   Although the incomplete National Wetlands Inventory is the basis for the County's wetlands inventory, 1000 Friends is not correct that the County must wait until the National Inventory is completed before it can apply the Goal 5 process to (1B) sites. Furthermore, Policy 7 does not prevent the County from considering information about other sites not on the national inventory during its plan update process. 1000 Friends, or other parties may supply the County with information about wetlands, and the County would be required to apply the Goal 5 process to those sites. Plan Policy 7 states:

   > Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal; state ownership; where these do not occur, an appropriate wetlands zoning district shall be developed and applied. Other wetlands from the national Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per Goal 5 requirements if it is clearly demonstrated that an unprotected significant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction. (Modification in process).

   While the policy does not permit the use of alternative sources of information during the update process, 1000 Friends is correct in suggesting that the policy could be improved by actually stating that other sources of information (besides the National Inventory) will be used.

8. 1000 Friends is correct in pointing out that the County's Working Paper definition of "wetlands" is narrower than that contained in the Statewide Planning Goals. Wetlands very often do not have open, standing water present at least six months out of the year. Reliance on the County's definition could result in some wetlands possibly being excluded from the County's (1C) inventory.

9. 1000 Friends is correct that the County is relying on the FPA to resolve conflicts between timber management activities and riparian areas along Class I streams and wetlands, although the County has not made a statement to this effect. It is clear in Forest Lands Policy 17 and in various sections of the Zone Code that the County is not regulating harvest activites. Objectors are also correct that the County has not provided an analysis demonstrating how the FPA and Rules provide protection for the Goal 5 resource. However, it has been Commission practice not to require counties to adopt implementing measures to resolve conflicts between timber management activities and riparian corridors.

10. 1000 Friends is correct that the County has not applied riparian protection measures around lakes or along Class II streams, or otherwise justified not providing such protection, based on an ESEE consequences analysis of conflicting uses. Information in the Flora and Fauna Working Paper (pp. 6 and 15) suggests that these are important Goal 5 resources.

11. The objections of Friends of the Oregon Coast are not sustained with regard to fish and wildlife concerns for the following reasons:

    a. Objectors are correct that the Exceptions document contains some conflicting statements, particularly whether the property contains Silverspot butterfly habitat. Specifically, finding 37e (p. 27) is misleading, since the site does contain Silverspot habitat. In light of the fact that the County's intent is clearly to take whatever actions are necessary to protect the Silverspot butterfly, this inconsistency is not a Goal violation.

       With regard to the Exception documents' statements regarding elk forage, it can be assumed that, although the main intent is to keep the property in forest, portions of the property will be in other uses. These findings are broadly written, and, as such, are not contradictory.

    b. Objectors have not indicated how findings 47d(1) through (13) violate Goal 5, only that they are sometimes "argumentative" of other documents.

    c. Objectors have not indicated why they believe ODFW's attempt to mitigate impacts on habitats will be experimental, or otherwise why they cannot suceed in providing adequate protection.

d. Objectors have not indicated how regulating sport fishing on Big Creek to protect the resource long-term violates Goal 5. While it is unfortunate that long-term anglers may be "penalized," this is not a Goal issue.

Comments

Oregon Forest Industries Council (OFIC) and the Lane County Landowners Association have commented that Policy 22's intent is unclear, since it calls for interim protection measures for "significant" Goal 5 resource sites. However, the policy addresses (1B) sites. The association indicates that (1B) applies where some information exists but is inadequate for purposes of identifying a site and determining its significance. Commentors also point out that interim protective measures are neither required nor appropriate for Goal 5 compliance.

Response to Comments

Policy 22 (Plan p. 5) states:

> Sites considerd 'significant' in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement process for the 'significant' sites and after sufficient information is available regarding the location, quality, and quantity of the 'significant sites.

While it is true that Policy 22 is somewhat ambiguous, the policy appears to recognize the fact that certain Goal 5 resource categories have significance (e.g., all eagle nests are significant), although their specific locations may not be known at this time. Therefore a (1B) classification is appropriate. The Goal 5 Rule does not require interim protection measures for (1B) sites. However, the Rule does not prohibit jurisdictions from adopting and applying interim measures to (1B) sites.

Conclusion -- Fish and Wildlife Habitats

Lane County has adopted inventory information for a number of fish and wildlife habitat areas, and has identified conflicting uses and ESEE consequences of those conflicting uses. Implementing measures including riparian setbacks and vegetation maintenance standards and a Natural Resource Zone have been adopted. However, a number of deficiencies still remain and must be corrected before acknowledgement can be granted. These are summarized below.

Lane County has placed all sensitive bird habitat sites in a (1B) category, even though information is currently available and is adequate for completing the Goal 5 Rule process. The County needs to adopt a (1C) inventory for known sites and complete the Goal 5 process.

Implementing measures which carry out ODFW's development density recommendations in Major and Peripheral Big Game Range areas have not been adopted, particularly in the F-2, ML and EFU zones. The County has not applied the Goal 5 process to "nonresource" lands.

The County's three commercial, three industrial, and its garden-apartment zones reference a nonexisting code section for their riparian setback and vegetation maintenance standards. It is obvious that the County intended to apply such standards in those zones but until the zones are amended to either (1) reference the correct section of the code containing those standards, or (2) incorporate such standards themselves, there are no riparian standards in effect in those seven zones. Riparian protection measures have not been applied around lakes, in the Natural Resources Zone, or along Class II streams, or justified as not being necessary, based on an analysis of ESEE consequences of conflicting uses.

The County uses a narrower definition of "wetlands" than in the Goals, and therefore, some wetlands may be left off any future (1C) inventory.

The Parks and Recreation zone allows a number of uses which could conflict with the purpose of that zone, and with Goal 5 resources present (including fish and wildlife habitat values).

A Natural Resources Zone has been developed and applied to lands in the County, but it is unclear which habitat sites have been given NR zoning or whether it has been appropriately applied.

Ecologically and Scientifically Significant Natural Areas

Inventory

The County's Flora and Fauna Working Paper contains the County's inventory information on natural areas (pp. 26-32). This working paper indicates that the County evaluated the 86 sites on the Natural Heritage Inventory and the nine sites identified by the Natural Areas Preserves Advisory Committee. (Note: The Committee is now known as the Natural Heritage Advisory Council). These sites were evaluated by Lane County, first of all, to determine whether there was adequate information on location, quality and quantity. If this was the case, and that information suggested that a site was "significant," it was placed in a (1C) category. If information existed, but the site was determined to be not significant, it was classified (1A). If there was inadequate information, sites were placed in a (1B) category (pp. 26-27).

The County placed six sites in the (1B) category:

1. Booth Island/Siltcoos Lake

2. McKenzie River Island (not be confused with the island at the confluence of the McKenzie and Willamette Rivers)

3. South Fork Gate Creek

4. Swamp Creek

5. Marshall Island Heronry

6. Willamette Valley Quaking Aspen Grove

The County has provided justification why it believes the (1B) classification is appropriate for each of the site sites (pp. 27-28). The Nature Conservancy has indicated it has no updated information for any of the six sites at this time and that a (1B) classification is appropriate (Curt Soper, personal communication, June 15, 1984).

Fifty-six other sites were determined to be in a (1C) category and therefore constitute the County's natural areas inventory (p. 28). The County has grouped these sites according to their ownership. There are 23 sites on U.S. Forest Service land, six on BLM land, four sites within state parks, and 25 that are either in the Willamette Greenway or covered by the Coastal Resources Management Plan (pp. 30-32). Two additional sites (Upper Yachats Elk Pasture and Fern Ridge) are also (1C) sites, but do not fall into the above categories (p. 32).

No information regarding location, quality or quantity of the federally-owned sites is provided in the Working Paper. Information regarding the natural features present in the State park sites and at the 25 Greenway or Coastal sites is summarized (pp. 30-32). All are significant in terms of quality. Locations of these sites have not been provided.

It should be noted that, during the review of the coastal portion of the Lane County plan, a privately-owned Darlingtonia bog, east of Highway 101 and east of the City of Florence, was identified. The bog did not quailify as an ecologically significant natural area under the Coastal Goal requirements. It does, however, possess natural values that could qualify it as a Goal 5 (1C) natural area. However, Lane County has not addressed this site in its Working Paper or other submittal materials.

Conflicting Uses/ESEE Consequences Analyses

Because of their ownership by the U.S. Forest Service or the BLM, the County believes no conflicts exist for the 29 federal sites (Flora and Fauna Working Paper, p. 28).

The County indicates that no conflicts exist for the four state park sites based on uses allowed in zoning districts applied to those sites (p. 29). The Flora and Fauna Working Paper Addendum (p. 15) states, "the State of Oregon Parks and Recreation Division has, in a letter to Lane County, stated that the natural area values of these parks are being and will be protected, and that no conflicts with the resource are foreseen." However, as noted in the Goal 2 section of this report, the Parks and Recreation zone which has been applied to these state parks, allows a number of uses which could conflict with natural area values.

No conflicts have been identified for the Coastal or Greenway sites because of programs and zoning districts applied to them (p. 30).

With regard to the two remaining sites (the Elk Pasture and Fern Ridge), the County indicates there are no conflicts. The Siuslaw National Forest and ODFW own the site and have an agreement concerning use of the site as an elk wintering area. Fern Ridge is owned by the Corps of Engineers and, under a 1980 management plan for the reservoir, the natural values present will be protected (p. 32).

It should be pointed out that public ownership, in and of itself, does not necessarily mean there are no conflicting uses, nor does it guarantee site protection. Although several of the U.S. Forest Service and BLM sites are formally protected by those agencies (e.g., wilderness areas, designated research natural areas), others are not. Unless the federal agencies have formal protection programs in place for natural areas, it cannot be assumed that no conflicts exist, nor can they be considered "2A" (protected) Goal 5 resource sites. However, since the Commission has not required counties to complete steps (2) and (3) of the Goal 5 Rule for sites on federal land, it is recommended--but not required--that Lane County correct the statement on page 28 of the Flora and Fauna Working Paper regarding conflicts on federal land.

Policies

Lane County has adopted the following policies regarding natural areas (Flora and Fauna Policies, Plan, pp. 14-16):

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification).

12. If uses are identified (which were not previously identified in the Plan which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

16. Rare and endangered vascular plants, identified in a 1/8/84 list prepared by the Native Plant Society of Oregon shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per

"1B" requirements within two years of the date of plan adoption. This list of rare and endangered vascular plants is included into the Lane County General Plan Policies document as Flora and Fauna Exhibit B.

Policy 22 (Plan, p. 5) states:

> Sites considerd "significant" in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement process for the "significant" sites and after sufficient information is available regarding the location, quality, and quantity of the "significant sites".

See also the Goal 15 section of this report and the coastal review of the Lane County Plan for a discussion of other relevant plan policies which address natural area.

Implementing Measures

As indicated by the County, a number of natural area sites are located on federal land, over which the County lacks jurisdiction. A number of other sites are significant natural areas within the Coastal Planning Area and the implementing measures applied to them have been acknowledged as being in compliance with the Coastal Goals. The two Greenway sites are actually riparian areas along the Middle Fork and the Coast Fork of the Willamette River. The County's Greenway Permit ordinance and its riparian setback and maintenance standards provide a degree of protection for these areas. (See, however, the Goal 15 section of this report for a discussion of specific deficiencies in the Greenway ordinance).

The four state parks have been zoned Parks and Recreation. However, as noted in the Goal 2 section of this report, the PR zone allows a number of uses that could conflict with the natural area values of the sites. ODOT has indicated it does not forsee conflicts with the four sites, according to the County. However, there are no management plans for the sites, or letters from ODOT which confirm that this is the case.

Objections

1. The League of Women Voters of Central Lane County (LWV) has objected to the fact that the County has placed rare and endangered plant species in a (1B) category with a two year time delay for their evaluation through the Goal 5 process. The LWV is concerned because it believes two years it too long for these resources to be without protection. Objectors point out that since most of these resources are not within the Willamette Greenway, they will not receive even minimum interim protection.

2. Lane County Audubon Society and 1000 Friends of Oregon have objected because the County has not provided adequate protection to a natural area known as Russel Creek Basin. This objection is described in more detail in Part II of this Goal 5 Report.

Response to Objections

1. Flora and Fauna Policy 16, which requires Lane County to evaluate the (1B) rare and endangered plant species list in two years does not refer to any particular sites containing these species, nor have objectors provided a list of sites which they believe should have been placed in a (1C) rather that a (1B) category. If sites are not known at this time, then a (1B) classification is appropriate, including policy commitment to address them in the future.

2. Objectors are correct that protection and/or conflict resolution measures have not been applied to the Russel Creek Basin natural area, in spite of an ESEE consequences analysis and recommendations regarding protection of the site in the Metro Working Paper. This issue is addressed in greater detail in the Part II section of this Goal 5 report.

Comments

1. Lane County Landowners Association has pointed out that the County's list of rare and endangered plants is simply a list of species and does not address any specific or general sites. Commentors believe, therefore, the Goal 5 Rule does not apply to these species until sites are identified. (Flora and Fauna Policy 16 indicates that certain plants are considered significant and shall be placed in a (1B) category and evaluated with two years).

2. Lane County Landowners Association also comments that, contrary to Flora and Fauna Policy 7, wetland resources cannot be considered "significant" while placed in a (1B) category.

Response to Comments

1. Commentors are correct that Policy 16 refers only to a list of species, and does not address any sites. Therefore, the Goal 5 Rule will apply if and when sites containing these species are identified.

2. Contrary to the commentor's statements, wetlands--as a resource category--can be (and generally are) considered "significant," even through individual sites may be in a (1B) category because of lack of site-specific inventory information.

Conclusion -- Natural Areas

Lane County has identified 62 natural areas, 56 of which it has classified as (1C) sites. The County has provided sufficient justification for the (1B) classification of the other six sites. Most of the 56 (1C) sites are on federal land, within the Coastal Planning

area, or the Willamette Greenway. Therefore, the County has found that the sites are either not within its jurisdiction to regulate, or implementing measures have been applied which provide adequate protection.

Four state parks contain natural area values. The County indicates that because of their zoning (Parks and Recreation), they are adequately protected. However, an examination of that zone reveals that a number of uses are allowed in that zone which could conflict with the natural values present. State ownership in and of itself does not guarantee protection of these values, unless the agency has an adopted park managment plan, which requires protection. As noted in Goal 2, state agencies are also subject to Goal compliance and acknowledged plans. This is an issue which should be further explored through State Agency Coordination agreements.

The County has not applied the Goal 5 Administrative Rule to a Goal 5 Darlingtonia bog located east of the City of Florence that is not covered by the Coastal Goals.

Outstanding Scenic Views and Sites

Inventory

The County's scenic views and sites inventory information is contained in the Recreational Resources Working Paper (pp. 5-13). This consists of a discussion of several inventories and rating systems used by other public entities (e.g., Bureau of Land Management, U.S. Forest Service, State Department of Transportation, former Coastal Conservation and Development Commission, several parks and open space plans of Lane County and the City of Eugene) (p. 6). However, the Working Paper contains no location, quality or quantity information for any specific sites, nor are any of the aforementioned inventories adopted by reference. Instead, the County has decided that, given the time and resources available as well as the difficulty, it cannot conduct site-specific inventory (p. 7). The County suggests that this be undertaken before the first plan review/revision occurs (p. 7). The County describes in some detail how such an inventory could be conducted, including defining the objective, determining what areas or types of scenic types are "critical", establishing an evaluating or rating system, applying a rating system, and implementing decisions made regarding such areas (pp. 6-14).

The County's Exception for the Big Creek area recognizes scenic values on he property, and on surrounding federal lands (Exhibit E--Renaghan Amendment, p. 53).

Conflicting Uses/ESEE Consequences Analyses

Because the County has not conducted an inventory of outstanding scenic reviews and sites, it has not identified conflicting uses with specifies sites or ESEE consequences of those conflicting uses.

Policies

Lane County's policy regarding scenic resources is as follows (Open Space and Scenic Areas Policy 3, Plan, p. 17):

> Initiate a program to identify areas of outstanding scenic value, identify and resolve conflicts after consideration of social, economic, energy and environmental consequences and protect sites for which conflict resolution indicates protection is desirable. This program will be initiated prior to the next scheduled Plan update (five years from adoption of revised Plan). The County is encouraged to investigate and utilize fee acquisition, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to implement this policy.

Implementing Measures

Because Lane County has decided to put off the application of the Goal 5 process for this resource category until a later date, no implementing measures regarding the protection and/or resolution of conflicts with scenic views sites have been adopted or applied.

The scenic values of the Big Creek Exception Area are to be maintained through a combination of measures, including keeping 87 percent of the property in open space; placing development away from Big Creek and east of Highway 101 (so it is not visible from the north and will not interfere with the most viewed coastal areas); designating the site Conservation/Recreation/Open Space; and by imposing site review requirements. The site will be zoned NR, as well (Exhibit E--Renaghan Amendment, p. 56).

Objection

Friends of the Oregon Coast object because they believe the proposed development in the Big Creek Exception Area will not enhance the outstanding scenic view associated with the site, and would, in fact, destroy the "picture-book" setting.

Response to Objection

Objectors have not provided specific information as to why the combination of plan and zone designations for the site, site review and the requirement for 87 percent open space is not sufficient to protect scenic resources associated with the site.

Determining what is sufficient to protect scenic views and sites is more difficult and more subjective than for other Goal 5 resource categories. However, in the absence of more specific information from objectors, the objection cannot be sustained.

Conclusion--Scenic Views and Sites

Lane County has not inventoried outstanding scenic views or sites, nor has it identified conflicting uses and ESEE consequences of conflicting uses. No implementing measures addressing this resource category have been adopted or applied on the ground. Instead, the County has a policy to initiate a program to address this resource category prior to the next plan update (five years from adoption of the revised plan).

Lane County should be commended for the serious thought and consideration it has given to this subject, and for its commitment to initiate a comprehensive program to identify and protect outstanding scenic resources. Understandably, such a program can be complex and time-consuming, particularly as it is outlined in the County's Working Paper. However, the Goal 5 Rule requires counties to develop programs prior to acknowledgment, based on information that is currently available. According to the County's own Working Paper, several inventories already exist. For example, the County recognizes that there are several state scenic highways, sites recognized in its own Parks and Open Space Master Plan, as well as sites within federal wilderness areas or on other federal lands. It should be noted that, in the 1981 denial order for Lane County, there were in-order-to-comply requirements directing the County to inventory scenic resources and to apply Goal 5 to those sites.

Neither the Goal nor the planning process itself requires that new information be generated or that information be perfect before planning decisions are made. If this were to case, nearly all planning decisions would be put off until the post-acknowledgment period. It is recommended that Lane County embark on a comprehensive scenic resources program during post-acknowledgment, as called for in its plan. However, prior to acknowledgment, the County must, at a minimum, inventory known sites, and complete the Goal 5 process for those sites. This work may be refined during post-acknowledgment as part of the County's more detailed, comprehensive scenic resources program work.

Water Areas, Wetlands, Watersheds and Groundwater Resources

Inventory

Lane County has developed a separate document, Water Resources Working Paper, which contains inventory information, and conflicting uses/ESEE consequences analyses for this Goal 5 topic.

Watersheds: A map showing the locations of Lane County's water basins is contained in the Appendix to the Working Paper (Map 2). The County does not provide quality or quantity information for each individual basin, but rather indicates that quality and size vary (p. 5). The County does note, however, that the Upper Middle Fork Willamette, Mosby Creek, and the entire Siuslaw River have severe sedimentation problems. The remainder of the Willamette and the tributary streams to the Willamette and the Siuslaw have moderate sedimentation problems. According to DEQ, the Siuslaw River basin is a "regional hot spot," (i.e., a considerable

portion has a severe problem but is not as important as compared to other hot spots, statewide). DEQ has indicated that 410 miles of streams in Lane County have streambank erosion problems, 67 of them having severe erosion. This is particularly true in the Siuslaw Basin, and in tributary streams to the Willamette and short reaches of the Willamette River itself (p. 4).

Wetlands: Please refer to the Fish and Wildlife section of this report for a discussion of the County's wetlands inventory.

Surface Waters: Lane County streams are shown on Map 2 in the Appendix to the Water Resources Working Paper. More complete mapping of surface water is available in the Planning Department office, however (p. 7). Based on a 1974 Water Quality Report and its 1981 update, the County reports that the quality of water in Lane County is generally quite high (p. 7) However, the Mowhawk, Long Tom, and portions of the Coast Fork and Main Stem of the Willamette have slow, meandering reaches and are affected by extensive development (p. 7). Specific problems along these rivers are discussed briefly (pp. 7-8). The Water Resources Working Paper contains a brief discussion of minimum stream flows, particularly those on the Willamette which are regulated by reservoir releases determined by the Corps of Engineers (pp. 8-9).

The Flora and Fauna Working Paper (p. 16) indicates that all lakes and reservoirs have been mapped and are available in the County Planning Department offices. There are about 300 Alpine Cascade Lakes in the County, varying in size from Waldo Lake (6,420 acres) to Mouse Lake (.05 acres) (Water Resource Working Paper, p. 8).

Groundwater: The principal aquifiers which yield moderate to high volumes of water are located on the coast near Florence in dunal sands, along the lower McKenzie Valley, the lower Middle Fork Willamette Valley, the Lower Coast Fork Willamette Valley, and on the valley floor north of Eugene along the Willamette River (p. 10). Map 3 in the Working Paper shows the quantity of groundwater in Lane County; groundwater quality is depicted on Map 3.

Conflicting Uses/ESEE Consequences Analyses

Watersheds: The County states that the only conflict that is specifically a watershed conflict, and not a surface or groundwater conflict, is contamination or possible contamination of surface water supplies used for domestic purposes. Timber propagation and harvesting activities, particularly herbicide use and erosion caused by ground disturbance can affect municipal water sources (p. 5) Residential development and road construction also cause erosion problems (p. 5). The County notes that resolution of timber harvesting conflicts is beyond its regulatory scope. It also points out that several watersheds used for domestic water supplies are "substantially within federal owernship." The County notes that the watershed for the City of Cottage Grove is almost entirely within federal ownership. The Umpqua National Forest and the U.S. EPA have adopted a plan to address problems, yet these problems continue (p. 5). The County indicates that the potential

for similar problems exist for domestic suppies from federally-owned watersheds such as Mapleton, Tide, London Springs, and Eugene's supply, the McKenzie River (p. 5).

The County has not conducted an ESEE consequences analysis because the problem is outside its jurisdiction to resolve. However, the County supports adoption of policies or amendments to state and federal laws (including the FPA) which provide greater levels of protection for watershed (p. 6).

Development -- which is regulated by the County -- could impact the Clear Lake watershed. This watershed serves the Heceta Water District and provides a portion of the water for the City of Florence (p. 6). The County discusses the possibility of designating a "protected watershed" but has decided to take no action until sufficient information is gathered on the sources of pollutants. (p. 6). An intensive study is presently underway in response to a temporary DEQ rule (p. 6).

Wetlands: Please refer to the Fish and Wildlife section of this report for a discussion of the County's conflicting uses/ESEE consequences analysis for wetlands.

Surface Waters: A number of conflicts exist for surface waters of the County, but the County asserts they are not consequences of County actions. Rather, it believes they are the result of federal agency management programs (e.g., reservoirs have certain congressioally authorized uses, but these often do not include some uses that are of importance of the County, such as waste dilution, fish and wildlife and recreation). The Corps of Engineers is in the process of reviewing authorized uses on six reservoirs, and could propose reauthorization (p. 9).

Similarly, certain streams such as the Coast Fork Willamette, Coyote Creek, Long Tom River and Lost Creek, appear to have been overallocated. The County recognizes that the State Water Resources Department (WRD) has responsibility for establishing minimum streamflows. The County believes WRD should initiate adjudication, including establishing minimum streamflows for major waterways (p. 9).

Erosion from forest lands is also a conflict with water quality, but the County points out that it is regulated by the FPA or federal regulations. (p. 9). Agriculturally caused water quality problems are being addressed by DEQ and soil and water conservation districts, although three SWDs in the County have not yet adopted model Best Management Practices by DEQ (p. 9). Outside UGBs, urban runoff is primarily from industrial facilities, especially hazardous materials stored at this sites (p. 9-10). This is also regulated by DEQ.

Groundwater: Two conflicts have been identified for groundwater resources -- development in quantity-limited aquifers, and development in areas where groundwater quality may be polluted. Separate ESEE

consequences analyses are presented for these two types of conflicts. The County has concluded that:

1. For a quality-limited aquifer, otherwise acceptable development should be allowed if there is an adequate showing that water will be available for a forseeable period in the future, and that the additional withdrawal will not negatively impact surrounding water users. A number of specific code revisions are recommended to carry out these requirements (p. 12).

2. For groundwater quality problem areas, the County has determined that resolution of conflicts should be different for different types of contaminants (p. 14). These include:

   a. For development in aquifers contaminated by natural means, there should be a system to inform people of potential problems, and to suggest that well drilling and testing take place prior to construcion. Areas of quality limitation could be placed on a computerized land file, and could be checked when a building permit application is reviewed. Similarly, notification would be a matter of public record and would be available to future parties interested in these properties as well.

   b. Old and smaller solid waste sites in the County are mapped, but not enough is known about specific leachate problems or groundwater characteristics to designate hazard notification areas around them. The Working Paper recommends inventorying each site, including period of operation, type of wastes deposited, and groundwater characteristics. Based on the information, a hazard notification system should be established (p. 14).

   c. Two sensitive aquifers are currently subject to DEQ rules for sewage system installation -- the River Road/Santa Clara area, and the North Florence area. For other developed areas located on sensitive aquifers and which have known or suspected contamination problems (Mapleton, Noti, Elmira, Crow, Coburg, Goshen, Creswell urbanizing area, Saginaw, Marcola, Dexter, Cedar Flats, Walterville, Leaburg, Vida, Blue River, and McKenzie Bridge), current County policy calls for a minimum parcel size of one acre if community water is available, or two acres if individual wells are used. The County points out that this policy does not correct the existing situation, but should prevent aggravation of the situation (p. 15). These quality-limited aquifier areas will be placed on the County computer file, and applicants for building permits involving new wells will be informed of possible sewage contamination in the groundwater.

Policies

The following policies address water resource issues in Lane County (Water Resources Policies, Plan, pp. 17-18):

1. State policy normally promotes multiple use of surface waters throughout Lane County. Under such policy, use conflicts can and do occur. As the first step in addressing this problem, the County urges the Oregon Water Policy Review Board and the Department of Environmental Quality to update the existing water basin plans and establish priorities among the varous beneficial uses for specific water areas. The economic, social, environmental and energy consequences of each use should be considered in establishing priorities and resolving any identified conflicts. Lane County will cooperate to the maximum extent practicable in such a program.

2. The County supports congressional reauthorization of upper Willamette basin reservoirs, to reflect actual use priorities. To the extent practicable, the County will cooperate with the Corps of Engineers in resolving existing use conflicts and accommodating the needs of competing uses.

3. Adequacy of water supply, particularly those relying on groundwater sources, shall be a major concern in reviewing major land use changes. For the purpose of applying this policy, major land use change shall be any application reviewed by the Hearings Official or the Planning Commission.

4. The primary means of evaluating groundwater resources for land use planning purposes shall be through the land division review process. The Little Butte Volcanics, Eugene Formation, Fisher Formation, Spencer Formation, Flourney Formation, Alluvium and Older Dunes geological units shall be designated as quality and/or quantity limited aquifers. As such the provisions of Chapter 13, Lane Code (Land Divisions) regarding areas so designated will apply.

5. Land use designations in the Comprehensive Plan and implementing zoning shall be commensurate with groundwater aquifer capacities.

Additional policies regarding water resources, including wetlands, are discussed in the Fish and Wildlife section of this report, as well as in the Goal 6 and 11 sections.

Implementing Measures

As noted in the Fish and Wildlife section of this report, the County has adopted riparian setback and vegetation maintenance standards in a number of zoning districts.

A Natural Resources Zone has been applied to several wetlands (confirmed by Mike Copely, County Planner, personal communication, July 16, 1984).

Section 13.050(13) of the Lane Code addresses the provision of water in the County. This section requires lots and parcels to be served by an approved public, community, or individual water system. Aquifer and quality tests are required for public and community systems, and may be required for individual water sytems. These tests are as follows (Section 13.050(13)):

(c) Aquifer and quality tests or geological evaluation may be required by Lane County for any lot or parcel. These requirements may include, but need not be limited to, evaluation of existing well logs and preparation of a geological report on the area, and evaluation of the site by a professional geologist, or engineering geologist or full scale aquifer tests as required. In determining the detail of analysis required, the following apply:

(i) Areas designated by Board order as having problems in the quantity or quality of available water as adopted, documented in Lane Manual and filed in the office of the Department shall meet the following requirements for all parcesl less than 20 acres in size. The applicant must affirmatively demonstrate, in a manner acceptable to Lane County, that the proposed subdivision/partition is capable of sustaining the devlopment anticipated with sufficient potable water. This demonstration must include, but need not be limited to, aquifer tests. More specifically, the aquifer test shall show coefficient of transmissivity, permeabiltiy, storage and the specific yield. The bacteriology/ chemical tests shall show compliance with standards set by the Oregon State Health Division and Lane County. The test procedure shall utilize standard acceptable practices for aquifer tests using pumped and observation wells and records of static water level, date, clock, elapsed time (in min.), depth of water, drawdown and recovery. Analysis using the non-equilibrium method (or other methods where appropriate) must be performed by a licensed geologist or engineer. A copy of all field notes and test results shall be submitted with the report, together with summary statements which indicate whether the proposed use of the aquifer could adversely impact the neighboring wells or properties or deplete the aquifer and the general impact of the proposed use.

(d) For all areas not designated as problem areas by the procedures documented in LC 13.050(13)(a) above, a pump test report or a well log report shall be supplied, unless determined by Lane County to be not necessary.

Pump test and well log reports shall be prepared according to criteria in the ordinance.

Conclusion -- Water Resources

The County has done a good job of inventorying its water resources and problems associated with those resources. The County has analyzed the ESEE consequences of conflicting uses, and has adopted some excellent implementing measures to help resolve conflicts, particularly riparian setback and vegetation maintenance standards and aquifer and quality requirements.

Wilderness Areas

Inventory

Lane County's inventory of designated wilderness areas is contained in its Recreational Resources Working Paper on a map entitled, Recreational Resources. The locations of three wilderness areas are depicted--Mt. Washington Wilderness, Three Sisters Wilderness, and Diamond Park Wilderness.

Page 4 of the Working Paper describes in general the County's role in managing such areas.

It should be noted that recently, new wilderness legislation was passed by the U.S. Congress, establishing a number of new wilderness areas in Oregon. Several of these are within Lane County. These include Rock Creek, Cummins Creek, Three Sisters Additions, Diamond Peak Additions, and Waldo Lake.

Because of the fact that Congressional action occurred so recently (after Lane County submitted its plan), it is suggested--but not required until first plan update--that the plan be amended to inventory these new areas.

Conflicting Uses/ESEE Consequences Analyses

Because of their federal ownership, remote locations and federal protection for wilderness values, the County indicates that wilderness areas are "free from County-generated conflicts" (p. 4).

Policies

Lane County has one policy addressing wilderness areas (Open Space and Scenic Areas Policy 2; Plan, p. 17):

> Lane County will recommend that no new wilderness areas be designated in the County without a complete analysis of the revenue and employment impacts to Lane County. Where designations are made, negative employment and revenue impacts should be mitigated by increasing allowable timber harvest on other public lands.

Implementing Measures

Forest resource zoning has been applied to wilderness areas. The County explains in its Recreational Resources Working Paper (p. 4) that this zoning "will pay homage to the concept of County 'protection' of them, but in practical fact they are simply out of the relm of County authority."

Conclusion--Wilderness Areas

Lane County has inventoried the three wilderness areas within its boundaries and has adopted a plan policy recommending that no new wilderness areas be designated without an analysis of revenue and employment impacts. The areas have been given forest resource zoning. It is recommended that, by first plan update, the County amend its plan to inventory the recently designated new wilderness areas.

Historic and Cultural Resources

Inventory

The Working Paper identifies each of the approximately 500 sites identified in Lane County on a preliminary inventory and survey of historic and archaeological resources. Each is identified by site number or name, by location (township, range, section) and by map symbol. Each appears on a quad map included in that document. A map symbol for each site indicates whether it is an archaeological site, a transportation site or route, a settlement feature, an agricultural site, a mining site, a logging site, a marine site, an historical site, or a natural feature.

Lane County has adopted an Historical Resources Working Paper which explains the process and criteria used in evaluating the "significance" of the 500 sites identified in the County (Addendum to the Working Paper, pp. 1-2). All sites on the National Register of Historic Places are considered significant and are in the (1C) category of the Goal 5 Rule. All sites or structures still in existence contained in the Statewide Inventory are also considered significant, and where sufficient information is available to carry out a conflicting uses analysis, a (1C) label has been given. Archaeological sites are considered (1B) sites, but the County indicates they should be given special interim protection until a data and a protective program for them are developed. All other sites identified are (1A) sites (pp. 1-2).

In all, the County determined there are 63 (1C) sites. These are listed on pages 3 and 4 of the Working Paper Addendum, along with their locations and map numbers. These sites are mapped on quadrangle maps that are included in the Working Paper. Each site has been given a map code which specifies the "theme" of the site (i.e., archaeological, transportation, settlement features, cemetery, century farm, grange hall, old barn, mining, logging, marine industry, historical site, natural landmark, and hot springs). Further information about each (1C) site

that is also on the Statewide Inventory is appended to the addendum to the Working Paper. The Addendum to the Working Paper also summarizes the quality and quantity of these (1C) sites (pp. 5-9).

It should be noted that the County has indicated that several (1C) sites on the historic sites inventory in the Working Paper Addendum (pp. 3-4) were deleted by the Board of Commissioners during final plan adoption, including sites # 32, 34, 39, and 42 (Mike Copely, County Planner, personal communication, June 15, 1984). There is no indication of this in any of the resubmittal materials. Site 34 is within the Creswell UGB. However, there are no reasons presented supporting deletion of sites # 32, 39, or 42 (the Andrew Keeney House, the Paschelke House, and Fall Creek Christian Church, respectively).

Conflicting Uses/ESEE Consequences Analyses

Pages 5-9 of the Addendum to the Working Paper contain the County's conflicting uses identification and ESEE consequences analyses for the (1C) sites. These analyses are presented by category for the following categories: Transportation Sites (bridges), Settlement Features, Barns, Marine Sites, Historical Sites/Landmarks, and Archaeological Sites.

In its Working Paper, the County recognizes destruction of the structural sites as a conflict, but fails to recognize major exterior alteration as a conflicting activity. However, it is clear in the County's zoning ordinance that the County considers major exterior alteration as an activity which could conflict with historic resources. For archaeological sites, the County identifies any land use or activity which damages the integrity of the site as a conflict.

Policies

Lane County has adopted a number of plan policies which address historic and archaeological resources (Plan, pp. 12-13). These include the following:

1. A group known as the "Lane County Historic Resource Committee" is to be established and given permanent status by the Board of County Commissioners. The Committee shall represent a wide array of historical interests and the interest of property owners. Its tasks shall include: general concern with historical matters in the County; to monitor conditions affecting such resources; to devise criteria and methods for the selection of newly-designated historical resources; to advise the staff and officials of the County on proposed new historical sites and structures; to oversee the administration of the Historic Structures or Sites ordinance; and other related tasks and duties. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

2. The County shall administer the "Historic Structures or Sites" section of Lane Code Chapter 10 as a means of protecting historic resources. These regulations shall be applied to all sites contained in [the] list of "Historic Structures or Sites" referenced by the ordinance, which are sites deemed significant by the County, and therefore meriting protection from conflicting uses by a limitation of such conflicting uses.

3. The Goal 5 conflict resolution process (OAR 660-16-000 through 660-16-025) which has been applied in the selection of historical sites and structures contained in the General Plan and implemented through the "Historic Structures or Sites" ordinance, shall continue to be applied, where appropriate, to historic sites and places prior to regulation of them.

4. The County shall seek to enlist voluntary compliance with individual landowners in the addition of their property as historical sites, and landowners shall be notified of Public Hearings, including information about inclusion as a Historical Site.

5. The County shall encourage its own agencies, and communities within the County, to emphasize their historical, geographic and other unique qualities.

6. The County shall review proposals for development or change in land use for possible impacts with designated historical sites. When proposed development or land use changes will cause harm or degradation of a designated site, such effects shall be mitigated in a satisfactory manner.

7. The County shall continually develop and refine, through review, and update, its inventory of historic sites and resources. A long-term objective shall be in the inclusion of historical sites in the County's geo-data system.

8. The County shall take advantage, where practical, of state and federal programs to assist in the identification and protection of historical resources, including the use of financial assistance from these programs.

9. The County shall work with concern local, state and federal agencies to coordinate efforts to identify and protect historical resources.

10. Archeological sites identified in the Historical Resources Working Paper and Addendum to the Historic Resources Working Paper shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the

date of plan adoption. These significant sites shall be incorporated into the Lane County General Plan Policies document as Historical Resources Exhibit A.

Note: Policy 2, above, incorrectly refers to Lane Code Chapter 10, rather than Chapter 16 as its implementing measure for historic sites.

Implementing Measures

Section 16.233 of the Lane County Development Code is the Historic Structures of Sites Combining Zone (/H-RCP), the stated purpose of which is to allow the County to review building and demolition permits to ensure historic resources are preserved. The Code specifies that "no person may alter or demolish any Historic Structure or Site" unless a permit to do so has been issued. Upon receipt of an application for such a permit, the Planning Director shall notify the Lane County Museum Director and the State Historic Preservation Officer.

A demolition permit shall be approved only if evidence is submitted demonstrating that "every reasonable effort shall be made to maintain the Historic Structure by acquisition, protection, stabilization, rehabilitation, restoration or reconstruction project (a demonstrated lack of private and public funding for maintenance of a structure is sufficient cause to allow demolition)." A permit to alter an historic site or structure shall be approved only upon submission of evidence that (a) any use or change "should be compatible with the historical nature of the property," and (2) only the minimum alteration of the structure or site and its environment necessary to achieve the intended use shall be allowed. Consideration shall be given to four alteration guidelines in satisfying the second criteria, above. These guidelines are as follows:

(1) Only the minimum alteration of the designated historic building, structure or site and its environment necessary to achieve the intended use shall be allowed.

(2) The distinguishing original qualities or character of a designated building, structure or site and its environment should not be destroyed. The removal or alteration of any historical material or distinctive architectural features should be avoided.

(3) All designated buildings, structures and sites shall be recognized as products of their own time. Alterations which have no historical basis and which seek to create an earlier appearance should be discouraged.

(4) Changes which may have taken place in the course of time are evidence of the history and development of a building, structure or site and its environment. These changes may have acquired significance in their own right and this significance shall be recognized and respected.

It must be noted that the zoning maps do not show that the combining zone has been applied to all 63 inventoried (1C) sites as intended. Specifically, the maps do not show that the combining zone is applied to (1C) sites 1-20, 24, 35, 38, 44, 45, 46, 48, 55, 57, 59 or 61. The ordinance also does not indicate which sites fall within that zone designation. This is also contrary to Historic Policy 2, which states that the zone shall be applied to all sites on a list referenced in the ordinance.

Objections

1. The Oregon Department of Transportation (ODOT) has objected because of a conflict between the historic resources working papers and the ordinance. Specifically, ODOT finds that the historic ordinance applies only to sites and structures on the National Register of Historic Places, and does not cover other (1C) sites identified in the working papers.

2. Friends of the Oregon Coast object because of the failure of Lane County to address cultural and archaeological resources of the Big Creek Exception Area. Specifically, objectors indicate that Goal 5 requires such resources to be inventoried. Yet, according to objectors, the Exception does not address this topic "in any way." Objectors provide information indicating that such resources are common at the mouths of coastal rivers. Due to the probability of Indian graves and/or a significant archeological site at the mouth of Big Creek, and the fact that, based on the County's own definition of conflicting uses, road building, building construction and land clearing for a destination resort are considered conflicting uses, objectors believe that "the new zoning of the Renaghan property is in violation of Goal 5 until an intenstive cultural resources inventory has been conducted and this portion of Goal 5 addressed."

Response to Objections

1. ODOT has misread the Lane Code with regarding to the County's Historic Structures of Sites Combining Zone. ODOT has apparently reviewed the County ordinance which applies inside UGBs. That zone does limit the zone's application to National Register sites. However, ODOT has failed to note that the ordinance which applies outside UGB's (in rural Lane County) is somewhat different. Specifically, the rural zone does not contain language that limits application to National Register sites. Therefore, the objection is not sustained.

2. Objectors are correct that the exception for the Renaghan property does not address historic or cultural resources. However, as pointed out by the objectors themselves, the State Historic Preservation Office knows of no site on the property, nor do anthropoligists at Oregon State University. County's are required, under Goal 5, to rely on whatever information is available in producing comprehensive plans. They are not required to conduct extensive archaeological surveys. Therefore, the County's exception does not violate Goal 5

for cultural or archeological resources. If, in the event, such resources are discovered during site development, the Goal 5 Rule would have to be applied by the County, including possible plan amendments.

Conclusion--Historic Resources

Lane County has adopted an inventory of historic resources and has analyzed conflicts and ESEE consequences of conflicts with these resources. The County has a combining zone which is intended to be applied to historic sites.

The zone provides procedures and criteria for resolving conflicts with inventoried sites, particularly major exterior alterations and demolitions. However, the County has not applied the zone to all 63 (1C) sites identified in its plan, as intended.

Oregon Recreation Trails

Inventory

Lane County's inventory of Oregon Recreation Trails is included in its Recreational Resources Working Paper (p. 15, Recreational Resources Map).

The County describes these trails as follows:

1. Coast Range Trail--not developed. Funding limitations and the desire of the state not to condemn private land for trail development suggests that it will be some time before it is completed. Mapped route is general in nature.

2. TransAmerica Bike Trail--fully signed and marked, with route maps published by the state.

3. Eugene to Pacific Crest Trail--a few portions are developed with work now underway by a local chapter of the Sierra Club. Uses bikeways in Eugene Area.

4. High Divide Trail--proposal only, same as #1 above.

5. Coast Trail--Lane County developed portions occur in Cape Perpetua and Heceta Head recreational areas, with preparations being made for inclusion of Oregon Dunes National Recreation Area lands. No private lands involved at this point.

6. Coast Bicycle Trail--designated, signed and mapped.

7. Pacific Crest Trail--fully developed. No private lands involved in Lane County. Located in Willamette National Forest.

These descriptions are basically accurate. It should be noted that, according to Jack Remington, State Trails Coordinator, ODOT has proposed general routes for the unbuilt portions of the Eugene to Pacific Crest Trail and the Coast Trail. Portions of the High Divide Trail already exist since they follow several other developed trails. However, only general routes have been proposed for the unbuilt portions of the High Divide Trail (personal communication, June 20, 1984).

The general location of each of the seven trails is depicted on the County's Recreational Resources Map in the Working Paper. No specific locations have been provided in either the text or on the map, however, for existing trails. Specific routes for the Pacific Crest Trail, the TransAmerica Bike Trail, the Coast Bike Route, and portions of the High Divide Trail and the Eugene to Pacific Crest Trail are known, since these trails are developed.

Conflicting Uses/ESEE Consequences Analyses

The County has not identified specific conflicting uses with the seven proposed or existing Oregon Recreation Trails.

However, the Coast Bicycle Trail, TransAmerica Bike Trail and the Pacific Crest Trail are fully developed and are either on federal or other public lands or on public rights-of-way, as are portions of Eugene to Pacific Crest Trail and portions of the Coast Trail. Therefore, the County concludes that they are likely to experience few conflicts.

No specific routes for the Coast Range Trail or the unbuilt segments of the Coast Trail, the Eugene to Pacific Crest Trail, or the High Divide Trail have been determined by ODOT. Although most of these proposed trails would cross public lands, segments of these trails are proposed to cross private lands, and conflicts could occur. However, since their locations are only generally known at this time, specific conflicts cannot be determined.

Policies

Lane County's recreational trails policy (Open Space and Scenic Areas Policy 4, Plan, p. 17) is:

> The County shall acknowledge recreational trails which are developed by the Oregon Parks Outdoor Recreation Plan and shall display the routes on its Plan documents.

Lane County lacks a policy to cooperate with ODOT in the protection of existing trails. The County also lacks a policy to coordinate with the Oregon Department of Transportation in applying the steps of the Goal 5 Rule during any future identification or establishment of proposed trails or trail segments.

Implementing Measures

No specific implementing measures have been adopted by Lane County for the protection and/or resolution of conflicts with existing or proposed trails.

Conclusion--Recreation Trails

Lane County has identified the seven existing or potential state recreation trails in its Recreational Resources Working Paper, but has not provided a description or map of the specific locations of existing trails. It has, however, recognized the fact that ODOT has maps of these trails. The County lacks a plan policy to coordinate with ODOT in applying the Goal 5 Rule if and when any of the unbuilt trail segments are identified or proposed for construction or designation. The County also lacks a policy to cooperate with ODOT in the protection of existing trails.

No conflicts exist with developed trails and trail segments, and therefore, special implementing measures are not necessary in those areas. Implementing measures have not been adopted for the protection and/or resolution of conflicts with the proposed trails and trail segments, nor are any appropriate at this time since their specific locations are not yet known.

Potential and Approved Scenic Rivers and Waterways

Inventory

The County's Recreational Resources Working Paper briefly describes both the State Scenic Waterways Program and the Federal Wild and Scenic Rivers Program (p. 16). The County correctly notes that there are no designated federal rivers in Lane County at this time. However, the County fails to note that during the 1983 Legislative Session, a bill was passed (HB 2435) designating Waldo Lake and the North Fork of the Middle Fork of the Willamette River (from Waldo Lake to about one mile upstream from Westfir) as a State Scenic Waterway. The County's working paper incorrectly indicates there are no state designated waterways.

The Working Paper correctly recognizes that five river stretches are on the U.S. Interior Department's inventory of potential scenic rivers (p. 17):

1. Upper McKenzie (from Tamolitch Falls to McKenzie Bridge);

2. Steamboat Creek (from its source to its confluence with the Umpqua River);

3. Alsea (entire length; only a small upper portion in Lane County);

4. Siuslaw (from its source to Lake Creek confluence); and

5. Willamette (from Eugene to Corvallis).

All five of these river segments are shown in a general fashion on the Recreational Resources Map contained in the County's Recreational Resources Working Paper.

The County correctly notes that the Upper McKenzie (from Tamolitch Falls to McKenzie Bridge) is also on the state potential scenic waterways list. However, the County fails to mention that Steamboat Creek and Alsea River (the same stretches as on the federal potential list) are also on the state potential list.

The County recognizes that the area affected along each of the inventoried rivers is one-quarter mile on each side measured from ordinary high water (p. 16).

Policies

The following policy has been adopted regarding wild and scenic rivers (Open Space and Scenic Areas Policy 5, Plan, p. 17):

> The County shall cooperate with appropriate state and federal agencies in the selection of scenic and wild rivers.

This policy does not commit the County to coordinate with those agencies in applying the Goal 5 Rule process in studying rivers for possible state or federal designation and in making such selections.

Conflicting Uses/ESEE Consequences Analyses

Lane County suggests that conflicting uses and ESEE/consequences should be identified at the time a river is studied for designation (pp. 17-18). The County also suggests that resource zoning should provide protection for such rivers (p. 17).

Implementing Measures

Waldo Lake and the stretch of the North Fork of the Middle Fork of the Willamette River that is designated as a State Scenic Waterway are located entirely on federal land (confirmed by Jim Payne, State Rivers Program Coordinator, personal communication, June 14, 1984). The portion of the Alsea River that is on the state and federal potential lists is also in federal ownership. The Willamette River is within the Willamette River Greenway, to which the County has applied a Greenway Development ordinance (see the Goal 15 section of this report for details).

Portions of the McKenzie River, Steamboat Creek, and the Siuslaw River flow through federally-owned lands. However, some stretches are in non-federal, private ownership. Developed and committed exceptions have been taken along all of these stretches of the McKenzie and Siuslaw Rivers and Steamboat Creek, most of which have been found to be valid

Gary Darnielle
Lane County Hearings Official
c/o Rachel Serslev, Planner
3050 North Delta Highway
Eugene, OR 97408

January 14, 2020 Personally Delivered
Copy by email to: Rachel.serslev@lanecountyor.gov

Re: PA19-05298, Applicant's Response to Supplemental Post-Hearing Evidentiary Submission

Dear Mr. Darnielle:

This letter is to respond to the submission of Lauri Segel in her email of December 19, 2019, submitted for the reopened record for PA19-05298. I also feel a need to respond to the copy of the letter authored by Aileen P. Kaye, apparently provided by Ms. Segel, originally submitted to the Oregon House Committee on Natural Resources regarding House Bill 3661 and placed into the Committee record on May 10, 1993. I must preface my discussion, though, that it truly escapes me that Ms. Kaye's comments have any bearing on the issues at hand regarding the approval of the Template Test Dwelling Special Use Permit for Tax Lot 18-02-11-00-00507, the subject of the current appeal.

Ms. Segel opines that letters provided by James Mann, retired Senior Planner for the Lane County Land Management Division, and Kent Howe, former Land Management Division Director, were not "signed in the presence of a Notary." At the risk of incurring the wrath of LandWatch's legal counsel again for demonstrating a lack of respect for their opinions, I must note that not a single piece of information that has been submitted by either side of this argument has been "signed before a notary." In nearly 30 years that I have been involved in providing land use consulting services I have never asked for anyone submitting information in assistance of an application to have their work notarized.

My humor has evaporated. Ms. Segel: So what?

The letters from Mr. Mann and Mr. Howe were provided by Michael Farthing, legal counsel for the Applicants, in his letter of November 7, 2019 at Exhibits A and B. What Mr. Mann and Mr. Howe provided is a historical context of events occurring in 1983 and 1984 as Lane County wandered through the wilderness that was the first 10 years of Oregon's land use planning system attempting to obtain an acknowledgment of the county's Rural Comprehensive Plan (RCP). Nearly 40 years after that event the Applicants in this Planning Action, PA19-05298, are being confronted with a charge by the Appellants that somehow Lane County has operated without an acknowledged Comprehensive Plan.

To quote Mr. Malone, attorney for the Appellants, in his letter dated November 21, 2019:

"..., it is an open issue as to whether the comprehensive plan has been acknowledged to comply with the administrative rules implementing the current version of Goal 5 and the forest template dwelling statute."

That is an incendiary statement to which Mr. Malone has failed to produce any substantiating evidence. It is not an "open issue," Exhibit 6 to my letter of December 6, 2019, is the Land Conservation and Development Commission Acknowledgment of Compliance, dated September 13, 1984, acknowledging the Comprehensive Plan of Lane County. In the acknowledgment by LCDC of the F2 Template Dwelling provisions of Lane County Code no further actions were required to address the Big Game Habitat issues of Goal 5, the matter was settled in 1984 with the adoption of the F1 zoning and its prohibition on the placement of residences in 94.4% of the forestland in Lane County. It is to this point that the letters from Mr. Mann and Mr. Howe are addressed discussing the percentage of the <u>total land base</u> of Lane County. The reference to the percentage of forestland is taken from the numbers quoted by LCDC in their acknowledgment of the Lane County Comprehensive Plan.

The dismissal of Mr. Malone's assertion that the Comprehensive Plan fails to implement the current version of Goal 5 is summarized in the Hearings Official decision of the appeal of PA18-05913, commonly referred to as the *Green* decision. In this decision, dated November 25, 2019, a copy of which was provided by Mr. Farthing as Exhibit A to his letter of December 18, 2019, the assertion that the Lane County Comprehensive Plan has failed to address Policy 11 or Goal 5 in providing for the protection of Big Game Habitat is completely refuted.

Ms. Segel offers a disingenuous claim of innocence in stating that LandWatch has not made a "personal jab at Mr. Howe..." She then goes on to state:

"The fact is that Mr. Howe has never shied away from colluding with the developers and their agents, as the attached letter shows." (Apparently this is the letter from Aileen Kaye, referenced above.)

For not having taken a personal jab at Kent Howe, this is a pretty good swipe and personally, I find it despicable. When Mr. Howe retired I wrote him a note that said while he and I had not always agreed, he was always able to do so without being disagreeable. An unusual and admirable trait. What I found applicable to Mr. Howe was he carried out the Lane County Code and Oregon State Statutes in an honorable manner and as he viewed the intent of the rules. I certainly never found him in collusion with the applications of my clients or me. Mr. Howe and Mr. Mann were dedicated public servants in the very truest sense. Ms. Segel's comments regarding these two public employees are beneath further discussion.

Ms. Segel continues to confuse the difference between "legal lots" – lawfully established units of land, as defined in ORS 92.010(3) – and tax lots, an identifying account number for taxation purposes. The appellants have made the issue of "density" as part of their objection. Our point is since the adoption of the current F2 zoning in 1984 and the minimum lot size of 80 acres as mandated by House Bill 3661 in 1993, the creation of lots by partition or subdivision has become a virtually unknown event. The effect of this change has been to establish what is, by anyone's definition, a finite number of parcels within the F2 zone: those created "By deed or land sales contract, if there were no applicable planning, zoning or subdivision or partition ordinances or regulations." ORS 92.010(3)(a)(B)(ii).

What you see is what you get. The number of parcels that can be recognized as having been lawfully established, a Legal Lot, is what has existed for most of Lane County since March 26, 1975; that is a finite number. The number of lawfully created units of land taken in the context of the total land base, the definition of density, has remained unchanged by any measureable amount. We simply are not creating new parcels. The work of NIMPKISH, LLC, the owners of the subject property, has not resulted in the creation of a "new" parcel. There has been established a new tax lot for identification purposed of the Lane County Department of Assessment and Taxation, but not a new Legal Lot.

As is discussed by the Lane County Land Management Division, tax lots are not necessarily Legal Lots, tax lots may have more than one Legal Lot within them. The Appellants simply do not get that and continue to file meritless appeals, as was previously filed, and dismissed, with the subject property.

Tax lots are assigned when a conveyance occurs. When a deed or other conveyance goes of public record the cartographer's office of the Department of Assessment and Taxation

examines the instrument and if the legal description is different than that previously recorded for the tax lot in question a new tax lot is assigned. After all these years it is disappointing that the Appellants simply refuse to acknowledge this process.

Contrary to Ms. Segel's assertion that this process was somehow "hatched by the developers and the agents in the mid-1980's, a practice that both Mr. Mann and Mr. Howe enabled" one can only say: they carried out the law that was passed by the Oregon Legislature. Period.

As to the letter authored by Aileen Kaye I can only say: Seriously? We are to expect that a copy of a letter submitted regarding House Bill 3661 in 1993 reporting on an eavesdropped conversation in a restaurant in Salem is to be considered as evidence in this appeal? For one of the few times in my life, I am at a loss for words. The one that comes to mind is simply: Balderdash!

It's time to answer the question. Does the Special Use Permit application filed in PA19-05298 comply with County Code and State Statute? The Applicants have expended thousands of dollars defending their application, and the approval by County Staff, against this fallacy riddled appeal.

Thank you again for your time in considering my comments.

