporary site not exceeding 10 acres in size and exceeding the standards specified under LC 16.211(2)(k)(vi) above.

(b) Maintenance, repair and storage of forest management and processing equipment, logging equipment and farm equipment as a business enterprise operated by someone other than the owner of such equipment, exclusive of sales.

(c) Solid waste disposal sites for industrial forest wastes exceeding the standards specified under LC 16.211(2)(k)(viii) above and not exceeding 10 acres in size.

(d) The mining, quarrying and processing of mineral, geothermal and other subsurface resources; rock mining, quarrying and processing which exceeds the standards as specified under LC 16.211(2)(c) above; and explosives storage in conformity with state and federal requirements.

(e) Power distribution and/or telephone lines which exceed the standard as specified under LC 16.211(2)(k)(v) above.

(f) Communication facility.

(g) A hydroelectric generating facility with a water impoundment of less than 100 acre feet.

(h) A hydroelectric generating facility not exceeding 10 acres in size and located at an existing water impoundment which will not be increased in size because of the generating facility.

(i) Privately owned parks, campgrounds, boat facilities, camps and other such recreational facilities, including accessory parking areas, where overnight lodging is provided, upon satisfying the following conditions:

(i) Domestic water supplies for all development within designated forest lands shall emanate from surface or subsurface water sources contained within the boundary of the property in question; except as provided in LC 16.211(5)(i)(ii) below.

(ii) The domestic water supply is obtained from another source with the documented approval of all other affected parties, with the condition that such use will not affect the right of the owner of that water source to undertake forest management practices on his or her property.

(iii) The water supply system shall: have a delivery capability of sustaining a volume of 20 gallons per minute for not less than 50 minutes; sufficient water outlets aid serviceable hose not less than three-quarter inch inside diameter and a nozzle to reach nearby improvements; be maintained as a connected operating unit ready for immediate use during periods of fire danger.

(j) Commercial activities that are in conjunction with farm use.

(k) Community centers owned and operated by a governmental agency or a nonprofit community organization, hunting and fishing preserves, parks, playgrounds and campgrounds.

(l) Golf courses.

(m) Commercial utility facilities for the purpose of generating power for public use by sale.

(n) Personal-use airports for airplanes and helicopter pads, including associated hanger, maintenance and service facilities. A personal-use airport as used in this section means an airstrip restricted, except for aircraft emergencies, to use by the owner, and, on an infrequent and occasional basis, by invited guests, and by commercial aviation activities in connection with agricultural operations. No aircraft may be based on a personal-use airport other than those owned or controlled by the owner of the airstrip. Exceptions to the activities permitted under this definition may be granted through waiver action by the Aeronautics Division in specific instances. A personal-use airport lawfully existing as of September 13, 1975, shall continue to be permitted subject to any applicable regulations of the Aeronautics Division.

(o) The boarding of horses for profit.

(p) A site for the disposal of solid waste approved by the governing body of a city or county or both and for which a permit has been granted under ORS 459.245 by the Department of Environmental Quality, together with

equipment facilities or buildings necessary for its operation.

(q) A dwelling or mobile home which is not necessary and accessory to forest use or customarily provided in conjunction with farm use and which is located upon a vacant legal lot.

(r) Lodges and any accessory facilities.

(6) Hearings Official/Special Use Approval Criteria.

The uses specified in LC 16.211((5) above, as identified below, are subject to compliance with the following criteria:

(a) Uses under LC 16.211(5)(a),(b),(c),(e),(f),(g),(h) and (i) above subject to compliance with the criteria identified in LC 16.211(6)(f)(i) through (vi) below. Uses under LC 16.211(5)(r) above are subject to compliance with the criteria identified in LC 16.211(6)(f(ii) through (iv) and (ix) below.

(b) Use under LC 16.211(5)(d) above subject to compliance with the criteria identified in LC 16.211 (6)(f)(i) through (vi) and (xi) below.

(c) Uses under LC 16.211(5)(j),(1),(m),(n),(o),and (p) above subject to compliance with the criteria identified in LC 16.211(6)(f)(i) through (viii) below, and upon a positive determination that agricultural uses predominate on the subject property. This determination can be made either of two ways:

(i) The applicant demonstrates that generally accepted agricultural practices regularly occur over 50 percent of the property.

(ii) The applicant demonstrates that annual gross income for the subject property when obtained from farm use is greater than the annual gross income if managed for forest purposes. This will require a comparison of the actual annual gross farm income from accepted farm practices to the estimated annual gross income derived from accepted forest practice when managed on a sustained yield basis. In addition, the applicant must demonstrate that the area in which the subject property is located is characterized as a mixed farm forestry area.

(d) Use under LC 16.211(5)(k) above subject to compliance with the criteria identified in the LC 16.211(6)(c)(i) and (ii) above, and the criteria identified in LC 16.211(6)(f)(iii) through (viii) and (xi) below.

(e) Use under LC 16.211(5) (q) and (r) above, subject to compliance with the criteria identified in LC 16.211(6)(f)(v), (vii),(viii),(ix) and (x) below.

(f) Criteria.

(i) Evidence is provided supporting reasons why the proposed use should be sited in forest

lands, or that the proposed site is on land generally unsuitable for forest uses.

(ii) That the proposed use will not significantly impact forest uses on adjacent and nearby forest land.

(iii) That the proposed use will not significantly increase the costs of forest management on adjacent and nearby forest lands.

(iv) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use.

(v) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby forest or agricultural lands, and these measures may be established as conditions of approval.

(vi) That the proposed use is consistent with the forest policies contained in the Rural Comprehensive Plan.

(vii) That the proposed use will not interfere seriously with forest practices as regulated by the Forest Practices Act on nearby or adjacent lands devoted to forest use, and that the proposed use will not interfere seriously with accepted farming practices, as defined in ORS 215.203(2)(c), on adjacent lands devoted to farm use.

(viii) That the proposed use does not materially alter the stability of the overall land use pattern of the area.

(ix) That the proposed use is situated upon land generally unsuitable for the production of farm crops, livestock and the growing and harvesting of tree species regulated by the Forest Practices Act, considering terrain, adverse soil or land conditions, drainage and flooding, vegetation, location and size of the tract.

(x) That the proposed use is compatible with farm use as described in ORS 215.203(2) and the purpose and intent set forth in ORS 215.243, and the proposed use is compatible with forest uses as regulated by the Forest Practices Act and the purpose and intent set forth in ORS 527.630.

(xi) That the proposed use will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity.

(7) **Area.** The minimum area requirement for the division of land shall be as follows:

(a) Except as provided in LC 16.211(7)(b) below, for the creation of a woodlot for the purpose of the

propagation or harvesting of a forest product, the minimum area shall be at least 20 acres and that which is necessary to meet the acreage minimum requirements specified in LC 16.211(3)(c) above, and additional area to accommodate a homesite, access and fire breaks required by LC 16.211(8) below and a logical parcel layout or use of the parcel. The applicant shall submit sufficient factual documentation to verify that each proposed tract meets the above requirements. Area computations shall be measured consistent with the LC 16.211 (3)(c) above.

(b) The minimum area for the creation of a woodlot, or lot or parcel, for the purpose of the propogation or harvesting of a forest product shall be 80 acres in the following situation:

(i) The tract to be divided contains at least 160 acres, and

(ii) The proposed lot or parcel is adjacent to land zoned F-1, RCP.

The 80 acres shall be of sufficient dimensions to accommodate a logical lot or parcel layout and forest use of each tract. The applicant shall submit sufficient factual documentation to verify that the proposed lots or parcels comply with the criteria of LC 16.211(7)(b) herein. The provisions of LC 16.211(7)(a) above shall not apply to the division of an 80-acre lot or parcel created pursuant to the criteria of LC 16.211(7)(b) herein unless the property adjacent to the 80-acre lot or parcel is no longer zoned F-1, RCP.

(c) For the creation of a farm parcel, the minimum area shall be 40 acres. A farm management plan including the information required by the Exclusive Farm Use (E) Zone, LC 16.212(2)(g)(v)(e) below shall be presented by the applicant and shall factually demonstrate the suitability of the land for the intended use. A statement shall be placed on the face of the map for the partition disclosing that a dwelling or mobile home is not guaranteed unless the provisions of this zone for a residence in a mixed farm/forest area are met. The provisions of LC 16.211(7)(a) above shall not apply to the division of a lot or parcel created pursuant to LC 16.211(7)(c) herein.

(d) For the creation of a farm parcel for the purpose of growing grapes, berries or horticultural specialities, the minimum area shall be 20 acres. The management plan and map statement requirements of LC 16.211(7)(b) above shall also apply.

(e) The remaining portion of the parent parcel being divided must also comply with either LC 16.211(7)(a),(b) (c) and (d) above.

(8) Siting and Fire/Safety Standards for Dwellings.

All dwellings and mobile homes conditionally permitted above:

(a) The Approval Authority shall balance the setback standards of LC 16.211(8)(a) with the siting requirements and application approval criteria specified elsewhere in LC 16.211 in order to minimize adverse impacts and to assure optimal siting of proposed residences consistent with the purposes of the F-2 zone. Where possible, residences shall maintain a setback of 500 feet from the adjoining lines of property zoned F-1 or 300 feet from adjoining lines of property zoned F-2 or EFU. Residences should be sited on the least valuable forest and farm areas on the property, or clustered with residences on other tracts in order to lessen impacts on forest or farm uses, and should be sited to avoid intruding unnecessarily on acres -free from existing roads and residences. In cases where residences are clustered, sited to avoid intruding onto resource areas, or where property dimensions do not allow it, the 500 foot or 300 foot setback may not be the most desirable or possible standard and should not be applied.

(b) Shall maintain a fuel break of 50 feet around the residence. Fuel breaks shall be free of hazardous fuels in the form of native vegetation. Irrigation or fire resistent vegetation shall be planted within the fuel break to prevent undue soil erosion. Fuel breaks shall be continually maintained and may contain individual tree specimens, however plant material shall not provide a means of readily spreading fire. Fuel breaks shall comply with the riparian vegetation protection standards of LC 16.211(9)(b) and (c) below.

(c) Shall provide an adequate fire suppression system. Unless otherwise authorized by the local fire official, the minimum acceptable system shall include the following:

(1) A water supply such as a pond, stream, tank, well, sump or any combination thereof, together with a delivery system capabl'e of sustaining a volume of 20 gallons per minute for not less than 20 minutes.

(ii) Sufficient water outlets, together with serviceable hose not less than three-quarter inch inside diameter and a nozzle to reach the dwelling and nearby improvements.

(iii) TThe water supply, pump, hose and nozzle shall be maintained as a connected, operating unit ready for immediate use during period of fire danger.

(d) Shall have a spark arrestor on any chimneys and a fire retardant roof.

(9) Other Property Development Standards. All uses or activities permitted or conditionally permitted above, except the growing and harvesting of tree species regulated by the Oregon Forest Practices Act, shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines except as provided below.

(b) Class I Stream Setbacks. A residence shall not be located closer than 100 feet from ordinary high water of a Class I stream and no other structure except a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by-the Comprehensive Plan. A lesser setback may be allowed if:

(1) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(1) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.211(9)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.211(9)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall

EXCLUSIVE FARM USE ZONE (E-RCP)

RURAL COMPREHENSIVE PLAN

16.212 Exclusive Farm Use Zone (E-RCP).

(1) Purpose. The purpose of the Exclusive Farm Use (E-RCP) Zone is to provide areas for the continued practice of commercial agriculture, guarantee the preservation and maintenance of areas so classified and minimize activities that may be incompatible with commercial agriculture. The Exclusive Farm Use Zone is to be applied to land designated as agricultural by the Rural Comprehensive Plan.

It is the County's policy to protect forestry and agricultural operations from conflicting land uses. Nothing in this section is intended to interfere with normal forestry or agricultural management or practices that might result in conditions such as noise, dust, smoke, visual impacts or odors for temporary periods of time. Existing or proposed nonforest or nonfarm uses (i.e. dwellings) within the Exclusive Farm Use Zone must recognize that the intent of the Zone is to protect resource management activities and that, in the event of conflict between residential uses and farm forestry or forestry practices, this Chapter will be interpreted in favor of these resource management practices.

(2) Permitted Uses. In the EFU Zone, the following uses and activities are permitted subject to the general provisions and exceptions set forth by this Chapter.

(a) Farm Use (See farm use definition)

(b) Propagation or harvesting of a forest product.

(c) Public or private schools, including all buildings essential to the operation of a school.

(d) Churches.

(e) Utility facilities necessary for public service, except commercial facilities for the purpose of generating power for use by public sale and transmission towers over 200 feet in height.

(f) A dwelling or mobile home customarily provided in conjunction with farm use (existing), provided it complies with the following requirements:

(i) The proposed dwelling or mobile home will be the only dwelling or mobile home on the subject property, contiguous property in the same ownership and any noncontiguous property which is managed as part of the same farm operation.

(ii) The proposed dwelling or mobile home will be located on a legal lot that is currently managed as part of a farm operation of a size equal to or greater than that described in LC 16.212(6)(d) below, and will be located on a legal lot that is not smaller than the minimum size allowed for the division of land as described in LC 16.212(7) below.

(iii) At least one occupant of the proposed dwelling or mobile home will be employed in conjunction with the current farm use of the farm operation.

(iv) Sufficient information is submitted by the person applying for the proposed dwelling or mobile home which factually documents compliance with the above criteria. Such information shall include, but not necessarily be limited to:

(aa) The size, location and ownership of the total property involved in the farm operation.

(bb) A copy of any farm use, lease agreements for the total property involved in the farm operation.

(cc) Identification of the specific farm uses conducted on the total property involved in the farm operation and the number of acres for each specific farm use.

(dd) Identification of the extent of involvement in the farm use activity by the occupants of the proposed dwelling or mobile home.

(ee) Identification by reference to LC 16.212(6)(d) below of the type of farm nnpratinn (i ᵽ farm arnunl that the nrnnricrad dwelling or mobile home would be customarily provided in conjunction with.

(g) A dwelling or mobile home customarily provided in conjunction with farm use (contemplated) which complies with the following requirements:

(i) The proposed dwelling or mobile home will be located on a legal lot which will be managed as part of a farm operation of a size equal to or greater than that described in LC 16.212(6)(d) below, but is not currently so managed.

(ii) The proposed dwelling or mobile, home will be located on a legal lot that is not smaller than the minimum size allowed for the division of land as described in LC 16.212(7) below.

(iii) At least one occupant of the proposed dwelling or mobile home would be employed in conjunction with the proposed farm operation.

(iv) There is no other dwelling or mobile home on the subject property, contiguous property in the same ownership and any noncontiguous property which would be managed as part of the same farm operation.

(v) Sufficient information is submitted by the persons applying for the proposed dwelling or

mobile home which factually addresses the above criteria. Such information shall include:

(aa) The size, location and ownership of the total property involved in the farm operation.

(bb) A copy of any farm use lease agreements for the total property involved in the farm operation and the number of acres for each specific farm use.

(cc) Identification by reference to LC 16.212(6)(d) below of the type of farm operation (farm group) that the proposed dwelling or mobile home would be in conjunction with.

(dd) Identification of the planned extent of involvement in the proposed farm use activity by the occupants of the proposed dwelling or mobile home and the experience of the occupants in prior farm use activities.

(ee) A copy of a farm management plan for the proposed farm operation which provides factual details addressing the farm operation concerns pertinent to the farm operation proposed, including:

Land preparation.
Ripping and plowing.
Fencing.
Surveying.
Crop cultivation.
Irrigation.
Herbicide; fungicide and/or fertilizer application.
Machinery.
Accessory farm buildings.
Breeding and livestock raising concerns.
Labor.
Projected expenses associated with the above.
Date by which the farm management plan would be substantially implemented.

(ff) The residence shall be so located on the subject property as to provide the least interference with farming activities which will thereon occur. A site plan shall be submitted which shows the location of the residence and explains the rationale of the location in reference to the above criterion.

(vi) Upon substantial completion of the details represented in the above farm management plan, the dwelling or mobile home shall be allowed on the subject property. During the interim while the farm management plan is being implemented on the subject property, a temporary mobile home in conjunction with the farm use may be allowed for a period not to exceed five years. If the farm management plan is not implemented within the five-year period, the temporary mobile home shall be removed or another special permit under this subsection may be made.

(h) A dwelling or mobile home customarily provided in conjunction with farm use (existing) which complies with the following requirements:

(i) The proposed dwelling or mobile home would be in addition to another dwelling or mobile home already on the subject property, contiguous property in the same ownership and any noncontiguous property which is managed as part of the same farm operation.

(ii) The occupant or occupants of the proposed dwelling or mobile home will be employed in conjunction with the current farm use of the farm operation and the occupant or occupants of the existing dwellings or mobile homes are employed in conjunction with the current farm use of the farm operation.

(iii) The proposed dwelling or mobile home will be located on a legal lot that is currently managed as part of a farm operation of a size equal to or greater than that described in LC 16.212(6)(d) below, and will be located on a legal lot that is not smaller than the minimum size allowed for the division of land as described in LC 16.212(7) below.

(iv) Sufficient information is submitted by the person applying for the proposed dwelling or mobile home which factually documents compliance with the above criteria. Such information shall include, but not necessarily be limited to:

(aa) The size, location and ownership of the total property involved in the farm operation.

(bb) A copy of any farm use, lease agreements for the total property involved in the farm operation.

(cc) Identification of the specific farm uses conducted on the total property involved in the farm operation and the number of acres for each specific farm use.

(dd) Identification of the extent of involvement in the farm use activity by the occupant's of the proposed dwelling or mobile home, and by the occupant's of the existing dwellings or mobile homes.

(ee) Identification by reference to LC 16.212(6)(d) below to the type of farm operation (i.e., farm group) that the proposed dwelling or mobile home would be customarily provided in conjunction with.

(i) A dwelling or mobile home on real property used for farm use if the dwelling or mobile home is:

(i) Located on the same legal lot as the dwelling or mobile home of the farm operator; and

(ii) Occupied by a relative, which means grandchild, parent, child, brother or sister of the farm operator or the farm operator's spouse, whose assistance in the management of the farm use is or will be required by the farm operator.

(iii) Establishment of the second dwelling or mobile home may not be used for future justification of land division, and Lane County shall not approve any subdivision or partition of a lot or parcel for which such a second dwelling or mobile home has been approved.

(iv) The farm operator submits a statement that:

(aa) The second dwelling or mobile home is necessary for his or her farm operation.

(bb) Identifies the family relationship of the persons who will occupy the second dwelling or mobile home

(cc) He or she fully understands the conditions under which the building permit is being approved.

(j) One mobile home in conjunction with an existing dwelling or mobile home on the same legal lot as the existing dwelling or mobile home as a temporary use for the term of a hardship suffered by the existing resident or a relative of the existing resident subject to compliance with the following conditions:

(i) A resident of the existing dwelling or mobile home and a resident of the mobile home are family members.

(ii) One of the residents mentioned above suffers a hardship and needs the care of the other above-mentioned resident and family member.

(iii) Satisfactory evidence of the family member's hardship is furnished which shall include:

product on a legal lot that is managed as part of a farm operation or woodlot smaller than required under LC 16.212(6)(d) below if the legal lot:

(i) Has produced at least $10,000 in annual gross farm income in two consecutive calendar years out of the three calendar years before the year in which the application for the dwelling was made or is planted in perennials capable of producing upon harvest an average of at least $10,000 in annual gross farm income; or

(ii) Is a woodlot capable of producing an average over the growth cycle of $10,000 in gross annual income.

(iii) Does not already have a dwelling or mobile home on it.

(c) One dwelling or mobile home, not provided in conjunction with farm use, on a vacant legal lot not larger than three acres provided:

(i) The dwelling or mobile home, or activities associated with the dwelling or mobile home, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use; and

(ii) If the legal lot is located within the Willamette Greenway, a floodplain or a geological hazard area, the dwelling complies with conditions imposed by Lane Code relating specifically to the Willamette Greenway, floodplains or geological hazard areas, whichever is applicable; and

(iii) The dwelling complies with other conditions considered necessary by the governing body or its designate; and

(iv) The legal lot was created between January 1, 1948 and before July 1,1983.

(v) For the purposes of the above subsection, only one legal lot exists if:

(aa) The legal lot is contiguous to one or more lots or parcels in which, on Ally 1, 1983, greater than possessory interests are held in those contiguous lots by the same person, spouses or a single partnership or business entity, separately or in tenancy in common.

(bb) As used in the LC 16.212(3)(c)(v)(aa) above, contiguous means "lots, parC'els or lots and parcels that have a common boundary, including but not limited to, lots, parcels or lots and parcels separated only by a public road."

(vi) Notice and review of an application under LC 16.212(3)(c) above shall occur in compliance to LC 16.100(2)•

(d) Home occupations, subject to the following conditions and annual review:

(I) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in a dwelling or mobile home, or other buildings normally associated with uses permitted under LC 16.212(2) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.212(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(vii) Will comply with any additional conditions of approval.

(viii) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(4) **Special Uses Hearings Official Approval..** The following uses are allowed subject to prior approval of the Hearings Official pursuant to LC 14.300 and pursuant to compliance with the below approval criteria of this subsection and LC 16.212(5).

(a) Commercial activities that are in conjunction with farm use

(b) Operations conducted for the mining and processing of geothermal resources as defined by ORS 522.005, or exploration, mining and processing of aggregate and other mineral resources or other subsurface resources.

(c) Community centers owned and operated by a governmental agency or a nonprofit community organization, hunting and fishing preserves, parks, playgrounds and campgrounds.

(d) Golf courses.

(e) Commercial utility facilities for the purpose of generating power for public use by sale.

(f) Personal-use airports for airplanes and helicopter pads, including associated hangar, maintenance and service facilities. A personal-use airport as used in this section means an airstrip restricted, except for aircraft emergencies, to use by the owner, and, on an infrequent and occasional basis, by invited guests, and by commercial aviation activities in connection with agricultural operations. No aircraft may be based on a personal-use airport other than those owned or controlled by the owner of the airstrip. Exceptions to the activities permitted under this definition may be granted through waiver action by the Aeronautics Division in specific instances. A personal-use airport lawfully existing as of September 13, 1975, shall continue to be permitted subject to any applicable regulations of the Aeronautics Division.

(g) A facility for the primary processing of forest products, provided that such facility is found to not seriously inferfere with accepted farming practices and is compatible with farm uses described in ORS 215.203(2). Such a facility may be approved for a one year period which is renewable. These facilities are intended to be only portable or temporary in nature. The primary processing of a forest product, as used in this section, means the use of a portable chipper or stud mill or other similar methods of initial treatment of a forest product in order to enable its shipment to market. Forest products, as used in this section, means timber growth upon a parcel of land or contiguous land where the primary processing facility is located.

(h) The boarding of horses for profit.

(i) A site for the disposal of solid waste approved by the governing body of a city or county or both and for which a permit has been granted under ORS 459.245 by the Department of Environmental Quality, together with equipment facilities or buildings necessary for its operation.

(j) A dwelling or mobile home not provided in conjunction with farm use provided:

(i) The dwelling or mobile home is situated upon a legal lot with soils predominantly in capability classes IV through VIII as determined by the Agricultural Capability Classification System in use by the United States Department of Agriculture Soil Conservation Service on Oct. 12, 1983.

(ii) The dwelling or mobile home, or the activities associated with the dwelling or mobile home, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use

(iii) The dwelling or mobile home is situated upon generally unsuitable land for the production of farm crops and livestock, considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of the tract. A lot or parcel shall not be considered unsuitable solely because of its size or location if it can reasonably be put to farm use in conjunction with other land.

(iv) The approval of a dwelling or mobile home shall comply with the provisions of ORS 215.236, 1983 Replacement Part, regarding establishment of the nonfarm residence; procedures; disqualification for farm use valuation; and additional tax or penalty.

(k) A transmission tower over 200 feet in height.

(5) **Hearings Official Special Use Approval Criteria.**

(a) Compatibility of the use or activities associated with the use with the Agricultural Lands Policies of the Rural Comprehensive Plan Policies, ORS 215.243 and the purpose of this zone.

(b) The use, or activities associated with the use, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use.

(c) The use, or activities associated with the use, complies with other conditions considered necessary by the Approval Authority in order to meet the applicable approval criteria.

(6) **Farm Operations.**

(a) A farm operation is all agricultural activities occurring under a single management. For purposes of this section, it is immaterial whether the activities occur on a single parcel of land, on contiguous parcels of land or on separate parcels of land. It is also immaterial if the operator has less than fee interest in the land on which the agricultural activity occurs.

(b) Farm operations shall be classified into one of the groups set forth in LC 16.212(6)(d) below. In the event a farm operation consists of agricultural activities described by more than one group, the activity that accounts for more than half of the gross revenue of the farm operation shall determine thegroup classifications.

(c) Farm operations of a size equal to or greater than the size shown for its respective group in LC 16.212(6)(d) below shall be deemed as contributing in a substantial way to the agricultural economy of the County.

(d)

Farm Group	Size
Cash grains	120 acres
Field crops (includes grass seed production	160 acres
Tree fruit and nuts	40 acres
Horticultural specialties	20 acres
General farm, primarily crop	320 acres
Extensive animal grazing	120 acres
Itensive animal husbandary	40 acres
Dairy farm	240 acres
General farm, primarily livestock	80 acres
Berries and grapes	20 acres
Vegetables and melons	120 acres

(7) **Area.** Land within the Exclusive Farm Use District shall be designated as E-25, E-30, E-40 or E-60, consistently with Agricultural Lands Policy #10 of the Lane County Rural Comprehensive Plan, and the creation of a lot or parcel shall be subject to the following:

(a) Except as provided in LC 16.212(7)(b),(c) and (d) below, the minimum area shall be:

E-25 ----- 25 acres
E-30 ---- 30 acres
E-40 ---- 40 acres
E-60 ---- 60 acres

(b) A division of land may be allowed down to 20 acres for horticultural specialties, berries and grapes. A farm management plan including the factors identified in LC 16.212(2)(g)(v)(ee) above shall address and establish the suitability of the land for the intended use

(c) A division of land may be allowed for the nonfarm uses identified in LC 16.212(4)(c),(d),(e) and (i) above, provided the parcel for the nonfarm use is not larger than the minimum size necessary for the use.

(d) A division of land may be allowed for a dwelling not provided in conjunction with farm use if the

dwelling has been approved pursuant to the above LC 16.212(4)(j) above and if the division would not conflict with the purpose of this zone.

(e) Divisions pursuant to LC 16.212(7)(a),(b),(c) or (d) above are subject to the applicable application procedures of LC Chapter 13 and the applicable review procedures of LC Chapter 14. Divisions under LC 16.212(7)(a) and (b) above shall also require that a statement be placed on the face of the map for the partition disclosing that a dwelling or mobile home is not guaranteed unless the provisions of this zone for obtaining a dwelling or mobile home are met.

(f) A person who sells or otherwise transfers real property zoned Exclusive Farm Use (E) may retain a life estate in a dwelling or mobile home on that property and the tract of land under and around the dwelling or mobile home. Partition approval is not required for the creation of such a life estate.

(8) Property Development Standards. All uses or activities permitted or conditionally permitted above, except farm use, shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines except as provided below.

(b) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Ripari-ian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.212(8)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.212(8)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(aa) Commercialforest practices regulated by the Oregon Forest Practices Act.

(bb) Vegetation removal necessary to provide water access for a water dependent use.

(cc) Removal of dead or diseased vegetation that poses a safety or health hazards.

(dd) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(9) Residence Maintenance, Repair and Replacement Standards.

(a) Maintenance and repair of lawfully existing residences shall be permitted in the Exclusive Farm Use (E) zone.

(b) Replacement of any residence lawfully existing, occupied, suitable for occupancy or in the process of being constructed shall be permitted. The replacement need not be in kind (i.e., a mobile home may replace a dwelling or vice versa). Any replacement authorized under this subsection shall be for a residence to be located on the same site as the previous residence and

such replacement shall commence within one year of the date of removal of the previous residence.

NATURAL RESOURCE ZONE (NR-RCP)

RURAL COMPREHENSIVE PLAN

16.213 Natural Resource Zone (NR-RCP).

(1) **Purpose.** The Natural Resource Zone (NR-RCP) is intended to protect areas having unique or irreplaceable natural resource which are vital elements for a safe, healthful and pleasant environment for human life. The Natural Resource Zone may be applied to public and private lands where the Rural Comprehensive Plan requires natural resource site protection. The Zone is not intended to be applied to other types of resource land, such as agricultural land and forest land. To minimize the potential hazards of pollution, resource conversion and land development resulting from increases in human population, urbanization, income, leisure time and individual mobility, emphasis will be placed on limiting and regulating human activity in those areas where:

(a) The acceptable water quality of streams, lakes, estuaries of the ocean may be endangered;

(b) Watersheds and their streams or lakes are used for domestic water supplies;

(c) Vegetative cover is essential to maintain soil stability and prevent erosion;

(d) Natural conditions are vital for either unique vegetative ecosystems, aquatic or wildlife habitat; and

(e) Scenic quality or vistas or open space is unique and/or irreplaceable.

(2) **Permitted Buildings and Uses.** In the NR Zone, the following types of buildings and uses are permitted as hereinafter specifically provided for by this subsection, subject to the general provisions and exceptions set forth:

(a) The following recreational facilities and uses owned by a governmental agency or a nonprofit community organization limited to day use.

(i) Exhibitions of the natural conditions of shorelands, dunelands, forested areas, streams and lakes, marshlands, or similar areas of unique and irreplaceable value, and the vegetation and wildlife supported by such lands and waters, provided that in no event shall such activity destroy, or endanger the relationships between the natural conditions being exhibited.

(ii) Picnicking areas, day parks and playgrounds.

(iii) Accessory facilities for outdoor recreation activity such as fishing, clam digging and hunting (provided such activity is conducted only in those areas allowed pursuant to Federal, State and Local fish and game regulations) and hiking and horseback riding.

(b) Fish and wildlife habitat management and the propagation of fish and wildlife.

(3) Special Uses Director Approval. The following uses are subject to approval by the Director pursuant to LC 14.100:

(a) Single-family dwelling(s) or mobile home(s) for residential purpose for watchman, caretaker or operator in conjunction with use permitted in the district.

(4) Special Uses Director Official Approval. The following uses are subject to approval by the Hearings Official pursuant to LC 14.300:

(a) Piers and boat houses.

(b) Single-family dwelling or mobile home and accessory structures.

(c) Farm uses as defined by ORS 215.203(2), and any accessory uses.

(d) Forest uses and any accessory uses.

(5) **Conditional Use Criteria.** Uses conditionally permitted under LC 16.213(4) above are subject to compliance with the following criteria:

(a) (i) Evidence is provided supporting reasons why the proposed use should be sited in a natural resource area.

(ii) That the proposed site is on land generally unsuitable for natural resource uses.

(b) That the proposed use will not significantly impact natural resource uses on adjacent and nearby natural resource lands, and will not significantly impact natural resources on the site of the proposed uses;

(c) That the proposed use will not significantly increase the costs of natural resource management on adjacent and nearby natural resource lands.

(d) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use;

(e) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby NR zoned lands, and these measures may be established as conditions of approval; and

(f) That the proposed use is consistent with the policies contained in the Rural Comprehensive Plan and the purpose of the NR zone.

(6) **Property Development Standards.**

(a) Front yard setback shall be 20 feet.

(b) Side yard setback shall be as follows:

(i) Interior yard -- 15 feet for a main building; five feet for an accessory building or structure.

(ii) Street side yard - 20 feet.

(c) Rear yard setback shall be 20 feet for a main building; five feet for an accessory building or structure.

MARGINAL LANDS ZONE (ML-RCP)

RURAL COMPREHENSIVE PLAN

16.214 Marginal Lands Zone (ML-RCP).

(1) Purpose. The Marginal Lands Zone (ML-RCP) is intended to:

(a) Provide an alternative to more restrictive farm and forest zoning.

(b) Provide opportunities for persons to live in a rural environment and to conduct intensive or part-time farm or forest operations.

(c) Be applied to specific properties consistently with the requirements of ORS 197.005 to 197.430 and the policies of the Lane County Rural Comprehensive Plan.

(2) **Permitted Uses.** The following uses are permitted subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) A dwelling or mobile home on a vacant legal lot created before July 1, 1983. If the legal lot is located within the Willamette Greenway, a flood plain area or a geological hazard area, approval of the mobile home or dwelling is subject to the provisions of Lane Code relating to the Willamette Greenway, floodplain or geological hazrds, whichever is applicable.

(b) A dwelling or mobile home on a vacant legal lot created pursuant to the requirements of LC 16.214(6) below.

(c) One mobile home in conjunction with an existing dwelling or mobile home on the same legal lot as the existing dwelling or mobile home as a temporary use for the term of a hardship suffered by the existing resident or a relative of the existing resident subject to compliance with the following conditions:

(i) A resident of the existing dwelling or mobile home and a resident of the mobile home are family members.

(ii) One of the residents mentioned 'above suffers a hardship and needs the care of the other above-mentioned resident and family member.

(iii) Satisfactory evidence of the family member's hardship is furnished which shall include:

(aa) A written statement, on a form provided by the Department, from the family member's physician, therapist, or other professional counselor, disclosing the existence and general nature of the hardship.

(bb) A written statement, on the form provided by the Department, disclosing the family relationship of the person with the hardship and the person who will provide care.

(iv) The temporary mobile home will be located on the same legal lot as the existing dwelling or mobile home.

(v) The temporary mobile home will be connected to the same on-site sewage disposal system serving the existing dwelling or mobile home.

(vi) The temporary mobile home will comply with sanitation and building code requirements.

(vii) Approval of temporary mobile home permits shall be valid until December 31 of the year following the year of original permit approval and may be renewed once every two years until the hardship situations cease.

(d) Part-time farms.

(e) Woodlots.

(f) Intensive farm or forest operations, including, but not limited to, farm use.

(g) Nonresidential buildings customarily provided in conjunction with farm use.

(h) Public or private schools, including all buildings essential to the operation of a school.

(i) Churches.

(j) Utility facilities necessary for public service, except commercial facilities for the purpose of generating power for use by public sale.

(k) Operations for the exploration of geothermal resources as defined by ORS 522.005.

(1) A site for the disposal of solid waste that has been ordered to be established by the Environmental Quality Commission under ORS 459.049, together with equipment and facilities or buildings necessary for its operation.

(m) The propagation or harvesting of a forest product.

(n) Community centers owned and operated by a governmental agency or a nonprofit organization, hunting and fishing preserves, parks, playgrounds and publicly owned campgrounds.

(o) Personal-use airport for airplanes and helicopter pads, including associated hanger, maintenance and service facilities. A personal- use airport as used in this section means an airstrip restricted, except for aircraft emergencies, to use by the owner, and, on, an infrequent and occasional basis, by invited guests, and by commercial aviation activities in connection with agricultural operations. No aircraft may be based on a personal-use airport other than those owned or controlled by the owner of the airstrip. Exceptions to the activities permitted under this definition may be granted through waiver by the Aeronautics Division in specific

instances. A personal-use airport lawfully existing as of September 13, 1975, shall continue to be permitted subject to any applicable regulations of the Aeronautics Division.

(3) **Uses Subject To Director Approval.** The following uses are permitted subject to submittal of an application pursuant to LC 14.050, and approval of the application pursuant to LC 14.100 and compliance with the criteria and provisions of this Chapter of Lane Code.

(a) Privately owned campgrounds.

(b) Golf courses.

(c) Commercial utility facilities for the purpose of generating power for public use by sale.

(d) Home occupations, subject to the following conditions and annual review:

(i) Will be operated by a resident of the property on which the business is located.

(ii) Will employ no more than five full or part-time persons.

(iii) Will be operated in a dwelling or mobile home, or other buildings normally associated with uses permitted under LC 16.214(2) above.

(iv) Any structure that would not otherwise be allowed in this zone shall not be allowed for use as a home occupation.

(v) Will not interfere with existing uses on nearby land or with other uses permitted under LC 16.214(2) above.

(vi) Will comply with sanitation and building code requirements.

(vii) Will not be used as a justification for a zone change.

(viii) Will comply with any additional conditions of approval.

(ix) Approved applications for home occupations shall be valid until December 31 of the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided below. Prior to December 31 of each year, the Director shall review each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a one-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions

of approval shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(e) A facility for the primary processing of forest products, provided that such facility is found to not seriously interfere with accepted farming practices and is compatible with farm uses described in ORS 215.203(2). Such a facility may be approved for a one-year period which is renewable. These facilities are intended to be only portable or temporary in nature. The primary processing of a forest product, as used in this section, means the use of a portable chipper or stud mill or other similar methods of initial treatment of a forest product in order to enable its shipment to market. Forest products, as used in this section, means timber grown upon a parcel of land or contiguous land where the primary processing facility is located.

(f) The boarding of horses for profit.

(g) A site for the disposal of solid waste approved by the governing body of a city or county or both and for which a permit has been granted under ORS 459.245 by the Department of Environmental Quality, together with equipment, facilities or buildings necessary for its n-naratlnn

(h) Commercial activities that are in conjunction with farm use.

(4) Criteria For Director Approval. Uses specified in LC 16.214(3) and (4) may be allowed if found to comply with the following criteria:

(a) Will be compatible with and will not adversely affect the livability 'or appropriate development of abutting properties and the surrounding vicinity, and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character; to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding.

(5) Uses Subject To Hearings Official Approval. The following uses are permitted subject to submittal of an application pursuant to LC 14.050, approval of the application by the Hearings

Official pursuant to LC 14.300 and compliance with the approval criteria of LC 16.214(4) above and provisions of this Chapter of Lane Code:

(a) Operations conducted for the mining and processing of geothermal resources as defined by ORS 522.005 or exploration, mining and processing of aggregate or other mineral resources or other subsurface resources.

(6) **Area.** Land in a Marginal Land zone may be divided as follows:

(a) Into lots or parcels containing at least 10 acres if the lots or parcels are not adjacent to land zoned Exclusive Farm Use (E), Nonimpacted Forest Land (F-1), Impacted Forest Land (F-2), or if it is adjacent to such land, the land qualifies for designation as marginal land pursuant to ORS Chapter 197.

(b) Into lots or parcels containing 20 acres or more if the lots or parcels are adjacent to land zoned Exclusive Farm Use (E), Nonimpacted Forest Land (F-1) or Impacted Forest Land (F-2), and that land does not qualify as marginal land pursuant to ORS Chapter 197.

(c) A parcel of any size necessary to accommodate any of the nonresidential uses identified in LC 16.214(2)(h),(i),(j),(1) and (n) and LC 16.214(3)(a), (c),(f) and (g).

(7) **Property Development Standards.** All uses or activities permitted or conditionally permitted above shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines, except as provided below.

(b) Class I Stream and Riparian Vegetation Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 50-foot, setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to

LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of the riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.214(7)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.214(7)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(aa) Commercial forest practices regulated by the Oregon Forest Practices Act.

(bb) Vegetation removal necessary to provide water access for a water dependent use.

(cc) Removal of dead or diseased vegetation that poses a safety or health hazard.

(dd) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(d) Height. None.

(e) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(f) Parking. Off street parking shall be provided in accordance with LC 16.250.

PARK AND RECREATION ZONE (PR-RCP)

RURAL COMPREHENSIVE PLAN

16.215 Park and Recreation Zone (PR-RCP).

(1) **Purpose.** The purpose of the Park and Recreation Zone (PR-RCP) is:

(a) To establish zones within which a variety of recreational activities may be conducted as outright permitted uses without interference from other nonrecreational uses.

(b) To establish standards and criteria to permit and conditionally permit recreational activities within areas for which a built upon or committed exception to a Statewide Planning Goal has been taken, or within a designated nonresource area, or within resource areas for which an exception to a Statewide Planning Goal has not been taken.

(c) To provide protective measures for riparian vegetation along Class I streams designated as significant in the Rural Area Comprehensive Plan.

(d) To implement the policies of the Lane County Rural Area Comprehensive Plan.

(2) **Permitted Uses.** The following uses and activities are permitted in any area zoned PR-RCP subject to the general provisions and exceptions specified by this Chapter of Lane Code:

(a) Forest Uses.

(b) Farm Uses.

(c) Nonresidential uses necessary and accessory to the uses listed above such as:

(i) Fire prevention, detection and suppression facilities.

(ii) Access roads and roads for management and safety.

(iii) Storage buildings.

(iv) A carport or garage in conjunction with #5 above.

(v) Restroom, washroom or shower facilities.

(vi) Offices.

(d) Minor betterments and general improvements of existing park or recreational facilities.

(3) Uses Subject to Director Approval. The following uses are allowed subject to prior submittal of an application pursuant to LC 14.050 and approval by the Director pursuant to LC 14.100, and subject to conformance with the applicable, approval criteria of LC 16.215(3)(h) below:

(a) General Recreation Parks including picnic areas, camping grounds, hiking trails, playfields, bathing beaches and other similar outdoor, manmade recreation facilities.

(b) Leisure and Ornamental Parks largely for scenic or ornamental purposes, including monuments, statutes, beaches and children's play facilities.

(c) Group or Organized Camps for children and adults which may include any of the above uses and activities and other uses and activities, such as swimming pools, meeting halls, sleeping shelters, cafeterias and shelters for indoor recreation.

(d) Recreation vehicle parking spaces in conjunction with any of the above three permitted uses.

(e) Marine terminals and associated areas that are primarily for recreational marine craft, exclusing sale or land storage of marine craft, but including any incidental sale of gas or minor repair.

(f) One resident on the subject property for a caretaker employed in conjunction with any of the uses in LC 16.215(3)(a)-(e) above.

(g) Nonresidential uses necessary and accessory to the uses listed above.

(h) Approval Criteria.

(i) The proposed use is limited in size and location so as to be compatible with existing forest, farm or natural resource uses on nearby lands

(ii) The location, design, size, shape and arrangement of the proposed uses are sufficient for the intent of the proposed uses.

(iii) Where necessary to accomplish compliance with LC 16.215(3)(h)(i) and (ii) above, conditions may be placed upon the approval of the use applicatoin.

(4) Permitted Uses Within An Exception Area. The following uses and activities are permitted whenever the subject property is included within an area for which a built upon or committed exception has been taken to a Statewide Planning Goal and incorporated into the Lane County Rural Area Comprehensive Plan:

(a) Any of the uses permitted within the above LC 16.215(2) or the below LC 16.215(3).

(b) Retail trade of food or new general merchandise conducted within a building not exceeding 750 square feet in total floor area.

(c) Golf courses with or without a country club.

(d) Riding stables.

(e) Bowling.

(f) Gymnasium or athletic club.

(g) Yachting clubs.

(h) Motel, hotel, lodges and other forms of recreational lodging. Any of the above lodging uses may include a restaurant, retail trade of food or new general merchandise exceeding the standard set in LC 16.215(4)(b) above.

(i) Game rooms, miniature golf, go cart tracks.

(j) Boat rentals or boat storage and incidental minor repairs and sale of gas.

(k) Country clubhouse for a golf course which may include a restaurant, retail trade of food or new general merchandise exceeding the standard set in LC 16.215(4)(b) above.

(5) **Uses Subject to Hearings Official Approval.** The following uses and activities are conditionally permitted subject to submital of an application pursuant to LC 14.050, approval of the application by the Hearings Official pursuant to LC 14.300, and subject to the compliance with the conditional use criteria below:

(a) Race track

(b) Amusement park, carnival, circus.

(c) Stadium.

(d) Fairgrounds and amusement park.

(e) Recreational shooting.

(f) Airport and flying field.

(6) **Conditional Use Permit Criteria.** Uses conditionally permitted above shall be subject to compliance with the following criteria:

(a) The subject property is included within an area for which an exception has been taken to a Statewide Planning Goal and incorporated into the Lane County Rural Area Comprehensive Plan.

(b) The proposed use will not adversely affect the livability, appropriate use, natural resources or scenic character of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character; to the generation of traffic and capacity of surrounding streets; and to any other relevant impact to the use.)

(c) The proposed use will not be adversely affected by natural hazards, such as floods, slides, erosion.

(d) The proposed use will not alter the stability of the overall land use pattern in the area nor interfere with farm and forest practices and will be compatible with the retention of existing and potential forest, uses on the surrounding forest lands.

(e) When a use is proposed in an area designated as Major or Peripheral Big Game Range or as Sensitive Fish and Water Fowl Areas as shown on the Lane County Wildlife inventory, the Oregon Department of Fish and Wildlife shall be notified and their comments shall be considered in evaluating the proposed use.

(f) The proposed use will have a water supply of sufficient quantity and quality to meet reasonably foreseesable needs.

(7) **Property Development Standards.** All uses or activities permitted or conditionally permitted above, except commercial forest practices regulated by the Oregon Forest Practices Act, shall be subject to the following development standards:

(a) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(b) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.215(7)(b)(i) above. Where vegetation removal beyond that allowed in LC 16.215(7)(b)(i) above cannot be avoided, tithe site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(aa) Vegetation removal necessary to provide water access for a water dependent use.

(bb) Removal of dead or diseased vegetation that poses a safety or health hazards.

(cc) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(c) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

QUARRY AND MINE OPERATIONS COMBINING ZONE (/QM-RCP)

RURAL COMPREHENSIVE PLAN

16.216 Quarry and Mine Operatons Combining Zone (/QM-RCP).

(1) **Purpose.** The purpose of the Quarry and Mine Operations Combining Zone (/QM-RCP) is to:

(a) Recognize that minerals and materials within the County are an unrenewable resource, and that extraction and processing are beneficial to the economy of the County and the welfare of its people.

(b) Protect major deposits of minerals, rock and related material resources with appropriate zoning.

(c) Establish procedures for the protection of public health and safety on and adjacent to land where quarry and mine blasting operations are occurring.

(d) Establish County standards in the Lane Manual to be used in reviewing referrals from State and Federal Agencies of Operation and Reclamation Plans, pollution control permits and similar permits.

(e) Provide for cooperation between private and governmental entities in carrying out the purposes of this Chapter.

(f) To implement the policies of the Lane County Rural Comprehensive Plan.

(2) **Intent.** The Quarry and Mine Operations Combining Zone shall be available for consideration and use by the County for new or existing operations when requests are received as part of an areawide or legislative rezoning, or a specific property or quasi-judicial rezoning.

When property under consideration for /QM zoning is in close proximity to existing and planned uses potentially incompatible with /QM uses, the application of the Quarry and Mine Operations Combining Zone may be limited to a specific portion of a property in order to encourage the compatibility and proper management of land uses.

The Quarry and Mine Operations Combining Zone is intended to be applied only to those operations which have, been evaluated through the Goal #5 Administrative Rule conflict resolution process. Other quarry and mining operations of short-term or intermittent duration should be provided pursuant to the special use provisions of the various zones.

(3) **Definitions.** For the purposes of this section only, the following words, terms and phrases are defined and supercede definitions otherwise provided in this Code:

Minerals. Includes soil, coal, clay, stone, crushes hard rock quarry products, metallic ore and any other solid material or substance excavated for commercial, industrial or construction use from natural deposits. "Minerals" do not include loam, sand, gravel or other aggregate materials created and/or deposited by water movement.

Mining Refuse. All waste materials, soil, rock, mineral, liquid, vegetation and other materials resulting from or displaced by quarry and mining extraction operations within the operating permit area, including all waste materials deposited in or upon lands within such operating permit area.

Operations Plan. A written proposal submitted to the State Department of Geology and Mineral Industries under the requirements of ORS 517.790.

Operator. Any individual, public or private corporation, political subdivision, agency, board or department of this State, any municipality, partnership, association, firm, trust, estate or any other legal entity whatsoever that is engaged in quarry and extraction operations.

Overburden. The soil, rock and similar materials that lie above natural deposits or minerals.

Owner. The person possessing legal rights to the mineral deposit being mined.

Quarry and Mine Extraction. All or any part of the process of removing mineral deposits exposed by any method, including open-pit mining operations, auger mining operations, shaft mining, the construction of borrow pits, processing of extracted minerals and exploration activities.

Reclamation. The employment of procedures in a quarry and mining extraction operation designed to minimize as much as practicable the impact such operations have on the environment, and to provide for the rehabilitation of land affected by such operations. Reclamation includes the rehabilitation of plant cover, soil stabilization, water resource protection and other measure appropriate to the subsequent beneficial use of such mined and reclaimed lands.

Reclamation Plan. A written proposal for the reclamation of the land area affected by a quarry and mine extraction operation submitted to the State Department of Geology and Mineral Industries.

(4) Permitted Buildings and Uses. In the Quarry and Mine Operations Combining District, the following types of buildings and uses are permitted as hereafter specifically provided for by this section, subject to the provisions of the Quarry and Mining Operations Reclamation Permit and exceptions set forth in this Chapter;

(a) Uses permitted in the parent zone with which the /QM zone is combined.

(b) Extracting and storing of minerals, including equipment and materials necessary to carry out these functions.

(c) Plants for the processing of minerals from quarry and mine extraction operations.

(d) Sale of products generated from the quarrying and mining operation.

(e) Activities permitted as part of the reclamation process provided for in the Reclamation Plan.

(f) Structures and buildings used in conjunction with the extracting and storing of minerals.

(5) Permits for Quarry and Mine Extraction.

(a) General. No quarry or mining extraction or related operations may be initiated on land zoned as Quarry and Mine Operations Combining Zone (/QM) until a surface mining permit has been issued by the Oregon Department of Geology and Mineral Industries.

(i) Each permit application, Operation and Reclamation Plan referred to the Director shall be reviewed following the Operation Standards and Reclamation Standards set forth in Lane Manual.

(6) Blasting Notice and Records. Operators using explosives for quarry and mine extraction shall follow explosive regulations and use commonly acceptable engineering standards based on physical conditions and atmospheric conditions of the site so as to prevent injury to persons and damage to public and private property.

(a) Notice of Blasting. When blasting is to be done within 500 feet of an occupied building, the operator, or an authorized agent, shall notify all occupants that a blast is to be initiated. Such notice shall be given not more than six hours nor less than 30 minutes prior to detonation and shall include the approximate time of the blast.

(b) Blasting Records. Each operator shall maintain a record of each blast for at least two years. These records shall be available to the County, the State Department of Geology and Mineral Industries and other governmental agencies with appropriate jurisdiction upon request. Such records shall show the following for each blast:

(i) Name of quarry or mine.
(ii) Date, time and location of blast.
(iii) Description of type of explosives and accessories used.
(iv) Time interval of delay in milliseconds.
(v) Number of different delays.
(vi) Number of holes per delay.
(vii) Nominal explosive weight per hole.
(viii) Total explosive weight per delay.
(ix) Total weight of explosives per blast.
(x) Blast hole diameter, depth, spacing and stemming height.

SAND, GRAVEL & ROCK PRODUCTS ZONE (SG-RCP)

RURAL COMPREHENSIVE PLAN

16.217 Sand, Gravel & Rock Products Zone (SG-RCP).

(1) **Purpose.** The intent of the Sand, Gravel and Rock Products Zone (SG-RCP) is to:

(a) Recognize that sand and gravel deposits within the County are an unrenewable natural resource and beneficial to the economy of the County and the welfare of its people.

(b) Identify and zone under this zone major deposits of sand and gravel, rock and related material resources.

(c) Provide for the utilization of this resource in a manner compatible with other land uses in the area.

(d) Encourage the regular, systematic and uninterrupted extraction and processing of such resources.

(e) Establish procedures for assuring protection of public health and safety on and adjacent to land used for extraction and processing.

(f) Prevent irresponsible extraction of material resources, to the detriment of the public.

(g) Provide standards to be observed during the extraction process with a view to ultimate utilization of the site.

(h) Carry out these purposes with the recognition of a need for said resources and the right of each property owner to make a reasonable use of his or her land.

(i) Implement the policies of the Lane County Rural Comprehensive Plan.

(j) Be applied only to those sites which have been evaluated consistently with the Statewide Planning Goal #5 Administrative Rule conflict resolution process.

(2) **Definitions.** Where conflicting, for the purposes of this section only, the following definitions supersede definitons otherwise provided in this Code:

Director. The Director of the Department of Public Works of Lane County.

Overburden. All materials lying on top of valuable sand and gravel deposits which must be moved in order to extract those valuable sand and gravel deposits.

Review Committee. The Sand and Gravel Review Committee authorized to administrate the provisions of this section.

(3) **Permitted Uses.** In the SG-RCP zone, the following uses are permitted subsequent to the following restriction: For any property designated in the Eugene-Springfield Metropolitan Plan as

significant in terms of OAR 660-16-000/025 and designated as '1B', a Goal 5 ESEE consequences analysis per the Goal #5 Administrative Rule must first be completed. If the landowner and County do not agree on the method to achieve the Goal, the matter shall be forwarded to the Hearings Official for processing consistent with LC 16.100.

(a) Sand and gravel operations which entail the extraction, stockpiling and processing of sand, gravel, overburden and topsoil shall be permitted, subject to the requirements of the subsections of this section, but quarrying, smelting, ore reduction and other similar uses shall be excluded.

(b) The following uses shall be permitted, subject to the requirements of the subsections of this section, when conducted in conjunction with a sand and gravel operation as defined in LC 16.217(3)(a) above, on the same parcel or continguous parcels of land on which the operation is being conducted.

(i) Asphalt paving-mix plant.

(ii) Cement concrete batching plant.

(iii) Aggregate products fabrication and sale.

(iv) Sand and gravel resource-related contractor's equipment storage yard.

(v) Sand and gravel resource-related contractor's maintenance and storage buildings.

(vi) Offices and warehouses appropriate to the uses permitted in this zone.

(vii) Retail or wholesale sales of products related to the use of sand, gravel and related products.

(c) Other uses permitted:

(i) Agriculture, grazing or timber raising.

(ii) Dwellings for owners, operators or help required to carry out LC 16.217(3)(b)(i) above.

(iii) Accessory buildings normally required in LC 16.217(3)(b)(i) above.

(iv) Extraction of sand, gravel and overburden, any combination of which does not exceed 1,000 cubic yards in any calendar year.

(v) Electrical facilities providing only direct service to a use authorized in this zone.

(d) Signs to be used in connection with sand and gravel operations:

(i) Identification signs (exterior) shall be limited to two per business establishment, and shall be designed as part of the building.

(4) **Site Improvement Standards.**

(a) General. Site improvement standards hereunder are minimum standards to be observed during extraction

(bb) The Director may grant an administrative variance to waive the setback from adjoining property in a Sand, Gravel and Rock Products Zone, if no flood hazard will result.

(cc) The setback area may be excavated to reduce the elevation thereof to the grade of an adjoining public street or road.

(dd) Excavation may be conducted within the setback area under a plan approved by the Director through an administrative variance whereby the excavated area will be refilled with other materials which will neither decompose nor pollute underground waters.

(ee) When excavation is completed adjoining a setback, the setback area shall be smoothed, all excavation debris removed, and all trees which are in an unsafe condition removed. However, such setback areas may be used for permitted uses under LC 16.217(3)(b) and (c) above, subject to other provisions of this Chapter.

(vi) Cleanup and Removal of Structures.

(aa) During operations, the site shall be kept free of debris. All overburden shall be stockpiled or disposed of and all stumps, brush or other debris resulting from cleaning or excavating shall be burned or otherwise disposed of.

(bb) Within three years after the termination of an operation as defined in LC 16.217(3)(a) above, all buildings, structures or plants which were used incidental to the operation and were abandoned with the termination of the operation shall be dismantled and removed.

(vii) Site Improvements for Nonconforming Pre-existing Uses.

(aa) To the extent to which operations upon property have been completed when said property is included within the Sand, Gravel and Rock Product Zone, the provisions of the zone shall not be applicable.

(bb) If the operator shall resume excavations on property which had been excavated when it was included in the Sand, Gravel and Rock Products Zone, then:

(i-i) If banks cannot be sloped to the ratios required because the same are within minimum setback

areas, or if the excavation is within the minimum setback areas, the operator shall either:

(aaa) Obtain an administrative variance from the minimum setback in order to accomplish such sloping; or

(bbb) Erect a fence along such nonconforming banks according to specifications ordered by the Director.

(ii-ii) Grading shall not be required after securing an administrative variance if such area has been covered by brush or vegetation which would make such work burdensome and uneconomic.

(iii-iii) Additional depth of excavation shall not be mandatory to conform to minimum depth standards.

(iv-iv) The operator shall not be required to change nonconforming setback areas.

(5) **Operation Standards.** All facilities shall be constructed, maintained and operated, and all operations shall be conducted in the zone in accordance with the standards set forth in this section.

(a) Setbacks.

(i) All equipment for processing operations shall not be built, erected or located closer than 50 feet to the perimeter boundary line of the property under the ownership or control of the operator or the right-of-way of an existing road, except when said boundary adjoins a residence or residential (R) zone, in which case no equipment shall be located within 150 feet of said residence or zone.

(ii) Stockpiling of sand and gravel and sedimentation ponds shall not be located closer than 25 feet to the perimeter boundary line or the right-of-way of an existing road.

(iii) If provisions of Chapter 11 of this Code as existing or hereinafter amended shall require greater setbacks than provided herein, then such Chapter shall apply.

(iv) The Director may allow smaller setbacks after following administrative variance procedure.

(b) Frontage and Access. Each tract of land used for uses permitted in LC 16.217(3)(a) and (b) above shall have 60-foot frontage on a public road or easement of

access to a public road connecting with the public road system of Lane County.

(c) Screen Landscape. Existing trees and natural vegetation along a public park or public road, or adjoining a residential (R) zone, shall be preserved for a width of 25 feet or within the minimum setback, whichever is less.

(d) Signs.

(i) Business and Directional Signs. See LC 16.217(3)(d) above.

(ii) SG-RCP Zone Identification. The County, at its expense, shall have the right to put signs on the boundaries of any active operation which read:

THIS PROPERTY MAY BE USED FOR SAND AND GRAVEL EXTRACTION PROCESSING.

(e) Road Condition. All private access and service roads shall be maintained in a dust-free condition during intensive operations.

(f) Off Street Parking - Parking Areas. All parking facilities for employees and customers shall be located within the boundaries of the property under the control of the operator.

(g) Safety Fencing. During operations, when any open excavation will have a depth of 10 feet or more, and will create a slope steeper than one vertical to two horizontal (1:2) for a period of more than 120 days, and is located within 200 feet f residentially occupied structures or a public road, a fence shall be erected at least 10 feet outside the edge of such excavation at least four feet in height, to control access to such excavation.

(h) Stream Operations. Operations in or adjacent to streams shall conform to the following standards:

(i) The turbidity of the stream adjacent to the operations shall not be increased by more than five Jackson Turbidity Units.

(ii) There shall be no direct discharge of gravel-washing waters into an adjacent stream

(iii) Operators shall work behind dikes which are of sufficient height to control turbidity during low water seasons. Where the dike forms the permanent river bank according to a river plan which may be adopted by the Board, the berm of the dike shall be of sufficient width and height to contain annual high water.

(iv) Equipment shall not be operated in the flowing streams, except to construct or maintain berms or to make channel improvements according to a river plan that may be adopted by the Board.

(v) After a river plan is adopted, the river channel shall not be diverted from its normal course unles a permanent river channel is developed.

(vi) The Director may waive the requirements of LC 16.217(5)(h)(iv) and (v) above for limited periods of time.

(6) **Performance Bond.**

(a) Except during the 60-day period provided for by LC 16.217(9)(a)(i) below, no excavation shall be permitted within this zone in areas which are not covered by a performance bond in the amount of $500 per acre, and any additional dollar amounts determined by the Director to be necessary for side restoration, which has been submitted to the Director and accepted by the Board. The amount of acreage to be bonded shall be left to the choice of the operator, but no excavation shall be permitted within this zone in areas which are not covered by a performance bond in the amount of $500 per acre, and any additional dollar amounts determined by the Director to be necessary for site restoration, which has been submitted to the Director and accepted by the Board. The amount of acreage to be bonded shall be left to the choice of the operator, but no excavation shall be permitted in any area which has not been bonded.

(i) The performance bond shall be issued by a corporate surety licensed to issue surety bonds in the State of Oregon, or shall be in another form approved by the Director.

(ii) The bond shall guarantee the faithful performance of all applicable site improvement standards specified in LC 16.217(4) above for all areas excavated after the land is zoned hereunder.

(b) The operator may at any time make application to the Board for release of any bond as to specified acreage which either has not been excavated or has been excavated and restored to the standards contained herein. Within 30 days after the date of such application, the Board shall consider the application and, if the Board shall determine that the site improvement standards have been performed on specified acreage, then the bond shall be released as to such acreage.

(c) If acreage excavated is not restored according to the applicable site improvement standards, the County, or its designated representative, may enter upon such property, make the required improvements and present the operator and the corporate surety with a statement of expenses. The surety bond shall guarantee payment to the County for its expenses incurred, not to exceed $500 per acre, and any additional dollar amount determined by the Director to be necessary for site restoration.

NATURAL ESTUARY ZONE (/NE.RCP)

RURAL COMPREHENSIVE PLAN

16.234 Natural Estuary Zone (/NE-RCP).

(1) Purpose. The purpose of the Natural Estuary Zone (/NE-RCP) is to assure the protection of significant fish and wildlife habitats and the continued biological productivity of the estuary and to accommodate the uses which are consistent with these objectives.

(2) Permitted Uses. In the /NE-RCP Zone, the following types of uses are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exceptions set forth in this Chapter.

(a) Low intensite recreation which is water dependent.

(b) Educational and scientific observation.

(c) Navigational aids.

(d) Passive estuarine restoration.

(e) Protection of habitat, nutrient, fish, wildlife and aesthetic resources.

(f) Low intensity grazing provided the area is a high salt marsh.

(3) **Special Uses Approved by the Hearings Official.** The following specified uses and no others, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of the applicable criteria. A Resource Capability Determination is required as set forth in LC 16.248, except for major projects requiring an Impact Assessment as set forth in LC 16.249.

(a) (i) Uses

(aa) Communication facilities.

(bb) Active restoration measures.

(ii) Criteria.

(aa) No fill or dredging is required.

(bb) The use will have minimal impact on natural resources in the area affected by the proposed use. These natural resources are as identified in the Lane County Rural Comprehensive Plan.

(cc) The location and actions proposed for restoration measures are adequate to achieve the stated restoration objective. Restoration objectives shall set forth the original conditions to be restored and the cause of the loss or degradation.

(dd) Any restoration action related to the distribution and attributes (e.g., long-term environmental, social or economic values) that have been lost or diminished shall be consistent with the original conditions.

(b) (i) Uses. Aquaculture facilities.

(ii) Criteria.

(aa) No dredge or fill is required.

(bb) The use is consistent with the Lane County Rural Comprehensive Plan.

(c) (i) Uses. Riprap and associated minor fills.

(ii) Criteria and Conditions.

(aa) The use is required to protect human-made structures existing prior to October 7, 1977 or critical wildlife habitat in adjacent shorelands areas as identified in the Lane County Rural Comprehensive Plan.

(bb) Natural bank stabilization measures are inadequate.

(4) Nonconforming Use Exceptions.

(a) Docks and Piers. Actively utilized pier, docks and other structures occupying the water surface by means other than fill existing as of July 1, 1980 may be rebuilt within two years, but not expanded if damaged or destroyed notwithstanding the provisions of LC 16.251 regarding nonconforming uses.

(b) Log Storage. Notwithstanding the provisions of LC 16.251 regarding nonconforming uses, log storage sites in the /NE-RCP Zone under lease from the Division of State Lands shall be allowed to continue and be renewed. Leases for storage sites in new areas are prohibited.

(5) Applicable Natural Features. The boundaries of the /NE-RCP Zone are determined by the natural estuarine features. The /NE-RCP Zone includes all major tracts of salt marsh, tideflats, eelgrass and algae beds. The entire estuarine areas of the Siltcoos River and Berry, Sutton, Big and Tenmile Creeks are within the /NE-RCP Zone. These are as defined on the Lane County zoning maps as specified by LC 16.252(8).

(6) Uses Subject to State and Federal Permits.

(a) When State or Federal permits, ~~leases~~, easements or similar types of authorization are also required for a use, subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application for all requisite State and/or Federal permits, leases, easements or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special use review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement or similar type of authorization.

CONSERVATION ESTUARY ZONE (ICE-RCP)

RURAL COMPREHENSIVE PLAN

16.235 Conservation Estuary Zone (/CE-RCP).

(1) Purpose. The purpose of the Conservation Estuary Zone /CE-RCP is to provide for the long-term use of the estuary's renewable resources in ways which do not require major alteraton of the estuary. Providing for recreational and aesthetic uses of the estuarine resources as well as maintenance and restoration of biological productivity are primary objectives in this zone.

(2) Permitted Uses. In the /CE-RCP Zone, the following types of uses are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exceptions set forth in this Chapter.

(a) Low-intensity recreation which is water dependent.

(b) Scientific and educational observation.

(c) Navigational aids.

(d) Passive estuarine restoration.

(e) Active estuarine restoration not requiring dredge and/or fill.

(f) Natural resource preservation, including protection of habitat, nutrient, fish, wildlife and aesthetic resources.

(g) Aquaculture facilities not requiring dredge or fill.

(h) Communication facilities not requiring dredge and/or fill.

(i) Noncommercial clamming and fishing.

(j) Low-intensity grazing; provided the area is a high salt marsh and has been so used within the 10 years prior to July 24, 1980.

(k) Log storage; provided the storage occurs at sites under lease from Division of State Lands on (date of ordinance adoption) and provided all State and Federal agency requirements are met.

(3) **Special Uses Approved by the Director.** The following specified uses and no others, subject to approval by the Director pursuant to LC 14.300. A Resource Capability Determination is required as set forth in LC 16.248, except for major projects requiring an impact assessment as set forth in LC 16.249.

(a) (i) Uses. Private single-family, single-purpose piers or docks.

(ii) Criteria and Conditions.

(aa) The use will have minimal adverse impact on natural resources in the area affected by the proposed use. The resources are as identified in the Lane County Rural Comprehensive Plan.

(bb) The use is compatible with requirements of adjacent shorelands' Rural Comprehensive Plan designation.

(cc) The applicant attests in writing on a form provided by the Planning Director that no alternatives to the proposed structure are feasible.

(dd) The size and design of the structure is limited to that required for the intended use.

(4) **Special Uses Approved by the Hearings Official.** The following specified uses and not others, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of the applicable criteria. A Resource Capability Determination is required as set forth in LC 16.248, except for major projects requiring an Impact Assessment as set forth in LC 16.249.