Sincerely,

Jim Belknap

HAND DELIVERED

Gary Darnielle, Lane County Hearings Official
c/o Rachel Serslev, Planner
Lane County Land Management Division
3050 North Delta Highway
Eugene, OR 97408

Re: **PA 19-05298 (Nimpkish LLC)**
Appeal of Director Approval of Template Dwelling in F-2 zone by Landwatch Lane County
Applicant's Response to Supplemental Post-Hearing Evidentiary Submission

Mr. Darnielle,

Please enter this letter into the record of the above-referenced appeal that I am submitting on behalf of the Applicant and in support of the Director's decision and findings. Mr. Belknap and I previously submitted County orders, reports, maps and other documents that related and responded to the various allegations made by Mr. Malone in his testimony and letters and also to Mr. Mulkey's various speculations.

The appellant, LandWatch, submitted letters on December 19, 2019, including a letter, dated December 19, 2019, from Mr. Malone and an email from Ms. Segel which included a single exhibit. Mr. Belknap has submitted a detailed and thorough response to Ms. Segel's email and to the strange and completely irrelevant 1993 letter from a Ms. Kaye. Mr. Mulkey of 1000 Friends, after an earlier appearance, has apparently elected to forego this opportunity to actually provide evidence into the record to support his baseless claims.

This was the point in this elongated appeal process when all parties were given an opportunity to provide more evidence, particularly concerning LandWatch's and 1000 Friends' Goal 5 compliance issue. Mr. Belknap responded with evidence about the subject property, and template dwelling siting standards and other site details (well logs, fire district update, geotech analysis). I provided research about Lane County and certain Goal 5 projects that occurred in the 1990s which culminated, at least with regard to F-2 zoning and the template dwelling criteria, with the County's adoption of changes to Chapter 16. Those amendments included adoption of the present F-2 zoning ordinance, with a provision for a forest template dwelling that mirrors the State regulations (OAR 660-006-0025) and statutes (ORS 215.750). County Ord. No. 5-02, adopted August 28, 2002. *See* Ex "F" , 12-18-19 Farthing Letter.

For now, I am getting ahead of the purpose of this letter which is to respond to LandWatch's evidentiary submission, such as it is, in this appeal. It consists of Mr. Malone's 2-page letter which accuses Mr. Howe of an error in his previously-submitted letter (Attachment "A" to Farthing 11-07-19 letter) and Ms. Segel's various complaints which included a 1993 letter from a Ms. Kaye. Ironically, the only physical evidence is Ms. Kaye's letter. It bears repeating: The opponents, LandWatch and 1000 Friends, have not provided any credible or relevant physical evidence, legal or geotechnical analysis or anything else that relates to the specific criteria and siting standards for this application. Instead, they provide nothing more than groundless speculation based upon unsupported conclusions.

Malone Letter (12-19-19)

Mr. Malone's entire letter is directed at a statement made by Mr. Howe in his letter, dated October 14, 2019, which stated that Big Game Habitat areas were not formally designated in 1984 by Lane County as significant "C" sites as that classification was then described in the Goal 5 rules in effect in 1984. *See* OAR 660-016. Mr. Howe's statement was and continues to be accurate and true.

Mr. Malone took issue with Mr. Howe's statement because of a recent LUBA decision, *Save TV Butte v. Lane County* , LUBA NO. 2017-031, decided 01-18-18, in which LUBA concluded, based on the application, facts and the record before them, that the County's Big Game Habitat sites were "significant" as if they had been specifically called out as 1 "C" sites in the 1984 plan adoption

process. They were not identified as such in the RCP that was adopted in 1984. LUBA concluded in *Save TV* that the important point was that they were identified and inventoried in accordance with rules in effect at that time for identifying 1 "C" sites. They were, in effect, 1 "C" sites and had to be addressed as such in the PAPA that was at issue in that case.

Regardless, Mr. Howe's statement was and is correct. Of course, Mr. Malone casts aspersions on Mr. Howe in an apparent attempt to discredit his statement about how and why Lane County's consideration of Goal 5 was eventually acknowledged by DLCD and found to be in complete compliance and conformity with Goal 5. His statement is accurate but, as LUBA determined, non-dispositive at least in the *Save TV* case. What is important is that it has absolutely no relevance either with regard to Mr. Howe's statement about the County's Goal 5 acknowledgment or, more importantly, to the present application and its satisfaction of the applicable criteria.

The truly incredible aspect of Mr. Malone's (and especially Ms. Segel's) so-called response to all the evidence we submitted is to provide a single 1993 letter from an out-of-county person and to take issue with a statement that required judicial interpretation to be clarified. Is that all LandWatch has to say about our evidence? What about Mr. Remboldt's letter? The letters from the Fire Chief? What is your response to the County's adoption, in 2002, of an F-2 zoning ordinance that included the template dwelling provisions that are in effect and applicable to this application? Mr. Malone, Ms. Segel, Mr. Mulkey and the rest of LandWatch, please explain why and how Goal 5 was violated, affected, addressed, considered or otherwise became an issue when the template zoning was adopted by Lane County?

Beyond all the evidence that Mr. Belknap has provided into this record, LandWatch has not responded to Ms. Davies' rejection of its Goal 5 argument as set forth in her decision in PA 18-05913, decided November 25, 2019 (*Green*). *See* Ex "A", Farthing letter 12-18-19. In her decision, Ms. Davies provides a detailed response to LandWatch's claim that for this and presumably all future forest template dwelling applications in Lane County that are on lots less than 40 acres are in conflict with the well-known Policy 11 of the Flora and Fauna Working Paper. LandWatch has no response to her analysis and reasoning rejecting that groundless allegation.

Again, Mr. Belknap's response to Ms. Segel is necessary and complete. It is both frustrating and unproductive to continually respond to the same inconclusive and unsupported claims of what the law should be rather than what it is and how it is applied. LandWatch, your rhetoric is growing old and irrelevant.

Sincerely,

Michael E. Farthing

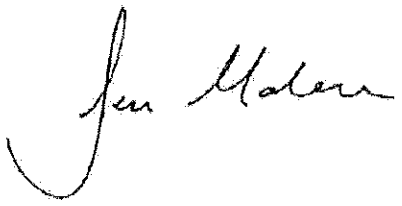
Re: LandWatch testimony in opposition to Request for Template Dwelling in the F-2 zone, 509-PA19-05298 (Nimpkish).

On behalf of LandWatch Lane County, please accept this testimony in support of the appeal and in opposition to the application described above.

The Howe and Mann letters are not supported evidence. Instead, they are merely conjecture about the alleged rationale or purpose of what occurred in the mid-80s. This rationale should be set forth in some adopted document, ordinance, or order, not the alleged recollection of these two individuals. Central to the letters is the following paragraphs:



> "At the same time, Lane County was trying to comply with Goal 4 requirements for Forest Lands and Lane County adopted Goal 4, Policy 5 that prohibited new dwellings on Non-Impacted Forest Lands zoned F-1. This prohibition applied to 84% of Lane County and substantially addressed the concerns of residential impacts on Big Game Habitat raised under Goal 5 by the ODFW. As a result, Policies 9, 10, and 11 of the 1982 Flora and Fauna Working Paper do not designate any Big Game Habitat areas as significant 'C'.
>
> Lane County limited residential develop in Big Game Habitat areas by prohibiting new dwellings in 84% of Lane County (the F1 zone). Lane County complied with the Goal 5 Rule and did not need to further restrict development in Big Game Habitat areas because so much land was preserved from development. Lane County's Big Game Habitat was not categorized as a significant Goal 5 resource. Based on this recognition, no analysis of residential densities is required in wildlife habitat areas in Lane County. Therefore, there are no development limitations on residential densities in Lane County."

Howe Letter, Oct. 14, 2019. This unsupported conclusion was rebuffed by LUBA in *Save TV Butte v. Lane County*, LUBA No. 2017-031, slip op at 20-27, in which it appears either Mr. Mann or Mr. Howe already spun this yarn. More specifically, LUBA stated:

> "Based on what the county did in the Flora & Fauna Working Paper, ti is most accurate to say the county adopted a 1C inventory decision, *i.e.*, that the inventoried big game habitat is 'significant or important.' While one can question whether the Flora and Fauna working Paper fully complies with the Goal 5 rule, it is quite clear the county did not adopt a 1A decision, and despite the planner's suggestions to the contrary, it did not adopt a 1B decision either, because it adopted in the Flora & Fauna Working Paper, which explains how the county will go about implementing ODFW's density recommendations in big game ranges. We agree with petitioners that the county erroneously determined that its adopted inventory of big game habitat is not 'an acknowledged list of significant resources . . . for which the requirements of Goal 5 have been completed at the time the PAPA [in this case was] initiated,' within the meaning of OAR 660-023-0180(5)(b)(D)."

Save TV Butte, slip op at 26-27. Clearly, this contradicts the Howe and Mann letters' central tenet, and the other unsupported allegations in the letter should also be rejected, unless or until some evidentiary support for the veracity of the statements has been proffered. As of yet, there has been no such showing, just baseless conclusions.

Sincerely,

Sean T. Malone

****

LandWatch Lane County has been criticized for expressing the opinion that letters from previous Lane County planning directors should not and cannot be relied on as substantial evidence.

Neither letter was signed in the presence of a Notary, which could have easily been done. Neither letter provided substantial evidence (Ordinances/Orders/Acknowledgments/Minutes, etc.) to support their assertions.

In addition, it is not true, as has been asserted, that LWLC made a "personal jab at Mr. Howe's credibility that is most likely based on LandWatch's inability to convince Mr. Howe when he was Director, that their interpretations of Lane Code should be implemented."

The fact is that Mr. Howe has never shied away from colluding with the developers and their agents, as the attached letter shows. All the interpretations the County relied on between the mid 1980s until fairly recent times came in large part from the developers and their agents, including Board interpretations adopted by Board Orders. LWLC only requested and expected a level playing field, a neutral Planning Director, not acquiescence to our points of view.

Finally, regarding the idea asserted by the applicant that the 1993 template law had the effect of establishing "finite" density and that only subsequent plan amendments and zone changes would result in increased number of "residential lots" - in fact, this lot, and 3 other Nimpkish/Goodman 'lots' (#506, 508, 509) are NEW as of 2019 when they were 'segregated' by Assessment and Taxation as 'new tax lots' in response to recording of conveyance deeds (for $00 dollars) from Goodman to Nimpkish (also established in 2019) .

In fact, LC's practices regarding underlying units of land was hatched by the developers and the agents in the mid-1980's, a practice that both Mr. Mann and Mr. Howe enabled and which has had the effect of adding tens of dozens

of new small sized tax lots to lane county's forest land base, without any reviews pursuant to subdivision or partitioning laws that require consideration of multiple factors including access and compliance with the Goals.

BILL # HB 3661
HOUSE NR E&E SUBCOMMITTEE
EXHIBIT H
DATE 5-10-93 PAGES 3
SUBMITTED BY Aileen P. Kaye

Salem, Or. 97310

Re:HB 3661

Mr. Chairman and Members of the Committee:

Please do not pass HB 3661 which is designed to severely weaken our existing land use laws. I am very concerned that this bill allows our precious rural lands to be handed over to the so called land "developers". This bill opens vast areas of rural land to subdivision which will result in a California-like mess of urban sprawl, water problems, loss of wildlife habitat, loss of grazing land, traffic problems, loss of quality of life. This bill shows a disdain for wildlife, green space, wetlands, flora, pasture, hay production, etc. Building houses on those lands means building roads, stretching scarce water supplies, etc. It displaces or kills birds of prey, deer, etc.

We must reserve the rural lands for rural uses. This bill would encourage people who do not need rural land for growing of crops or raising of animals to move to the country just for the view. This is what ruined California.

Our current system allows enough home building. This is evidenced by the rapid housing development in Washington and Deschutes counties. Please also see the attached article about the rapid growth of housing on rural lands in Marion County.

HB 3661 ends current land use protections by:

**Giving more power to County Commissioners who, in my opinion, are usually beholding to builders and housing developers. They also have been hiring county planners who favor allowing housing on rural and forest land rather than preserving it.*

**Allowing subdivision of rural lands to as little as ten-acre parcels.*

**Opening up land for residential development now used for the growing of hay and the pasturing of livestock for housing development.*

I witnessed a very disturbing incident last June 29. My husband and I went to breakfast at Sybil's Omelettes in Salem. I had just read an article in the Salem newspaper about the formation of a group of architects and housing developers who want to abolish city governments and form a "regional" government with paid "commissioners". My husband then said, "Listen to this conversation next to us!"

Seated next to us were five men. They were saying things such as:

1."We've got to legitimize rural development."
2."Forget the forest lands for now; concentrate on agricultural land. We've got to change the minimum lot size; it is only there for administrative convenience."
3."Get rid of the 20 acre requirement."
4."Get rid of the urban growth boundary system."
5."We should not be preserving rural lands just because some farmer may lease it."
6."Jim knew land use better than Mashofsky."
7."We must get rid of the exception process."
8."It's local government vs. state government."
9."We must change the definition of rural lands."

My husband and I thought these must be members of this new Salem group trying to recruit more members. As they left, I said to one of them, "You builders have taken enough rural land already. Just leave the rest alone! You must be from that new group starting in Salem."

He said, "No, I'm from Lane County and this group is from all over the state. I'm sick of Californians getting all of the good land out in the country. We want more rural land for Oregonians like my relatives to move onto!" (I later found out his name was Dale Riddle.)

I said, "Do your relatives have livestock or crops for which they need rural land?" He said, "no". As he left, I was shocked to see him get into a publicly owned car driven by the man who seemed in charge of the meeting.

When I got home, I called the Legislature to see if some land use hearing was being held. There was a meeting of a "work group" scheduled for 9 AM in the conference room of the Indian Commission (how ironic). I then called the Lane County motor pool to find out the name of the driver. The driver turned out to be Kent Howe who apparently is a land use planner for Lane County. As Mr. Howe was the one who said most of the things listed above, I was really taken aback and thought this is really a case of the fox guarding the hen house.

I then went to the Capitol to the meeting of the Work Group. All five men were there. The chairman of the group (Rep. Jerry Barnes) and one other legislative member had been at Sybil's. The fifth man was Fred Van Natta.

The LCDC is greatly needed. It already weakened the land use rules this past year. Please do not weaken the law any further. KEEP OREGON THE "OREGON" WE ARE KNOWN FOR NATIONALLY. Thank you for your time.

Sincerely,

Aileen P. Kaye

Re: 509-PA19-05298

December 18, 2019

Dear Mr. Darnielle:

This letter is being submitted as part of the reopened record in PA19-05298. In viewing the issues that have arisen in the consideration of an application for a Template Dwelling approval on an adjoining tax lot I am including information that, while not requested specifically with regards to this application, appears to touch on areas of interest that have been expressed in the hearing of the appeal of PA19-05299.

Well Logs. At the November 14 hearing of the appeal for PA19-05299 the question was posed if we had assembled well logs for the area around the subject property and I responded we had not. A comment was made that the area is "known for low production wells" (or words to that effect) and a request followed that we gather information on well logs. While I remain perplexed as to how this matter is identified in Lane Code as being applicable to the evaluation of a Template Test Special Use Permit, I am happy to address such concerns and will do so again with regards to this application.

At Exhibit 1 to this letter is a summary of wells located in Section 11, Township 18 South, Range 2 West Willamette Meridian. As noted in this summary, there are 57 Water Well Reports maintained by the Oregon Water Resources Department, 3 relating to State of Oregon requirements to note well abandonment, 1 to an extension of casing, and 53 reporting on the construction of wells. The flows range from 0 gallons per minute (GPM) to 360 GPM. In parcels nearby or adjoining the subject property a well is noted as having 8 GPM on Tax Lot 506, wells having a 3 GPM flow and 5 GPM flow on Tax Lot 501 (abutting the subject property

to the east). Approximately 450 feet to the west of the subject on Tax Lot 404 are wells having 1.5 GPM and 2.6 GPM. Across R. R. Baker Road is Tax Lot 600 having a well producing 5 GPM and south of Lot 600 is Tax Lot 701 with a flow of 60 GPM. Approximately 2200 feet to the west is Tax Lot 302 with a well having a flow of 100 GPM.

As noted in our report, we are providing the ten entry summary pages maintained by the Water Resources Department and a map with annotations made for the lots that have been identified from well logs depicting the reported flow of the wells. We have obtained each of the well logs (approximately 70 pages) and will provide those if requested, however for brevity they are not included with this letter. It would seem the summary pages depict accurately the performance of the wells in the area. As the question seems to be one of "feasibility" – that is, is it feasible that the applicant will be able to drill a well on the subject property sufficient to meet domestic water needs - we feel the answer is affirmative.

Road Grade. At the hearing for the appeal of PA19-05299 the question was asked if the Fire Chief, Andrew Smith, from the Pleasant Hill-Goshen Fire and Rescue Department had considered the grade of the driveway proposed for access to Tax Lot 506, the subject property of that Planning Action. I commented that Chief Smith had seen the driveway proposal when he conducted his on-site evaluation of the design for the reconstruction of R. R. Baker Road on March 13, 2019 that resulted in his letter of March 14 stating the proposal met the preliminary conditions of approval, but we had not asked him to walk over the actual driveway.

At our request Chief Smith, on December 6, 2019, conducted an additional inspection of the subject property, again evaluating the grade of each section of R. R. Baker Road from its starting point at Wallace Creek Road to the proposed termination point of our reconstruction, the driveway access to Tax Lot 507, the subject of PA19-05298. I identified our proposed turn-around points and we discussed the specific issue of "Chimney Draw Effect." In addition, we asked Chief Smith to walk the proposed driveways for Tax Lot 507 and 506. Chief Smith noted the driveway approach into Tax Lot 507 is virtually at grade from R. R. Baker Road.

Chief Smith has provided an additional letter discussing his review of the site, the proposed road and grade issues and the proposed driveway and its grade as it accesses Tax Lot 506, as well as comment on the risk of Chimney Draw Effect. A copy of Chief Smith's letter dated December 9, 2019 is attached at Exhibit 2.

Landslide Susceptibility. We have provided a letter from Michael Remboldt, a licensed Professional Engineer and Geotechnical Engineer, and principal with K & A Engineering, dated October 31, 2019. Mr. Remboldt's letter followed his on-site evaluation of the property and other elements of review customarily entailed in what is referred to as a Level 1 report. In that letter Mr. Remboldt concludes:

> "Therefore, it is my professional opinion that there is not a significant landslide hazard in the proposed homesite development area, and extensive or drastic safeguards are NOT

> needed to ensure safety on or off the property with respect to hazards associated with slope movement."

In response to the attack leveled by Sean Malone and Andrew Mulkey on Mr. Remboldt's October 31, 2019 letter we asked Mr. Remboldt to address their specific concerns. Mr. Remboldt provided a letter dated December 2, 2019, which has also been placed in the record, discussing the erroneous conclusions made by Mr. Malone and Mr. Mulkey. As a result of questions that arose at the hearing for the appeal of PA19-05299 we asked Mr. Remboldt to again discuss the elements of a Level 1 evaluation of landslide hazard and to discuss specifically his evaluation of R. R. Baker Road. Mr. Remboldt provided a letter dated December 11, 2019 with specific comments relating to the stability of R. R. Baker Road, the private access road to Tax Lot 507, the subject of this application and appeal. Copies of the correspondence from K&A Engineering, Inc., authored by Michael Remboldt, P.E., G. E. (Licensed Professional Engineer and Geotechnical Engineer) are included with this letter at Exhibit 3.

Mr. Malone has objected in other correspondence to the use of the K & A Engineering report stating somehow we are deferring "discretionary decision-making to a point in the future in violation of Rhyne v Multnomah County." The discretion to be applied at some future time in this case is in the actual issuance of a building permit, not in meeting the standards of approval for a Template Dwelling or other land use application.

At some future time an applicant is going to request a building permit from Lane County for the subject property and be required to submit specific information with regards to the size and weight of the building, how ground water and precipitation will be dispersed or disposed of, what kind of foundation has been designed, how close will the structure be to breaks in the physical relief of the land, etc.

At the risk of being overly simplistic, this application process and review will vary widely on whether one is seeking to place a single wide mobile home or construct a three story 8,000 square foot house with a daylight basement. The building department officials will engage to request additional information at such time relating to a geotechnical report that examines the specific proposal for construction. At such time, as Mr. Remboldt points out in his December 11, 2019 letter, the likely requirement will be a Level 2 geotechnical analysis, but that decision will be based on the proposed structure and will result in requirements of construction for excavation, soil compaction, foundation design, size and component, and finally the issuance of a building permit that will meet the Oregon Structural Specialty Code, or the denial of such a permit.

If the applicant for the building permit cannot meet the requirements of the county building department with regards to a sufficient geotechnical analysis no building permit will be issued. The issuance of the building permit is not a foregone conclusion with the meeting of the Template Test requirements for a Special Use Permit. Mr. Malone has jumped to the conclusion that relying upon the building officials to approve the design of the structure in accordance with

building code and sound engineering is "not accountable to the general public.... (and is) potentially in conflict with siting criteria and even the approved site plan."

Potentially? Not accountable to the general public? Every building permit issued by every building department in the State of Oregon is accountable to the public for its compliance with the State's building code. It is the public that is set out to be protected in the approval of a building permit.

Mr. Malone in his representation of LandWatch Lane County in other appeals has previously stated the "Lane County Rural Comprehensive plan policies related to hazardous areas include Goal 7 policies 1, 2 and 3 which provide as follows:"

"1. The Natural Hazards Inventory, as contained in the 1982 Natural Hazards Working Paper and associated materials, shall be used as a guide for general land use decision(s). Specific land use decisions shall be based upon inventory and **upon on-site or other evaluation as appropriate.**"

My emphasis added.

Mr. Malone has continued:

"Here, because this is a specific land use decision, **the application must include "on-site or other evaluation as appropriate."**

"As such, Goal 7 may apply directly*, including the requirement that 'when reviewing development requests in high hazard areas, local government should require site-specific reports, appropriate for the level and type of hazard (e.g. hydrologic reports, **geotechnical reports** or other scientific or engineering reports) prepared by a **licensed professional**'...."

*(May apply? Certainly a definitive and well supported statement!)
Emphasis Added

How can Mr. Malone conclude that we have done anything other than complete an "on-site" evaluation of the property by a licensed professional, appropriate for the evaluation of the proposed development at this time?

Easement for the use of R. R. Baker Road. At the hearing for the appeal of PA19-05299, the question was expressed as to the access provisions made in the easement for R. R. Baker Road and whether that easement would allow for the reconstruction that we proposed. We provided a copy of the easement in the application under PA19-05298, noted as having been recorded at Lane County Recorder's Reception Number 2019-010337. County staff reviewed the easement as complying with access requirements for a Template Test Special Use Permit. The specific question posed was whether the easement would allow the applicant to carry out the proposed reconstruction and establishment of turn around points.

I am attaching a copy of the recorded easement to this letter as Exhibit 4. Please note Section 5.2, "Maintenance/Repair. Any party may cause the easement, or any portion thereof, to be maintained, repaired or reconstructed." The easement continues in Section 5.6, "Perpetual. The grant of this easement is perpetual and non-exclusive and shall run with the land and shall be binding upon and inure to the benefit of the Grantors and Grantees and their heirs, successors, and assigns."

Hendrickson Well Drilling. At the November 14, 2019 hearing of the appeal of PA19-05299 Mr. Malone challenged the letter we had provided by Jeff Hendrickson, principal in Hendrickson Well Drilling, as to their qualification to carry out the road construction proposed for R. R. Baker Road. Mr. Hendrickson's previous letter was also submitted with the application that is the subject of this letter, PA19-05298. Without any knowledge of the contractor's ability Mr. Malone managed to sow the seed of confusion and introduce a level of doubt that resulted in a question on the part of the Hearings Official about whether the construction of the road by a "well drilling company" could actually be accomplished. I am attaching at Exhibit 5 a letter dated December 5, 2019 from Jeff Hendrickson, owner of Hendrickson Well Drilling, that discusses his company's history and their name and provides a few photographs of their construction equipment.

We previously provided for the record a copy of the Land Conservation and Development Commission Acknowledgment of Compliance, Lane County, dated September 12, 1984 with an annotated date of "Commission Action" of September 13, 1984. Pages 15 through 26 provide a broadly encompassing discussion of the application of the Flora and Fauna Working Paper, the evaluation of various parcel sizes to be applied to forest zoned lands and the allowance of residential construction in the various zoned areas.

Prior to the acknowledgement of the Lane County Comprehensive Plan by LCDC was a thorough vetting of the county's attempts at obtaining acknowledgment, notably discussed in the document attached at Exhibit 6 to this letter, entitled "Land Conservation and Development Commission Acknowledgment of Compliance" with a "Date of Commission Action of August 17, 1984." Now submitted for the record, this document provides a very fascinating discussion of the various "stakeholders" to the adoption of the county's plan. Notably such groups as 1000 Friends of Oregon, Oregon Department of Fish and Wildlife, League of Women Voters of Central Lane County, Lane County Audubon Society and private land owners submitted objections and comments on the proposed comprehensive plan. In response to these inputs was the report discussed above and attached at Exhibit 6 that eventually resulted in the acknowledgement of Lane County's Comprehensive Plan.

The last item of discussion in this letter is a response to a bizarre letter provided by Sean Malone, dated December 12, 2019, and referencing "PA19-05298," the subject of the application under appeal and this record, but noting the owner as "Goodman." PA19-05298 is applicable to Tax Lot 18-02-11-00-00507, the owner is NIMPKISH, LLC. PA19-05299 is applicable to Tax Lot 18-02-11-00-00506, the owners are Gray and Dorotea Goodman. On the surface the issue may

be as innocuous as a typographical error, however Mr. Malone's letter goes on to discuss a secondary fuel break issue that supposedly extends to a property to the south, identified as Tax Lot 18-02-11-00-00508, and demands an easement be granted over Tax Lot 508 for the benefit of an unidentified property, but presumably Tax Lot 506. A review of the Site Plan and the Parcel Map of Tax Lot 506 clearly shows the proposed fuel break being over 400 feet away from the boundary with Lot 508.

The content of Mr. Malone's December 12, 2019 letter appears to have no consequence on the discussion of the application for a Special Use Permit allowing a Template Test Dwelling on Tax Lot 507, but his reference to the Planning Action Number of PA19-05298 again sows the seeds of confusion over the entire process of reviewing the appeal filed by LandWatch Lane County.

In response to Mr. Malone's December 12, 2019 letter I prepared a written discussion of the above points and submitted it for the record of PA19-05299. Addressing what may be as simple as a typographical error, but not wishing to rely on that belief and failing to insure the record is fully established for PA19-05298, I am enclosing at Exhibit 7 the letter submitted in PA19-05299 dated December 17, 2019.

I thank you for allowing the record to be re-opened and appreciate the opportunity to submit the enclosed additional material.

Sincerely,

Jim Belknap

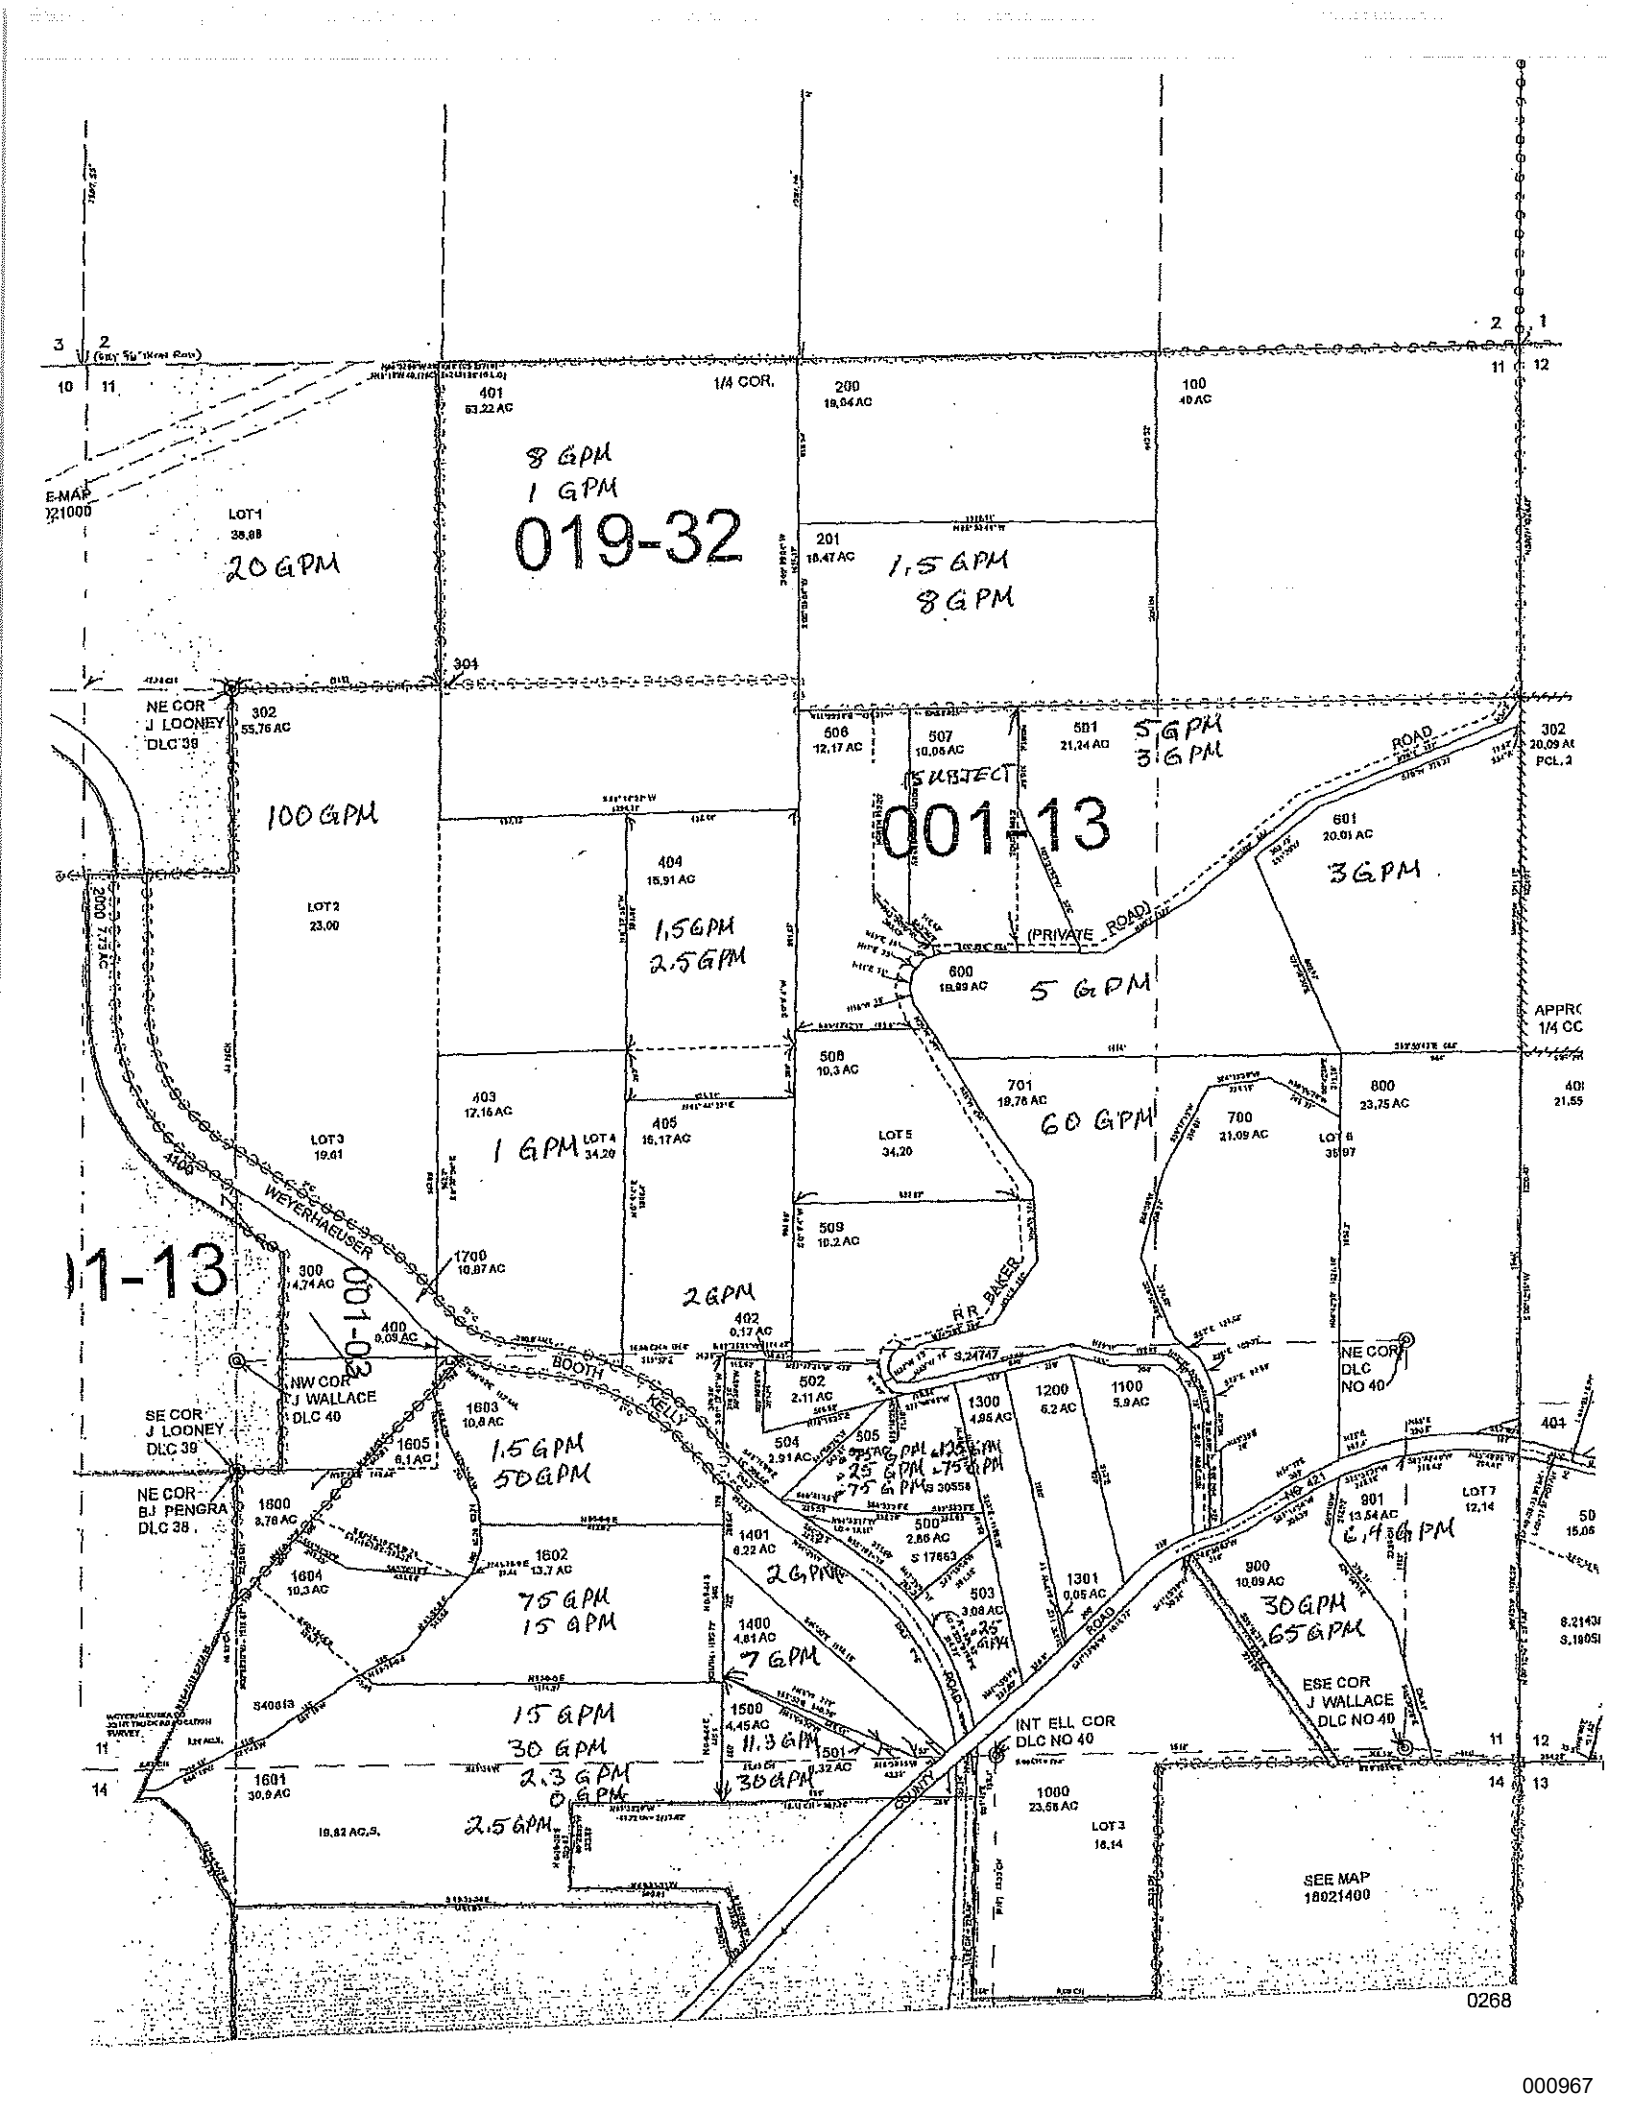
Well Log Summary

We researched the records of the Oregon Water Resources Department for Water Well Reports (Well Logs) relating to wells located within Section 11 of Township 18 South, Range 2 West. 57 reports are maintained by the State of Oregon in Section 11, 3 of those reports are of abandonment operations on wells, 1 report was for an extension of casing with no new depth being drilled. The remaining 53 reports cover a time span from the early 1960s through this year. Notably, many of the reports dating to the 1960s and 1970s do not provide tax lot number, address or sufficient information to make an identification of where the well was drilled. The more recent well logs give quarter/quarter section data or tax lot identification. Included with this summary is a full section map for Section 11 from the Lane County Department of Assessment and Taxation with annotations made in each tax lot where the Well Log can be confirmed to note the reported yield of water.

Also included with this report are the six summary pages for Section 11 as maintained by the Water Resources Department. Each of the summary pages have 10 entries, except for the final page that has 7. Where reported the fourth column from the left side of the page has the tax lot identified. The twelfth column from the left has the reported yield in gallons per minute of the well. Complete copies of each of the Water Well Reports listed in the summary pages have been obtained and are available on request. This compilation of reports is approximately 70 pages in length and for brevity is not being provided with this summary discussion.

As is typical for Lane County, the wells vary greatly. In our study area the wells range from 0 gallons per minute ("dry holes") to 360 gallons per minute. In some cases a single tax lot will have two or more wells ranging in production from 0 gallons per minute to 30 gallons per minute. Water, it seems, is where you find it.

With regards to the immediate area of the Subject Property, Tax Lot 506: to the north on Tax Lot 401 are two wells, one having a production of 1 gallon per minute, the second having production of 8 gallons per minute. Nearby the Subject Property to the east is Tax Lot 501 also having two wells, one with a yield of 3 gallons per minute, the other producing 5 gallons per minute. To the west of the Subject is Tax Lot 404 with two wells, one with a yield of 1.5 gallons per minute, the other with 2.6 gallons per minute. Across R. R. Baker Road from the Subject Property is Tax Lot 600 with a well producing 5 gallons per minute. Immediately south of Tax Lot 600 is Tax Lot 701 having a well producing 60 gallons per minute. A third of a mile west of the Subject Property is Tax Lot 302 having a well producing 100 gallons per minute.



While there are certainly properties in Section 11 with a troubled history of wells, there are also properties having wells with significant flows of water. A well with a flow of 1 gallon per minute will produce 1,440 gallons of water per day, usually pumped with some type of a flow restrictor to not

overtax the pump into a holding tank where another pump will maintain a flow to the residence meeting a short term increase in periodic demand such as from bathing, clothes washing, etc.

It should be noted the typical septic system is designed to accommodate 450 gallons of effluent per day: waste water from toilets, bathing, washing of clothes and dishes, etc. While this will not leave sufficient water to support a large lawn it will allow for a small garden area and more than adequate drinking water. In our example of the 1 gallon per minute well and the use of a holding tank, the water system will make available approximately 1,000 gallons of water per day after meeting the usual demand for water that will be discharged into a septic system. To put this into context, and by way of example, the typical "Rainbird" style of sprinkler will use 2.7 gallons per minute of water when operated at 40 pounds per square inch of pressure, a common water pressure delivered to a residence. Thus the available water for something like a small garden or lawn area would be adequate to operate the sprinkler for about five hours after allowing for 100 gallons per day of drinking water.

It is simply not uncommon for rural landowners to manage their domestic water usage as opposed to urban dwellers that have all the water they could ever consider needing delivered to the meter in their front yard.

The research of Well Logs in Section 11 indicates it is feasible to expect that a well can be drilled on the Subject Property that will meet domestic purposes.

Reopened Record 12/18/19
Submission Of
Additional Materials

Jim Belknap,

Belknap Properties LLC

1785 E. Main Street,

Cottage Grove, OR 97424

This letter is to confirm our on-site discussion on December 6, 2019 regarding the "Goodman" properties located on RR Baker Rd in unincorporated Springfield. We met to clarify questions regarding access and driveways on the road.

1) During this meeting I reviewed updated road proposals for RR Baker Road improvements which included 9 turn-outs being added to the roadway. We have reviewed the grade which is sufficient for Fire Department access.
2) During this meeting we discussed 'Chimney Draw Effect' and the proposed properties. The properties for development have significant fire breaks already in development. Establishing a defensible space around the homesites following lane county code 16.211(6)(c) will help address your needs that should be adhered to. Establishing the defensible space of 130' to 180' around the homesites as depicted in the Site Plan will greatly reduce or eliminate the risk factors of chimney draw effect.
3) During this meeting we reviewed the driveway proposal for the building site on tax lot 506 for property '3'. The driveway in question will be accessible and conducive for Fire Department access. The road should remain compliant with Lane County Code for a single driveway serving a single property.
4) During this meeting we reviewed the proposed driveway for the building site on tax lot 507. This driveway is accessible for fire department access and should continue to meet our standards outlined to you and listed in item '3'.

Prior to the meeting you did provide us maps for the area including all proposed changes and improvements. I see no immediate concerns with the changes you have made and find it satisfactory for us to provide our approval understanding that the roads still must be completed and reviewed to confirm accuracy and compliance at that time.

During our meeting you did express concern over the grade on one driveway access. That grade may in one section reach 18%. The section was shorter than 100' for that grade. You expressed to me the

anticipation that with grading work and improvements that would most likely drop to 16%. In addition, we outlined that you would have a turn-out for apparatus prior to the grade and a turn-around after the grade section at the main homesite. This further improves the access to the homesite for fire apparatus. I approve this grade from the standard of the Fire District and do not see that being an issue for our apparatus to access or pass this grade.

I appreciate your time in meeting with me and discussing this access. Please consider this letter approval from the Fire District perspective regarding the matters as hand. Should you have further questions you may contact my office at (541) 747-3104.

Sincerely,

Andrew Smith, Fire Chief

Jim Belknap <jim.e.belknap@gmail.com> Tue, Dec 3, 2019 at 2:30 PM
To: Andrew Smith <andrew.smith@pleasanthillfire.org>, Gray Goodman <ghyrax@gmail.com>, "Michael E. Farthing" <mefarthing@yahoo.com>

Dear Chief Smith,
I wrote to you a week, or so, ago to discuss our project on R. R. Baker Road, off of Wallace Creek Road. You previously did an inspection of this project and wrote us a letter confirming that our proposal would be satisfactory for the Pleasant Hill-Goshen Fire and Rescue Department's access needs. I presented this letter to the Lane County Land Management Division office.

As I mentioned, our application for Tax Lot 507 and 506 (See the attached map) has been appealed by LandWatch Lane County. At the hearing for the appeal on Tax Lot 506 the Hearings Official, Gary Darnielle, asked if we had had the fire department review the driveway proposal. I responded we had pointed out the driveway approach points onto R. R. Baker Road, but had not specifically dragged you out into the brush to look at the proposed driveway as it was to be constructed. Mr. Darnielle directed us to have you take another look at the property and review the driveways that are proposed.

Of particular concern to Mr. Darnielle is the grade into Tax Lot 506, there is an 80' +/- section that has a grade of approximately 18%. We think we can reduce this to around 16% with some cut and fill, but this has Mr. Darnielle asking if it will be acceptable to your agency. I note the county code allows for grades up to 20% for distances not to exceed 100', but obviously if the fire department has a specific concern we need to address it.

We have a deadline of December 12 to submit our additional information, to include your review of the driveways. Would you be able to meet me this week, Wednesday morning, anytime Thursday or Friday? 12/4,5,6/19.

I am attaching the tax lot maps, our roadway proposal for R. R. Baker Road (which has changed modestly since you saw the property) and the driveway proposal.

I'll give you a bit to digest this email and then call to see if we can arrange a time to meet. If you want to reach me please call 541-954-2944.

Thank you again for your courtesies.
Jim

RE: R. R. Baker Road Properties

This letter is to confirm the response of Pleasant Hill Goshen Fire & Rescue to the area of R. R. Baker Road in the event of a structure fire. If a fire were to be reported in that general area the standard response as a MINIMUM is outlined below:

3 – Type 1 Structure Firefighting Engines

3 – Type 1 Water Tenders (1 with 2100 gallons and 2 with 3000 gallons of water)

2 – Command/Chief Officers

1 – Rescue Vehicle

Automatic Mutual aide assistance from Dexter and Lowell Fire Districts with Engine or Tender support.

For further clarification to the above, please contact our administrative offices at 541-747-3104.

Andrew Smith, Fire Chief

Jim Belknap <jim.e.belknap@gmail.com> Thu, Apr 11, 2019 at 5:17 PM
To: andrew.smith@pleasanthillfire.org

Chief Smith,
Thank you for taking the time to visit today. As we discussed on the phone, I have prepared an application for a Special Use Permit allowing a dwelling under the provisions of what is called the Template Test, this is the application we visited about on-site last month when you reviewed the access road.

As I shared with you today on the phone, part of the application addresses the following:
"Attach to this application objective information demonstrating evidence of compliance with Lane Code 16.211(8)(e), now referenced as Lane Code 16.211(6)(b)(i), including:
Itemized list of firefighting equipment. Obtain from the fire district (if applicable)."

In a previous telephone conversation with a member of your department I was advised you have the following equipment:
3 Water Tank Trucks. One of 2,500 gallons, one of 3,000 gallons and one of 3,500 gallons
5 Structural Engines (Pump Trucks), Two carrying 1,000 gallons, two carrying 750 gallons and one carrying 500 gallons
2 Type 6 Engines (commonly called Brush Trucks), One carrying 250 gallons and one carrying 300 gallons.

When we met at the property you confirmed this equipment was available to fight a fire on the subject property and also indicated your department has cooperating agreements with other fire departments in the area to assist if necessary.

I provided the above list of equipment to Lane County in our application, but they have deemed the application "incomplete." the staff planner has stipulated "It may be beneficial to supplement the statement (my statement in the application) with evidence directly from the fire district pertaining to the district's available firefighting equipment, such as a letter form the fire district..."

Would you please be so kind as to review the information I provided in the application, set forth above, and if this reflects the equipment your department has available for firefighting acknowledge this email as accurately depicting such equipment. I will print a copy of your response and include it with a supplement to our application.

Thank you for your continuing courtesies with this matter.

To: Jim Belknap <jim.e.belknap@gmail.com>

Good Morning Jim,

Sorry for the delay in returning you email. You are correct with the expected response for a fire at the locations addressed above. This equipment is available from the nearby stations through our own agency and or support from Automatic aid. Should you need a further letter to verify this, let me know and I will be glad to assist.

Jim Belknap,

Belknap Properties

1785 East Main Street

Cottage Grove, OR 97424

This letter is to verify that on March 13, I conducted an onsite review of proposed plans for development and establishment of homesites on R R Baker Road, Springfield OR 97478. The intent of this visit was to review plans for access road and driveways for the properties to include R R Baker Road. The proposed homes sites are as follows: Tax Lots 18-02-11-00-501 and 506 which have four home sites.

After review and discussion regarding your plans, the Fire District is willing to provide preliminary verification of compliance for the described project. All plans are within the standards set forth by Pleasant Hill Goshen Fire & Rescue and meet Lane County Standards. Please accept this letter of verification of acceptance.

Please contact our Administrative Offices at (541) 747-3104 should you have further questions regarding your project.

Sincerely,

Andrew Smith, Fire Chief

Chief Andrew Andrew Smith
Pleasant Hill-Goshen Rural Fire Protection District

March 5, 2019

Re: Tax Lot 18-02-11-00-00506 Road Evaluation

Dear Chief Smith:

As we have discussed on the phone, I am assisting Gray and Dorotea Goodman with the application for four dwelling approvals on the above referenced tax lot. I am enclosing a map that depicts five parcels referenced as being part of Tax Lot 501, this map was prepared prior to a series of property line adjustments that have established the five parcels we are now addressing, those parcels have been drawn onto the map. The most easterly of the five parcels has retained the original Tax Lot 501 and has an address of 86690 R.R. Baker Road, Springfield, OR. The remaining four parcels are now encompassed within the remapped Tax Lot 506.

As part of the application for dwelling approval, a process called a Special Use Permit in Lane County, we are required to submit a letter of "Preliminary written verification of compliance from the agency providing fire protection." The standard is set forth as follows:

"The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified in Lane Code 16.211 (8)(e)."

My request of your department is to provide us with a letter that confirms the access established over Wallace Creek Road and continuing on R.R. Baker Road to the proposed building sites within Lane County Tax Lot 18-02-11-00-501 and 506 is adequate for fire fighting equipment.

Thank you for your attention to this request.

Sincerely,

Jim Belknap

Subject: Response to Appellant Comments
Lane County PA19-05298
Nimpkish, LLC Template Test Dwelling Special Use Permit
Tax Lots 506, Tax Map 18-02-11; Lane County
R. R. Baker Road, Springfield, Oregon

Dear Mr. Belknap,
At your request, I am writing to expand on our recommendations for the subject project site dated November 13, 2019. The scope of these supplemental recommendations is limited to issues regarding questions of landslide hazard.

Landslide Hazard Evaluation Process
The recommendations that K & A Engineering, Inc. provided for the subject parcel (dated November 13, 2019) summarize what is termed a "Level I" evaluation of slope stability for the project site(s).[1] Level I evaluations typically include:

- **Literature Search:** a review of available reports and maps available in the literature for the site describing geology and geologic hazards. We consulted geologic maps of the area, DOGAMI hazard maps, and aerial photography of the site and surrounding areas.
- **Site Review:** Level I evaluations include a visual site inspection. We visited the site and spent time looking for visual indicators that are always present in areas of active slope movement including tension cracks, fresh scarps, sloughing, depositional areas, and ponding. We also inspected road cuts to determine the general nature and depth of subsurface conditions in the area.
- **Preliminary Stability Evaluation:** Based on our field observations and available topographic data we made an evaluation of the general nature of slope stability of the area. There are other parameters that affect slope stability in addition ground slope, such as soil shear strength, soil depth, groundwater, root strength, just to name a few. Basing decisions of stability on ground slope gradient alone is bad science.

Recommendations for further investigation and a more detailed evaluation of slope stability are made based on the findings of the Level I evaluation. In this case, we recommended a Level II geotechnical investigation for the subject project site because of their location within or near the DOGAMI high-hazard mapping. The Level II investigation is a detailed study requiring geotechnical borings, laboratory

[1] The Level I analysis is in the context of a three-level approach to geotechnical evaluation which is current standard of practice. As an example, the Eugene city code requires such a process which is detailed in section 9.6710 "Geological and Geotechnical Analysis."

testing, calculation of factors of safety, etc. and will incorporate the specific nature of the proposed structure, roadway grading, and general site grading plans.

This methodology is a logical approach to ensure that the hazard is carefully and thoroughly understood in an efficient and cost-effective manner.

K & A Engineering, Inc. provided a first step in the process of a rational methodology that is accepted as the standard of care by qualified geotechnical engineers for similar projects. In the long run, following this process will result in a complete, detailed, and rational evaluation of slope stability that meets the needs of all parties involved.

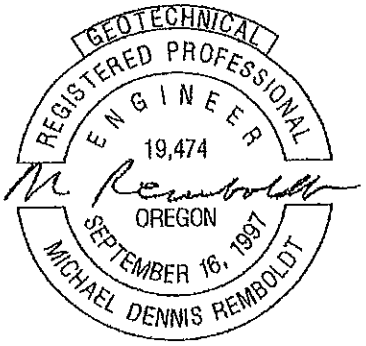
Our level I review is appropriate for undeveloped areas and its use in the determination of the likely nature of slope stability in the current condition and if further study is needed for ground disturbing development. The whole point of the Level review was to determine if the proposed action would significantly heighten landslide hazard and require extreme measures for mitigation.

Road Access

Our understanding is that a question has arisen as to landslide hazards attributed or related to road access to the project site, including the primary access road, R. R. Baker Road, and the proposed driveway extending from R. R. Baker Road to the proposed building site.

R. R. Baker Road

As noted in our letter to the owners regarding tax lot 507 dated October 31, 2019, we observed areas of localized soil creep on the south side of the R. R. Baker Road which are most likely the result of over-steepened road cut embankments. This is a common condition observed for many low volume roads traversing sloped terrain and, in this case, slope movement impact is typically limited to the area from the road ditch to the top of the cut embankment. Furthermore, we note that mapping indicates that the R. R. Baker Road had existed at least since the 1950's and has not been the source of or impacted by large-scale deep-seated landslides or debris flows. *The instability noted is limited to the roadway cut embankment and the hazard is limited to routine road maintenance. There is no evidence that this localized creep presents a hazard that would impact areas outside of the road prism.*



Driveway to Proposed Building Site

Survey sketches for project site development indicate include the location of a proposed access driveway starting at R. R. Baker Road and trending northwest to the proposed building pad. The proposed driveway essentially falls "normal" to the slope – in other words the road does not parallel contours and therefore requires a minimum number of cuts and fills. Cut and fill heights are furthermore limited by the narrow, single-lane width of the driveway. *Based on our experience with the design and construction of low volume roads[2] it is our opinion that the proposed driveway location does not inherently present a significant landslide hazard.*

We recommend that a qualified geotechnical engineer provide quality assurance inspection of driveway access road construction to provide on-site recommendations for road construction.

Thank you for the opportunity to be of service. Please call me if you have any questions.

Sincerely,

Subject: Response to Appellant Comments
Lane County PA19-05298
Nimpkish, LLC Template Test Dwelling Special Use Permit
Tax Lots 506 and 507, Tax Map 18-02-11; Lane County
R. R. Baker Road, Springfield, Oregon

Dear Mr. Belknap,
At your request, we have reviewed comments from appellants in the subject matter and are providing a written response. These comments include those made by Mr. Sean Malone (representing LandWatch Lane County) dated November 21, 2019 and Mr. Andrew Mulkey (representing 1000 Friends of Oregon).

The scope of our review and response is limited to landslide hazard.