(a) (i) Uses. New or expanded log storage sites

(ii) Criteria and Conditons.

(aa) Water storage is integral to continued operation of the associated wood processing facility.

(bb) There are no feasible upland alternatives.

(cc) The log storage operation meets Department of Environmental Quality Standards for log storage.

(dd) The use is not proposed at sites which have long-established use for public recreation such as a boat launching site or a marina site.

(ee) Public need is demostrated.

(b) (i) Uses.

(aa) Public docks nd piers.

(bb) Private multifamily docks an piers.

(cc) Mooring buoys which are permanently anchored to estuary floor.

(dd) Dolphins.

(ii) Criteria and Conditions. The use will have minimal impact on natural and recreational resources in the area affected by the proposed use. The resources are as identified in the Lane County Rural Comprehensive Plan.

(c) (i) Uses.

(aa) Boat launching ramps.

(bb) Public beaches requiring estuarine modificaton.

(cc) Minor dredging to improve navigability.

(ii) Criteria and Conditons.

(aa) An estuarine location is required.

(bb) No alternative locations exist which are designated as Development in the Lane County Rural Comprehensive Plan.

(cc) Adverse impacts on resources are minimized. These resources are as identified in the Lane County Rural Comprehensive Plan.

(dd) No alternative shoreland locations exist for the portions of the use requiring fill.

(ee) Public need is demonstrated.

(d) (i) Uses. Bridge crossing support structures.

(ii) Criteria.

(aa) An estuarine location is required.

(bb) No alternative locations exist which are designated as Development in the Lane County Rural Comprehensive Plan.

(cc) Adverse impacts on resources are minimized. These resources are as identified in the Lane County Rural Comprehensive Plan.

(dd) Public need is demonstreated.

(ee) The requirements of LC 16.235(5) and (6) are met.

(e) (i) Uses. Erosion control structure, including, but not necessarily limited to, seawalls, bulkheads, groins and jetties.

(ii) Criteria.

(aa) The criteria and conditions specified under Special Uses, LC 16.235(4)(c)ii)(aa)-(ee) above are met.

(bb) The use being protected is water dependent.

(cc) Adverse impacts on water currents, erosion and accretion patterns are minimized as much as feasible.

(dd) Nonstructural solutions are inadequate to protect the use.

(f) (i) Uses. Active estuarine restoration involving dredge or fill.

(ii) Criteria.

(aa) Public need is demonstrated.

(bb) The location and actions proposed for restoration measures are adequate to achieve the stated restoration objective. Restoration objectives shall set forth the original conditions to be restored and the cause of the loss or degradation.

(cc) Any restoration action related to the distribution and abundance of relevant amenities and attributes (e.g., long-term environmental, social or economic values) that have been lost or diminished shall be consistent with the original conditons.

(g) (i) Uses. Riprap and associated minor fills to protect preexisting structures or specified values.

(ii) Criteria.

(aa) The use is required to protect human-made structures existing prior to October 7, 1977 or critical wildlife habitat in adjacent shorelands as identified in the Lane County Rural Comprehensive Plan.

(bb) Natural bank stabilization measures are inadequate.

(h) (i) Uses.

(aa) Recreational use marinas requiring dredge or fill.

(bb) Aquaculture requiring dredge and/or fill.

(ii) Criteria and Conditions.

(aa) The criteria and conditions listed under Special Uses LC 16.235(4)(c)(ii)(aa)-(ee) above are met.

(bb) The use is consistent with the resource capabilities of the area and the purposes of the management unit.

(5) Applicable Natural Features. The boundaries of the /CE-RCP Zone are defined by natural features. The /CE-RCP Zone includes minor tracts of salt marsh, tideflats, eelgrass and algae beds; those not included in the Natural Estuary Zone (/NE-RCP). This zone also includes oyster and clam beds and areas immediately adjacent to developed estuarine areas. These are as defined on the Lane County zoning maps as specified by LC 16.252(8).

(6) Uses Subject to State and Federal Permits.

(a) When State or Federal permits, ~~leases~~, easements or similar types of authorization are also required for a use, subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application ffor all requisite State and/or Federal permits, leases, easements or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special use review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement or similar type of authorization.

(7) Additional Criteria Required for Projects Involving Dredge or Fill. Any use or activity permitted above which requires dredging or filling of the estuary must meet the following criteria:

(a) The use is water dependent.

(b) An estuarine location is required.

(c) A public need is demonstrated.

(d) No alternative upland locations exist.

(e) Adverse impacts on identified estuarine values are minimized.

(f) Mitigation requirements of ORS 541.605 to 541.695 are met.

DEVELOPMENT ESTUARY ZONE (/DE-RCP)

RURAL COMPREHENSIVE PLAN

16.236 Development Estuary Zone (/DE-RCP).

(1) Purpose. The primary purpose of the Development Estuary Zone /DE-RCP is to provide for navigational needs and public, commercial and industrial water dependent uses which require an estuarine location. Uses which are water related or nonwater dependent, nonrelated which do not damage the overall integrity of estuarine resources and values should be considered; provided they do not conflict with the primary purpose of the zone.

(2) Permitted Uses. In the /DE-RCP Zone, the following types of uses are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exception set forth in this Chapter; provided that no such use may be permitted which involves dredging or filling of the estuary.

(a) The following waterborne transportation and associated water dependent activities and uses:

(i) Navigational aides.

(ii) Maintenance dredging of navigation channel.

(b) The following commercial activities and uses which are water dependent:

(i) Marine fueling facilities.

(ii) Marinas

(iii) Loading and unloading facilities such as piers or docks.

(c) The following industrial activities and uses which are water dependent:

(i) Marine construction and repair facilities.

(ii) Log storage.

(d) The following public facilities which are water dependent.

(i) Marinas.

(ii) Docks and piers and other moorages.

(ii) Boat launching ramps.

(3) **Special Uses Approved by the Planning Director.** The following specified uses and no others, subject to approval by the Planning Director pursuant to LC 14.100, upon satisfaction of the applicable criteria. A Resource Capability Determination is required as set forth in LC 16.248, except for major projects requiring an Impact Assessment as set forth in LC 16.249.

(a) (i) Uses. Any water dependent use not specifically authorized in LC 16.236(2) above; provided that no such use may be permitted which involves dredging or filling of the estuary.

(ii) Criteria. The use is water dependent.

(4) Special Uses Approved by the Hearings Official.

The following specified uses and no others, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of the applicable criteria. A Resource Capability Determination is required as set forth in LC 16.248, except for major projects requiring an Impact Assessment as set forth in LC 16.249.

(a) (i) Uses. Flood and erosion control structures, including, but not necessarily limited to, jetties, seawalls, groins and bulkheads.

(ii) Criteria and Conditoins.

(aa) The criteria specified in LC 16.236(5) below are met.

(bb) The structures are designed and sited to minimize erosion and human-induced sedimentation in adjacent areas.

(cc) The structures are designed and sited to minimize adverse impacts on water currents, water quality and fish and wildlife habitat.

(dd) The use or uses to be protected by the proposed structures are water dependent.

(b) (i) Uses. Riprap and associated minor fills to protect human-made structures existing prior to October 7, 1977.

(ii) Criteria and Conditons. Natural bank stabilization measures are inadequate.

(c) (i) Uses. All other uses; provided no dredging or filling is required.

(ii) Criteria.

(aa) A public need is demonstrated.

(bb) The use will not irrevocably limit future use of the area for water dependent commercial or industrial facilities.

(cc) The use will have minimal impact on resources, as identified in the Lane County Rural Comprehensive Plan, in the area affected by the proposed use.

(d) (i) Uses.

(aa) Low-intensity recreation which is water dependent.

(bb) Scientific and educational observation

(cc) Active estuarine restoration.

(dd) Aquaculture.

(ee) Communication facilities.

(ff) Bridge support crossing structures.

(ii) Criteria and Conditions.

(aa) The criteria specified in LC 16.236(5) below are met for any use or activity requiring dredge or fill.

(bb) The use or activity will not irrevocably limit the future or present use of the area for water dependent commercial or industrial facilities.

(cc) The location and actions proposed for restoration measures are adequate to achieve the stated restoration objective. Restoration objectives shall set forth the original conditions to be restored and the cause of the loss or degradation.

(dd) Any restoration action related to the distribution and abundance of relevant amenities and attributes (e.g., long-term environmental, social or economic values) that have been lost or diminished shall be consistent with the original conditoins.

(e) (i) Uses. Any uses specified in LC 16.236(2) or (3) above which involve dredging or filling of the estuary.

(ii) Criteria. The criteria specified in LC 16.236(5) below.

(5) **Additional Criteria Required for Projects Involving Dredge or Fill.** Any use or activity permitted above which requires dredging or filling of the estuary must meet the following criteria:

(a) The use is water dependent.

(b) An estuarine location is required.

(c) A public need is demonstrated.

(d) No alternatige upland locations exist.

(e) Adverse impacts on identified estuarine values are minimized.

(f) Mitigation requirements of ORS 541.605 to 541.695 are met.

(6) Applicable Physical, Geographical or Natural Features. The /DE-RCP Zone is designed to apply to navigation channels, subtidal areas for in-water disposal of dredged material, major navigational appurtenances, deep water areas adjacent to the shoreline and areas of minimal biological significance needed for uses requiring alteration of the estuary. These are as defined on the Lane County zoning maps as specified by LC 16.252(8).

(7) **Uses Subject to State and Federal Permits.**

(a) When State or Federal permits, ~~leases~~, easements or similar types of authorization are also required for a use, subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application for all requisite State and/or Federal permits, leases, easements

or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special use review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement or similar type of authorization.

SIGNIFICANT NATURAL SHORELANDS COMBINING ZONE

(/SN-RCP)

RURAL COMPREHENSIVE PLAN

16.237 Significant Natural Shorelands Combining Zone(SN-RCP).

(1) Purpose. The Significant Natural Shorelands Combining Zone /SN-RCP is applied to those coastal shorelands identified in inventory information and designated generally in the Lane County Rural Comprehensive Plan as possessing a combination of unique physical, social or biological characteristics requiring protection from intensive human disturbances. Those areas serve multiple purposes, among which are education, preservation of habitat diversity, water quality maintenance and provision of intangible aesthethic benefits. The /SN-RCP Zone is applied to prominent aesthetic features, such as coastal headlands and open sand expanses in proximity to coastal waters, sensitive municipal watersheds and significant freshwater marsh areas.

The /SN-RCP Zone provides a procedure by which to define the exact geographical boundaries of the shorelands within the /SN-RCP Zone that require protection beyond that provided by the zone or zones with which the /SN-RCP Zone is combined and imposes additional development requirements within these boundaries.

(2) Intent. The requirements imposed by the /SN-RCP Zone shall be in addition to those imposed by the respective zone or zones with which the /SN-RCP Zone is combined. Where the requirements of the /SN-RCP Zone conflict with the requirements of the zone or zones with which it is combined, the more restrictive requirements shall apply.

(3) **Permitted Uses.** In areas found subject to the requirements of the /SN-RCP Zone by the Preliminary Investigation specified in LC 16.237(11) below, the following structures and uses and no others are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exceptions set forth in this section. The Forest Practices Act requirements for the maintenance of riparian vegetation shall be enforced to provide shading and filtration and protect wildlife habitat at those sites indicated in the Lane County Coastal Resources Inventory as "riparian vegetation" or "significant wildlife habitat". These areas will be specially evaluated prior to approval of timber harvest plans to ensure the habitat has been adequately considered.

(a) Propagation and harvesting of forest products consistent with the Oregon Forest Practices, Act as permitted by the zone or zones with which the /SN-RCP Zone is combined.

(b) Low-intensity grazing.

(c) Harvesting of wild crops.

(d) Low-intensity recreation.

(e) Shore-secured floating moorage facilities in adjacent water areas.

(f) Dredged material disposal when the /SN-RCP Zone is used in conjunction with the /DMS-RCP Zone.

(g) Mooring buoys, multipurpose-multifamily piling docks and piers, dolphins and other moorage facilities in adjacent lakes or a Development Estuary Zone (/DE-RCP).

(4) Special Uses Approved by the Planning Director. If found subject to the requirements of the /SN-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.237(11) below, the following specified uses and no others are permitted, subject to approval by the Planning Director pursuant to LC 14.100, upon satisfaction of the applicable criteria and determination that the use is consistent with protection of natural values specified in the Coastal Resources Management Plan.

(a) (i) Uses. Single-family homes, mobile homes and such accessory buildings as allowed in the underlying zones.

(ii) Criteria. All requirements set forth in LC 16.237(7),(8) and (9) below are met.

(b) (i) Uses. Single-family dwelling units and mobile homes as allowed in the zone or zones with which the /SN-RCP Zone is combined where existing parcel size is insufficient for the development to meet the development, setback and area requirements set forth in LC 16.237(7),(8) and (9) below.

(ii) Criteria and Conditions.

(aa) The said parcel existed prior to July 24, 1980.

(bb) The structures shall not occupy more than 30 perent of the lot area.

(cc) All applicable height restrictions are observed.

(dd) The parcel is of sufficient size to meet all applicable standards for subsurface sewage disposal.

(ee) Clearance of vegetation on the remainder of the lot area, including that portion in the setback area otherwise permitted for vegetation clearance, is minimized.

(ff) All otherwise applicable requirements of this section are met.

(c) (i) Uses. The following moorage facilities attached or connected to the shorelands and located in the estuary:

(aa) Public or commercial piling-type docks or piers.

(bb) Private, multifamily or multiuse piling-type docks or piers.

(cc) Mooring buoys which are permanently anchored to the estuary floor.

(dd) Dolphins.

(ii) Criteria.

(aa) The moorage facility is located within a Conservation Estuary Zone (/CE-RCP).

(bb) The use is not in violation of the purposes of the respective zone or zones with which the /SN-RCP Zone is combined.

(cc) The use meets all criteria and conditions of the appropriate estuary zone.

(d) (i) Uses. All buildings and uses allowed as permitted uses in the respective zone or zones with which the /SN-RCP Zone is combined, subject to the requirements of this section, except as expressly prohibited by LC 16.237(6) below.

(ii) Criteria.

(aa) The use will not adversely affect the aesthetic and biological characteristics of the site, as identified in the Rural Comprehensive Plan.

(bb) Surface, subsurface and aquifer waters are protected from pollution and sedimentation.

(cc) All requirements set forth in LC 16.237(7),(8) and (9) below are met.

(5) **Special Uses Approved by the Hearings Official.** If found subject to the requirements of the /SN-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.237(11) below, the following specified uses and no others are permitted, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of all applicable criteria and determination that the use is consistent with protection of natural values specified in the Coastal Resources Management Plan.

(a) (i) Uses. Artificial bank stabilization adjacent to estuaries and lakes.

(ii) Criteria.

(aa) The stabilization is necessary to protect structures existing on or before October 7, 1977.

(bb) Natural bank stabilization methods are unfeasible or less appropriate.

(b) (i) Uses. All buildings and uses permitted conditionally or by special use permit in the respective zone or zones with which the /SN-RCP Zone is combined, subject to the development, setback and area requirements of this setion, or except as expressly prohibited by LC 16.237(6) below.

(ii) Criteria and Conditions.

(aa) All applicable criteria provided within the respective zone with which the /SN-RCP Zone is combined are met.

(bb) The use will not adversely affect the aesthetic and biological characteristics of the site as identified in the Rural Comprehensive Plan.

(cc) Surface, subsurface and aquifer waters are protected from polltion and sedimentation. The Lane County Department of Public Works, Land Management Division, shall be the proper consulting agency in this regard.

(dd) All requirements set forth in LC 16.237(7),(8) and (9) below are met.

(c) (1) Uses. Single-family, single-purpose, piling-type docks and piers.

(ii) Criteria.

(aa) No reasonable alternatives exist to the construction of a single-family, single-use pier. Alternatives shall include mooring buoys, public piers within a reasonable distance from the proposed use, cooperative use of existing private piers located within a reasonable distance or nonpiling-type floating piers.

(bb) The dock or pier shall not be located within a Natural Estuary Zone (/NE-RCP).

(cc) If located within the estuary, the use must meet all criteria and conditions of the appropriate estuary zone.

(6) **Prohibited Uses.** If found subject to the requirements of the /SN-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.237(11) below, the following uses are specially prohibited:

(a) Fill in coastal lakes.

(b) Fill in freshwater marsh areas as identified in the Lane County Rural Comprehensive Plan.

(7) **Site and Development Requirements.** If found subject to the requirements of the /SN-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.237(11), the below-specified development requirements shall be in addition to those provided by the respective zone or zones with which the /SN-RCP Zone is combined. These requirements shall not apply to timber harvesting activities. Timber harvesting activities, where permitted by the respective zone with which the /SN-RCP Zone is combined, shall conform to Oregon Forest Practices Act rules.

(a) No more of a parcel's existing vegetation shall be cleared than is necessary for the permitted use,

accessory buildings, necessary access, septic requirements and fire safety requirements.

(b) To the maximum degree possible, building sites shall be located on portions of the site which exhibit the least vegetative cover.

(c) Construction activities occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that area required for the facilities indicated in LC 16.237(7)(a) above. Where vegetation removal beyond that allowed in LC 16.237(7)(a) above cannot be avoided, the site shall be replanted during the next replanting season to avoid sedimentation of coastal waters. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(d) The requirements for parking and vision clearance shall be as provided by the respective zone or zones with which the /SN-RCP Zone is combined.

(e) No topographic modification is permitted within the 100-foot setback area specified by LC 16.237(8) below.

(f) The shoreward half of the setback area specified by LC 16.237(8) below must be left in indigenous vegetation, except where unsurfaced trails are provided.

(g) Cornices, canopies and eaves may extend two feet into the setback area specified by LC 16.237(8) below.

(h) Decks, uncovered porches, stairways and fire escapes may extend a distance of 10 feet into the setback area specified by LC 16.237(8) below.

(i) All mature trees must be retained within the setback area specified by LC 16.237(8) below, except where removal is subject to requirements of the Oregon Forest Practices Act.

(j) Structures shall be sited and/or screened with natural vegetation so as not to impair the aesthetic quality of the site.

(k) The exterior building materials shall blend in color, hue and texture to the maximum amount feasible with the surrounding vegetation and landscape.

(8) **Additional Setback Requirements.** Setbacks shall be as required in the zone or zones with which the /SN-RCP Zone is combined, except for the additional below-specified setback requirements.

(a) Structures shall be set back 100 feet from coastal lakes and the estuary measured at right angles to the high waterline. Use of this 100 feet shall be as specified in LC 16.237(7)(e)-(h) above.

(b) Building setbacks on oceanfront parcels are determined in accord with the rate of erosion in the area to provide reasonable protection to the site through the expected lifetime of the structure. Setback shall be determined by doubling the estimated average annual erosion rate and multiplying that by the expected life of the structure.

(9) **Special Land Division Requirements.** The following criteria shall be met for land divisions on property within the /SN-RCP Zone, based on the Preliminary Investigation in LC 16.237(11) below. These criteria are in addition to minimum area requirements of any zone combined with the /DN-RCP Zone.

(a) For lands within urbanizable areas:

(i) Land divisions must be consistent with shoreland values as identified in the Coastal Resources Management Plan, not adversely impact quality, and not increase hazard to life or property.

(ii) There is a lack of suitable shoreland areas within urban or urbanizable areas.

(10) **Additional Area Requirements.** Land divisions meeting the above-specified criteria are permitted, subject to the minimum area requirements of the respective zone or zones with which the /SN-RCP Zone is combined or 10 acres, whichever is greater.

(11) **Preliminary Investigation.** Any proposal for development within the /SN-RCP Zone shall require a Preliminary Investigation by the Planning Director to determine the specific area to which the requirements of the /SN-RCP Zone shall apply. The requirements of the /SN-RCP Zone shall apply in an area in which the Planning Director determines that one or more of the criteria specified below apply.

(a) Lands which limit control or are directly affected by the hydraulic action of the coastal waterways. These lands are composed of the following:

(i) Floodways and floodway fringe.

(ii) Land lying between the mean high water and mean low watermark of the coastal water bodies.

(iii) Dikes, dams, levees or steep embankments which control the coastal water body.

(iv) Lands along the ocean coast at or below the 26-foot elevation line.

(b) Adjacent areas of geologic instability which are composed of:

Areas of geologic instability in which the instability is attributable to the hydraulic action of the water body.

(ii) Areas of geologic instability which have a direct impact on water quality, water temperature or on shoreline stability.

(iii) Shorelands in dunal areas in which the enforcement of the use restrictions of the /BD-RCP Zone would be inadequate to protect water quality, water temperature or shoreline stability.

(c) Natural or human-made riparian resources. These lands are as follows:

(i) Extend from 10 to 65 feet landward from the mean high water, within which area the existing vegetation serves one or more of the following functions:

(aa) Shading of coastal water body.

(bb) Stabilization of shoreline.

(cc) Habitat for rate or endangered wildlife species.

(dd) Significant riparian vegetation areas as identified in the Lane County Coastal Inventory.

(d) Areas of significant shoreland and wetland biological habitat composed of:

(i) Freshwater marshes identified in the Lane County Rural Comprehensive Plan.

(ii) Areas currently identified by Nature Conservancy and included in the Lane CountyCoastal Inventory as significant natural areas or other areas which the Lane County Board of Commissioners may deem significant natural areas based on new inventory information.

(iii) Habitat. Other than that listed in LC 16.237(11)(c)(i)(cc) above, which supports rare or endangered species.

(e) Areas necessary for water dependent and water related uses, including areas of recreational importance which utilize coastal water or riparian resources, areas appropriate for navigation and port facilities and areas having characteristics suitable for aquaculture. These are as identified in the Lane County Rural Comprehensive Plan.

(f) Areas identified in the Lane County -Rural Comprehensive Plan as having exceptional aesthetic or scenic quality derived from or related to the association with coastal water areas.

(g) Coastal headlands, identified in the Lane County Coastal Inventory.

(12) Fees for Preliminary Investigation. To partially defray the expense in performing the Preliminary Investigation, a fee to be based on the scale of development proposal shall be charged the applicant. Such fees shall be as established by order of the Board of County Commissioners.

(13) Notification of Preliminary Investigation Determination. The Planning Director shall notify the applicant of the

determination of the Preliminary Investigation by certified mail within 10 days of completion of the Preliminary Investigation. The notification shall include a map at an appropriate scale detailing the portions of the parcel or parcels subject to the requirements of the /SN-RCP Zone, and shall set forth the basis for the determination based on the criteria specified in LC 16.237(11) above.

(14) Appeal to Hearings Official. An applicant may appeal to the Hearings Official the determination of the Preliminary Investigation, and the manner for such appeal shall be as provided by LC 14.500.

(15) Exceptions to Nonconforming Uses. If damaged or destroyed, piling-type docks or piers may be rebuilt, but not expanded , notwithstanding the provisions of LC 16.251.

(16) **Uses Subject to State and Federal Permits.**

(a) When State or Federal permits, ~~leases~~, easements or similar types of authorization are also required for a use, subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application for all requisite State and/or Federal permits, leases, easements or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special use review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement or similar type of authorization.

(d) Proposals subject to special use approval or for building permits for uses otherwise allowed shall be forwarded in writing to the Oregon State Department of Fish and Wildlife within 14 days of final action to evaluate the impact upon habitats and to make recommendations concerning ways to avoid adverse impacts.

(e) Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

(17) **Application of Zone to Federal Lands.** The application of the /SN-RCP Zone shall be held in abeyance until such a time as these lands or portions of these lands may pass into private, State or County ownership. The Rural Comprehensive. Plan designation shall provide appropriate Federal agencies with local recommendation for proper use of these lands.

PRIME WILDLIFE SHORELANDS COMBINING ZONE (/PW-RCP)

RURAL COMPREHENSIVE PLAN

16.238 Prime Wildlife Shorelands Combining Zone (/PW-RCP).

(1) **Purpose.** The Prime Wildlife Shorelands Combining Zone (/PW-RCP) is applied to those coastal shorelands identified in inventory information and designated generally in the Lane County Rural Comprehensive Plan as possessing areas of unique biological assemblages, habitats of rare or endangered species or a diversity of wildlife species. Lands in this zone serve to protect wildlife habitat, water quality, bank stability and provide flood control. The /PW-RCP Zone is applied to areas of riparian vegetation and to the habitat limits of specific species of concern.

The /PW-RCP Zone provides a procedure by which to define the exact geographical boundaries of the shorelands within the /PW-RCP Zone that require protection beyond that provided by the zone or zones with which the /PW-RCP Zone is combined and imposes additional development requirements within these boundaries.

(2) Intent. The requirements imposed by the /PW-RCP Zone shall be in addition to those imposed by the respective zone or zones with which the /PW-RCP Zone is combined. Where the requirements of the /PW-RCP Zone conflict with the requirements of the zone or zones with which it is combined, the more restrictive requirements shall apply.

(3) **Permitted Uses.** In areas found subject to the requirements of the /PW-RCP Zone by the Preliminary Investigation specified by LC 16.238(10) below, the following structures and uses and no others are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exceptions set forth in this section. The Forest Practices Act requirements for the maintenance of riparian vegetation shall be enforced to provide shading and filtration and protect wildlife habitat at those sites indicated in the Lane County Coastal Resources Inventory as "riparian vegetation" or "significant wildlife habitat". These areas will be specially evaluated prior to approval of timber harvest plans to ensure the habitat has been adequately considered.

(a) Propagation and harvesting of forest products consistent with the Oregon Forest Practices Act as permitted by the zone or zones with which the /PW-RCP Zone is combined.

(b) Low-intensity grazing.

(c) Harvesting of wild crops.

(d) Low-intensity recreation.

(e) Dredged material disposal when the /PW-RCP Zone is used in conjunction with the /DMS-RCP Zone.

(f) Shore-secured floating moorages, mooring buoys, multipurpose-multifamily, piling-docks and piers, dolphins and other moorage facilities in adjacent lakes and Development Estuary Zone (/DE-RCP).

(4) Special Uses Approved by the Planning Director.

If found subject to the requirements of the /PW-RCP Zone based on the results of the Preliminary Investigation specified by LC 16.238(10) below, the following specified uses and no others are subject to approval by the Planning Director pursuant to LC 14.100, upon satisfaction of the applicable criteria and determination that the use is consistent with protection of natural values specified in the Coastal Resources Management Plan.

(a) (i) Uses. Single-family homes, mobile homes and such accessory buildings as allowed in the underlying zone.

(i) Criteria. All requirements set forth in LC 16.238(7),(8) and (9) below are met.

(b) (i) Uses. Single-family dwelling units and mobile homes as allowed in the zone or zones with which the /PW-RCP Zone is combined where existing parcel size is insufficient for the development to meet the development, setback and area requirements set forth in LC 16.238(7),(8) and (9) below.

(ii) Criteria and Conditions.

(aa) The said parcel existed prior to July 24, 1980.

(bb) The structures shall not occupy more than 30 percent of the lot area.

(cc) The parcel is of sufficient size to meet all applicable standards for subsurface

(dd) Clearance of vegetation on the remainder of the lot area, including that portion in the setback area otherwise permitted for vegetation clearance, is minimized.

(ee) All otherwise applicable requirements of this section are met.

(c) (i) Uses. The following moorage facilities attached or connected to the shorelands and located in the estuary.

(aa) Public or commercial piling-type docks or piers.

(bb) Private, multifamily or multiuse piling-type docks or piers.

(cc) Mooring buoys which are permanently anchored to the estuary floor.

(dd) Dolphins.

(ii) Criteria.

(aa) The moorage facility is located within a Conservation Estuary Zone (/CE-RCP).

(bb) The use is not in violation of the purposes of the respective zone or zones with which the /PW-RCP Zone is combined.

(cc) The use meets all criteria and conditions of the appropriate estuary zone.

(d) (i) Uses. All buildings and uses allowed as permitted uses in the respective zone or zones with which the /PW-RCP Zone is combined, subject to the requirements of this section, except as expressly prohibited by LC 16.238(6) below.

(ii) Criteria.

(aa) Maintain the natural quality of surface and subsurface waters.

(bb) Maintain bank stability.

(cc) Avoid sedimentation of coastal waters.

(dd) Maintain a shorefront zone of riparian vegetation at least comparable to that required in LC 16.238(7),(8) and (9) below or greater, if necessary, to provide flood control and preserve important riparian wildlife habitat.

(ee) Avoid disturbance of the remainder of the vegetation cover beyond a point where the disturbance would be a detriment to the wildlife community which utilizes this area.

(ff) Any other applicable criteria provided within the respective zone within which the /PW-RCP Zone is combined.

(gg) All requirements set forth in LC 16.238(7),(8) and (9) below are met.

(5) Special Uses Approved by the Hearings Official If found subject to the requirements of the /PW-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.238(10) below, the following specified uses and no others are subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of all applicable criteria and determination that the use is consistent with protection of natural values specified in the Coastal Resources Management Plan.

(a) (i) Uses. Artificial bank stabilization adjacent to estuaries and lakes.

(ii) Criteria.

(aa) The stabilization is necessary to protect structures existing on or before October 7, 1977.

(bb) Natural bank stabilization methods are unfeasible or less appropriate.

(b) (i) Uses. All buildings and uses permitted conditionally or by special use permit in the respective zone or zones with which the /PW-RCP Zone is combined, subject to the development, setback and area requirements of this section, or except as expressly prohibited by LC 16.238(6) below.

(ii) Criteria.

(aa) Maintain the natural quality of surface and subsurface waters.

(bb) Maintain bank stability.

(cc) Avoid sedimentation of coastal waters.

(dd) Maintain a shorefront zone of riparian vegetation at least comparable to that required in LC 16.238(7),(8) and (9) below or greater, if necessary, to provide flood control and preserve important riparian wildlife habitat.

(ee) Avoid disturbance of the remainder of the vegetation cover beyond a point where the disturbance would be a detriment to the wildlife community which utilizes this area.

(ff) Any other applicable criteria provided within the respective zone within which the /PW-RCP Zone is combined.

(gg) All requirements set forth in LC 16.238(7),(8) and (9) below are met.

(c) (i) Uses. Single-family, single-purpose, piling-type docks and piers.

(ii) Criteria.

(aa) No reasonable alternatives exist to the construction of a single-family, single-use pier. Alternatives shall include mooring buoys, public piers within a reasonable distance from the proposed use, cooperative use of existing private piers located within a reasonable distance or nonpiling type floating piers.

(bb) The dock or pier shall not be located within a Natural Estuary Zone (/NE-RCP).

(cc) If located within the estuary, the use must meet all criteria and conditions of the appropriate estuary zone.

(6) **Prohibited Uses.** If found subject to the requirements of the /PW-RCP Zone, based on the results of the Preliminary Investigations specified by LC 16.238(10) below, the following uses are specifically prohibited:

(a) Fill in coastal lakes.

(b) Fill in freshwater marsh areas as identified in Lane County Rural Comprehensive Plan.

(c) New piling-type piers of any descriptions when adjacent to a Natural Estuary Zone (/NE-RCP).

(d) Dredged material disposal.

(7) **Site and Development Requirements.** If found subject to the requirements of the /PW-RCP Zone, based on the results

of the Preliminary Investigation specified by LC 16.238(10) below, the below-specified development requirements shall be in addition to those provided by the respective zone or zones with which the /PW-RCP Zone is combined. These requirements shall not apply to timber harvesting activities. Timber harvesting activities, where permitted by the respective zone with which the /PW-RCP Zone is combined, shall conform to Oregon Forest Practices Act rules.

(a) No more of a parcel's existing vegetation shall be cleared than is necessary for the permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(b) To the maximum degree possible, building sites shall be located on portions of the site which exhibit the least vegetative cover.

(c) Construction activities occur in such a manner so as to avoid unnecessary excavation and/or removal or existing vegetation beyond that area required for the facilities indicated in LC 16.238(7)(a) above. Where vegetation removal beyond that allowed in LC 16.238(7)(a) above cannot be avoided, the site shall be replanted during the next replanting season to avoid sedimentation of coastal waters. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(d) The requirements for parking and vision clearance shall be as provided by the respective zone or zones with which the /PW-RCP Zone is combined.

(e) No topographic modification is permitted within the 50-foot setback area specified by LC 16.238(8).

(f) The shoreward half of the setback area specified by LC 16.238(8) below must be left in indigenous vegetation, except where unsurfaced trails are provided.

(g) Cornices, canopies and eaves may extend two feet into the setback area specified by LC 16.238(8) below.

(h) Decks, uncovered porches, stairways and fire escapes may extend a distance of 10 feet into the setback area specified by LC 16.238(8) below.

(i) All trees must be retained within the setback area specified by LC 16.238(8) below, except where removal is subject to requirements of the Oregon Forest Practices Act.

(j) Structures shall be sited and/or screened with natural vegetation so as not to impair the aesthetic quality of the site.

(k) The exterior building materials shall blend in color, hue and texture to the maximum amount feasible with the surrounding vegetation and landscape.

(8) Additional Setback Requirements. Setbacks shall be as required in the zone or zones with which the /PW-RCP Zone is combined, except for the additional below-specified setback requirements.

(a) Structures shall be set back 50 feet from coastal lakes and the estuary measured at right angles to the high waterline. Use of this 50 feet shall be as specified in LC 16.238(7)(e)-(h) above.

(b) Building setbacks on oceanfront parcels are determined in accord with the rate of erosion in the area to provide reasonable protection to the site through the expected lifetime of the structure. Setback shall be determined by doubling the estimated average annual erosion rate and multiplying that by the expected life of the structure.

(9) Special Land Division Requirements. The following criteria shall be met for land divisions on property within the /PW-RCP Zone, based on the Preliminary Investigation in LC 16.238(10) below. These criteria are in addition to minimum area requirements of any zone combined with the /PW-RCP Zone.

(a) For lands within urbanizable areas:

(i) Land divisions must be consistent with shoreland values as identified in the Coastal Resources Management Plan, not adversely impact water quality, and not increase hazard to life or property.

(ii) The use will not result in loss of significant wildlife habitat or aesthetic values as identified in the Coastal Resources Management Plan.

(iii) Minimum area requirements for the division of land shall be based on the minimum parcel size in the zone with which the /PW-RCP Zone is combined, or five acres, whichever is greater.

(b) For lands outside urban or urbanizable areas, the above criteria, plus the following:

(I) There is a need which cannot adequately be accommodated on nonshoreland locations.

(ii) There is a lack of suitable shoreland areas within urban or urbanizable areas.

(10) Preliminary Investigation. Any proposal for development within the /PW-RCP Zone shall require a Preliminary Investigation by the Planning Director to determine the specific area to which the requirements of the /PW-RCP Zone shall apply. The requirements of the /PW-RCP Zone shall apply in an area in which the Planning Director determines that one or more of the criteria specified below apply.

(a) Lands which limit control or are directly affected by the hydraulic action of the, coastal waterways. These lands are composed of the following:

appropriate for navigation and port facilities and areas having characteristics suitable for aquaculture. These are as identified in the Lane County Rural Comprehensive Plan.

(f) Areas identified in the Lane County Rural Comprehensive Plan as having exceptional aesthetic or scenic quality derived from or related to the association with coastal water areas.

(g) Coastal headlands identified in the Lane County Coastal Inventory.

(11) Fees for Preliminary Investigation. To partially defray the expense in performing the Preliminary Investigation, a fee to be based on the scale of development proposal shall be charged the applicant. Such fees shall be as established by order of the Board of County Commissioners.

(12) Notification of Preliminary Investigation Determination. The Planning Director shall notify the applicant of the determination of the Preliminary Investigation by certified mail within 10 days of completion of the Preliminary Investigation. The notification shall include a map at an appropriate scale detailing the portions of the parcel or parcels subject to the requirements of the /PW-RCP Zone and shall set forth the basis for the determination based on the criteria specified in LC 16.238(10) above.

(13) Appeal to Hearings Official. An applicant may appeal to the Hearings Official the determination of the Preliminary Investigation, and the manner for such appeal shall be as provided by LC 14.500.

(14) Exceptions to Nonconforming Uses. If damaged or destroyed, piling-type docks or piers may be rebuilt, but not expanded, notwithstanding the provisions of LC 16.251.

(15) **Uses Subject to State and Federal Permits.**

(a) When State or Federal permits, ~~leases~~, easements or similar types of authorization are also required for a use, subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application for all requisite State and/or Federal permits, leases, easements or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special use review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement or similar type of authorization.

(d) Proposals subject to special use approval or for building permits for uses otherwise allowed shall be forwarded in writing to the Oregon State Department of Fish and Wildlife within 14 days of final action to evaluate the impact upon habitats and to make recommendations concerning ways to avoid adverse impacts.

(e) Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

(16) Application of Zone to Federal Lands. The application of the /PW-RCP Zone shall be held in abeyance until such a time as these lands or portions of these lands may pass into private, State or County ownership. The Rural Comprehensive Plan designation shall provide appropriate Federal agencies with local recommendation for proper use of these lands.

NATURAL RESOURCES CONSERVATION COMBINING ZONE

(/NRC-RCP)

RURAL COMPREHENSIVE PLAN

16.239 Natural Resources Conservation Combining Zone (/NRC-RCP).

(1) Purpose. The Natural Resources Conservation Zone (/NRC-RCP) is applied to those coastal area shorelands identified in inventory information as timber lands, agricultural lands or shorelands in dune areas. It is the purpose of the /NRC-RCP Zone to encourage long-term human use of these coastal resources in a manner which protects the qualities of coastal water bodies and respects the natural systems. Activities which protect or enhance renewable resources are encouraged, as are recreation and public access to coastal waters.

The /NRC-RCP Zone is specifically designed to carry out the following purposes:

(a) Conservation and maintenance of renewable resources, primarily silvicultural and agricultural.

(b) Protecction of such natural resources as soil and such natural systems as drainage courses and waterways.

(c) Enhancement of renewable resources such as the coastal fisheries and timber industries.

(d) Allow for recreation and public access to coastal waters.

The /NRC-RCP Zone provides a procedure by which to define the exact geographical boundaries of the shorelands within the /NRC-RCP Zone which require protection beyond that provided by the zone or zones with which the /NRC-RCP Zone is combined and imposes additional development requirements within these boundaries.

(2) Intent. The requirements imposed by the /NRC-RCP Zone shall be in addition to those imposed by the respective zone or zones with which the /NRC-RCP Zone is combined. Where the requirements of the /NRC-RCP Zone conflict with the requirements of the zone or zones with which it is combined, the more restrictive requirements shall apply.

(3) **Permitted Uses.** In areas found subject to the requirements of the /NRC-RCP Zone by the Preliminary Investigation specified by LC 16.239(9) below, the following structures and uses and no others are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exceptions set forth in this section. The Forest Practices Act requirements for the maintenance of riparian vegetation shall be enforced to provide shading filtration and protect wildlife habitat at those sites indicated in the Lane County Coastal Resources Inventory as "riparian vegetation" or "significant wildlife

habitat". These areas will be specially evaluated prior to approval of timber harvest plans to ensure the habitat has been adequately considered.

(a) Propagation and harvesting of forest products consistent with the Oregon Forest Practices Act as permitted by the zone or zones with which the /NRC-RCP Zone is combined.

(b) Agricultural activities and general farming uses and structures as permitted by the zone or zones with which the /NRC-RCP Zone is combined.

(c) Dredged material disposal when the /NRC-RCP Zone is in conjunction with the /DMS-RCP Zone.

(d) Shore-secured floating moorage facilities in adjacent water areas.

(e) Public, commercial or private, multifamily, multiuse piling docks and piers in adjacent lakes and in estuary zones, subject to the requirements of the respective estuary zones.

(f) Boat launching ramps, except where adjacent to a Natural Estuary Zone (/NE-RCP).

(g) Harvesting of wild crops.

(h) Low-intensity recreational activities.

(4) **Special Uses Approved by the Planning Director.** If found subject to the requirements of the /NRC-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.239(9) below, the following specified uses and no others are permitted, subject to approval by the Planning Director pursuant to LC 13.100, upon satisfaction of the applicable criteria.

(a) (i) Uses. Single-family dwelling units and mobile homes and such accessory buildings as allowed in the underlying zone.

(ii) Criteria. All requirements set forth in LC 16.239(6),(7) and (8) below are met.

(b) (i) Uses. Single-family dwelling units and mobile homes as allowed in the zone or zones with which the /NRC-RCP Zone is combined where existing parcel size is insufficient for the development to meet the development, setback and area requirements set forth in LC 16.239(6),(7) and (8) below.

(ii) Criteria.

(aa) The said parcel existed prior to July 24, 1980.

(bb) The structures shall not occupy more than 30 percent of lot area.

(cc) All applicable height restrictions are observed.

(dd) The parcel is of sufficient size to meet all applicable standards for subsurface sewage disposal.

(ee) Clearance of vegetation on the remainder of the lot area, including that portion in the setback area otherwise permitted for vegetation criteria by LC 16.239(6) below is minimized.

(ff) All otherwise applicable requirements of this section are met.

(c) (i) Uses. Single-family, single-purpose docks and piers in adjafent coastal lakes or Development or Conservation Estuary Zones.

(ii) Criteria.

(aa) The applicant shall attest in writing that there are no viable alternatives to the construction of a private, single-family structure. Alternatives include dryland storage, mooring buoys, public piers or the cooperative use of existing private piers.

(bb) The size of the structure is limited to that required for the intended use.

(cc) All requirements of the respective estuary zones are met.

(d) (i) Uses. Removal of individual hazardous trees within the required 50-foot strip of shorefront vegetation specified by LC 16.239(6)(d) below.

(ii) Criteria. It can be clearly determined that the trees are a hazard to life or existing property.

(e) (i) Uses. All permitted buildings and uses allowed in the respective zone with which the /NRC-RCP Zone is combined.

(ii) Criteria.

(aa) All requirements set forth in LC 16.239(6),(7) and (8) below are met.

(bb) Surface, subsurface and aquifer waters are protected from pollution and sedimentation.

(cc) The use will not adversely affect the resource use of adjacent timber or agricultural lands.

(5) **Special Uses Approved by the Hearings Official.**

If found subject to the requirements of the /NRC-RCP Zone, based on the results of the Preliminary. Investigtion specified by LC 16.239(9) below, the following specified uses and no others are permitted, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of all applicable criteria.

(a) (i) Uses. Artificial bank stabilization adjacent to estuaries and lakes

(ii) Criteria.

(aa) The stabilization is necessary to protect structures existing on or before October 7, 1977, or to protect public or private roads, bridges or railroads.

(bb) Natural bank stabilization methods are unfeasible.

(b) (i) Uses. Fills in coastal lakes adjacent to the /NRC-RCP Zone.

(ii) Criteria and Conditions.

(aa) The applicant must submit an analysis of the physical and biological impacts of the proposed fill to be conducted by a person or team of persons qualified by education and experience to conduct such studies.

(bb) Cumulative and direct impacts on water quality must be minimized.

(cc) The benefits of the proposed fill to long-term economic development or improved public recreational use shall outweigh the negative impacts on water quality.

(c) (i) Uses. All buildings and uses allowed conditionally or by special use permit in the respective zone or zones with which the /NRC-RCP Zone is combined, except where expressly prohibited by this sectoin.

(ii) Criteria.

(aa) All applicable criteria provided with the respective zone with which the /NRC-RCP Zone is combined are met.

(bb) The use will not adversely affect the resource use of adjacent designated timber and agricultural lands.

(cc) Surface, subsurface and aquifer waters are protected from pollution and sedimentation.

(dd) All requirements set forth in LC 16.239(6),(7) and (8) below are met. '

(6) **Site and Development Requirements.** If found subject to the requirement of the /NRC-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.239(9) below, the below-specified development requirements shall be in addition to those provided by the respective zone or zones with which the /NRC-RCP is combined. These requirements shall not apply to timber harvesting activities. Timber harvesting activities, where permitted by the respective zone with which the /NRC-RCP Zone is combined, shall conform to Oregon Forest Practices Act rules.

(a) Development on shorelands within dune areas shall not result in clearance of a parcel's existing vegetation in excess of what is necessary for the

construction of the proposed structure or structures, accessory buildings, necessary access, septic requirements and fire safety requirements.

(b) In all cases, vegetative cover shall be retained on lands within the shoreland area. Construction activities shall occur in such a manner as to avoid unnecessary excavation and removal of indigenous vegetation, unless cleared vegetation is to be replaced immediately following the construction activity. Interim soil stabilization methods shall be required during the construction phase of any project.

(c) Thirty feet of indigenous riparian vegetation shall be retained along all coastal water bodies. This shall be measured at right angles from the mean high waterline of the coastal water body.

(d) Existing trees must be retained with an area 50 feet in width measured at right angles from the mean high waterline of the coastal water body.

(e) Cornices, canopies and eaves may extend two feet into the setback area specified by LC 16.239(7) below.

(f) Decks, uncovered porches, stairways and fire escapes may extend a distance of 10 feet into the setback area specified by LC 16.239(7) below.

(g) The requirements for parking and vision clearance shall be as provided by the respective zone or zones with which the /NRC-RCP Zone is combined.

(7) Additional Setback Requirements. Setbacks shall be as required in the zone or zones with which the /NRC-RCP Zone is combined, except for the additional below-specified setback requirements.

(a) Structures shall be set back 50 feet from the coastal lakes measured at right angles to the high waterline. Use of this 50 feet shall be as specified in LC 16.239(6)(c)-(f) above.

(b) Building setbacks on oceanfront parcels are determined in accord with the rate of erosion in the area to provide reasonable protection to the site through the expected lifetime of the structure. Setback shall be determined by doubling the estimated average annual erosion rate and multiplying that by the expected life of the structure.

(8) Special Land Division Requirements. The following criteria shall be met for land divisions on property within the /NRC-RCP Zone, based on the Preliminary Investigation in LC 16.239(9) below. These criteria are in addition to minimum area requirements of any zone combined with the /NRC-RCP Zone.

(a) For lands within urbanizable areas: Land divisions must be consistent with shoreland values as identified in the the Coastal Resources Management Plan,

not adversely impact water quality, and not increase hazard to life or property.

(b) For lands outside urban or urbanizable areas, the above criterion, plus the following:

(i) There is a need which cannot adequately be accommodated on nonshoreland locations.

(ii) There is a lack of suitable shoreland locations within urban or urbanizable areas.

(9) **Preliminary Investigation.** Any proposal for development within the /NRC-RCP Zone shall require a Preliminary Investigation by the Planning Director to determine the specific area to which the requirements of the /NRC-RCP Zone shall apply. The requirements of the /NRC-RCP Zone shall apply in an area in which the Planning Director determines that one or more of the criteria specified below apply:

(a) Lands which limit control or are directly affected by the hydraulic action of the coastal waterways. These lands are composed of the following:

(i) Floodways and the floodway fringe.

(ii) Land lying between the mean high, high water and mean low watermark of coastal water bodies.

(iii) Dikes, dam, levees or steep embankments which control the coastal water body.

(iv) Lands along the ocean coast at or below the 26-foot elevation line.

(b) Adjacent areas of geologic instability are composed of:

(i) Areas of geologic instability in which the instability is attributable to the hydraulic action of the water body.

(ii) Areas of geologic instability which have a direct impact on water quality, water temperature or on shoreline stability.

(iii) Shorelands in dunal areas in which the enforcement of the use restrictions of the /BD-RCP Zone, LC 16.243, would be inadequate to protect water quality, water temperature or shoreline stability.

(c) Natural or human-made riparian resources. These lands are as follows:

(i) Extend from 10 to 65 feet landward from the mean high water, within which area the existing vegetation serves one or more of the following functions:

(aa) Shading of coastal water body.

(bb) Stabilization of shoreline.

(cc) Habitat for rare or endangered wildlife species.

(dd) Significant riparian vegetation areas as identified in the Lane County Coastal Inventory.

(d) Areas of significant shoreland and wetland biological habitat composed of:

(i) Freshwater marshes identified in the Lane County Rural Comprehensive Plan.

(ii) Areas currently identified by Nature Conservancy and included in the Lane County Coastal Investory as significant natural areas or other areas which the Lane County Board of Commissioners may deem significant natural areas based on new inventory information.

(iii) Habitat, other than that listed in LC 16.239(9)(c)(i)(cc) above, which supports rare or endangered species.

(e) Areas necessary for water dependent and water related uses, including areas of recreational importance which utilize coastal water or riparian resources, areas appropriate for navigation and port facilities and areas having characteristics suitable for aquaculture. These are as identified in the Lane County Rural Comprehensive Plan.

(f) Areas identified in the Lane County Rural Comprehensive Plan as having exceptional aesthetic or scenic quality derived from or related to the association with coastal water areas.

(g) Coastal headlands identified in the Lane County Coastal Inventory.

(10 **Fees for Preliminary Investigation.** To partially de- fray the expense in performing the Preliminary Investigation, a fee to be based on the scale of development proposal shall be charged the applicant. Such fees shall be as established by order of the Board of County Commissioners.

(11) Notification of Preliminary Investigation Determination. The Planning Director shall notify the applicant of the determination of the Preliminary Investigation by certified mail within 10 days of completion of the Preliminary Investigation, The notification shall include a map at an appropriate scale detailing the portions of the parcel or parcels, subject to the requirements of the /SN-RCP Zone, and shall set forth the basis for the determination based on the criteria specified in LC 16.239(9) above.

(12) Appeal to Hearings Official. An applicant may appeal to the Hearings Official the determination of the Preliminary Investigation, and the manner for such appeal shall be as provided by LC 14.500.

(13) **Exceptions to Nonconforming Uses.** If damaged or destroyed, piling-type docks or piers may be rebuilt, but not expanded, notwithstanding the provisions of LC 16.251.

(14) Uses Subject to State and Federal Permits.

(a) When State or Federal permits, leases, easements or similar types of authorization are also required for a use subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application for all requisite State and/or Federal permits, leases, easements or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special use review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement or similar type of authorization.

(d) Where applications for development are received for lands zoned for timber production, said applications shall be referred to the District Forester of the Oregon Department of Forestry. The District Forester shall have a 14-day "review and comment" period to evaluate the impact of the proposed development on the timber productivity of the parcel and adjacent lands.

(e) Improvements to ocean shore areas (as defined in ORS 390.065) are subject to a permit from the Oregon Department of Transportation.

(15) Application of Zone to Federal Lands. The application of the /NRC-RCP Zone shall be held in abeyance until such a time as these lands or portions of these lands may pass into private, State or County ownership. The Rural Comprehensive Plan designation shall provide appropriate Federal agencies with local recommendation for propery use of these lands.

RESIDENTIAL DEVELOPMENT SHORELANDS COMBINING ZONE

(/RD-RCP

RURAL COMPREHENSIVE PLAN

16.240 Residential Development Shorelands Combining Zone(RD-RCP).

(1) **Purpose.** The Residential Development Combining Zone (/RD-RCP) is applied to coastal shorelands areas suited to residential development within urbanizable areas and to lands outside of urbanizable areas which have been committed to residential use by their development pattern, including actual development and the platting of subdivision lots. Within these areas, the /RD-RCP Zone is designed to ensure:

(a) Development in a manner that will protect water quality.

(b) Preservation and enhancement of riparian vegetation.

(c) Provision of recreational use of shorelands.

(d) Diversification of shorelands uses.

The /RD-RCP Zone provides a procedure by which to define the exact geographical boundaries of the shorelands within the /RD-RCP Zone that require protection beyond that provided by the zone or zones with which the /RD-RCP Zone is combined and imposes additional development requirements within these boundaries.

(2) Intent. The requirements imposed by the /RD-RCP Zone shall be in addition to those imposed by the respective zone or zones with which the /RD-RCP Zone is combined. Where the requirements of the /RD-RCP Zone conflict with the requirements of the zone or zones with which it is combined, the more restrictive requirements shall apply.

(3) **Permitted Uses.** In areas found subject to the requirements of the /RD-RCP Zone by the Preliminary Investigation specified by LC 16.240(10) below, the following structures and uses and no others are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exceptions set forth in this section:

(a) Shore-secured floating moorage facilities in adjacent estuaries and lakes.

(b) Private multifamily, multiuse type docks and piers in adjacent lakes and estuarine areas, if permitted by the respective estuary zone.

(c) Dredged material disposal when the /RD-RCP Zone is used in conjunction with the /DMS-RCP Zone.

(d) Commercial or public docks and piers; provided such uses conform to the purposes of the zone or zones with which the /RD-RCP Zone is combined and provided such uses conform to the requirements of the respective estuary zone.

(e) Boat launching ramps, except where adjacent to a Natural Estuary Zone (/NE-RCP).

(f) Harvesting of wild crops.

(g) Low intensity recreational activities.

(4) Special Uses Approved by the Planning Director. If found subject to the requirements of the /RD-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.240(10) below, the following specified uses and no others are permitted, subject to approval by the Planning Diretor pursuant to LC 14.100, upon satisfaction of the applicable criteria.

(a) (i) Uses. Single-family homes, mobile homes and such accessory buildings as allowed in the underlying zones.

(ii) Criteria. All requirements set forth in LC 16.240(7),(8) and (9) below are met.

(b) (i) Uses. Single-family dwelling units and mobile homes as allowed in the zone or zones with which the /RD-RCP Zone is combined, but where existing parcel size is insufficient for the development to meet the development, setback and area requirements set forth in LC 16.240(7),(8) and (9) below.

(ii) Criteria and Conditions.

(aa) The said parcel existed prior to July 24, 1980.

(bb) The structures shall not occupy more than 30 percent of the lot area.

(cc) All applicable height restrictions are observed.

(dd) The parcel is of sufficient size to meet all applicable standards for subsurface sewage disposal.

(ee) Clearance of vegetation on the remainder of the lot area, including that portion in the setback area otherwise permitted for vegetation clearance, is minimized.

(ff) All otherwise applicable requirements of this section are met.

(c) (i) Uses. All buildings and uses allowed as permitted uses in the respective zone or zones with which the /RD-RCP Zone is combined, subject to the requirements of this section, except as expressly prohibited by LC 16.240(6) below.

(ii) Criteria.

(aa) Surface, subsurface and aquifer waters are protected from pollution and sedimentation. The Lane County Water Pollution Control Division shall be the proper consulting agency in this regard.

(bb) All requirements set forth in LC 16.240(7),(8) and (9) below are met.

(d) (i) Uses. Single-family, single-purpose docks and piers in adjacent coastal lakes and estuary. (No piling-type piers are permitted in the Natural Estuary Zone (/NE-RCP)).

(ii) Criteria.

(aa) The applicant shall attest in writing, subject to confirmation by the Planning Director, that there are no viable alternatives to the construction of a private, single-family pier or dock structure. Alternatives include dryland storage, mooring buoys, public piers or the cooperative use of existing private piers.

(bb) The size of the structure is limited to that required for the intended use.

(cc) All requirements of the respective estuary zone are met.

(e) (i) Uses. Removal of individual hazardous trees within the required 50-foot strip of shorefront vegetation specified by LC 16.240(7).

(ii) Criteria. It can be clearly determined that the trees are a hazard to life or existing property.

(5) **Special Uses Approved by the Hearings Official.** If found subject to the requirements of the /RD-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.240(10) below, the following specified uses and no others are permitted, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of all applicable criteria.

(a) (i) Uses. Artificial bank stabilization adjacent to estuaries and lakes.

(ii) Criteria.

(aa) The stabilization is necessary to protect structures existing on or before October 7, 1977.

(bb) Natural bank stabilization methods are unfeasible.

(b) (i) Uses. All buildings and uses permitted conditionally or by special use permit in the respective zone or zones with which the /RD-RCP Zone is combined, subject to the development, setback and area requirements of this section, or except as expressly prohibited by LC 16.240(6) below.

(ii) Criteria.

(aa) All applicable criteria provided within the respective zone or zones with which the /RD-RCP Zone is combined are met.

(bb) Surface, subsurface and aquifer waters are protected from pollution and sedimentation.

(cc) All requirements set forth in LC 16.240(7),(8) and (9) below are met.

(6) Prohibited Uses. The following uses or activities are expressly prohibited in the /RD-RCP Zone: Fills in coastal lakes adjacent to the /RD-RCP Zone.

(7) Site and Development Requirements. If found subject to the requirements of the /RD-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.240(10) below, the below-specified development requirements shall be in addition to those provided by the respective zone or zones with which the /RD-RCP Zone is combined. These requirements shall not apply to timber harvest activities where the underlying zone allows timber harvesting as a permitted use. In such areas, timber harvesting activities shall conform to Oregon Forest Practices Act rules.

(a) Development on shorelands within dune areas shall not result in clearance of a parcel's existing vegetation in excess of what is necessary for the construction of the structures, necessary access, septic requirements and fire safety requirements.

(b) In all cases vegetative cover shall be retained on lands within the shoreland area. Construction activities shall occur in such a manner as to avoid unnecessary excavation and removal of indigenous vegetation, unless cleared vegetation is to be replaced immediately following the construction activity. Interim soil stabilization methods shall be required during the construction phase of any project.

(c) Within the setback area specified under LC 16.240(8) below, all indigenous riparian vegetation, except that removed to provide paths to the water body, shall be retained within an area 30 feet in width measured at right angles from the mean high waterline of the water body. For the remainder of the required setback area, brush may be removed, but trees shall be retained.

(d) Where riparian vegetation does not exist along the shoreline of the estuary or coastal lakes, an area 30 feet in width, measured at right angles to the shoreline, shall be planted in indigenous vegetation or other vegetation which will aid in bank stabilization and prevent sedimentation of the water body. Areas necessary for access to the water body are exempted from this requirement. Continued maintenance of this vegetation shall be the responsibility of the landowner.

(e) Cornices, canopies and eves may extend two feet into the setback area specified by LC 16.240(8) below.

(f) Decks, uncovered porches, stairways and fire escapes may extend a distance of 10 feet into the setback area specified by LC 16.240(8) below.

(g) The requirements for parking and vision clearance shall be as provided by the respective zone or zones with which the /RD-RCP Zone is combined.

(8) **Additional Setback Requirements.** Setbacks shall be as required in the zone or zones with which the /RD-RCP Zone is combined, except for the additional below-specified setback requirements.

(a) Structures shall be set back 50 feet from coastal lakes and the estuary measured at right angles to the high waterline. Use of this 50 feet shall be as specified in LC 16.240(7)(c)-(f) above.

(b) Building setbacks on oceanfront parcels are determined in accord with the rate of erosion in the area to provide reasonable protection to the site through the expected lifetime of the structure. Setback shall be determined by doubling the estimated average annual erosion rate and multiplying that by the expected life of the structure.

(9) **Special Land Division Requirements.** The following criteria shall be met for land divisions on property within the /RD-RCP Zone, based on the Preliminary Investigation in LC 16.240(10) below. These criteria are in addition to minimum area requirements of any zone combined with the /RD-RCP Zone.

(a) For lands within urbanizable areas: Land divisions must be consistent with shoreland values as identified in the Coastal Resources Management Plan, not adversely impact water quality, and not increase hazard to life or property.

(b) For lands outside urban or urbanizable areas, the above criterion, plus the following:

(i) There is a need which cannot adequately be accommodated on nonshoreland locations.

(ii) There is a lack of suitable shoreland locations within urban or urbanizable areas.

(10) **Preliminary Investigation.** Any proposal for development within the /RD-RCP Zone shall require a Preliminary Investigation by the Planning Director to determine the specific area to which the requirements of the /RD-RCP Zone shall apply. The requirements of the /RD-RCP Zone shall apply in an area in which the Planning Director determines that one or more of the criteria specified below apply.

(a) Lands which limit control or are directly affected by the hydraulic action of the coastal waterways. These lands are composed of the following:

(i) Floodways and the floodway fringe.

(ii) Land lying between the mean high, high water and mean low watermark of coastal water bodies.

(iii) Dikes, dams, levees or steep embankments which control the coastal water body.

(iv) Lands along the ocean coast at or below the 26-foot elevation line.

(d) Adjacent areas of geologic instability which are composed of:

(i) Areas of geologic instability in which the instability is attributable to the hydraulic action of the water body.

(ii) Areas of geologic instability which have a direct impact on water quality, water temperature or on shoreline stability.

(iii) Shorelands in dunal areas in which the enforcement of the use restrictions of the /BD-RCP Zone, LC 16.243, would be inadequate to protect water quality, water temperature or shoreline stability.

(c) Natural or human-made riparian resources. These lands are as follows:

(i) Extend from 10 to 65 feet landward from the mean high water, within which area the existing vegetation serves one or more of the following functions:

(aa) Shading of coastal water body.

(bb) Stabilization of shoreline.

(cc) Habitat for rare or endangered wildlife species.

(dd) Significant riparian vegetation areas as identified in the Lane County Coastal Inventory.

(d) Areas of significant shoreland and wetland biological habitat composed of:

(i) Freshwater marshes identified in the Lane County Rural Comrehensive Plan.

(ii) Areas currently identified by Nature Conservancy and included in the Lane County Coastal Inventory as significant natural areas or other areas which the Lane County Board of Commissioners may deem significant natural areas based on new inventory information.

(iii) Habitat, other than that listed in LC 16.240(10)(c)(i)(cc) above, which supports rare or endangered species.

(e) Areas necessary for water dependent and water related uses, including areas of recreational importance which utilize coastal water or riparian resources, areas appropriate for navigation and port facilities and areas having characteristics suitable for aquaculture. These are as identified in the Lane County Rural Comprehensive Plan.

(f) Areas identified in the Lane County Rural Comprehensive Plan as having exceptional aesthetic or

scenic quality derived from or related to the association with coastal water areas.

(g) Coastal headlands identified in the Lane County Coastal Inventory.

(11) Fees for Preliminary Investigation. To partially de- fray the expense in performing the Preliminary Investigation, a fee to be based on the scale of development proposal shall be charged the applicant. Such fees shall be as established by order of the Board of County Commissioners.

(12) Notification of Preliminary Investigation Determination. The Planning Director shall notify the applicant of the determination of the Preliminary Investigation by certified mail within 10 days of completion of the Preliminary Investigation. The notification shall include a map at an appropriate scale detailing the portions of the parcel or parcels subject to the requirements of the /RD-RCP Zone, and shall set forth the basis for the determination bsed on the criteria specified in LC 16.240(10) above.

(13) Appeal to the Hearings Official. An applicant may appeal to the Hearings Official the determination of the Preliminary Investigation, and the manner for such appeal shall be as provided by LC 14.500.

(14) Exceptions to Nonconforming Uses. If damaged or destroyed, piling-type docks or piers may be rebuilt, but not expanded, notwithstanding the provisions of LC 16.251.

(15) **Uses Subject to State and Federal Permits.**

(a) When State or Federal permits, ~~leases~~, easements or similar types of authorization are also required for a use, subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application for all requisite State and/or Federal permnits, leases, easements or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special use review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement or similar type of authorization.

(d) Improvements to ocean shore areas (as defined in ORS 390.605) are subject to a permit from the Oregon Department of Transportation.

(16) **Application of Zone to Federal Lands.** The application of the /RD-RCP Zone shall be held in abeyance until such a time as these lands or portions of these lands may pass into private,

State or County ownership. The Rural Comprehensive Plan designation shall provide appropriate Federal agencies with local recommendation for proper use of these lands.

SHORELANDS MIXED DEVELOPMENT COMBINING ZONE

(/MD-RCP

RURAL COMPREHENSIVE PLAN

16.241 Shorelands Mixed Development Combining Zone (/MD-RCP).

(1) **Purpose.** The Shorelands Mixed Development Combining Zone (/MD-RCP) is applied to those coastal shorelands which are recognized in the Lane County Rural Comprehensive Plan and supportive technical data as being all or partially committed to commercial and industrial uses. The proximity of these lands to the dredged channel of the Siuslaw River dictates that they be preserved for the expansion of existing water dependent and water related commercial or industrial uses; provided such uses cannot be accommodated within the urbanizable or urbanized area of the City of Florence.

The /MD-RCP Zone provides a procedure by which to define the exact geographical boundaries of the shorelands within the /MD-RCP Zone that require protection beyond that provided by the zone or zones with which the /MD-RCP Zone is combined, and imposes additional development requirements within those boundaries.

In addition, the /MD-RCP Zone is specifically intended to carry out the following purposes:

(a) Provision, adjacent to deep water environments or shoreland sites for use by water dependent and water related commercial and industrial uses.

(b) Protection of previously existing water dependent and water related commercial and industrial sites in shoreland areas.

(c) Provision of opportunities for nonwater dependent or nonwater related uses within the parameters of the Lane County Rural Comprehensive Plan and Statewide planning requirements.

(d) Protection of coastal waters and avoidance of geologic and hydrologic hazards.

(2) Intent. The requirements imposed by the /MD-RCP Zone shall be in addition to those imposed by the respective zone or zones with which the /MD-RCP Zone is combined. Where the requirement of the /MD-RCP Zone conflict with the requirement of the zone or zones with which it is combined, the more restrictive requirements shall apply. Nonwater dependent or nonrelated uses shall only be allowed if the parcel in question has been demonstrated unsuited for water dependent or water related uses.

(3) **Permitted Uses.** In areas found subject to, the requirements of the /MD-RCP Zone by the Preliminary Investigation specified by LC 16.241(9) below, the following structures and uses and no others are permitted as hereinafter specifically provided for by this section, subject to the general provisions and exceptions set forth in this section:

(a) The following boat moorage and storage facilities:

(i) Dry land storage.

(ii) Shore-secured floating moorage facilities, mooring buoys, piling-type piers and launch ramps; provided such facilities are located within adjacent Development Estuary Zones (/DE-RCP) or a lake.

(b) The three wood processing facilities identified and found to be water dependent in the Coastal Goals Compliance Report element of the Lane County Rural Comprehensive Plan.

(4) Special Uses Approved by the Planning Director. If found subject to the requirements of the /MD-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.241(9) below, the following specified uses and no others are permitted subject to approval by the Planning Director pursuant to LC 14.100, upon satisfaction of the applicable criteria.

(a) (i) Uses. Water dependent and water related commercial and industrial uses outside of urban and urbanizable areas.

(ii) Conditions and Criteria.

(aa) Uses cannot be accommodated within an urban or urbanizable area.

(bb) The site has the potential for water dependent and water related uses.

(cc) Short-term economic gain or convenience in development shall be evaluated in relation to potential long-term effects on the estuary and shoreland, as well as the long-term economy of the area.

(dd) Visual attractiveness of design and layout is considered.