Response to Mr. Andrew Mulkey Comments
The recommendations that K & A Engineering, Inc. provided for the subject parcels (dated October 31, 2019 for tax lot 507 and November 13, 2019 for tax lot 506) summarize what is termed a "Level I" evaluation of slope stability for the project site(s). Level I evaluations typically include:

- **Literature Search:** a review of available reports and maps available in the literature for the site describing geology and geologic hazards. We consulted geologic maps of the area, DOGAMI hazard maps, and aerial photography of the site and surrounding areas.
- **Site Review:** Level I evaluations include a visual site inspection. We visited the site and spent time looking for visual indicators that are always present in areas of active slope movement including tension cracks, fresh scarps, sloughing, depositional areas, and ponding. We also inspected road cuts to determine the general nature and depth of subsurface conditions in the area.
- **Preliminary Stability Evaluation:** Based on our field observations and available topographic data we made an evaluation of the general nature of slope stability of the area. There are other parameters that affect slope stability in addition ground slope, such as soil shear strength, soil depth, groundwater, root strength, just to name a few. Basing decisions of stability on ground slope gradient alone is bad science.

Recommendations for further investigation and a more detailed evaluation of slope stability are made based on the findings of the Level I evaluation. In this case, we recommended a Level II geotechnical investigation for these parcels because of their location within or near the DOGAMI high-hazard mapping. The Level II investigation is a detailed study requiring geotechnical borings, laboratory testing, calculation of factors of safety, etc. and will incorporate the specific nature of the proposed structure and grading plans.

This methodology is a logical approach to ensure that the hazard is carefully and thoroughly understood in an efficient and cost-effective manner.

Thus, it is untrue that K & A Engineering, Inc. failed in the evaluation of slope stability. What we did was provide a first step in the process of a rational methodology that is accepted as the standard of care by qualified geotechnical engineers for similar projects. In the long run, following this process will result in a complete, detailed, and rational evaluation of slope stability that meets the needs of all parties involved.

Response to Mr. Sean Malone Comments

- **Substantial Evidence:** Malone, like many others, seems to believe that "substantial evidence" consists of volumes of written documentation. Substantial evidence can be and most often should be very simple and brief in scope.
- **Landslide Scarps:** Scarp sizes, slope gradients, and shapes can vary widely depending on the nature of the slope movement and the age of the slope movement. Steep scarps erode and weather over time, resulting in less-steep slopes and more rounded features. Very old scarps can indeed be difficult to define unless they include zones of harder rock that weather and degrade more slowly than surrounding unconsolidated soil deposits. There is nothing "equivocal" about stating that a location is within or near to a scarp because, as is the case here for very old slope movements, weathering and natural transport of materials downhill eventually result in reduced slope angles.
- **Recent or Ancient:** By recent we mean active landslides or landslides that occurred whereby fresh evidence of movement is visible.
- **"Near the Road:"** The actual proposed length is less than 200-feet, not 300-feet. "Near" is a subjective opinion. This is a convoluted and irrational paragraph that morphs from "near the road" to turnout construction, the land use code, and the feared "chimney effect" – none of which have much, if anything, to do with landslide hazard.
- **"Extensive or Drastic Safeguards:"** Mr. Malone's conclusion is that "it is irrelevant whether any extensive or drastic safeguards may or may not be called for because the issue is whether or not a geotechnical report/evaluation is needed..." The fact is that we are moving forward with a *rational process* of geotechnical evaluation and investigation, with more detailed studies of the impact of development (such as grading, drainage, and foundation loads) required as a result of our Level I evaluation. Making detailed studies at this point makes no sense and does a disservice to the process because it forces limiting assumptions that may or may not exist when the serious details of actual development are determined which usually include things like an actual grading plans, actual foundations (location, depth, type, loads, etc.), real changes to drainage patterns, etc.

  Our level I review is appropriate for undeveloped areas and its use in the determination of the likely nature of slope stability in the current condition and if further study is needed for ground

disturbing development. The whole point of the Level I review was to determine of the proposed action would significantly heighten landslide hazard and require extreme measures for mitigation. Mr. Malone obfuscates the analysis process.

Thank you for the opportunity to be of service. Please call me if you have any questions.

Sincerely,

Subject: Geotechnical Summary of the Nature of Landslide Hazard
Proposed Residential Development
Tax Lot 507 (a.k.a. Parcel 2), Tax Map 18-02-11; Lane County
R. R. Baker Road, Springfield, Oregon

Dear Mr. and Mrs. Goodman,

Our understanding is that a small portion of the project site, located at the southwest corner near the road, is proposed for development as a single-family residence. At your request, we have reviewed the subject project site for the purpose of making a preliminary determination of the nature of landslide hazard and to present practical recommendations for site development. Our services, to date, have included:

- A visual inspection of the subject 10-acre site,
- Review of landslide hazards mapped for the site by the Department of Geology and Minerals Industries and Geology,
- Review of mapped geology and faulting of the general area,
- Review of current and historic aerial photography of the area, and
- These recommendations.

To summarize our review:

- The project site is located within, or near, the south end of the upper scarp zone of a very large, ancient landslide that moved soils and rock to the west.
- There are no visible indications of recent slope movement on the subject project site or on undisturbed areas on adjacent properties. The DOGAMI mapping of landsliding in this area indicates the approximate extent of the ancient landslide but does not include mapping of any active landslide activity.
- Outside of the project site, we observed areas of localized soil creep on the south side of the R. R. Baker Road which are most likely the result of over-steepened road cut embankments.
- The ground surface gradient at the proposed area for homesite development is low, in the range of approximately 10 to 15-percent. Based on our extensive experience in geotechnical engineering for similar projects in similar areas, the existing or future hazard of landsliding is low and manageable for developments similar to what is being proposed in this geologic setting.

Therefore, it is my professional opinion that there is not a significant landslide hazard in the proposed homesite development area, and extensive or drastic safeguards are NOT needed to ensure safety on or off the property with respect to hazards associated with slope movement.

To verify subsurface ground conditions, confirm the low probability of any slope movement in the proposed development area, and to ensure that development will be designed and constructed in a manner that will not induce any geotechnical hazards, *we recommend that a qualified professional geotechnical engineer make a geotechnical investigation of the home site prior to foundation design and construction*. This investigation should include:

- Geotechnical probing and/or borings which adequately characterize subsurface conditions,
- A written Report that summarizes site conditions and makes recommendations for:
  - The current nature of slope stability,
  - Suitable foundation types and load capacity,
  - Drainage, and
  - General earthwork and site construction methods.

This geotechnical investigation should be a requirement for obtaining a building permit to construct the proposed residence.

Thank you for the opportunity to be of service. Please call me if you have any questions.

Sincerely,

DECLARATION OF EASEMENT AND ROAD MAINTENANCE AGREEMENT

PARTIES:

GRANTORS: Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman, husband and wife (Owners of the Real Property more particularly described and set Forth in Exhibit "A" hereto and incorporated herein by reference.)

GRANTEES: Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman, husband and wife (Owners of the Real Property more particularly described and set forth as Exhibit B (Property #1), Exhibit C (property #2), Exhibit D (Property #3), Exhibit E (property #4) and Exhibit F (Property #5), all attached hereto and incorporated herein by reference.)

FOR VALUABLE CONSIDERATION OTHER THAN MONETARY, including, but not limited to, compliance with the requirements of Lane County, receipt and sufficiency of which is hereby acknowledged, Grantors Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman hereby grant, transfer, and convey to Grantees Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman, husband and wife, their heirs, successors, and assigns, a perpetual, nonexclusive easement to use the entire roadway known as R.R. Baker Road (the Roadway), upon the terms and conditions hereinafter set forth, which Roadway is a strip of land 40 feet in width, the centerline of which is described as follows:

See Exhibit A Attached hereto and incorporated herein by reference.

1. **Appurtenant.** This easement is not personal or in gross but is to be appurtenant to each and every portion of each of the following described respective properties owned by Grantees.

See Exhibits B, C, D, E and F attached hereto and incorporated herein by reference.

2. **Servient Estate.** This easement is granted over and across property owned by Grantors in Lane County, Oregon, described as follows:

See Exhibit A attached hereto and incorporated herein by reference.

3. **Burdened Estate.** The real property burdened by this easement is set forth in Exhibit A attached and incorporated herein by reference.

4. **Benefitted Estate.** The real properties benefitted by this easement are more particularly described and set forth in Exhibits B, C, D, E and F attached hereto and incorporated herein by reference.

5. **Terms.** This Declaration and Grant is made upon the following terms:

5.1 Use. Grantees are granted the right to use the 40 foot easement including the existing roadway, as a means for ingress and egress only to the Real Properties described in Section 1, or any portion thereof. Grantees further are granted the right to use the described Easement for the installation and maintenance of such public utilities as may be needed to serve the Real Properties described in Section 1, or any portions thereof. It is expressly understood that no rights outside the 40 foot easement strip are provided. The Easement shall not be obstructed or impeded by any party.

5.2 Maintenance/Repair. Any party may cause the easement, or any portion thereof, to be maintained, repaired, or reconstructed. The party causing such maintenance, repair, or reconstruction work to be done shall pay for such work, and any party using the Easement other than Grantors Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman shall be liable for contribution based on the relative use proportional to the total roadway use (including in that proportion others not a party to this Agreement); provided, however, heirs, successors, and assigns to Grantors Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman shall be liable for such contribution. Real property taxes shall be paid by the owners of the real property upon which the Easement is located.

5.3 Speed Restriction. Vehicles speed on the road shall not exceed 25 miles per hour.

5.4 Grantors' Rights. Grantor shall, at all times and without restriction, have the right to use the easement property and roadway for purposes not inconsistent with the Grantees' full enjoyment of the rights herein granted.

5.5 Vehicle and Equipment Storage. Grantee shall not utilize the easement for vehicle or equipment storage. Disabled vehicles shall be removed from the easement within 48 hours after placement.

5.6 Perpetual. The grant of this easement is perpetual and non-exclusive and shall run with the land and shall be binding upon and inure to the benefit of the Grantors and Grantees and their heirs, successors, and assigns.

5.7 Indemnification. Each party shall indemnify and save any other of the parties harmless from any liability, loss, or expense resulting from any claim for injury to person or property resulting from that party's use of the Roadway or use of the Roadway by that party's agents and employees, any independent contractor hired by that party, and that

party's permittees, invitees, licensees, and guests, unless that injury is caused in part by any other of the parties' failure to maintain the Roadway.

5.8 Existing Encumbrances. This easement is granted subject to all existing easements, reservations, restrictions, conditions, and encumbrances of record affecting the Roadway.

5.9 Non Merger. It is the intent of this Easement to survive, be perpetual and run with the Land without "merger". This Easement is provided to comply with the requirements of Lane County and as such it is the specific intent and direction of Declarant that it not be subject to the Doctrine of Merger.

IN WITNESS THEREOF, Grantors have executed this Easement and Maintenance Agreement on this _____ day of March, 2019.

RR Baker Road

A strip of land 40 feet in width the centerline of which is more particularly described as follows:

Beginning at the Southeast corner of Section 11, Township 18 South, Range 2 West of the Willamette Meridian; thence West 1199.5 feet and North 816.5 feet to an iron pipe set on the Northerly line of County Road No. 421 as now located through said Section 11, and marking the TRUE POINT OF BEGINNING; thence along said centerline the following courses and distances: North 0°30' West 470 feet; North 12° West 75 feet; North 26° West 75 feet; North 52° West 75 feet; West 200 feet; North 74° West 145 feet; South 77° West 590 feet; North 89° West 75 feet; North 37° West 75 feet, North 11° East 75 feet; North 45° East 75 feet; North 74°30' East 290 feet; North 34° East 260 feet; North 04° East 274 feet; North 31° East 775 feet; North 16° East 75 feet; North 14° East 75 feet; North 41° East 75 feet; North 69° East 75 feet; North 86° East 75 feet; South 89°30' East 555 feet; North 60° East 372 feet; North 51°30' East 564 feet; North 70° East 774 feet; North 34° East 43.02 feet to a point on the East line of said Section 11, in Lane County, Oregon.

Note: Description based upon County Survey File No. 25341.

Exhibit A

Exhibit B

Property 1

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence Northerly along said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe set on the centerline of a private road, being the TRUE POINT OF BEGINNING; thence Southwesterly along the center of the private road the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51°30' West 564 feet; South 60° West 372 feet; North 89°30' West 85 feet; thence leaving said centerline N23°31'52"W 576.00 feet; thence North 370.80 feet, more or less, to the said North line of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the said North line of the South 1/2 of the Northeast 1/4 of said Section 11 to the true point of beginning, in Lane County, Oregon, TOGETHER with the East ½ of said private road, being a strip of land 20 feet in width lying adjacent to and Easterly of the above described centerline.

Exhibit C

Property 2

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence Northerly along said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe; thence Southwesterly the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51°30' West 564 feet; South 60° West 372 feet; and North 89°30' West 85 feet to the TRUE POINT OF BEGINNING; thence continuing North 89°30' West 470.00 feet; thence South 86° West 75.00 feet; thence leaving said centerline North 43°50'00" West 144.62 feet; thence North 795.65 feet, more or less, to the said North line of the South 1/2 of the Northeast 1/4 of said Section 11; thence along the said North line of the South 1/2 of the Northeast 1/4 of said Section 11 North 89°59'29" East 415.00 feet; thence leaving said North line South 370.80 feet, more or less; thence South 23°31'52" East 576.00 feet to the true point of beginning, in Lane County, Oregon, TOGETHER with the Southerly ½ of said private road, being a strip of land 20 feet in width lying adjacent to and Southerly of the above described centerline.

Exhibit F

Property 5

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence along said 1/4 line N0°16'18"E 553.97 feet; thence leaving said 1/4 line S89°43'42"E 822.67 feet to a point on the centerline of a private road (RR Baker Rd.) described in deed recorded on March 6, 2014, as Instrument No. 2014-007870, Lane County Oregon Deed Records; thence along said centerline S4°00'00"E 202.97 feet; thence S34°00'00"W 260.00 feet; thence S74°30'00"W 290.00 feet; thence S45°00'00"W 75.00 feet; thence S11°00'00"W to a point on the North line of said Claim No. 40; thence Westerly along said Claim line to the point of beginning in Lane County, Oregon, TOGETHER with the East ½ of said private road, being a strip of land 20 feet in width lying adjacent to and East of the above described centerline.

ALSO: All of the remainder of the private road (being a strip of land 40 feet in width) extending from the above mentioned intersection of the centerline thereof with the Northerly line of said Claim No. 40 in a Southeasterly direction to the Northerly line of County Road No. 421 the centerline of which is more particularly described as follows: Beginning at the Southeast corner of Section 11, Township 18 South, Range 2 West of the Willamette Meridian; thence West 1199.5 feet and North 816.5 feet to an iron pipe set on the Northerly line of County Road No. 421 as now located through said Section 11, and marking the TRUE POINT OF BEGINNING; thence Northwesterly along said centerline the following courses and distances: North 0°30' West 470 feet; North 12° West 75 feet; North 26° West 75 feet; North 52° West 75 feet; West 200 feet; North 74° West 145 feet; South 77° West 590 feet; North 89° West 75 feet; North 37° West 75 feet and North 11° East to its intersection with the North line of said Claim No. 40 and the most Southerly point on the centerline of the private road as described above.

ALSO: A strip of land 20 feet in width lying adjacent to and East of the East line of said 40 foot private road and extending 224 feet Northerly from the intersection of the East line of said 40 foot private road with the Northerly line of County Road No. 421 (being 40 feet in width).
Commencing at a Lane County Brass Cap monument marking the Northwest corner
of the John Wallace Donation Land Claim Number 40 in Township 18 South, Range 2
ALSO: Commencing at a Lane County Brass Cap monument marking the Northwest corner of the John Wallace Donation Land Claim Number 40 in Township 18 South, Range 2 West, Willamette Meridian; thence along the north line of Donation Land Claim Number 40, North 89°54'43" East a distance of 2051.55 feet to a 5/8" rebar with a yellow plastic cap marked "D.W. Baker PLS 1978" on the North-South centerline of Section 11, Township 18 South, Range 2 West, Willamette Meridian and the TRUE POINT of BEGINNING; thence leaving the North-South centerline of Section 11and continuing along the north line of Donation Land Claim Number 40, Nortih 89°54'43" East a distance of 365.26 feet to the point of intersection of the North line of Donation Land Claim Number 40 and the westerly boundary of a 40 foot wide private road (commonly known as R.R. Baker Road); thence along the westerly boundary of said private road and along the arc of a 95.00 foot radius curve left (chord bears South 30°56'728" West 61.34 feet) an arc distance of 62.46 feet to a point marked by a 1/2" iron pipe set in County Survey File Number 17663 (record calls 5/8" iron pin); thence leaving the westerly boundary of said 40 foot private road and along the north boundary of the property described in a Warranty Deed recorded July 6, 1998 on Reel 2438R, Instrument No. 9852390, Lane County, Oregon Official Records, North 87°20'48" West a distance of 334.35 feet to the intersection of the North-South centerline of Section 11 and said north boundary, as described on Reel 2438R, Instrument No. 9852390, Lane County, Oregon Oficial Records, said intersection point being marked by a found 6" x 6" x 18" Stone set on the North-South centerline of Section 11 in County Survey Number 1102; thence along the North-South centerline of Section 11, North 0°16'18" East a distance of 36.63 feet to the TRUE POINT of BEGINNING, all in Lane County, Oregon.

Exhibit B

Property 1

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence Northerly along said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe set on the centerline of a private road, being the TRUE POINT OF BEGINNING; thence Southwesterly along the center of the private road the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51°30' West 564 feet; South 60° West 372 feet; North 89°30' West 85 feet; thence leaving said centerline N23°31'52"W 576.00 feet; thence North 370.80 feet, more or less, to the said North line of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the said North line of the South 1/2 of the Northeast 1/4 of said Section 11 to the true point of beginning, in Lane County, Oregon, TOGETHER with the East ½ of said private road, being a strip of land 20 feet in width lying adjacent to and Easterly of the above described centerline.

Exhibit C

Property 2

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence Northerly along said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe; thence Southwesterly the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51°30' West 564 feet; South 60° West 372 feet; and North 89°30' West 85 feet to the TRUE POINT OF BEGINNING; thence continuing North 89°30' West 470.00 feet; thence South 86° West 75.00 feet; thence leaving said centerline North 43°50'00" West 144.62 feet; thence North 795.65 feet, more or less, to the said North line of the South 1/2 of the Northeast 1/4 of said Section 11; thence along the said North line of the South 1/2 of the Northeast 1/4 of said Section 11 North 89°59'29" East 415.00 feet; thence leaving said North line South 370.80 feet, more or less; thence South 23°31'52" East 576.00 feet to the true point of beginning, in Lane County, Oregon, TOGETHER with the Southerly ½ of said private road, being a strip of land 20 feet in width lying adjacent to and Southerly of the above described centerline.

Exhibit D

Property 3

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian, with the North line of the James A. Wallace Donation Land Claim No. 40, of said Township and Range; thence along said 1/4 line N0°16'18"E 1204.00 feet to the TRUE POINT of BEGINNING; thence continuing along said 1/4 line N0°16'18"E 1209.50 feet, more or less, to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence along the North line of said South 1/2 of the Northeast 1/4 of said Section 11 N89°59'29"E 426.27 feet; thence leaving said North line of the South 1/2 of the Northeast 1/4 of said Section 11 South 795.65 feet, more or less; thence S43°50'00"E 144.62 feet to a point on the centerline of a private road (RR Baker Rd.) described in deed recorded on March 6, 2014, as Instrument No. 2014-007870, Lane County Oregon Deed Records; thence leaving said West line and along said centerline S69°00'00"W 75.00 feet; thence S41°00'00"W 75.00 feet; thence S14°00'00"W 75.00 feet; thence S16°00'00"E 75.00 feet; thence S31°00'00"E 97.34 feet; thence leaving said centerline N89°43'42"W 465.60 feet to the point of beginning, in Lane County, Oregon, TOGETHER with the Easterly 1/2 of said private road, being a strip of land 20 feet in width lying adjacent to and Easterly of the above described centerline.

Exhibit E

Property 4

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian, with the North line of the James A. Wallace Donation Land Claim No. 40, of said Township and Range; thence along said 1/4 line N0°16'18"E 553.97 feet to the TRUE POINT OF BEGINNING: thence continuing along said 1/4 line N0°16'18"E 650.03 feet; thence leaving said 1/ 4 line S89°43'42"E 465.60 feet to a point on the centerline of a private road (RR Baker Rd.) described in deed recorded on March 6, 2014, as Instrument No. 2014-007870, Lane County Oregon Deed Records; thence along said centerline S31°00'00"E 677.66 feet; thence S4°00'00"E 71.03 feet; thence leaving said centerline N89°43'42"W 822.67 feet to the point of beginning, in Lane County, Oregon, TOGETHER with the Easterly 1/2 of said private road, being a strip of land 20 feet in width lying adjacent to and Easterly of the above described centerline.

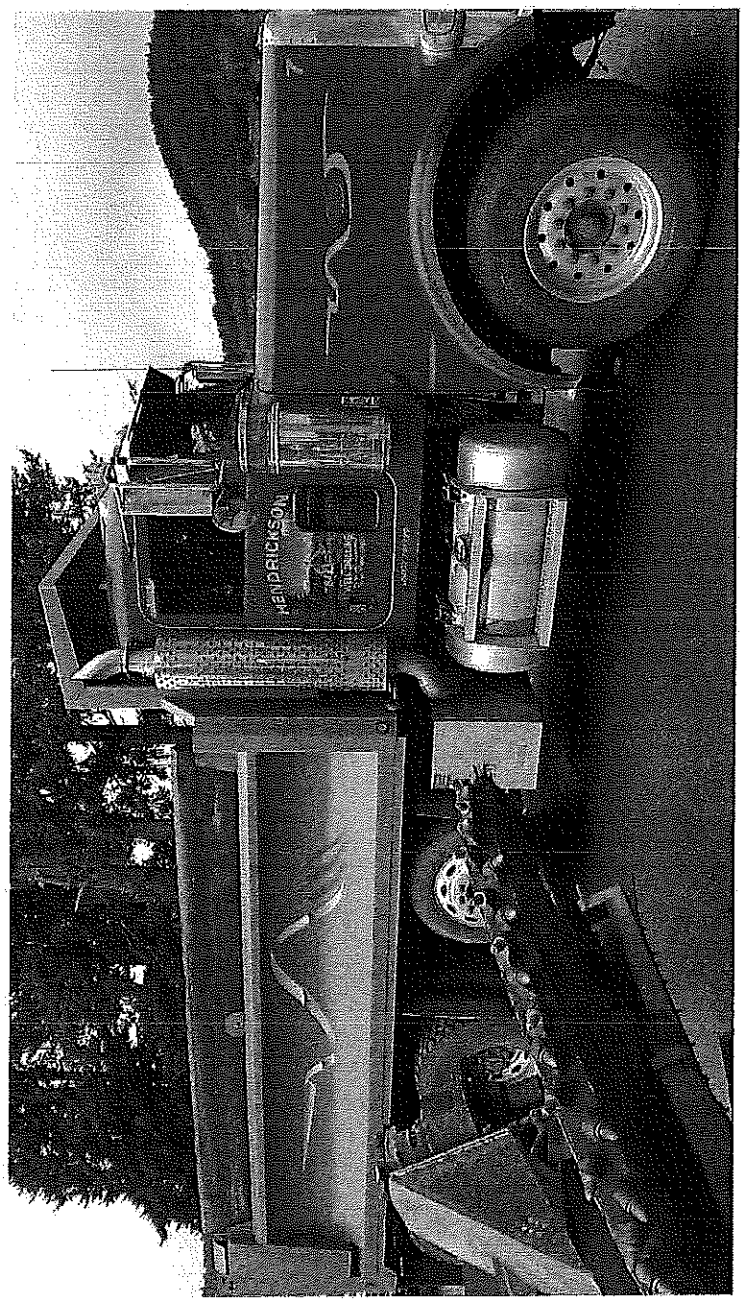
Re: R. R. Baker Road reconstruction

December 5, 2019

Dear Jim:

I understand from our conversation that the Appellants in the two Special Use Permit applications you are processing, PA19-05298 and PA19-05299, have suggested some question as to our capability to complete the modifications proposed for R. R. Baker Road. You indicated some concern was voiced over the name of our business, Hendrickson Well Drilling, and how our business might be in the road construction business.

Hendrickson Well Drilling originally was established in 1991 as Hendrickson Construction and Well Drilling. We had purchased a well drilling operation from Tom May and incorporated it into our general construction work which included road excavation, site preparation, land clearing, crushing, trucking and general contracting. Shortly after we organized another contractor started in business in the Springfield area doing business under the name "Jeff Hendrickson Construction." We were totally unrelated to that business, though my first name is Jeff. Confusion followed and we repeatedly were being contacted by customers and suppliers of Jeff Hendrickson Construction. Eventually it became clear something had to change and we dropped the word "Construction" from our business name about 1995. Suffice to say my life became a bit easier with that change.



For approximately 25 years we have operated as Hendrickson Well Drilling. We operate two crews, one that does well construction and pump placement, the other crew is primarily involved with general excavation work to include drilling and blasting, crushing, road construction, grading, site excavation, septic system construction and general contracting. For whatever purpose you may choose to use them I have included a few photographs of some of our equipment. I think you will acknowledge our equipment certainly extends outside that usually found with well drilling companies.

I want to reiterate, our company is prepared to complete the reconstruction of R. R. Baker Road to include the widening of the improved road surface and the construction of the turn-around points as they are depicted in the road plan you have provided for us.

Thank you for the opportunity to clear up any questions about our company.

Sincerely,

Jeff Hendrickson, Owner

HENDRICKSON

LAND CONSERVATION AND DEVELOPMENT COMMISSION
ACKNOWLEDGMENT OF COMPLIANCE

Lane County
and
Rural Portion of Eugene/Springfield Metro Plan
Goal 2--Nonresource Lands, Goal 5, Goal 15

Response from Denial Order of November 6, 1981
and from Continuance Order of November 6, 1981

DATE RECEIVED:
March 15, 1984

DATE OF COMMISSION ACTION:
August 17, 1984

REQUEST

The County has requested that its comprehensive plan and implementing measures be acknowledged as in compliance with the Statewide Planning Goals for areas outside adopted urban growth boundaries. Also, the County and the Cities of Eugene and Springfield request acknowledgment of compliance for the rural portions of the Eugene/Springfield Area General Plan.

SUMMARY OF RECOMMENDATIONS

Staff

Recommends the Commission continue Lane County's request to allow amendments to the plan to comply with Statewide Planning Goals 2, 5, and 15. The Commission should hear testimony on these issues July 19, 1984, but not take final action until the August hearing.

Recommends the Commission continue the request to allow amendments to the Eugene/Springfield Metro Area General Plan under Goals 2, 5, and 15. The Commission should not take final action on this until the August Commission hearing.

FIELD REPRESENTATIVES: Bob Rindy/Glen Hale (Coastal)

LEAD REVIEWERS: Mike Rupp (Goals 2--Nonresource Lands
Claire Puchy (Goals 5 and 15)
Phone: 378-4926

COORDINATOR: Gary Darnielle
Phone: 687-4283

Date of Report: July 19, 1984

GOAL 5: OPEN SPACES, SCENIC AND HISTORIC AREAS, AND NATURAL RESOURCES

This Goal 5 report is divided into two major parts. The first part is the review for all areas of Lane County outside the Metro Plan Boundary. The second part is for those areas inside the Metro Plan Boundary, but outside the Metro Area UGB.

PART I--AREAS OUTSIDE THE METRO PLAN BOUNDARY

Introduction

All Goal 5 resource categories are applicable to Lane County, and are addressed in separate subsections of this report.

According to Section 660-16-025 of the Goal 5 Administrative Rule (OAR 660-6-000 through 660-16-025), the Goal 5 Rule requirements apply to jurisdictions under denial orders as of the date the adoption of the Rule (June 1981). Lane County was issued a denial order in March of 1981. Therefore, the Goal 5 Rule has been used during this review for purposes of judging compliance.

In the following discussion, the numbers and letters in parentheses refer to sections of the Goal 5 Administrative Rule (e.g., (1A), (1B), (1C), (2A), (3A), (3B), (3C)). It should be noted, however, that these are the citations used by the Commission in its June 1981 adoption of the Rule. Since that time, the Secretary of State's office has recodified the Rule and has assigned different numbers and letters to its various subsections. The references in this report are to the Commission's 1981 version, since it is the one with which most readers are familiar. A copy of this Rule is attached to this report for reference.

Goals 16 and 17 establish more specific inventory and protection requirements for some Goal 5 resources that are located in estuarine or coastal shorelands areas.

Lane County's plan and implementing measures were acknowledged as being in compliance with the Coastal Goals in July, 1983. Therefore, this Goal 5 review does not address the following Goal 5 resources in those areas:

	Addressed Under	
Goal 5 Resource	Goal 16	Goal 17
Open Space	X	
Mineral and Aggregate Resources		
Energy Sources		

Fish and Wildlife	X	X (only "riparian," "major marshes and significant wildlife habitats")
Ecologically Significant Natural Areas	X	X
Scientifically Significant Natural Areas	X	
Outstanding Scenic Views and Sites		X (where the quality is primarily derived from or related to the association with coastal water areas)
Watersheds		
Groundwater Resources		
Wetlands	X	X (only "major marshes," "significant wildlife habitat," and wetlands with "exceptional aesthetic quality")
Historic/Archaeological Sites		X
Wilderness	X	X
Oregon Recreation Trails		
Wild and Scenic Rivers and Waterways		

Land Needed or Desirable for Open Space

Inventory

Lane County's Recreational Resources Working Paper contains a section addressing open space (pp. 4-5). The County discusses the various kinds of open space, and the benefits of preserving open space. The County indicates that it considers "all lands designated for agricultural or forest use, or for other clearly similar resource-production use" to be open space (p. 5). Additionally, the County concedes that recreational

areas, including parks, and significant or scientific natural areas also contain open space qualities. Because of "its broad nature, open space is not mapped as a site-specific, separate resource item. Instead...other designations with open space qualities are mapped..." (p. 5). Please refer to the Goal 3, 4, 9, 15 and other Goal 5 portions of this report for more detailed information about Lane County's inventories of lands possessing open space values. See also the July 1983 staff report adopted by the Commission for a discussion of compliance with inventory requirements of Goals 16-18.

Policies

Lane County has adopted one policy which addresses open space resources, per se (Open Space and Scenic Areas Policy 1, Plan, p. 16):

> Lane County has determined that all resource lands in the County are also open space lands. Resource related activities shall predominate on these lands. Where proposals are developed land uses are made consistent with the Comprehensive Plan and Statewide Goals, development standards shall be applied which minimize loss of open space.

In addition, the County has adopted numerous policies regarding agricultural and forest lands, a variety of Goal 5 resources which possess open space values, the Willamette Greenway recreation areas, and coastal resources. Please refer to the Goal 3, 4, 8, 15 and remaining Goal 5 sections of this report for details. See also the July, 1983 Commission action for a discussion of policies addressing Goals 16-18.

Implementing Measures

As noted in the Goal 3 and 4 sections of this report, Lane County has several resource zones which it has applied throughout the County. It has also adopted and applied a Greenway Permit ordinance to lands within the Willamette Greenway (see the Goal 15 section of this report for details). However, these Goals have not yet been fully satisfied, nor have some Goal 2 exceptions been justified. Several coastal zones have been developed and applied in coastal shorelands, estuarine, and beaches and dunes areas (see the July, 1983 staff report adopted by the Commission regarding compliance with Goals 16-18).

Finally, as noted in the remaining subsections of the Goal 5 section of this report, the County has adopted several implementing measures for the protection and/or resolution of conflicts with Goal 5 resource sites containing open space values.

In particular, the County has adopted a Natural Resource Zone (NR-RCP) (Lane Code, Section 16.213), which is intended to protect areas having unique and irreplaceable natural resources which are vital elements for a safe, healthful and pleasant environment for human life. The Natural Resource Zone states that it may be applied to public and private lands where the Rural Comprehensive Plan requires natural resource site

protection, but that the zone is not intended to be applied to other types of resource land, such as agricultural land and forest land. This is not to say, however, that the Natural Resource Zone cannot be applied to agricultural and forest lands. If a Goal 5 resource site is located on agricultural or forest land, Natural Resource zoning will be applied after an analysis of the ESEE consequences of conflicting uses has been completed demonstrating the appropriateness of Natural Resource zoning (confirmed by Jim Mann, Senior Planner, personal communication, June 20, 1984).

Emphasis of the Natural Resource Zone will be placed on limiting and regulating human activity in areas where:

(a) The acceptable water quality of streams, lakes, estuaries of the ocean may be endangered;
(b) Watersheds and their streams or lakes are used for domestic water supplies;
(c) Vegetative cover is essential to maintain soil stability and prevent erosion;
(d) Natural conditions are vital for either unique vegetative ecosystems, aquatic or wildlife habitat; and
(e) Scenic quality or vistas or open space is unique and/or irreplaceable.

In the NR Zone, the following uses are allowed outright (Section 16.213(2):

(a) The following recreational facilities and uses owned by a governmental agency of a nonprofit community organization limited to day use.

(i) Exhibitions of the natural conditions of shorelands, dunelands, forested areas, streams and lakes, marshlands, or similar areas of unique and irreplaceable value, and the vegetation and wildlife supported by such lands and waters provided that in no event shall such activity destroy, or endanger the relationships between the natural conditions being exhibited.

(ii) Picnicking areas, day parks and playgrounds.

(iii) Accessory facilities for outdoor recreation activity such as fishing, clam digging and hunting (provided such activity is conducted only in those areas allowed pursuant to Federal, State and Local fish and game regulations) and hiking and horseback riding.

(b) Fish and wildlife habitat management and the propagation of fish and wildlife.

Single family dwellings or mobile homes for residential purposes for a watchman, caretaker or operator in conjunction with a permitted use, in the NR Zone above, are considered "Special Uses" subject to approval by the Planning Director (Section 16.213(3)). The following "Special Uses" are subject to approval by a Hearings Officer (Section 16.213(4)):

(a) Piers and boat houses.
(b) Single-family dwelling or mobile home and accessory structures.
(c) Farm uses as defined by ORS 215.203(2), and any accessory uses.
(d) Forest uses and any accessory uses.

Uses in Section 16.213(4) above are subject to compliance with the following conditional use criteria (Section 16.213(5)):

(a) (i) Evidence is provided supporting reasons why the proposed use should be sited in a natural resource area.
(ii) That the proposed site is on land generally unsuitable for natural resource uses.
(b) That the proposed use will not significantly impact natural resource uses on adjacent and nearby natural resource lands, and will not significantly impact natural resources on the site of the proposed uses;
(c) That the proposed use will not significantly increase the costs of natural resource management on adjacent and nearby resource lands;
(d) That the site is limited in size to that area suitable and appropriate only for the needs of the proposed use;
(e) That, where necessary, measures are taken to minimize potential negative impacts on adjacent and nearby NR zoned lands, and these measures may be established as conditions of approval; and
(f) That the proposed use is consistent with the policies contained in the Rural Comprehensive Plan and the purpose of the NR zone.

Property development standards for all uses allowed in the NR Zone are set forth in Section 16.213(6) and include setbacks from front, side and rear yards.

Specific application of the Natural Resource Zone is discussed in the other Goal 5 sections of this report. A review of the County's zoning maps indicates that the NR Zone has been applied to a number of Goal 5 areas in the County.

Section 16.215 of the Zone Code is the County's Park and Recreation (PR-RCP) zone which has been applied to a number of sites in the County. The zone permits a number of recreational uses outright and conditionally. However, as noted in the Goal 2 Section of this report, the PR Zone allows a number of uses which could conflict with the purpose of the zone. Some of these uses could also conflict with a number of

Goal 5 resources including open space. This issue is dealt with in the Goal 2 portion of this report.

Conclusion--Open Space

Lane County has not inventoried any specific open space areas, per se. However, it considers farm and forest lands, recreation areas as well as natural areas to possess open space values. These have been inventoried as part of other Goal requirements. The County has a policy recognizing all resource lands as open space lands and indicating that resource-related activities shall predominate in these areas. Open space loss will be minimized where development is proposed, according to the County's policy. Resource zoning has been applied to most of the County, along with special zoning districts which help protect open space (e.g., Willamette Greenway, Natural Resource Zones).

Mineral and Aggregate Resources

Inventory

Lane County's inventory of mineral and aggregate resources is contained in its Mineral and Aggregate Working Paper.

Mineral Resources: The Working Paper addresses the following minerals: clay, copper, lead, gold, zinc, silver, mercury, antimony, arsenic, tourmaline, molybdenum, and pumice (pp. 3-5). The general locations of these mineral deposits are shown on a map (Appendix A), and are concentrated in four main areas: Hobart Butte, Bohemia, Fall Creek, and Blue River. The locations of these four areas are shown on the map as well. Information about the general quality, and quantity of these resources is provided. The County has not provided information on the location, quality, and quantity of specific sites, however.

Aggregate Resources: Lane County inventoried its aggregate supplies by examining permit lists from the Department of Geology and Mineral Industries and the Division of State Lands, by conducting telephone searches, taking on-site tours of aggregate-producing areas; and by talking with industry representatives (p. 6). The locations of 30 identified sites appear on a map in Appendix C and are listed by legal descriptions and tax lot numbers in Appendix D. A more extensive list of all tax parcels having any record of previous aggregate extraction is included in Appendices E and F. Appendix D is considered the County's (1C) inventory for lands outside the Metro Planning Area. Appendix E is the (1B) inventory for lands inside the Metro Area. Appendix F is the (1B) inventory for lands outside the Metro Area (confirmed by Mike Copely, Lane County Planner, personal communication, July 16, 1984).

Information on quantity of (1C) sites is presented in cubic yards, but the County cautions that the accuracy of this information is limited. In many cases, individual suppliers had only a cursory knowledge of the extent of their resources (p. 7). Quality of the supplies was not evaluated, due to time and budget constraints as well as the variability of resource materials.

Supply estimates were compiled by region (there are four regions in the County) and then coupled with demand estimates for each region in order to assess localized needs and supply/demand situations (p. 7). Demand forecasts were based on population projections and a per capita consumption figure of 22 tons annually (p. 7). Based on these estimates, cumulative demands for each region were projected. This analysis shows that existing supplies will be sufficient to satisfy demand to the year 2000. This will be particularly true if actual population growth rates are on the low side of the estimates. The available supply for the non-metropolitan area of the County is about three times the figure for projected consumption even when assuming the high population projections (p. 8). However, in terms of the supply/demand situation for each region, the margin of supply over demand for the southern section is relatively small. This is true also (but less so) for the western region. Also, the Metro Area will use some of the County supplies. Similarly, 5 to 10 percent of the U.S. Forest Service and BLM needs are supplied by the private market (p. 9).

Conflicting Uses/ESEE Consequences Analyses

Mineral Resources: Lane County reports that most of the mineral areas are on public lands (either the BLM or U.S. Forest Service). As such, federal laws govern prospecting, claims, and mining activities. Current forest resource designation and zoning for these areas "do not appear to preclude their development potential. Forest management and mining activities are considered to be compatible activites by most authorities" (p. 5).

Aggregate Resources: Each of the 30 inventoried sites was evaluated in terms of the following potential conflicts:

1. Areas of significant natural value contained in the Oregon Natural Heritage Program inventory;
2. Historical resources contained in the Working Paper on Historical Resources;
3. Willamette Greenway;
4. Park and recreation sites contained in the Lane County Parks and Open Space Master Plan;
5. Sensitive fish and waterfowl habitat identified in the Working Paper on Flora and Fauna; and
6. Existing or planned residential development.

Appendix J summarizes the results of the County's analysis. No conflicts were noted for any of the sites. Sites were not evaluated in terms of conflicts with agricultural or forest lands, since all of the sites are existing sites and therefore no longer available for these uses (p. 10).

Policies

A number of mineral and aggregate resources policies have been adopted (Plan, pp. 13-14). These include:

1. Known mineral resource sites within the County, which include those identified in Appendix "D" of the "Mineral and Aggregate Resources Working Paper," shall be conserved for both present and future uses through the application of Plan designations and compatible land use regulation measures. Such designation and regulation is to follow the requirements of the Goal 5 rule (OAR 660-16-000 through 660-16-025), which is addressed in Appendix "J" of the "Mineral and Aggregate Resources Working Paper."

2. Exploration for mineral resources (in contrast to actual mining) shall be a permitted activity in the rural portions of the County. Areas designated primarily for residential purposes are to be excluded from this policy as are areas that, having undergone analysis in accordance with OAR 660-16-000, are designated as having some unique natural, historical or cultural value. Exploratory drilling for gas, oil or other hydrocarbons is not within the scope of this policy.

3. Mining operations are regulated by state and federal government agencies. County regulations shall supplement these actions only as necessary to ensure compatibility in the area, or to protect other resources.

4. Conserve and manage land, soil and mineral resources by respecting their physical limitations and environmental assets.

5. Update, in cooperation with local aggregate operations, federal, state and local agencies, past sand and gravel inventories to ensure supply/demand information is current.

6. Protect aggregate deposits from encroachment of incompatible uses and ensure that aggregate material in close proximity to its point of use will be available when needed.

7. Present and future land use controls shall be implemented to allow for the discovery of new mineral and aggregate resources when it is demonstrated that the projected demand for those resources in a given area will exceed available supply and conflict with adjacent uses can be minimized. Conflict analysis and resolution shall follow the methodology set forth in Appendix "J" of the Working Paper: Mineral and Aggregate Resources; however possible impact on agricultural lands, forest lands and residential

development (existing or planned) must also be considered. For sites within the Willamette Greenway or near Goal 5 inventoried resources, notification of the potential conflict shall be sent to the appropriate body (e.g., Pioneer Museum, Oregon Department of Transportation, Oregon Department of Fish and Wildlife, etc.).

8. Encourage farm and forestry use of aggregate land prior to extraction; minimize negative environmental impacts during extraction; require reclamation after extraction which is compatible with adjacent uses.

9. Lane County shall apply the appropriate district (SG, SG/CP, /QM) to the sites listed in Appendix "J" of the Mineral and Aggregate Working Paper. Those sites with potential conflicts shall be placed in the SG/CP or QM/SR Districts.

10. Sites for which not enough information is presently available to determine quality, quantity and conflicts with other uses which include those sites listed in Appendix "F" of the "Mineral and Aggregate Working Paper," shall be considered "Significant" in terms of OAR 660-16-000 through 660-16-025, but requiring that the Goal 5 evaluation process be delayed (the "1B" option). At such a time as it is clear that these sites will be needed within the County's advance framework, they shall be evaluated per the Goal 5 rule including conflict analysis and implementation of protective measures. Such evaluation will take the form of Plan amendment or revision studies. Notwithstanding the above schedule, all "1B" sites will be evaluated within five years of the date of this Policy adoption. These sites are included herein as Goal #5 Mineral and Aggregate Exhibit A.

11. Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with section C.3.i. of the Goal. Major adverse effects of extraction on water quality, fish and wildlife, vegetation, bank stabilization, streamflow, scenic quality, noise and safety are to be minimized, and such values reclaimed where possible. The provisions of the Lane County Willamette Greenway Plan and implementing regulations shall be used to this purpose.

Policy 11 above indicates that significant fish and wildlife habitat areas in the Greenway shall be protected in accordance with Section C.3.i. of Goal 15. Section C.3.i. requires that aggregate extraction be allowed only when "subject to compliance with local regulations designated to minimize adverse effects on water quality,

fish and wildlife, vegetation, bank stabilization, streamflow, visual quality, noise, safety and to guarantee necessary reclamation" (emphasis added). The Goal standard for significant fish and wildlife habitat areas, however, is stronger. It is spelled out in Section C.3.d. of Goal 15, rather than simply Section C.3.i. (This is also addressed in the Goal 15 section of this report).

Implementing Measures

Lane County has adopted a Quarry and Mine Operations Combining (/QM-RCP) Zone to protect major deposits of minerals, rock, and related material resources, and to resolve conflicts with surrounding uses (Lane Code, Section 16.216).

The Quarry and Mine Operations Combining Zone shall be available for use by the County for new or existing operations when requests are received as part of an areawide or legislative rezoning, or a specific property or quasi-judicial rezoning. When property under consideration of /QM zoning is in close proximity to existing and planned uses potentially incompatible with /QM uses, the application of the zone may be limited to a specific portion of a property in order to encourage the compatibility and proper management of land uses.

The Quarry and Mine Operations Combining Zone is intended to be applied only to those operations which have been evaluated through the Goal 5 Administrative Rule process. Other quarry and mining operations of short-term or intermittent duration should be provided pursuant to the special use provisions of the various zones.

In the Quarry and Mine Operations Combining Zone, the following types of buildings and uses are permitted, subject to the provisions of the Quarry and Mining Operation Reclamation Permit and exceptions set forth in the code (Section 16.216(4)).

(a) Uses permitted in the parent zone with which the /QM zone is combined.
(b) Extracting and storing of minerals, including equipment and materials necessary to carry out these functions.
(c) Plants for the processing of minerals from quarry and mine extraction operations.
(d) Sale of products generated from the quarrying and mining operation.
(e) Activities pemitted as part of the reclamation process provided for in the Reclamation Plan.
(f) Structures an buildings used in conjunction with the extracting and storing of minerals.

The zone requires that a surface mining permit first be obtained from the Department of Geology and Mineral Industries (Section 16.216(5). Section 16.216(6) sets forth blasting notice and records requirements.

Section 16.217 of the Lane Code is the County's Sand, Gravel, and Rock Products (SG-RCP) Zone. The SG Zone "shall only be applied to those sites which have been evaluated consistently with the Statewide Planning Goal No. 5 Administrative Rule conflict resolution process (Sec. 16.217(4)). In the SG-RCP Zone, sand and gravel operations are permitted subsequent to the following restrictions: For any property designated in the Eugene-Springfield Metropolitan Plan as significant in terms of OAR 660-16-000/025 and designated as '1B', a Goal 5 ESEE consequences analysis per the Goal No. 5 Administrative Rule must first be completed. If the landowner and County do not agree on the method to achieve the Goal, the matter shall be forwarded to the Hearings Official for processing consistent with LC 16.100.

A number of uses are allowed in the SG-RCP Zone when conducted in conjunction with a sand and gravel operation (Sec. 16.217), including asphalt paving-mix plant and accessory buildings; cement concrete batching plant; aggregate products fabrication and sale; sand and gravel resource-related equipment storage yard, maintenance and storage buildings, offices and warehouses "appropriate to the uses permitted in this District"; retail or wholesale sales of products related to the use of sand, gravel and related products; agriculture, grazing or timber raising; dwellings for owners, operators or help required; and signs. The zone contains site improvement standards, as well as setback standards, cover, planting, drainage and topsoil standards, and operating standards.

The SG-RCP Zone establishes a Sand and Gravel Review Committee to determine if operating plans or revised plans comply with the requirements of the zone or with "a river plan which may be adopted by the Board." The committee is made up of the Planning Director, the Public Works Director, the Parks and Recreation Director, the Chief Sanitarian, the County Hydrologist, and the County Floodplain Specialist. The Review Committee is notified of all operating plans and revised plans, and has seven days to approve the plan or require modification of the plan.

It appears, from an examination of zoning maps, that the SG Zone has been applied to a number of sites that are not included on any plan inventory of (1C) sites. Yet, contrary to the zone's purpose statements, the County has not applied the Goal 5 process to these sites to justify SG zoning.

Section 16.218 of the Lane Code is the County's Sand, Gravel and Rock Products-Controlled Process (SG-CP-RCP) Zone. The zone is intended to provide more restrictive control of processing activities than the SG-RCP Zone (described above) for the protection of surrounding properties or for greater control over the location and operation of processing activities. The SG-CP-RCP Zone shall apply only to sites which have been evaluated via the Goal 5 Rule process (Sec. 16.216(3)).

The requirements of the SG-CP-RCP Zone are the same as in the SG-RCP Zone except that the Sand and Gravel Review Committee, in its evaluation of operational plans, must evaluate "the location for the erection or enlargement of all processing equipment and activities, including, but not limited to asphalt paving mix and cement concrete batching plants" according to the following "Operational Plan Approval Criteria":

(1) Conformity with the Rural Comprehensive Plan for Lane County.

(2) The location, size, design and operating characteristics of the proposed use:

(a) Will be compatible with and will not adversely affect the livability or appropriate development of abutting properties and the surrounding vicinity; and

(b) Will not be adversely affected by the development of abutting properties and the surrounding vicinity. (Consideration may be given to harmony in scale, bulk, coverge and density; to the availability of public facilities and utilities; to the harmful effect, if any, upon desirable neighborhood character, to the generation of traffic and the capacity of surrounding streets and roads; and to any other relevant impact of the use.)

(c) Will not be adversely affected by known natural hazards, such as floods, slides, erosion.

(d) Will not create a hazardous natural condition such as erosion, landslide, flooding.

Among the permitted uses in the F-1 Zone are (1) mining and quarrying and processing of rock permitted in accordance with the FPA for forest road construction or other forest related uses, or when used solely in conjunction with a farm use on which the mining or quarrying occurs, and (2) operations conducted for the exploration of aggregate or other mineral and subsurface resources (Lane Code, Section 16.210(2)(c) and (g)). Mining, quarry, and processing of mineral, geothermal and other subsurface resources; and rock mining, quarrying and processing which exceeds the standards in 16.210(2)(c), above, are allowed conditionally subject to a Hearings Official approval. Conditional use criteria in the F-1 Zone have been discussed in the Goal 4 section of this report.

In the F-2 Zone, mining, quarrying, and processing of rock for forest or farm road construction is permitted outright on the same tract as the mining or quarrying occurs (Sec. 16.211(2)(c)), as are operations for the exploration for aggregate or other mineral or subsurface resources (Sec. 16.211(2)(e)). The mining, quarrying, and processing of mineral and other subsurface resources; and rock mining and quarrying and processing that exceeds the standards in Section 16.211(2)(c), above are

considered Special Uses, subject to Hearings Official approval (Sec. 16.211(5)(d)). This is also the case for operations conducted for the exploration, mining and processing of aggregate or other mineral resources or other subsurface resources (Sec. 16.211(5)(k)). Criteria for permitting these uses are found in Section 16.211(6).

In the Exclusive Farm Use Zone, operations for the exploration, mining and processing of aggregate and other mineral resources or other subsurface resources are Special Uses, subject to Hearings Official Approval (Sec. 16.212(4)(b)).

Please refer to the Goal 15 section of this report for a discussion of the County's approach to mineral and aggregate sites located within the Willamette Greenway.

Objections

1. Oregon Department of Fish and Wildlife (ODFW), 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the sand and gravel plan and zone designations given to a site known as the Pudding Creek Heronry. Since this site is within the Willamette River Greenway, please refer to the Goal 15 section of this report for details about these objections.

2. 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the County's plan and zone designations for the Big Island (or Confluence) Heronry at the confluence of the McKenzie and Willamette Rivers. Inasmuch as this site is within the Willamette Greenway Boundary, the objections are presented in greater detail in the Goal 15 section of this report.

3. James Spickerman (on behalf of Leon Funke and Michael Horton) has objected to the zoning of farm lands for sand and gravel extraction and processing uses.

   a. Objectors are specifically concerned about the following parcels:

      17-03-06 TL 400, 500, 300, 201
      17-03-05 TL 300, 1500, 1300, 1900
      16-03-31 TL 901, 500 and 101

      The 455 acres in these parcels are primarily agricultural land and have been zoned SG-RCP according to objectors. Allowed uses include sand and gravel extraction as well as asphalt paving mix plant, concrete batching plant, aggregate products fabrication and sale, and retail or wholesale sales of products. The land was previously designated EFU. Objectors point out that in Westerburg v. Linn County, LUBA held that a Goal 2 exception to Goal 3 was required when a zone change was made from EFU to aggregate extraction and processing where the new zone permitted

manufacturing processes and activities. Objectors believe, therefore, that Lane County should have taken an exception prior to rezoning these parcels.

b. Objectors claim that the County applied SG zoning to parcel 16-03-31 Tax Lot 601 and 602 without the necessary ESEE consequences analysis of conflicts with Goal 3 uses and other Goal 5 uses. Objectors point out that the site has a "long history of documented conflict between the sand and gravel extraction use and adjacent agricultural and residential uses. Objectors further point out that in Olsen et al. vs. Scappoose Sand and Gravel Co., LUBA indicated that the Goal 5 Rule requires that, where conflicting uses have been identified, the Goal 5 resource site (e.g., mining) may itself have an impact on other uses and these impacts must be considered in analyzing the ESEE consequences.

c. Objectors believe that plan policies do not address the Goals adequately because there is no method set forth in the plan for Goal 5 conflict resolution analysis. The plan states that such analysis and resolution of conflicts shall follow the methodology in Appendix J of the Mineral and Aggregate Working Paper. Objectors, however, state that Appendix J contains no such methodology, but only a statement of conclusions regarding particular sites.

d. Objectors point out that the plan policies set forth no method to reconcile Goal 5 and Goal 3 conflicts (specifically, where agricultural soils are underlaid with aggregate resources).

e. Objectors claim that plan policies make no provision for ESEE analysis of conflicting Goal 5 uses.

f. Objectors claim that the plan does not comply with Goal 5 Guideline B9 which states:

> Areas identified as having non-renewable mineral and aggregate resources should be planned for interim, transitional and "second use" utilization, as well as for the primary use.

g. Objectors claim that, although a number of sites are to be considered under the (1B) process at a later date, the sites are not included on the plan inventory as a "special category," as required by the Goal 5 Rule.

h. Objectors believe the plan is not internally consistent. Specifically, objectors point out that EFU lands are zoned SG-RCP, but there is no basis for this in policies or in working papers. A number of parcels are zoned for sand and gravel extraction, but not all have been designated for such uses.

Objectors also point out that SG-RCP zoning is contrary to agricultural lands policies (to provide maximum protection for agricultural activities by minimizing activities that could conflict with such uses.

i. Objectors point out that no consideration is given to the effects of SG-RCP zoning on the groundwater resources of agricultural lands adjacent to the land designated SG-RCP.

Response to Objections

1. The response to the objections regarding the Pudding Creek heronry is presented in the Goal 15 section of this report.

2. The response to the objections regarding the Confluence Heronry is presented in the Goal 15 section of this report.

3. a. Objectors contend that sites 17-03-06, TL 400, 500, 300, 201; 17-03-05 TL 300, 1500, 1300, 1900; 16-03-31 TL 901, 500, and 1001 were all rezoned from EFU to S-G-RCP without an exception. Objectors cite Westerberg vs. Linn County as requiring this be done where the new zone permits processing activities. This was based on the fact that ORS 215.213 allows processing conditionally, but at the time of Westerberg vs. Linn County, "processing" did not include the batching and blending of aggregate. However, the 1983 Legislature changed the statutory definition of "processing" (ORS 517.750(9)) to include "crushing, washing, milling, screening as well as the batching and blending of mineral aggregate into asphaltic and portland cement concrete product . . .". Therefore, objectors are not correct in suggesting that a Goal 2 exception be taken for such sites. However, this is not to say that the Goal 5 Rule process does not apply. In the case of the parcels cited by objectors, this process has been completed for only 17-03-06 TL 400, 17-03-05 TL 300, 16-03-31 TL 901, and 16-03-31 TL 1001. The Mineral and Aggregate Working Paper (p. 10) indicates that, because these are existing operating sites, these sites are no longer available for agricultural use. No conflicts were found to exist for any of these four sites.

b. Objectors are correct that parcel 16-03-31 TL 601 has not been analyzed according to the Goal 5 process. Site 16-03-31 TL 602, however, is included as Site No. 21 in Appendix D of the County's Mineral and Aggregate Working Paper. No conflicts were found to exist with Site No. 21. Conflicts with agricultural uses for the site were not analyzed because the site is an operating site and it is assumed it is no longer available for agricultural use (Working Paper, p. 10). Objectors are correct, however, that the County did not address conflicts with adjacent agricultural and residential uses. This has not been required except when a new site or expansion of an existing site is

proposed. Policies 7 and 10 require Goal 5 analysis in such circumstances, including analyzing and resolving conflicts with surrounding uses.

c. Objectors are not correct that the County lacks a method for analyzing and resolving conflicts pertaining to (1C) mineral and aggregate resources in Appendix D. The County indicates that there are no conflicting uses for these sites, and therefore either the SG ,/QM or SG/CP zone will apply. It also indicates that sites with potential conflicts shall be placed in the SG/CP or QM/SR Districts (Mineral and Aggregate Policy 9). All (1B) sites require a full Goal 5 evaluation, including conflict resolution and plan amendments or revision studies before extraction activities are allowed, according to Mineral and Aggregate Policy 10.