(ee) Maintain or encourage riparian vegetation for erosion control, bank stabilization, maintenance of water quality and temperature aesthetics where feasible.

(b) (i) Uses. New single-family dwelling-units and mobile homes or other residential units and accessory buildings as allowed in the underlying zones outside of urban and urbanizable areas.

(ii) Criteria and Conditions.

(aa) The parcel is unsuited to water dependent or water related uses.

(bb) All requirements set forth in LC 16.241(7),(8) and (9) below are met.

(c) (i) Uses. The following moorage facilities attached or connected to the shorelands and located in other than a Development Estuary Zone (/DE-RCP) or a lake.

(aa) Public or commercial piling-type docks or piers.

(bb) Private, multifamily or multiuse piling-type docks or piers.

(cc) Mooring buoys which are permanently anchored to the estuary floor.

(dd) Dolphins.

(ii) Criteria.

(aa) The moorage facility meets the requirements of the respective estuary zone.

(bb) The use is not in violation of the purposes of the respective zone or zones with which the /MD-RCP Zone is combined.

(d) (i) Uses. All permitted buildings and uses allowed in the respective zone with which the /MD-RCP Zone is combined, except as may be provided otherwise by the provisions of LC 16.241(3),(4),(5) and (6) above and below.

(ii) Criteria and Conditions. The use is water dependent or water related, or if the parcels are unsuited to water dependent uses, then uses which are nondependent, nonrelated, conforming to the requirements of the underlying zone and the requirements of LC 16.241(3),(4),(5) and (6) above and below.

(5) **Special Uses Approved by the Hearings Official.** If found subject to the requirements of the /MD-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.241(9) below, the following specified uses and no others are permitted, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of all applicable criteria.

(a) (i) Uses. Artificial bank stabilization.

(ii) Criteria.

(aa) NAtural erosion processes are threatening structures existing as of October 7, 1977, or is required to protect a water dependent use.

(bb) Natural bank stabilization methods are deemed unfeasible or less appropriate.

(b) (i) Uses. Filling coastal lakes or estuary adjacent to /MD-RCP Zone.

(ii) Criteria and Conditions.

(aa) Cumulative effects of all such fills shall be considered.

(bb) The fill is required to protect a water dependent use from erosion.

(cc) All requirements set forth in LC 16.241(7)(b) and (c) and LC 16.241(8) and (9) below apply.

(dd) If the fill meets the requirements of the respective estuary zone and the requirements of State and Federal agencies.

(c) (i) Uses. All buildings and uses permitted conditionally or by special use permit in the respective zone or zones with which the /MD-RCP Zone is combined, subject to the development, setback and area requirements of this section, or except as expressly prohibited by LC 16.241(6) below.

(ii) Criteria. The use is water dependent or water related or, if the parcel(s) are unsuited to water dependent uses, then uses which are nondependent, nonrelated, conforming to the requirements of the underlying zone and the requirements of LC 16.241(3),(4),(5) and (6) above and below.

(6) **Determination of Land Suitable for Water Dependent/ Water Related Uses.** The following criteria shall be used to determine the suitability of land found subject to the requirements of the /MD-RCP Zone, based on the results of the Preliminary Investigation, for water dependent, water related uses. Land not possessing one or more of the following characteristics shall be considered unsuitable for such uses:

(a) Land adjacent to deep water close to shore with supporting land transport facilities suitable for ship and barge facilities.

(b) Aquaculture suitability.

(c) Protected areas adjacent to shore, subject to scour which would require little dredging for marina use.

(d) Potential for high intensity recreational use of water body and existing riparian resources. Such areas include those areas used traditionally for high intensity recreation or exceptional aesthetic resources.

(7) **Site and Development Requirements.** If found subject the requirements of the /MD-RCP Zone, based on the results of the Preliminary Investigation specified by LC 16.241(9) below, the below-specified development requirements shall be in addition to those provided by the respective zone or zones with which the /MD-RCP Zone is combined. These requirements shall not apply to timber harvesting activities. Timber harvesting activities, where permitted by the respective zone with which the /MD-RCP Zone is combined, shall conform to Oregon Forest Practices Act rules.

(a) Riparian vegetation shall be maintained, or encouraged to promote bank stabilization, maintain water quality and temperature, reduce erosion and for general aesthetics, except where unfeasible in connection with a water dependent or water related use.

(b) The applicant must submit a complete analysis of all physical and biological impacts upon the shorelands area and upon coastal waters and water

resources. The report shall consider, at a minimum, the critical relationships which exist between coastal shorelands and coastal water resources and the potential for geological and hydrological hazards.

(c) The benefits of the proposed activity to the long-term economic development or improved public recreational use shall outweigh the negative impacts on water quality, temperature and resources, bank stabilization, erosion control and general aesthetics.

(8) Special Land Division Requirements. The following criteria shall be met for land divisions on property within the /MD-RCP Zone, based on the Preliminary Investigation in LC 16.241(9) below. These criteria are in addition to minimum area requirements of any zone combined with the /MD-RCP Zone.

(a) For lands within urbanizable areas: land divisions must be consistent with shoreland values as identified in the Coastal Resources Management Plan, not adversely impact water quality, and not increase hazard to life or property.

(b) For lands outside urban or urbanizable areas, the above criterion, plus the following:

(i) There is a need which cannot adequately be accommodated on nonshoreland locations.

(ii) There is a lack of suitable shoreland locations within urban or urbanizable areas.

(9) Preliminary Investigation. Any proposal for development within the /MD-RCP Zone shall require a Preliminary Investigation by the Planning Director to determine the specific area to which the requirements of the /MD-RCP Zone shall apply. The requirements of the /MD-RCP Zone shall apply in an area in which the Planning Director determines that one or more or the criteria specified below apply:

(a) Lands which limit control or are directly affected by the hydraulic action of the coastal waterways. These lands are composed of the following:

(i) Floodways and floodway fringe.

(ii) Land lying between the mean high, high water andmean low watermark of coastal water bodies.

(iii) Dikes, dams, levees or steep embankments which control the coastal water body.

(iv) Lands along the ocean coast at or below the 26-foot elevation line.

(b) Adjacent areas of geologic instability which are composed of;

(i) Areas of geologic instability in which the instability is attributable to the hydraulic action of the water body.

(ii) Areas of geologic instability which have a direct impact on water quality, water temperature or on shoreline stability.

(iii) Shorelands in dunal areas in which the enforcement of the use restrictions of the /BD-RCP Zone, LC 16.243, would be inadequate to protect water quality, water temperature or shoreline stability.

(c) Natural or human-made riparian resources. These lands are as follows:

(i) Extend from 10 to 65 feet landward from the mean high water, within which area the existing vegetation serves one or more of the following functions:

(aa) Shading of coastal water body.

(bb) Stabilization of shoreline.

(cc) Habitat for rare or endangered wildlife species.

(dd) Significant riparian vegetation areas as identified in the Lane County Coastal Inventory.

(d) Areas of significant shoreland and wetland biological habitat, composed of:

(i) Freshwater marshes identified in the Lane County Rural Comprehensive Plan.

(ii) Areas currently identified by Nature Conservancy and included in the Lane County Coastal Inventory as significant natural areas or other areas which the Lane County Board of Commissioners may deem significant natural areas based on new inventory information.

(iii) Habitat, other than that listed in LC 16.241(9)(c)(i)(cc) above, which supports rare or endangered species.

(e) Areas necessary for water dependent and water related uses, including areas of recreational importance which utilize coastal water or riparian resources, areas appropriate for navigation and port facilities and areas having characteristics suitable for aquaculture. These are as identified in the Lane County Rural Comprehensive Plan.

(f) Areas identified in the Lane County Rural Comprehensive Plan as having exceptional aesthetic or scenic quality derived from or related to the association with coastal water areas.

(g) Coastal headlands identified in the Lane County Coastal Inventory.

(10) Fees for Preliminary Investigation. To partially de- fray the expense in performing the Preliminary Investigation, a fee to be based on the scale of development proposal shall be charged the applicant. Such fees shall be as established by order of the Board of County Commissioners.

DREDGE MATERIAL/MITIGATION SITE COMBINING ZONE

(/DMS-RCP)

RURAL COMPREHENSIVE PLAN

16.242 Dredge Material/Mitigation Site Combining Zone (/DMS-RCP)

(1) Purpose. The Dredge Material/Mitigation Site Combining Zone (/DMS-RCP) is intended for application to all dredge material disposal sites or mitigation sites within the Siuslaw Estuary as identified in the Lane County Rural Comprehensive Plan. The purpose of the /DMS-RCP Zone is to ensure that sites designated for use for dredged material disposal or mitigation are not developed in a manner which would preclude that use. The /DMS-RCP Zone may only be applied, where appropriate, in combination with the three Estuary Zones (/NE-RCP, /CE-RCP, or /DE-RCP), or with the Significant Natural (/SN-RCP), Natural Resources Conservation (/NRC-RCP), Residential Development (/RD-RCP) and Mixed Development (/MD-RCP). Shorelands Combining Zones and the underlying zones with which the Shorelands zones are combined.

(2) Permitted Uses and Buildings.

(a) Farm uses as allowed in the respective zone or zones with which the /DMS-RCP Zone is combined.

(b) Propagation and harvesting of forest products as allowed in the respective zone or zones with which the /DMS-RCP Zone is combined.

(c) Dredged material deposition; provided, however, such activity is limited to sites identified for that purpose in the Siuslaw River Dredged Material Disposal Plan.

(d) Activities in conjunction with a mitigation plan approved by the Division of State Lands; provided, however, such activities are limited to sites identified for that purpose by the Coastal Resources Management Plan.

(3) **Special Uses Subject to Further Review.** Farm or forestry uses, as allowed in the underlying zone, are permitted without further review. All other uses which are permitted in the underlying zone are subject to approval of the Planning Director as provided for in LC 14.100, based on the criteria below. All uses which are Conditional or Special Uses in the underlying zone are subject to approval of either the Planning Commission or the Hearings Official (whichever body hears the Special Use) as provided for in LC 14.300, based on the criteria below. The following criteria apply to review of a use in the /DMS-RCP, Zone:

(a) The proposed use is temporary in nature or design and will be removed if or when the site is required for the purposes of this zone; or

(b) The proposed use is designed or sited on the parcel so as not to limit or preclude future use of the parcel for dredged material disposal as indicated in the Siuslaw River Dredged Material Disposal Plan, or for a potential mitigation project.

(4) Stabilization of Dredged Materials. It shall be the responsibility of the party depositing dredged materials on a site to stabilize the site with appropriate vegetation when the materials are adequately drained.

(5) Responsibility to Acquire Mitigation/Restoration Sites. It shall not be the responsibility of Lane County to acquire for use sites to mitigate for actions for which other agencies or persons are responsible, including the dredging of the navigation channel and development of the estuary. It shall also not be the responsibility of Lane County to acquire sites for restoration to the estuary.

BEACHES AND DUNES COMBINING ZONE (/BD-RCP)

RURAL COMPREHENSIVE PLAN

16.243 Beaches and Dunes Combining Zone (/BD-RCP).

(1) **Purpose.** The Beaches and Dunes Combining Zone (/BD-RCP) is intended to be used in conjunction with the underlying zones in all coastal beach and dune areas in order to:

(a) Ensure the protection and conservation of coastal beach and dune resources.

(b) To prevent economic loss by encouraging development consistent with the natural capability of beach and dune landforms.

(c) To provide for clear procedures by which the natural capability of dune landforms can be assessed prior to development.

(d) To prevent cumulative damage to coastal dune resources due to the incremental effects of development.

(e) To provide for such protection of beach and dune resources above and beyond that provided by the underlying zone.

(2) Intent. The requirements imposed by the /BD-RCP Zone shall be in addition to those imposed by the underlying zone. Where the requirements of the /BD-RCP Zone conflict with those of the underlying zone, the more restrictive requirements shall apply.

(3) Permitted Uses. All permitted buildings and uses allowed in the respective zone with which the /BD-RCP Zone is combined, except as may be provided otherwise by the provisions of LC 16.243(3),(4) and (5) below.

(4) Special Uses Approved by the Hearings Official. The following specified uses or activities and no others, subject to approval by the Hearings Official pursuant to LC 14.300, upon satisfaction of the applicable criteria:

(a) (i) Uses. Buried fuel tanks.

(ii) Criteria.

(aa) The tanks are entirely free of leaks and have an impermeable coating.

(bb) The tank is located, to, the greatest extent feasible, in a well-drained area.

(cc) The tank is not located in active foredunes, on other conditionally stable foredunes which are subject to ocean undercutting or wave overtopping, and on deflation plains subject to ocean flooding.,

(b) (i) Uses. Commercial removal of sand..

(ii) Criteria.

(aa) The area is not an ocean beach.

(bb) Historic surplus accumulations of sand exist.

(ii) Criteria and Conditions.

(aa) Applicable criteria provided within the respective zone with which the /BD-RCP Zone is combined.

(bb) All other provisions of this section.

(5) Prohibited Development Areas. No development, with the exception of minimal development, shall be permitted on the following dune landforms:

(a) Beaches, except as provided for in LC 16.243(4) above.

(b) Foredunes, if subject to wave overtopping or ocean undercutting.

(c) Active dune forms.

(d) Nearshore deflation plain.

The prohibition of development of active dune areas is not intended to prohibit the stabilization of open sand areas with appropriate pioneer and successional species, thereby removing these lands from the active dune classification.

(6) **Uses Subject to State and Federal Permits.**

(a) When State or Federal permits, ~~leases~~, easements or similar types of authorization are also required for a use, subject to special use approval, information required as part of the State or Federal permit process may be required to be made available to the County for the determination that applicable criteria are satisfied.

(b) Applicants shall make application for all requisite State and/or Federal permits, leases, easements or similar type of authorization within 10 days following application for a special use approval in order to avoid unnecessary delays caused by the unavailability of State or Federal processing information which may be deemed necessary for special permit review.

(c) Any use authorized by the provisions of this zone shall also require the securing of any necessary State or Federal permit, lease, easement of similar type of authorization.

(7) **Coastal Shore Setback Requirements.** Any development, with the exception of development provided for as special uses in LC 16.243(4) above, which is permitted adjacent to ocean beaches must be setback from the mean high tide line a minimum of 50 feet measured horizontally. This setback may be increased if the Preliminary Investigation indicates hazard to the site due to:

(a) Low elevation of the site with respect to potential for wave action.

(b) Instability of dune landforms protecting the site from wave action.

(8) **Additional Site and Development Requirements.** The following requirements apply to all development, except the

harvesting of timber as allowed by the Zone with which the /BD-RCP Zone is combined. Timber harvesting activities shall conform to Oregon Forest Practices Act rules regulating logging practices in dune areas:

(a) Development shall not result in the clearance of natural vegetation in excess of that which is necessary for the structures, required access, fire safety requirements and the required septic and sewage disposal system.

(b) Vegetation-free areas which are suitable for development shall be used instead of sites which must be artificially cleared.

(c) Areas cleared of vegetation during construction in excess of those indicated in LC 16.243(8)(a) above shall be replanted within nine months of the termination of major construction activity.

(d) Sand stabilization shall be required during all phases of construction and post-construction as specified by standards set forth in the Lane Manual.

(e) Development shall result in the least topographic modification of the site as is possible.

(f) Slopes in excess of 25 percent shall be prohibited from development.

(g) Significant structural loads or structural fills to be placed on dune areas where, based on the Development Hazards Checklist, compressible subsurface areas are suspected, shall be allowed only after a thorough foundation check and positive findings are reported.

(h) The requirements for yards, setback, area, vision clearance and parking spaces shall be as provided in the respective zone with which the /BD-RCP Zone is combined, unless specifically provided otherwise by the provision of the /BD-RCP Zone.

(9) Area Requirements. The minimum area for the division of land may be increased where the requirement otherwise is insufficient to meet the following standards:

(a) Environmental Quality Commission nitrate nitrogen loading standards for subsurface sewage disposal.

(b) No more than five percent impermeable surface shall be allowed.

(10) Prelimary Investigation Required. Any proposal for development, with the exception of minimal development or timber harvesting zone is combined, shall require a Preliminary Investigtion (Development Hazards Checklist) by the Planning Director to determine:

(a) The dune landform(s) present on the site.
(b) Hazards associated with the site.

(c) Hazards presented by adjacent sites.

(d) Existence of historical or archeological sites.

(e) Existence of critical fish or wildlife habitat as indentified in the Lane County Coastal Inventory or sites identified by Nature Conservancy.

(f) Potential development impacts, including cumulative impacts.

(g) If a full or partial Site Investigation Report shall be required, the form of the Developmnet Hazards Checklist is as specified by the Lane Manual.

(11) Fee for Preliminary Investigation. To partially defray the expense in performing the Preliminary Investigation, a fee to be based on the scale of the development proposal shall be charged the applicant. Such fees shall be as established by order of the Board of County Commissioners.

(12) Site Investigation Reports (SIR). The Preliminary Staff Investigation (Development Hazards Checklist) shall determine if a Site Investigation Report is required and, if so, what components of the SIR must be completed.

(13) Notification of SIR Requirement. The Planning Director shall notifiy the applicant of the results of the Preliminary Investigation and if a SIR shall be required. The notification shall be by certified mail within 10 days of completion of the Preliminary Investigation.

(14) Responsibility For SIR Preparation. Preparation of the SIR is the responsibility of the applicant. All costs borne in prepartion shall be paid by the applicant.

(15) **Qualifications for SIR Preparation** The SIR shall be prepared by a person or team of persons qualified by experience, training and area. The applicant shall either:

(a) Choose a person or team of persons from a current list of qualified persons or firms to be compiled and maintained by the Department of Public Works, Land Management Division, and approved by the Board of County Commissioners; or

(b) Designate a person or team of persons to prepare the SIR with said persons' qualifications, subject to the approval of the Planning Commission,. based on standards established by the Board of County Commissioners.

(16) **Contents of SIR.** The contents of the Site Investigation Report are specified in the standard SIR document as set forth in the Lane Manual.

(17) Conditions Imposed Based on SIR Recommendations. Based on the information and recommendations provided in the SIR, the Planning Director may impose conditions upon the proposed development for the purposes of safety, health, welfare and in keeping with the purpose of the /BD-RCP Zone.

(18) Appeal to Hearings Official. An applicant may appeal to the Hearings Official the determination of the

Preliminary Investigation, or the imposition of conditions based on the SIR, and the manner for such an appeal shall be as provided by LC 14.500.

(19) Applicable Geographical Features. The /BD-RCP Zone is applied to all coastal beach and dune landforms as specified in the Lane County Rural Comprehensive Plan. These are:

(a) Beaches.
(b) Foredunes.
(c) Active dune forms.
(d) Recently stabilied dune forms.
(e) Older stabilized dune forms.
(f) Interdune forms.

The boundaries of the /BD-RCP Zone are shown on the Lane County zoning maps as specifed by LC 16.252.

(20) Application of Zone to Federal Lands. The application of the /BD-RCP Zone shall be held in abeyance until such a time as these lands or portions of these lands may pass into private, State or County ownership. The Rural Comprehensive Plan designation shall provide appropriate Federal agencies with local recommendation for proper use of these lands.

FLOODPLAIN COMBINING ZONE (/FP-RCP)

RURAL COMPREHENSIVE PLAN

16.244 Floodplain Combining Zone (/FP-RCP).

(1) **Purpose.** The flood hazard areas of Lane County are subject to periodic inundation, resulting in loss of life and property, health and safety hazards, disruption of commerce and governmental services, extraordinary public expenditures for flood protection and relief impairment of the tax base, and adverse effects on the public health, safety and general welfare. Flood losses are caused by the cumulative effect of obstructions in floodways causing increases in flood heights and velocities and the occupancy of flood hazard areas by uses vulnerable to floods or hazardous to those which are inadequately elevated or otherwise protected from flood damages.

It is the purpose of this section to promote the public health, safety and general welfare, and to minimize public and private losses due to flood conditions in specific areas. The provisions of this section are designed to:

(a) Protect human life and health.

(b) Minimize expenditure of public money and costly flood control projects.

(c) Minimize the need for rescue and relief efforts associated with flooding and generally undertaken at the expense of the general public.

(d) Minimize prolonged business interruptions.

(e) Minimize damage to public facilities and utilities such as water and gas mains, electric, telephone and sewer lines, streets and bridges located in areas of special flood hazards.

(f) Help maintain a stable tax base by providing for the sound use and development of areas as special flood hazard so as to minimize future flood blight areas.

(g) Ensure that potential buyers are notified that property is in an area of special flood hazard.

(h) Ensure that those who occupy the areas of special flood hazard assume responsibility for -their actions.

(2) **Methods of Reducing Flood Losses.** In order to accomplish its purpose, this section includes methods and provisions for:

(a) Restricting or prohibiting uses which are dangerous to health, safety and property due to water or erosion hazards, or which result in damaging increases in erosion or in flood heights or velocities.

(b) Requiring that uses vulnerable to floods, including facilities which serve such uses, be protected against flood damage at the time of initial construction.

(c) Controlling the alteration of natural floodplains, stream channels and natural protective barriers, which help accommodate or channel flood waters.

(d) Controlling filling, grading, dredging and other development, which may increase flood damage.

(e) Preventing or regulating the construction of flood barriers, which will unnaturally divert flood waters or which may increase flood hazards in other areas.

(3) Lands to Which This Section Applies. This section shall apply to all areas of flood hazard within Lane County, and overlay the regulations of the underlying zone.

(4) Basis for Establishing Areas of Flood Hazard. Areas of flood hazard for Lane County under the jurisdication of the Rural Comprehensive Plan are areas designated as special flood hazard areas (A Zones) or areas within a floodway.

Special flood hazard areas and floodways are identified by the Federal Insurance Administration in a scientific and engineering report entitled "THE FLOOD INSURANCE STUDY FOR LANE COUNTY, OREGON UNINCORPORATED AREAS", with accompanying Flood Insurance Rate Maps (FIRM) and Flood Hazard Boundary Maps.

Flood hazard studies shall be adopted by Board Order, made a part of Lane Manual (LM 11.020) and filed in the office of the Department. Such studies shall form the basis for the administration and implementation of this section.

These publications shall be used as the basis for determining which flood district applies to the property. Where these publications fail to provide data sufficient to determine the applicable flood district, the applicable flood district shall be determined on the basis of the best available information.

Areas of flood hazard shall also include any land area designated by the Director as susceptible to inundation of water from any source where the above-referenced maps have not identified any special flood areas.

(5) Compliance. No structure shall hereafter be constructed, located, extended, converted or altered, nor shall any land be developed, subdivided or partitioned without full compliance with the terms of this section and other applicable regulations.

(6) Abrogation and Greater Restrictions. **It** is not intended by this section to repeal, abrogate or impair any existing easements, covenants or deed restrictions. However, where this section imposes greater restrictions, the provisions of this section shall prevail.

(7) **Warning and Disclaimer of Libability.** The degree of flood protection required by this section is considered reasonable for regulatory purposes. Larger floods can occur on rare occasions. The flood height may be increased by human-made or natural causes, such as log jams and bridge openings restricted by debris. This section does not imply that areas outside floodways and floodway

fringe district boundaries or land uses permitted within such districts will be free from flooding or flood damages. This section shall not create liability on the part of Lane County, or any officer or employee thereof, for any flood damages that may result from reliance on this or any administrative decision lawfully made thereunder.

(8) Required Permits. A permit shall be obtained before construction or development begins within any area of flood hazard established in LC 16.244(12)(a) below. Application for such permit shall be filed with the appropriate agency of government having jurisdiction over such development. Applications required by the Director shall include the following information:

(a) Where base flood elevation data has been provided:

(i) Elevation in relation to mean sea level, of the lowest flood (including basement) of all structures;

(ii) Elevation in relation to mean sea level to which any structure has been floodproofed;

(iii) Where required, certification by a registered professional engineer or architect that criteria specified in LC 16.244(11)(f) thru (h) and LC 16.244(12)(b) below have been met;

(iv) Description of the extent to which any watercourse will be altered or relocated as a result of proposed development;

(v) Plot plan drawn to scale showing the nature, location and dimensions and elevation referenced to mean sea level, of the area in question, including existing and proposed structures, fill, storage of materials and drainage facilities. Applicants shall submit certification by an Oregon registered professional engineer or land surveyor of the site's ground elevation and whether or not the development is located in a flood hazard district. If so, the certification shall include which flood hazard district applies, the location of the floodway at the site, and the 100-year flood elevation at the site. A reference mark shall be set at the elevation of the 100-year flood at the site. The location, description and elevation of the reference mark shall be included in the certification; and

(vi) Any other information required by the Director.

(b) When base flood elevation data has not been provided by "THE FLOOD INSURANCE STUDY FOR LANE COUNTY, OREGON," the Director shall obtain, review and reasonably utilize any base flood elevation data available from a Federal, State or other source in order to administer this section.

(c) All building and mobile home placement permits shall also be reviewed to determine the flood hazard for the proposal. Where elevation data is not available, permits shall be reviewed to assure that the proposed construction will be reasonably safe from flood. Reasonableness shall be determined on the basis of the best available information on flood conditions affecting the land. The best available information may include, but shall not be limited to, the use of historical data, high watermarks, etc.

(9) **Designation of Administrator.** The Director shall administer and implement this section by granting or denying development permit applications in accordance with its provisions. The Director shall:

(a) Review all development applications to determine that the permit requirements of this section have been satisfied.

(b) Review all development applications to determine that all necessary permits have been obtained from those Federal, State or Local governmental agencies from which prior approval is required.

(c) Ensure that all provisions of this section are met.

(d) Obtain and record the actual elevation (in relation to mean sea level) of the lowest habitable floor (including basement) of all new or substantially improved structures, and whether or not the structure contains a basement.

(e) For all new or substantially improved floodproofed structures:

(i) Verify and record the actual elevation (in relation to mean sea level); and

(ii) Maintain the floodproofing certifications required in LC 16.244(8) above.

(f) Maintain for public inspection all records pertaining to the provisions of this section.

(g) Notify adjacent communities and the Division of State Lands prior to any alteration or relocation of a watercourse, and submit evidence of such notification to the Federal Insurance Administration upon request.

(h) Require that a program of periodic inspection and maintenance be provided with the altered or relocated portion of said watercourse so that the flood carrying capacity of the watercourse is not diminished.

(i) Make interpretation, where needed, as to exact location of the boundaries of areas of special, flood hazards (for example, where there appears to be a conflict between a mapped boundary and actual field conditions). The person contesting the location of the boundary shall be given a reasonable opportunity to appeal the interpretation as provided in LC 14.500.

(j) Alleged errors of any requirement, decision or determination made by the Director in the enforcement or administration of this secton can be appealed pursuant to LC 14.500.

(10) Variance Procedures. Requests for variances to any standard, procedure or requirement of this section shall be filed pursuant to LC 14.050 and shall be reviewed by the Hearings Official pursuant to LC 14.300.

(a) Criteria. In passing upon such applications, the Approval Authority shall consider all technical evaluations, all relevant factors and standards specified in other subsections of this section, and;

(i) The danger that materials may be swept onto other lands to the injury of others;

(ii) The danger to life and property due to flooding, debris or erosion damage;

(iii) The susceptibility of the proposed facility and its contents to flood damage and the effect of such damage on the individual owner;

(iv) The importance of the services provided by the proposed facility to the community;

(v) The necessity to the facility of a waterfront location, where applicable;

(vi) The availability of alternative locations for the proposed use, which are not subject to flooding or erosion damage;

(vii) The compatibilty of the proposed use with existing and anticipated development;

(viii) The relationship of the proposed use to the Rural Comprehensive Plan and floodplain management program for that area;

(ix) The safety of access to the property in times of flood for ordinary and emergency vehicles;

(x) The expected heights, velocity, duration, rate of rise and sediment and debris transported by the floodwaters and the effects of wave action, if applicable, expected at the site; and

(xi) The costs of providing governmental services during and after flood conditions, including maintenance and repair of public utilities and facilities such as sewer, gas, electrical and water systems, and streets and bridges.

(xii) Generally, variances may be issued for construction, development and substantial improvements to be erected on a parcel of land of one-half acre or less in size contiguous to and surrounded by lots with existing structures constructed below the 100-year flood level,

considered. As the parcel size increases beyond one-half acre, the technical justification required for issuing the variance increases.

Upon consideration of the above factors and purposes of this section, the Approval Authority may attach such conditions to the granting of variance as he or she deems necessary to further the purposes of this section.

(b) Conditions of Variances. Upon consideration of the above criteria and purposes of this section, the Approval Authority may attach such conditions to the granting of variances as he or she deems necessary to further the purposes of this section.

(i) Variances may be issued for the reconsideration, rehabilitation or restoration of structures listed on the National Register of Historic Places of the State Inventory of Historic Places, without regard to the procedures set forth in the remainder of this subsection.

(ii) Variances shall not be issued within any desigated floodway if any increase in flood levels during the base flood discharge would result.

(iii) Variances shall only be issued upon a determination that the variance is the minimum necessary, considering the flood hazard, to afford relief.

(iv) Variances shall only be issued upon:

(aa) A showing of good and sufficient cause;

(bb) A determination that failure to grant the variance would result in exceptional hardship to the applicant; and

(cc) A determination that the granting of the variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, create nuisances, cause fraud on or victimization of the public or conflict with existing local laws or ordinances.

(v) Any applicant to whom a variance is granted shall be given written notice of the approval and any conditions of the variance. In cases where a variance is granted to allow construction with a lowest floor elevation below the 100-year flood elevation, applicant will also be notified, in writing, that the cost of flood insurance will be commensurable with the increased risk resulting from the reduced lower floor elevation.

(c) Application. Application for a variance shall be made as provided by LC 14.050.

(d) Review Procedure. Applications for variances shall be reviewed by the Director pursuant to LC 14.100.

(e) Records. The Director shall maintain the records of all appeal actions and report any variances to the Federal Insurance Administration upon request.

(11) Provisions for Flood Hazard Reduction. In areas of flood hazard, the provisions of LC 16.244-11(a) through (h) below shall apply.

(a) Anchoring.

(i) All new construction and substantial improvements shall be anchored to prevent flotation, collapse or lateral movement of the structure.

(ii) All mobile homes shall be anchored in accordance with standards of the State of Oregon Department of Commerce, Mobile Home Division.

(b) Construction Materials and Methods.

(i) All new construction and substantial improvements shall be constructed with materials and utility equipment resistant to flood damage.

(ii) All new construction and substantial improvements shall be constructed using methods and practices that minimize flood damage.

(c) Utilities.

(i) All new and replacement water supply systems shall be designed to minimize or eliminate infiltration of flood waters into the system. Public water systems which utilize wells for a source(s) shall be constructed such that the top well elevation is at least one foot above the 100-year flood elevation.

(ii) New and replacement sanitary systems shall be designed to minimize or eliminate infiltration of flood waters into the systems and discharged from the systems into flood waters.

(d) Roads.

(i) Adequate provisions shall be made for accessibilty during a 100-year flood, so as to ensure ingress and egress for ordinary and emergency vehicles and services during potential future flooding.

(ii) No road surface of any street, road or access road shall be at an elevation less than one foot below the base flood height.

(e) Subdivison and Partitioning Proposals.

(1) All subdivision and partitioning proposals shall be consistent with the, need to minimize flood damage.

(ii) All subdivision and partitioning proposals shall have public utilities and facilities such as sanitary and storm sewers, gas, electrical

and water systems located, constructed and maintained to minimize flood damage.

(iii) All subdivision proposals shall have adequate drainage to reduce exposure to flood damage, including returning water.

(iv) No portion of any stream or road surface in any subdivision shall be at an elevation less than one foot below the base flood heights. The road surface is that portion of a street or way available for vehicular traffic or where curbs are laid, the portion between curbs.

(v) 100-year flood elevation data shall be provided and shown on final partition maps and subdivision plats. Application must show the boundaries of the 100-year flood and floodway on the final subdivision plat.

(vi) A permanent monument shall be established and maintained on land partitioned or subdivided, showing the elevation in feet above mean sea level. The location of such monument shall be shown on the final partition map or subdivision plat.

(f) Nonresidential Construction. New construction and substantial improvement of any commercial, industrial or other nonresidential structure shall have either:

(i) The lowest floor, including basement, elevated to a level at least one foot above the base flood height; or

(ii) Be floodproofed:

(aa) As provided in State Structural Specialty Code, Chapter 56, to one foot above the base flood level so that the structure is watertight with walls substantially impermeable to the passage of water;

(bb) Have structural components capable of resisting hydrostatic and hydrodynamic loads and effects of buoyancy; and,

(iii) Be certified by an Oregon licensed registered professional engineer or architect that the standards of this subsection are satisfied. Such certifications shall be provided to the Official as set forth in LC 16.244(8) above.

(g) Residential Construction. All residential construction and substantial improvements shall:

(i) Have the lowest habitable floor height (including basement) at least one foot above the base flood height.

(ii) Be certified by an Oregon licensed registered professional surveyor, engineer or architect that the standards of this subsection are

satisfied. Such certifications shall be provided to the Official as set forth in LC 16.244(8) above.

(h) Mobile Home Standards.

(i) All mobile homes and approved mobile home additions shall:

(aa) Have the lowest habitable floor height at least one foot above the base flood height and be certified by an Oregon licensed registered professional surveyor, engineer or architect that the standards of this subsection are satisfied, except mobile homes in existing mobile home parks. Such certifications shall be provided to the Official as set forth in LC 16.244(8) above.