Objectors are correct that Appendix J is a statement of conclusions about the conflicts with the 30 (1C) sites, and not a methodology for analyzing and resolving conflicts per se. However, the policy should be interpreted as requiring that the same methodology used in producing Appendix J will be used in future conflict/resolution situations (i.e., determining whether there are conflicts with other Goal 5, 8, and 15 resources, or with planned or existing development). The policy would also require consideration of possible impact or agricultural and forest lands in approval of any new site or expansion of an existing site.

d. Objectors are not correct that there is no plan policy method to reconcile conflicts on agricultural lands that contain aggregate resources for those (1B) sites in Appendix F. Specifically, Mineral and Aggregate Policy 10 requires a full Goal 5 Rule evaluation of (1B) sites. This will require a site-by-site analysis of conflicts (including those with agricultural lands), an ESEE consequences determination of those conflicts, and application of measures to resolve conflicts.

e. There is no specific Goal 5 requirement to adopt plan policies which require analysis of ESEE consequences of identified conflicting uses. Rather, such conflicts are to be resolved during the planning process, based on such an analysis which is to be incorporated into the plan. (The exception to this is for (1B) sites. Jurisdictions must adopt policies to apply all applicable steps of the Goal 5 Rule to such sites. Lane County has such a policy for its (1B) mineral and aggregate resources--Mineral and Aggregate Policy 10).

f. Guidelines do not carry the same weight as the Goals, and therefore, this objector's concern is not a Goal requirement. However, objectors do raise an important concern, and the County is urged to plan such sites for interim, transitional and "second" use.

g. Contrary to objector's statements, the County has placed its (1B) sites on a special category inventory--Appendix E and F of the Mineral and Aggregate Resources Working Paper. It also has expressed this in Mineral and Aggregate Policy 10.

h. Objectors are correct that some lands are zoned SG that are not on the (1C) inventory, nor has the Goal 5 process been applied to them to justify SG zoning rather than EFU, or some other zoning.

SG zoning for a particular site may be counter to the County's policy of providing maximum protection for agricultural activities by minimizing activities that could conflict with such uses. However, Goal 5 requires protection of mineral and aggregate resources. These Goal requirements must be balanced. This is done through the Goal 5 process. When analyzing the ESEE consequences of conflicting uses for a particular site, the requirements of other Statewide Goals must be considered and balanced against Goal 5 requirements.

i. Objectors have not provided information demonstrating how SG zoning will have an effect on groundwater resources of adjacent agricultural lands. Other state statutes require that this concern be addressed.

Conclusion--Mineral and Aggregate Resources

Lane County has inventoried its mineral and aggregate resources and has identified 30 specific aggregate sites which are considered (1C) sites. The amount of aggregate contained in these 30 sites is sufficient to satisfy the demand to the year 2000. The County indicates there are no conflicting uses with any of these sites, and has applied QM-RCP, SG-RCP, or SG-CP-RCP zoning to those sites. These zones assure that extraction can occur, subject to appropriate conditions regarding such things as setbacks, drainage, traffic and operation.

The County has identified a number of (1B) sites which will be evaluated according to the Goal 5 process (including plan amendments, where necessary), within the next five years.

A number of sites not in any plan inventory have been zoned for sand and gravel extraction, but have not been justified as such, based on an analysis of ESEE consequences of conflicting uses.

Energy Sources

Inventory

Lane County has adopted an Energy Working Paper which describes energy consumption and both conventional and alternative energy sources. Conventional sources includes electrical energy from seven utility

companies and natural gas and petroleum from out-of-state sources (pp. 7-15). Alternative sources include solar, hydroelectric, biomass, cogeneration, wind, and geothermal energy (pp. 15-29). Of these, the County considers only hydro power and geothermal sites to be site-specific (p. 39).

The Working Paper identifies eight dams currently generating power or having the potential to do so (p. 18), as well as eight existing nonpower dams with hydroelectric generation potentials exceeding 200kW (p. 18). Maps showing the general locations of these sites are on page 19 of the Working Paper. Information about the dam height, hydraulic head and capacity for each site is presented on page 18. Proposed dams with generation potentials exceeding 25MW and those with potentials between 200kW and 25MW are identified on page 21 of the Working Paper and mapped on page 22. Information about dam height (where known), hydraulic head, system head, and capacity is presented (p. 21).

Wind potential in Lane County is through to be highest along the Coast and Coast Range. Eugene Water and Electric Board (EWEB) and 19 public utilities operate an experimental windmill in the Coast Range north of Lane County, and PP&L operates a wind turbine near Coos Bay. Average wind speeds in Lane County, however are too low to power such windmills (p. 26).

There are two known Geothermal Resource Areas (KGRA's), both of which are in the eastern portion of the County on federal land. Both are under study by the Oregon Department of Geology and Mineral Industries (p. 29). The locations of the two KGRA's--Belknap-Foley KGRA and McCredie KGRA--are shown on Map 7 (p. 30). Information regarding their reservoir temperatures, mean reservoir volume, wellhead thermal energy and thermal power, and resource to land distance is presented in Table 11 (p. 31). The Energy Working Paper also describes the stages of geothermal energy development and discusses the constraints upon geothermal power generation (pp. 28-29). Although the potential for geothermal energy development in Lane County is "significant," further information is needed regarding its potential in the two KGRA's and the environmental impacts associated with such development (p. 29).

A cogeneration facility capable of producing 28,000 kilowatts of power exists at the Weyerhaeuser plant in Springfield, and another facility capable of producing 800 kilowatts is being installed in the Lane Plywood Company of Eugene (pp. 25-26).

The Working Paper disucsses the potential for biomass as an energy source in Lane County (pp. 23-25). There are two major sources--forest lands and farm lands. The potential for energy generation from these sources is great, but economic feasibility and environmental impacts are primary constraints to development of these sources at this time (p. 25).

Conflicting Uses/ESEE Consequences Analyses

General, non-site-specific conflicts are discussed for each of the major energy source categories identified (i.e., hydroelectric, biomass, solar, cogeneration, wind).

Regarding hydro sites, the County states:

> Maps have been presented illustrating a number of alternative hydro sites on various rivers in the County. Since these sites are, at present, in the proposal stage, it is premature to evaluate conflicting uses for each one, but the sites need to be acknowledged by designation on Plan Diagrams, and some effort made to ensure their availability when needed. Conflicting uses will be examined and resolved at such a time as the sites are actually being proposed for development; this could probably be done most efficiently as part of the elaborate permitting process hydro power must undergo before approved. In most cases, conflict resolution is a major factor in hydro development even through many of the sites are located on public land, or lands presently set aside for resource uses--especially timber lands. Existing resource-based zoning can do much to prevent them from being subjected to development if energy considerations are incorporated into the zoning requirements. In Goal 5 language, the "1B" option should be taken at this time (p. 39).

Regarding geothermal sites, the County indicates that because they are located on federal lands, they will have to go through a series of state and federal permit approvals. Zoning "only reflects the County's desire that the sites be protected from conflicting uses." Therefore, the County has not conducted an analysis of conflicting uses (p. 39).

Solar access does not appear to be endangered at this time in the rural areas. However, this is not the case in newly developing residential and commercial areas (p. 39).

Policies

Five Energy Resource policies have been adopted by Lane County (Plan, p. 17):

1. Lane County shall identify energy resource areas within the County and protect such areas through the use of existing ordinances and regulations. Such regulations shall address hydroelectirc, geothermal, and wind power sites.

2. Lane County shall encourage the exploration and development by other agencies of renewable energy resources such as geothermal, wind, biomass, hydroelectric and solar, and shall monitor such development to ensure that the development does not cause adverse effects within the County.

3. Lane County will use the work of the L-COG Committee on Energy, and its report, "Lane County Electic Energy Planning Program, Final Report (1983)" as a source of resource identification and site protection measures. This will supplement the County's own measure expressed in Policy and Zoning Statements.

4. The County shall protect the sites of hydroelectric resources through conditional or special use provisions of its resource zones. Sites for which a license has been applied for with federal and state authorities, or for which water impoundments of more than 100 acre-feet are proposed, or which will generate power in excess of 75KW, shall be shown on the Plan as a special designation, an Exception to applicable LCDC Goals taken if necessary, and a special zoning district applied. At that time, the Goal 5 rule conflict analysis shall also be carried out.

5. For additional energy policies see Goal 3.

Implementing Measures

Hydroelecric generating facilities with water impoundments of less than 100 acre-feet are allowed conditionally subject to Hearing Official approval in the F-1 and F-2 Zones (Lane Code, Sections 16.210(4)(g), 16.211(5)(g)).

A hydroelectric generating facility not exceeding 10 acres in size and located at an existing water impoundment which will not be increased in size because of the generating facility is also permitted conditionally (subject to Hearings Official approval) in the F-1 and F-2 zones (Section 16.210(4)(h), 16.211(5)(h)).

The conditional use criteria for approving or denying these hydroelectric facilities are those for other nonforest uses (Sec. 16.210(5)(a) through (f); 16.211(5)(f)(i) through (vi)).

Hydroelectric facilities having impoundments over 100 acre-feet are not permitted outright or conditionally in the Lane Code. Instead, the County shall analyze the conflicts per the Goal 5 Rule, take an Exception to the applicable Goal if necessary, and apply a special zone to those sites, as specified in Energy Policy 4.

As noted in the Working Paper, resource zoning will help prevent possible sites from being developed for other uses.

Conclusion - Energy Sources

Lane County has identified a number of potential energy sources, many of which are on federal land, and all of which are (1B) sites at this time. There is potential for hydroelectric developments on nonfederal land, but the County contends that it is premature to evaluate conflicting uses.

Nevertheless, the County has decided to allow small sites in its F-1 and F-2 Zones conditionally. Larger sites will require plan amendments, along with application of the Goal 5 Rule, exceptions to appropriate goals and possible development and application of a special zone. The County has adopted a policy commitment to this effect. In the meantime, resource zoning will help prevent potential sites from being lost to other uses. (See, however, the Goal 4 section of this report for a discussion of problems with the F-2 Zone.)

Fish and Wildlife Areas and Habitats

Inventory

Information about Lane County's fish and wildlife resources is contained in its Flora and Fauna Working Paper and the addendum to that working paper. Pages 5-10 describe in general each of the 11 major habitat types in the County, along with a discussion of the value of the habitat type to wildlife, and general location of each habitat type. These include:

1. Estuary and Bay
2. Inland Marsh
3. Wet Meadows
4. Lakes and Reservoirs
5. Riparian Vegetation
6. Annual and Perennial Grasslands
7. Coastal Shore Pine/Spruce
8. Douglas Fir/Trailing Blackberry
9. True Fir/Alpine
10. Deciduous Hardwoods
11. Agricultural Lands.

The County prefaces this material by stating that this information "is not considered an inventory and is not accompanied by maps. It is intended merely as background information."

The Working Paper and its addendum contain special sections addressing endangered, threatened, and special concern species, riparian and wetland areas, sensitive fish and waterfowl areas, and big game range. These are discussed separately below.

Endangered, Threatened and Special Concern Species: The Working Paper lists plants and animals which are threatened, endangered, or of special interest (pp. 11-12). Further information is provided for six of these species--northern spotted owl, northern bald eagle, wolverine, silverspot

butterfly, western snowy plover, and American osprey (pp. 12-13). This information does not provide location, quality, or quantity information on any specific habitat areas or sites. However, the County indicates that:

1. No spotted owl or bald eagle nests are known to occur on private property;

2. Wolverine habitat is in high elevation, remote areas and therefore in federal ownership;

3. Snowy plover habitat is within state jurisdiction.

4. Osprey nests are found throughout the County, although not in great numbers. The County indicates the ODFW maps show their locations, but these maps have not been adopted or submitted for review.

5. Silverspot butterfly habitat is found only "along a small section of the Oregon Coast." It is recognized in the Coastal Resource Management Plan of Lane County.

Lane County has indicated that Silverspot butterfly habitat occurs on federal land adjacent to the Big Creek (Reneghan) Exception Area as well as on the Renaghan property itself (Exhibit E--Renaghan Amendment, pp. 27, 31). It should be noted that the Exception document contains one statement (Finding 37e) on page 27 which appears to contradict this. Specifically, finding 37e states there are no sensitive species on the property, and that the Silverspot butterfly habitat is located on adjacent federal land only. The Exception document contains several other statements indicating that such habitat occurs in the northwest corner of the property.

The County provides no information at all regarding great blue heron rookeries or pigeon mineral springs, which are considered sensitive bird habitat areas by the Department of Fish and Wildlife. (The exception to this is for two rookeries in the Willamette Greenway. They are addressed in the Goal 15 section of this report.) The inventory of sensitive bird sites developed by ODFW and provided to the Department of Forestry (DOF) as part of a recent management agreement between those agencies, identifies 15 great blue heron rookeries, 21 osprey nest sites, three pigeon mineral springs, and at least one bald eagle nest site in Lane County, most of which are on nonfederal land. According to Flora and Fauna Policy 15, "currently known pigeon springs, heron and raptor (hawk, osprey, and eagle) nest sites. . . shall be placed in a '1B' category."

Riparian and Wetland Areas: Riparian lands are defined by the County as all lands along both banks of Class I streams in Lane County, to a setback line of 100 feet from ordinary high water (Addendum, p. 7).

The County indicates in its Flora and Fauna Working Paper (p. 16) that all lakes, reservoirs, and Class I streams in Lane County have been mapped, but were not included because of budgetary limitations. They are

available in the Planning Department offices. The Addendum to the Working Paper (p. 6) states that ODFW has provided maps of all Class I streams, as well as major significant wetland areas. Detailed maps are available for review in County offices, and a generalized summary map is included in the Addendum (p. 20).

The Flora and Fauna Working Paper discusses the values associated with wetlands and riparian areas for both fish and other wildlife types (pp. 14-15). The County notes that the U.S. Fish and Wildlife Service has identified a number of wetland types in its National Wetland Inventory. Currently, about half of the County has been mapped, enabling identification of major wetlands. These include:

1. Fern Ridge periphery, exclusive of parkland;
2. Old Long Tom River channel below Fern Ridge dam, including lands between it and new channel;
3. North Fork Siuslaw fresh-water marsh;
4. Maple Creek marsh;
5. Amazon Canal at its confluence with the waters of Fern Ridge Reservoir.

The County indicates that these areas are mapped in detail on the Plan Diagram maps. More specific location, quality, and quantity information for each of these five wetland areas is contained in the Working Paper Addendum (pp. 11-13).

The County has not inventoried a wetland south of Sutton Lake and east of Highway 101, or a Darlingtonia bog east of Florence. As noted in the 1983 Coastal Goals review of Lane County (p. 8), these wetland were to be addressed under Goal 5:

> The County notes there are only two Goal 18 resource areas east of Highway 101 which do not fall within the coastal shorelands boundary. They are two wetland habitat areas identified in the coastal resource inventory maps. The County should note that it will have to adequately address these two areas later under Goal 5 when it brings the remainder of the County plan into compliance.

The Darlingtonia bog is addressed in more detail in the Natural Areas section of this report.

Sensitive Fish and Waterfowl Areas: The County notes that this is a subcategory of the previous section, Riparian and Wetland Areas (p. 20). Maps have been provided the County by ODFW showing important waterfowl nesting habitat and streams that receive high use by anglers and/or game fish (p. 20), but were not submitted for review. A large-scale map is available in the County Planning offices (Addendum, p. 5). A

generalized, small-scale map is included on page 20 of the Addendum which shows the locations of important streams and stream reaches. A list of these specific reaches, by basin, is included in the Addendum (pp. 2-4). All identified areas are of high quality and are considered important (Working Paper, p. 21). The extent of riparian vegetation is described in the previous subsection of this report. The County notes that there are native anadramous fish runs in Big Creek within the Big Creek Exception Area (Exhibit E--Renaghan Amendment, p. 44). These include coho salmon, cutthroat trout and steelhead.

Big Game Range: The County notes that ODFW divides big game range in Lane County into three categories--Major, Peripherial, and Impacted. The Major Range supports the majority of big game and, in general, consists of sparcely developed commercial forest lands. Peripheral Range is generally located on foothill areas between commercial forest lands and valley floors. Peripheral Range supports substantial big game populations and serves as wintering areas for animals in severe winters. Impacted Range consists of those areas that have existing levels of development which preclude future wildlife management options for maintaining viable wildlife populations and recreational opportunity, although they frequently contain big game populations.

All three big game range areas are depicted on Lane County Wildlife Inventory Maps, according to the Flora and Fauna Working Paper (p. 23). However, these maps were not submitted for review because of budget constraints. They are available in the Planning Department Office (p. 23). The Working Paper notes that the highest quality big game range is in the Major Range because development is limited. Peripheral Range is important, but has enough development to limit big game use and managment options. Impacted Range is of the lowest quality because of existing development (p. 23). The County provides acreages for these three categories (p. 24).

The County recognizes major elk habitat on a portion of the Big Creek Exception site (Exhibit E-Renaghan Amendment, p. 52).

Conflicting Uses/ESEE Consequences Analyses

Endangered, Threatened and Special Concern Species: As indicated earlier, Lane County knows of no spotted owl or bald eagle nest sites on private land. Similarly, wolverine habitat is on federal land. The County notes that the State Parks Division of ODOT regulates vehicular uses in snowy plover habitat (Working Paper pp. 12-13). Specific conflicts with osprey nest areas are not identified, but the County notes that protective measures in riparian areas (e.g., Willamette Greenway permit requirements, coastal shorelands overlays, riparian and wetland area provisions) will resolve conflicts (Addendum, p. 15).

The Working Paper indicates that the Coastal Resources Management Plan of Lane County recognizes the Silverspot butterfly and applies a prime wildlife managment unit to its habitat (p. 13). Specific conflicts and ESEE consequences are not discussed in the Working Paper, however.

It should be noted that a portion of the critical habitat for the Silverspot butterfly is included in the Rock Creek Federal Wilderness Area, recently approved by Congress. Another portion of the habitat is located within the County's Big Creek Exception Area. That exception indicates that the applicant "will enter into contractual arrangements with the Siuslaw National Forest or Western Oregon State College to take whatever measures are necessary to mitigate any potential conflicts or adverse impacts associated with the development" (Exhibit E--Renaghan Amendment, p. 27). According to the Exception (p. 28), the U.S. Fish and Wildlife Service's Endangered Species Office indicates that this project will have not significant adverse impact on the Silverspot's habitat.

Conflicting uses and ESEE consequences analysis have not been conducted for sensitive bird habitat areas, since these resource sites have been placed in a (1B) category.

Inasmuch as the County failed to inventory a number of nonfederal sites as (1C) resource sites (e.g., great blue heron rookeries, pigeon mineral springs, bald eagle nest, osprey nests), the County has not identified conflicting uses or ESEE consequences of those conflicting uses with these sites. Information does exist for these sites, however, as indicated earlier, enabling the County to conduct such analyses.

Riparian and Wetland Areas: Two major activities conflict with riparian and wetland habitat areas, according to the County's Working Paper (p. 17)--destruction of vegetation for any purpose (e.g., forestry, agriculture, construction, recreation, aggregate extraction), and draining surface or subsurface water which then changes the vegetative structure and generally the habitat value. The County has developed separate ESEE consequence analyses for riparian lands and wetlands.

The riparian lands ESEE consequence analysis is further divided into three categories--(1) resource areas (forest and agricultural lands), (2) rural lands (partially or sparsely developed), and (3) developed and committed lands, including communities (Addendum, pp. 7-10). Based on these analyses, the County decided to develop a (3C) approach in order to limit conflicting uses. ODFW has recommended a 50 foot setback along all class I streams in rural development zones and a 100 foot setback in rural resource zones (Addendum, p. 10).

Separate conflicting uses/ESEE consequences analyses have been conducted for each of the five major wetlands identified (Addendum, pp. 11-13). Based on these analyses, the County has determined that areas owned by the Corps of Engineers (Fern Ridge Reservoir, part of Lower Long Tom, Amazon Canal) have sufficient protection, and furthermore, cannot be regulated by the County since they are in federal ownership. Areas under Coastal Resources Zoning (North Fork Siuslaw, Maple Creek Marsh) are also assumed to be adequately protected. A (3C) approach (e.g., Natural Resource Zoning) is appropriate for all other privately-owned areas (part of Lower Long Tom) (p. 13).

Sensitive Fish and Waterfowl Areas: Removal of riparian vegetation in identified sensitive areas is considered the major conflicting use with these resources (Working Paper, p. 21). The County notes that the ESEE consequences analysis is generally the same as that for riparian areas and wetlands, summarized in the previous section of this report (Working Paper, p. 21). However, the County indicates that since the sensitive fish and waterfowl areas are considered more valuable than others in the County, the effects of vegetation removal can be more significant (p. 21). Based on these analyses, Lane County has chosen a (3C) approach to protect riparian vegetation in such areas "whenever possible" (p. 22). The County notes that ODFW has recommended setbacks of 50 to 100 feet along waterways designated as sensitive fish habitat, plus natural resource zoning for wetlands not within that riparian strip (Addendum, p. 5).

Conflicting uses and ESEE consequences of conflicting uses with fish habitat in the Big Creek Exception Area are addressed on pages 54-56 of the Exception. Based on this analysis, the applicant will be required to protect the anadromous fish through development of a management plan and protection or riparian vegetation (pp. 27, 55).

Big Game Range: The primary conflict with big game range is identified as residential use at densities over one dwelling unit per 40 acres in Peripheral Range, and one unit per 80 acres in Major Range (Working Paper, p. 24). The County indicates that its 80-acre commercial timber zoning is very restrictive in terms of dwelling unit placement, and therefore, "it is unlikely that conflicts will occur" in Major Range areas (Addendum, p. 14). Similarly, the County believes its 40-acre zone will satisfy ODFW's recommended density in Peripheral Range (p. 14). Developed and committed exception areas are considered impacted, and the County has decided that conflicting uses should be permitted in those areas (p. 14).

The conflicts and ESEE consequences of conflicts with major elk habitat in the Big Creek Exception area are discussed on pages 53-54, and 56 of the Exception document. Based on this analysis, the applicant will be required to protect elk winter forage areas (p. 27) and to develop an elk managment plan (p. 32).

Policies

Lane County has adopted numerous policies regarding its fish and wildlife resources (Flora and Fauna Policies, Plan, pp. 14-16). These policies include the following:

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies are encouraged to work with landowners to conserve wildlife habitats.

5. Lane County shall investigate fee acquisitions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to protect Goal 5 resources.

6. Riparian vegetation along all Class I streams in the County is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Riparian lands shall be defined as the lands within 100 feet of ordinary high water on Class I streams, and shall be considered "Significant" "1C" areas (in the language of OAR 660-16-000/025); "3C" protection of the riparian resource shall be achieved through development setbacks and vegetation management regulations within the riparian strip. The setback distance will vary from 100 feet from ordinary high water in rural resource zones to 50 feet from ordinary high water in developed and committed areas; provided a means is made available for review and modification of these requirements where it can be demonstrated that an unduly restrictive burden would be placed on the property owner or, that riparian vegetation does actually extend all the way into the 500 foot or 100 foot setback to the location of the proposed improvements.

   Such review and modification shall be spelled out in the zoning districts affected, and shall involve consultation with officials of the Oregon Department of Fish and Wildlife.

7. Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal state ownership; where these do not occur, an appropriate wetlands zoning district shall be developed and applied. Other wetlands from the National Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per

Goal 5 requirements if it is clearly demonstrated that an unprotected signficiant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction. (Modification in process.)

8. Sensitive Fish and Waterfowl Areas as identified in the 1983 Revision the Flora and Fauna Working Paper, shall be considered "significant" "1C" resources per OAR 660-16-000/025, and protected per "3C" requirements through protection of riparian and wetland resources as described in the above Policy statement.

9. Residential building permits issued within Major or Peripheral Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna, and as revised and updated in 1983, shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

10. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna and as revised and updated in 1983.

11. Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resource zoning program.

12. If uses are identified (which were not previously identified in the Plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

13. In its program of protecting "1C" resources, the County shall make maximum practical use of existing land use regulations (e.g., Willamette Greenway Permit, Coastal Resources Zoning overlays, rural forest and agricultural resource zones) to achieve such protection. Duplication of existing standards shall be avoided wherever practicable, provided County-determined Goal 5 and OAR 660-16-000/025 objectives are met.

14. A group known as the "Lane County Flora and Fauna Committee" is to be established and given permanent status by the Board of County Commissioners. The committee shall represent a wide array of environmental interests and the interests of property owners. Its tasks shall include: evaluation of LCDC Goal 5 concerns and resources, development of information to help the County comply with OAT [sic] 660-16-000/025 ("Goal 5 Rule"), research and provision of resource site data to the County, and response to work in progress. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

15. Currently known pigeon springs, heron and raptor (hawk, osprey and eagle) nest sites shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluation per "1B" requirements within two years of the date of plan adoption. Lane County shall consider enlarging the list of significant nest sites whenever information about additional sites becomes available. The significant nest sites shall be those identified by Jim Greer and Jim Hutchison (Department of Fish and Wildlife biologists) in a 12/20/83 letter to Jim Mann (Senior Planner, Lane County Land Management Division), and these sites shall be incorporated into the Lane County General Plan Policies document as Flora and Fauna Exhibit A.

16. Rare and endangered vascular plants, identified in the 1/8/84 list prepared by the Native Plant Society of Oregon shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. This list of rare and endangered vascular plants is included into the Lane County General Plan Policies document as Flora and Fauna Exhibit B.

17. Lane County recognizes that Douglas fir old growth stands provide valuable and unique wildlife habitat and will encourage the Forest Service and Bureau of Land Management to maintain acreage in this age class sufficient to ensure viable populations of dependent wildlife species.

Policy 22 (Plan. p. 5) states:

> Sites considered 'significant' in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement

process for the "significant" sites and after sufficient information is available regarding the location, quality and quantity of the "significant" sites.

Lane County's Forest Lands Policy 17 (Plan, p. 10) states:

> Lane County recognizes that the Oregon Forest Practices Act shall be the only mechanism regulating the growing and harvesting of forest tree species on commercial forest lands unless Goal 5 resource sites have been recognized and identified as being more important through an analysis of ESEE consequences and conflict resolution as per Goal 5. No other findings, assumption, goal policy, or other planning regulation shall be construed as additional regulation of forest management activities.

Implementing Measures

Lane County has adopted the following riparian setback standards and riparian vegetation maintenance standards in its F-1, F-2, E-RCP, ML-RCP, PR-RCP, and DR-RCP Zones (Lane Code, Sections 16.210(7)(a) and (b), 16.211 (9)(b) and (c), 16.212 (8)(b) and (c), 16.214(7)(b) and (c), 16.215(6)(a) and (b), and 16.232(5)(b) and (c), respectively):

> (b) Class I Stream Setbacks. No structure other than a fence or sign shall be located closer than 100 feet from the ordinary high water of a Class I stream designated for riparian vegetation protection by the Comprehensive Plan. A lesser setback may be allowed if:
>
> (i) The Department of Fish and Wildlife is consulted by the Department at least 10 days prior to issuing a permit for a structure; and
>
> (ii) The riparian vegetation does not actually extend all the way into the 100-foot setback to the location of the proposed structure, and the riparian vegetation has not been removed in violation of the below riparian vegetation maintenance standards; or
>
> (iii) An application for a variance to the above setback standard has been approved pursuant to LC 16.256 with findings of compliance to the Comprehensive Plan policies for the protection of Class I streams and riparian vegetation.
>
> (c) Maintenance, Removal and Replacement of Riparian Vegetation. The following standards shall apply for the maintenance, removal and replacement of riparian vegetation along Class I streams designated for riparian vegetation protection by the Comprehensive Plan:
>
> (i) No more of a tract's existing vegetation shall be cleared from the setback and adjacent area than is necessary for a permitted use, accessory buildings, necessary access, septic requirements and fire safety requirements.

(ii) Construction activities in and adjacent to the setback area shall occur in such a manner so as to avoid unnecessary excavation and/or removal of existing vegetation beyond that required for the facilities indicated in LC 16.212(8)(c)(i) above. Where vegetation removal beyond that allowed in LC 16.212(8)(c)(i) above cannot be avoided, the site shall be replanted during the next replanting season to avoid water sedimentation. The vegetation shall be of indigenous species in order to maintain the natural character of the area.

(iii) A maximum of 25 percent of existing natural vegetation may be removed from the setback area.

(iv) The following uses and activities are excepted from the above standards:

(a) Commercial forest practices regulated by the Oregon Forest Practices Act.

(b) Vegetation removal necessary to provide water access for a water dependent use.

(c) Removal of dead or diseased vegetation that poses a safety or health hazard.

(d) Removal of vegetation necessary for the maintenance or placement of structural shoreline stabilization.

In the PF/RCP C-R, RCP, RA-RCP, and RR-RCP Zones (Sections 16.219(4)(b) and (c); 16.223(5)(b) and (c); 16.229(7)(b) and (c); and 16.231(7)(b) and (c), respectively), the setback is 50 feet, rather than 100 feet.

The following zones indicate the Class I Stream and Riparian Vegetation requirements of LC 16.229-35(2) and (3) shall apply: C-1, RCP (Section 16.220); C-2, RCP (Section 16.221); C-3,RCP (Section 16.222); M-1, RCP (Section 16.224); M-2, RCP (Section 16.225); and M-3, RCP (Section 16.226). The RG-RCP Zone (Section 16.230) indicates that Section 16.299(2) and (3) shall apply. However, the Lane Code does not contain any section with the numbers 16.299-35(2) and (3) or 16.229 (2) and (3).

As discussed in the open space section of this report, Lane County has adopted a Natural Resource Zone (NR-RCP) (Lane Code, Section 16.213) which is, in part, intended to protect aquatic and other wildlife habitat areas. Please refer to that section of this report for details. It should be pointed out that the NR zone does not contain riparian setback and vegetative maintenance standards. Although major development in the NR zone is not anticipated, the NR zone permits a variety of structures. These structures should be required to be set back in order to protect riparian vegetation, just as they are in other zoning districts. In fact, since the purpose of the NR zone is to protect wildlife and aquatic habitats, there is even more reason why such setbacks should be required.

A review of the County's zoning maps indicates that the NR Zone has been applied to a number of habitat areas in the County. One of the sites zoned NR is the Big Creek Exception Area, which contains fish and big game habitat, and habitat for the endangered Silverspot butterfly.

According to the Exception (p. 27), no alteration of the riparian vegetation will occur, and the owner has agreed to enter into contractual arrangements to protect elk winter forage areas. The applicant will also take measures that may be necessary to protect the habitat of the Silverspot butterfly.

Contrary to statements contained in the Flora and Fauna Working Paper, Lane County's F-1 (Nonimpacted Forest Lands) Zone establishes a 40-acre (rather than an 80-acre) minimum lot size (Lane Code, Section 16.210(6)), except that (a) a land division to create a parcel of less than 40 acres may be allowed conditionally if it is for separating an existing residence from adjoining forest land, and (b) a common property boundary may be adjusted so long as no additional parcels are created. As noted in the Flora and Fauna Working Paper (p. 24), and as discussed earlier in this report, ODFW's recommended density in Major Big Game Range (which, according to the County, is mostly zoned F-1) is one unit per 80 acres. Inasmuch as the F-1 zone does not allow dwellings, this density standard has less meaning in Lane County's F-1 Zone.

The F-2 (Impacted Forest Lands) Zone (Lane Code, Section 16.211) requires a minimum of 20 acres for creation of a woodlot or farm parcel for growing grapes, berries, or horticultural specialties, and 40 acres for creation of a farm parcel. However, there is no requirement that, in the Big Game Range portions of that zone, densities will not exceed those recommended by ODFW (i.e., one unit per 40 acres in the Peripheral Range, or one unit per 20 acres with clustering and siting standards; one unit per 80 acres in the Major Range, or one unit per 40 acres with clustering and siting standards).

In the Exclusive Farm Use Zone (Lane Code, Section 16.212), a dwelling or mobile home not in conjunction with farm use may be approved if it meets certain criteria; similarly, a division of land may be allowed for a dwelling not in conjunction with farm use if it meets those criteria and does not conflict with the purpose of the zone. However, none of the criteria address ODFW's dwelling density recommendations, and the purpose statement of the zone does not refer to maintaining wildlife habitat values. As noted in the Goal 3 section of this report, minimum lot size is from 20 to 60 acres, depending upon location. As noted in the Flora and Fauna Working Paper (p. 24) and as discussed earlier in this report, ODFW's recommended density in Peripheral Big Game Range (which, according to the County, is mostly zoned Exclusive Farm Use) is one unit per 40 acres. There are no standards in the zone which require lot sizes to be 40 acres or greater in the Peripheral Big Game Range portions of the zone, or alternatively, that require clustering of dwellings (to allow densities as great as one unit per 20 acres.

Lane County has adopted a Marginal Lands (ML-RCP) Zone (Lane Code, Section 16.214) which appears to have been applied to wildlife habitat areas, and could be applied to other areas in the future. (The County did not submit maps showing the locations of its big game habitat areas, so it cannot be determined with certainty whether it has been applied in big game habitat areas). ORS 197.247(8) requires that application of

such a zone satisfy all requirements of other Goals, in this case, Goal 5. The County has not adopted findings demonstrating how the specific applications of the ML zone comply with the Goal 5 Rule. Criteria for approval of future ML zoning (Section 16.214(4)) do not include compliance with Goal 5.

Section 16.215 of the Lane Code is the County's Park and Recreation (PR-RCP) zone which has been applied to a number of sites in the County. The zone permits a number of recreational uses and activities outright, and a number of others if within a built and committed exception area that is designated as nonresource land. The zone also lists uses that are subject to hearings official approval. Section 16.215(5)(e) of the zone contains the following conditional use approval critera:

> When a use is proposed in an area designated as Major Peripheral Big Game Range or as Sensitive Fish and Waterfowl areas as shown on the Lane County Wildlife inventory, the Oregon Department of Fish and Wildlife shall be notified and their comments shall be considered in evaluating the proposed use.

The PR zone allows a number of uses that could conflict with wildlife habitat and other Goal 5 values, and with the purpose of the zone, as noted in the Goal 2 section of this report.

The County has not adopted any implementing measures to protect and/or resolve conflicts with sensitive bird habitat sites.

As noted in previous acknowledgment reviews (e.g., Tillamook County), the Commission has allowed counties to adopt plan policies and ordinance language which clearly expresses the intent to rely on the FPA, Rules, and the March 1984 agreement between the Board of Forestry (BOF) and the Fish and Wildlife Commission (F&WC) to resolve conflicts between timber management activities and sensitive bird sites. Lane County has no such policy commitment, and it has not inventoried all sites on the BOF/F&WC list of sites covered by this agreement. However, even if such a policy is adopted by counties, they are still required to adopt implementing measures to resolve conflicts between other uses (e.g., development) and sensitive bird sites. Lane County has not adopted such measures.

Lane County has not identified sites that are considered to be more important than commercial forest operations based on a Goal 5 ESEE consequences analysis, per Forest Lands Policy 17 (Plan, p. 10), nor has it adopted and applied any implementing mesures to such sites which regulate timber management activities.

Objections

1. The Oregon Department of Fish and Wildlife (ODFW), 1000 Friends of Oregon and the Legue of Women Voters of Central Lane County (LWV) have objected to the County's approach to sensitive bird nesting and use sites. Specifically objectors point out that the Flora and Fauna Working Paper discusses only some of the species considered

sensitive. Missing are designations of heron rookeries and pigeon mineral springs. Policy 15 addresses all sensitive species (bald eagle nests, heron rookeries, snowy plover habitat, spotted owl nests, osprey nests and pigeon mineral springs). Further, objectors point out that Policy 15 places these species in a (1B) category. Both ODFW and 1000 Friends indicate that the County possesses inventory information (including recent ODFW updated information) which is sufficient to complete the Goal 5 process for this resource category. ODFW indicates that the location, quality, and quantity information provided the County is similar to that provided to other counties which have completed the Goal 5 process and which have been acknowledged. The League of Women Voters is concerned that two years is too long for these resource sites to be without protection. Most are not in the Greenway, and therefore do not even receive minimal protection.

1000 Friends also objects to the fact that neither Flora and Fauna Policy 2 or 3 provides adequate protection for these sensitive species. Policy 2 simply indicates the County will recognize existing programs that protect species; it does not bind the County to any particular course of action. 1000 Friends believes the County must make an affirmative commitment to protect threatened and endangered fish and wildlife species. Policy 3 also fails to guarantee protection of sensitive species since it requires the County to seek to minimize adverse impacts through County regulations (including zoning). 1000 Friends suggests that present zoning may be construed to "minimize adverse impacts" but this may not necessarily provide adequate protection for particular sites.

1000 Friends also objects to the use of the definition of "sensitive species" used in Policy 3. Objectors believe it is overly general and could be construed by decision-makers to exclude certain species. Objectors believe that County Policy 3 should reference the list of "species of special concern" that appears in the Working Paper, rather than use a vague term in the policy. Similar comments have been filed by Oregon Forest Industries Council.

2. ODFW and 1000 Friends have objected to Flora and Fauna Policy 11 since it regards densities above ODFW's recommendations in big game areas to constitute a conflict. ODFW regards its recommended densities as the approach to resolve conflicts between dwellings and game range. 1000 Friends states that Policy 11 allows residential densities to exceed ODFW recommendations "if conflicts can be resolved in accordance with OAR 660-16-000." Objectors believe this allows the County to justify density levels which exceed those recommended by ODFW through an analysis of ESEE consequences. Objectors do not believe this exclusion is consistent with the Goal 5 Rule.

3. ODFW objects because, contrary to Policy 11 which adopts ODFW's density recommendations in big game habitat areas, the County's F-1 and F-2 zones do not provide the siting or clustering requirements

that need to accompany the density levels allowed in those zones. Similar objections have been filed by 1000 Friends of Oregon. Objectors point out the the F-1 zone establishes a minimum lot size of 40 acres, but smaller divisions can be made without regard to big game impacts. The F-2 zone establishes minimum lot sizes of 20 and 40 acres for forest and farm uses, which also fail to meet ODFW's recommended densities for Peripheral Range, according to objectors. 1000 Friends points out that the Flora and Fauna Working Paper Addendum and Policy 11 prescribe clustering and siting of standards, but these are not carried out in the F-2 zone. The Addendum (p. 14) also references forest land minimum lot sizes which are no longer current.

4. ODFW and 1000 Friends object because Goal 5 has apparently not been applied in the process of designating marginal and nonresource lands. Objectors are particularly concerned how this affects big game range areas. ODFW contends that the County's plan provisions for lots of record, resource and nonresource-related dwellings, marginal lands, and nonresource lands could allow considerable development in game range. The County's F-1 and F-2 zones do not adequately assure that recommended densities will be maintained. This is further complicated by the fact that it is unclear where marginal and nonresource lands are located, and therefore the extent to which they are in game range areas, since the zone map format and resource inventory map formats are not easily comparable. 1000 Friends points out the Goal 5 must be applied whereever Goal 5 resources occur, even in areas designated marginal or nonresource land.

5. ODFW, 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the County's treatment of the Pudding Creek Heronry. Objectors point out that the County conducted a Goal 5 ESEE consequences analysis, but that inasmuch as the sand and gravel plan and zone designations have been retained on the site, conflicts have not been resolved. Please refer to the Goal 15 section of this report for further details concerning objections to the zoning of this site.

6. 1000 Friends of Oregon, League of Women Voters of Central Lane County, and Lane County Audubon Society have objected to the County's plan and zone designations for the Big Island (or Confluence) Heronry at the confluence of the McKenzie and Willamette Rivers. Objectors indicate that the County has not adopted a program that is adequate to protect and/or resolve conflicts with the site under Section (3C) of the Goal 5 Rule. Objectors point out that the 1981 LCDC order for the Eugene/Springfield Metro area include a requirement that the ESEE consequences of designating the island for sand and gravel use must be evaluated in the context of regional aggregate supply and demand. The IOTC further required that if the island were to retain a partial sand and gravel designation, the Metro Area Plan and the Lane Code (Section 10.210) must be amended to require that limited aggregate extraction will minimize the impact on scenic and wildlife values.

The IOTC also referenced Goal 15 requirements and IOTCs. Objectors contend that neither the Goal 5 nor Goal 15 IOTCs have been adequately addressed. These objections are also contained in the Goal 15 section of this report.

7. 1000 Friends of Oregon has objected to the fact that Lane County has placed only five noncoastal wetlands in its (1C) inventory, and has placed all others in a (1B) category. 1000 Friends believes the County has sufficient information to be able to classify the others as either (1A) or (1C), since such information was given to the County by ODFW, interested citizens, and the Lane County Flora and Fauna Committee. Objectors indicate that Goal 2 Policy 22 is inadequate for these (1B) sites since it requires only that interim protection be applied at the beginning of the plan refinement process --no sooner. Objectors point out that Goal 15 requires protective measures be applied as soon as their significance has been determined.

   Finally, 1000 Friends indicates that the U.S. Fish and Wildlife Service's National Wetland Inventory is the basis for Lane County's wetland inventory. Flora and Fauna Policy 7 states that this inventory, although incomplete in Lane County, will be used to evaluate (1B) wetlands within two years of the date of plan adoption or when the national inventory is completed. 1000 Friends points out, however, that such an inventory is not scheduled for completion for another 5-10 years, and Lane County is not within a priority inventory area. Objectors believe the County should amend Policy 7 and the Addendum to the Flora and Fauna Working Paper (p. 6) to recognize alternative sources of data shall be used to assess the significance of wetlands and to identify their boundaries.

8. 1000 Friends has objected because the County definition of wetlands in its Working Paper is much narrower than that contained in the Statewide Planning Goals or the U.S. Fish and Wildlife Service, but the County has not justified how such a definition is consistent with Goal 5. The Working Paper states that a wetland is "an area in which open, standing water is present for at least six months out of the year and is a minimum size of one acre." Objectors indicate the County has no definition of wetlands in either its plan policy document or in its zoning ordinance.

9. 1000 Friends objects to the fact that Lane County is relying on the FPA to maintain riparian corridors along Class I streams and wetlands, and will take no actions to limit conflicting uses in areas subject to the FPA. Objectors state that there is no analysis in the submittal materials which demonstrates how the FPA and Rules provide protection for riparian resources consistent with Goal 5. Therefore, 1000 Friends objects to LC 16.210(7) and 16.211(9).

10. 1000 Friends objects to the County's failure to apply riparian protection measures around lakes and along Class II streams. Objectors point out that Class II streams regulate water temperature, quality, and quantity of downstream Class I streams.

11. Friends of the Oregon Coast has objected to the County's Renaghan Amendment (Big Creek Exception) for a number of reasons, some of which relate to fish and wildlife concerns. These are as follows:

    a. Objectors believe that many of the findings are "contractory and irrelevant." Objectors cite two examples. The first is that finding 37d (p. 27) conflicts within finding 37e (p. 27). One calls for establishing permanent elk forage areas; the other calls for maintaining the property in forest. Objectors also indicate that the County's claim that there are no sensitive species on the property contradicts findings 40a (5) and 44b(6) which state that the northwest corner of the property contains Silverspot butterfly habitat.

    b. Objectors claim that because the applicant retained a consulting wildlife biologist, his statements in the record should be expected to support the establishment of a destination resort. Objectors believe that his statements are treated by the County as findings of fact although they sometimes "are argumentative of the County's Coastal Sub-Area Plan and of the Oregon Department of Fish and Wildlife's Management plans."

    c. Objectors believe that, although the applicant and ODFW will be required to work together to mitigate adverse impacts on fish and wildlife, these efforts will be "experimental" and therefore cannot justify the resort complex in the the middle of prime and sensitive habitats.

    d. Objectors point out that the Exception recognizes ODFW's concerns about increased fishing pressure on Big Creek as a result of the development, and that potential harm can only be mitigated by regulating sport fishing (through reductions) on the creek. Objectors feel that long-time anglers will therefore be penalized by the development.

Response to Objections

1. Objectors are correct in pointing out deficiencies in the County's inventory of sensitive bird nesting and use sites. Information on location, quality, and quantity is available, yet the County has taken a (1B) approach to several of the species identified. Sufficient information exists for the County to be able to complete the Goal 5 process for this resource category.

   Objectors are also correct that Flora and Fauna Policies 2 an 3, themselves, do not guarantee protection for sensitive species, particularly in light of the absence of implementing measures to provide such protection. The adequacy of these policies can be judged only after the County completes the Goal 5 process for the habitat areas of these species. Lane County has erroneously placed such species in a (1B) category, and has not yet completed the Goal 5

process. Depending upon this analysis, the policies may have to be modified, and implementing measures will have to be adopted. The concern that Policy 3 is unclear as to which species or habitat areas are covered by the policy is valid.

2. Policy 11 states:

> Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similiar activities which are already a part of the County's rural resource zoning program.

Objectors are not correct that this policy violates Goal 5. Densities above those recommended by ODFW would certainly constitute a conflict with big game habitat. The County has, through this policy, however, simply indicated that it intends to resolve them by applying the entire Goal 5 process when such proposals are made. This would require a plan amendment and could only take place if justified based on the Goal 5 analysis. However, as noted previously, the County still needs to adopt measures in its F-2, ML, and EFU Zones which ensure that ODFW's density standards will be achieved.

The second part of the policy requires the County to work with ODFW in preventing conflicts from occurring through land use regulations in resource areas and such things as siting requirement. ODFW is correct that its recommended density standards (if adopted in the ordinance) would constitute an approach to resolve and/or prevent conflicts between dwellings and big game habitat. However, as discussed below, the County has not adopted such standards in its zoning ordinance.

3. ODFW is correct that the County's F-1 and F-2 zones do not incorporate ODFW's development density recommendations, nor do they set forth siting or clustering requirements. Without siting and clustering requirements, the minimum lot sizes in the F-1, F-2 and E zones are half that recommended by ODFW (i.e., the minimum lot sizes would have to be doubled to be acceptable). This is a problem in the F-2 and EFU zones in particular, but not in the F-1 Zone, since in general, dwellings are not permitted in that zone.

4. Objectors are correct that Goal 5 has not been applied by the County in the process of designating marginal lands. ORS 197.247(8) requires that applications of a marginal lands zone must satisfy all requirements of other Goals, including Goal 5.

5. The response to the objections regarding Pudding Creek Heronry is presented in the Goal 15 section of this report.

6. The response to the objections regarding Big Island is presented in the Goal 15 section of this report.

7. The County has indicated it has sufficient inventory information on only five noncoastal wetlands at this time. 1000 Friends has not provided location, quality, or quantity information on specific wetlands it believes should be (1C) sites, rather than (1B) sites.

   ODFW has not objected to the County's determination that only five wetlands are (1C) and the remainder are (1B) sites. 1000 Friends is correct that Policy 22 calls for protection of (1B) sites only at the beginning of the plan refinement process. However, the Goal 5 Rule does not require any interim protection for (1B) sites.

   Although the incomplete National Wetlands Inventory is the basis for the County's wetlands inventory, 1000 Friends is not correct that the County must wait until the National Inventory is completed before it can apply the Goal 5 process to (1B) sites. Furthermore, Policy 7 does not prevent the County from considering information about other sites not on the national inventory during its plan update process. 1000 Friends, or other parties may supply the County with information about wetlands, and the County would be required to apply the Goal 5 process to those sites. Plan Policy 7 states:

   > Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal; state ownership; where these do not occur, an appropriate wetlands zoning district shall be developed and applied. Other wetlands from the national Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per Goal 5 requirements if it is clearly demonstrated that an unprotected significant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction. (Modification in process).

While the policy does not permit the use of alternative sources of information during the update process, 1000 Friends is correct in suggesting that the policy could be improved by actually stating that other sources of information (besides the National Inventory) will be used.

8. 1000 Friends is correct in pointing out that the County's Working Paper definition of "wetlands" is narrower than that contained in the Statewide Planning Goals. Wetlands very often do not have open, standing water present at least six months out of the year. Reliance on the County's definition could result in some wetlands possibly being excluded from the County's (IC) inventory.

9. 1000 Friends is correct that the County is relying on the FPA to resolve conflicts between timber management activities and riparian areas along Class I streams and wetlands, although the County has not made a statement to this effect. It is clear in Forest Lands Policy 17 and in various sections of the Zone Code that the County is not regulating harvest activites. Objectors are also correct that the County has not provided an analysis demonstrating how the FPA and Rules provide protection for the Goal 5 resource. However, it has been Commission practice not to require counties to adopt implementing measures to resolve conflicts between timber management activities and riparian corridors.

10. 1000 Friends is correct that the County has not applied riparian protection measures around lakes or along Class II streams, or otherwise justified not providing such protection, based on an ESEE consequences analysis of conflicting uses. Information in the Flora and Fauna Working Paper (pp. 6 and 15) suggests that these are important Goal 5 resources.

11. The objections of Friends of the Oregon Coast are not sustained with regard to fish and wildlife concerns for the following reasons:

    a. Objectors are correct that the Exceptions document contains some conflicting statements, particularly whether the property contains Silverspot butterfly habitat. Specifically, finding 37e (p. 27) is misleading, since the site does contain Silverspot habitat. In light of the fact that the County's intent is clearly to take whatever actions are necessary to protect the Silverspot butterfly, this inconsistency is not a Goal violation.

       With regard to the Exception documents' statements regarding elk forage, it can be assumed that, although the main intent is to keep the property in forest, portions of the property will be in other uses. These findings are broadly written, and, as such, are not contradictory.

    b. Objectors have not indicated how findings 47d(1) through (13) violate Goal 5, only that they are sometimes "argumentative" of other documents.

c. Objectors have not indicated why they believe ODFW's attempt to mitigate impacts on habitats will be experimental, or otherwise why they cannot suceed in providing adequate protection.

d. Objectors have not indicated how regulating sport fishing on Big Creek to protect the resource long-term violates Goal 5. While it is unfortunate that long-term anglers may be "penalized," this is not a Goal issue.

Comments

Oregon Forest Industries Council (OFIC) and the Lane County Landowners Association have commented that Policy 22's intent is unclear, since it calls for interim protection measures for "significant" Goal 5 resource sites. However, the policy addresses (1B) sites. The association indicates that (1B) applies where some information exists but is inadequate for purposes of identifying a site and determining its significance. Commentors also point out that interim protective measures are neither required nor appropriate for Goal 5 compliance.

Response to Comments

Policy 22 (Plan p. 5) states:

> Sites considerd 'significant' in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement process for the 'significant' sites and after sufficient information is available regarding the location, quality, and quantity of the 'significant sites.

While it is true that Policy 22 is somewhat ambiguous, the policy appears to recognize the fact that certain Goal 5 resource categories have significance (e.g., all eagle nests are significant), although their specific locations may not be known at this time. Therefore a (1B) classification is appropriate. The Goal 5 Rule does not require interim protection measures for (1B) sites. However, the Rule does not prohibit jurisdictions from adopting and applying interim measures to (1B) sites.

Conclusion -- Fish and Wildlife Habitats

Lane County has adopted inventory information for a number of fish and wildlife habitat areas, and has identified conflicting uses and ESEE consequences of those conflicting uses. Implementing measures including riparian setbacks and vegetation maintenance standards and a Natural Resource Zone have been adopted. However, a number of deficiencies still remain and must be corrected before acknowledgement can be granted. These are summarized below.

Lane County has placed all sensitive bird habitat sites in a (1B) category, even though information is currently available and is adequate for completing the Goal 5 Rule process. The County needs to adopt a (1C) inventory for known sites and complete the Goal 5 process.

Implementing measures which carry out ODFW's development density recommendations in Major and Peripheral Big Game Range areas have not been adopted, particularly in the F-2, ML and EFU zones. The County has not applied the Goal 5 process to "nonresource" lands.

The County's three commercial, three industrial, and its garden-apartment zones reference a nonexisting code section for their riparian setback and vegetation maintenance standards. It is obvious that the County intended to apply such standards in those zones but until the zones are amended to either (1) reference the correct section of the code containing those standards, or (2) incorporate such standards themselves, there are no riparian standards in effect in those seven zones. Riparian protection measures have not been applied around lakes, in the Natural Resources Zone, or along Class II streams, or justified as not being necessary, based on an analysis of ESEE consequences of conflicting uses.

The County uses a narrower definition of "wetlands" than in the Goals, and therefore, some wetlands may be left off any future (1C) inventory.

The Parks and Recreation zone allows a number of uses which could conflict with the purpose of that zone, and with Goal 5 resources present (including fish and wildlife habitat values).

A Natural Resources Zone has been developed and applied to lands in the County, but it is unclear which habitat sites have been given NR zoning or whether it has been appropriately applied.

Ecologically and Scientifically Significant Natural Areas

Inventory

The County's Flora and Fauna Working Paper contains the County's inventory information on natural areas (pp. 26-32). This working paper indicates that the County evaluated the 86 sites on the Natural Heritage Inventory and the nine sites identified by the Natural Areas Preserves Advisory Committee. (Note: The Committee is now known as the Natural Heritage Advisory Council). These sites were evaluated by Lane County, first of all, to determine whether there was adequate information on location, quality and quantity. If this was the case, and that information suggested that a site was "significant," it was placed in a (1C) category. If information existed, but the site was determined to be not significant, it was classified (1A). If there was inadequate information, sites were placed in a (1B) category (pp. 26-27).

The County placed six sites in the (1B) category:

1. Booth Island/Siltcoos Lake
2. McKenzie River Island (not be confused with the island at the confluence of the McKenzie and Willamette Rivers)
3. South Fork Gate Creek
4. Swamp Creek
5. Marshall Island Heronry
6. Willamette Valley Quaking Aspen Grove

The County has provided justification why it believes the (1B) classification is appropriate for each of the site sites (pp. 27-28). The Nature Conservancy has indicated it has no updated information for any of the six sites at this time and that a (1B) classification is appropriate (Curt Soper, personal communication, June 15, 1984).

Fifty-six other sites were determined to be in a (1C) category and therefore constitute the County's natural areas inventory (p. 28). The County has grouped these sites according to their ownership. There are 23 sites on U.S. Forest Service land, six on BLM land, four sites within state parks, and 25 that are either in the Willamette Greenway or covered by the Coastal Resources Management Plan (pp. 30-32). Two additional sites (Upper Yachats Elk Pasture and Fern Ridge) are also (1C) sites, but do not fall into the above categories (p. 32).

No information regarding location, quality or quantity of the federally-owned sites is provided in the Working Paper. Information regarding the natural features present in the State park sites and at the 25 Greenway or Coastal sites is summarized (pp. 30-32). All are significant in terms of quality. Locations of these sites have not been provided.

It should be noted that, during the review of the coastal portion of the Lane County plan, a privately-owned Darlingtonia bog, east of Highway 101 and east of the City of Florence, was identified. The bog did not quailify as an ecologically significant natural area under the Coastal Goal requirements. It does, however, possess natural values that could qualify it as a Goal 5 (1C) natural area. However, Lane County has not addressed this site in its Working Paper or other submittal materials.

Conflicting Uses/ESEE Consequences Analyses

Because of their ownership by the U.S. Forest Service or the BLM, the County believes no conflicts exist for the 29 federal sites (Flora and Fauna Working Paper, p. 28).

The County indicates that no conflicts exist for the four state park sites based on uses allowed in zoning districts applied to those sites (p. 29). The Flora and Fauna Working Paper Addendum (p. 15) states, "the State of Oregon Parks and Recreation Division has, in a letter to Lane County, stated that the natural area values of these parks are being and will be protected, and that no conflicts with the resource are foreseen." However, as noted in the Goal 2 section of this report, the Parks and Recreation zone which has been applied to these state parks, allows a number of uses which could conflict with natural area values.

No conflicts have been identified for the Coastal or Greenway sites because of programs and zoning districts applied to them (p. 30).

With regard to the two remaining sites (the Elk Pasture and Fern Ridge), the County indicates there are no conflicts. The Siuslaw National Forest and ODFW own the site and have an agreement concerning use of the site as an elk wintering area. Fern Ridge is owned by the Corps of Engineers and, under a 1980 management plan for the reservoir, the natural values present will be protected (p. 32).

It should be pointed out that public ownership, in and of itself, does not necessarily mean there are no conflicting uses, nor does it guarantee site protection. Although several of the U.S. Forest Service and BLM sites are formally protected by those agencies (e.g., wilderness areas, designated research natural areas), others are not. Unless the federal agencies have formal protection programs in place for natural areas, it cannot be assumed that no conflicts exist, nor can they be considered "2A" (protected) Goal 5 resource sites. However, since the Commission has not required counties to complete steps (2) and (3) of the Goal 5 Rule for sites on federal land, it is recommended--but not required--that Lane County correct the statement on page 28 of the Flora and Fauna Working Paper regarding conflicts on federal land.

Policies

Lane County has adopted the following policies regarding natural areas (Flora and Fauna Policies, Plan, pp. 14-16):

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification).

12. If uses are identified (which were not previously identified in the Plan which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

16. Rare and endangered vascular plants, identified in a 1/8/84 list prepared by the Native Plant Society of Oregon shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. This list of rare and endangered vascular plants is included into the Lane County General Plan Policies document as Flora and Fauna Exhibit B.

Policy 22 (Plan, p. 5) states:

> Sites considerd "significant" in terms of OAR 660-16-000 through 660-16-025 but requiring that the Goal 5 ESEE consequences analysis process be delayed (the '1B' option) shall be protected by Lane County through the application of interim protection measures. Such interim protective measures shall be considered and applied at the beginning of the plan refinement process for the "significant" sites and after sufficient information is available regarding the location, quality, and quantity of the "significant sites".

See also the Goal 15 section of this report and the coastal review of the Lane County Plan for a discussion of other relevant plan policies which address natural area.

Implementing Measures

As indicated by the County, a number of natural area sites are located on federal land, over which the County lacks jurisdiction. A number of other sites are significant natural areas within the Coastal Planning Area and the implementing measures applied to them have been acknowledged as being in compliance with the Coastal Goals. The two Greenway sites are actually riparian areas along the Middle Fork and the Coast Fork of the Willamette River. The County's Greenway Permit ordinance and its riparian setback and maintenance standards provide a degree of protection for these areas. (See, however, the Goal 15 section of this report for a discussion of specific deficiencies in the Greenway ordinance).

The four state parks have been zoned Parks and Recreation. However, as noted in the Goal 2 section of this report, the PR zone allows a number of uses that could conflict with the natural area values of the sites. ODOT has indicated it does not forsee conflicts with the four sites, according to the County. However, there are no management plans for the sites, or letters from ODOT which confirm that this is the case.

Objections

1. The League of Women Voters of Central Lane County (LWV) has objected to the fact that the County has placed rare and endangered plant species in a (1B) category with a two year time delay for their evaluation through the Goal 5 process. The LWV is concerned because it believes two years it too long for these resources to be without protection. Objectors point out that since most of these resources are not within the Willamette Greenway, they will not receive even minimum interim protection.

2. Lane County Audubon Society and 1000 Friends of Oregon have objected because the County has not provided adequate protection to a natural area known as Russel Creek Basin. This objection is described in more detail in Part II of this Goal 5 Report.

Response to Objections

1. Flora and Fauna Policy 16, which requires Lane County to evaluate the (1B) rare and endangered plant species list in two years does not refer to any particular sites containing these species, nor have objectors provided a list of sites which they believe should have been placed in a (1C) rather that a (1B) category. If sites are not known at this time, then a (1B) classification is appropriate, including policy commitment to address them in the future.

2. Objectors are correct that protection and/or conflict resolution measures have not been applied to the Russel Creek Basin natural area, in spite of an ESEE consequences analysis and recommendations regarding protection of the site in the Metro Working Paper. This issue is addressed in greater detail in the Part II section of this Goal 5 report.

Comments

1. Lane County Landowners Association has pointed out that the County's list of rare and endangered plants is simply a list of species and does not address any specific or general sites. Commentors believe, therefore, the Goal 5 Rule does not apply to these species until sites are identified. (Flora and Fauna Policy 16 indicates that certain plants are considered significant and shall be placed in a (1B) category and evaluated with two years).

2. Lane County Landowners Association also comments that, contrary to Flora and Fauna Policy 7, wetland resources cannot be considered "significant" while placed in a (1B) category.

Response to Comments

1. Commentors are correct that Policy 16 refers only to a list of species, and does not address any sites. Therefore, the Goal 5 Rule will apply if and when sites containing these species are identified.

2. Contrary to the commentor's statements, wetlands--as a resource category--can be (and generally are) considered "significant," even through individual sites may be in a (1B) category because of lack of site-specific inventory information.

Conclusion -- Natural Areas

Lane County has identified 62 natural areas, 56 of which it has classified as (1C) sites. The County has provided sufficient justification for the (1B) classification of the other six sites. Most of the 56 (1C) sites are on federal land, within the Coastal Planning area, or the Willamette Greenway. Therefore, the County has found that the sites are either not within its jurisdiction to regulate, or implementing measures have been applied which provide adequate protection.

Four state parks contain natural area values. The County indicates that because of their zoning (Parks and Recreation), they are adequately protected. However, an examination of that zone reveals that a number of uses are allowed in that zone which could conflict with the natural values present. State ownership in and of itself does not guarantee protection of these values, unless the agency has an adopted park managment plan, which requires protection. As noted in Goal 2, state agencies are also subject to Goal compliance and acknowledged plans. This is an issue which should be further explored through State Agency Coordination agreements.

The County has not applied the Goal 5 Administrative Rule to a Goal 5 Darlingtonia bog located east of the City of Florence that is not covered by the Coastal Goals.

Outstanding Scenic Views and Sites

Inventory

The County's scenic views and sites inventory information is contained in the Recreational Resources Working Paper (pp. 5-13). This consists of a discussion of several inventories and rating systems used by other public entities (e.g., Bureau of Land Management, U.S. Forest Service, State Department of Transportation, former Coastal Conservation and Development Commission, several parks and open space plans of Lane County and the City of Eugene) (p. 6). However, the Working Paper contains no location, quality or quantity information for any specific sites, nor are any of the aforementioned inventories adopted by reference. Instead, the County has decided that, given the time and resources available as well as the difficulty, it cannot conduct site-specific inventory (p. 7). The County suggests that this be undertaken before the first plan review/revision

occurs (p. 7). The County describes in some detail how such an inventory could be conducted, including defining the objective, determining what areas or types of scenic types are "critical", establishing an evaluating or rating system, applying a rating system, and implementing decisions made regarding such areas (pp. 6-14).

The County's Exception for the Big Creek area recognizes scenic values on he property, and on surrounding federal lands (Exhibit E--Renaghan Amendment, p. 53).

Conflicting Uses/ESEE Consequences Analyses

Because the County has not conducted an inventory of outstanding scenic reviews and sites, it has not identified conflicting uses with specifies sites or ESEE consequences of those conflicting uses.

Policies

Lane County's policy regarding scenic resources is as follows (Open Space and Scenic Areas Policy 3, Plan, p. 17):

> Initiate a program to identify areas of outstanding scenic value, identify and resolve conflicts after consideration of social, economic, energy and environmental consequences and protect sites for which conflict resolution indicates protection is desirable. This program will be initiated prior to the next scheduled Plan update (five years from adoption of revised Plan). The County is encouraged to investigate and utilize fee acquisition, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to implement this policy.

Implementing Measures

Because Lane County has decided to put off the application of the Goal 5 process for this resource category until a later date, no implementing measures regarding the protection and/or resolution of conflicts with scenic views sites have been adopted or applied.

The scenic values of the Big Creek Exception Area are to be maintained through a combination of measures, including keeping 87 percent of the property in open space; placing development away from Big Creek and east of Highway 101 (so it is not visible from the north and will not interfere with the most viewed coastal areas); designating the site Conservation/Recreation/Open Space; and by imposing site review requirements. The site will be zoned NR, as well (Exhibit E--Renaghan Amendment, p. 56).

Objection

Friends of the Oregon Coast object because they believe the proposed development in the Big Creek Exception Area will not enhance the outstanding scenic view associated with the site, and would, in fact, destroy the "picture-book" setting.

Response to Objection

Objectors have not provided specific information as to why the combination of plan and zone designations for the site, site review and the requirement for 87 percent open space is not sufficient to protect scenic resources associated with the site.

Determining what is sufficient to protect scenic views and sites is more difficult and more subjective than for other Goal 5 resource categories. However, in the absence of more specific information from objectors, the objection cannot be sustained.

Conclusion--Scenic Views and Sites

Lane County has not inventoried outstanding scenic views or sites, nor has it identified conflicting uses and ESEE consequences of conflicting uses. No implementing measures addressing this resource category have been adopted or applied on the ground. Instead, the County has a policy to initiate a program to address this resource category prior to the next plan update (five years from adoption of the revised plan).

Lane County should be commended for the serious thought and consideration it has given to this subject, and for its commitment to initiate a comprehensive program to identify and protect outstanding scenic resources. Understandably, such a program can be complex and time-consuming, particularly as it is outlined in the County's Working Paper. However, the Goal 5 Rule requires counties to develop programs prior to acknowledgment, based on information that is currently available. According to the County's own Working Paper, several inventories already exist. For example, the County recognizes that there are several state scenic highways, sites recognized in its own Parks and Open Space Master Plan, as well as sites within federal wilderness areas or on other federal lands. It should be noted that, in the 1981 denial order for Lane County, there were in-order-to-comply requirements directing the County to inventory scenic resources and to apply Goal 5 to those sites.

Neither the Goal nor the planning process itself requires that new information be generated or that information be perfect before planning decisions are made. If this were to case, nearly all planning decisions would be put off until the post-acknowledgment period. It is recommended that Lane County embark on a comprehensive scenic resources program during post-acknowledgment, as called for in its plan. However, prior to

acknowledgment, the County must, at a minimum, inventory known sites, and complete the Goal 5 process for those sites. This work may be refined during post-acknowledgment as part of the County's more detailed, comprehensive scenic resources program work.

Water Areas, Wetlands, Watersheds and Groundwater Resources

Inventory

Lane County has developed a separate document, Water Resources Working Paper, which contains inventory information, and conflicting uses/ESEE consequences analyses for this Goal 5 topic.

Watersheds: A map showing the locations of Lane County's water basins is contained in the Appendix to the Working Paper (Map 2). The County does not provide quality or quantity information for each individual basin, but rather indicates that quality and size vary (p. 5). The County does note, however, that the Upper Middle Fork Willamette, Mosby Creek, and the entire Siuslaw River have severe sedimentation problems. The remainder of the Willamette and the tributary streams to the Willamette and the Siuslaw have moderate sedimentation problems. According to DEQ, the Siuslaw River basin is a "regional hot spot," (i.e., a considerable portion has a severe problem but is not as important as compared to other hot spots, statewide). DEQ has indicated that 410 miles of streams in Lane County have streambank erosion problems, 67 of them having severe erosion. This is particularly true in the Siuslaw Basin, and in tributary streams to the Willamette and short reaches of the Willamette River itself (p. 4).

Wetlands: Please refer to the Fish and Wildlife section of this report for a discussion of the County's wetlands inventory.

Surface Waters: Lane County streams are shown on Map 2 in the Appendix to the Water Resources Working Paper. More complete mapping of surface water is available in the Planning Department office, however (p. 7). Based on a 1974 Water Quality Report and its 1981 update, the County reports that the quality of water in Lane County is generally quite high (p. 7) However, the Mowhawk, Long Tom, and portions of the Coast Fork and Main Stem of the Willamette have slow, meandering reaches and are affected by extensive development (p. 7). Specific problems along these rivers are discussed briefly (pp. 7-8). The Water Resources Working Paper contains a brief discussion of minimum stream flows, particularly those on the Willamette which are regulated by reservoir releases determined by the Corps of Engineers (pp. 8-9).

The Flora and Fauna Working Paper (p. 16) indicates that all lakes and reservoirs have been mapped and are available in the County Planning Department offices. There are about 300 Alpine Cascade Lakes in the County, varying in size from Waldo Lake (6,420 acres) to Mouse Lake (.05 acres) (Water Resource Working Paper, p. 8).

Groundwater: The principal aquifiers which yield moderate to high volumes of water are located on the coast near Florence in dunal sands, along the lower McKenzie Valley, the lower Middle Fork Willamette Valley, the Lower Coast Fork Willamette Valley, and on the valley floor north of Eugene along the Willamette River (p. 10). Map 3 in the Working Paper shows the quantity of groundwater in Lane County; groundwater quality is depicted on Map 3.

Conflicting Uses/ESEE Consequences Analyses

Watersheds: The County states that the only conflict that is specifically a watershed conflict, and not a surface or groundwater conflict, is contamination or possible contamination of surface water supplies used for domestic purposes. Timber propagation and harvesting activities, particularly herbicide use and erosion caused by ground disturbance can affect municipal water sources (p. 5) Residential development and road construction also cause erosion problems (p. 5). The County notes that resolution of timber harvesting conflicts is beyond its regulatory scope. It also points out that several watersheds used for domestic water supplies are "substantially within federal owernship." The County notes that the watershed for the City of Cottage Grove is almost entirely within federal ownership. The Umpqua National Forest and the U.S. EPA have adopted a plan to address problems, yet these problems continue (p. 5). The County indicates that the potential for similar problems exist for domestic suppies from federally-owned watersheds such as Mapleton, Tide, London Springs, and Eugene's supply, the McKenzie River (p. 5).

The County has not conducted an ESEE consequences analysis because the problem is outside its jurisdiction to resolve. However, the County supports adoption of policies or amendments to state and federal laws (including the FPA) which provide greater levels of protection for watershed (p. 6).

Development -- which is regulated by the County -- could impact the Clear Lake watershed. This watershed serves the Heceta Water District and provides a portion of the water for the City of Florence (p. 6). The County discusses the possibility of designating a "protected watershed" but has decided to take no action until sufficient information is gathered on the sources of pollutants. (p. 6). An intensive study is presently underway in response to a temporary DEQ rule (p. 6).

Wetlands: Please refer to the Fish and Wildlife section of this report for a discussion of the County's conflicting uses/ESEE consequences analysis for wetlands.

Surface Waters: A number of conflicts exist for surface waters of the County, but the County asserts they are not consequences of County actions. Rather, it believes they are the result of federal agency management programs (e.g., reservoirs have certain congressioally authorized uses, but these often do not include some uses that are of importance of the County, such as waste dilution, fish and wildlife and recreation). The Corps of Engineers is in the process of reviewing authorized uses on six reservoirs, and could propose reauthorization (p. 9).

Similarly, certain streams such as the Coast Fork Willamette, Coyote Creek, Long Tom River and Lost Creek, appear to have been overallocated. The County recognizes that the State Water Resources Department (WRD) has responsibility for establishing minimum streamflows. The County believes WRD should initiate adjudication, including establishing minimum streamflows for major waterways (p. 9).

Erosion from forest lands is also a conflict with water quality, but the County points out that it is regulated by the FPA or federal regulations. (p. 9). Agriculturally caused water quality problems are being addressed by DEQ and soil and water conservation districts, although three SWDs in the County have not yet adopted model Best Management Practices by DEQ (p. 9). Outside UGBs, urban runoff is primarily from industrial facilities, especially hazardous materials stored at this sites (p. 9-10). This is also regulated by DEQ.

Groundwater: Two conflicts have been identified for groundwater resources -- development in quantity-limited aquifers, and development in areas where groundwater quality may be polluted. Separate ESEE consequences analyses are presented for these two types of conflicts. The County has concluded that:

1. For a quality-limited aquifer, otherwise acceptable development should be allowed if there is an adequate showing that water will be available for a forseeable period in the future, and that the additional withdrawal will not negatively impact surrounding water users. A number of specific code revisions are recommended to carry out these requirements (p. 12).

2. For groundwater quality problem areas, the County has determined that resolution of conflicts should be different for different types of contaminants (p. 14). These include:

    a. For development in aquifers contaminated by natural means, there should be a system to inform people of potential problems, and to suggest that well drilling and testing take place prior to construcion. Areas of quality limitation could be placed on a computerized land file, and could be checked when a building permit application is reviewed. Similarly, notification would be a matter of public record and would be available to future parties interested in these properties as well.

b. Old and smaller solid waste sites in the County are mapped, but not enough is known about specific leachate problems or groundwater characteristics to designate hazard notification areas around them. The Working Paper recommends inventorying each site, including period of operation, type of wastes deposited, and groundwater characteristics. Based on the information, a hazard notification system should be established (p. 14).

c. Two sensitive aquifers are currently subject to DEQ rules for sewage system installation -- the River Road/Santa Clara area, and the North Florence area. For other developed areas located on sensitive aquifers and which have known or suspected contamination problems (Mapleton, Noti, Elmira, Crow, Coburg, Goshen, Creswell urbanizing area, Saginaw, Marcola, Dexter, Cedar Flats, Walterville, Leaburg, Vida, Blue River, and McKenzie Bridge), current County policy calls for a minimum parcel size of one acre if community water is available, or two acres if individual wells are used. The County points out that this policy does not correct the existing situation, but should prevent aggravation of the situation (p. 15). These quality-limited aquifier areas will be placed on the County computer file, and applicants for building permits involving new wells will be informed of possible sewage contamination in the groundwater.

Policies

The following policies address water resource issues in Lane County (Water Resources Policies, Plan, pp. 17-18):

1. State policy normally promotes multiple use of surface waters throughout Lane County. Under such policy, use conflicts can and do occur. As the first step in addressing this problem, the County urges the Oregon Water Policy Review Board and the Department of Environmental Quality to update the existing water basin plans and establish priorities among the varous beneficial uses for specific water areas. The economic, social, environmental and energy consequences of each use should be considered in establishing priorities and resolving any identified conflicts. Lane County will cooperate to the maximum extent practicable in such a program.

2. The County supports congressional reauthorization of upper Willamette basin reservoirs, to reflect actual use priorities. To the extent practicable, the County will cooperate with the Corps of Engineers in resolving existing use conflicts and accommodating the needs of competing uses.

3. Adequacy of water supply, particularly those relying on groundwater sources, shall be a major concern in reviewing major land use changes. For the purpose of applying this policy, major land use change shall be any application reviewed by the Hearings Official or the Planning Commission.

4. The primary means of evaluating groundwater resources for land use planning purposes shall be through the land division review process. The Little Butte Volcanics, Eugene Formation, Fisher Formation, Spencer Formation, Flourney Formation, Alluvium and Older Dunes geological units shall be designated as quality and/or quantity limited aquifers. As such the provisions of Chapter 13, Lane Code (Land Divisions) regarding areas so designated will apply.

5. Land use designations in the Comprehensive Plan and implementing zoning shall be commensurate with groundwater aquifer capacities.

Additional policies regarding water resources, including wetlands, are discussed in the Fish and Wildlife section of this report, as well as in the Goal 6 and 11 sections.

Implementing Measures

As noted in the Fish and Wildlife section of this report, the County has adopted riparian setback and vegetation maintenance standards in a number of zoning districts.

A Natural Resources Zone has been applied to several wetlands (confirmed by Mike Copely, County Planner, personal communication, July 16, 1984).

Section 13.050(13) of the Lane Code addresses the provision of water in the County. This section requires lots and parcels to be served by an approved public, community, or individual water system. Aquifer and quality tests are required for public and community systems, and may be required for individual water sytems. These tests are as follows (Section 13.050(13)):

(c) Aquifer and quality tests or geological evaluation may be required by Lane County for any lot or parcel. These requirements may include, but need not be limited to, evaluation of existing well logs and preparation of a geological report on the area, and evaluation of the site by a professional geologist, or engineering geologist or full scale aquifer tests as required. In determining the detail of analysis required, the following apply:

(i) Areas designated by Board order as having problems in the quantity or quality of available water as adopted, documented in Lane Manual and filed in the office of the Department shall meet

the following requirements for all parcesl less than 20 acres in size. The applicant must affirmatively demonstrate, in a manner acceptable to Lane County, that the proposed subdivision/partition is capable of sustaining the devlopment anticipated with sufficient potable water. This demonstration must include, but need not be limited to, aquifer tests. More specifically, the aquifer test shall show coefficient of transmissivity, permeabiltiy, storage and the specific yield. The bacteriology/ chemical tests shall show compliance with standards set by the Oregon State Health Division and Lane County. The test procedure shall utilize standard acceptable practices for aquifer tests using pumped and observation wells and records of static water level, date, clock, elapsed time (in min.), depth of water, drawdown and recovery. Analysis using the non-equilibrium method (or other methods where appropriate) must be performed by a licensed geologist or engineer. A copy of all field notes and test results shall be submitted with the report, together with summary statements which indicate whether the proposed use of the aquifer could adversely impact the neighboring wells or properties or deplete the aquifer and the general impact of the proposed use.

(d) For all areas not designated as problem areas by the procedures documented in LC 13.050(13)(a) above, a pump test report or a well log report shall be supplied, unless determined by Lane County to be not necessary.

Pump test and well log reports shall be prepared according to criteria in the ordinance.

Conclusion -- Water Resources

The County has done a good job of inventorying its water resources and problems associated with those resources. The County has analyzed the ESEE consequences of conflicting uses, and has adopted some excellent implementing measures to help resolve conflicts, particularly riparian setback and vegetation maintenance standards and aquifer and quality requirements.

Wilderness Areas

Inventory

Lane County's inventory of designated wilderness areas is contained in its Recreational Resources Working Paper on a map entitled, Recreational Resources. The locations of three wilderness areas are depicted--Mt. Washington Wilderness, Three Sisters Wilderness, and Diamond Park Wilderness.

Page 4 of the Working Paper describes in general the County's role in managing such areas.

It should be noted that recently, new wilderness legislation was passed by the U.S. Congress, establishing a number of new wilderness areas in Oregon. Several of these are within Lane County. These include Rock Creek, Cummins Creek, Three Sisters Additions, Diamond Peak Additions, and Waldo Lake.

Because of the fact that Congressional action occurred so recently (after Lane County submitted its plan), it is suggested--but not required until first plan update--that the plan be amended to inventory these new areas.

Conflicting Uses/ESEE Consequences Analyses

Because of their federal ownership, remote locations and federal protection for wilderness values, the County indicates that wilderness areas are "free from County-generated conflicts" (p. 4).

Policies

Lane County has one policy addressing wilderness areas (Open Space and Scenic Areas Policy 2; Plan, p. 17):

> Lane County will recommend that no new wilderness areas be designated in the County without a complete analysis of the revenue and employment impacts to Lane County. Where designations are made, negative employment and revenue impacts should be mitigated by increasing allowable timber harvest on other public lands.

Implementing Measures

Forest resource zoning has been applied to wilderness areas. The County explains in its Recreational Resources Working Paper (p. 4) that this zoning "will pay homage to the concept of County 'protection' of them, but in practical fact they are simply out of the relm of County authority."

Conclusion--Wilderness Areas

Lane County has inventoried the three wilderness areas within its boundaries and has adopted a plan policy recommending that no new wilderness areas be designated without an analysis of revenue and employment impacts. The areas have been given forest resource zoning. It is recommended that, by first plan update, the County amend its plan to inventory the recently designated new wilderness areas.

Historic and Cultural Resources

Inventory

The Working Paper identifies each of the approximately 500 sites identified in Lane County on a preliminary inventory and survey of historic and archaeological resources. Each is identified by site number or name, by location (township, range, section) and by map symbol. Each appears on a quad map included in that document. A map symbol for each site indicates whether it is an archaeological site, a transportation site or route, a settlement feature, an agricultural site, a mining site, a logging site, a marine site, an historical site, or a natural feature.

Lane County has adopted an Historical Resources Working Paper which explains the process and criteria used in evaluating the "significance" of the 500 sites identified in the County (Addendum to the Working Paper, pp. 1-2). All sites on the National Register of Historic Places are considered significant and are in the (1C) category of the Goal 5 Rule. All sites or structures still in existence contained in the Statewide Inventory are also considered significant, and where sufficient information is available to carry out a conflicting uses analysis, a (1C) label has been given. Archaeological sites are considered (1B) sites, but the County indicates they should be given special interim protection until a data and a protective program for them are developed. All other sites identified are (1A) sites (pp. 1-2).

In all, the County determined there are 63 (1C) sites. These are listed on pages 3 and 4 of the Working Paper Addendum, along with their locations and map numbers. These sites are mapped on quadrangle maps that are included in the Working Paper. Each site has been given a map code which specifies the "theme" of the site (i.e., archaeological, transportation, settlement features, cemetery, century farm, grange hall, old barn, mining, logging, marine industry, historical site, natural landmark, and hot springs). Further information about each (1C) site that is also on the Statewide Inventory is appended to the addendum to the Working Paper. The Addendum to the Working Paper also summarizes the quality and quantity of these (1C) sites (pp. 5-9).

It should be noted that the County has indicated that several (1C) sites on the historic sites inventory in the Working Paper Addendum (pp. 3-4) were deleted by the Board of Commissioners during final plan adoption, including sites # 32, 34, 39, and 42 (Mike Copely, County Planner, personal communication, June 15, 1984). There is no indication of this in any of the resubmittal materials. Site 34 is within the Creswell UGB. However, there are no reasons presented supporting deletion of sites # 32, 39, or 42 (the Andrew Keeney House, the Paschelke House, and Fall Creek Christian Church, respectively).

Conflicting Uses/ESEE Consequences Analyses

Pages 5-9 of the Addendum to the Working Paper contain the County's conflicting uses identification and ESEE consequences analyses for the (1C) sites. These analyses are presented by category for the following categories: Transportation Sites (bridges), Settlement Features, Barns, Marine Sites, Historical Sites/Landmarks, and Archaeological Sites.

In its Working Paper, the County recognizes destruction of the structural sites as a conflict, but fails to recognize major exterior alteration as a conflicting activity. However, it is clear in the County's zoning ordinance that the County considers major exterior alteration as an activity which could conflict with historic resources. For archaeological sites, the County identifies any land use or activity which damages the integrity of the site as a conflict.

Policies

Lane County has adopted a number of plan policies which address historic and archaeological resources (Plan, pp. 12-13). These include the following:

1. A group known as the "Lane County Historic Resource Committee" is to be established and given permanent status by the Board of County Commissioners. The Committee shall represent a wide array of historical interests and the interest of property owners. Its tasks shall include: general concern with historical matters in the County; to monitor conditions affecting such resources; to devise criteria and methods for the selection of newly-designated historical resources; to advise the staff and officials of the County on proposed new historical sites and structures; to oversee the administration of the Historic Structures or Sites ordinance; and other related tasks and duties. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

2. The County shall administer the "Historic Structures or Sites" section of Lane Code Chapter 10 as a means of protecting historic resources. These regulations shall be applied to all sites contained in [the] list of "Historic Structures or Sites" referenced by the ordinance, which are sites deemed significant by the County, and therefore meriting protection from conflicting uses by a limitation of such conflicting uses.

3. The Goal 5 conflict resolution process (OAR 660-16-000 through 660-16-025) which has been applied in the selection of historical sites and structures contained in the General Plan and implemented through the "Historic Structures or

Sites" ordinance, shall continue to be applied, where appropriate, to historic sites and places prior to regulation of them.

4. The County shall seek to enlist voluntary compliance with individual landowners in the addition of their property as historical sites, and landowners shall be notified of Public Hearings, including information about inclusion as a Historical Site.

5. The County shall encourage its own agencies, and communities within the County, to emphasize their historical, geographic and other unique qualities.

6. The County shall review proposals for development or change in land use for possible impacts with designated historical sites. When proposed development or land use changes will cause harm or degradation of a designated site, such effects shall be mitigated in a satisfactory manner.

7. The County shall continually develop and refine, through review, and update, its inventory of historic sites and resources. A long-term objective shall be in the inclusion of historical sites in the County's geo-data system.

8. The County shall take advantage, where practical, of state and federal programs to assist in the identification and protection of historical resources, including the use of financial assistance from these programs.

9. The County shall work with concern local, state and federal agencies to coordinate efforts to identify and protect historical resources.

10. Archeological sites identified in the Historical Resources Working Paper and Addendum to the Historic Resources Working Paper shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. These significant sites shall be incorporated into the Lane County General Plan Policies document as Historical Resources Exhibit A.

Note: Policy 2, above, incorrectly refers to Lane Code Chapter 10, rather than Chapter 16 as its implementing measure for historic sites.

Implementing Measures

Section 16.233 of the Lane County Development Code is the Historic Structures of Sites Combining Zone (/H-RCP), the stated purpose of which is to allow the County to review building and demolition permits to

ensure historic resources are preserved. The Code specifies that "no person may alter or demolish any Historic Structure or Site" unless a permit to do so has been issued. Upon receipt of an application for such a permit, the Planning Director shall notify the Lane County Museum Director and the State Historic Preservation Officer.

A demolition permit shall be approved only if evidence is submitted demonstrating that "every reasonable effort shall be made to maintain the Historic Structure by acquisition, protection, stabilization, rehabilitation, restoration or reconstruction project (a demonstrated lack of private and public funding for maintenance of a structure is sufficient cause to allow demolition)." A permit to alter an historic site or structure shall be approved only upon submission of evidence that (a) any use or change "should be compatible with the historical nature of the property," and (2) only the minimum alteration of the structure or site and its environment necessary to achieve the intended use shall be allowed. Consideration shall be given to four alteration guidelines in satisfying the second criteria, above. These guidelines are as follows:

(1) Only the minimum alteration of the designated historic building, structure or site and its environment necessary to achieve the intended use shall be allowed.

(2) The distinguishing original qualities or character of a designated building, structure or site and its environment should not be destroyed. The removal or alteration of any historical material or distinctive architectural features should be avoided.

(3) All designated buildings, structures and sites shall be recognized as products of their own time. Alterations which have no historical basis and which seek to create an earlier appearance should be discouraged.

(4) Changes which may have taken place in the course of time are evidence of the history and development of a building, structure or site and its environment. These changes may have acquired significance in their own right and this significance shall be recognized and respected.

It must be noted that the zoning maps do not show that the combining zone has been applied to all 63 inventoried (IC) sites as intended. Specifically, the maps do not show that the combining zone is applied to (IC) sites 1-20, 24, 35, 38, 44, 45, 46, 48, 55, 57, 59 or 61. The ordinance also does not indicate which sites fall within that zone designation. This is also contrary to Historic Policy 2, which states that the zone shall be applied to all sites on a list referenced in the ordinance.

Objections

1. The Oregon Department of Transportation (ODOT) has objected because of a conflict between the historic resources working papers and the ordinance. Specifically, ODOT finds that the historic ordinance applies only to sites and structures on the National Register of Historic Places, and does not cover other (1C) sites identified in the working papers.

2. Friends of the Oregon Coast object because of the failure of Lane County to address cultural and archaeological resources of the Big Creek Exception Area. Specifically, objectors indicate that Goal 5 requires such resources to be inventoried. Yet, according to objectors, the Exception does not address this topic "in any way." Objectors provide information indicating that such resources are common at the mouths of coastal rivers. Due to the probability of Indian graves and/or a significant archeological site at the mouth of Big Creek, and the fact that, based on the County's own definition of conflicting uses, road building, building construction and land clearing for a destination resort are considered conflicting uses, objectors believe that "the new zoning of the Renaghan property is in violation of Goal 5 until an intenstive cultural resources inventory has been conducted and this portion of Goal 5 addressed."

Response to Objections

1. ODOT has misread the Lane Code with regarding to the County's Historic Structures of Sites Combining Zone. ODOT has apparently reviewed the County ordinance which applies inside UGBs. That zone does limit the zone's application to National Register sites. However, ODOT has failed to note that the ordinance which applies outside UGB's (in rural Lane County) is somewhat different. Specifically, the rural zone does not contain language that limits application to National Register sites. Therefore, the objection is not sustained.

2. Objectors are correct that the exception for the Renaghan property does not address historic or cultural resources. However, as pointed out by the objectors themselves, the State Historic Preservation Office knows of no site on the property, nor do anthropoligists at Oregon State University. County's are required, under Goal 5, to rely on whatever information is available in producing comprehensive plans. They are not required to conduct extensive archaeological surveys. Therefore, the County's exception does not violate Goal 5 for cultural or archeological resources. If, in the event, such resources are discovered during site development, the Goal 5 Rule would have to be applied by the County, including possible plan amendments.

Conclusion--Historic Resources

Lane County has adopted an inventory of historic resources and has analyzed conflicts and ESEE consequences of conflicts with these resources. The County has a combining zone which is intended to be applied to historic sites.

The zone provides procedures and criteria for resolving conflicts with inventoried sites, particularly major exterior alterations and demolitions. However, the County has not applied the zone to all 63 (1C) sites identified in its plan, as intended.

Oregon Recreation Trails

Inventory

Lane County's inventory of Oregon Recreation Trails is included in its Recreational Resources Working Paper (p. 15, Recreational Resources Map).

The County describes these trails as follows:

1. Coast Range Trail--not developed. Funding limitations and the desire of the state not to condemn private land for trail development suggests that it will be some time before it is completed. Mapped route is general in nature.

2. TransAmerica Bike Trail--fully signed and marked, with route maps published by the state.

3. Eugene to Pacific Crest Trail--a few portions are developed with work now underway by a local chapter of the Sierra Club. Uses bikeways in Eugene Area.

4. High Divide Trail--proposal only, same as #1 above.

5. Coast Trail--Lane County developed portions occur in Cape Perpetua and Heceta Head recreational areas, with preparations being made for inclusion of Oregon Dunes National Recreation Area lands. No private lands involved at this point.

6. Coast Bicycle Trail--designated, signed and mapped.

7. Pacific Crest Trail--fully developed. No private lands involved in Lane County. Located in Willamette National Forest.

These descriptions are basically accurate. It should be noted that, according to Jack Remington, State Trails Coordinator, ODOT has proposed general routes for the unbuilt portions of the Eugene to Pacific Crest Trail and the Coast Trail. Portions of the High Divide Trail already exist since they follow several other developed trails. However, only general routes have been proposed for the unbuilt portions of the High Divide Trail (personal communication, June 20, 1984).

The general location of each of the seven trails is depicted on the County's Recreational Resources Map in the Working Paper. No specific locations have been provided in either the text or on the map, however, for existing trails. Specific routes for the Pacific Crest Trail, the TransAmerica Bike Trail, the Coast Bike Route, and portions of the High Divide Trail and the Eugene to Pacific Crest Trail are known, since these trails are developed.

Conflicting Uses/ESEE Consequences Analyses

The County has not identified specific conflicting uses with the seven proposed or existing Oregon Recreation Trails.

However, the Coast Bicycle Trail, TransAmerica Bike Trail and the Pacific Crest Trail are fully developed and are either on federal or other public lands or on public rights-of-way, as are portions of Eugene to Pacific Crest Trail and portions of the Coast Trail. Therefore, the County concludes that they are likely to experience few conflicts.

No specific routes for the Coast Range Trail or the unbuilt segments of the Coast Trail, the Eugene to Pacific Crest Trail, or the High Divide Trail have been determined by ODOT. Although most of these proposed trails would cross public lands, segments of these trails are proposed to cross private lands, and conflicts could occur. However, since their locations are only generally known at this time, specific conflicts cannot be determined.

Policies

Lane County's recreational trails policy (Open Space and Scenic Areas Policy 4, Plan, p. 17) is:

> The County shall acknowledge recreational trails which are developed by the Oregon Parks Outdoor Recreation Plan and shall display the routes on its Plan documents.

Lane County lacks a policy to cooperate with ODOT in the protection of existing trails. The County also lacks a policy to coordinate with the Oregon Department of Transportation in applying the steps of the Goal 5 Rule during any future identification or establishment of proposed trails or trail segments.

Implementing Measures

No specific implementing measures have been adopted by Lane County for the protection and/or resolution of conflicts with existing or proposed trails.

Conclusion--Recreation Trails

Lane County has identified the seven existing or potential state recreation trails in its Recreational Resources Working Paper, but has not provided a description or map of the specific locations of existing trails. It has, however, recognized the fact that ODOT has maps of these trails. The County lacks a plan policy to coordinate with ODOT in applying the Goal 5 Rule if and when any of the unbuilt trail segments are identified or proposed for construction or designation. The County also lacks a policy to cooperate with ODOT in the protection of existing trails.

No conflicts exist with developed trails and trail segments, and therefore, special implementing measures are not necessary in those areas. Implementing measures have not been adopted for the protection and/or resolution of conflicts with the proposed trails and trail segments, nor are any appropriate at this time since their specific locations are not yet known.

Potential and Approved Scenic Rivers and Waterways

Inventory

The County's Recreational Resources Working Paper briefly describes both the State Scenic Waterways Program and the Federal Wild and Scenic Rivers Program (p. 16). The County correctly notes that there are no designated federal rivers in Lane County at this time. However, the County fails to note that during the 1983 Legislative Session, a bill was passed (HB 2435) designating Waldo Lake and the North Fork of the Middle Fork of the Willamette River (from Waldo Lake to about one mile upstream from Westfir) as a State Scenic Waterway. The County's working paper incorrectly indicates there are no state designated waterways.

The Working Paper correctly recognizes that five river stretches are on the U.S. Interior Department's inventory of potential scenic rivers (p. 17):

1. Upper McKenzie (from Tamolitch Falls to McKenzie Bridge);

2. Steamboat Creek (from its source to its confluence with the Umpqua River);

3. Alsea (entire length; only a small upper portion in Lane County);

4. Siuslaw (from its source to Lake Creek confluence); and

5. Willamette (from Eugene to Corvallis).

All five of these river segments are shown in a general fashion on the Recreational Resources Map contained in the County's Recreational Resources Working Paper.

The County correctly notes that the Upper McKenzie (from Tamolitch Falls to McKenzie Bridge) is also on the state potential scenic waterways list. However, the County fails to mention that Steamboat Creek and Alsea River (the same stretches as on the federal potential list) are also on the state potential list.

The County recognizes that the area affected along each of the inventoried rivers is one-quarter mile on each side measured from ordinary high water (p. 16).

Policies

The following policy has been adopted regarding wild and scenic rivers (Open Space and Scenic Areas Policy 5, Plan, p. 17):

> The County shall cooperate with appropriate state and federal agencies in the selection of scenic and wild rivers.

This policy does not commit the County to coordinate with those agencies in applying the Goal 5 Rule process in studying rivers for possible state or federal designation and in making such selections.

Conflicting Uses/ESEE Consequences Analyses

Lane County suggests that conflicting uses and ESEE/consequences should be identified at the time a river is studied for designation (pp. 17-18). The County also suggests that resource zoning should provide protection for such rivers (p. 17).

Implementing Measures

Waldo Lake and the stretch of the North Fork of the Middle Fork of the Willamette River that is designated as a State Scenic Waterway are located entirely on federal land (confirmed by Jim Payne, State Rivers Program Coordinator, personal communication, June 14, 1984). The portion of the Alsea River that is on the state and federal potential lists is also in federal ownership. The Willamette River is within the Willamette River Greenway, to which the County has applied a Greenway Development ordinance (see the Goal 15 section of this report for details).

Portions of the McKenzie River, Steamboat Creek, and the Siuslaw River flow through federally-owned lands. However, some stretches are in non-federal, private ownership. Developed and committed exceptions have been taken along all of these stretches of the McKenzie and Siuslaw Rivers and Steamboat Creek, most of which have been found to be valid under the Goal 2 analysis in this report. However, as noted in that report section, exceptions in plats 23, 204, 230 (Siuslaw River), 627, 628, 629, 630 and 631 (McKenzie River) have not been justified. No needs exceptions have been taken along the McKenzie River, Steamboat Creek, or the Siuslaw River. It has been the practice of the Commission to require jurisdictions to analyze the ESEE consequences of taking needs exceptions along potential federal or state scenic rivers and waterways, but not to require such an analysis for built and committed exceptions.

Conclusion--Scenic Rivers and Waterways

Lane County has inventoried five federal potential scenic rivers and one state potential scenic waterway (the McKenzie River) but has failed to note that, besides the McKenzie River, two of the federal potential rivers are also potential state waterways (i.e., the Alsea River and Steamboat Creek). The County has also failed to mention that Waldo Lake and the North Fork of the Middle Fork of the Willamette River are designated State Scenic Waterways.

The County lacks a policy commitment to coordinate with appropriate state and federal agencies in applying the Goal 5 Rule process in studying rivers for possible designation as well as in the actual selection of rivers for designation.

Built and committed exceptions have been taken along all nonfederal lands along state and federal potential scenic rivers, some of which have not been found to be valid under Goal 2. The County needs to either not take these exceptions, or justify them as being built or committed.

PART II--EUGENE/SPRINGFIELD METROPOLITAN AREA OUTSIDE THE METRO UGB

In August, 1982, the Commission reviewed and acknowledged the Eugene/Springfield Metro Area Plan and implementing measures for lands within the Metro UGB. However, the cities of Eugene and Springfield as well as Lane County were granted a continuance for lands outside the UGB but within the Metro Planning Area Boundary in order to comply with Goal 5, (as well as several other Goals). The following section of this report analyzes Lane County's responses to the "in-order-to-comply" requirements contained in the August, 1982 staff report, adopted by the Commission.

Re: 509-PA19-05299

December 17, 2019

Dear Mr. Darnielle:

Amber Bell provided an email dated December 12, 2019 with attachments of submissions from Michael Farthing and Sean Malone. December 12, 2019 was the deadline for additional submissions with regard to the appeal of PA19-05299. While it may be as simple as a typographical error, Mr. Malone's submission is a puzzlement to me. Given the highly charged nature of the allegations being set forth in this appeal I feel the confusion it interjects into our discussion requires a response.

In the subject line of his letter, Mr. Malone references "**PA19-05298 (Goodman).**" Mr. and Mrs. Goodman own Tax Lot 18-02-11-00506, and the Planning Action number for that property is **PA19-05299**, not 05298. As Mr. Malone is aware, adjoining Tax Lot 506 is Lot 507, which is the subject of PA19-05298 and title is held by NIMPKISH, LLC.

As I have noted, the deadline for submissions of PA19-05299 was Thursday, 12/12/19. This leads me to the assumption that Mr. Malone's letter was intended to address PA19-05299, not 05298, which would correspond correctly to the reference to Goodman.

So far, so good, a simple typographical error.

The confusion arises in the second page of Mr. Malone's December 12, 2019 letter. In his next to last paragraph Mr. Malone cites Lane Code 16.211(8)(c)(i) with a reference to the requirement for an owner to provide for a "secondary fuel break on land surrounding the dwelling or manufactured

dwelling that is owned or controlled by the owner..." The reference to code is correct, but then the train goes off the tracks:

> "Because the subject property is not large enough to satisfy the secondary fuel break of 100 feet and because the adjacent property to the south is controlled by the same entities/individuals, the applicant must obtain a secondary fuel break easement on tax lot 508, the property to the south of the subject property."

As seems to be a continuing problem in the appeals filed by LandWatch Lane County, they simply have not reviewed the application materials but are quite willing to interject factually unfounded statements such as the above that require a response from the applicant, and even then continue to sprinkle confusion over the application under review.

Enclosed with this letter at Attachment 1 is the Plot Plan that was submitted for PA19-05299, Tax Lot 506. This plot plan clearly shows that the primary fuel break is contained on Lot 506 and the secondary fuel break is also contained on Lot 506 except to the point where it would extend onto property to the west, formerly Lots 401 and 404, now remapped to be 404 only.

Please note the Plot Plan shows the distance from the proposed dwelling to the south boundary is "628' to Property Line." The primary and secondary fuel breaks extend approximately 180 feet into this distance, but at its outer edge remains approximately 448 feet from the south boundary of the subject property (Lot 506). Goodmans do not own or control any part of Lot 404 and the secondary fuel break does not extend onto any other adjoining property.

Enclosed at Attachment 2 is the Parcel Map displaying the location of the proposed dwelling, noting its proximity to the adjoining parcels in all directions.

As to PA19-05298, applicable to Tax Lot 507 and owned by NIMPKISH, LLC. the proposed secondary fuel break could extend onto Tax Lot 506 if an easement were granted for such purposes. As was discussed in our letter of November 20, 2019 submitted in response to the appeal filed on PA19-05298, the owners of Tax Lot 506, Goodmans, have agreed to grant an easement in favor of NIMPKISH, LLC beneficial to Tax Lot 507 for purposes of a secondary fuel break, if such a requirement is made by the Hearings Official. A map depicting the area that would be subject to an easement for fuel break purposes, beneficial to Tax Lot 507 and encumbering Tax Lot 506 was submitted into the record for PA19-05298. A copy of that map is enclosed at Attachment 3.

As Mr. Malone has referenced his December 12, 2019 letter to PA19-05298 and the record was reopened to the appeal of that application I am providing a copy of this letter to be included in the record in the event my assumption of Mr. Malone's intent is incorrect and for some reason he feels his comments are applicable to Tax Lot 507 and PA19-05298.

Continuing with the review of Mr. Malone's December 12, 2019 letter, the position of LandWatch continues to be that Lane County has operated without an acknowledged Comprehensive Plan since

1996. Mr. Malone makes the statement at the top of page 2 that "the only issues addressed (in 1996) were wetlands, riparian setbacks on class I and II streams, the mineral and aggregate inventory, and sensitive bird habitat." The implication, of course, is that for 23 years Lane County has not had a Comprehensive Plan that addressed the elements of big game habitat reviewed in the Flora and Fauna Working Paper of 12 years prior.

As we have previously discussed on page 22 of their Acknowledgement of Compliance, Lane County, dated September 13, 1984 the Land Conservation and Development Commission offered the following:

> "The strength of their forest lands conservation program is the F-1 zone which prohibits the siting of all dwellings (other than those required to be authorized by state statutes). This zone is applied to 2,449,775 acres of Lane County's forest lands.
> The County's F-2 zone is applied to 145,356 acres of privately owned lands which consist, generally, of large lot rural residential parcels, nonproductive or marginally productive resource lands, or underutilized resource lands..."

The striking analysis is in the proportion of forestland, 94.4% (2,449,775 / 2,595,131), that prohibits the placement of dwellings. The F2 zoned land encompasses 5.6% of the county's forest lands (145,356 / 2,595,131).

The 2,595,131 acres of forestland, divided by 80 acres (the most restrictive of proposals made by ODFW for residential density), would allow for 32,439 dwellings in the County's forest zoned lands. If that same number of dwellings was then limited to only the F2 zoned lands, which it effectively is as the F2 zoning is the only forest zone that allows for dwellings, the 145,356 acres divided by 32,439 dwellings would allow for one dwelling every 4.48 acres. (145,356 / 31,439 = 4.48)

In other words, Lane County could allow a dwelling on every 4.48 acres of F2 zoned land and still support an overall density standard of only one dwelling on every 80 acres of forest zoned land in the county. If the peripheral big game habitat standard of one dwelling per 40 acres was incorporated into the discussion as it is applicable the number of allowed dwellings would, of course, increase dramatically.

This analysis is simply mathematical, we do not comport to say that such an analysis should be adopted by the county. What is provided is that Lane County applies the Template Test to lawfully created units of land in reviewing the application for a forest zoned dwelling because the overall residential density question was fully resolved in 1984 in the adoption of the F1 zoning and its prohibition of dwellings. It is for that reason no additional discussion has taken place with regards to the game habitat recommendations of overall density in the subsequent reviews of the Comprehensive Plan.

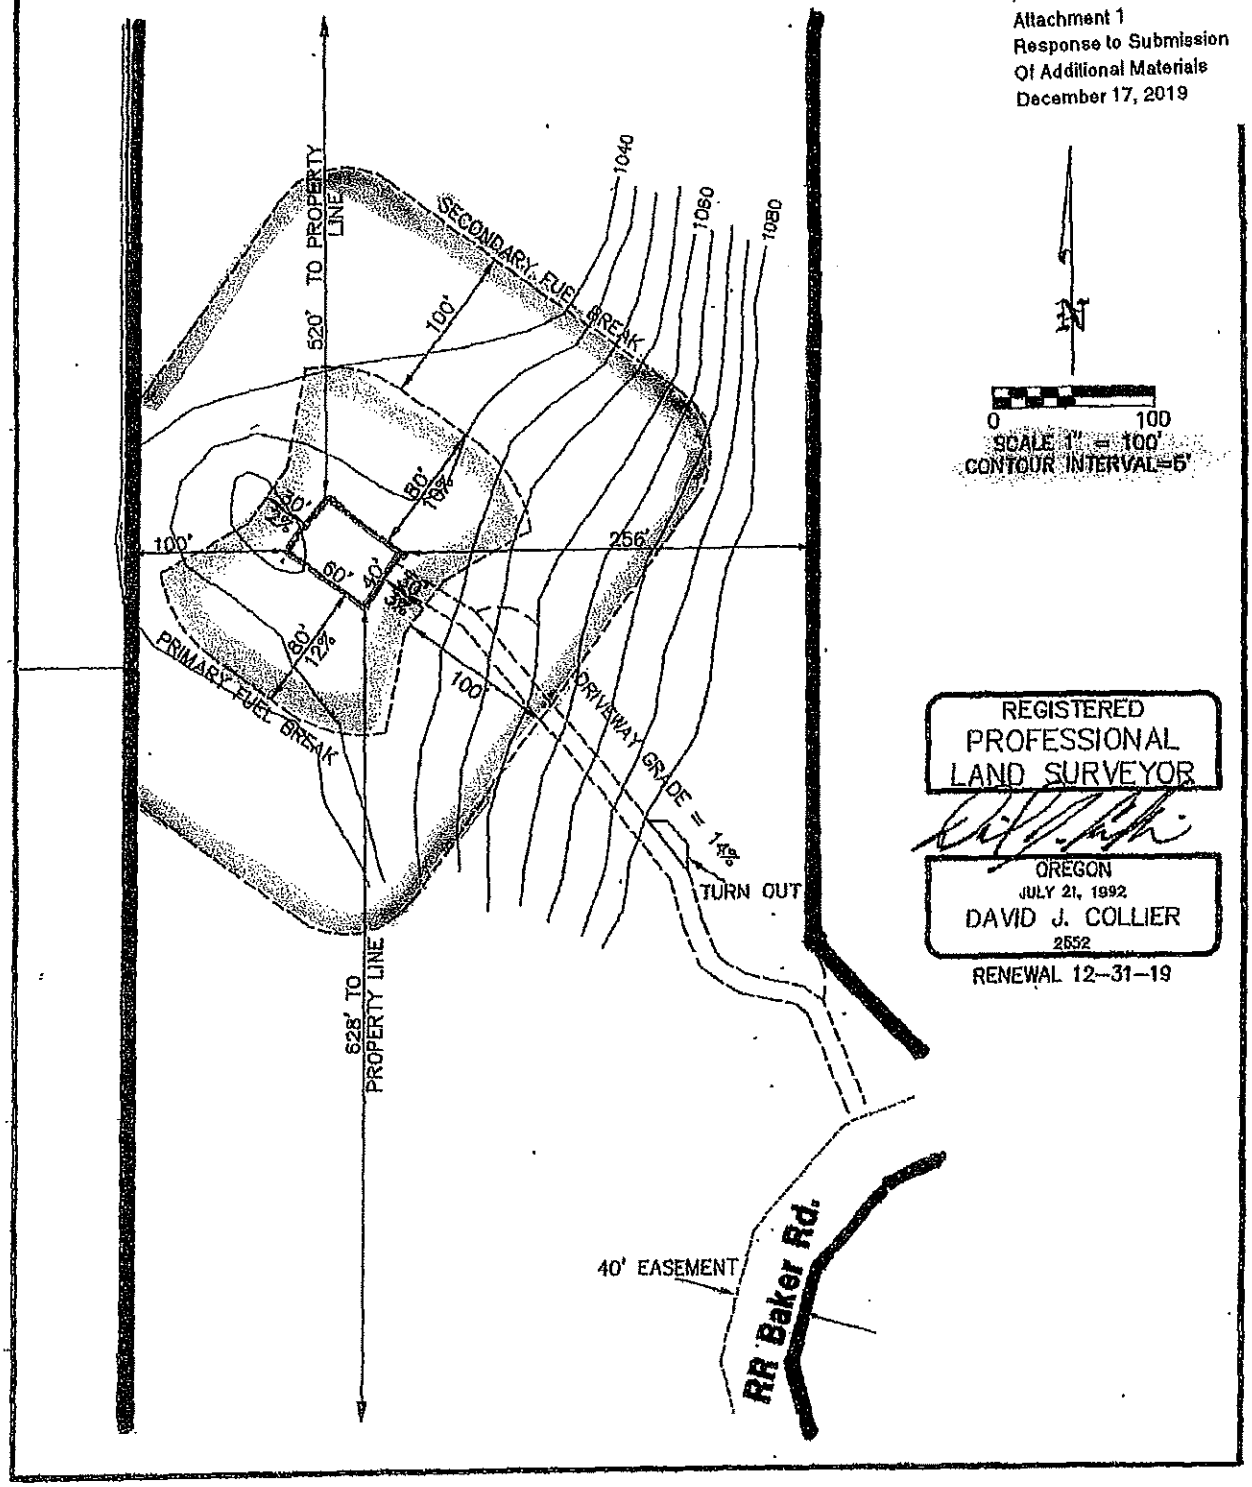
When Lane County's adoption of the F2 zoning was revised to provide for the Template Test standards for dwelling approval the proposed zoning code was reviewed by LCDC and approved as being in

compliance with the County's Comprehensive Plan. Had the zoning code not been in compliance with the Comprehensive Plan the code revision would not have been acknowledged by the State of Oregon. It is inconceivable to even suggest that anything other than that action could have taken place.

I am submitting this letter for the record in response to the submission of additional materials as presented by the Appellants. The deadline for response to those submitted materials is January 9, 2019 and we may well have additional submissions to make prior to that deadline. The reason for my submission of this response is to be able to include it in the record, as it may be applicable, for PA19-05298, the record of which will close on December 19, 2019.

Thank you for your attention to this submission.