(bb) Be anchored with an approved tie down system to resist flotation, collapse or lateral movement, to standards set forth by the State of Oregon, Department of Commerce, Mobile Home Division.

(cc) Alternative methods of anchoring may be utilized; provided certification is provided by a licensed Oregon professional engineer or architect that the system is designed to conform to Federal anchor design load requirements as specified by the State of Oregon, Department of Commerce, Mobile Home Division.

(ii) For new mobile home parks and mobile home subdivisions; for expansions to existing mobile home parks and mobile home subdivisions; for existing mobile home parks and mobile home subdivisions where the repair, reconstruction or improvement of the streets, utilities and pads equals or exceeds 50 percent of value of the streets, utilities and pads before the repair, reconstruction or improvement has commenced; and for mobile homes not placed in a mobile home park or mobile home subdivision, it shall be required that:

(aa) Stands or lots are elevated on compacted fill or on pilings so that the lowest floor of the mobile home will be at least one foot above the base flood height;

(bb) Adequate surface drainage and access for hauler are provided; and

(cc) In the instance of elevation on pilings, that lots are large enough to permit steps, piling foundations are placed in stable soil no more than 10 feet apart, and reinforcement is provided for pilings more than six feet above the ground level.

(iii) No mobile home shall be placed in a floodway district, except in an existing mobile home park or existing mobile home subdivision.

(12) **Establishment of Flood Districts.** Flood hazard areas of Lane County are hereby divided into the following districts:

100-Year Flood District
Floodway District

Criteria for determining district boundaries are set forth in LC 16.244(4) above.

(a) 100-Year Flood District. The following uses shall be permitted in the 100-Year District to the extent they are not prohibited by any other provision of this Chapter.

(i) Structures and substantial improvements designed for human occupancy provided the lowest habitable flood (including basement) elevation is at least one foot above the base flood height.

(ii) Other structures provided they are floodproofed or otherwise protected to an elevation at least one foot above the base flood height.

(iii) Subdivision and partitioning of land provided that the development meets the standards set forth in LC 16.244(11)(e) above.

(b) Floodway District. In the Floodway District, the following restrictions shall apply:

(i) Encroachments. Including, but not limited to, fill, new construction, substantial improvements and other development are not permitted unless an Oregon registered professional engineer or architect certifies that such encroachments (and cumulative like encroachments), when combined with all other existing and anticipated encroachments, shall not result in any increase in flood levels during the occurrence of a base flood. If such certification is obtained, all construction development and substantial improvements shall comply with all applicable provisions of LC 16.244(11) above.

(ii) Subdivision and partitioning of land for residential purposes is prohibited if land is located entirely within the Floodway District.

(iii) No mobile home may be placed in the Floodway District, except in an existing mobile home park. Any mobile homes placed, or additions thereto, shall conform to standards, of LC 16.244(11)(h) above.

COMMERCIAL AIRPORT SAFETY COMBINING ZONE (/CAS-RCP)

RURAL COMPREHENSIVE PLAN

16.245 Commercial Airport Safety Combining Zone (/CAS-RCP).

(1) Purpose. The Commercial Airport Safety Combining Zone (/CAS-RCP) is applied to those lands adjacent to and within the Mahlon Sweet Field airport. The /CAS-RCP Zone is intended to carry out the following purposes:

(a) Prevent the creation or establishment of obstructions that are a hazard to air navigation and flight.

(b) Prevent the creation or establishment of other hazards to air navigation and flight such as distracting light and glare producing surfaces, radio interference, smoke, steam and dust, areas which attract birds and hazards of a similar nature.

(2) **Applicability.** The /CAS-RCP Zone is applied to those lands encompassed by the surfaces set forth and described in LC 16.245(4)(ii) below and diagramed in LC 16.245(5) below.

(3) **Use Limitations.** In the /CAS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /CAS-RCP Zone is combined:

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /CAS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the height limitations of the various areas described in LC 16.245(4)(ii) below.

(b) No use may be made of land or water in such a manner as to create electrical interference with navigational signals or radio for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(4) **Surfaces Described.**

(a) Primary Surfaces.

(i) The Primary Surface is a plan longitudinally centered on the runway centerline and extending 200 feet beyond the ends of prepared runway surfaces. The width of the Primary Surface for each runway is the same as the width of the inner portion of the Approach Surface for that runway.

(ii) For purpose of this section, the centerpoints at the ends of each runway Primary Surface shall be considered as having the following coordinates and elevations:

Runway	Centerpoint Coordinates		Centerpoint Elevation
	North	East	feet above sea level
16R-34L	909410	1286622	358.2
	902848	1286530	361.54
3-21	903976	1284706	365.1
	907764	1288797	359.9
16L-34R	907793	1290513	360.0
	9044165	1290501	370.0

(iii) The elevation at any point on the Primary Surface is the same as the elevation of the nearest point on the runway centerline. For purposes of this section, the runway centerline shall be considered as having a straightline grade between the two centerpoints for that runway as described in LC 16.245(4)ii) above.

(b) Runway 16R-34L Approach Surface. This runway is a precision instrument runway aligned in a north-south direction and is designated as a primary runway. The inner edges of the Approach Surfaces coincide with the width of the Primary Surface at the ends of Runway 16R-34L and are 1,000 feet wide. Each Approach Surface extends outward uniformly to a width of 16,000 feet at a horizontal distance of 50,000 feet from the Primary Surface, its centerline being a continuation of the runway centerline. The Approach Surface extends outward and upward at a slope of 50 horizontal feet to one vertical foot beginning at the end of and at the same elevation as the Primary Surface and extending to a horizontal distance of 10,000 feet along the extended runway centerline, thence slopes upward 40 horizontal feet to one vertical foot to an additional distance of 40,000 feet along the extended runway centerline.

(c) Runway 3-21 Approach Surface. This runway is a nonprecision instrument runway, aligned in an east-west direction and designated as a crosswind runway. The inner edge of the Approach Surfaces coincide with the width of the Primary Surface at the ends of Runway 3-21 and are 500 feet wide. Each Approach Surface, extends outward uniformly to a width of 4,000 feet at a horizontal distance of 10,000 feet from the Primary Surface, its centerline being the continuation of thee. runway centerline. The Approach Surface extends outward and upward at a slope of 34 horizontal feet to one vertical foot, beginning at the end of and at the same elevation as the Primary Surface.

(d) Runway 16L-34R. This is a future runway to be aligned in a north-south direction and will be designated as a secondary runway. The inner edge of the Approach Surface coincides with the width of the Primary Surface of the ends of Runway 16L-34R and are 250 feet wide. Each

Approach Surface extends outward uniformly to a width of 1,250 feet at a horizontal distance of 5,000 feet from the Primary Surface, its centerline being the continuation of the runway centerline. The Approach Surface extends outward and upward at a slope of 20 horizontal feet to one vertical foot, beginning at the end of and at the same elevation as the Primary Surface.

(e) Transitional Surfaces. These surfaces are adjacent to the primary surfaces and the approach surfaces. The surfaces slope upward and outward seven horizontal feet to one vertical foot, beginning at the side of and at the same elevation as the Primary Surfaces and the Approach Surfaces, and extend to where they intercept the Horizontal Surface at a height of 150 feet above the airport elevation. Where the Runway 16R-34L Approach Surfaces pass through the Conical Surface, there are Transitional Surfaces sloping outward and upward seven horizontal feet to one vertical foot, beginning at the sides of and at the same elevation Approach Surface, and extending to where they intersect the Conical Surface. Where the Runway 16R-34L Approach Surface extends beyond the Conical Surface, there are Transitional Surfaces sloping outward and upward seven horizontal feet to one vertical foot, beginning at the sides of and at the same elevation as the Approach Surface, and extending to a horizontal distance of 5,000 feet measured horizontally from the edge of the Approach Surface and at right angles to the runway centerline.

(f) Horizontal Surface. The Horizontal Surface is described by swinging arcs of 10,000 feet radii from the center of each end of the Primary Surfaces of Runway 16R-34L and Runway 3-21, and connecting the arcs with tangent lines. The Horizontal Surface is a horizontal plane 150 feet above the elevation of the airport and for purposes of this section shall be considered as having an elevation of 515 feet above mean sea level. The Horizontal Surface does not include the Approach and Transitional Surfaces.

(g) Conical Surface. The Conical Surface begins at the outer periphery of the Horizontal Surface and slopes outward and upward 20 horizontal to one vertical, starting at the elevation of the Horizontal Surface and extends outward a horizontal distance of 4,000 feet.

(5) Marking and Lighting. The owner of any existing structure or object that does not conform to the height limitations of this section shall be required to permit the installation, operation and maintenance thereon of such markers and lights as may be deemed necessary by the City of Eugene to indicate to the operators of aircraft in the vicinity of the airport, of the presence of such aircraft obstructions. Such markers and lights

shall be installed, operated and maintained at the expense of the City of Eugene.

(6) Surfaces Diagramed. The surfaces described in LC 16.245(4) above are as illustrated in the diagram below:

AIRPORT SAFETY COMBINING ZONE (/ASRCP)

RURAL COMPREHENSIVE PLAN

16.246 Airport Safety Combining Zone (/AS-RCP).

(1) **Purpose.** The Airport Safety Combining Zone (/AS-RCP) is applied to those lands adjacent to the Creswell Airport (Hobby Field), the Cottage Grove Airport, the Oakridge Airport, the McKenzie Airport and the Florence Airport. The /AS-RCP Zone is intended to safeguard land uses adjacent to these airports from noise and hazards associated with aircraft operations and to protect existing use and potential expansion of the airport itself from incompatible development. Specifically, the /AS-RCP Zone is intended to carry out the following purposes:

(a) Prevent the creation or establishment of obstructions that are a hazard to air navigation and flight.

(b) Prevent the creation or establishment of other hazards to air navigation and flight such as distracting light and glare producing surfaces, radio interference, smoke, steam and dust, areas which attract birds and hazards of a similar nature.

(c) Restrict new development of land uses not normally compatible with noise and safety hazards associated with airport operations.

(2) **Applicability.** The /AS-RCP Zone is applied to those lands adjacent to the Creswell Airport, the Cottage Grove Airport, the McKenzie Airport, the Oakridge Airport and Florence Airport which are encompassed by the surfaces set forth and described in LC 16.246(5) below and diagramed in LC 16.246(9) below. For purposes of this Chapter, the elevations of the five runways are established as follows:

(a) Cottage Grove - 641 feet above sea level.
(b) Creswell - 535 feet above sea level.
(b) Florence - 12 feet above sea level.
(c) Oakridge - 1419 feet above sea level.
(d) McKenzie - 1620 feet above sea level.

(3) **Use Limitations.** In a /AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined:

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

(b) All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airpot lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

(4) Uses Prohibited. The area lying beneath the Approach Surface beginning at the end of the Primary Surface and extending outward a horizontal distance of 1,000 feet shall be considered to be a clear zone. Within this clear zone, no structure or object, except for fences and navigational aids approved by the airport operator, shall be erected, placed, altered, allowed to grow or be maintained above the surface of the ground.

(5) Surface Described.

(a) Approach Surface. A surface longitudinally centered on the runway centerline, extending outward and upward from the ends of the Primary Surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 5,000 feet and widening from the width of 250 feet to 1,250 feet at its outer edge.

(b) Conical Surface. A surface extending outward and upward from the periphery of the Horizontal Surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 4,000 feet. This surface rises from 150 feet above the runway and extends to a height of 350 feet above the runway.

(c) Horizontal Surface. A horizontal plan 150 feet above the airport runway, the perimeter of which is established by swinging arcs of 5,000 feet radii from the center of each end of the Primary Surface and connecting the arcs with tangent lines.

(d) Primary Surface. The Primary Surface is a plane longitudinally centered on the runway centerline and extending 200 feet beyond the ends of the prepared runway surface and having a width of 250 feet. For

purposes of this section, the Primary Surface shall be considered as having the same elevation as its respective runway as the same are specified in LC 16.246(2) above. The centerpoints at the ends of each Primary Surface shall be considered as having the following coordinates:

	North Coordinate	East Coordinate
Cottage Grove Airport	787358	1331306
	790828	1331606
Creswell Airport	833934	1339698
	836415	1339781
Oakridge Airport	766146	1472836
	767325	1469017
McKenzie Bridge Airport	920159	1582521
	920810	1585438
Florence Airport	868731	1050341
	869823	1049883

(e) Transitional Surfaces. These surfaces extend outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of one horizontal foot to seven vertical feet to their intersection with the Horizontal Surface. This surface extends to a height of 150 feet above the runway.

(6) Marking and Lighting. The owner of any existing structure or object that does not conform to the height limitations of this section shall be required to permit the installation, operation and maintenance thereon of such markers and lights as may be deemed necessary by the airport operator to indicate to the operators of aircraft in the vicinity of the airport, of the presence of such aircraft obstructions. Such markers and lights shall be installed, operated and maintained at the expense of the airport operator.

(7) Special Requirements for Construction Permits. Within the area beneath the Approach Surface, no construction permit shall be issued for any building, mobile home or other structure designed and intended for human occupancy until the property owner has agreed to waive action against the County and the airport for noise, property damage or personal injuries resulting from activities connected with the airport. Such waiver shall apply only when such activities are conducted in conformance with rules and regulations of the airport and applicable Federal and State air regulations and no negligence on the part of the County or the airport is involved. The waiver shall be in a form prescribed by the Planning Director and shall be binding on the grantees, their heirs, assigns and successors in title.

(8) Area. Established by underlying, parent zone.

(9) **Surfaces Diagramed.** The surfaces described in LC 16.246(5) above are as illustrated in the diagram below:

AIRPORT OPERATIONS ZONE (AO-RCP)

RURAL COMPREHENSIVE PLAN

16.247 Airport Operatons Zone (AO-RCP).

(1) Purpose. The Airport Operations Zone (AO-RCP) is intended to recognize those areas devoted to or most suitable for the immediate operational facilities necessary for commercial and noncommercial aviation. It is also intended to provide areas for those activities directly supporting or dependent upon aircraft or air transportation when such activities, in order to function, require a location within or immediately adjacent to primary flight operations and passenger or cargo service facilities. In addition, the AO-RCP Zone is intended to provide areas for certain open space uses for airfield grounds maintenance and as a buffer to minimize potential dangers from, and conflicts with, the use of aircraft.

(2) Permitted Buildings and Uses. In the AO RCP Zone, the following types of buildings and uses are permitted as hereinafter specificlly provided for by this section, subject to the general provisions and exceptions set forth in this Chapter:

(a) Uses and buildings which are necessary for airport operation, including aircraft hangars, fuel storage facilities, control tower, passenger and air freight terminals, aircraft runways, taxi-ways and tie-down areas, etc.

(b) Retail sales and commercial services for air passengers or flight connected activities.

(c) Air cargo warehousing and distribution facilities.

(d) Aerial mapping and surveying.

(e) Aircraft or aircraft component manufacturing or assembly.

(f) Aircraft related research and testing.

(g) Aircraft sales, repair, service and storage.

(h) Schools relating to aircraft operations.

(i) Public parking and/or auto storage.

(j) Aircraft or air transportation business, or professional uses.

(k) Aviation clubs.

(1) Auto rental agencies.

(m) Hotels and motels.

(n) Restaurants.

(o) Taxi, bus and truck terminals.

(p) Environmental monitoring and enforcement agencies.

(q) General farming, including the growing of trees, vines, shrubs, berries, vegetables, nursery stock, hay grains, seed and similar food and fiber products.

(r) Pastures and grazing.

(s) Forest or open land preserves.

(t) Game and fish preserves.

(u) Accessory buildings normally required in connection with a use as specified in this subsection.

(v) Public and semipublic buildings, structures and uses essential to the physical and economic welfare of an area

(3) Uses Subject to Hearings Official Approval. Airport related uses not specified in LC 16.247(2) above are special uses, subject to submittal of an application pursuant to LC 14.050 and approval of the application by the Hearings Official pursuant to LC 14.300. An airport related use is defined as an activity or use of the land whose immediate presence on or proximity to an airport is necessary to proper airport function, to meet the needs of the use when a significant portion of its business or activity is derived from the airport, or when special transportation cost or time factors make operation from less immediate sites prohibitively expensive.

(4) Special Use Approval Criteria. Uses allowed in LC 16.247(3) above must comply with the following criteria:

(a) Conformity with the Rural Comprehensive Plan for Lane County.

(b) The location, size, design and operating characteristics of the proposed use:

(i) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity.

(ii) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverage and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(iii) Will not be adversely affected by-known natural hazards, such as floods, slides, erosion.

(iv) Will not create a hazardous natural condition such as erosion, landslide, flooding.

(5) Conformance Requirement. All structures and uses within the AO-RCP Zone shall conform to the requirements of Federal Aviation Agency Regulation FAR-77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105 or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

(6) Setback Requirements.

(a) Front Yard. Front yards shall not be less than 20 feet deep.

(b) Side Yard. Side yards shall be not less than five feet for residential use. Side yards shall not be required for nonresidential permitted uses, but if provided shall be not less than five feet.

(7) Vision Clearance. Vision clearance for corner lots shall be a minimum of 15 feet.

(8) Area.

(a) The minimum area for the division of land shall be five acres.

(b) Notwithstanding the provisions of LC 16.247(8)(a) above, the minimum area for a parcel or lot may be reduced when it is intended as a site for a commercial, industrial, public or semipublic use allowed within the zone if there is a finding that the location, design and arrangement of the proposed lot or parcel can be integrated in a logical manner with the location, design and arrangement of lots or parcels and uses, existing and potential, of (a) adjacent properties, and (b) the remainder of the contiguous ownership proposed for division.

(c) The following animal use area regulations shall apply on lots of less than five acres: Cows, horses, sheep or goats cannot be kept on lots having an area of less than one acre. The minimum area for such animals (other than their young under the age of six months) on less than five acres shall be as follows:

Horses	One per acre, plus one additional for every 15,000 square feet.
Cows	One per acre, plus one additional for every 10,000 square feet.
Goats or sheep	Five per acre, plus one additional for every 2,000 square feet.

The area of a property may be utilized one time only for the computation of the above allowable animal usage.

RESOURCE CAPABILITY DETERMINATION

RURAL COMPREHENSIVE PLAN

16.248 Resource Capability Determination.

(1) Purpose. Special uses in the Natural Estuary (/NE-RCP), Conservation Estuary (/CE-RCP) and Development Estuary (/DE-RCP) Zones are allowed only if determined to meet the resource capability and purpose of the management unit in which the use or activity occurs. The purpose of this section is to establish a procedure for making a Resource Capability Determination. Major activities or uses in the estuary may require an Estuarine Impact Assessment; those uses do not also require this Resource Capability Determination.

(2) Definition of Resource Capability. Resource capability is defined as the degree to which the natural resource can be physically, chemically or biologically altered, or otherwise assimilate an external use and still function to achieve the purpose of the zone in which it is located.

(3) Identification of Resources and Impacts. The applicant for a proposed use or activity in which a Resource Capability Determination must be made shall submit the following:

(a) Information on the resources present. The County shall assist the applicant in locating sources of information. Sources which can be used include Lane County Coastal Resources Inventory, Environmental Impact Statements for the Siuslaw River or other published information concerning the Siuslaw estuary, or more current resource information.

(b) Information on impacts to be expected if the proposed use or activity is carried out. This is not intended to be a full Impact Assessment as specified in LC 16.249, but presentation of the major effects on water circulation and flushing patterns, water quality significant adverse impacts which may occur and impacts on the aquatic and shoreland life forms.

(4) Resource Capability Determination. Information on resources present and impacts to be expected will be evaluated as part of the special use permit procedure, based on the requirement that the estuary can still function to achieve the purpose of the zone in which the activity will be located. Information developed by resource agencies and information submitted by the applicant may be used in the determination and will be used whenever possible to reduce duplication of effort between agencies.

(5) Resource Capability Findings. Based on analysis of resources and impacts, one of the following findings shall be concluded in approving or disapproving the use permit:

(a) The proposed use or activity does not represent a potential significant adverse impact or reduction of significant fish and wildlife habitats or essential

properties of the estuarine resource. It is consistent with the resource capabilities of the management unit and corresponding zone.

(b) The proposed use or activity presents a potential significant impact or reduction of significant fish and wildlife habitats or essential properties of the estuarine resource, but reasonable alternative or mitigating measures are proposed which will eliminate, or minimize to an acceptable level, adverse environmental impact or the mitigation requirement of ORS 541.626 have been met. It is consistent with the resource capabilities of the management unit and corresponding zone.

(c) The proposed use or activity will result in unacceptable loss, considering the purpose of the management unit in which the use is proposed. The use or activity represents irreversible changes and actions and unacceptable significant adverse impact or reduction of significant estuarine fish and wildlife habitat or essential properties of the estuary will result; or that the adverse consequences of the proposed use or activity would be likely to result in irreversible trends or changes in estuarine resource properties and functions. It is not consistent with the resource capabilities of the management unit and corresponding zone.

(6) Notification of Agencies.

(a) Any application that is subject to the provisions of this section shall, at a minimum, be referred to the following:

(i) U. S. Fish and Wildlife Service.
(ii) U. S. Environmental Protection Agency.
(iii) Oregon State Department of Fish and Wildlife.
(iv) Oregon State Department of Land Conservation and Development.
(v) Oregon State Division of State Lands.
(vi) National Marine Fishery Service.
(vii) Army Corps of Engineers.

(b) Agencies receiving referrals shall be afforded 15 calendar days from the date of mailing to review and comment on the proposed activity.

ESTUARINE IMPACT ASSESSMENT

RURAL COMPREHENSIVE PLAN

16.249 Estuarine Impact Assessment.

(1) Purpose. The purpose of this section is to provide a procedure for evaluation of uses or activities which are major in nature and which could potentially alter the integrity of the estuarine ecosystem. Activities which require an Impact Assessment do not also require a Resource Capability Determinatoin.

Uses which are permitted outright do not require an Impact Assessment. Uses requiring a Special Use Permit will require an Impact Assessment only when an Environmental Impact Statement (EIS) is required through the Corps of Engineers section 20/4-04 permit process.

(2) Information to be Presented in the Impact Assessment. Information contained in an Impact Assessment shall be used in the evaluation of a use or activity during a Special Use Permit or Conditional Use Permit procedure. As part of the permit review, information developed by resource agencies may be requested and used in the determination. Any possibilities of reducing duplication of effort by the city and other agencies will be utilized so long as the necessary information is adequately analyzed. Information contained in the Impact Assessment may be drawn from available data and analysis contained in the Lane County Coastal Resources Inventory, Environmental Impact Statements and Assessments for Projects in the Siuslaw estuary, other published studies pertaining to the Siuslaw River estuary, or more current information provided by applicant. The Impact Assessment should apply available information to the following general areas of analysis. The Planning Director may waive inapplicable items for any particular use of project.

(a) Aquatic life forms and habitat, including information on habitat type and use (e.g., rearing, spawning, feeding/resting, mitigation), species present, seasonal abundance, sediment type and characteristics and vegetation present. The type of alteration, including information detailing the extent of alteration (e.g., area measurement, depths to which alteration will extend, volumes of materials removed and/or placed as fill), impacted species (including threatened and endangered species), life states and life cycles affected with regard to timing of the proposed alteration, percent of total available habitat type subject to alteration.

(b) Shoreland life forms and habitat, including information on habitat type and use (e.g., feeding, resting or watering areas, flyways), species present, seasonal abundance, soil types and characteristics and vegetation present. Impacted species (including threatened and endangered species), life stages and life

cycles affected with regard to timing of the proposed alteration, percent of total available habitat type subjected to alteration.

(c) Water quality, including information on increases in sedimentation and turbidity, decreases in dissolved oxygen concentrarion, changes in biological and chemical oxygen demand, contaminated sediments, alteration of salinity regime, disruption of naturally occurring water temperatures, changes due to reduction, diversion or impoundment of water.

(d) Hydraulic characteristics, including information on changes in water circulation patterns, shoaling patterns, potential of erosion in or accretion in adjacent areas, changes in the floodplain, decreases in flushing capacity or decreases in rate of water flow from reduction, diversion or impoundment of water resources.

quality

(e) Air including information on quantities of emissions of particulates, expected inorganic and organic airborne pollutants.

(f) Impact of the proposed project on navigation and public access to the shoreline and aquatic areas.

(g) Demonstration of public need to warrant such a modification to the estuary.

(h) Demonstration that nonwater dependent uses will not preempt existing or future water dependent use of the area.

(i) Determination of the potential cumulative impact of the proposed development, including alteration of adjacent significant fish and wildlife habitat and essential properties of the estuary.

(j) Presentation of upland alternatives and methods to minimize preventable adverse impacts.

(k) Determination of need for mitigation.

(3) Impact Assessment Findings. Based on results of Impact Assessment analysis and the approval criteria contained in the applicable zone, one of the following findings shall be concluded in approving or disapproving the use permit:

(a) The proposed development does not represent a potential significant adverse impact or reduction of significant fish and wildlife habitats or essential properties of the estuarine resource.

(b) The proposed development presents a potential significant adverse impact or reduction of significant fish and wildlife habitats or essential properties of the estuarine resource, but no reasonable alternatives exist and mitigating measures are proposed which will eliminate or minimize to an acceptable level, adverse environmental impacts. If mitigation is requied under ORS 541.626, a mitigation plan shall have been approved by the Division of State Lands before this finding can be made.

(c) The proposed development will result in unacceptable loss. The proposed use or activity represents irreversible changes and actions. Unacceptable significant adverse impact or reduction of significant fish and wildlife habitat or reduction of essential properties of the estuary will result; or that the adverse consequences of the proposed activity would be likely to result in irreversible trends or changes in estuarine resource properties or functions.

(4) Notification of Agencies.

(a) Any application that is subject to the provisions of this section shall, at a minimum, be referred to the following:

(i) U. S. Fish and Wildlife Service.
(ii) U. S. Environmental Protection Agency.
(iii) Oregon State Department of Fish and Wildlife.
(iv) Oregon State Department of Land Conservation and Development.
(v) Oregon State Division of State Lands.
(vi) National Marine Fishery Service.
(vii) Army Corps of Engineers.

(b) Agencies receiving referrals shall be afforded 15 calendar days from the date of mailing to review and comment on the proposed activity.

PARKING SPACE, HEIGHT, AREA, GENERAL BUILDING AND GENERAL LOT AREA AND WIDTH SETBACK REQUIREMENTS RURAL COMPREHENSIVE PLAN

16.250 Parking Areas. Required garages and parking areas for residential and industrial development will be found under the zoning classification.

(1) **Residential Properties.** The regulations of this subsection are in addition to off street parking requirements of specific zones.

(a) When a single-family residence is located on a site inaccessible by automobile due to topographic conditions or excessive grades, a private garage or parking space shall not be required.

(b) Unless otherwise allowed by the zone, and exclusive of recreational vehicles, off street parking shall be limited to passenger cars, vans and pickups of not more than one ton manufacturer's capacity rating or comparable size. This size limitation does not apply to vehicles being used in conjunction with Rural Home Occupations.

(c) Commercial vehicles other than allowed by LC 16.250(b) above may be parked on residential properties only for reasonable periods of time for deliveries, structural repair and similar purposes.

(d) Recreational or utility vehicles, including, but not limited to, boats and boat trailers, campers and residential-type utility trailers, shall not be parked or stored on the property at any time in a location obstructing motorists' vision clearance of roadways.

(e) Unless otherwise allowed by the zone, off street parking areas shall not be used for the dismantling of any vehicle for the purpose of selling, trading or dealing in any manner with components thereof as a primary or secondary business.

(f) (i) Inoperable vehicles and parts thereof, junk or salvage materials may be visibly stored on the premises unless such storage interferes with the reasonable use and enjoyment of other lots within 300 feet of the lot use for storage. In that event, all automotive parts, junk, salvage material and all but one inoperable vehicle shall be stored in a location not visible from any adjacent road or from ground level of lots within 300 feet which are of similar elevation as the lot upon which the storage is taking place, or shall be screened to prevent such visibility. The allowable inoperable vehicle

may be stored within the structural setback area, but shall not be parked or stored at any time in a location obstructing motorists' vision clearance of roadways. Nothing in this subsection shall be construed as allowing storage within the front structural setback area except as otherwise allowed herein.

(ii) Names of residents filing complaints under provisions of LC 16.250(1)(f)(i) above shall be a matter of public record.

(g) Except as allowed by this Chapter, vehicles belonging to persons other than those residing on the lot shall not be stored or repaired for remuneration, traded, sold or offered for sale from the property. This includes vehicles left on consignment and vehicles owned temporarily primarily for resale. The sale of more than two vehicles per family member from one lot within a 12-month period shall be interpreted as "temporary ownership" unless the family member has owned said vehicles longer than 12 months.

(h) Storage of refrigerators, freezers or other airtight compartments containing more than one and one-half cubic feet shall not occur at any time until the doors have been removed or secured, latches removed or other precautions taken so the compartment can be easily opened from the inside. Any appliance stored in violation of this subsection may be removed by the County from the premises and stored elsewhere at the owner's expense, or other remedial action taken to secure immediate compliance.

(2) Nonresidential Private Parking.

(a) Automobile parking space allowing 300 square feet per automobile (parking, plus driving space) shall be provided and maintained for any new or enlarged building as listed below:

(i) Churches, auditoriums, theaters, stadiums, clubs and business schools or similar places of assembly, at least one permanently maintained parking space for every four seats provided in said building or structure; provided that 50 percent of the required number may be supplied by off street parking facilities for other kinds of commercial establishments or uses not normally open, used or operated during the principal operating hours of the place of assembly.

(ii) For hotels and apartment hotels, at least one permanently maintained parking space for each of the first 20 individual guest rooms, and one additional parking space for every three guest rooms in excess of 20.

(iii) Auto courts shall provide at least one parking space for each lodging unit.

(iv) For fraternity, sorority and student houses, at least one parking space for each lodging unit.

(v) For hospitals and welfare institutions, at least one permanently maintained parking space for each 300 square feet of floor area.

(vi) Clinics shall provide at least two parking spaces for each consultation and operating room.

(vii) For business or commercial buildings or structures, at least one permanently maintained parking space for every 300 square feet or fraction thereof of floor space within the building, exclusive of automobile parking space.

(viii) Mortuaries shall provide parking spaces for all people employed therein, plus at least one parking space for each 200 square feet of building floor area.

(b) Parking spaces shall be on the lot with the main building or structure, or located not more than 800 feet therefrom.

(3) Loading Space. In addition to the 10-foot setback requirement from the centerline of the alley, every hospital, hotel, institution, commercial or industrial building hereafter erected or established which abuts upon an alley or is surrounded on all sides by streets shall have one permanently maintained loading space for commercial vehicles of not less than 10 feet in width and 22 feet in length for each 4,000 square feet of lot area or fraction thereof upon which the building is located; provided that not more than two such loading spaces shall be required.

(4) Public Parking Areas. Land hereafter used for public parking areas shall be developed according to the following standards:

(a) Asphaltic, concrete or other approved type of surfacing.

(b) Bumper guards where needed.

(c) An ornamental fence, wall or hedge enclosing the parking area to a height not less than three feet nor more than six feet, but adhering to the vision clearance and front and side yard setbacks established for the zonerict in which it is located. Said fence, wall or hedge shall be maintained in good condition.

(d) When a parking lot adjoins property clasified in an "R" Zone, the setback for the parking lot shall conform to the requirements for the adjacent "R" Zone and the parking lot shall be six feet in height.

(5) Height.

(a) Height limits established for the various zones refer to the height of the building proper. Roof structures, such as housing for elevators, tanks, ventilating fans, towers, steeples, flagpoles, chimneys, smokestacks, wireless masts or similar structures, may exceed the height limit herein prescribed.

(b) On lots sloping downhill from the street, buildings may have an additional story; provided the ceiling of the lowest story is not more than two feet above the average curb level along the front of the lot.

(6) General Building Setback Requirements.

(a) Side Yard.

(i) No building or structure shall be hereafter erected or altered so that any portion thereof shall be nearer to the side lot line than the distance indicated under the Zone classification, except that eaves or cornices may extend over the required side yard for a distance of not more than two feet.

(ii) Fences, walls or hedges which tend to serve as a wall or yard enclosure may be maintained in a side yard, provided they do not exceed six feet in height.

(7) General Lot Area and Width Requirements.

(a) The site area requirements of Chapter 16 shall not apply to prohibit the erection of a single-family dwelling on a lot separately owned on or before January 8, 1969, or on any numbered lot in an approved and filed major or minor subdivision plat of record on or before January 8, 1969, except for the E-RCP, F-1, RCP and F-2, RCP Zones, where use of preexisting parcels is provided for in a different manner.

(b) The minimum area requirements of Chapter 16 shall not be construed to govern in situations where greater minimum area requirements are imposed or required by State law, State rules and regulations, the provisions of this Code, or other County rules and ordinances.

(c) Refer also to LC 13.050 to 13.105 Design and Development Standards for other lot area, width and depth requirements which may be applicable.

NONCONFORMING USES

RURAL COMPREHENSIVE PLAN

16.251 Nonconforming Uses. Except as is hereinafter provided in this Chapter, the lawful use of a building or structure or of any land or premises lawfully existing at the time of the effective date of this Chapter or at the time of a change in the official zoning maps may be continued although such use does not conform with the provisions of this Chapter.

(1) **Verification of Nonconforming Use.** The verification of a nonconforming use may be obtained subject to Director approval pursuant to LC 14.100. Verification of a nonconforming use is required prior to requesting approval to increase, restore, alter or repair a nonconforming use. When evaluating a request for verification, the following criteria shall apply:

(a) To be valid, a nonconforming use must have been lawfully established prior to the enactment of an ordinance restricting or prohibiting the use.

(b) The use must have been in actual existence prior to the enactment of an ordinance restricting or prohibiting the use or have proceeded so far toward completion that a right to complete and maintain the use is deemed to have vested in the landowner.

(c) The nonuse of a nonconforming use of a structure or property for a period in excess of one year will pronioit tne resumption or tne nonconrorming use.

The burden of proof for the verification of a nonconforming use is upon the applicant.

(2) **Change in Nonconforming Use.** A nonconforming use may be changed only insofar as it applies to the zone in which it is located. Once changed to a conforming use, no building or land shall be permitted to revert to a nonconforming use.

(3) Increase of Nonconforming Use. A nonconforming use shall not be increased, except that permission to extend the use to any portion of a building or lot which portion was arranged or designed for such nonconforming use at the time of the passage of this Chapter may be granted subject to Director approval pursuant to LC 14.100.

(4) Vested Right. Nothing contained in this Chapter shall require any change in the plans, construction, alteration or designated use of a structure on which construction has physically, lawfully and substantially commenced prior to the adoption of this Chapter, provided the structure, if nonconforming or intended for a nonconforming use, is completed and in use within two years from the time construction was commenced.

(5) **Discontinuance of Nonconforming Use.** When a nonconforming use of a structure or property is discontinued for a period in excess of one year, the structure or property shall not thereafter be used, except in conformance with the zone in which it is located.

(6) Unlawful Use Not a Nonconforming Use. No unlawful use of property existing at the time of passage of this Chapter shall be deemed a nonconforming use.

(7) Restoration of Nonconforming Building or Structure.

(a) A nonconforming building or structure which is damaged by fire, flood, wind, earthquake or other calamity or act of God or the public enemy, may be restored and the occupancy or use of such building or structure or part thereof, which existed at the time of such partial destruction may be resumed; provided that the restoration is commenced within a period of one year and is diligently prosecuted to completion and verification of the nonconforming use has been obtained.

(b) The restoration or reconstruction of a nonconforming building or structure may not increase the flood area or create a greater nonconformance than existed at the time of damage or destruction.

(8) Conveyance of Nonconforming Use. Nothing in this Chapter shall be construed to limit the sale, transfer, other conveyance of property on which exists a nonconforming building, structure or use, so long as such sale, transfer or other conveyance does not otherwise violate the provisions of this Chapter.

(9) Restoration of Conforming Use on Nonconforming Lot. Nothing in this Chapter shall be construed to prevent the reconstruction or replacement of a preexisting building or structure conforming as to use on a nonconforming lot, so long as such lot did not become nonconforming in violation of the provisions of this Chapter.

(10) Alterations or Repairs of a Nonconforming Use. Alterations or repairs of a nonconforming use may be permitted to continue the use in a reasonable manner subject to Director approval pursuant to LC 14.100 and consistent with the intent of ORS 215.130(5-8). Alteration of any such use shall be permitted when necessary to comply with any lawful requirement for alteration in the use.

(11) Criteria for Decision. When evaluating a proposal for increase, restoration, alteration or repair, the following criteria shall apply:

(a) The change in the use will be of no greater adverse impact to the neighborhood.

(b) The change in a structure or physical improvements will cause no greater adverse impact to the neighborhood.

(c) Other provisions of this Chapter, such as property development standards, are met.

(12) **Conditions of Approval.** In order to assure compatibility of the proposed development with the surrounding area, any of the following conditions may be imposed as conditions of approval:

(a) Special yards and spaces.
(b) Fences and walls.
(c) Special parking and/or loading provisions.
(d) Street dedication and improvements or bonds in lieu of improvements.
(e) Control of points of vehicular ingress and egress.
(f) Special provisions for signs.
(g) Landscaping and the maintenance of grounds.
(h) Control of noise, vibration, odors or other similar nuisances.
(i) Limitation of time for certain activities.
(j) A time period in which a proposed use shall be developed.
(k) A limit of total duration of use.

PROCEDURES FOR ZONING, REZONING AND AMENDMENTS TO REQUIREMENTS

RURAL COMPREHENSIVE PLAN

16.252 Procedures for Zoning, Rezoning and Amendments to Requirements.

(1) Purpose. As the Rural Comprehensive Plan for Lane County is implemented, changes in zone and other requirements of this Chapter will be required. Such Amendments shall be made in accordance with the procedures of this section.

(2) Criteria. Zonings, rezonings and changes in the requirements of this Chapter shall be enacted to achieve the general purpose of this Chapter and shall not be contrary to the public interest. In addition, zonings and rezonings shall be consistent with the specific purposes of the zone classification proposed, applicable Rural Comprehensive Plan elements and components, and Statewide Planning Goals for any portion of Lane County which has not been acknowledged for compliance with the Statewide Planning Goals by the Land Conservation and Development Commission. Any zoning or rezoning may be effected by Ordinance or Order of the Board of County Commissioners, the Planning Commission or the Hearings Official in accordance with the procedures in this section.

(3) I nitiation/Applicaton

(a) By Planning Commission. The zoning of unzoned properties, the rezoning of properties and amendment of this Chapter may be initiated by the Planning Commission upon its own motion or upon petition by the Planning Commission upon request of the Board as provided in LC 16.252(3)(b) below.

(b) By Board. The zoning of unzoned properties, the rezoning of properties and the amendment of this Chapter may be initiated by the Board in the form of a request to the Planning Commissions that they consider the proposed zoning, rezoning or amendment.

(c) By Applicant. Application for the zoning or rezoning of properties may be made by any persbn as provided in LC 14.050.

(4) Moratorium on Permits and Applications-Legislative Matters.

(a) After any matter for zoning, rezoning or amendment to this Chapter affecting particular property has received tentative action by the Board, but has not yet become final and effective, no Zoning, Land Division or Building Code Application or request shall be accepted, granted, issued or approved, except as herein provided.

(b) After such final action, granting of pending or subsequent Applications or requests shall be in

accordance with the requirements of the zoning classification or requirements as amended by the final action.

(c) The provisions of this subsection shall not be applicable to the issuance of Building, Plumbing Permits, or on-site sewage for normal repairs or corrections, nor shall the provisions apply when the proposed Application or request meets both the requirements of the existing zoning requirement and the proposed change or amendment, or to the approval of a final minor partition, a major partition map or subdivision plant.

(5) **Planning Commission Public Hearing and Notice -- Legislative Matters.**

(a) The Planning Commission shall hold not less than one public hearing on each proposed legislative zoning or rezoning and amendment to the requirements of this Chapter.

(b) Notice of the time and place of hearing shall be given at least 10 days in advance by publication in a newspaper of general circulation in the County or in the territory concerned.

(c) The Planning Commission shall review the Application or proposal and shall receive pertinent evidence and testimony as to why or how the proposed change is inconsistent with the criteria provided in LC 16.252(2) above for zoning, rezoning and amendment to the requirements of this Chapter. The Commission shall determine whether the testimony at the hearing supports a finding that the proposal does or does not meet the required criteria, and shall recommend to the Board accordingly that the proposal be adopted or rejected. The Planning Commission and Board may hold one concurrent hearing.

(6) **Review Procedures.** Applications for zoning or rezoning of specific properties shall be heard by the Hearings Official pursuant to LC 14.300.

(7) **Action by the Board.**

(a) Unless the Board and Planning Commission hold a concurrent hearing, upon receipt of an affirmative Planning Commissoin recommendation for legislative matters provided in LC 16.252(6) above, the Board shall schedule a public hearing as provided in LC 16.252(7)(b) below. The Board may schedule such a public hearing in the absence of an affirmative Planning Commission recommendation.

(b) Prior to taking any action which would alter or modify a Planning Commission recommendation or Hearings Official's Order, the Board may first refer the proposed alteration or modification to the Planning Commission or Hearings Official for a recommendation. Failure of the

Commission or Hearings Official to report within 20 days after the referral, or such longer period as may be designated by the Board, shall be deemed to be approval of the proposed alteration or modification. It shall not be necessary for the Commission or Hearings Official to hold a public hearing on the proposed alteration or modification.

(8) Conditional Approval. The approving authority may impose reasonable conditions if the application is approved to be completed within one year.

(9) Official Zoning Map.

(a) The location and boundaries of the various zones established by this Chapter shall be shown and delineated on maps covering portions of the County. These maps, upon their final adoption, shall be known as the Official Zoning Map.

(b) The Zoning Map shall be established by ordinance. Subsequent amendments, either for establishing zoning for previously unzoned property or for rezoning may be made by Ordinance or Order of the Hearing Authority in accordance with the provisions of this section. Upon final adoption, the Zoning Map and all subsequent amendments thereto shall be filed with the County Recorder.

(i) Boundaries indicated as approximately following the centerlines of streets, highways or alleys shall be construed to follow such centerlines.

(ii) Boundaries indicates as approximately following property lines shall be construed as following such property lines.

(iii) Boundaries indicated as approximately following the city limits shall be construed as following such city limits.

(iv) Boundaries indicated as following railroad lines and public utility shall be construed to be a midway between the main tracks or utility easements, whichever is applicable.

(v) Boundaries indicated as parallel to or extensions of features indicated in LC 16.252(9)(b)(i) through (iv) above shall be so construed.

(vi) Boundaries indicated as following shorelines shall be construed as following the ordinary low waterline, except where the body of water is specifically zoned Natural Estuary (/NE-RCP), Conservation Estuary (/CE-RCP) or Development Estuary (/DE, RCP) Zones in which case the boundary shall be construed as following the ordinary high waterline. In the event of a change of high or low

waterline, the boundary will follow that line no matter how it shifts.

(vii) Where zones are separated by a body of water, the boundary between the zones shall be construed as being the centerline of such body of water. No matter how such centerline may shift, the boundary shall remain the centerline as shifted.

(viii) Except as hereinafter noted, where a zoning boundary divides an ownership of property, unless the same is indicated by dimensions, map coordinates, or digitized boundary or similar notation, the boundary shall be determined by the use of the scale appearing on the Zoning Map. In case of the /SN-RCP; /PW-RCP; /NRC-RCP; /RD-RCP; /MD-RCP; /DMS-RCP and /BD-RCP Combining Zones, and the /NE-RCP; /CE-RCP and /DE-RCP Zones, the boundaries shall be determined through interpretation of the Coastal Resources Management Plan.

(ix) Where physical features existing on the ground are at variance with those shown on the Zoning Map, or in other circumstances not covered by LC 16.252(8)(b)(i) through (viii) above, the Planning Commission shall interpret the zone boundaries.

(10) Treatment of Vacated Property. Where a public street or alley is orricially vacatea, tne Lone requirements applicable to the property to which the vacated area becomes a part shall apply to the vacated property.

(11) Error in Legal Description. Notwithstanding any other provision in this Chapter, where the sole basis for a zoning or rezoning, whether initiated by Application, the Planning Commission or the Board, is in error in a legal description, if applicable in the Ordinance or Order zoning or intended to zone the property, the zoning or rezoning shall be referred to the Planning Director for investigation and a report. After such investigation and report, the zoning or rezoning shall be considered in accordnce with the procedures for hearings provided in LC 16.252(5) arid (6) above.

GREENWAY DEVELOPMENT PERMIT

RURAL COMPREHENSIVE PLAN

16.254 Greenway Development Permit

(1) Purpose. To establish Greenway Development procedures for certain land use activities as required by the State-wide Willamette River Greenway Goal and the Lane County Willamette River Greenway Plan.

(2) Definitions. For the purposes of this section, except as otherwise provided below, the definitions provided in LC 16.090 and the Goal adopted by the Oregon Land Conservation and Development Commission shall be used:

(a) Ordinary High Water. The high water level is defined as that high level of a river which is attained during mean annual flood. It does not include levels attained during exceptional or catastrophic floods. It is often identifiable by physical characteristics such as a clear natural line impressed on the bank, shelving, changes in character in the soil, destruction or absence of vegetation not adapted for life in saturated soils or the presence of flotsam and debris. In the absence of identifying physical characteristics, ordinary high water may be determined by Step backwater analysis upon a two-year frequency flood as determined by the U. S. Army Corps of Engineers.

(b) Ordinary Low Water. The low watermark of a river is that point to which the waters normally recede when the volume of water is at its low level, not determined by the extraordinary year, and further means the line to which the Willamette River ordinarily recedes annually in season even though the elevation of that line may be higher as a result of the Corps of Engineers' flood control structures than would otherwise be the case without such structures. Submersible lands are also considered that land or bank area between the ordinary low and high waterline.

(c) Water Dependent Use. A use or activity which can be carried out only on, in or adjacent to water areas because the use requires access to the water body for waterborne transportation, recreation, energy production or source of water.

(d) Water Related Use. Uses which are not directly dependent upon access to a water body, but which provide goods or services that are directly associated with water dependent land or waterway use, and which, if not located adjacent to water, would result in public loss of, quality in the goods or services offered. Except as necessary for water dependent or water related uses or facilities, residences, parking lots, spoil or dump sites, roads and

highways, restaurants, businesses, factories and trailer parks are not generally considered dependent on or related to water location needs.

(e) Greenway Development Permit; Permit. A permit authorized pursuant to this section or pursuant to a permit authorized in accordance with the provisions of prior Greenway Permit Ordinance Nos. 4-76 and 11-76.

(f) Change of Use. Making a different use of the land or water than that which existed on December 5, 1975. It includes a change which requires construction, alterations of the land, water or other areas outside of existing buildings or structures and which substantially alters or affects the land or water. It does not include a change of use of a building or other structure which does not substantially alter or affect the land or water upon which it is situated. Change of use shall not include the completion of a structure for which a valid permit has been issued as of December 5, 1975. The sale of property is not in itself considered to be a change of use. An existing open storage area shall be considered to be the same as a building. Landscaping, construction of driveways, modifications of existing structures or the construction or placement of such subsidiary structures or facilities as are usual and necessary to the use and enjoyment of existing improvements shall not be considered a change of use for the purposes of this section.

(g) Intensificaton. Any additions which increase or expand the area or amount of an existing use or the level of activity. Remodeling of the exterior of a structure is an intensification when it will substantially alter the appearance of the structure. Intensification shall not include the completion of a structure for which a valid permit was issued as of December 5, 1975.

(h) Develop. To construct or alter a structure, to conduct a mining operation, to make a physical change in the use or appearance of land, to divide land into parcels or to create or terminate rights of access.

(i) Development. To act, process or result of developing.

(j) Boundaries. The boundaries for the Willamette River Greenway are those adopted by the Land Conservation and Development Commission in 1977, together with any changes when and as approved by LCDC.

(3) Uses and Activities Subject to Greenway Development Permits. Greenway Development Permits shall be required for new intensifications, change of use or developments allowed in applicable zones , including public improvements and including partitions and subdivisions as defined in LC 13.020, which are

proposed for lands within the boundaries of the Willamette River Greenway adopted and as revised from time to time by the Oregon Land Conservation and Development Commission, except as provided below:

(a) Where the location is within areas designated as "urban" on Greenway maps adopted by the Oregon Land Conservtion and Development Commission and is beyond 150 feet of the ordinary low waterline.

(b) Customary dredging and channel maintenance conducted under permit from the State of Oregon.

(c) Seasonal increases in gravel operations as provided under permit from the State of Oregon.

(d) The placing by a public agency of signs, markers, aids, etc. to serve the public.

(e) Activities to protect, conserve, enhance and maintain public lands, except that a substantial increase in the level of development of existing public recreational, scenic, historical or natural uses on public lands shall require review as provided by this section.

(f) Erosion control operations required in emergency situations for the safety and protection of property.

(g) Construction or use of a building other than a dwelling whether or not within 150 feet of the ordinary low waterline when the building is customarily provided in conjunction with a farm use; provided the structure does not exceed 12 feet in height nor exists for longer than six months.

(h) Farm use.

(i) Reasonable emergency procedures necessary for the safety or protection of property.

(j) Maintenance and repair usual and necessary for the continuance of an existing use. Landscaping, construction of driveways, modification of existing structures or facilities adjacent to a residence as are usual and necessary to such use and enjoyment.

(k) The propagation of timber or the cutting of timber which is done for public safety or personal noncommercial use or where the harvest is consistent with an approved permit under the Forest Practices Act:

(i) For a farm woodlot of less than 20 acres, or

(ii) Consistent with recommendations made by Oregon Department of Transportation to Oregon Department of Forestry which are designed to address criteria set forth in Statewide Goal 15, sections ch

(1) Irrigation pumps and water intakes and other utility lines in conjunction with an agricultural use.

(m) Uses which are pursuant to one of the following Lane County Land Development actions when such action has been approved or adopted consistent with the Greenway Development Permit approval requirements of 16.254(4) below and notification requirements of LC 16.254(7) below.

Planned Unit Developments, as provided in 10.700.

(ii) Unzoned Area Development Permits, as provided in LC 9.700.

(4) **Greenway Development Permit Approval.** A decision to approve a Greenway Development Permit shall require findings that the proposed intensification, change of use or development conforms to the following criteria, guidelines and setback requirements:

(a) Criteria.

(i) The development protects or enhances the existing vegetative fringe between the activity and the river. Where such protective action is shown to be impractical under the circumstances, the maximum landscaped area or open space shall be provided between the activity and the river and the development provides for the reestablishment of vegetative cover where it will be significantly removed during the process of land development.

(ii) Public access to and along the river either is not necessary or the necessary access will be provided by appropriate legal means.

(iii) A development which is mining or a mineral extraction and/or processing operation must include mining or extraction and/or processing methods which reduce or mitigate adverse impacts to the natural and cultural attributes of the Greenway.

(b) Guidelines. Affirmative findings of compatibility with the Willamette River Greenway based upon due consideration and the relative importance of the following applicable guidelines:

(i) Preservation and maintenance of land designated "agriculture" in the adopted Willamette River Greenway Plan for farm use and minimize interference with the long-term capacity of lands for farm use.

(ii) Protection, conservation or preservation of significant scenic areas, viewpoints and vistas.

(iii) Protection, preservation, rehabilitation, reconstruction or restoration of significant historic and archeological resources.

(iv) Preserve areas of annual flooding, floodplains and wetlands.

(v) Protection, conservation or preservation of areas along the alluvial bottomlands and lands with severe soil limitations from intensive development.

(vi) Consideration of the impacts from consumptive uses of water (i.e., domestic, agriculture, industrial) and nonconsumptive uses (i.e., recreation and natural resources) in efforts of maintaining sufficient flows to support water users.

(vii) Sustenance and enhancement of water quality by managing or controlling sources of water pollution from uses, such as domestic and industrial wastes, agricultural and timber runoff, septic tank seepage, gravel operations and other intermittent sources.

(viii) Maintenance and sustenance of natural riparian vegetation found upon the lower alluvial bottomlands and upper terraces bordering the river for the following reasons: provide habitat, food and shade for wildlife; protect natural areas; anchor river bank soils and protect agricultural land from seasonal erosion; ensure scenic quality and screening of uses from the river; control trespass; and to control pollution sources to the river.

(ix) Harvesting of timber in a manner that wildlife habitat, riparian and other significant vegetation and the natural scenic qualities of the Greenway will be preserved, conserved or restored and otherwise result in only the partial harvest of timber beyond the vegetative fringe.

(x) Minimize vandalism and trespass.

(xi) Location of nonwater dependent and nonwater related development away from the river.

(xii) Protection from erosion.

(xiii) Compatibility with the site and surrounding area.

(xiv) Protection of significant fish, wildlife habitat and natural areas.

(xv) Protection and conservation of lands designated aggregate resources within the adopted Willamette Greenway Plan.

(c) Setback Requirement; Exceptions. New iutensifications, developments and changes of use shall be set back 100 feet from ordinary high waterline of the river, except for those in conjunction with a water related or water dependent use. Exceptions to this requirement shall be allowed when affirmative findings are made to satisfy the following criteria:

(i) The proposal would provide better protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway than would occur by observance of the setback requirement; or

(ii) The protection, maintenance, preservation and enhancement of the natural, scenic, historic and recreational qualities of the Willamette River Greenway are not applicable to the proposal.

(5) Conditions. Reasonable conditions may be imposed in connection with a Greenway Development Permit as necessary to meet the purposes of this section. Guarantees and evidence may be required that such conditions will be or are being complied with. Such conditions may include, but are not limited to, requiring:

(a) Special yards and spaces.

(b) Fences and walls.

(c) Special off street parking and loading requirements.

(d) Street and road dedications and improvements (or bonds).

(e) Control of points of vehicular ingress and egress.

(f) Special provisions on signs.

(g) Landscaping and maintenance thereof.

(h) Maintenance of grounds.

(i) Control of noise vibration, odors or other similar nuisances.

(j) A time period within which the proposed use shall be developed.

(k) A limit on total duration of use.

(1) Control of scale, bulk and coverage proposal.

(6) Application and Review Procedure. Application for a Greenway Development Permit shall be made as provided by LC 14.040 and reviewed by the Hearings Official as provided by LC 14.300.,

(7) Additional Notice. Immediate notice of an application shall be given the State Department of Transportation by certified mail, return receipt requested, and provision shall be made to provide notice to any individual or group requesting notice in writing.

(8) Conflicting Provisions. In the case of any conflict between the provisions of this section and other provisions in Lane Code, the more restrictive provisions shall apply.

(9) Nonauthority for Public Use of Private Property. Nothing in this section is intended to authorize public use of private property. Public use of private property is a trespass unless appropriate easements and access have been acquired in accordance with law to authorize such use.

IN THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY, OREGON

ORDINANCE NO. 11-84

IN THE MATTER OF REVISING CHAPTER 16 THE RURAL DEVELOPMENT CODE OF LANE COUNTY TO:

1. MAKE CERTAIN HOUSEKEEPING REVISIONS TO THE HEARINGS OFFICIAL SPECIAL USE APPROVAL CRITERIA OF THE EXCLUSIVE FARM USE (E) ZONE TO ADOPT THE GREENWAY DEVELOPMENT PERMIT APPROVAL CRITERIA FOR AGGREGATE EXTRACTION, AND NOT TO APPLY ANY OTHER CRITERIA FOR AGGREGATE EXTRACTION, FOR LANDS ZONED E AND IN THE GREENWAY.
2. MAKE NUMEROUS REVISIONS TO THE DEVELOPMENT CODE TO BRING IT INTO COMPLIANCE WITH THE REQUIREMENTS OF THE DLCD STAFF REPORT DATED JULY 26, 1984. THESE REVISIONS INCLUDE:
   A. ADDING A SUBSECTION TO LC 16.005 TO PROVIDE STANDARDS, PROCEDURES AND CRITERIA FOR THE PROTECTION OF AREAS DESIGNATED BY THE RURAL COMPREHENSIVE PLAN AS SENSITIVE BIRD HABITAT.
   B. ADDING THE DEFINITION OF "HISTORIC STRUCTURE OR SITE."
   C. REVISING THE DEFINITION OF "WETLAND" IN ORDER TO BE CONSISTENT WITH THE STATEWIDE PLANNING GOAL DEFINITION OF THAT TERM.
   D. REVISING THE SITING REQUIREMENTS IN THE IMPACTED FOREST, F-2 ZONE TO PROVIDE FOR CLUSTERING OF RESIDENCES ON EXISTING TRACTS.
   E. REVISING THE PROPERTY DEVELOPMENT STANDARDS OF THE EXCLUSIVE FARM USE, E, ZONE TO ADD REQUIREMENTS FOR CLUSTERING OF RESIDENCES ON EXISTING TRACTS.
   F. ADDING RIPARIAN SETBACK AND MAINTENANCE STANDARDS TO THE NATURAL RESOURCE, NR, ZONE.
   G. REVISING THE GREENWAY DELOPMENT PERMITS TO:

i. ELIMINATE ALL THE LANGUAGE FOLLOWING THE PHRASE "OR PERSONAL NONCOMMERCIAL USE" IN LC 16.254(3) (k).

ii. ENSURE THAT ONLY WATER-DEPENDENT AND WATER-RELATED USES ARE EXEMPT FROM THE 100-FOOT GREENWAY SETBACK REQUIREMENT.

iii. PROVIDE NOTICE OF DEPARTMENT ACTIONS FOR A GREENWAY DEVELOPMENT PERMIT TO ODOT.

iv. REQUIRE A GREENWAY DEVELOPMENT PERMIT FOR DEVELOPMENT IN DESIGNATED "URBAN" AREAS.

OR IN THE ALTERNATIVE OF "G" ABOVE

H. ADOPT A NEW GREENWAY PERMIT SECTION

3. ADOPT A SAVINGS AND SEVERABILITY CLAUSE.

WHEREAS, on March 1, 1983, Lane County submitted its Rural Comprehensive Plan to the Land Conservation and Development Commission for acknowledgment, and

WHEREAS, since submitted, objections to the plan have been received, and the Department of Land Conservation and Development Commission staff have reviewed the plan, and

WHEREAS. Lane County has now received DLCD's staff reports and is now in a position to revise the Development Code to bring it to an acknowledgeable standard, now, therefore

THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY ORDAINS AS FOLLOWS:

Chapter 16 of Lane Code is hereby amended by removing and substituting the following pages:

REMOVE THESE PAGES	INSERT THESE PAGES
16-3 to 16-4 (a total of two pages)	16-3 to 16-4b (a total of four pages)
-------	16-16a (a total of one new page)
16-24	16-24 to 16-24a

(a total of one page)	(a total of two pages)
16-44 (a total of one page)	16-44 to 16-44a (a total of two pages)
16-56 (a total of one page)	16-56 to 16-56a (a total of two pages)
16-58 to 16-60 (a total of three pages)	16-58 to 16-60 (a total of three pages)
16-62 (a total of one page)	16-62 to 16-62b (a total of three pages)
16-241 to 16-245 (a total of five pages) or in the alternative 16-239 to 16-245 (a total of seven pages)	16-241 to 16-244 (a total of four pages) 16.239 to 16.245 (a total of seven pages)

Said pages are attached hereto and incorporated herein by reference. The purpose of these substitutions is to:

1. Make certain housekeeping revisions to the Hearings Official Special Use Approval Criteria of the Exclusive Farm Use (E) Zone to adopt the Greenway Development Permit Approval Criteria for aggregate extraction, and to not apply any other criteria for aggregate extraction, for lands zoned E and in the Greenway.

2. Make numerous revisions to the Development Code to bring it into compliance with the requirements of the DLCD staff reportdated July 26, 1984. These revisions include:

   A. Adding a subsection to LC 16.005 to provide standards, procedures and criteria for the protection of areas designated by the Rural Comprehensive Plan as sensitive bird habitat.

   B. Adding the definition of "Historic Structure or Site".

   C. Revising the definition of "wetland" in order to be consistent with the Statewide Planning Goal definition of that term.

   D. Revising the siting requirements in the Impacted Forest, F-2, Zone to provide for clustering of residences on existing tracts.

   E. Revising the property development standards of the Exclusive Farm Use, E, Zone to add requirements for clustering of residences on existing tracts.

F. Adding riparian setback and maintenance standards to the Natural Resource, NR, Zone.

G. Revising the Greenway Development Permit requirements to:

i. Eliminate all the language following the phrase "or personal noncommercial use" in LC 16.254(2)(k).

ii. Ensure that only water-dependent and water-related uses are exempt from the 100-foot Greenway setback requirement.

iii. Provide notice of Department actions for a Greenway Development Permit to ODOT.

iv. Require a Greenway Development Permit for development in designated "urban" areas.

OR IN THE ALTERNATIVE

H. Adopt a new Greenway Permit section.

If any section, subsection, sentence, clause, phrase of portion of this Ordinance is for any reason held invalid or unconstitutional by any court of competent jurisdiction, such portion shall be deemed a separate, distinct and independent provision and such holding shall not affect the validity of the remaining portions thereof.

The application of Chapter 16 to rural Lane County repealed by this Ordinance shall remain in force to authorize prosecution of persons in violation thereof prior to the effective date of this Ordinance.

While not part of this Ordinance, we adopt the attached Exhibit "A" as findings in support of this decision.

Enacted this 12th day of Sept., 1984.

Chair, Lane County Board of Commissioners

Debbie E. Mohr
Recording Secretary for this Meeting of the Board

(3) Conditions. The following conditions may be imposed at the time of approval of a development for which a permit or application is required and for which a finding has been made as required in LC 16.005(2) above in order to ensure site and area stability:

(a) Maintain vegetation and eliminate widespread destruction of vegetation.

(b) Carefully design new roads and buildings with respect to:

(i) Placement of roads and structures on the surface topography.

(ii) Surface drainage on and aroung the site.

(iii) Drainage from buildings and road surfaces.

(iv) Placement of septic tank disposal fields.

(c) Careful construction of roads and buildings:

(i) Avoid cutting toeslopes of slump blocks.

(ii) Careful grading around the site, especially avoiding oversteepened cut banks.

(iii) Revegetating disturbed areas as soon as possible.

(d) Certification by a geologist or engineer that the above conditions have been complied with and/or that a hazard does not exist.

(4) Sensitive Bird Habitat Protection Standards and Criteria. All uses or activities permitted or conditionally permitted within the zones identified in LC 16.005(4)(a) below shall be subject to the additional procedures and requirements in LC 16.005(4)(b)-(g) below, provided such uses are located on property identified as a sensitive bird habitat area via Rural Comprehensive Plan Flora and Fauna Policy 18 and LM 11.400.

(a) Applicable Zones.

Zone Classification	Abbreviation	Section No.
Nonimpacted Forest Lands	F-1, RCP	16.210
Impacted Forest Lands	F-2, RCP	16.211
Exclusive Farm Use	E-RCP	16.212
Natural Resource	NR-RCP	16.213
Marginal Lands	ML-RCP	16.214
Park and Recreation	PR-RCP	16.215
Sand, Gravel and Rock Products	SG-RCP	16.217
Sand, Gravel and Rock Products Combining Processing	SG-CP-RCP	16.218
Public Facility	PF-RCP	16.219
Limited Commercial	C-1, RCP	16.220
Neighborhood Commercial	C-2, RCP	16.221
Commercial	C-3, RCP	16.222
Rural Commercial	C-R, RCP	16.223
Limited Industrial	M-1, RCP	16.224

Light Industrial	M-2, RCP	16.225
Heavy Industrial	M-3, RCP	16.226
Suburban Residential	RA-RCP	16.229
Garden Apartment Residential	RG-RCP	16.230
Rural Residential	RR-RCP	16.231
Destination Resort	DR-RCP	16.232

(b) Development Plan Submittal. The person proposing the development shall submit plans to the Department which sufficiently identify the location, nature and scope of the proposed use or activity.

(c) Referral. Upon receipt of the plans identified in LC 16.005(4)(b) above, the Department shall refer a copy of the plans to the Oregon Department of Fish and Wildlife (ODFW).

(d) ODFW Review. Upon receipt of the plans identified in LC 16.005(4)(b) above, the ODFW shall review the proposed use of activity and make a determination of whether or not the use or activity would affect a sensitive bird habitat. In making this review and determination, the ODFW shall consult with the affected landowner(s) and appropriate state agencies, and shall address the standards in LC 16.005(4)(d)(i) and (ii) below. The basis for the determination shall be stated in writing, completed within seven working days of receipt, and then submitted to the Department (Lane County).

(i) A sensitive bird habitat will be considered affected by a use or activity if the use or activity is located within 660 feet of an eagle or osprey site or within 300 feet of a heron rookery or pigeon mineral spring.

(ii) A sensitive bird habitat may also be considered affected by a use or activity if the use or activity is located a greater distance than specified in LC 16.005(4)(d)(i) above, considering unique conditions of topograph or the individual habits of the bird(s).

(e) No Affects Determined. If the ODFW determines that the sensitive habitat area will not be affected, then the ODFW will give the Department written notice of its determination, and Lane County may proceed with authorization of the use or activity, or with the processing of any other required applications.

(f) Affects Determined and Protection Plan. If the ODFW determines that the sensitive habitat area will be affected, the ODFW shall work with the affected landowner(s) in the development of a site specific habitat protection plan. The plan shall consider the proposed use or activity and its interrelationship to and

affects upon nesting trees, perch trees, critical nesting period roosting sites and/or buffers for wind, vision and noise. The plan must contain a statement of reasons, supported by facts, explaining why the sensitive bird habitat would not be adversely affected by the proposed use or activity. The plan shall then be submitted to the Department.

(g) Director Approval. The proposed uses or activities identified in the habitat protection plan shall be reviewed by the Director pursuant to LC 14.100 and shall be allowed if in conformance with the following approval criteria:

(i) The proposed use or activity would not adversely impact a sensitive wildlife habitat.

(ii) Conditions placed upon the approval of the habitat protection plan would avoid or eliminate any adverse impacts upon a sensitive wildlife habitat. Conditions may include setbacks, limitations upon the time period for the operation of the use or activity and/or prohibition of conflicting uses.