Sincerely,



Jim Belknap

HAND DELIVERED

Gary Darnielle, Lane County Hearings Official
c/o Kevin Gilbride, Planner
Lane County Land Management Division
3050 North Delta Highway
Eugene, OR 97408

Re: **PA 19-05298 (Nimpkish LLC)**
Appeal of Director Approval of Template Dwelling in F-2 zone
by Landwatch Lane County
Applicant's Supplemental Post-Hearing Evidentiary Submission

Mr. Darnielle,

Thank you for extending the open record period for new evidence. Please enter this letter and attached documents into the record of the above-referenced appeal that I am submitting on behalf of the Applicant and in support of the Director's decision and findings.

At this time, Mr. Belknap and I are submitting County orders, reports, maps and other documents that relate and respond to the various allegations made by Mr. Malone in his testimony and letters and also to Mr. Mulkey's various speculations. I readily acknowledge that Mr. Belknap's letter and exhibits provide the bulk of our evidentiary response as it relates to the siting and road standards as well as other, topics like how does a statement in a 37-year old preliminary planning document have any relevance to a single lot land use application in 2019? I commend Mr. Belknap for his thoroughness and attention to detail.

In sharp contrast to Mr. Belknap's evidentiary offering, neither Mr. Mulkey nor Mr. Malone or anyone else from LandWatch or 1000 Friends have provided any physical evidence, legal analysis or professional opinion or anything credible that might support either of their speculative and baseless allegations. The

policies in the preliminary Flora and Fauna Working Papers, and Policy 11 in particular, were implemented when the F-1 zoning was adopted and acknowledged in 1984 which did not allow residences on over 94% of the County's designated forest land. Those policies do not relate to 2019 forest template dwelling applications in any legal manner.

As further confirmation of this legal conclusion, I am enclosing copy of a November 25, 2019 Hearings Official decision **(PA 18-05913, Green)** that affirmed the Director's decision approving a forest template dwelling application on a 10-acre parcel outside of Cottage Grove. *See* Exhibit "A". In that decision, Ms. Davies rejected LandWatch's identical Goal 5 argument in a lengthy analysis (p 8-13) in which she concluded:

> ". . . For the reasons discussed above, Policy 11 does not apply directly as mandatory approval criteria to the subject forest template dwelling application."

Id at 12. After that, she provides additional rationale to support her conclusion. In fact, the entire decision is relevant, timely and very comprehensive.

Lane County and Goal 5

After the public hearing, we set out to find how Lane County reacted to the new Goal 5 rule, OAR 660-023, adopted in 1996 by LCDC. Mr. Mann researched County records and uncovered the following documents which we are now submitting into the record of this appeal. They include:

(1) **BOARD ORDER NO. 96-4-10-1**
In the Matter of Approving a Work Program for the Periodic Review of the Rural Comprehensive Plan. *See* attached as Exhibit "B".

This Order dated April 10, 1996, established a five-project Periodic Review Work Program for the Rural Comprehensive Plan which included a Goal 5 update (#4) and review of the F-2 zone (#5). Both of those projects were excluded from the Work Program at the time of its adoption.

(2) BOARD MINUTES (April 10, 1996)

These are the minutes of the Board's public hearing and deliberations prior to adoption of the Periodic Review Work Program. *See* attached as Exhibit "C".

(3) BOARD ORDER NO. 97-10-21-3
In the Matter of adopting amendments to the timelines for the approved work program for the periodic review of Lane County Rural Comprehensive Plan project 1 work plans: Goals 11 and 14. *See* attached as Exhibit "D".

(4) BOARD ORDER NO. 00-6-27-5
In the Matter of adopting amendments to the timelines for the approved work program for the periodic review of the Lane County Rural comprehensive Plan. *See* attached as Exhibit "E".

These two Orders modified the Periodic Review Work Program but had no affect or impact on the Goal 5 update project.

(5) ORDINANCE NO. 5-02
In the Matter of amending chapter 16 of Lane County to modify farm and forest zone classifications and regulations (LC 16.090, LC 16.100, LC 16.211 and LC 16.212) and declaring an emergency.

Selected portions of this ordinance are provided relating to the new F-2 zoning district which included a template dwelling provision that is essentially the version that is now in effect. *See* Exhibit "F". The County's findings indicate the reason for the change is for "consistency" with State law (ORS 215.750) and LCDC regulations (OAR 660-006-0027).

As for what happened to the Goal 5 update project, there is no consensus among those who were present when the Periodic Review Work Program was unfolded in 1996 as to what happened over the next decade and beyond. There is a belief that it was not a mandate from DLCD/ LCDC and that because of budget constraints, it was never moved forward in the planning program and budget discussions. Whatever happened, the lack of Goal 5 update had no impact on the

County finally enacting a template dwelling provision in 2002 that mirrored State and LCDC versions.

For now, the attached materials provide a partial look at Goal 5 in Lane County. Certainly, until recently, not much attention has been devoted to Goal 5 beyond its implementation in 1984. For PAPA's, Goal 5 has relevance as described in *Cattoche* but not so for template dwellings. We look forward to whatever evidence LandWatch is able to produce that will provide some support for their allegations.

Sincerely,

Michael E. Farthing

LANE COUNTY HEARINGS OFFICIAL
APPEAL OF A PLANNING DIRECTOR APPROVAL OF A TEMPLATE DWELLING WITHIN AN F-2 DISTRICT

Application Summary

On December 6, 2018, the applicant submitted a request to establish a dwelling in the Impacted Forest Lands (F-2) zone to Lane County Land Management Division. The application materials were reviewed by staff and the application was deemed incomplete on December 28, 2018. Additional information was received from the applicant on January 4, 2019, and on February 11, 2019, the application was deemed complete.

On March 29, 2019, referral responses were solicited from affected agencies, service providers and surrounding property owners. In order to allow time to obtain comments from the Oregon Department of Aviation, a Waiver of Statutory Timelines was provided on June 17, 2019. Referral comments from the Oregon Department of Aviation was received on July 3, 2019, and final processing this application commenced. On July 18, 2019, the Director issued a determination that the subject property complied with the applicable standards and criteria for the Forest Template Dwelling pursuant to LC 16.211(5) and (8). Notice of the determination was mailed to surrounding property owners, and on July 30, 2019, a timely appeal was submitted by LandWatch Lane County. The Director reviewed the appeal and elected to reconsider the decision, based mainly on the appellant's assertion that the wrong approval criteria had been applied.

A reconsidered decision approving the proposal was issued on August 2, 2019. On August 14, 2019, LandWatch Lane County again submitted a timely appeal of the Director's reconsidered decision.

Parties of Record

LandWatch Lane County	Connie and Charles Green
Don Nickell	Michael Farthing

Application History

Hearing Date: October 24, 2019

Decision Date: November 25, 2019

Appeal Deadline

An appeal must be filed within 12 days of the issuance of this decision, using the form provided by the Lane County Land Management Division. The appeal will be considered by the Lane County Board of Commissioners.

Statement of Criteria

Lane Code 16.211(5)&(8)

Findings of Fact

1. The property subject to this application, hereinafter referred to as the "subject property," is located on tax lot 301, assessor's map 20-03-21, approximately one mile north of the City of Cottage Grove's Urban Growth Boundary and west of Highway 99 off of Abbott Lane.

   The subject property is approximately 10.28 acres in size and is currently vacant. Elevation of the property ranges from approximately 850 feet MSL in the southeast corner to 950 MSL in the northwest corner. County LiDAR resources show that slopes range from 5% to 30% with the most gentle slopes on the southern half of the subject property and steeper slopes on the northern half. Open pasture land makes up the southern one-third of the property with the northern two-thirds in timber.

   The subject property is designated Forest in the Lane County Rural Comprehensive Plan, and is zoned Impacted Forest Land (F-2, RCP), consistent with that plan designation.

2. The property abuts Impacted Forest Lands (F-2) zoned properties to the north, east and south. The property to the west is zoned Exclusive Farm Use (E-40). The surrounding area can generally be characterized as a mix of forest, farm, and rural residential uses. The property does not contain floodplain, a Class 1 stream, or mapped wetlands, but does contain the Airport Safety Combining Zone for the Cottage Grove Airport.

3. Other dwellings are located some distance to the northeast and the southwest of the property.

4. The subject property is made up primarily of soils that are productive for forestry.

5. The property is crossed by a road running east/west approximately one third of the distance of the length of the property from the southern property line.

Decision

THE PLANNING DIRECTOR DECISION APPROVING THE REQUEST (PA 18-05913) BY CONNIE GREEN FOR A TEMPLATE FOREST DWELLING ON TAX LOT 301, ASSESSOR'S MAP 20-03-21 IS AFFIRMED.

Justification for the Decision

The subject property is zoned F–2 Impacted Forest Land. The applicant is requesting approval to construct a single–family dwelling as provided by Lane Code 16.211(5)(c). Dwellings authorized by this provision are known as "forest template" dwellings because some of the applicable approval criteria of Lane Code 16.211(5) must be analyzed through the placement of a 160–acre square template centered on the center of the subject property (tract). Additionally, the placement of a dwelling on impacted forest land must meet the siting standards provided by Lane Code 16.211(8).

Under the template dwelling regulations, the standards differ depending upon the soil productivity of the property upon which the dwelling is to be placed. In the present case, the applicant has chosen to request approval under Lane Code 16.211(5)(c)(iii), which is the most rigorous of the three tests, applicable to lots or parcels that are predominantly composed of soils capable of producing 85 cubic feet per acre per year of wood fiber. That test requires a showing that all or part of at least 11 other lots or parcels that existed prior to January 1, 1993, lie within a 160–acre square centered on the subject property (tract). It also requires that at least three dwellings existed on January 1, 1993, and continues to exist, on those other lots or parcels.

The allegations of error raised by the Appellant in its appeal are as follows:

1. ***The Planning Director erred in applying the wrong version of LC 16.211.***

The appellant is correct that the wrong approval criteria were initially applied to the application. The application was submitted on December 6, 2018, prior to the adoption of Ordinance No. 18-08, which amended Lane Code Chapter 16 resource zones. Therefore, Lane Code Chapter 16.211(5) and (6) apply to the application instead of the newly adopted and now remanded Lane Code 16.211(3)(o), (q), and (r), and subsections (5) and (6). This wrong approval criteria were evaluated in the initial Director's decision and the reconsidered decision. Therefore, staff subsequently evaluated the correct approval criteria and provided those findings for the Hearing's Official.

This allegation of error is moot.

2. ***The Planning Director erred in relying on evidence from unrelated planning actions, for a different tax lot, that is not part of the record.***

In its initial appeal, appellant raised the issue of non-compliant access to the subject property. In response, staff introduced into the record two Verification of Condition applications for template dwelling approvals on adjacent lots. They are department file No. 509-PA02-05797 and 509-PA03-05055. Staff was aware of information that contradicted appellant's assertion, and it was not error for that information to be introduced to demonstrate to the decision maker that it is feasible that the access can meet the applicable road standards of Lane Code 16.211(8)(e), given that the same access has already been inspected twice for compliance with the same standard.

This allegation of error is denied.

3. ***The applicant failed to provide evidence regarding slope, and the Planning Director erred in processing a reconsideration as a means of providing that evidence.***

Staff had access to contour and LiDAR information that was relevant to an issue raised in appellant's initial appeal. This information was provided as exhibits of the Planning Director's decision. It was the Planning Director's prerogative to reconsider the decision to bolster inadequate findings of the initial decision alleged in the initial appeal.

This allegation of error is denied.

4. ***The applicant's site plan fails to indicate the boundaries of the subject property, setbacks from contiguous property boundaries, the development area in relation to the subject property, or the proposed turnouts and turnarounds.***

After the initial appeal was filed, it was determined that the application lacked certain evidence sufficient to satisfy all of the applicable approval criteria. The Planning Director reconsidered the decision following receipt of additional evidence, including a site plan that showed property boundaries and required setbacks. The Planning Director determined, based on past planning actions approving the same access for two template dwellings located south of the subject property, that it was feasible that the requirements regarding turnarounds and turnouts could be satisfied.

This allegation of error is denied.

5. ***The dwelling site is not consistent with the requirements of LC 16.211(8) because it requires the applicant to unnecessarily intrude into forest lands.***

Dwelling Siting Requirements

LC 16.211(8) provides the siting standards for dwellings in the F-2 zone. Subsection (a) addresses setbacks, subsection (b) provides that forest lands used to site access roads, service corridors, and structures shall be minimized, subsection (c) provides fire siting standards for dwellings and structures, and subsection (e) provides fire siting standards for roads and driveways. The standards in subsections (a) and (b) are to be weighed together with the requirements in subsections (c) and (e) to identify the building site. Most of the requirements and standards or not absolutes, but the considerations must be weighed to arrive at a defensible siting location.

The appellant raises the following specific allegations of error related to the approval of the dwelling siting.

- ***The proposed dwelling site requires the applicant to unnecessarily intrude into forest lands***

- *The proposed dwelling site is not sited near existing roads*
- *The proposed north/south driveway requires slopes greater than 20 percent*
- *It is unnecessary to extend the driveway through steep slopes and a forested area*

Appellant relies heavily on LC 16.211(8)(a)(i), which provides that dwellings *shall* be sited "[n]ear dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent." (emphasis added). As explained above, while subsection (8)(a)(i) uses the mandatory language "shall," the standards are not absolutes, and the siting of the dwelling must take into account all of the considerations, which are designed to make these non-forest uses "compatible with forest operations and agriculture" and to "conserve values found on forest lands."

Appellant asserts that the dwellings should be sited on the most level portion of the property south of the access road on the eastern portion of the property. The applicant explains that that portion of the property is planted pasture, is used for grazing cattle, and has been changed to farm deferral. LC 16.211(8) provides that the siting standards are to make proposed dwellings compatible with agriculture as well as forest operations, and to conserves values found on forest lands. The Hearings Official concludes that "values found on forest lands" are often farm values, not just forest values. Accordingly, the choice not to site the dwelling on land use for grazing is justified.

Appellants also assert that the dwelling should be sited adjacent to the existing access road, and should not be sited off of the roadway, thus requiring a driveway that necessitates removal of additional trees, and the use of higher rated soils. With regard to the quality of the soils, the applicant asserts that the site for the dwelling includes a bare section that has not historically been productive for the growth of trees. Appellant counters that assertion, relying on the soils mapping and eight aerial photographs of the property. All but one of those photographs depict, relatively clearly, a bare spot where the proposed dwelling site is to be located. While the soils map does not indicate any less productive soil at this location, the Hearings Official concludes that the aerial photographs support applicant's assertion that the proposed dwelling site is a less productive area than others on the property.

As to whether that spot is more or less level than others on the property, the record reflects that, if the spot is level, it is because the applicant played some role in leveling it. There is evidence in the record that a passage was recently cleared along the path of the proposed driveway in order to clear downed trees as a result of winter storms. The applicant then used that opportunity to clear and/or level the area. Whether such activity was permitted is not within the scope of this hearing. The Hearings Official's determination to approve this location is based largely on the photographic evidence supporting applicant's assertion that this location was determined based on the historic absence of growth of trees on this spot. The fact that the proposed location may not be

the most level spot on the property is outweighed by the fact that the proposed location will require a minimum amount of tree removal because it is already bare.

LC 16.211(8)(a)(i) favors locating dwelling near existing roads. Appellant asserts that, whether the proposed driveway is 100 feet or longer, siting the dwelling away from the existing road violates the siting standards. Appellant also asserts the dwelling should be located on the eastern side of the property, near existing dwellings. The Hearings Official determines that the obvious choice of this proposed location based on historic anemic growth patterns and preservation of farm uses to the south of the road is sufficient to outweigh the other factors, and is sufficient to support the proposed location.

Fuel Breaks

LC 16.211(8)(c)(i) requires primary and secondary fuel breaks for proposed dwellings. The primary fuel break must extend 30 feet in all directions around the dwelling. Where a dwelling is constructed on slopes, an additional primary fuel break downslope is required. The Planning Director determined that the downslope direction of the development site is from northwest to southeast at somewhere between 3% and 12% slope. The Planning Director thus determined that an additional 50 feet of primary fuel break was required in the downslope direction.

Appellant alleges that the Planning Director erred "in finding an additional 5' of primary fuel break [is] only required in the NE to SW direction." The Hearings Official disagrees that the Planning Director required an additional primary fuel break in the NE to SW direction. Rather, the Planning Director required an additional primary fuel break to the southeast of the development site, as depicted on the applicant's site plan. Condition of Approval #7 is consistent with this finding.

However, the site plan also shows the secondary fuel break (100 feet beyond the primary fuel break) beyond the western property boundary. LC 16.211(8)(c)(i) requires the secondary fuel break to be located on land owned or controlled by the owner. Accordingly, COA 7 is revised as follows:

"Physically establish the primary and secondary fuel breaks in compliance with Lane Code 16.211(8)(c). **These fuel breaks shall be maintained in perpetuity.** The minimum primary safety zone surrounding the proposed dwelling shall be at least 30 feet plus the additional 50 feet of Safety Zone Down Slope, as applicable. The minimum secondary fuel breaks surrounding the primary safety zone shall be at least 100 feet on lands owned or controlled by the owner. Where the secondary fuel break required extends beyond the boundaries of the subject property, the applicant shall provide recorded documentation that she is authorized to maintain the fuel break on the adjacent property."

This allegation of error is denied.

6. The challenged decision fails to address LC Chapter 15 driveway spacing requirements.

Lane County Transportation Planning referral comments are included in the record. Based on those comments, the Planning Director imposed conditions of approval 4 and 5. The comments provide findings for the relevant Chapter 15 requirements, and those findings are adopted by reference in support of this decision. As conditioned, compliance with LC Chapter 15 is satisfied.

Appellant also addresses the LC Chapter 16 requirements for roads and driveways, which are discussed below.

The subject property is traversed by an east/west access easement that has been determined adequate in two prior land use proceedings. At the appeal hearing, the parties discussed the distinction between a road and a driveway. For purposes of LC 16.211(8)(e), the term "road" means "a way of access used for more than one use and accessory uses dwelling or manufactured dwelling." The term "driveway" means "a way of access used for only one dwelling or manufactured dwelling."

Turnarounds

LC 16.211(8)(e)(ii) requires turnarounds spaced not more than 500 feet apart for dead end roads over 200 feet in length. The record is not clear whether the road is a dead end road. However, appellant asserts that it is, and the applicant proposes turnarounds that comply with this requirement. The proposal would require turnarounds be constructed on the property to the east, tax lot 300. Any easement created or modified to provide access to the subject property would require language that includes the ability to provide these proposed turnarounds. Condition of Approval #4 is modified as follows to accommodate that requirement:

"Private access easements serving the subject property must comply with Lane Code 15.055 and specifically provide for required turnarounds."

Turnouts

Turnouts are the driveway's counterpart to turnarounds for roads. LC 16.211(8)(e)(vi) requires turnouts (20-foot long by 8-foot wide passage space; six inches gravel) for any driveway that exceeds 200 feet. The proposed driveway measures approximately 228 feet, and will include a turnout. The driveway slope is estimated to be approximately 8% grade at its steepest. However, LC 16.211(8)(e)(iv) allows grades up to 16% and up to 20% for up to 100 feet in certain circumstances. Any grades in excess of 8% require documentation from the applicable fire protection district or a licensed engineer.

The record includes a letter dated October 23, 2019 from South Lane County Fire & Rescue. It acknowledges that a portion of the driveway exceeds 10% grade, but that "we have driven it and if *road* is maintained at current condition we can access it." (Emphasis

added). Opponent again attempts to make the distinction between a road and driveway, and that the letter's use of the term "road," where italicized above, means that the fire district had not acknowledged the safety of the driveway. The Hearings Official agrees that the letter's use of the two terms is confusing. However, it appears clear that the fire district letter intended to acknowledge the safety of both the road and the driveway. Condition of Approval #6 ensures compliance with these requirements.

This allegation of error is denied.

7. ***The challenged decision violates RCP Goal 5, Flora and Fauna Policy 11.***

Appellant argues that the County's Flora and Fauna Working Paper and RCP Goal 5, Flora and Fauna Policy 11 require a Goal 5 analysis of the conflicts between dwellings and Big Game Habitat in the context of this forest template dwelling application.

Initially, appellant relies on OAR 660-006-0025(6) for its position that RCP policies addressing Goal 5 protections are applicable to this application. OAR 660-006-0025 is the administrative rule that provides the uses that are required to be allowed (subsection (2)), uses that may be allowed outright (subsection (3)), and uses that may be allowed conditionally (subsection (4)). OAR 660-006-0027 provides the requirements for dwellings in forest zones. OAR 660-006-0025(6) provides: "Nothing in this rule relieves governing bodies from complying with other requirements contained in comprehensive plan or implementing ordinances such as the requirements addressing other resource values (e.g., Goal 5) that exist on forest lands."

The Hearings Official agrees with appellant that, under OAR 660-006-0025(6) and other applicable rulings, relevant Goal 5 comprehensive plan policies, and relevant implementing ordinances, can supplement the specific forest template dwelling approval criteria set forth in LC 16.211(5). However, the Hearings Official disagrees with appellant that OAR 660-006-0025(6) can be used to bootstrap a Goal 5 analysis where it would otherwise be precluded.

As a general rule, the Statewide Planning Goals do not apply directly to the processing of a land use application where the comprehensive plan and implementing regulations are acknowledged. Specifically, "The requirements of Goal 5 do not apply to land use decisions made pursuant to acknowledged comprehensive plans and land use regulations." OAR 660-023-0250(1). Of course, relevant and applicable comprehensive plan policies that are written and intended to apply as mandatory approval criteria (see discussion below) are applicable.

Appellant relies on RCP Goal 5 Flora and Fauna Policy 11 in support of its legal theory. Policy 11 provides:

> "Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that

limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resources zoning program."

Relying on this language, and language from the Flora and Fauna Working Paper, appellants assert that the proposed residential density that would result from the approval of the subject forest template dwelling is a conflict with Big Game Habitat and either (1) requires the county to conduct an ESEE analysis or (2) requires denial of the application for failure to comply with Policy 11.

Appellants also rely on a recent LUBA case, *Cattoche v. Lane County*, ___ Or LUBA ___ (LUBA No. 2018-109, May 22, 2019), in support of its position. In that case, LUBA took a deep dive into Lane County's comprehensive plan policies and regulations regarding Big Game Habitat. Unlike the subject application in this case, which involves a request for approval of a forest template dwelling, the challenged decision in *Cattoche* was a request for a comprehensive plan designation amendment from Forest to Non-Resource and zone change Impacted Forest Land (F-2) to Rural Residential 5-acre Minimum (RR-5).

The *Cattoche* case correctly held that the Goal 5 analysis applied in that instance; i.e., a plan amendment / zone change application. It also correctly held that where the Goal 5 analysis applies, if a conflict with an inventoried Goal 5 resource is identified, the county must conduct a full blown Goal 5 ESEE analysis. LUBA held that a county errs in simply imposing a condition of approval limiting the number of dwellings allowed, without going through the Goal 5 ESEE analysis. It is at the point of determining mitigating factors to the conflicts in the context of the ESEE analysis that the county determines what condition is appropriate to mitigate the identified conflict.

The *Cattoche* case does not address the issue presented in this case; *i.e.*, whether RCP Goal 5 Flora and Fauna Policy 11 establishes a maximum residential density that applies in the context of a forest template dwelling application. Appellant's assertion that the RCP establishes residential density maximums that are applicable to this permit application is based on numerous flawed bases, as set forth below.

A. Working Papers not adopted

Appellant asserts that it is settled law that the RCP imposes a residential density standard borrowed from the ODFW recommendations of one dwelling unit per 80 acres for Major Big Game Habitat. *See* Malone letter dated October 31, 2019, page 5. The Hearings Official assumes this conclusion is taken from language in the *Cattoche* case.

It is the Flora and Fauna Working Paper that contains the alleged "Residential Density Standard" that is discussed at length in *Cattoche*. The Lane Rural Comprehensive Plan,

however, makes clear that the Working Papers are *not* adopted as policies: "The background information, including the Working Papers, is to be used to help interpret and understand General Plan approaches but is not itself designed to be adopted as legislative law."[1] It is only the adopted comprehensive plan policies themselves that are adopted "legislative law." Contrary to appellant's assertion, LUBA did not make a legal conclusion that the Working Papers, and thus the Residential Density Standard, was adopted approval criteria. Rather, LUBA relied on the parties' concession on that point. *See Cattoche*, slip op. 16 n.4 ("parties agree that the Flora and Fauna Working Paper policies provide applicable criteria in the designated Peripheral Big Game Range."). The concession was, quite simply, wrong, as it conflicts with the above quoted language in the comprehensive plan. The question, then, remains whether Goal 5 Flora and Fauna Policy 11 imposes a maximum residential density that applies directly to a forest template dwelling application.

B. Policy 11 is general planning directive to county, not mandatory approval criterion applicable to subject forest template dwelling application

Oregon's land use system is set up in such a way that local governments adopt local comprehensive plans and land use ordinances that implement the statewide planning Goals. Once those plans and regulations are acknowledged as in compliance with the statewide planning goals, the goals fall away and do not apply as relevant standards or approval criteria. Similarly, local ordinances are adopted to implement the acknowledged comprehensive plan. In many contexts, once the implementing ordinances are adopted to comply with the comprehensive plan and statewide planning goals, the comprehensive plan policies do not generally apply directly to a discrete land use application. See discussion above. The appellants in this case contend that Policy 11 applies as an approval criterion.

---

[1] Part I.C. (HISTORY OF THE POLICIES DOCUMENT) provides, in full:

"The Policies contained in this document were developed during a period of more than a year, beginning in early 1983. A process was devised at the beginning of the period to utilize existing working papers and to prepare a series of new working papers which, along with other sources, were to serve as the technical data based for the Policies. The Working Papers were written and published from mid-1981 to early 1984. Each Working Paper contained information on a given topic or topics, and a number of them contained preliminary Policies which were drawn from the information in the Papers and which were presented for initial discussion purposes.

Hearings were held on the Papers as they were published. Each Planning Commission reported to the Board of County Commissioners containing its reaction to the Paper and draft Policies. Often the Policy statements drew on sources other than the Working Papers-existing County Plan information (such as special-purpose plans or technical studies), comments or testimony of individuals or groups appearing at the hearings, the judgment and views of Planning Commission members and so on-and so represented a broad array of perspectives and attitudes. Each Planning Commission Report cited information used in Policy development, in order to provide a firm basis for Policy use. The background information, including the Working Papers, is to be used to help interpret and understand General Plan approaches but is not itself designed to be adopted as legislative law. The Board formally adopted the Policies in February of 1984."

LUBA has had the opportunity to address this issue countless times:

> "[L]ocal and statutory requirements that land use decisions be consistent with the comprehensive plan do not mean that all parts of the comprehensive plan necessarily are approval standards. *McGowan v. City of Eugene*, 24 Or LUBA 540, 546 (1993); *Neuenschwander v. City of Ashland*, 20 Or LUBA 144, 154 (1990); *Bennett v. City of Dallas*, 17 Or LUBA 450, 456, *aff'd* 96 Or App 645, 773 P2d 1340 (1989). Local governments and this Board have frequently considered the text and context of cited parts of comprehensive plans and concluded that the alleged comprehensive plan standard was not an applicable approval standard. *Stewart v. City of Brookings*, 31 Or LUBA 325, 328 (1996); *Friends of Indian Ford v. Deschutes County*, 31 Or LUBA 248, 258 (1996); *Wissusik v. Yamhill County*, 20 Or LUBA 246, 254-55 (1990). Even if the comprehensive plan includes provisions that can operate as approval standards, those standards are not necessarily relevant to all quasi-judicial land use permit applications. *Bennett v. City of Dallas*, 17 Or LUBA at 456." *Save our Skyline v. City of Bend*, 48 Or LUBA 192, 209-10 (2004) (footnote omitted).

RCP Goal 5 Flora and Fauna Policy 11 is not drafted as an approval criterion that would apply directly to the subject application. Rather, it directs the county how to determine "overall" residential densities in different regions of the County. It then directs the County to work with ODFW to prevent conflicts between residential development and Big Game Range Habitat "through land use regulation[s] in resource areas, siting requirements and similar activities which are already a part of the County's rural resources zoning program." Much like the policy reviewed in *Wissisik*, Policy 11 is a broad county goal which is intended, and indeed was, implemented through adoption of implementing land use regulations. *See Wissisuk, supra* (plan policies that contain aspirational language regarding goals to be implemented through adoption of land use regulations are not mandatory approval criteria for individual permit applications).

Lane County planning staff never did divide the County into regions, as anticipated by this policy. However, the Big Game Habitat was inventoried, and the County did eventually adopt that inventory, by adopting maps of the Major/Peripheral/and Impacted Big Game Habitat categories. *See Save TV Butte v. Lane County*, ___ Or LUBA ___ (LUBA No. 2017-031, January 8, 2018) slip op. 27 ("the county erroneously determined that its adopted inventory of big game habitat is not 'an acknowledged list of significant resources * * * for which the requirements of Goal 5 have been completed at the time the PAPA [in that case was] initiated,' within the meaning of OAR 660-023-0180(5)(b)(D)."). Lane County's regulations were subsequently acknowledged as in compliance with Goal 4 and Goal 5. As explained in LUBA's decision in *Save TV Butte, supra*, Lane County adopted an F-1 zone where dwellings were prohibited. LC 16.210. It also adopted a minimum parcel size of 80 acres in the F-2 zone. LC 16.211(10). Further, as discussed below, conditions to allowing additional dwellings included requirements to restrict future development. See LC 16.211(5)(e)[2]; OAR 660-006-0027(6)(c).[3]

---

[2] LC 16.211(5)(e) provides: "Prior to land use clearance of a building permit for the dwelling, when the lot or parcel on which the dwelling will be located is part of a tract, the remaining

For the reasons discussed above, Policy 11 does not apply directly as mandatory approval criteria to the subject forest template dwelling application.

C. OAR implementing Goal 4 supports interpretation

The Oregon Administrative Rules Implementing Goal 4 (OAR 660-006-000 et seq.) support the foregoing interpretation of RCP Policy 11 as well as the interpretation of the significance OAR 660-006-0025(6), set forth above. Goal 4 (Forest Lands) is designed to protect forest lands. However, the Goal recognizes the countering interests, and state statute, the Goal and implementing regulations provide for the allowance of dwellings on forest lands in some instances. OAR 660-006-0025 set forth uses authorized on forest lands generally. It begins with five general categories of uses that are allowed on forest lands. See OAR 660-006-0025(1)(a)-(e). Subsection (d) lists dwellings authorized by ORS 215.705 to 215.755 as authorized uses in the Forest zones. ORS 215.750 is the statute that authorizes counties to adopt regulations that allow for the approval of forest template dwellings on forest lands. OAR 660-006-0025, however, does not provide the criteria for approval of template dwellings. Those criteria are found in OAR 660-006-0027 (Dwellings in Forest Zones). Subsection (3) of that rule provides that a governing body or its designate "may" allow template dwellings under certain prescribed circumstances and subject to specific criteria set forth therein.

D. Legislative actions support interpretation of Policy 11

The 1993 legislature adopted HB 3661. That bill allowed several different types of dwellings on forest land, including lot of record dwellings, large tract dwellings, and template dwellings. The large tract dwellings, in western Oregon, could be allowed as

---

portions of the tract shall be consolidated into a single lot or parcel and a deed restriction using the form provided in OAR 660-06-027(7), 'Exhibit A,' shall be completed and recorded with Lane County Deeds and Records. The covenants, conditions and restrictions in the deed restriction:

(i) Shall be irrevocable, unless a statement of release is signed by the Director;
(ii) May be enforced by the Department of Land Conservation and Development or by Lane County;
(iii) Shall, together with a map or other record depicting any tract that does not qualify for a dwelling, be maintained in the Department records and be readily available to the public; and
(iv) The failure to follow the requirements of LC 16.211(5)(e) above shall not affect the validity of the transfer of property or the legal remedies available to the buyers of the property that is the subject of the covenants, conditions and restrictions required by LC 16.211(5)(e) above."

[3] OAR 660-006-0027(6)(c) provides: "A proposed 'template' dwelling under this rule is not allowed: (c) Unless no dwellings are allowed on other lots or parcels that make up the tract and deed restrictions established under section (7) of this rule for the other lots or parcels that make up the tract are met."

long as the subject "tract" was larger than 160 contiguous acres. ORS 215.740. The lot of record dwelling could be approved on a lot that had been in the same ownership since 1985. ORS 215.705. The template dwelling approval was based on the amount of development (dwellings and parcels) within a 160-acre square template. ORS 215.750. The minimum required amount of development for the template dwellings depended on the quality of the soils of the subject lot or parcel—the higher the quality of soils, the more parcels and dwellings were required to fall within the template.

Subsection (1)(f) of ORS 215.705 (lot of record dwelling) required the siting of a dwelling to consider the impact of the proposed dwelling on the density standards upon which the big game habitat acknowledged inventory was based.[4] The other newly authorized forest dwellings, including the template dwelling, did not require the same showing. If the legislature had intended to impost the same requirement for forest template dwellings, it would have done so. The Lane Code provisions allowing for template dwellings merely adopted virtually *ver batim*, the statute and OAR language. Those statutes and rules considered the impacts to Big Game and determined that Goal 4 was complied with.

The rationale of the template dwellings was to cluster dwellings in a way that would leave remaining lands vacant. To require that template dwellings comply with a 40 or 80 dwelling per acre standard is completely contradictory to that rationale.

This assignment of error is denied.

8. The challenged decision violates RCP Goal 7, Policy 2.

Appellant asserts that RCP Goal 7, Policies 1, 2, and 3.[5] Policy 2 requires that development be commensurate with the type and degree of any natural hazard present and that appropriate safeguards be assured. Appellant alleges that a portion of the property appears on a DOGAMI hazards map for high landslide susceptibility. The DOGAMI map shows only a small portion of the property in the northeast corner colored

[4] ORS 215.705(1)(f) requires the following demonstration: "When the lot or parcel on which the dwelling will be sited lies within an area designated in an acknowledged comprehensive plan as habitat of big game, the siting of the dwelling shall be consistent with the limitations on density upon which the acknowledged comprehensive plan and land use regulations intended to protect the habitat are based."

[5] RCP Goal 7, Policies 1, 2 and 3 provide:
"1. The Natural Hazards Inventory, as contained in the 1982 Natural Hazards Working Paper and associated materials, shall be used as a guide for general land use decisions. Specific land use decisions shall be based upon inventory and upon on-site or other evaluation as appropriate.
2. Development shall be commensurate with the type and degree of any natural hazards(s) present and appropriate safeguards against flooding, ponding, landslides, land slippage, erosion or other natural hazards applicable shall be assured. For purposes of evaluation and in the absence of any specific proposal, the provisions of the Oregon State Building Code shall be assumed to the sole means of safeguard against natural hazards.
3. When extensive or drastic safeguards must be employed in conjunction with development proposals, the immediate and ultimate impact, (including financial and economic considerations) of such safeguards on the environment and the public shall be considered."

orange, with the remainder of the property colored yellow. The DOGAMI map submitted in the record does not contain a legend, so it is not clear what hazards the map intends to identify. If the orange mapping indicates a higher risk of landslide, the Hearings Official does not see that such evidence triggers the application of Policy 2. The colored area is in the northeast corner of the property, and based on contour evidence in the record, the proposed dwelling site in the opposite direction of where any landslide would occur. Further, appellants do not assert that the DOGAMI map has in any way been adopted by the County as a means of identifying natural hazards for purposes of RCP Goal 7.

RCP Goal 7, Policy 1 adopts a natural hazard inventory, as contained in the 1982 Natural Hazards Working Paper. Although that Working Paper was not submitted into the record, it was adopted by Policy 1, and therefore, the Hearings Official determines that she may take official notice of it. The development suitability maps and development constraint maps in the subarea plans constitute the natural hazard inventory for purposes of RCP Goal 7. See Natural Hazards Working Paper at 3-4. The Hearings Official concludes that the record does not support a conclusion that any natural hazards on the property, if any, present a risk to the proposed development that require the imposition of safeguards, as required by Policy 2.

This assignment of error is denied.

Conclusion

The conditions of approval attached to the Planning Director's reconsidered decision referenced some of the inapplicable code provisions. Accordingly, attached as Exhibit A to this appeal decision is a list of the conditions of approval, as modified herein.

The application complies with the applicable approval criteria in LC 16.211(5) and the siting standards set forth in LC 16.211(8).

Respectfully Submitted,

Anne C. Davies
Lane County Hearings Official

EXHIBIT A

CONDITIONS OF APPROVAL

509-PA18-05913

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of **509-PA18-05913** is valid for a four-year period from the date of final approval unless an extension is granted in accordance with Lane Code Chapter 14 provisions.

   An extension may be granted if:

   a. An applicant makes a written request with the required fee and the request complies with LC 14.090(6) and (7);

   b. The request is submitted prior to the expiration of the approval period; and

   c. The request is submitted not sooner than six months before the expiration date.

Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision.

The following conditions shall be met prior to the expiration date in condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease:

2. Complete, have notarized, and record the enclosed *Farm and Forest Management Agreement* (Exhibit I) with an attached "Exhibit A" depicting the legal description of the property (which must be recorded together with the Agreement at the Lane County Deeds and Records office).

3. Submit a stocking survey report for the subject parcel prepared by a qualified forester to the Lane County Assessor. The applicant shall provide a copy of the stocking survey to Land Management Division with evidence of receipt from the Assessor. Also see **Condition 19.**

4. Private access easements serving the subject property must comply with Lane Code 15.055 and specifically provide for required turnarounds.

5. Construct the access road and driveway to the minimum standards of Lane Code 16.211(8)(e) and the applicable standards of Lane Code Chapter 15. For roads greater than 8% slope, road and drainage plans shall be prepared by an engineer licensed by the State of Oregon or certified for compliance with the rural fire protection district providing fire protection to the subject property.

6. Submit written verification from South Lane County Fire & Rescue, or written certification from an Oregon Registered Professional Engineer, stating that the route of access for firefighting equipment from the fire station to the building site, across public roads, bridges, private roads, private access easements, and driveways comply with the construction standards in Lane Code 16.211(8)(e) and fire district standards.

7. Physically establish the primary and secondary fuel breaks in compliance with Lane Code 16.211(8)(c). **These fuel breaks shall be maintained in perpetuity.** The minimum primary safety zone surrounding the proposed dwelling shall be at least 30 feet plus the additional 50 feet of Safety Zone Down Slope, as applicable. The minimum secondary fuel breaks surrounding the primary safety zone shall be at least 100 feet on lands owned or controlled by the owner.

8. The dwelling must be located at least 30 feet away from any ravine, ridge or slope greater than 40 percent.

9. Provide evidence to the Planning Director that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule (OAR Chapter 629). This can be satisfied by providing a copy of the Well Log for the property. The well must comply with the groundwater appropriation standards of ORS 537.545(1)(d) and have a sustained yield of five gallons per minute for a duration of not less than five hours of continuous pumping as required by Lane Manual 9.160.

10. Upon completion of **conditions #2 through #9**, the applicant shall complete and submit a Land Use Application form to Verify Compliance with Conditions of Approval, with the required processing fee. **Attach to this form a copy of:**

    - Signed, notarized, and recorded *Farm Use and Forest Management Agreement* and description of property, along with all required exhibits;
    - Forest stocking survey with evidence of receipt from the County Assessor;
    - Recorded access easement demonstrating legal access to the property consistent with Lane Code 15.055;
    - Well log or well constructor's report;
    - Verification letter from South Lane County Fire & Rescue, or written certification from an Oregon Registered Professional Engineer, regarding adequacy of access route; and
    - Approved Site Development Plan, or a plot plan that conforms with the approved plans, drawn to scale, including the same information, and meeting other minimum standards of the Land Management Division. These final plans shall include the primary and secondary fuel breaks surrounding the proposed dwelling as required by Lane Code 16.211(6)(c) and this approval.

11. As part of the Verification of Conditions process, the access road, driveway and fuel breaks must be field inspected by Planning Office staff to verify that requirements stated in **conditions #5 and #7** have been met. Failure to meet minimum fuel break and/or driveway and/or grade standards as in LC 16.211(8)(c) and (e) upon first inspection may require an additional application for fuel break and road inspection, with the applicable fee, at the discretion of the Planning Director.

12. Upon completion of Verification of Conditions, submit a building permit to verify that the construction of the dwelling meets current Oregon Structural Specialty Code application for the proposed dwelling, with the appropriate deposit fee. Contact the Building Program at 541-682-4651 and the On-Site Wastewater Program at 541-682-3754 with questions regarding building and sanitation requirements.

13. In the building or placement permit application submittal, the applicant shall submit a site plan demonstrating that the parcel configuration, and the proposed dwelling, driveway, and septic system, are located consistent with the approved site development plan, unless modification is authorized by the Planning Director. Modification to the approved site plan may require an application for Modification of Conditions with the required processing fee, at the discretion of the Planning Director.

14. **As per Oregon Department of Aviation Findings:** Within five days after the structure reaches its greatest height, the proponent is required to file an FAA form 7460-2, Actual Construction notification, at the OE/AAA website (http://oeaaa.faa.gov). This actual construction notification will be the source document detailing the site location, site elevation, structure height, and date structure was built for the FAA to map the structure on aeronautical charts and update the national obstruction database.

The following condition shall be met prior to approval for legal occupancy of the proposed dwelling.

15. The proposed dwelling shall meet the following requirements, to be verified by the Lane County Building Official:

    a. All buildings or structures with chimneys shall have a spark arrester on all chimneys.

    b. Wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs.

    (Please contact a Lane County plans examiner at 541-682-4651 with questions about building code requirements).

16. The applicant shall provide documentation of Oregon Department of Aviation (ODA) concurrence for the proposed dwelling that is current as of the date of building permit issuance and current as of the date of final occupancy approval. A new letter of concurrence will be required if the proposed dwelling is not located as shown in **Exhibit C**, is taller than 30 feet, or if building permits or a certificate of occupancy is issued after the January 3, 2021 expiration for the July 3, 2019, determination. Except as otherwise addressed in the determination letter, all development must comply with the Airport Safety Combining Zone (/AS) provisions of LC 16.246 as applicable.

The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:

17. Areas of the subject property, according to DOGAMI, are designated as "High" landslide susceptibility. This designation may require a geotech report with submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 for more information.

18. Excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and erosion control. The character of soils for fills and the characteristics of parcels or lots made usable by means of fill shall be suitable for the intended purpose.

19. The applicant is responsible for complying with any applicable local, state, and federal laws.

20. In accordance with Lane Manual 15.515, stormwater runoff from private property must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches. Ditches adjacent to County roads are designed solely to accommodate stormwater runoff generated by roadways themselves.

21. The approval is valid for four years as stated in condition one. An extension, if sought and granted in compliance with Lane Code Chapter 14, is limited to a single 2-year extension unless State law or Lane Code amendments allow otherwise.

22. The owner shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules. It is the owner's responsibility to document that the required tree planting was done in conformance with the criteria of Lane Code 16.211(5)(e). If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372. Information regarding Department of Forestry stocking requirements can be obtained through the Department of Forestry. Information regarding Department of Forestry stocking requirements can be obtained through the Department of Forestry at (541) 935-2283 (in western Lane County); (541) 726-2501 (in eastern Lane County).

23. The following is provided for informational purposes as an **Advisory Notice**: Section 93.040(1) of the Oregon Revised Statutes requires the following statement to be included in the body of any instrument transferring or contracting to transfer fee title to real property:

> "THIS INSTRUMENT WILL NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY APPROVED USES AND TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES AS DEFINED IN ORS 30.930."

This Oregon Law disclosure requirement serves a constructive purpose. Approval of a residence for this property is contingent upon compliance with the conditions of the special use permit, and any future owners of the subject property need to understand and adhere to these conditions. This disclosure statement should alert the cautious and potential purchaser to inquire with the Lane County Land Management Division about the conditions of this special use permit.

IN THE BOARD OF COMMISSIONERS OF LANE COUNTY

ORDER NO. 96-4-10-1

) IN THE MATTER OF APPROVING A WORK
) PROGRAM FOR THE PERIODIC REVIEW
) OF THE RURAL COMPREHENSIVE PLAN

FILED

APR 12 1996

COUNTY CLERK
BY Pam DeWille

WHEREAS, on December 12, 1995, Lane County submitted its Periodic Review evaluation of the Rural Comprehensive Plan to the Department of Land Conservation and Development; and

WHEREAS, prior to April 10, 1996, adequate opportunities for citizen involvement and input into the development of the Periodic Review work program were provided as described in page 1 of the attached Exhibit "A"; and

WHEREAS, on April 10, 1996, the Board of County Commissioners conducted a joint public hearing with the West Lane Planning Commission and the Lane County Planning Commission to receive public testimony on the work program for the Periodic Review of the Rural Comprehensive Plan; and

WHEREAS, all of the public testimony received at the April 10, 1996, public hearing was responded to by the Board of County Commissioners; and

WHEREAS, OAR 660-25-090(1) requires a Periodic Review work program to be, "approved by the governing body"; now, therefore, it is hereby

ORDERED that the Board of County Commissioners approves the Periodic Review work program for the Rural Comprehensive Plan as described in page 2 and Appendices A, B, and C of the attached Exhibit "A".

Adopted this 10th day of April, 1996.

LANE COUNTY RURAL COMPREHENSIVE PLAN
PERIODIC REVIEW WORK PROGRAM

BOOK 157 PAGE 1626

Introduction

On December 12, 1995, Lane County completed a Periodic Review evaluation of the Rural Comprehensive Plan (RCP) and implementing ordinances. The evaluation identified five land use planning projects, mentioned below, for inclusion in a Periodic Review work program.

1. Develop and adopt unincorporated community plans, to define 'rural' uses and densities for developed and committed exception areas outside and amend the RCP and implementation measures to comply with Statewide Planning Goals 11 and 14, and the Unincorporated Community Rules.
2. Develop and adopt coordination agreements with rural service districts that will comply with Senate Bill 122 as codified in ORS Chapter 195;
3. Update the Coastal Resources Management Plan to comply with changes to coastal goals and to assure adequate shoreland sites in conjunction with the update of the Siuslaw River Dredged Material Disposal Sites plan.
4. In order to comply with Statewide Planning Goal 5, update certain natural resource inventories, address the impacts of residential housing densities on big game habitat areas, and make any related changes to the RCP and implementation measures.
5. Amend the General Plan Policies document and Lane Code Chapter 16 for the F-2 zone to comply with the minimum area requirements of the Goal 4 Rule.

Lane County has excluded two of the five projects mentioned above from the Periodic Review work program. The project for Goal 5 resources is excluded until after LCDC completes its hearings and adopts any changes to Goal 5 and the Rule. The objective for the F-2 zone minimum area requirements is excluded, because Lane County is now working on changes to the F-1 and F-2 zones and policies, and expects these changes to be considered at hearings in June and later in 1996.

The Periodic Review work program timelines for completing work tasks and submitting this work to the Department of Land Conservation and Development are described on page 2. The work plan with objective and task details are attached as Appendices A, B and C.

In preparation for the April 10, 1996, hearing on the Periodic Review work program, Lane County held 6 public information meetings to inform interested persons about the proposed work program and about their opportunities for input. Copies of the work program or work program summaries were provided to interested persons. The public information meetings were advertised in the Registered-Guard and the Siuslaw News. Notice of the meetings and the April 10, 1996, public hearing was sent to a list of fifty interested persons. A special bulletin announcing the information meetings was developed by staff and the West Lane Planning Commission, and posted in western Lane County by West Lane Planning Commission members.

PERIODIC REVIEW WORK PROGRAM TIMELINES

OAR 660-25-020(4) requires Lane County to indicate the date by which each work task in its Periodic Review work program will be submitted to the Department of Land Conservation and Development (DLCD) for review. In order to comply with this requirement, the dates indicated below are Lane County's dates by which tasks will be submitted to DLCD for review. Lane County will make one submittal for each project, by the date indicated below, which will occur after the work on all of the tasks in that project has been completed.

Project 1 Submittal Date to DLCD: June 30, 1999. The work on this project will occur, as summarized below, in the three phases over a three year period. The tasks and timelines for this work plan are described in more detail in the work plans for this project which are attached as Appendix A. June 30, 1999, is the date by which the work on all of the tasks in this work project will be completed and by which Lane County submit the completed work tasks to DLCD.

7/1/96 - 6/30/97: Goals 11 & 14 inventory work;
7/1/97 - 6/30/98: Goals 11 & 14 analysis of issues & citizen involvement;
7/1/98 - 6/30/99: Goals 11 & 14 plan/code changes, citizen involve. & adoption;

Project 2 Submittal Date to DLCD: December 31, 2000. The work to complete the tasks in this project will be completed over an 18 month time period and is described in more detail in the work plans for this project which are attached as Appendix B. December 31, 2000 is the date by which the work on all of the tasks in this work project will be completed and by which Lane County will submit the completed work tasks to DLCD.

Project 3 Submittal Date to DLCD: December 31, 2000. The work to complete the tasks in this project will be completed over an 18 month time period and is described in more detail in the work plans for this project which are attached as Appendix C. December 31, 2000 is the date by which the work on all of the tasks in this work project will be completed and by which Lane County will submit the completed work tasks to DLCD.

APPENDIX "A"

BOOK 157 PAGE 1628

WORK PLAN 1. LANE COUNTY PERIODIC REVIEW WORK PROGRAM

Purpose. The purpose of this work plan is to develop and adopt unincorporated community plans, to define 'rural uses' and 'rural densities' for developed and committed areas outside of unincorporated communities, and to amend the Rural Comprehensive Plan and implementation measures to comply with Statewide Planning Goals 11 and 14, and the Unincorporated Community Rules.

A. Introduction. This work plan explains how, during Periodic Review, Lane County intends to perform the work to revise and update the plans and zoning for 35 unincorporated communities and for developed and committed areas outside the unincorporated community boundaries. This work plan identifies general work objectives, specific work tasks and general timelines for doing the work. But, it does not prescribe what the substance should be for any changes in the Rural Comprehensive Plan land use policies or implementation measures. The appropriate time to consider such changes will be after the work program is adopted and the planned work is done.

The work in this work plan will be done in three phases, over a three year period:

Phase 1: 7/1/96 to 6/30/97 - Objectives 1 - 2, General & Specific Land Use Inventory
Phase 2: 7/1/97 to 6/30/98 - Objectives 3 - 6, Analysis, Citizen Involvement, meetings & Board Policy Direction
Phase 3: 7/1/98 to 6/30/99 - Objectives 7 - 8, Plan & Code Development, Citizen Involvement, Hearings & Adoption

The work in this work plan will address many issues. Statewide Planning Goals 11 and 14, and Oregon case law interpreting these Goals, require counties in their land use planning to limit future land uses and densities in rural areas to 'rural' uses and densities. For unincorporated community areas, the Oregon Administrative Rules for Goals 11 and 14 provide some clear direction for acceptable levels of 'rural' residential, commercial and industrial development. However, for developed and committed areas outside of the boundaries of unincorporated communities, there clear direction is lacking. Therefore, Lane County must develop a justification for the levels of 'rural' uses and densities that it allows in the Rural Comprehensive Plan and then justify these in terms of compliance with Statewide Planning Goals 11 and 14. Given these issues, how should Lane County proceed in its work program to address these issues?

To address these issues, the work in the work plan begins by developing a relevant factual base upon which sound land use policy decisions can eventually be made. For residential densities, the potential parcelization and build-out allowed under existing Lane County land

use policies would be analyzed. Little work will be required for many of the developed and committed areas where these areas are already developed to their maximum residential densities, except for a small amount of infilling. For other developed and committed areas, where changes in zoning densities may occur, additional and relevant land use information will be gathered. Information about the potential parcelization and build-out allowed under current Lane County land uses policies would be developed. Part of the information would identify if there are any water supply, sewerage and environmental limitations to allowing the projected parcelization and residential build-out. For lands zoned for commercial and industrial uses, the work would develop more information about the kinds of uses that occur in these areas and what uses the property owners have planned for the future. Then, work from this information base would be done to develop a justification for 'rural' commercial and industrial uses.

B. Effected Properties. Effected properties comprise a total of approximately 65,000 acres: 7,900 acres in communities and 57,100 acres outside of communities. These properties are included in 770 exception areas dispersed throughout Lane County. Within these areas, there are approximately 20,000 tax lots, 17,450 dwellings and 2,500 vacant tax lots.

C. Regional Work Plan Approach. In order to manage the work for the first phase of this work plan, the work will be performed on a regional basis. Lane County's 35 communities and nearby developed and committed areas are organized into five regions, and the inventory work will be done a region at a time. The regional approach will also help Lane County to focus on identifying issues which may be unique to the communities and areas within each region. The five regions are:

Region 1, Coastal: Mapleton, Glenada, Cushman, Swisshome & Deadwood
Region 2, McKenzie River: Blue River, Leaburg, Marcola, McKenzie Bridge, Nimrod, Rainbow, Vida, Walterville
Region 3, Highway 58: Goshen, Pleasant Hill, Jasper, Fall Creek, Trent & Dexter
Region 4, Southern: 6 southern Lane County area communities: 4 communities in the South Lane 45J school district: Dorena, Culp Creek , Saginaw, & London, 2 communities in the Crow-Applegate-Lorane school district: Crow and Lorane
Region 5, Northern: 3 communities in the Fern Ridge 28J school district: Walton , Noti, Elmira; 3 communities in the Blachly 90 school district: Greenleaf, Triangle Lake, and Blachly; 3 communities in the Junction City school district: Lancaster, Cheshire, & Franklin; and 1 community in the Bethel 52 school district: Alvadore

WORK PLAN #1. OBJECTIVES, TASKS AND TIMELINES

BOOK 157 PAGE 1631

Objective 1. Develop a summary report on Lane County's developed and committed exception areas, based on an analysis using existing exception data and reports. This report will include an evaluation for each of Lane County's 35 unincorporated communities to determine which kind of community it is under the definitions of "Community" in LCDC's UNINCORPORATED COMMUNITIES" Rule, OAR 660-22-010(1). This report will also include a general description of existing and potential levels of development for developed and committed areas outside of communities.

a. Product to be produced: Summary Report for Lane County's Developed and Committed Exception areas.

b. Beginning work date: July 1, 1996

c. Ending work date: August 30, 1996

Task 1. Communities.

a. Prepare a booklet with the latest, adopted developed and committed exception data for each community. This information should include the data that was adopted by Lane County to obtain acknowledgment from LCDC for each community and any other exception data about a community that was done as part of an approved land use application for the exception area.

b. Obtain and use a copy of the plan diagram map for the tentative boundaries of each community.

c. Using the four the different definitions of 'community' in OAR 660-22-010(1), prepare a "Community Classification Report" form to analyze the exception data from Task 1. and to determine the classification of each community.

d. Using the data from Tasks 1a. and 1b. above, and the form from Task 1c.. above, complete the Community Classification Report for each community.

Task 2. Exception Areas Outside Communities.

a. Prepare a booklet with the latest, adopted developed and committed exception data for each exception area. This information should include the data that was adopted by Lane County to obtain acknowledgment from LCDC and may include any other exception data that was developed to support a change in zoning density approved by Lane County.

b. Tabulate for each exception area and from the exception data: total acreage in each zoning district and the total number of vacant and built upon tax lots in each zoning district.

c. Tabulate for all exception areas combined, the total acreage in each zoning district and the total number of vacant and built upon tax lots in each zoning district.

Task 3. Summary Report. Using the information developed in Tasks 1 and 2 above, complete a summary report describing Lane County's developed and committed areas and their general potential for future development. Combine this report into a booklet form with the information developed in Tasks 1 and 2 above.

APPENDIX "B"

March 26, 1996

BOOK 157 PAGE 1646

WORK PLAN 2.
LANE COUNTY RURAL COMPREHENSIVE PLAN PERIODIC REVIEW
To develop and adopt coordination agreements with rural service districts that will comply with Senate Bill 122 as codified in ORS Chapter 195.

1. **Issues or Problems.** Lane County must enter into coordination agreements with each special district that provides one of the following services for areas outside of urban growth boundaries: sanitary sewers, water, fire protection, parks, open space, recreation, mass transit, streets and roads. The agreements must describe how the county will involve the special district in comprehensive planning, including plan amendments, periodic review and amendments to land use regulations. The agreements must also establish the role and responsibility of the county with the special district interests, including where applicable, water sources, capital facilities and real property including right of way and easements.

   How should Lane County proceed to develop these agreements? Then, how should Lane County proceed to obtain the formal adoption of the agreements?

2. **Work Program Goal.** The Goal and purpose of this work plan is to describe how Lane County should proceed to do the work necessary to address the above mentioned issues. This work plan estimates what the tasks, timelines and costs of the work will be. This work plan does not discuss what the content and form of the coordination agreements will be. The content and form of the coordination agreements will be developed as a result of doing the work outlined in the work plan.

3. **Affected Special Districts.** Lane County must enter into coordination agreements with nearly 40 special districts. Lane County will determine the exact number and identify all of the special districts prior to beginning the work in the work program.

4. **Work Plan Timelines.** The work in this work plan will begin on July 1, 1999 and end 18 months later on December 31, 2000. It is possible that the work in this work plan could begin sooner than July 1, 1999 if special funding became available. The chart on the next page illustrates the estimated monthly sequence (months are denoted with an "M") for completion of the work on each objective.

5. **Work Cost Estimate - $45,000.** 1/3 of a full time employee's time in an Associate Planner position over an eighteen month period would be required to complete the work in this work plan. The cost of funding the work at the Associate Planner position level is based on the current $46.333/yr. salary and an added 94.55% of the salary to account for benefits, overhead & indirects which brings the total yearly cost of the position to $90,140. One third of this amount over an eighteen month period would equal $45,000.

APPENDIX "C"

March 26, 1996 BOOK 157 PAGE 1651

WORK PLAN 3.

LANE COUNTY RURAL COMPREHENSIVE PLAN PERIODIC REVIEW

To update the Lane County Coastal Resources Management Plan and to assure adequate shoreland sites in conjunction with the update of the Siuslaw River Dredge Material Disposal Plan.

1. **Issues or Problems.** The Land Conservation and Development Commission ("LCDC") adopted amendments to the coastal Statewide Planning Goals. Lane County's Coastal Resources Management Plan ("CRMP") needs to be updated in order to comply with some of the changes to the coastal Goals.

   How should Lane County proceed to develop the changes to the CRMP? Then, how should Lane County proceed to obtain the formal adoption of the changes?

2. **Work Plan Purpose** The purpose of this work plan is to describe how Lane County should proceed to do the work necessary to address the above mentioned issues. This work plan estimates what the tasks, timelines and costs of the work will be. This work plan does not discuss what the content and form of the changes will be. The content and form of the changes will be developed as a result of doing the work outlined in the work plan.

3. **Work Plan Timelines.** The work in this work plan will begin on July 1, 1999 and end 18 months later on December 31, 2000. It is possible that the work in this work plan could begin sooner than July 1, 1999 if special funding became available.

5. **Work Cost Estimate - $90,000.** 2/3 of a full time employee's time in an Associate Planner position over an eighteen month period would be required to complete the work in this work plan. The cost of funding the work at the Associate Planner position level is based on the current $46.333/yr. salary and an added 94.55% of the salary to account for benefits, overhead & indirects which brings the total yearly cost of the position to $90,140. Two thirds of this amount over an eighteen month period would equal $90,000.

MINUTES

Joint Public Hearing
Board of County Commissioners, West Lane and
Lane County Planning Commissions
Harris Hall--125 East 8th Avenue

April 10, 1996
6:30 p.m.

PRESENT: Steve Cornacchia, Bobby Green, Ellie Dumdi, Cindy Weeldreyer, Lane County Commissioners; Margaret Holemar Thumel, Gordon Howard, Arthur Gardener, Clay Myers, Dianne Burch, Lane County Planning Commissioners; Dianne Burch, Fred Beisse, Brian Cole, West Lane Planning Commissioners; Bill Van Vactor, Jim Mann, Steve Vorhees, Lane County staff.

ABSENT: Jerry Rust, Lane County Commissioner; Stephen Moe, Robert Greuner, Lane County Planning Commissioners; Richard Micklewright, Michael Sleight, West Lane Planning Commissioners.

I. WORK PROGRAM FOR THE PERIODIC REVIEW OF THE RURAL COMPREHENSIVE PLAN

Commissioner Green opened the meeting of the Lane County Commissioners. Ms. Thumel opened the meeting of the Lane County Planning Commission. Ms. Burch opened the meeting of the West Lane Planning Commission.

Mr. Mann reviewed the process for the public hearing, noting that responses would be provided to all testimony raised in the public hearing. Following testimony, Mr. Mann said the planning commissions could deliberate and offer a recommendation to the County Commission.

Mr. Mann then reviewed the citizen involvement opportunities to date on this issue, including five public information meetings in March and April, distribution of copies of the work plan, and several work sessions with the planning commissions. In addition, Mr. Mann said there had been six information sessions and public hearings last fall related to the review evaluation. Mr. Mann informed the commissioners that there was opposition to the

Rural Comprehensive Plan, but that the periodic review process was not intended to address those concerns.

Mr. Mann then provided a summary of the work program, using overhead projections to illustrate it. He noted that two items had been excluded from the work program: 1) changes to forest zones, and 2) Goal 5 resource items. Mr. Mann explained that the reason for excluding the forest zone changes was that this item represented a big change and he recommended bringing proposals back to the Board separately in the summer. Mr. Mann said that the reason for delaying work on Goal 5 was because the Department of Land Conservation and Development (DLCD) was considering changes to the Goal 5 rule and it would be prudent to wait for the outcome prior to reviewing it.

Mr. Mann provided an overview of the three phases of the plan as follows:

- Phase 1: an inventory by geographic area resulting in a report
- Phase 2: inventory analysis, citizen involvement, meetings and policy direction from the commissions
- Phase 3: Plan and Code development, including citizen involvement, public hearings, and adoption of changes.

Commissioner Green opened the public hearing.

Paul Atkinson, 26884 Powell Road, Eugene, resubmitted his request that the County produce a soils map with a parcelization overlay to allow officials and the public to see where prime soils are. He also said there was a need for a cost of services study similar to the Fodor study.

Jane Novick, 84881 Harry Taylor Road, Eugene, testified that the information provided was "incomprehensible" and she expressed concern about adequate notification before changes are made.

Marriner Orum, no address given, representing the Sierra Club, testified that any changes to the plan could weaken land use planning in Oregon. Mr. Orum said the Sierra Club opposed any changes that would contribute to "urban sprawl."

Curtin Mitchell, 27300 Siuslaw River Road, Lorraine, encouraged commissioners to inventory the best farmland forestlands and shelter them from development. Mr. Mitchell asked that the vision of small towns with large areas of open space in between be kept intact. He spoke against any development on F1 lands.

John Bianco, 82741 Clayton Road, testified that he had witnessed an "epidemic" growth of clear-cutting over the last four years. He stated that any development should be tied to stewardship of the land. Mr. Bianco also supported the development of soil maps and a cost of growth study.

Lisa Davis, PO Box 271, Creswell, spoke against opening F1 lands to further development.

Jerry Ritter, 1865 Yolanda Avenue, representing Neighbors United Against Annexation, opposed any changes that would allow annexation without a vote. He urged the commission to retain its opposition to S195 annexations, and asked members to consider floodplain issues.

Ruth Duemler, 1745 Fircrest, Eugene, reiterated the need for better public notification and more citizen involvement in the process. She spoke for the need for soil mapping, preservation of farmland from development, and said that dry wells point to the need to map for water usage.

Scott Frazier, 30550 Isaac Walton Road, asked the County to define the words "park" and "intensive use" so that developers are not able to use "loopholes" as was the case with the paintball development.

Alice Doyle, 78185 Ratch Creek Road, Cottage Grove, asked a number of questions, referring to the use of the term "capacity of land" as an important phrase in decision making.

There were no other requests to testify. Commissioner Green closed the public hearing.

Commissioner Green asked how responses to the public hearing would be made. Mr. Mann responded to some of the testimony by stating that soils would be reviewed as part of the work under Goals 11 and 14, although the study would be limited to developed and committed areas. As a point of clarification, Mr. Mann said that most of the County is zoned forest and farm, but Periodic Review does not concern itself with these lands. Mr. Mann said that a soil map would be available as the first project is undertaken; however, it would not include a parcelization overlay. Mr. Mann said the rest of the testimony would be answered in writing.

Commissioner Cornacchia clarified that there had been no discussion on the Board of Commissioners to open F1 land to residential development. He said some confusion may have arisen from the inclusion of this item on the lists on the wall. Mr. Mann clarified that the lists reflected concerns raised at public meetings. However, Mr. Mann reported that Lane County was the only county in Oregon that prohibits dwellings on F1 lands, and that a proposal to allow residential development with restrictions could be prepared, although there was no indication from the Board that it would be supported.

Commissioner Weeldreyer asked about the development of soil maps. Commissioner Dumdi indicated that her conversation with Kent Howe had concluded that the development of a

parcelization overlay was prohibitively expensive. She noted that Mr. Atkinson had mentioned working with the Farm Bureau for potential funding.

Commissioner Green turned the discussion to the Lane County Planning Commission.

Commissioner Howard indicated that, having received testimony, conducted public hearings, and reviewed the issues, he was prepared to take action. Mr. Gardener agreed.

The discussion was then turned to the West Lane Planning Commission. Mr. Beisse noted that updating the comprehensive plan was a legal requirement, and that the work program provided a "skeleton" to be filled in with details. He expressed support for a positive recommendation. Mr. Cole stated that the testimony contained important comments, but that many did not pertain to Goals 11 and 14. Ms. Burch said that public notification was a top priority for the WLPC, and welcomed suggestions for improving it.

> Mr. Beisse moved for the West Lane Planning Commission, seconded by Mr. Cole, to recommend adoption of the work program to the Board of County Commissioners. The motion carried unanimously, 3:0.
>
> Mr. Howard moved for the Lane County Planning Commission, seconded by Mr. Gardener, to recommend adoption of the work program to the Board of County Commissioners. The motion carried unanimously, 4:0.

The discussion then turned to the Lane County Board of Commissioners. Commissioner Dumdi clarified that the Lane County Board and Mr. Mann's work on the rural comprehensive plan was bound by State statute. She noted that the restrictions concerning F1 lands had been eased by the administrative agency, the DLCD, not the Lane County Board. She clarified that she did not believe the Board was in favor of expanding development on F1 lands.

Commissioner Cornacchia clarified that the current process was a required periodic review, not an update. He emphasized that Lane County had cut its budget five years in a row, and was not in a position to fund everything it would like. Commissioner Cornacchia shared the frustration of lack of public participation, noting the small number of applications for open planning commission seats. In regard to the work program, Commissioner Cornacchia called it "ambitious relative to the task and resources available" and urged support.

Commissioner Weeldreyer asked whether the soil maps discussed could be produced with appropriate private funding. Mr. Mann responded that they could, although it could be difficult to recreate parcels as they were in 1984 as requested.

Commissioner Green echoed the sentiment of other Board members not to allow development on F1 lands.

Commissioner Dumdi moved, seconded by Commissioner Cornacchia, that the Board of County Commissioners accept the recommendation of the Lane County and the West Lane Planning Commissions and adopt the periodic review work program. The motion carried unanimously, 4:0.

The meeting adjourned at 8:00 p.m.

REVISIONS TO LANE COUNTY'S PERIODIC REVIEW WORK PROGRAM:

PROJECT 1 WORK PLANS: GOALS 11 & 14 COMPLIANCE

October 21, 1997

A. Background.

On April 10, 1996, Lane County approved its periodic review work program that included a three year timeline, from 7/1/97 to 6/30/00, to complete community plans and zoning for all 35 of Lane County's unincorporated rural communities. This work also included addressing Goal 11 and 14 'rural' verses 'urban' use & residential density issues for developed and committed areas outside of communities. The work program included a from-the-top-down work approach to help minimize LMD costs and insure getting the work done on time. In April of 1996, the LMD had the funding it needed for the positions that would perform the periodic review work, including funding for: a full time Associate Planner position; a significant portion of the Senior Planner position; and a small portion of the Planning Director's position. However, in the LMD FY 97/98 budget, funding for the Associate Planner position (along with five other positions) was eliminated.

During the first year of implementing this work program, from 7/1/96 to 6/30/97, Lane County completed work on Project 1 objective 1 and Project 1 objective 2 tasks 1-4 and a portion of task 5. This work primarily involved gathering and analysis of data for Lane County's developed and committed exception areas in a rural residential zoning designations. Some basic inventory work remains to be done under objective 2 task 5 for Lane County's developed and committed areas in park and recreation, commercial and industrial designations. The next phases of the work plans for Project 1 will include citizen involvement, more specific analysis of identified issues and alternatives, and the drafting and adoption of community plans and land use regulations for developed and committed areas outside of communities.

Creative modifications to the timelines and work process of the adopted periodic review work program are included herein to help Lane County work within its evolving budget limitations and to still meet its periodic review obligations. It will be necessary to adopt these changes by Board order, because Original periodic review work program was adopted by Board order on April, 10, 1996. .

B. Detailed Work Plan Timeline Changes

Project 1 (Goals 11 & 14 Compliance) completion and adoption timelines are proposed that do not involve changes to the work tasks and that separate the completion and adoption of the community plans into 5 watershed area groupings.

Project 2 (SB 122 Coordination Agreements) completion and adoption timelines are proposed that involve creating and adopting the coordination agreements concurrently with the project 1 work and timelines for the community plans.

Project 3 (Coastal Goals Compliance) completion and adoption timelines are proposed that involve completing this project work concurrently with the project work for the Siuslaw watershed and coastal areas. This work combination accounts for the three year, rather than 2 year, timeline to complete the community plans for the Siuslaw River watershed and coastal areas.

The timeline changes and process changes to the adopted Periodic Review work program are identified below in a legislative and adopted format. A single underline denotes added or new timeline and process requirements. A ~~strikethrough~~ denotes work plan timeline requirements being deleted. The portions of the approved work program that are changed remain in full effect and force.

Legislative Format

Project 1 Work Plans: Goals 11 and 14 Compliance Timelines

Phase 1: ~~7/1/96 to 6/30/97 Objectives 1 2, General & Specific Land Use Inventory~~

Completed: Objective 1 Summary Report - Completed
7/1/97 to 6/30/98: Objective 2 Detailed Land Use Inventory Data & Report

Phase 2: ~~7/1/97 to 6/30/98 Objectives 3 6, Analysis, Citizen Involvement, meetings, & Board policy direction~~

7/1/97 to 6/30/99: Completion and adoption of 8 community plans and implementing measures for the McKenzie River watershed area (Blue River, Leaburg, Marcola, McKenzie Bridge, Nimrod, Rainbow, Vida, Walterville).

7/1/99 to 6/30/02: Completion and adoption of 10 community plans and implementing measures for the Siuslaw River watershed area and coastal area (Mapleton, Glenada, Cushman, Swisshome, Deadwood; Greenleaf, Triangle Lake; Blachly, Walton and Lorane).

7/1/01 to 6/30/04: Completion and adoption of 7 community plans and implementing measures for the Long Tom River watershed area (Lancaster, Cheshire, Franklin, Alvador, Elmira, Noti, Crow).

7/1/99 to 6/30/06: Completion and adoption of community plans and implementing measures for the five communities of the Middle Fork of the Willamette River watershed area (Pleasant Hill, Jasper, Trent, Fall Creek, Dexter) and for the 5 communities of the Coast Fork of the Willamette watershed area (Culp Creek, Dorena, London, Saginaw, Goshen).

The sequence in which the land use planning work will be done on the above mentioned watersheds, except for the Mc Kenzie watershed, may be modified by the Lane County Planning Director without formal action by the Board..

Phase 3: ~~7/1/98 to 6/30/99 - Objectives 7 - 8, Plan & Code Development, Citizen Involvement, Hearings & Adoption~~

7/1/97 to 6/30/06: Completion and adoption of amendments to the Rural comprehensive plan and implementation measures for areas outside of communities to comply with Goals 11 and 14.

Project 2 Work Plans: SB 122 Coordination Agreements Timelines

~~December 31, 2000.~~

7/1/97 to 6/30/99: Completion and adoption for the McKenzie River watershed area.

7/1/99 to 6/30/02: Completion and adoption for the Siuslaw River watershed area.

7/1/01 to 6/30/04: Completion and adoption for the Long Tom River watershed area.

7/1/99 to 6/30/06: Completion and adoption for the Willamette River watershed area and for the Coast Fork of the Willamette watershed area.

Project 3 Work Plans: Coastal Goals Compliance

~~December 31, 2000.~~

7/1/99 to 6/30/02: Completion and adoption for the Siuslaw River watershed area.

Adopted Format

Project 1 Work Plans: Goals 11 and 14 Compliance Timelines

Phase 1: Completed: Objective 1 Summary Report - Completed

7/1/97 to 6/30/98 Objective 2 Detailed Land Use Inventory Data & Report

Phase 2: 7/1/97 to 6/30/99: Completion and adoption of 8 community plans and implementing measures for the McKenzie River watershed area (Blue River, Leaburg, Marcola, McKenzie Bridge, Nimrod, Rainbow, Vida, Walterville).

7/1/99 to 6/30/02: Completion and adoption of 10 community plans and implementing measures for the Siuslaw River watershed area and coastal area (Mapleton, Glenada, Cushman, Swisshome, Deadwood; Greenleaf, Triangle Lake; Blachly, Walton and Lorane).

7/1/01 to 6/30/04: Completion and adoption of 7 community plans and implementing measures for the Long Tom River watershed area (Lancaster, Cheshire, Franklin, Alvador, Elmira, Noti, Crow).

7/1/99 to 6/30/06: Completion and adoption of community plans and implementing measures for the five communities of the Middle Fork of the Willamette River watershed area (Pleasant Hill, Jasper, Trent, Fall Creek, Dexter) and for the 5 communities of the Coast Fork of the Willamette watershed area (Culp Creek, Dorena, London, Saginaw, Goshen).

The sequence in which the land use planning work will be done on the above mentioned watersheds, except for the Mc Kenzie watershed, may be modified by the Lane County Planning Director without formal action by the Board..

Phase 3: 7/1/97 to 6/30/06: Completion and adoption of amendments to the Rural comprehensive plan and implementation measures for areas outside of communities to comply with Goals 11 and 14.

Project 2 Work Plans: SB 122 Coordination Agreements Timelines

7/1/97 to 6/30/99: Completion and adoption for the McKenzie River watershed area.

7/1/99 to 6/30/02: Completion and adoption for the Siuslaw River watershed area.

7/1/01 to 6/30/04: Completion and adoption for the Long Tom River watershed area.

7/1/99 to 6/30/06: Completion and adoption for the Willamette River watershed area and for the Coast Fork of the Willamette watershed area.

Project 3 Work Plans: Coastal Goals Compliance

7/1/99 to 6/30/02: Completion and adoption for the Siuslaw River watershed area.

PASSED

IN THE BOARD OF COUNTY COMMISSIONERS OF LANE COUNTY, OREGON

ORDER
00-6-27-5

) IN THE MATTER OF ADOPTING AMENDMENTS
) TO THE TIMELINES FOR THE APPROVED WORK
) PROGRAM FOR THE PERIODIC REVIEW OF THE
) LANE COUNTY RURAL COMPREHENSIVE PLAN.

WHEREAS, on April 10, 1996, the Board of County Commissioners adopted Board Order No. 96-4-10-1 that approved a work program for the Periodic Review of the Rural Comprehensive Plan; and

WHEREAS, on October 21, 1997, the Board of County Commissioners adopted Board Order No. 97-10-21-3 that approved amendments to the work program for the Periodic Review of the Rural Comprehensive Plan; and

WHEREAS, OAR 660-25-090(1) requires a Periodic Review Work Program to be, "approved by the governing body"; and

THEREFORE, BE IT ORDERED the timeline and process changes to the Periodic Review Work Program of the Rural Comprehensive Plan in the attached Exhibit "A" are approved.

DATED this 27th day of June, 2000.

Peter Sorenson, Chairperson, Lane County Board of Commissioners

APPROVED AS TO FORM
Date 6-20-2000 Lane County
OFFICE OF LEGAL COUNSEL

Exhibit "A"

For Task 1, the task completion deadline is changed in the approved work program summary from June 30, 1999, to December 31, 2000.

For Task 2, with one exception, the task completion deadline is changed in the approved work program summary from June 30, 1999, to December 31, 2000. The work program would be changed so that work to be done for Goal 18 would be done concurrently with other coastal work in Task 4.

For Task 3, the Goal 11and 14 compliance work to update Lane County's plan policies and zoning for Rural Residential developed and committed areas located outside of communities is integrated into and will be done as part of the Tasks 4-6, Goal 11 and 14 compliance work for each watershed. Tasks 4-6 are changed in the approved work program summary accordingly to incorporate this work.

For Tasks 4–6, the completion deadlines are changed to be completed six months earlier than indicated in the approved work program.

Included as part of Exhibit "A" is the attached LANE COUNTY RURAL Periodic Review Work Program Approved Summary. The changes mentioned above apply to this document.

Order No. 00614

Work Program Modified by Watersheds:
March 19, 1998
Order No. 00901

Final Work Program Completion Date:
June 30, 2006

Task	Wk. Pro. Ref.	Action & Product	Submittal Date
1	Co. Work Plan 1, Obj. 2, 3, 4, 5, 6, 7 and 8; and Co. Work Plan 2, Obj. 1 and 2 (McKenzie)	*For lands within the McKenzie River Watershed take the following actions:* *1. Develop a detailed Land Use Inventory Data and Summary Report that inventories and analyzes the existing land uses within each exception area and within and adjacent to each unincorporated community where significant levels of new development may occur;* *2. Complete a Preliminary OAR Compliance Report for each community addressing the factors in OAR 660-22-030;* *3. Complete a Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report for the existing developed and committed uses and densities and for those that would be allowed under the current Lane County zoning and land use policies;* *4. Complete a survey of the desires and opinions of people in each unincorporated community about what they would like their community to be and look like;* *5. Hold community information meetings and workshops, and obtain citizen input;* *6. Prepare the draft land use plans and implementing ordinances;* *7. Conduct meetings and hearings, and adopt the land use plans, implementing ordinances and provisions to Lane Manual to establish a formal community land use advisory group for the study area;* *8. Produce a generic coordination agreement between county and rural service districts in compliance with SB 122 as codified in ORS Chapter 195; and* *9. Complete the coordination agreements by obtaining their adoption.* *For lands within the McKenzie River Watershed submit the following products:* *1. Land Use Inventory Data and Summary Report;* *2. OAR Compliance Report for each community;* *3. Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report;* *4. Community Desires and Opinions Survey and Summary Results Report;* *5. Citizen involvement, and planning commission and Board meetings, and a summary report;* *6. Hearings and Adopted Land Use Diagram and Zoning Maps, Policies and Implementation Ordinances;* *7. Generic coordination agreement; and* *8. Negotiations and adopted coordination agreements.*	Dec. 31, 1999

2	(part of) Co. Work Plan 3, Obj. 1 and 2 (CRMP, phase 1).	*Update the Coastal Resource Management Plan (CRMP) as follows:* *1. Add Goal 16 dredge and fill standards to Development and Natural Estuary policies and zones to match those added to Conservation Estuary in 1991. Update Definitions in Lane Code to include new definitions added to the Coastal Goals in 1985.* *2. As required by Goal 17's "implementation Requirements", item 6, amend the CRMP to include an inventory of existing public access points, and in conjunction with Oregon Parks and Recreation Department, identify areas where improvements to access or new access is needed. Describe in policy terms within the CRMP a program for providing increased public access and otherwise implementing the Goal amendment. Amend County regulations to meet Goal objectives.* *3. As required by Goal 18's "Implementation Requirements," item 7, inventory sand dune areas to determine if grading or sand movement within them should be allowed by means of a foredune grading plan which meets Goal criteria; modify the CRMP and implementation regulations to provide for grading plans. Subject areas include developed and committed lands and lands within the Florence UGB. Coordination with the City of Florence will be needed for lands within the UGB.*	June 30, 1999
3	Co. Work Plan 1, Obj. 2, 3, 4, 5, 6, 7 and 8; and Co. Work Plan 2, Obj. 1 and 2 (Rural Industrial, Commercial and Park Recreation).	*For lands in Lane County take the following actions:* *1. Develop a detailed Land Use Inventory Data and Summary Report that inventories and analyzes the existing land uses within each exception area planned and zoned for industrial, commercial, and park/recreation uses and located outside of unincorporated communities where significant levels of new development may occur;* *2. Complete a Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report for the existing developed and committed uses and for those uses that would be allowed under the current Lane County zoning and land use policies;* *3. Prepare the draft land use plan and implementing ordinances;* *4. Conduct meetings and hearings, and adopt the land use plans, implementing ordinances.* *For lands in Lane County submit the following products:* *1. Land Use Inventory Data and Summary Report;* *2. Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report;* *3. Draft land use diagram and zoning maps, draft land use policies, and draft zoning regulations;* *4. Hearings and Adopted Land Use Diagram and Zoning Maps, Policies and Implementation Ordinances.*	June 30, 2001

4	Co. Work Plan 1, Obj. 2, 3, 4, 5, 6, 7 and 8; Co. Work ~~Plan~~ 2, Obj. 1 and 2; and (part of) Co. Work Plan 3, Obj. 1 and 2 (Siuslaw & CRMP Phase 2)	*For lands within the Siuslaw River Watershed take the following actions:* *1. Develop a detailed Land Use Inventory Data and Summary Report that inventories and analyzes the existing land uses within each exception area and within and adjacent to each unincorporated community where significant levels of new development may occur;* *2. Complete a Preliminary OAR Compliance Report for each community addressing the factors in OAR 660-22-030;* *3. Complete a Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report for the existing developed and committed uses and densities and for those that would be allowed under the current Lane County zoning and land use policies;* *4. Complete a survey of the desires and opinions of people in each unincorporated community about what they would like their community to be and look like;* *5. Hold community information meetings and workshops, and obtain citizen input;* *6. Prepare the draft land use plan and implementing ordinances;* *7. Conduct meetings and hearings, and adopt the land use plans, implementing ordinances and provisions to Lane Manual to establish a formal community land use advisory group for the study area;* *8. Produce a generic coordination agreement between county and rural service districts in compliance with SB 122 as codified in ORS Chapter 195;* *9. Complete the coordination agreements by obtaining their adoption; and* *10. For those items not addressed above under Task 2, begin update of Coastal Resource Management Plan:* *a. Complete necessary comprehensive plan inventories, analyses of these inventories and a report that summaries the results of the inventory work, and* *b. Complete necessary amendments to the comprehensive plan and implementing measures, conduct information meetings and hearings, and adopt the changes.* *For lands within the Siuslaw Watershed submit the following products:* *1. Land Use Inventory Data and Summary Report;* *2. OAR Compliance Report for each community;* *3. Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report;* *4. Community Desires and Opinions Survey and Summary Results Report;* *5. Citizen involvement, and planning commission and Board meetings, and a summary report;* *6. Hearings and Adopted Land Use Diagram and Zoning Maps, Policies and Implementation Ordinances;* *7. Generic coordination agreement;* *8. Negotiations and adopted coordination agreements; and* *9. Coastal Resource Management Plan: Land Use Inventories; Summary Report; and Preparation and adoption of amendments to the comprehensive plan and implementing ordinances and citizen involvement.*	**June 30, 2002**

5	Plan I, Obj. 2, 3, 4, 5, 6, 7 and 8; and Co. Work Plan 2, Obj.-Land 2 (Long Tom).	*For lands within the Long Tom River Watershed take the following actions:* *1. Develop a detailed Land Use Inventory Data and Summary Report that inventories and analyzes the existing land uses within each exception area and within and adjacent to each unincorporated community where significant levels of new development may occur;* *2. Complete a Preliminary OAR Compliance Report for each community addressing the factors in OAR 660-22-030;* *3. Complete a Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report for the existing developed and committed uses and densities and for those that would be allowed under the current Lane County zoning and land use policies;* *4. Complete a survey of the desires and opinions of people in each unincorporated community about what they would like their community to be and look like;* *5. Hold community information meetings and workshops, and obtain citizen input;* *6. Prepare the draft land use plans and implementing ordinances;* *7. Conduct meetings and hearings, and adopt the land use plans, implementing ordinances and provisions to Lane Manual to establish a formal community land use advisory group for the study area;* *8. Produce a generic coordination agreement between county and rural service districts in compliance with SB 122 as codified in ORS Chapter 195; and* *9. Complete the coordination agreements by obtaining their adoption.* *For lands within the Long Tom River Watershed submit the following products:* *1. Land Use Inventory Data and Summary Report;* *2. OAR Compliance Report for each community;* *3. Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report;* *4. Community Desires and Opinions Survey and Summary Results Report;* *5. Citizen involvement, and planning commission and Board meetings, and a summary report;* *6. Hearings and Adopted Land Use Diagram and Zoning Maps, Policies and Implementation Ordinances;* *7. Generic coordination agreement; and* *8. Negotiations and adopted coordination agreements.*	**June 30, 2004**

6	Co. Work Plan 1, Obj. 2, 3, 4, 5, 6, 7 and 8; and Co. Work Plan 2, Obj. 1 and 2 (M.F. Willamette & C.F. Willamette).	*For lands within the Middle Fork of the Willamette River and the Cost Fork of the Willamette River Watersheds take the following actions:* *1. Develop a detailed Land Use Inventory Data and Summary Report that inventories and analyzes the existing land uses within each exception area and within and adjacent to each unincorporated community where significant levels of new development may occur;* *2. Complete a Preliminary OAR Compliance Report for each community addressing the factors in OAR 660-22-030;* *3. Complete a Preliminary Goal 11 and 14 Compliance Analysis and Recommendations Report for the existing developed and committed uses and densities and for those that would be allowed under the current Lane County zoning and land use policies;* *4. PASSED

IN THE BOARD OF COUNTY COMMISSIONERS, LANE COUNTY, OREGON

ORDINANCE NO. 5-02	IN THE MATTER OF AMENDING CHAPTER 16 OF LANE CODE TO MODIFY FARM AND FOREST ZONE CLASSIFICATIONS AND REGULATIONS (LC 16.090, LC 16.100, LC 16.211 AND LC 16.212) AND DECLARING AN EMERGENCY

The Board of County Commissioners of Lane County ordains as follows:

Chapter 16 of Lane Code is hereby amended by removing, substituting and adding new sections as follows:

REMOVE THESE SECTIONS	INSERT THESE SECTIONS
16.090 as located on pages 16-11 though 16-20 (a total of 10 pages)	16.090 pages 16-11 though 16-20 (a total of 10 pages)
16.100 as located on pages 16-37 and 16-38 (a total of 2 pages)	16.100 as located on pages 16-37 and 16-38 (a total of 2 pages)
16.211 pages 16-53 through 16-72 (a total of 20 pages)	16.211 pages 16-53 through 16-73 (a total of 21 pages)
16.212 pages 16-73 through 16-89 (a total of 17 pages)	16.212 pages 16-89a through 16-89gg (a total of 33 pages)

Said sections are attached hereto and incorporated herein by reference. The purpose of these substitutions and additions is to modify farm and forest zoning classifications and regulations. (LC 16.090, LC 16.100, LC16.211 and LC 16.212)

While not part of this Ordinance, findings attached as Exhibit "A" and incorporated herein by this reference are adopted in support of this decision.

An emergency is hereby declared to exist and this Ordinance, being enacted by the Board in the exercise of its police power for the purpose of meeting such emergency and for the immediate preservation of the public peace, health and safety, shall take effect immediately upon adoption.

ENACTED this 28TH day of August 2002.

Chair, Board of County Commissioners

Recording Secretary for this Meeting of the Board

APPROVED AS TO FORM

Date 7/29/2002 Lane County

OFFICE OF LEGAL COUNSEL

IMPACTED FOREST LANDS ZONE (F-2, RCP) RURAL COMPREHENSIVE PLAN

16.211 Impacted Forest Lands Zone (F-2, RCP).

(1) Purpose. The purposes of the Impacted Forest Lands Zone (F-2, RCP) are:

(a) To implement the forest land policies of the Lane County Rural Comprehensive Plan and the forest land policies of the Eugene/Springfield Metro Area General Plan; and

(b) To conserve forest land for uses consistent with Statewide Planning Goal #4, OAR 660-006 and ORS 215.700 through .755.

(2) Permitted Uses. The uses and activities in LC 16.211(2)(a) through (i) below are allowed without the need for notice and the opportunity for appeal, subject to compliance with the general provisions and exceptions prescribed by this chapter of Lane Code. A determination by the Director for whether or not a use fits within the classification of uses listed in LC 16.211(2) below may constitute a "permit" as defined by ORS 215.402(4), "...discretionary approval of a proposed development of land..." For such a determination, an owner of land where the use would occur may apply in writing to the Director to provide mailed notice of the determination to nearby owners pursuant to LC 14.100(3) and (4) with the opportunity for appeal pursuant to LC 14.500. The burden of proof in the application shall be upon the owner of land to demonstrate that the proposed use fits within the classification. The Director shall provide a disclosure statement regarding this option for notice and the opportunity for appeal to owners of land applying for land use compatibility statements or permits with Lane County for the uses listed in LC 16.211(2) below.

(a) Forest operations or forest practices including, but not limited to, reforestation of forest land, road construction and maintenance, harvesting of forest tree species, application of chemicals, and disposal of slash.

(b) Temporary onsite structures which are auxiliary to and used during the term of a particular forest operation.

(c) Physical alteration to the land auxiliary to forest practices including, but not limited to those made for purposes of exploration, mining, commercial gravel extraction and processing, landfills, dams, reservoirs, road construction or recreational facilities. "Auxiliary" means a use or alteration of a structure or land which provides help or is directly associated with the conduct of a particular forest practice. An auxiliary structure is located on site, temporary in nature, and is not designed to remain for the forest's entire growth cycle from planting to harvesting. An auxiliary use is removed when a particular forest practice has concluded.

(d) Farm use (see the definition of "Farm Use" in LC 16.090).

(e) Private hunting and fishing operations without any lodging accommodations.

(f) Towers and fire stations for forest fire protection.

(g) Water intake facilities, canals and distribution lines for farm irrigation and ponds.

(h) Caretaker residences for public parks and fish hatcheries subject to compliance with the siting criteria in LC 16.211(8) below. Land use approval of a permit described in LC 16.211(2)(h) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(5)(d)(ii) and (iii), an application for a two-year extension of the timelines for the permit approval described in LC 16.211(2)(h) above may be made and approved pursuant to LC 14.700(2).

(i) Exploration for and production of geothermal, gas, oil, and other associated hydrocarbons, including the placement and operation of compressors, separators and other customary production equipment for an individual well adjacent to the well head.

(j) Disposal site for solid waste that has been ordered established by the Environmental Quality Commission under ORS 459.049, together with the equipment, facilities or buildings necessary for its operation.

(k) An outdoor mass gathering as defined in ORS 433.735 or other gathering of fewer than 3,000 persons that is not anticipated to continue for more than 120 hours in any three month period is not a "land use decision" as defined in ORS 197.015(10) or subject to review under LC 16.211(3)(f-f) below.

(l) A wildlife habitat conservation and management plan pursuant to ORS 215.804.

(m) Widening of roads within existing rights-of-way as described in LC Chapter 15 or the following public road and highway projects:

(i) Climbing and passing lanes within the right-of-way existing as of July 1, 1987;

(ii) Reconstruction or modification of public roads and highways, including the placement of utility facilities overhead and in the subsurface of public roads and highways along the public right of way, but not including the addition of travel lanes, where no removal or displacement of buildings would occur, or no new land parcels result;

(iii) Temporary public road and highway detours that will be abandoned and restored to original condition or use at such time as no longer needed; or

(iv) Minor betterment of existing public road and highway related facilities, such as maintenance yards, weigh stations and rest areas, within right-of-way existing as of July 1, 1987, and contiguous public-owned property utilized to support the operation and maintenance of public roads and highways.

(3) Special Uses - Director Review. The uses in LC 16.211(3)(a) through (f-f) below are allowed subject to compliance with the general provisions and exceptions in LC Chapter 16 and with the specific requirements in LC 16.211(3) below. Each use in 16.211(3)(a) through (f-f) below shall require submittal of an application pursuant to LC 14.050, and review and approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to provide written notice of the decision and an opportunity for appeal. A use in LC 16.211(3)(a) through (s), (z) and (a-a) through (f-f) excluding LC 16.211(3)(q)(iv) below may be allowed if it will not force a significant change in, or significantly increase the cost of, accepted farming or forest practices on agriculture or forest lands and excluding LC 16.211(f-f) below if it will not significantly increase fire hazard or significantly increase fire suppression costs or significantly increase risks to fire suppression personnel. A use in LC 16.211(3)(t) through (y) below may be allowed if there is adequate information demonstrating that the use fits the use classification in LC 16.211(3)(t) through (y) below. A condition for approval of a use in LC 16.211(3)(c), (j), (n), (o) and (r) below shall be a written statement recorded with the deed or written contract with Lane County is obtained from the landowner which recognizes the rights of adjacent and nearby land owners to conduct forest operations consistent with the Forest Practices Act and Rules.

(a) Permanent logging equipment repair and storage.

(b) Log scaling and weigh stations.

(c) Private parks and campgrounds that comply with these requirements:

(i) Except on a lot or parcel contiguous to a lake or reservoir, campgrounds shall not be allowed within three miles of an urban growth boundary unless an exception is approved pursuant to ORS 197.732 and OAR 660, Division 4;

(ii) A campground is an area devoted to overnight temporary use for vacation, recreational or emergency purposes, but not for residential purposes and is established on a site or is contiguous to lands with a park or other outdoor natural amenity that is accessible for recreational use by the occupants of the campground;

(iii) A campground shall be designed and integrated into the rural agricultural and forest environment in a manner that protects the natural amenities of the site and provides buffers of existing native trees and vegetation or other natural features between campsites;

(iv) Campsites may be occupied by a tent, travel trailer or recreational vehicle;

(v) Separate sewer, water or electric service hook-ups shall not be provided to individual camp sites;

(vi) Campgrounds authorized by LC 16.211(3)(c) above shall not include intensively developed recreational uses such as swimming pools, tennis courts, retail stores or gas stations; and

(vii) Overnight temporary use in the same campground by a camper or camper's vehicle shall not exceed a total of 30 days during any consecutive 6 month period.

(d) Public parks including those uses specified under OAR 660-034-0035.

(e) Television, microwave, and radio communication facilities and transmission towers. In addition to the requirements in LC 16.211(3) above, a communication facility that is a telecommunications facility as defined by LC 16.264(2) shall comply with LC 16.264.

(f) Fire stations for rural fire protection.

(g) Utility facilities for the purpose of generating power that do not preclude more than ten acres from use as a commercial forest operation unless an exception is taken pursuant to OAR 660, Division 4.

(h) Aids to navigation and aviation.

(i) Water intake facilities, related treatment facilities, pumping stations, and distribution lines.

(j) Reservoirs and water impoundment.

(k) Cemeteries.

(l) New electric transmission lines with right-of-way widths of up to 100 feet as specified in ORS 772.210; and new distribution lines (e.g., electrical, gas, oil, geothermal, telephone, fiber optics cables) with rights-of-way 50 feet or less in width.

(m) Temporary asphalt and concrete batch plants as accessory uses to specific highway projects. Within 30 days of the temporary asphalt and concrete batch plants no longer being used as accessory uses to specific highway projects, the site shall be restored to its condition prior to placement of the temporary asphalt and concrete batch plants.

(n) Home occupations that comply with these requirements:

(i) Shall be operated by a resident of the property on which the business is located;

(ii) Shall employ on the site no more than five full-time or part-time persons;

(iii) Shall be operated substantially in the dwelling, or other existing buildings normally associated with uses permitted by LC 16.211(2) above;

(iv) No structure shall be constructed for the home occupation that would not otherwise be allowed by LC 16.211(2) above;

(v) Shall not unreasonably interfere with uses permitted by the zoning of nearby lands or with uses allowed by LC 16.211(2) above;

(vi) Shall comply with sanitation and building code requirements;

(vii) Shall not be used as a justification for a zone change;

(viii) Shall comply with any additional conditions of approval established by the Approval Authority; and

(ix) Approved applications for home occupations shall be valid until December 31 of the year following the year that the application was initially approved or until December 31 of the year for which an extension of the approval was granted by the Director as provided in LC 16.212(3)(n)(ix) below. Prior to December 31 of the year that the approval expires, the property owner or applicant who received initial approval, or a renewal pursuant to LC 16.212(3)(n)(ix), shall provide the Director with written request for renewal of the home occupation and written information sufficient to allow the Director to determine if the Conditions of Approval and other approval criteria have been satisfied. The Director shall review this information for each approved home occupation to determine if it continues to comply with the conditions of approval. Home occupations which continue to comply with the conditions of approval shall receive a two-year extension of approval to December 31 of the following year, and such extension shall be put in writing by the Director and mailed to the owner of the property upon which the home occupation is located. Home occupations which do not comply with the conditions of approval, or for which a request for renewal is not received pursuant to this section, shall not receive extended approval by the Director, and the Director shall mail written notice of the decision not to extend the approval to the owner of the property upon which the home occupation is located.

(o) One manufactured dwelling or park model recreation vehicle in conjunction with an existing dwelling as a temporary use for the term of a hardship suffered by the resident or a relative of the resident subject to compliance with these requirements:

(i) As used in LC 16.211(3)(o) above, "hardship" means, "a medical hardship or hardship for the care of an aged or infirm person or persons;"

(ii) As used in LC 16.211(3)(o) above, "relative of the resident" means, "a child, parent, stepparent, grandchild, grandparent, step grandparent, sibling, stepsibling, niece, nephew or first cousin of the existing residents;"

(iii) The manufactured dwelling or park model recreation vehicle shall use the same subsurface sewage disposal system used by the existing dwelling, if that disposal system is adequate to accommodate the additional dwelling.

(iv) The temporary manufactured dwelling or park model recreation vehicle will comply with Oregon Department of Environmental Quality review and removal requirements;

(v) Except as provided in LC 16.211(3)(o)(vi) below, approval of a temporary manufactured dwelling or park model recreation vehicle permit shall be valid until December 31 of the year following the year of original permit approval and may be renewed once every two years until the hardship situation ceases or unless in the opinion of the Lane County Sanitarian the on-site sewage disposal system no longer meets DEQ requirements;

(vi) Within 90 days of the end of the hardship situation, the manufactured dwelling or park model recreation vehicle shall be removed from the property or demolished; and

(vii) A temporary manufactured dwelling or park model recreation vehicle approved under LC 16.211(3)(o) above shall not be eligible for replacement under LC 16.211(4) below.

(p) Expansion of lawfully existing airports.

(q) Public road and highway projects described as follows:

(i) Construction of additional passage and travel lanes requiring the acquisition of right-of-way but not resulting in the creation of new land parcels;

(ii) Reconstruction or modification of public roads and highways involving the removal or displacement of buildings but not resulting in the creation of new land parcels;

(iii) Improvement of public roads and highway-related public facilities such as maintenance yards, weigh stations and rest areas, where additional property or right-of-way is required but not resulting in the creation of new land parcels;

(iv) Adoption by the Board of an exception to Goal 4, Forest Lands, and to any other applicable goal with which the facility or improvements does not comply; or

(v) As allowed by OAR 660, Division 12, subject to the conditions and standards as set forth in OAR 660-012-0035 and 660-012-0065.

(r) Private accommodations for fishing occupied on a temporary basis may be allowed provided the Oregon Department of Fish and Wildlife (hereafter ODF&W) is consulted by the Planning Director at least ten working days prior to the initial permit decision. Approval of the seasonal use and facility shall comply with LC 16.211(8) below, and these requirements:

(i) Accommodations are limited to no more than 15 guest rooms as that term is defined in the Oregon Structural Specialty Code;

(ii) Only minor incidental and accessory retail sales are permitted;

(iii) Accommodations are occupied temporarily for the purpose of fishing during fishing seasons authorized by the Oregon Fish and Wildlife Commission; and

(iv) Accommodations are located within 1/4 mile of fish bearing Class I waters.

(s) Forest management research and experimentation facilities as defined by ORS 526.215 or where accessory to forest operations.

(t) Uses to conserve soil, air, and water quality and to provide for wildlife and fisheries resources.

(u) Local distribution lines (e.g., electric distribution transformers, poles, meter cabinets, terminal boxes, pedestals), or equipment which provide service hookups, including water service hookups.

(v) Temporary portable facility for the primary processing of forest products.

(w) Exploration for mineral and aggregate resources as defined in ORS Chapter 517.

(x) Uninhabitable structures accessory to fish and wildlife enhancement.

(y) Temporary forest labor camps.

(z) Permanent facility for the primary processing of forest products that shall not significantly conflict with the existing uses on adjacent and nearby lands.

(a-a) Disposal site for solid waste approved by the Lane County Board of Commissioners or a city council or both for which the Oregon Department of Environmental Quality has granted a permit under ORS 459.245, together with equipment, facilities or buildings necessary for its operation and that shall not significantly conflict with the existing uses on adjacent and nearby lands.

(b-b) Mining and processing of oil, gas, or other subsurface resources, as defined in ORS Chapter 520, and not otherwise permitted under LC 16.211(2)(i) above (e.g., compressors, separators and storage serving multiple wells), and mining and processing of aggregate and mineral resources as defined in ORS Chapter 517 that shall not significantly conflict with the existing uses on adjacent and nearby lands.

(c-c) Firearms training facility that shall not significantly conflict with the existing uses on adjacent and nearby lands.

(d-d) Private seasonal accommodations for fee hunting operations may be allowed subject to LC 16.211(8), and these requirements:

(i) Accommodations are limited to no more than 15 guest rooms as that term is defined in the Oregon Structural Specialty Code;

(ii) Only minor incidental and accessory retail sales are permitted;

(iii) Accommodations are occupied temporarily for the purpose of hunting during game bird and big game hunting seasons authorized by the Oregon Fish and Wildlife Commission; and

(iv) Shall not significantly conflict with the existing uses on adjacent and nearby lands.

(e-e) Any gathering, and any part of which is held in open spaces, of more than 3,000 persons which continues or can reasonably be expected to continue for more than 120 hours within any three-month period subject to compliance with the following requirements:

(i) The application has or can comply with the requirements for an outdoor mass gathering permit set out in ORS 433.750;

(ii) The proposed gathering is compatible with existing land uses;

(iii) The proposed gathering shall not materially alter the stability of the overall land use pattern of the area; and

(iv) The provisions of ORS 433.755 shall apply to the proposed gathering.

(f-f) A youth camp that complies with LC 16.211(11) below. A "youth camp" is a facility either owned or leased, and operated by a state or local government, or a nonprofit corporation as defined under ORS 65.001, to provide an outdoor recreational and educational experience primarily for the benefit of persons twenty-one (21) years of age and younger. Youth camps do not include any manner of juvenile detention center or juvenile detention facility. The provisions of LC 16.211(11) below do not apply to youth camps established prior to June 14, 2000.

(4) Alteration, Restoration Or Replacement Of A Lawfully Established Dwelling Or Manufactured Dwelling.

(a) The alteration, restoration, or replacement of a lawfully established dwelling or manufactured dwelling is an allowed use without the need for notice and the opportunity for appeal subject to compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(8) below and with these requirements:

(i) The property owner provides:

(aa) Building permit or land use application records from the Lane County Land Management Division indicating that the existing dwelling or manufactured dwelling was lawfully constructed or placed on the subject property; or

(bb) Records from the Lane County Assessment and Taxation Office indicating that the structure has existed on the property and been taxed on a continuous, annual basis from a date that, as determined by the Director, predates the zoning of the subject property.

(ii) The dwelling or manufactured dwelling has:

(aa) intact exterior walls and roof structure;

(bb) indoor plumbing consisting of a kitchen sink, toilet and bathing facilities connected to a sanitary waste disposal system;

(cc) interior wiring for interior lights; and

(dd) a heating system.

(iii) An alteration or replacement of a dwelling or manufactured dwelling allowed by LC 16.211(4)(a) above shall be located on the same site as the existing dwelling or manufactured dwelling. For the purpose of LC 16.211(4)(a)(iii) above, "the same site" is defined as a square with dimensions of 200 feet which is centered on the footprint of the established dwelling or manufactured dwelling;

(iv) For a replacement, the dwelling or manufactured dwelling to be replaced shall be removed, demolished, or converted to an allowable nonresidential use

within three months of the completion of the replacement dwelling or manufactured dwelling;

(v) Land use approval of a permit described in LC 16.211(4)(a) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(4)(a)(v) above may be made and approved pursuant to LC 14.700(2);

(vi) A temporary manufactured dwelling or park model recreation vehicle approved under LC 16.211(3)(o) above shall not be eligible for replacement under LC 16.211(4)(a) above; and

(vii) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

(b) The alteration, restoration, or replacement of a lawfully established dwelling or manufactured dwelling that does not meet the requirements in LC 16.211(4)(a)(i) or (iii) above is allowed subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to provide written notice of the decision and an opportunity for appeal, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(8) below and with these requirements:

(i) There is objective evidence demonstrating that the existing dwelling or manufactured dwelling was lawfully placed on the subject property. The burden of proof is upon the applicant to provide this evidence to the Director;

(ii) The dwelling or manufactured dwelling has:

(aa) intact exterior walls and roof structure;

(bb) indoor plumbing consisting of a kitchen sink, toilet and bathing facilities connected to a sanitary waste disposal system;

(cc) interior wiring for interior lights; and

(dd) a heating system.

(iii) For a replacement, the dwelling or manufactured dwelling to be replaced shall be removed, demolished, or converted to an allowable nonresidential use within three months of the completion of the replacement dwelling or manufactured dwelling;

(iv) Land use approval of a permit described in LC 16.211(4)(b) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(4)(b)(iv) above may be made and approved pursuant to LC 14.700(2);

(v) A temporary manufactured dwelling or park model recreation vehicle approved under LC 16.211(3)(o) above shall not be eligible for replacement under LC 16.211(4)(b) above; and

(vi) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

(5) Template Dwelling. One single-family dwelling or manufactured dwelling is allowed subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to

provide written notice of the decision and an opportunity for appeal, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(5)(a) through (f) and LC 16.211(8) below.

(a) The tract upon which the dwelling or manufactured dwelling will be located has no other dwellings or manufactured dwellings on it. As used in LC 16.211(5), "tract" means one or more contiguous lots or parcels in the same ownership. A tract shall not be considered to consist of less than the required acreage because it is crossed by a public road or waterway.

(b) The lot or parcel upon which the dwelling or manufactured dwelling will be located was lawfully created.

(c) The lot or parcel upon which the dwelling or manufactured dwelling will be located:

(i) Is predominantly composed of soils that are capable of producing 0 to 49 cubic feet per acre per year of wood fiber; and

(aa) All or part of at least three other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(i)(aa) above.

(bb) At least three dwellings or manufactured dwellings existed on January 1, 1993, on the other lots or parcels described in LC 16.211(5)(c)(i)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(i)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings or manufactured dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle; or

(ii) Is predominantly composed of soils that are capable of producing 50 to 85 cubic feet per acre per year of wood fiber; and

(aa) All or part of at least seven other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that

is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(ii)(aa) above.

(bb) At least three dwellings or manufactured dwellings existed on January 1, 1993, on the other lots or parcels described in LC 16.211(5)(c)(ii)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(ii)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings or manufactured dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle; or

(iii) Is predominantly composed of soils that are capable of producing 85 cubic feet per acre per year of wood fiber; and

(aa) All or part of at least eleven other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(iii)(aa) above.

(bb) At least three dwellings or manufactured dwellings existed on January 1, 1993, on the other lots or parcels described in LC 16.211(5)(c)(iii)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(iii)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings or manufactured dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle.

(d) Approval of a dwelling or manufactured dwelling shall comply with the requirements in LC 16.211(5)(d)(i) through (iv) below:

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

(e) Prior to land use clearance of a building permit for the dwelling or manufactured dwelling, when the lot or parcel on which the dwelling or manufactured dwelling will be located is part of a tract, the remaining portions of the tract shall be consolidated into a single lot or parcel and a deed restriction using the form provided in OAR 660-06-027(6), "Exhibit A," shall be completed and recorded with Lane County Deeds and Records. The covenants, conditions and restrictions in the deed restriction:

(i) Shall be irrevocable, unless a statement of release is signed by the Director;

(ii) May be enforced by the Department of Land Conservation and Development or by Lane County;

(iii) Shall, together with a map or other record depicting any tract which does not qualify for a dwelling, be maintained in the Department records and be readily available to the public; and

(iv) The failure to follow the requirements of LC 16.211(5)(e) above shall not affect the validity of the transfer of property or the legal remedies available to the buyers of the property which is the subject of the covenants, conditions and restrictions required by LC 16.211(5)(e) above.

(f) Land use approval of a permit described in LC 16.211(5) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(5)(f) above may be made and approved pursuant to LC 14.700(2).

(g) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

(6) Lot of Record Dwelling. One single family dwelling or manufactured dwelling is allowed subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to provide written notice of the decision and an opportunity for appeal, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(6)(a) through (j) and LC 16.211(8) below.

(a) "Owner" includes wife, husband, son, daughter, mother, father, brother, brother-in-law, sister, sister-in-law, son-in-law, daughter-in-law, mother-in-law, father-in-law, aunt, uncle, niece, nephew, stepparent, stepchild, grandparent or grandchild of the owner or a business entity owned by any one or combination of these family members.

(b) "Tract" means "One or more contiguous lots or parcels in the same ownership. A tract shall not be considered to consist of less than the required acreage because it is crossed by a public road or waterway."

(c) "Commercial tree species" means "trees recognized under rules adopted under ORS 527.715 for commercial production."

(d) The lot or parcel on which the dwelling will be sited was:

(i) Lawfully created; and

(ii) Acquired and owned continuously by the present owner since prior to January 1, 1985, or acquired by devise or by interstate succession from a person who acquired the lot or parcel prior to January 1, 1985.

(e) The tract on which the dwelling will be sited does not include a dwelling.

(f) If the lot or parcel on which the dwelling will be sited was part of a tract on November 4, 1993, then no dwelling exists on another lot or parcel that was part of that tract.

(g) The dwelling will be located on a tract that:

(i) Is composed of soils not capable of producing 5,000 cubic feet per year of commercial tree species;

(ii) Is located within 1,500 feet of a public road that is maintained and either paved or surfaced with rock and that meets the following requirements:

(aa) A "Public Road" means, "a road over which the public has a right of use that is a matter of public record;"

(bb) Shall not be a United States Bureau of Land Management road; and

(cc) Shall not be a United States Forest Service road unless the road is paved to a minimum width of 18 feet, there is at least one defined lane in each direction and a maintenance agreement exists between the United States Forest Service and landowners adjacent to the road, a local government or a state agency.

(h) If the lot or parcel where the dwelling will be located is part of a tract, then prior to land use clearance of the permit for the dwelling on this tract, the tract shall be consolidated into a single lot or parcel.