(h) LC 16.005(4)(a)-(g) do not apply to the protection of sensitive bird habitat from forest practices as regulated by the Forest Practices Act and as regulated by the COOPERATIVE AGREEMENT BETWEEN OREGON STATE BOARD OF FORESTRY AND OREGON STATE FISH AND WILDLIFE COMMISSION as adopted by Lane County in Rural Comprehensive Plan Goal 5 Flora and Fauna Policy 17.

16.006 Compliance Required.

(1) No person shall engage in, or cause to occur, a development which does not comply with the Lane County Land Use and Development Chapter.

(2) A development shall be approved by the Director, or other Approving Authority, according to the provisions of this Chapter.

(3) Unless appealed, a decision on any application shall be final upon expiration of the period provided for filing an appeal or, if appealed, upon rendering of the decision by the reviewing body.

16.007 Compliance With Rural Comprehensive Plan. In the event of any conflict between any provision of this Chapter and provisions of the Rural Comprehensive Plan of Lane County, or duly adopted portions, elements or amendments of such Plan, the more restrictive provisions shall prevail.

16.008 Interpretation. When in the administration of this Chapter there is doubt regarding the intent of the Chap-

ter or the suitability of uses not specified, the Director shall request an interpretation of the provision by the Board of County Commissioners. The Board shall issue an interpretation to resolve the doubt, but such interpretation shall not have the effect of amending the provisions of this Chapter. Any interpretation of the Chapter shall be deemed an administrative action and shall be based on the following considerations:

(1) The Lane County Comprehensive Plan.

(2) The purpose and intent of the Chapter as applied to the particular section in question.

(3) The opinion of the County Counsel.

Copies of such interpretations shall be indexed and kept on file in the Department and may be reviewed by the public upon request.

16.009 Restrictiveness. Where the conditions imposed by a provision of this Chapter overlap, the provisions which are more restrictive shall govern.

16.010 Severability. If any section, paragraph, subsection, clause, sentence or provision of this Chapter shall be adjudged by any court of competent jurisdiction to be unconstitutional or invalid, such judgment shall not affect, impair, invalidate or nullify the remainder of this Chapter, and the effect thereof shall be confined to the section, paragraph, subsection, clause, sentence or provision immediately involved in the controversy in which such judgment or decree shall be rendered, it being the intent of the governing body to enact the remainder of this Chapter notwithstanding the parts so declared unconstitutional or invalid. Further, should any section, paragraph, subsection, clause, sentence or provision of this Chapter be judicially declared unreasonable or inapplicable to a particular premises or to a particular use at any particular location, such declaration or judgment shall not affect, impair, invalidate or nullify such section, paragraph, subsection, clause, sentence or provision as to any other premises or use.

16.011 Introductory Provisions. In order to achieve the purposes outlined in LC 16.003, and to assure that the development and use of land in Lane County conforms to the Rural Comprehensive Plan, zone classifications have been established for all unincorporated areas outside of adopted urban growth boundaries and within Lane County. These zones specify regulations for the use of land and property development standards, and use applied by boundaries indicated on the Lane County Rural Comprehensive Plan Zoning Maps.

Historic Structure or Site. Property which had been identified by Lane County in its adopted Rural Comprehensive Plan findings as:

(1) Historically significant.

(2) In need of protection in order to preserve its historical significance, and for which the means of protection shall be the application of the Historic Structures or Sites Combining (/H-RCP) Zone.

The above sites are also identified separately in LM 11.300.

a structure listed on the National Register of Historic Places or a State Inventory of Historic Places.

Tract. A lot, parcel or unsubdivided or unpartitioned land under the same ownership. Contiguous units of unsubdivided or partitioned land under the same ownership shall be considered a single tract.

Urban. Those places which must have an incorporated city. Such areas may include lands adjacent to and outside the incorporated city and may also: (a) have concentrations of persons who generally reside and work in the area, and (b) have supporting public facilities and services.

Urbanizable. Those lands within an urban growth boundary and which are identified and (a) determined to be necessary and suitable for future urban use areas, and (b) can be served by urban services and facilities, and (c) are needed for the expansion of an urban area.

Use. The purpose for which land, submerged or submersible lands, the water surface or a building is arranged, designed or intended, or for which either land or building is or may be occupied or maintained.

Veterinary Clinic. Synonymous with the definition of "animal hospital".

Water Dependent Use. A use or activity which can be carried out only on, in or adjacent to water areas because the use requires access to the water body for waterborne transportation, recreation, energy production or source of water.

Water Related Use. Uses which are not directly dependent upon access to a water body, but which provide goods or services that are directly associated with water dependent land or waterway use, and which, if not located adjacent to water, would result in public loss of quality in the goods or services offered. Except as necessary for water dependent or water related uses or facilities, residences, parking lots, spoil or dump sites, roads and highways, restaurants, businesses, factories and trailer parks are not generally considered dependent on or related to water location needs.

Wetlands. Land areas where excess water is the dominant factor determining the nature of soil development and the types of plant and animal communities living at the soil surface. Wetland soils retain sufficient moisture to support aquatic or semiaquatic plant life. In marine and estuarine areas, wetlands are bounded at the lower extreme by extreme low water; in freshwater areas, by a depth of six feet. The areas below wetlands are submerged lands.

Width. The horizontal distance between the side boundary lines measured in the mean direction of the front and rear boundary lines.

Yard. An open space on the same lot with a building unoccupied and obstructed from the ground upward, except as otherwise provided herein.

Yard, Front. A yard between the front line of the building (exclusive of steps) and the front property line.

Yard, Rear. An open, unoccupied space on the same lot with a building, between the rear line of the building (exclusive of steps, porches and accessory buildings) and the rear line of the lot.

Yard, Side. An open, unoccupied space on the same lot with a building, between the sidewall line of the building and the side line of the lot.

(8) Siting and Fire/Safety Standards for Dwellings. All dwellings and mobile homes conditionally permitted above:

(a) The Approval Authority shall balance the setback standards of LC.211(8)(a) with the siting requirements and application approval criteria specified elsewhere in LC 16.211 in order to minimize adverse impacts upon forest uses and to assure optimal siting of proposed residences consistent with the purposes of the F-2 zone.

(i) Residences to be sited upon tracts located within a big game range as designated by the Department of Fish and Wildlife shall be sited as follows:

(aa) Near residences on other tracts.

(bb) With minimal intrusion into forest areas undeveloped by nonforest uses.

(cc) Where possible, when considering LC 16.211(8)(a)(i)(aa) and (bb) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU.

(ii) Residences to be sited upon all other tracts shall be sited as follows:

(aa) Where possible, in consideration of the dimensions and topography of the tract, at least 500 feet from adjoining lines of property zoned F-1 and 100 feet from adjoining lines of property zoned F-2 or EFU.

(bb) On the least valuable farm or forest areas of the tract or located near residences on other tracts.

(b) Shall maintain a fuel break of 50 feet around the residence. Fuel breaks shall be free of hazardous fuels in the form of native vegetation. Irrigation or fire resistent vegetation shall be planted within the fuel break to prevent undue soil erosion. Fuel breaks shall be continually maintained and may contain individual tree specimens, however plant material shall not provide a means of readily spreading fire. Fuel breaks shall comply with the riparian vegetation protection standards of LC 16.211(9)(b) and (c) below.

(c) Shall provide an adequate fire suppression system. Unless otherwise authorized by the local fire official, the minimum acceptable system shall include the following:

(i) A water supply such as a pond, stream, tank, well, sump or any combination thereof, together with a delivery system capable of sustaining a volume of 20 gallons per minute for not less than 20 minutes.

(ii) Sufficient water outlets, together with serviceable hose not less than three-quarter inch inside diameter and a nozzle to reach the dwelling and nearby improvements.

(iii) The water supply, pump, hose and nozzle shall be maintained as a connected, operating unit ready for immediate use during period of fire danger.

(d) Shall have a spark arrestor on any chimneys and a fire retardant roof.

(j) A dwelling or mobile home not provided in conjunction with farm use provided:

(i) The dwelling or mobile home is situated upon a legal lot with soils predominantly in capability classes IV through VIII as determined by the Agricultural Capability Classification System in use by the United States Department of Agriculture Soil Conservation Service on Oct. 12, 1983.

(ii) The dwelling or mobile home, or the activities associated with the dwelling or mobile home, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use

(iii) The dwelling or mobile home is situated upon generally unsuitable land for the production of farm crops and livestock, considering the terrain, adverse soil or land conditions, drainage and flooding, location and size of the tract. A lot or parcel shall not be considered unsuitable solely because of its size or location if it can reasonably be put to farm use in conjunction with other land.

(iv) The approval of a dwelling or mobile home shall comply with the provisions of ORS 215.236, 1983 Replacement Part, regarding establishment of the nonfarm residence; procedures; disqualification for farm use valuation; and additional tax or penalty.

(k) A transmission tower over 200 feet in height.

(5) Hearings Official Special Use Approval Criteria.

(a) Compatibility of the use or activities associated with the use with the Agricultural Lands Policies of the Rural Comprehensive Plan Policies, ORS 215.243 and the purpose of this zone.

(b) The use, or activities associated with the use, will not force a significant change in or significantly increase the cost of accepted farming practices on nearby lands devoted to farm use.

(c) The use, or activities associated with the use, complies with other conditions considered necessary by the Approval Authority in order to meet the applicable approval criteria.

(d) The above criteria shall not be applicable to uses identified under LC 16.212(4)(b) above if such uses are also subject to review under Willamette Greenway requirement LC 16.254(3).

(6) Farm Operations.

(a) A farm operation is all agricultural activities occurring under a single management. For purposes of this section, it is immaterial whether the activities occur on a single parcel of land, on contiguous parcels of

land or on separate parcels of land. It is also immaterial if the operator has less than fee interest in the land on which the agricultural activity occurs.

dwelling has been approved pursuant to the above LC 16.212(4)(j) above and if the division would not conflict with the purpose of this zone.

(e) Divisions pursuant to LC 16.212(7)(a),(b),(c) or (d) above are subject to the applicable application procedures of LC Chapter 13 and the applicable review procedures of LC Chapter 14. Divisions under LC 16.212(7)(a) and (b) above shall also require that a statement be placed on the face of the map for the partition disclosing that a dwelling or mobile home is not guaranteed unless the provisions of this zone for obtaining a dwelling or mobile home are met.

(f) A person who sells or otherwise transfers real property zoned Exclusive Farm Use (E) may retain a life estate in a dwelling or mobile home on that property and the tract of land under and around the dwelling or mobile home. Partition approval is not required for the creation of such a life estate.

(8) Property Development Standards. All uses or activities permitted or conditionally permitted above, except farm use, shall be subject to the following development standards:

(a) The Approval Authority shall balance the setback standards of LC 16.212(8)(a) with the siting requirements and application approval criteria specified elsewhere in LC 16.212 in order to minimize adverse impacts upon forest uses and to assure optimal siting of proposed residences consistent with the purposes of the E zone.

(i) Residences to be sited upon tracts located within a big game range as designated by the Department of Fish and Wildlife shall be sited as follows:

(aa) Near residences on other tracts.

(bb) With minimal intrusion into forest areas undeveloped by nonforest uses.

(cc) Where possible, when considering LC 16.212(8)(a)(i)(aa) and (bb) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU.

(ii) Residences to be sited upon all other tracts shall be sited as follows:

(aa) Where possible, in consideration of the dimensions and topography of the tract, at least 500 feet from adjoining lines of property zoned F-1 and 100 feet from adjoining lines of property zoned F-2 or EFU.

(bb) On the least valuable farm or forest areas of the tract or located near residences on other tracts.

(b) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines except as provided below.

(c) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.

(d) Maintenance Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Rural Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.212(8)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.212(8)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(aa) Commercial forest practices regulated by the Oregon Forest Practices Act.

(bb) Vegetation removal necessary to provide water access for a water dependent use.

(cc) Removal of dead or diseased vegetation that poses a safety or health hazards.

(dd) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

(e) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(9) Residence Maintenance, Repair and Replacement Standards.

(a) Maintenance and repair of lawfully existing residences shall be permitted in the Exclusive Farm Use (E) zone.

(b) Replacement of any residence lawfully existing, occupied, suitable for occupancy or in the process of being constructed shall be permitted. The replacement need not be in kind (i.e., a mobile home may replace a dwelling or vice versa). Any replacement authorized under this subsection shall be for a residence to be located on the same site as the previous residence and such replacement shall commence within one year of the date of removal of the previous residence.

(b) Fish and wildlife habitat management and the propagation of fish and wildlife.

(3) Special Uses - Director Approval. The following uses are subject to approval by the Director pursuant to LC 14.100:

(a) Single-family dwelling(s) or mobile home(s) for residential purpose for watchman, caretaker or operator in conjunction with use permitted in the district.

(4) Special Uses - Director Official Approval. The following uses are subject to approval by the Hearings Official pursuant to LC 14.300:

(a) Piers and boat houses.

(b) Single-family dwelling or mobile home and accessory structures.

(c) Farm uses as defined by ORS 215.203(2), and any accessory uses.

(d) Forest uses and any accessory uses.

(5) Conditional Use Criteria. Uses conditionally permitted under LC 16.213(4) above are subject to compliance with the following criteria:

(a) (i) Evidence is provided supporting reasons why the proposed use should be sited in a natural resource area.

(ii) That the proposed site is on land generally unsuitable for natural resource uses.

(b) That the proposed use will not significantly impact natural resource uses on adjacent and nearby natural resource lands, and will not significantly impact natural resources on the site of the proposed uses;

(c) That the proposed use will not significantly increase the costs of natural resource management on adjacent and nearby natural resource lands.

(d) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use;

(e) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby NR zoned lands, and these measures may be established as conditions of approval; and

(f) That the proposed use is consistent with the policies contained in the Rural Comprehensive Plan and the purpose of the NR zone.

(6) Property Development Standards. All uses or activities permitted or conditionally permitted above, shall be subject to the following development standards:

(a) Property Line Setbacks. No structure other than a fence or sign shall be located closer than 20 feet from the right-of-way of a County or local access-public road and 10 feet from all other property lines, except as provided below.

(b) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from a wetland or from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A lesser setback may be allowed if:

(i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and

(ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or

(iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Rural Comprehensive Plan policies for the protection of wetlands, Class I streams and riparian vegetation.

(c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation within wetlands or along Class I streams designated for riparian vegetation protection by the Rural Comprehensive Plan:

(i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.213(6)(b)(i) above. Where vegetation removal beyond that allowed in LC 16.213(6)(b)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(aa) Vegetation removal necessary to provide water access for a water dependent use.

(bb) Removal of dead or diseased vegetation that poses a safety or health hazard.

(cc) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

proposed for lands within the boundaries of the Willamette River Greenway adopted and as revised from time to time by the Oregon Land Conservation and Development Commission, except as provided below:

(a) Customary dredging and channel maintenance conducted under permit from the State of Oregon.

(b) Seasonal increases in gravel operations as provided under permit from the State of Oregon.

(c)tThe placing by a public agency of signs, markers, aids, etc. to serve the public.

(d) Activities to protect, conserve, enhance and maintain public lands, except that a substantial increase in the level of development of existing public recreational, scenic, historical or natural uses on public lands shall require review as provided by this section.

(e) Erosion control operations required in emergency situations for the safety and protection of property.

(f) Construction or use of a building other than a dwelling whether or not within 150 feet of the ordinary low waterline when the building is customarily provided in conjunction with a farm use; provided the structure does not exceed 12 feet in height nor exists for longer than six months.

(g) Farm use.

(h) Reasonable emergency procedures necessary for the safety or protection of property.

(i) Maintenance and repair usual and necessary for the continuance of an existing use. Landscaping, construction of driveways, modification of existing structures or facilities adjacent to a residence as are usual and necessary to such use and enjoyment.

(j) The propagation of timber or the cutting of timber which is done for public safety or personal noncommercial use.

(k) Irrigation pumps and water intakes and other utility lines in conjunction with an agricultural use.

(l) Uses which are pursuant to one of the following Lane County Land Development actions when such action has been approved or adopted consistent with the Greenway Development Permit approval requirements of 16.254(4) below and notification requirements of LC 16.254(7) below.

(i) Planned Unit Developments, as provided in 10.700.

(ii) Unzoned Area Development Permits, as provided in LC 9.700.

(4) Greenway Development Permit Approval. A decision to approve a Greenway Development Permit shall require findings that the proposed intensification, change of use or development conforms to the following criteria, and setback requirements:

(a) Criteria.

(i) The development protects or enhances the existing vegetative fringe between the activity and the river. Where such protective action is shown to be impractical under the circumstances, the maximum landscaped area or open space shall be provided between the activity and the river and the development provides for the reestablishment of vegetative cover where it will be significantly removed during the process of land development.

(ii) Public access to and along the river either is not necessary or the necessary access will be provided by appropriate legal means.

(iii) Preservation and maintenance of land inventoried as "agriculture" in the adopted Willamette River Greenway Plan for farm use, as provided for in Goal 3, and minimize interference with the long-term capacity of lands for farm use.

(iv) Protection, conservation or preservation of significant scenic areas, viewpoints and vistas.

(v) Harvesting of timber in a manner that wildlife habitat, riparian and other significant vegetation and the natural scenic qualities of the Greenway will be preserved, conserved or restored and otherwise result in only the partial harvest of timber beyond the vegetative fringe.

(vi) Minimize vandalism and trespass.

(vii) Location of development away from the river to the greatest possible degree.

(viii) Protection of significant fish, wildlife habitat and natural areas.

(ix) Is compatible with the Willamette River Greenway based upon the following considerations:

(aa) A development which is a mining or a mineral extraction and/or processing operation must include mining or extraction and/or processing methods which are designed to minimize adverse effects upon water quality, fish and wildlife, vegetation, bank stabilization, stream flow, visual quality, noise, safety and to guarantee necessary reclamation.

(bb) Protection, preservation, rehabilitation, reconstruction or restoration of significant historic and archeological resources.

(cc) Preserve areas of annual flooding, floodplains and wetlands.

(dd) Protection, conservation or preservation of areas along the alluvial bottomlands and lands with severe soil limitations from intensive development.

(ee) Consideration of the impacts from consumptive uses of water (i.e., domestic, agriculture, industrial) and nonconsumptive uses (i.e., recreation and natural resources) in efforts of maintaining sufficient flows to support water users.

(ff) Sustenance and enhancement of water quality by managing or controlling sources of water pollution from uses, such as domestic and industrial wastes, agricultural and timber runoff, septic tank seepage, gravel operations and other intermittent sources.

(gg) Maintenance and sustenance of natural riparian vegetation found upon the lower alluvial bottomlands and upper terraces bordering the river for the following reasons: provide habitat, food and shade for wildlife; protect natural areas; anchor river bank soils and protect agricultural land from seasonal erosion; ensure scenic quality and screening of uses from the river; control trespass; and to control pollution sources to the river.

(hh) Protection from erosion.

(ii) Protection and conservation of lands designated as aggregate resources within the adopted Willamette Greenway Plan.

(b) Setback Requirement; Exceptions. New intensifications, developments and changes of use shall be set back 100 feet from ordinary high waterline of the river, except for a water related or water dependent use.

(5) **Conditions.** Reasonable conditions may be imposed in connection with a Greenway Development Permit as necessary to meet the purposes of this section. Guarantees and evidence may be required that such conditions will be or are being complied with. Such conditions may include, but are not limited to, requiring:

(a) Special yards and spaces.

(b) Fences and walls.

(c) Special off street parking and loading requirements.

(d) Street and road dedications and improvements (or bonds).

(e) Control of points of vehicular ingress and egress.

(f) Special provisions on signs.

(g) Landscaping and maintenance thereof.

(h) Maintenance of grounds.

(i) Control of noise vibration, odors or other similar nuisances.

(j) A time period within which the proposed use shall be developed.

(k) A limit on total duration of use.

(l) Control of scale, bulk and coverage of proposal.

(6) Application and Review Procedure. Application for a Greenway Development Permit shall be made as provided by LC 14.040 and reviewed by the Hearings Official as provided by LC 14.300.

(7) Additional Notice. Immediate notice of an application shall be given the State Department of Transportation by certified mail, return receipt requested, and provision shall be made to provide notice to any individual or group requesting notice in writing. Notice of the action taken by Lane County on an application shall be furnished by regular mail to the State Department of Transportation.

(8) Conflicting Provisions. In the case of any conflict between the provisions of this section and other provisions in Lane Code, the more restrictive provisions shall apply.

(9) Nonauthority for Public Use of Private Property. Nothing in this section is intended to authorize public use of private property. Public use of private property is a trespass unless appropriate easements and access have been acquired in accordance with law to authorize such use.

(10) Nonconforming Uses. Except as modified in this section, LC 16.251(1) to (8) shall apply to properties within the Willamette Greenway Boundaries. Any change or intensification as those terms discussed in LC 16.254(2)(f) and (g) above of a nonconforming use shall be prohibited unless a Greenway Development Permit is issued for it.

Legislative Findings in Support of Ordinance No. 11-84
Exhibit A

The Board of County Commissioners of Lane County finds that it is necessary to make the following changes in Lane Code Ch 16 to bring it to an acknowledgeable standard:

1. Make certain housekeeping revisions to the hearings official special use approval criteria of the Exclusive Farm Use (E) zone to adopt the greenway development permit approval criteria for aggregate extraction, and not to apply any other criteria for aggregate extraction, for lands zoned E and in the greenway.

This change insures that, for all areas within the Willamette River Greenway and zoned Exclusive Farm Use (E), the more stringent requirements of Goal 15 sections C.3.d. will be applied to aggregate extraction. Unlike Exclusive Farm Use lands not within the Willamette River Greenway, those within the greenway require protection of water quality, fish and wildlife habitats, vegetation, bank stabilizaiton, streamflow, visual quality, noise, safety and required reclamation. Section C.3.d. requirements are necessary to insure protection of those areas within the greenway.

2A. Adding a subsection to LC 16.005 to provide standards, procedures and criteria for the protection of areas designated by the rural comprehensive plan is sensitive bird habitat.

These changes to Lane Code require the County to submit development plans for uses located on property identified as a sensitive bird habitat area to the Oregon Department of Fish and Wildlife (ODFW) for evaluation as to the impact the development will have on the habitat. It also deems habitats to be affected if development occurs in close proximity thereto. If the ODFW determines that the habitat will be affected, the changes call for cooperation between the landowner and ODFW to avoid or eliminate those adverse impacts. Only then is the plan taken under advisement by the Director. These changes, providing a two step process and coordination among the landowner, ODFW and the County, insure that sensitive bird habitats will be protected. It bears noting that, for activities regulated by the Forest Practices Act, the requirements of the Cooperative Agreement Between the Oregon State Board of Forestry and the Oregon State Fish and Wildlife Commission as adopted by Lane County in its Goal 5, Flora and Fauna policy 17, prevail.

B. Adding the definition of "Historic Structure or Site".

This change is basically a housekeeping measure as historic structures and sites were referred to in the Code, Working Papers and Policies, but that term was not defined. In addition, (2) makes it clear that the application of the Historic Structures or Sites Combining zone shall be the means of protection of these sites.

C. Revising the definition of "wetland" in order to be consistent with the state-wide planning goal definition of that term.

This is also a housekeeping measure, designed to clearly establish in the implementing measures a definition of "wetlands" which is consistent with the Statewide Planning Goal definition of that term.

D. Revising the siting requirement in the impacted forest, F-2 Zone to provide for clustering of residences on existing tracts.

Under Lane Code Ch. 16 as amended here, residences in the Impacted Forest zones (F-2) which are also located within a designated big game range will be required to be sited near existing residences and with minimal intrusions into forest areas undeveloped by non-forest uses. Setback dimension guidelines (balanced with lot dimensions, proximity to other residences and intrusions into forests area) are also set forth. Notwithstanding the fact that the property is zoned F-2, a concerted effort should be made to locate new residences so as to avoid adversely impacting resource uses and big game habitats. This change in LC 16.211(8) will, on the whole, provide for siting criteria which will protect those interests.

For properties zoned F-2 which are not within a designated big game range, the first criteria to be addressed is that of the suggested setback requirements, taking into account the particular dimensional characteristics of the property. Once a range of possible locations for the dwelling is established, a particular spot should be chosen based on location of the areas in the tract of areas of least natural resource value or in closest proximity to existing residences. Proximity to existing residences is less important for parcels not within designated big game ranges for the reason that wildlife will not be adversely affected by a scattering of residences in these areas.

E. Revising the property development standards of the Exclusive Farm Use, E, zone to add requirements for clustering of residences on existing tracts.

This change to LC 16.212(8) mimics the change reviewed, supra, for LC 16.211(8) and is inserted into the Code for the same reasons. Small groupings of residences will have less of an adverse impact on wildlife and resource uses in the big game range than would more scattered residences. However, if not within the big game range, mitigation of possible adverse effects on the resource uses of neighboring properties is a more important consideration. In any given case, either clustering the residences or scattering them somewhat may be preferable, given the characteristics both of the property upon which the development is proposed and the characteristics and uses of the surrounding properties. This balancing test will ensure a mitigation of adverse impacts to wildlife as well as resource uses.

F. Adding riparian setback and maintenance standards to the Natural Resource, NR, zone.

The Natural Resource Zone (NR-RCP) (Lane Code, Section 16.213) which is, in part, intended to protect aquatic and other wildlife habitat areas. Although major developemnt in the NR zone is not anticipated, the NR zone permits a variety of structures which should be required to be set back in order to protect riparian vegetation just as they are in other zoning districts. For this reason, riparian setback and vegetation maintenance standards have been added to the NR zone. These provisions require cooperation between the County and the Department of Fish and Wildlife for Class I stream setbacks, and closely parallel the riparian requirements to be applied in other zones.

G. Revising the Greenway Development Permits to:

i. Eliminate all the language following the phrase "or personal noncommercial use" in LC 16.254(3)(k)

ii. Ensure that only water-dependent and water-related uses are exempt from the 100-foot greenway setback requirement.

iii. Provide notice of department actions for a greenway development permit to ODOT, and

iv. Requiring a greenway development permit for development in designated "urban" areas.

These changes in the Code are direct results of the requirements of the DLCD staff as outlined in their July 19, 1984, staff report. Excerpts from that report which explain why these changes are made follow:

> "...(S)ubsection (k), which exempts certain kinds of timber harvest activities, is inappropriate. That subsection is consistent with the Greenway Interim Order, but the Goal itself does not exempt such activities from local Greenway review. It has been the Commission's practice to allow propagation of timber or cutting of timber for public safety or personal non-commercial use to be exempt from local Greenway permit review. To that extent, the first part of subsection (k) is acceptable. However, the second part (which exempts harvest activities if consistnet with an approved permit under the FPA, for a farm woodlot less than 20 acres, or if consistent with recommendations of ODOT to DOF), is not." page 91

> "...(A)ccording to the Goal, only water-dependent and water-related intensifications, developments, or changes of use themselves are exempt from Greenway setback requirements. However, Lane County also exempts uses <u>in conjuction with</u> water-related and water-dependent uses. As noted in a number of other reviews, this is inconsistent with the Goal, since it would allow a number of uses to be exempt from the setback which are not envisioned by the Goal. The County's ordinances also identify two ways in which exceptions to the 100-foot setback are permitted. One of these is if a proposal would provide better protection of Greenway values, and the other is if such protection is not applicable to the proposal. The Goal does not permit exceptions to the setback, except for water-dependent and water-related uses, even if a proposal might enhance Greenway values. This is because the intent of the Goal is to keep structures separated from the river and to protect areas immediately adjacent to the river for water-dependent and water-related uses. For example, a restaurant, including landscaping and other amenities may, in the opinion of a Hearings Officer, enhance Greenway values. However, it is not, by definition, a water-related or water-dependent use and therefore, is not permitted within the established Greenway setback." pages 85 and 86

"Section 16.254(6) requires the County to notify the Department of Transportation when an application is made. The ordinance does not require the County to also notify that agency of actions taken on an application. This is required by Goal 15 (Section G)." page 86

"Section 16.254(2) of the Lane Code lists those uses and activities that do not require a Greenway Development Permit. All are consistent with Goal 15 except subsections (a) and (k). Subsection (a) exempts uses "where the location is within areas designated as 'urban' on Greenway maps adopted by the Oregon Land Conservation and Development Commission and is beyond 150 feet of the ordinary low waterline." As noted in the 1981 denial order for Lane County, and intensification, change of use or development in "urban" Greenway areas, as defined in Goal 15, and as designated in the ODOT Greenway Plan, is subject to local Greenway review. (Note: The term, 'urban' as used in the context of Goal 15 is not the same as that used in Goal 14. In this case, 'urban' refers to designations in the ODOT Greenway Plan)." page 83

The changes listed in 2G of this ordinance are designed to alleviate the concerns of DLCD staff, noted above, and to bring the Lane Code into compliance with Goal 15.

LAND CONSERVATION AND DEVELOPMENT COMMISSION
ACKNOWLEDGMENT OF COMPLIANCE
Lane County
(Rural Portion, Excluding Eugene Metro Area)
Supplement to Staff Reports of June 29, 1984 and July 19, 1984 as Amended

DATE RECEIVED:
August 16, 1984 through September 13, 1984

DATE OF COMMISSION ACTION:
September 13, 1984

I. REQUEST

Acknowledgment of Compliance with the Statewide Planning Goals for the comprehensive plan and implementing measures.

II. SUMMARY OF RECOMMENDATIONS

Staff

Recommends the Commission acknowledge the rural portion of Lane County's plan and land use regulations to be in compliance with Statewide Planning Goals 1-~~14~~ 15.

FIELD REPRESENTATIVES: Bob Rindy, Glen Hale
Phone: 378-4095

LEAD REVIEWER: Doug White, Mike Rupp, Claire Puchy
Phone: 378-4926

PLANNING DIRECTOR: Roy Burns
Phone: 687-3958

Date of Supplemental Report: September 12, 1984

III. BACKGROUND INFORMATION

On June 29, 1984, the Department issued a staff recommendation for Goals 1-4, 6-14, in response to Lane County's request for acknowledgment. The Commission took testimony but did not take final action on the request at the July 19, 1984 meeting. Also, on July 19, 1984, the Department issued a staff recommendation regarding Goals 5 and 15, and Goal 2 nonresource lands. At their August 17, 1984 meeting, the Commission again postponed final action on the June 29, 1984 report, and on the July 19, 1984 report, except for the portions pertaining to the rural areas in the Eugene/Springfield Metro Plan. These areas were granted a continuance to October 11, 1984.

In the period following the issuance of the Department recommendations, Lane County has made numerous revisions to their comprehensive plan and implementing ordinances in response to the Department's recommended in-order-to-comply requirements. These amendments were made under the provisions of the Expedited Notice Procedure for Acknowledgment (OAR 660-03-033). According to County Notices (July 19, 1984 and August 23, 1984), commentors and objectors were notified and provided opportunities for review and comment on these amendments prior to County adoption.

Section IV below summarizes the DLCD proposed requirements from the June 29 and July 19 reports and summarizes the County's response to each requirement. These are intended as supplemental findings, rather than as amendments to the previous DLCD recommendations.

Submitted Documents

Document	Ordinance	Adoption
Revisions to Development Code (Chapter 16)	9-84; 11-84	8-9-84; 9-12-84
Amendments to Plan Policies and Comprehensive Plan	889; 892	8-9-84; 9-12-84
Revisions to Development Code (Chapters 13 and 14)	10-84	8-9-84
Amendments to Comprehensive Plan	888	9-12-84
Supplemental Findings for Exceptions, Maringal Lands and Non-Resource Areas	84-9-11-22 (Order) 84-9-11-23 (Order)	9-12-84 9-12-84
Revised Comprehensive Plan Map and Zoning Map	891; PA 884	9-12-84

IV. FINDINGS

GOAL 2: LAND USE PLANNING

Requirement

1. Provide legible maps for all rural lands showing adopted plan categories.

Response

Lane County adopted a set of revised plan maps (ORD. No. 884). These plan maps replace previously submitted plan maps. The plan designations are site specific following legally identifed boundaries. Each plan designation is identified by a specific code symbol and defined in the County's plan.

Conclusion

The requirement has been met.

Requirement

2. Clearly define which zones are intended to implement each plan category.

Response

The County's plan was amended (ORD. 889) to include the following plan policy (Goal 2, Policy 26):

> "Each of the land use designations applied to the Plan Diagram shall be implemented by one or more zoning districts as follows:

Plan Designation(s)*	Zone Classification
Forest land	Nonimpacted Forest Lands
Forest Land	Impacted Forest Lands
Agriculture Land	Exclusive Farm Use
Natural Resource	Natural Resource
Marginal Land	Marginal Lands
Park and Recreation	Park and Recreation
Natural Resource	Quarry and Mining Operations Combining
Natural Resource	Sand, Gravel and Rock Products
Natural Resource	Sand, Gravel and Rock Products Processing
Public Facility, Community	Public Facility
Commercial, Community	Limited Commercial
Comercial, Community	Neighborhood Commercial
Commercial, Community	Commercial
Rural Commercial	Rural Commercial
Industrial, Community	Limited Industrial

Industrial, Community	Light Industrial
Industrial, Community	Heavy Industrial
Rural, Community	Suburban Residential
Rural, Community	Garden Apartment Residential
Rural, Community	Rural Residential
Destination Resort	Destination Resort
Historical Structure/Site	Historic Structures or Sites Combining
Natural Estuary	Natural Estuary
Conservation Estuary	Conservation Estuary
Development Estuary	Development Estuary