(i) Approval of a dwelling shall comply with LC 16.211(6)(i)(i) through (iv) below.

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

(j) Land use approval of a permit described in LC 16.211(6) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two-year extension of the timelines for the permit approval described in LC 16.211(6)(j) above may be made and approved pursuant to LC 14.700(2).

(k) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

(7) Large Tract Dwelling. One single family dwelling or manufactured dwelling is allowed subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to provide written notice of the decision and an opportunity for appeal, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(7)(a) through (f) and LC 16.211(8) below.

(a) "Tract" means one or more contiguous lots or parcels in the same ownership. A tract shall not be considered to consist of less that the required acreage because it is crossed by a public road or waterway.

(b) Is sited on a tract that does not contain a dwelling or manufactured dwelling.

(c) Is sited on a tract that:

(i) Contains at least 160 contiguous acres; or

(ii) Contains at least 200 acres in one ownership that are not contiguous but are in the same county or adjacent counties and zoned for forest use.

(d) Prior to land use clearance of a building permit for the dwelling or manufactured dwelling, when the lot or parcel where the dwelling or manufactured dwelling will be located is part of a tract, the covenants, conditions and restrictions form adopted as Exhibit A in OAR 660-006-027(6)(a) shall be completed and recorded by the property owner in Lane County Deeds and Records and a copy of the recorded instrument provided to the Director. The covenants, conditions and restrictions in the deed restriction:

(i) Shall be irrevocable, unless a statement of release is signed by the Director;

(ii) May be enforced by the Department of Land Conservation and Development or by Lane County; and

(iii) Shall, together with a map or other record depicting any tract which does not qualify for a dwelling, be maintained in the Department records and be readily available to the public. The failure to follow the requirements of LC 16.211(7)(d) above shall not affect the validity of the transfer of property or the legal remedies available to the buyers of the property which is the subject of the covenants, conditions and restrictions required by this subsection.

(e) Approval of a dwelling or manufactured dwelling shall comply with the requirements in LC 16.211(7)(e)(i) through (iv) below:

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

(f) Land use approval of a permit described in LC 16.211(7) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(7)(f) above may be made and approved pursuant to LC 14.700(2).

(g) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

(8) Siting Standards for Dwellings, Structures and Other Uses. The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h) and (j), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through(b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

(a) Setbacks. ResidencesDwellings or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent;

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses; and

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 and at least 30 feet from the adjoining lines of property zoned F-2 or EFU; and

(iv) The riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) are met; and

(v) Structures other than a fence or sign shall not be located closer than:

(aa) 20 feet from the planned right of way of a state road, County road or a local access public road specified in Lane Code LC Chapter 15; and

(bb) 20 feet from an existing right-of-way of a state road, County road or a local access public road; and

(cc) 30 feet from all other property lines; and

(dd) The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

(b) The amount of forest lands used to site access roads, service corridors and structures shall be minimized.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:

(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements.

(aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone

could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house.

As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	Feet of Primary Safety Zone	Feet of Additional Safety Zone Down Slope
0	30	0
10	30	50
20	30	75
25	30	100
40	30	150

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district or shall be provided with residential fire protection as evidenced by a long term contract with a fire protection district (FPD) recorded in Lane County Deeds and Records. If the dwelling or manufactured dwelling are not within a FPD, the applicant shall provide evidence that the applicant has submitted a written request for a long term services contract with the nearest FPD and to be annexed into the FPD boundaries. If the FPD and the Planning Director determine that inclusion within a FPD or contracting for residential fire protection is impracticable, the Planning Director shall require as a condition of approval for the dwelling or manufactured dwelling that the property owner implement and maintain a Fire Protection Plan as an alternative means for protecting the dwelling or manufactured dwelling from fire hazards, consistent with the following standards:

(aa) Implementation and maintenance in perpetuity of a 100-foot wide primary safety zone surrounding the perimeter of the dwelling or manufactured dwelling structures in compliance with the standards in LC 16.211(c)(i)(aa) above; and

(bb) An external, fire protection system as a component to the equivalent Fire Protection Plan to mitigate the threat to the dwelling and residential structures by a seasonal wildfire or the threat to the forest resource base from a fire originating on the parcel in compliance with the following standards:

(A) Provide a minimum of two all-weather, one-inch valve, fire hydrants and two fire hose reels with sufficient length of fire suppression hose at each hydrant to reach around fifty percent of the exterior of the dwelling and residential accessory structures. The hose reels shall be installed between 50-75 feet from the structure foundations. The minimum fire hose interior diameter shall be one-inch;

(B) Provide a fire nozzle with each fire hose with multiple settings to allow stream, spray and fog applications of water on the exterior of the structures and landscape;

(C) Provide and annually maintain a water supply and pumping system connected to the fire hydrants in compliance with the following minimum requirements: a swimming pool, pond, lake or similar body of water that at all times contains a minimum of 4,000 gallons of water; or a stream that has a continuous year-round flow of at least one cubic foot per second; or a 1,500-gallon storage tank, e.g., concrete septic tank connected to an operating groundwater well for refilling; or a high-yield groundwater well with a minimum yield of 30 gallons per minute for one hour; and a pump system capable of maintaining 80 psi line pressure to the two fire hydrants.

(cc) The property owner shall provide verification from the Water Resources Department that any permits or registrations required for water diversions have been obtained or that such permits or registrations are not required under state law for the use; and

(dd) Road or driveway access to within 15 feet of the water supply shall be provided for pumping units. The road or driveway access shall accommodate the turnaround of fire fighting equipment during the fire season. Permanent signs shall be posted along the access route to indicate the location of the emergency water source.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:

(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water; or

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or

(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to

compliance with these fire safety design standards for roads and driveways. The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the fire fighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not less than 500 feet. Turnarounds shall comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(cc) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from a engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not

to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply.

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for fire fighting equipment from its point of origination to its point of destination.

(9) Other Development Standards.

(a) Maintenance, Removal and Replacement of Indigenous Vegetation within the Riparian setback area. Maintenance, removal and replacement of indigenous vegetation within the riparian setback area along Class I streams designated for riparian vegetation protection by the Comprehensive Plan must comply with the provisions of LC 16.253(2).

(b) Signs.

(i) Signs shall not extend over a public right-of-way or project beyond the property line.

(ii) Signs shall not be illuminated or capable of movement.

(iii) Signs shall be limited to 200 square feet in area.

(10) Area. The minimum area requirement for the division of land is 80 acres subject to compliance with the requirements of LC Chapter 13 for submission, review and approval of preliminary and final partition or subdivision plans except as follows:

(a) A parcel containing less than 80 acres may be allowed to facilitate a forest practice as defined in ORS 527.620 subject to compliance with the following requirements:

(i) There are unique property specific characteristics present in the proposed parcel that require an amount of land smaller than 80 acres in order to conduct the forest practice;

(ii) The parcel shall not be eligible for siting a new dwelling;

(iii) The parcel shall not serve as the justification for the siting of a future dwelling on other lots or parcels;

(iv) Shall not result in a parcel of less than 35 acres, except:

(aa) Where the purpose of the land exchange is to facilitate an exchange of lands involving a governmental agency; or

(bb) Where the purpose of the land division is to allow transactions in which at least one person has a cumulative ownership of at least 2,000 acres of forest land located in Lane County or a county adjacent to Lane County;

(v) If associated with the creation of a parcel where a dwelling or manufactured dwelling is involved, the parcel containing the dwelling or manufactured dwelling shall contain at least 80 acres;

(vi) Shall not, as the result of the land division, be used to justify the re-designation or rezoning of resource lands; and

(vii) A landowner allowed a land division under LC 16.211(10)(a) above shall sign a statement that shall be recorded with the Lane County Clerk declaring that the landowner will not in the future complain about accepted farming or forest practices on nearby lands devoted to farm or forest use.

(viii) LC Chapter 13 for submission, review and approval of preliminary and final partition or subdivision plans.

(b) New land divisions less than the 80 acre parcel size required by LC 16.211(10) above are allowed for the uses listed in LC 16.211(2)(i) and (j), LC 16.211(3)(a) through (k) and LC 16.211(3)(a-a) through (d-d) above, in compliance with these requirements:

(i) Such uses have been approved pursuant to LC 16.211(2)(i) and (j), LC 16.211(3)(a) through (k) and LC 16.211(3)(a-a) through (d-d) above;

(ii) The parcel created for such use is the minimum size necessary for the use;

(iii) A landowner allowed a land division under LC 16.211(10)(b) above shall sign a statement that shall be recorded with the Lane County Clerk declaring that the landowner will not in the future complain about accepted farming or forest practices on nearby lands devoted to farm or forest use;

(iv) LC Chapter 13 for submission, review and approval of preliminary and final partition or subdivision plans.

(c) A division of a lot or parcel for an existing dwelling or manufactured dwelling subject to compliance with these requirements:

(i) The parcel established for the existing dwelling or manufactured dwelling shall not be larger than five acres, except as necessary to recognize physical features such as roads or streams, in which case the parcel shall not be larger than 10 acres;

(ii) The dwelling or manufactured dwelling lawfully existed prior to June 1, 1995;

(iii) The remaining parcel not containing the dwelling or manufactured dwelling shall:

(aa) contain at least 80 acres; or

(bb) be consolidated with another parcel, and together the parcels contain at least 80 acres.

(iv) An application for the creation of a parcel pursuant to LC 16.211(10)(c) above shall provide evidence that a restriction on the remaining parcel, not containing the dwelling or manufactured dwelling, has been recorded with Lane County Deeds and Records. The restriction shall allow no dwellings or manufactured dwellings unless authorized by law or goal on land zoned for forest use except as allowed under LC 16.211(10)(c) above. This restriction shall be irrevocable unless a statement of release is signed by the Planning Director indicating that the Lane County Rural Comprehensive Plan or land use regulations applicable to the property have been changed in such a manner that the parcel is no longer subject to statewide planning goals pertaining to agricultural land or forest land;

(v) A landowner allowed a land division under LC 16.211(10)(c) above shall sign a statement that shall be recorded with Lane County Deeds and Records declaring that the landowner will not in the future complain about accepted farming or forest practices on nearby lands devoted to farm or forest use;

(vi) LC Chapter 13 for submission, review and approval of preliminary and final partition or subdivision plans; and

(vii) The Planning Director shall maintain a record of parcels that do not qualify for the siting of a new dwelling or manufactured dwelling under restrictions imposed by LC 16.211(10)(c) above. The record shall be readily available to the public.

(d) A division of a lot or parcel for at least two existing dwellings or manufactured dwellings subject to compliance with these requirements:

(i) At least two dwellings or manufactured dwellings lawfully existed on the lot or parcel prior to November 4, 1993;

(ii) Each dwelling or manufactured dwelling complies with the requirements for a replacement dwelling or manufactured dwelling in LC 16.211(4)(a) or (b) above;

(iii) Except for one lot or parcel, each lot or parcel created under LC 16.211(10)(d) above is between two and five acres in size;

(iv) At least one dwelling or manufactured dwelling is located on each lot or parcel created under LC 16.211(10)(d) above;

(v) The land owner of a lot or parcel created under LC 16.211(10)(d) above shall provide evidence that a restriction prohibiting the landowner and the landowner's successors in interest from further dividing the lot or parcel has been recorded with Lane County Deeds and Records. This restriction shall be irrevocable unless a statement of release signed by the Planning Director indicating that the Lane County Rural Comprehensive Plan or land use regulations applicable to the property have been changed in such a manner that the parcel is no longer subject to statewide planning goals protecting forest land or unless the land division is subsequently authorized by law or by a change in a statewide planning goal for land zoned for forest use or mixed farm and forest use; and

(vi) The Planning Director shall maintain a record of parcels that do not qualify for the siting of a new dwelling or manufactured dwelling under restrictions imposed by LC 16.211(10)(d)(v) above. The record shall be readily available to the public.

(11) Youth Camps. The purpose of LC 16.211(11) below is to provide for the establishment of a youth camp that is generally self-contained and located on a parcel suitable to limit potential impacts on nearby and adjacent land and to be compatible with the forest environment. A "youth camp" is a facility either owned or leased, and operated by a state or local government, or a nonprofit corporation as defined under ORS 65.001, to provide an outdoor recreational and educational experience primarily for the benefit of persons twenty-one (21) years of age and younger. Youth camps do not include any manner of juvenile detention center or juvenile detention facility. The provisions of LC 16.211(11) below do not apply to youth camps established prior to June 14, 2000. An application for a youth camp shall comply with these requirements:

(a) The number of overnight camp participants that may be accommodated shall be determined by the Approval Authority based on the size, topography, geographic features and any other characteristics of the proposed site for the youth camp. Except as provided by LC 16.211(11)(b) below, a youth camp shall not provide overnight accommodations for more than 350 youth camp participants, including staff;

(b) The Approval Authority may allow up to eight (8) nights during the calendar year when the number of overnight participants may exceed the total number of overnight participants allowed under LC 16.211(11)(a) above;

(c) Overnight stays for adult programs primarily for individuals over twenty-one years of age, not including staff, shall not exceed 10% of the total camper nights offered by the youth camp;

(d) A campground as described in ORS 215.213(2)(c) above shall not be established in conjunction with a youth camp;

(e) A youth camp shall not be allowed in conjunction with an existing golf course;

(f) A youth camp shall not interfere with the exercise of legally established water rights on adjacent properties;

(g) A youth camp shall be located on a lawful parcel that is:

(i) Suitable to provide a forested setting needed to ensure a primarily outdoor experience without depending upon the use or natural characteristics of adjacent and nearby public and private land. This determination shall be based on the size, topography, geographic features and any other characteristics of the proposed site for the youth camp, as well as, the number of overnight participants and type and number of proposed facilities. A youth camp shall be located on a parcel containing at least 40 acres;

(ii) Suitable to provide a protective buffer to separate the visual and audible aspects of youth camp activities from other nearby and adjacent lands. The buffers shall consist of forest vegetation, topographic or other natural features as well as structural setbacks from adjacent public and private lands, roads, and riparian areas. The structural setback from roads and adjacent public and private property shall be 250 feet unless the governing body, or its designate sets a different setback based upon the following criteria that may be applied on a case-by-case basis:

(aa) The proposed setback will prevent conflicts with commercial resource management practices;

(bb) The proposed setback will prevent a significant increase in safety hazards associated with vehicular traffic; and

(cc) The proposed setback will provide an appropriate buffer from visual and audible aspects of youth camp activities from other nearby and adjacent resource lands.

(iii) Suitable to provide for the establishment of sewage disposal facilities without requiring a sewer system as defined in OAR 660-011-0060(1)(f). Prior to granting final approval, the Approval Authority shall verify that a proposed youth camp will not result in the need for a sewer system.

(h) A youth camp may provide for the following facilities:

(i) Recreational facilities limited to passive improvements, such as open areas suitable for ball fields, volleyball courts, soccer fields, archery or shooting ranges, hiking and biking trails, horse back riding or swimming that can be provided in conjunction with the site's natural environment. Intensively developed facilities such as tennis courts, gymnasiums, and golf courses shall not be allowed. One swimming pool may be allowed if no lake or other water feature suitable for aquatic recreation is located on the subject property or immediately available for youth camp use;

(ii) Primary cooking and eating facilities shall be included in a single building. Except in sleeping quarters, the governing body, or its designate, may allow secondary cooking and eating facilities in one or more buildings designed to accommodate other youth camp activities. Food services shall be limited to the operation of the youth camp and shall be provided only for youth camp participants. The sale of individual meals may be offered only to family members or guardians of youth camp participants;

(iii) Bathing and laundry facilities except that they shall not be provided in the same building as sleeping quarters;

(iv) Up to three camp activity buildings, not including primary cooking and eating facilities;

(v) Sleeping quarters including cabins, tents or other structures. Sleeping quarters may include toilets, but, except for the caretaker's dwelling, shall not include kitchen facilities. Sleeping quarters shall be provided only for youth camp participants and shall not be offered as overnight accommodations for persons not participating in youth camp activities or as individual rentals;

(vi) Covered areas that are not fully enclosed;

(vii) Administrative, maintenance and storage buildings; permanent structure for administrative services, first aid, equipment and supply storage, and for use as an infirmary if necessary or requested by the applicant;

(viii) An infirmary may provide sleeping quarters for the medical care provider, (e.g. Doctor, Registered Nurse, Emergency Medical Technician, etc.);

(ix) A caretaker's residence may be established in conjunction with a youth camp if no other dwelling exists on the subject property.

(i) A proposed youth camp shall comply with the following fire safety requirements:

(i) The fire siting standards in LC 16.211(8)(c) and (e) above;

(ii) A fire safety protection plan shall be developed for each youth camp that includes the following:

(aa) Fire prevention measures;

(bb) On site pre-suppression and suppression measures; and

(cc) The establishment and maintenance of fire safe area(s) in which camp participants can gather in the event of a fire.

(iii) Except as determined under LC 16.211(11)(i)(iv) below, a youth camp's on-site fire suppression capability shall at least include:

(aa) A 1,000-gallon mobile water supply that can access all areas of the camp; and

(bb) A 30-gallon-per-minute water pump and an adequate amount of hose and nozzles; and

(cc) A sufficient number of fire fighting hand tools; and

(dd) Trained personnel capable of operating all fire suppression equipment at the camp during designated periods of fire danger.

(iv) An equivalent level of fire suppression facilities may be determined by the Approval Authority. The equivalent capability shall be based on the Oregon Department of Forestry's (ODF) Wildfire Hazard Zone rating system, the response time of the effective wildfire suppression agencies, and consultation with ODF personnel if the camp is within an area protected by the Oregon Department of Forestry and not served by a local structural fire protection provider;

(v) The provisions of LC 16.211(11)(i)(iv) above may be waived by the Approval Authority if the youth camp is located in an area served by a structural fire protection provider and that provider informs the governing body in writing that on-site fire suppression at the camp is not needed.

(j) The Approval Authority shall require as a condition of approval of a youth camp, that the land owner of the youth camp sign and record in the deed records for the county a document binding the land owner, or operator of the youth camp if different from the owner, and the land owner's or operator's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

(12) Telecommunication Facilities. Telecommunication facilities are allowed subject to compliance with the requirements of LC 16.264 and with applicable requirements elsewhere in LC Chapter 16 including but not necessarily limited to: the riparian vegetation protection standards in LC 16.253; Floodplain Combining Zone (LC 16.244); Willamette Greenway Development Permits (LC 16.254); the Coastal Resource Management Combining Zones (LC 16.234, 16.235, 16.236, 16.237, 16.238, 16.239, 16.240, 16.241, 16.242, or 16.243); Federal or State of Oregon inventories and regulations applicable to delineated wetlands and waters of the nation or state; the Commercial Airport Safety Combining Zone (LC 16.245) and the Airport Safety Combining Zone (LC 16.246); and the Sensitive Bird Habitat protection Standards and Criteria in LC 16.005(4). *(Revised by Ordinance 7-87, Effective 6.17.87; 18-87, 12.25.87; 12-90, 10.11.90; 11-91A, 8.30.91; 10-92, 11.12.92)*

"Table of Cross References from the Proposed Requirements in LC 16.211 indicated in **bold print** to the Corresponding Requirements in the State Laws For Lands in Lane County Zoned Impacted Forest Land (F-2, RCP) indicated in {brackets}"

(1) **Purpose**. {changed for consistency with OAR 660-006 & ORS 215.700-.755}

(2) **Permitted Uses**. {Uses permitted outright in forest zones: OAR 660-006-0025(2)}
- **(a)** {no change, consistent with OAR 660-006-0025(2)(a)}
- **(b)** {no change, consistent with OAR 660-006-0025(2)(b)}
- **(c)** {changed for consistency with OAR 660-006-0025(2)(c)&(d)}
- **(d)** {no change, consistent with OAR 660-006-0025(3)(b) & ORS 215.203(2)(a)}
- **(e)** {no change, consistent with OAR 660-006-0025(3)(f)}
- **(f)** {no change, consistent with OAR 660-006-0025(3)(g)}
- **(g)** {no change, consistent with OAR 660-006-0025(3)(i)}
- **(h)** {changed for consistency with OAR 660-006-0025(3)(j), Enrolled SB 724}
- **(i)** {no change, consistent with OAR 660-006-0025(3)(m)}
- **(j)** {no change, consistent with OAR 660-006-0025(3)(o)}
- **(k)** {added for consistency with OAR 660-006-0025(3)(q)}
- **(l)** {added for consistency with Enrolled HB 3564 Sec. 9, "ORS 215.802")
- **(m)** {changed for consistency with OAR 660-006-0025(3)(h), ORS 215.213(1)(m)-(p)}

(3) **Special Uses** {OAR 660-006-0025(4)-(5)}
- **(a)** {no change, consistent with OAR 660-006-0025(4)(b)}
- **(b)** {no change, consistent with OAR 660-006-0025(4)(c)}
- **(c)** {changed for consistency with OAR 660-006-0025(4)(f)}
- **(d)** {changed for consistency with OAR 660-006-0025(4)(f)}
- **(e)** {changed for consistency with OAR 660-006-0025(4)(h) & Proposed LC 16.264}
- **(f)** {no change, consistent with OAR 660-006-0025(4)(i)}
- **(g)** {changed for consistency with OAR 660-006-0025(4)(j)}

Eugene, OR 97408

Re: **509-PA-05298 (Nimpkish LLC)**
Appeal of Director Approval of Template Dwelling in F-2 zone
by Landwatch Lane County
Applicant's (Nimpkish LLC) Final Rebuttal

Mr. Darnielle,

Please enter this letter into the record of the above-referenced appeal that I am submitting on behalf of the applicant, Nimpkish LLC., and in support of the Director's decision and findings.

The appellant, Landwatch, through its attorney, Sean Malone, submitted a letter with exhibits, dated November 21, 2019, as its final response to the Nimpkish template dwelling application. On the same date, Andrew Mulkey, staff attorney for 1000 Friends of Oregon, also submitted a letter with exhibits as its final response to the Nimpkish application. I will respond to both letters and their various exhibits. Mr. Belknap, in a separate submission, has responded to these letters.

It should be noted that the Hearings Official has denied our request that the record be reopened to allow additional evidence, including, but not limited to, County and LCDC records relating to Lane County's Goal 5 Acknowledgment of Compliance. We object to that denial on the ground that the record had closed to new evidence when this issue was first raised by LandWatch.

Overview

To introduce my final response to LandWatch's and 1000 Friends objections to this application, it is important to point out that those most recent arguments have very little to do with the template dwelling criteria set forth in LC 16.211(5) and (8) as well as the corresponding provisions in ORS and LCDC regulations. Mr. Malone has moved far afield and is now openly speculating that perhaps after LCDC's acknowledgment of the County's comprehensive plan, including the highlighted Goal 5 and Goal 7 policies, in 1984, that thereafter, none of Lane County's subsequent land use decisions have been in conformity with new regulations, like OAR 660-023. From that unsubstantiated claim, Mr. Malone proceeds to elevate dicta in a LUBA decision to a definitive statement about why your *Evans/Betz* decision is no longer valid. After a puzzling reference to the Cerro Gordo experience, he relapses into another long discussion of Goal 5's 1984 Flora and Fauna Policy 11 and how that somehow relates to overall residential density. This is followed by a criticism of Mr. Remboldt's report. The template dwelling criteria and siting standards are not mentioned.

Mr. Mulkey makes no attempt to address the template criteria either but, instead, cites *Cattoche v Lane County*, (LUBA No. 2018-109, Opinion May 22, 2019) and LUBA comments in that decision about Policy 11. He concludes with a confusing explanation of slopes that is troubled, to say the least, as Mr. Balknap explains in detail.

What is most apparent after carefully reading these missives is that neither gentleman cites any meaningful or relevant authority for their various objections and claims. The *Cattoche* decision is the closet thing to relevant caselaw only because it discusses Policy 11, but even then only tangentially as it related to the main issue, which involved the shortcomings of the County's ESEE analysis. *Cattoche* at 23-24. That analysis has nothing to do with a site-specific land use decision, like the Nimpkish template dwelling application, that starts and ends with a single lawfully-created unit of land. Aside from that, they do not offer any legal precedent or authority to support their various positions. It is unconstrained speculation about how these organizations would like the law to be rather than how it actually is.

Malone Letter (11-21-19)

At the outset, it is important to note what neither Mr. Malone nor Mr.

Mulkey is addressing to which is our previous response to the "tract" argument that was laid out in Mr. Mulkey's November 7 letter. That argument is missing from these final responses perhaps, in part, because they could not conjure up any additional rationale and, also, because our November 7 responses (mine and Mr. Belknap's) were so conclusive that they have elected not to go any further on that topic.

As we stated in our earlier submissions, there is a significant legal difference between "owner"/"ownership" and "under the control of". "Owners" sign deeds and other legal documents that relate to or require fee ownership of real property. The term "under the control of" can include many more legal or non-legal (permissive) arrangements that generally relate to some ~~should~~ right to WREF. participate in the management of an area of real property. It might be based on some form of ownership, deeded or otherwise, or it could be some form of oral agreement that has been confirmed with conduct and longevity. Whatever "under the control of" is in a particular circumstance, it does not equate to "owner" in the real property and legal sense.

With that reminder, I would also like to commend and adopt, as my own, Mr. Belknap's detailed final response to Mr. Malone's and Mr. Mulkey's letters. It is thorough and personal and accentuates the desperation of LandWatch's and 1000 Friends' arguments.

Several matters he addressed provided context and perspective to what Lane County did back in 1984 to receive Acknowledgment from LCDC for its comprehensive plan, including Goal 5, Flora & Fauna Policy 11. His analysis of the acreages that were assigned F-1 and F-2 zoning highlighted some significant facts. First, and perhaps must startling, is that 84% of Lane County is zoned F-1 and residences are prohibited. This single fact, alone, addresses any and all concerns that Mr. Malone and Mr. Mulkey have attempted to raise regarding ODFW's overall density recommendations. Beyond that, the same F-1 zoning that prohibits residences is applied to 94.4% of <u>all</u> of Lane County's designated forest land. Using these numbers, which he acknowledges are just numbers, but they are ODFW's numbers (one unit per 80 acres for Major Big Game Range), and the F-1 prohibition on residences, more than 32,000 residences could be placed in the F-2 zone. Is this what LandWatch is suggesting should occur? In fact, as it stands now, the F-2 template dwelling criteria does cluster new residences in existing areas of limited residential development within the F-2 zone.

It was also good for Mr. Belknap to provide his local input regarding Mr.

Malone's Cerro Gordo reference. That development was unique for innumerable reasons but all based on Mr. Canfield's conduct and blatant disregard for the law and, in particular, County and State land use laws. Thankfully, things were eventually resolved in the courts and on the ground. For this appeal, Cerro Gordo offers no guidance or relevance.

Finally, Mr. Belknap's discussion of the difference between degrees and percentages for slope calculations was very helpful. I did not understand what Mr. Mulkey was attempting to argue but now, with Mr. Belknap's explanation, I know that "percent of grade" is what we use for template dwellings, not "angle of slope".

Again, Mr. Belknap's response provides a complete look at how this building site was selected and evaluated within the F-2 template dwelling and siting standards criteria. A licensed geotechnical engineer was hired to provide a preliminary assessment and he found no significant landslide hazard for the development site. There is nothing more to analyze until a specific structure is proposed.

With all that introduction, I will address Mr. Malone's uncaptioned letter roughly in the order it was presented with my own headings and a reference to the corresponding page in Mr. Malone's letter.

OAR 660-16-000 v. OAR 660-023-0000 (p 1)

Mr. Malone's first argument in his final response is:

> "Again, it is an open issue as to whether the comprehensive plan has been acknowledged to comply with the administrative rules implementing the current version of Goal 5 and the forest template dwelling statute."

p1. This is after Mr. Malone chastises me for overlooking the fact that the Goal 5 administrative rules that were referenced in LCDC's 1984 Acknowledgment Order were set forth in OAR 660-16-000 and then were replaced in 1996 with new Goal 5 rules in OAR 660-023-0000.

In direct response to Mr. Malone's quoted statement, No!, it is not an "open issue" as to whether Lane County's Goal 5 policies, not to mention the Goal 5

policies for the other thirty-five counties in Oregon, have been acknowledged to be consistent with the "new" Goal 5 rules in OAR 660-023-0000. ORS 197.245 outlines a process for new regulations to be addressed by local governments when a new rule is adopted by LCDC. The statute requires LCDC to identify how the new rule might affect land use decisions and a timetable whereby the new rule must be addressed by the local government. This statute, in some form, has been in place since 1973 and most recently amended in 1995. It was followed by Lane County and DLCD when the new Goal 5 rules were adopted in 1996 because if it had not, there would have been obvious and public notice, in some form or another, that Lane County was not following the law.

The point is that there are long-time, well-established statutory procedures whereby all of Oregon's local governments are required to address and possibly react, i.e. adopt new land use ordinances, to address new or amended goals and regulations that are adopted by LCDC. The new Goal 5 rule in OAR 660-023-0000 was adopted in 1996 and has not been amended since according to the legislative history in the rule. That means Lane County and the other thirty-five counties and all the cities in Oregon had to at least recognize the adoption of the new rules and react, even if that was to not react because the new rule did not apply. Certainly, the new Goal 5 rules applied to Lane County and I am certain Lane County reacted in the manner required by LCDC rules and ORS after which LCDC, primarily through its staff, responded to whatever Lane County said or did.

At this point, and for this appeal, Mr. Malone is raising this issue for the first time. We believe it is, at best, groundless and careless speculation. We believe it is a certainty that Lane County properly and legally addressed the new rules eventually receiving whatever "acknowledgment" the then-required process produced. We (Mr. Belknap and I) offered to reopen the record in order to go through Lane County and LCDC/ DLCD records to produce for this record the County's statutory consideration of the new Goal 5 rules adopted in 1996. Again, that request was denied and we believe that denial is procedural error that denies us the ability to respond to new allegations of error. Please open the record so all parties may sift through the relevant records.

We do not believe that is necessary, however, because we believe there is a presumption that you, as Hearings Official, can make which is that Lane County, DLCD and LCDC all performed their statutorily-required functions and legally and completely addressed the new Goal 5 rules in 1996. In turn, this means Lane County Goal 5 policies and procedures have been acknowledged to be in compliance with LCDC's 1996 Goal 5 rules as all of Lane County Chapter 16 was

acknowledged, including the forest template provisions in LC 16.211(5) and (8). Mr. Malone offers nothing that contradicts this conclusion.

OAR 660-066-0025(6) (p 1-2)

Mr. Malone begins this paragraph with his earlier argument that OAR 660-006-0025(6) somehow requires 1984 Goal 5, Flora & Fauna Policy 11 to apply directly to this application and further require that the application be denied. As has been stated in earlier submissions and no doubt will be repeated in the future, that argument is preposterous. Mr. Malone does not attempt to provide any additional support for this "interpretation" of Policy 11, but does manage to refer to the Oregon Supreme Court decision that confirmed Lane County's plan acknowledgment *1000 Friends v. LCDC (Lane County)* 752 P2d 271 (1988). There is no apparent or relevant reason for Mr. Malone to cite this case other than to say the decision did not say something it was not required to address.

***Evans/Betz* (p 2)**

Mr. Malone then segues into an assertion that the *Evans/Betz* decision about Goal 5 is no longer relevant because of LUBA's brief reference to Policy 11 in *Cattoche*. Of course, we previously noted that *Cattoche* involved a plan amendment and not a template dwelling permit which Mr. Malone now readily acknowledges. Instead, he has now changed his reliance on *Cattoche* to LUBA's dicta when it briefly addressed Policy 11 in the Goal 5 Working Paper. Like other arguments he makes, he does not provide any rationale or analysis for why *Cattoche* is still important but instead, criticizes me for not addressing his new, nuanced argument about why *Cattoche* is important. In the end, your rationale in *Evan/Betz*, that is supported by the Howe and Mann statements, gives the clearest and most complete response to LandWatch's and 1000 Friend's claims about the applicability of Policy 11 to template dwelling applications.

Howe and Mann Letters (p 2-3)

Not to be dissuaded, Mr. Malone then provides a quick critique of the Howe and Mann letters including a personal jab at Mr. Howe's credibility (fn1, p2) that is most likely based on LandWatch's inability to convince Mr. Howe when he was Director, that their interpretations of Lane Code should be implemented. Those statements stand uncontradicted and establish the context in which and by which Lane County's Goal 5 policies were acknowledged by LCDC to be in compliance with Statewide Planning Goals in September, 1984. Lane County did so by

prohibiting residences on 84% of Lane County and the Howe and Mann statements explain Lane County's justification and rationale for doing so at that time. As I asserted in a previous letter, it was a safe harbor before there were safe harbors because it resulted in so much of the County being prohibited from having residences.

Mr. Malone does not say anything relevant or meaningful in his reference to the Howe and Mann letters. P2-3. His reference to "Policy II" is surely a misprint and is readily clarified by Mr. Howe's reference to Flora and Fauna Policies 9, 10 and 11. The generalized ODFW density recommendations were the subject of the Howe and Mann letters at all times.

Cerro Gordo (p 3)

On page 3, Mr. Malone refers to a portion of the 1984 LCDC Acknowledgment Order that gave acknowledgment to the 600-acre Cerro Gordo development. Mr. Belknap's response to this discussion is especially accurate coming from someone who was in the community at the time Cerro Gordo was unfolding. It was a special set of circumstances that could only be finally resolved, as Mr. Belknap notes, in circuit court. It has no relevance to this appeal or the Nimpkish application because, if for no other reason, it involved the creation of additional lots much like the plan amendment in *Cattoche*. Creation of new lots for residences is significantly different than permitting residences on existing lots as is the case with template dwellings. LandWatch continues to struggle with this concept.

Policy 11 (p 4)

Mr. Malone concludes this portion of his response by quoting the now famous Policy 11 and, claims it restricts all new residences within Major and Peripheral Big Game Ranges in Lane County to compliance with the 40 or 80 acre minimum densities recommended by ODFW. Again, Policies 9, 10 and 11 were completely addressed with what I believe could be referred to as the "Grand Cluster" compromise that prohibited new residences on 94.4% of Lane County's designated forest land. With that, even within the F-2 zoning district both before and after the enactment of the forest template dwelling provisions, clustering of residences has been required. The date of reckoning for counting a lawful lot and dwelling for the template dwelling standards is still January 1, 1993. There can be no expansion of F-2 template dwelling clusters. The amount of lots and dwellings

in the F-2 zone is fixed as of that date. In other words, the density is finite unless something occurs, e.g. plan amendment and zone change, which seeks to increase the number of residential lots.

Goal 5 ESEE Process (p 4-5)

At the bottom of page 4, Mr. Malone begins a new tack in which he assumes we are correct about the template provisions providing the only applicable criteria for template dwellings, after which he begins a rambling and disjointed argument that is based on his ungrounded and unsupported assertion (if that is the correct word) that Lane County's template dwelling criteria and siting standards are not in compliance with Goal 5. His assertion has nothing to do with what actually happened in 1984 as reflected by the Howe and Mann letters and the simple fact that Lane County's Goal 5 program was acknowledged because residences were only allowed on a small portion of the County's designated forest land.

In the end, Mr. Malone's analysis doesn't make any sense but more importantly it goes off on tangents that gets further and further away from explaining how and why thirty-five year old Goal 5 policies, that were acknowledged by LCDC in 1984, have suddenly sprung to life and apply to a site specific land use application that makes no reference to any comprehensive plan policies, including Goal 5 Flora & Fauna policies relating to protection of Big Game Habitat.

After this rambling and extended paragraph that swirls around and through the 1984 Acknowledgment Order, and the adoption of the forest template dwelling statute in 1993, Mr. Malone concludes in the following paragraph:

> "Here, because minimum residential density is exceeded . . .".

Again, Mr. Malone throws out a conclusion about "minimum residential density" for which he has provided no evidence, legal analysis or even an opinion to support such a statement. A single residence is being approved on an existing legal lot that existed prior to January 1, 1993. Nothing has been increased or expanded, and particularly not the residential density. As stated previously LandWatch either doesn't understand this critical distinction or simply denies its existence.

Finally, this issue about the template dwelling provisions being in

compliance with the 1996 amended Goal 5 regulations in OAR 660-023-0000, is now being raised for the first time. As stated earlier, we are more than willing to agree to a limited extension of the record being left open so that Mr. Belknap and I, the LandWatch crew and staff can explore the records to establish the new Goal 5 rule's applicability in Lane County and particularly with regard to the template dwelling criteria.[1] It is obvious LandWatch has not made any attempt, to date, to locate the records addressing this issue. We do not believe it is relevant but again will defer to the Hearings Official for direction.

November 7, 2019 Staff Memo re: Goal 7 (p 5-6)

Beginning at the bottom of page 5, Mr. Malone takes issue with Staff's description of how they evaluate applications for construction in the identified hazard areas. This is what has occurred in this circumstance. There will be multiple decisions that eventually result in a residence being placed on Tax Lot 507. The decision to zone the property F-2 was what identified this property and the area it is located within as Impacted Forest Land as suitable for additional residences on existing legal lots.

The November 7 staff memo confirms that a specific residential proposal will trigger the Building Code's process for possibly requiring more than the preliminary evaluation that Mr. Remboldt provided. This is how Goal 7 should work in these identified high landslide hazard areas and this is what Ms. Serslev succinctly and clearly explains in the November 7 memo. Goal 7 has been and will be addressed completely when a more "specific" building proposal is presented at the building permit stage. Again, LandWatch has received, in the form of Mr. Remboldt's preliminary report, an opinion as to the feasibility of constructing a residence within the identified building site. There is nothing more to do at this stage of the process.

Remboldt Report (p6)

Mr. Malone's comments about Mr. Remboldt's October 31 report and conclusion are strained and inconsequential. Mr. Remboldt is a qualified, licensed

[1] In a brief phone conversation with Mr. Mann about the new 1996 Goal 5 rules, he said he recalled them being addressed without requiring too much change other than with regard to aggregate resources. His general recollection of the County's process was consistent with my earlier general description of how new LCDC rules are addressed by local government.

geotechnical engineer who has concluded that the "future hazard of landsliding is low and manageable" for this site. There's nothing more to evaluate at this time until a "specific" building is proposed with a building permit application. Mr. Belknap provides a detailed response to Mr. Malone's comments about Mr. Remboldt's report that concludes, based on the substantial evidence in the record, that we have fully complied with the siting standards for the template dwelling including appropriate and professional consideration of on-site soil and grade conditions. There are no landslide hazards "in a near the proposed building site."

MSF. significant

Mulkey November 21 Letter

Mr. Mulkey's November 21 letter on behalf of 1000 Friends of Oregon addresses the Goal 5 and Goal 7 issues one more time. In doing so, he ventures into slope descriptions and calculations to which Mr. Balknap provides a clarifying response. I will address each topic separately.

Goal 5

Mr. Mulkey, once again, latches on to the *Cattoche* decision and that decision's comments, in dicta, about density and Policy 11 (*Cattoche* 16-24). The subassignment of error in which this dicta appeared was actually sustained on the ground that the County's Goal 5 ESEE analysis did not satisfy the requirements of OAR 660-023-0250 as it examined conflicting uses to Goal 5 resources, i.e. Big Game habitat. Id at 23. LUBA's discussion about the Flora and Fauna Working Paper is based on whatever record and argument was before them at that time.

It is important to remember, however, that LUBA is addressing Policy 11 and Lane County's Goal 5 Flora and Fauna Working Paper <u>because</u> the subject of the appeal in that case was Lane County's approval of a plan amendment and zone change (Forest/F-2 to Non-resource/RR-5). As with Mr. Malone, Mr. Mulkey skips over that critical first step which is to explain how Policy 11, that was adopted by Lane County and acknowledged by LCDC in 1984 to have complied with Goal 5, can now be a decision criteria for a template dwelling application. Policy 11 (ODFW recommendations. . . shall be used to determine the allowable number of units within regions of the County) was considered and implemented by Lane County at the eleventh hour in the summer of 1984. The Howe and Mann letters provide the legislative history as to why the F-1 and F-2 zoning districts were drafted to exclude residences from such a significant area of the County. Neither Mr. Mulkey nor Mr. Malone have any contrary explanation as to why that occurred in 1984.

Policy 11 and the Goal 5 Flora and Fauna Working Paper have been fully implemented.

Goal 7

There's nothing more for me to say beyond Mr. Belknap's detailed and informative response.

Conclusion

This property meets and satisfies all of the applicable forest template dwelling criteria. LandWatch and 1000 Friends offer no credible analysis or evidence as to why this application should be denied. We urge you to affirm the Director's decision.

Sincerely,

Michael E. Farthing

Enclosure

Personally Delivered December 2, 2019

Re: PA19-05298, Applicant's Final Rebuttal

Dear Mr. Darnielle:

A dozen years ago, or so, I had the opportunity to participate with a group of "stakeholders" in a committee to review our county's land use process. The group consisted of 15 people selected by our five County Commissioners and was comprised of land use attorneys, representatives of LandWatch Lane County and 1000 Friends of Oregon, oddly, a representative of a group called the Goal 1 Coalition who did not reside in Lane County, a representative of a major landholder and several land use consultants. At one of our meetings former County Commissioner Steve Cornacchia looked across the table at Robert Emmons, the President of LandWatch, and said, "Look me in the eye, Bob, and tell me your objective is anything other than a complete halt to the construction of houses in F2 zoned land."

Mr. Emmons crossed his arms, looked away, and said nothing.

That objective has been unchanged and the march to that goal has been unabated.

Now we are told that despite its use for 35 years, or 23 years depending on when one wants to start the calendar, "it is an open issue as to whether the comprehensive plan has been acknowledged to comply with the administrative rules implementing the current version of Goal 5 and the forest template dwelling statute."

Mr. Malone asserts that what escapes Mr. Farthing (counsel for the Applicant) "is that densities to protect big game were not incorporated into zoning..."

Gary Darnielle
PA19-05298
Applicant's Final Rebuttal
November 27, 2019

Mr. Malone disregards the precise wording from the Land Conservation and Development Commission in page 22 of their Acknowledgement of Compliance, dated September 13, 1984 (Exhibit A to my letter of November 6, 2019), the following:

> "The strength of their forest lands conservation program is the F-1 zone which prohibits the siting of all dwellings (other than those required to be authorized by state statutes). This zone is applied to 2,449,775 acres of Lane County's forest lands.
> The County's F-2 zone is applied to 145,356 acres of privately owned lands which consist, generally, of large lot rural residential parcels, nonproductive or marginally productive resource lands, or underutilized resource lands..."

While Mr. Mann and Mr. Howe note that the F-1 zoning is applied to 84% of the county's total land base, a more striking analysis is the proportion of forestland, 94.4% (2,449,775 / 2,595,131), that prohibits the placement of dwellings. The F2 zoned land encompasses 5.6% of the county's forest lands (145,356 / 2,595,131).

Mr. Malone asserts there has been no evidentiary showing of this data. To the contrary, we note that the numbers used are cited from Page 22 of the Land Conservation and Development Commission Acknowledgement of Compliance, Lane County, Dated September 13, 1984, again, Exhibit A to my letter of November 6, 2019. Mr. Malone chooses to ignore this submission as it tears at the underpinnings of his argument.

The 2,595,131 acres of forestland, divided by 80 acres (the most restrictive of proposals made by ODFW for residential density), would allow for 32,439 dwellings in the County's forest zoned lands. If that same number of dwellings was then limited to only the F2 zoned lands, which it effectively is as the F2 zoning is the only forest zone that allows for dwellings, the 145,356 acres divided by 32,439 dwellings would allow for one dwelling every 4.48 acres. (145,356 / 31,439 = 4.48)

In other words, as Mr. Malone likes to say, Lane County could allow a dwelling on every 4.48 acres of F2 zoned land and still support an <u>overall</u> density standard of only one dwelling on every 80 acres of forest zoned land in the county. If the peripheral big game habitat standard of one dwelling per 40 acres was incorporated the number of allowed dwellings would, of course, increase dramatically.

This analysis is simply mathematical, we do not comport to say that such an analysis should be adopted by the county, though Mr. Mulkey in his response attempts to gain some traction in trading on the Cattoche case with the comment from LUBA that "We observe that the F-2 zone does not provide a general residential density standard." That statement is, of course, factual. Lane County applies the Template Test to lawfully created units of land in reviewing the application for a forest zoned dwelling because the <u>overall</u> residential density question was fully resolved in 1984 in the adoption of the F1 zoning and its prohibition of dwellings.

Gary Darnielle
PA19-05298
Applicant's Final Rebuttal
November 27, 2019

It defies explanation to conclude that Lane County has not incorporated zoning protections for big game by limiting the number of dwellings in its forest zoned lands.

Having lived in the Cottage Grove area for the past 42 years I have watched with something of a morbid curiosity the development of the Cerro Gordo community. Mr. Malone tries to incorporate a discussion of the exhaustive measures taken by Lane County to work with the developer, Chris Canfield, and the Cerro Gordo Cooperative and Charter. This development was little more than a Ponzi scheme that brought in dozens of well-intentioned people hoping to invest in a utopian environmental community only to find their dreams dashed against the greed of a reckless developer that endured countless lawsuits and ultimately a finding of a violation of the Racketeer Influenced and Corrupt Organizations Act (RICO) laws which brought triple damages against Cerro Gordo and their accountant and an end to the fleecing. Along the way Cerro Gordo was extended special attention and consideration to legitimize a number of dwellings that were already initiated prior to the County adopting its Comprehensive Plan. Notably, in the decision made regarding Cerro Gordo as many as 60 lots were to be permitted in the 600 acre property with a significant portion of the land being zoned Rural Residential. The discussion of the activities of Cerro Gordo dating to the early 1970s in light of the issues at hand offers little direction to a resolution of the current matter but does provide an interesting distraction.

"**Overall**" is the word Mr. Malone consistently chooses to ignore in the full discussion of the ODFW recommendations. At no point does the ODFW recommendation of one residence per 40 acres in Peripheral Big Game Habitat and one residence per 80 acres in Major Big Game Habitat drill down to a specific parcel by parcel limitation. To the contrary the term consistently used is "overall residential density." Overall dictates an examination of "the big picture" – how is the county addressing the number of dwellings to be considered in a total review of all of its forest zoned land.

Mr. Malone attempts to make some point that Lane Code 16.211 specifically does not discuss big game habitat, peripheral or major. That is a factual statement because it does not need to be included in the evaluation of a dwelling application. Lane Code 16.211 was adopted to carry out the acknowledged Comprehensive Plan, within which the issue of limiting residential encroachment into big game habitat was thoroughly considered and implemented with the adoption of the F1 zone.

Mr. Malone seeks to make the point that a site specific evaluation by a Registered Professional Land Surveyor is not needed when "contour mapping is readily available." This is a totally self-serving and shallow statement. It is most typically LandWatch that has demanded additional professional evaluation of properties for no other reason than to pile expenses onto an applicant in a hope to dissuade them from pursuing a land use application. I will acknowledge that contour mapping provides a good "first blush" look at the lay of the land, but I spent enough time as an Infantry officer, and later a contractor of logging operations and road construction, to tell you it is "boots on the ground" that will establish the measured and calculated actual grades, indentations, rock outcroppings, drainage requirements and the true surface of the earth at the subject property.

Mr. Malone provides a footnote to his discussion on Page 6 stating:

> "Specific land use decisions shall be based upon inventory and upon on-site or other evaluation as appropriate."

The drawings and grade annotations provided by David J. Collier, Registered Professional Land Surveyor, and the site assessment made by Michael Remboldt, Professional Engineer and Geotechnical Engineer, fully meet the criteria Mr. Malone seeks to establish. The problem, of course, is he doesn't like the results.

Mr. Malone takes notice of Mr. Remboldt's assessment that the proposed dwelling site is located within or near the south end of the upper scarp zone of a very large, ancient landslide that moved soils and rock to the west. In our conversation with Mr. Remboldt his opinion was the landslide occurred something in the area of 5,000 years ago, though notably that was not mentioned in his report, deferring to the conclusion "there is not a significant landslide hazard in the proposed homesite development area." I must ask the question: How much clearer a statement can that be?

Mr. Remboldt's review of the property was a generally accepted "Level One" geotech report. The DOGAMI listing, as we have previously noted, is a massive broad stroke of the brush taking in thousands of acres. The K & A Engineering report, written by Mr. Remboldt, attempts to reduce that broad stroke to a specific site evaluation of landslide susceptibility. Again, Mr. Malone does not like the results of the report.

Mr. Malone uses the definition of "scarp" as a "very steep bank or slope." The report of the Registered Surveyor is the grade surrounding the proposed dwelling site is virtually level to the north, east and south and approaches an 18% grade to the west. At the risk of belaboring the point, the on-site evaluation made by the Registered Surveyor far exceeds the value of whatever hyperbole Mr. Malone seeks to introduce to this discussion. As I opined in my response to LandWatch's objections to our application, the definition of the term "steep," like beauty, seems to be in the eye of the beholder. Of perhaps even greater significance is the map prepared by Mr. Colllier showing the contour interval overlay in the area of the proposed building site and the relatively gentle grade continuing to the east and south from the site. We will acknowledge the area at the north end of the parcel, approximately 600 feet north of the building site, is a steeper grade. No excavation with the proposed building or road construction will take place anywhere near this area and any soil movement that might occur would be from the east downhill to the northwest, as depicted quite clearly in the contour map, not to the south where the dwelling will be located some 600 feet away. See Exhibit 2 to this letter.

The Appellants have failed to grasp what was accomplished in the review of the subject property by K&A Engineering and have engaged in a word play of critiquing selections of Mr. Remboldt's report failing to examine the overall discussion of potential landslide susceptibility. Moreover, Mr. Malone

has specifically misrepresented elements of the application that were discussed at the public hearing and are displayed in the various attachments to the application and supplements.

On Page 6 of Mr. Malone's November 21, 2019 letter he states the engineer's review "did not consider the access (300 +/- foot long driveway),.." This is a complete fabrication. Exhibit 3 to the original application, Exhibit C to the Supplement to the Application and Exhibit 3 to the Notice of Pending Land Use Decision, annotated as "Proposed Site Plan," all show the location of the dwelling and driveway proposed on the subject property. To emphasize this point again, I am attaching at Exhibit 1 to this letter the "Proposed Site Plan" with the annotation of "509-PA19-05298." This map is at a scale of 1" = 100', the dwelling is shown as a 40' X 60' footprint and is located approximately 180 feet from the south boundary of the subject property and is accessed by a driveway approximately 240 feet in length as it descends in grade from R. R. Baker Road.

Mr. Darnielle, you may recall we had a specific discussion at the September 26, 2019 hearing where you asked us to explain the "discrepancy" of the quoted length of the driveway at 240 feet but the location of the dwelling was only 180 feet from the property line. I noted the building is anticipated to be approximately 60 feet in length and the difference was found in whether the driveway approached the building at the north end, as we displayed, or the south end. My interpretation of our discussion at the hearing was that this made sense to you. The grade is approximately 14% as it leaves R. R. Baker Road but then quickly levels out and is essentially at level grade for approximately 170 feet as it approaches the building site. I am enclosing at Exhibit 2 to this letter a copy of the contour map prepared by David Collier, the Registered Professional Land Surveyor, which was Exhibit E to the Response to Appeal dated September 21, 2019. This map is a scale of 1" to 200' but depicts well the level construction of the driveway for its preponderance of length.

I shared the letters prepared by Mr. Malone and Mr. Mulkey with Michael Remboldt, the Professional Engineer, to solicit his response to their criticism. Mr. Remboldt has prepared a letter dated December 2, 2019, which I am attaching to this correspondence as Exhibit 3. In this letter Mr. Remboldt explains the nature of his evaluation of the subject property, describing this report as a Level 1 evaluation. Mr. Malone goes on to discuss what is described as a Level 2 evaluation, noting that such an evaluation is associated with the actual building proposal and will take in such matters as construction style, weight load of the building, drainage that is proposed, foundation design and a myriad of matters that will be unique to the structure. It is from this standpoint that Lane County directs the landslide susceptibility to be evaluated in the building permit process.

Mr. Remboldt summarizes his evaluation process as follows:

> "This methodology is a logical approach to ensure that the hazard is carefully and thoroughly understood in an efficient and cost effective manner.

Thus, it is untrue that K & A Engineering, Inc. failed in the evaluation of slope stability. What we did was provide a first step in the process of a rational methodology that is accepted as the standard of care by qualified geotechnical engineers for similar projects. In the long run, following this process will result in a complete, detailed and rational evaluation of slope stability that meets the need of all parties involved."

In our application and in the subsequent submissions I provided copies of the Soil Conservation Service (now NRCS) Soils Mapping for Lane County for the area surrounding the subject property and the proposed homesite. See Exhibits 5a and 5b to the original application, and Exhibits C and D to my letter dated September 20, 2019. As we noted, the area to the north of the parcel is Soil Type 113G, Ritner cobbly silty clay loam, displaying slopes between 30% and 60%. Again, the steeper sloping portion of this soil type is approximately 600 feet to the north of the proposed building site, and also, notably, do not approach the upper end of the range of 30% to 60% grade. As we previously noted, the area around the proposed building site is a Soil Type 107C, Philomath cobbly silty clay with a grade range of 3% to 12%. In Mr. Collier's on-site evaluation he confirmed the grades in and around the building site to be what would have been expected based only on the evaluation of the Soils Mapping.

We have displayed the contour mapping for the parcel, we have displayed the soils mapping for the parcel, we have provided an on-site evaluation by a Registered Professional Surveyor and we have provided an on-site evaluation by a Professional Engineer and Geotechnical Engineer. The conclusion reached in any reasonable review of this information is that no landslide hazard exists in or near the proposed building site.

I am compelled to address Mr. Mulkey's letter on behalf of 1000 Friends of Oregon, though much of a detailed response would only be a rehash of my review of Mr. Malone's letter as the points the Appellants are attempting to make are simply the same weak argument. At issue is the ODFW position of overall residential density. The Appellants are unable or unwilling to grasp that concept.

Mr. Mulkey introduces a new document in his letter, a reference to "SLIDO," which, while not defined, I believe is the Statewide Landslide Information Database for Oregon. In a poorly structured presentation Mr. Mulkey tells us there are reported to be 10,335 deep landslides that are mapped in Oregon. I am doing my darndest to not say something to the effect of "so what." This is a "Gee Whiz" statement simply thrown into the discussion for its incendiary and attention gathering emotional jab. Oregon is comprised of approximately 63,018,000 acres. Perhaps some context needs to be introduced to the notion of 10,335 landslides being spread over more than 63 million acres. Perhaps of even more importance is some discussion needs to be had as to how many hundreds (thousands?) of years transpired over which this number of landslides has occurred.

Mr. Mulkey goes on to talk about mean slope angles of "27 degrees" and "95% of the deep slope landslides occur on 10-45 degree slopes." While I have no direct knowledge of this claim, I rather

suspect there is at least some truth to it. What Mr. Mulkey fails to note, and of critical importance in this review, is the "angle" of slope is distinctly different than the "percent of grade." The two terms are simply not synonymous.

Angle is the geometric measurement of two intersecting lines and leads to several mathematical "laws" and "theorems." (For instance, the sum of the three angles of a triangle will always equal 180 degrees.) Slope, as measured by "grade" is the calculation of "rise over run" and is calculated by percent, not degrees. An elevation change of, say, 10 feet over a distance of 100 feet is slope measuring at a 10% grade.

The term slope is used in functions where engineering or surveying practices will be employed and is incorporated into our statutes and code. For example, ORS 215.730(1)(b)(B) "The dwelling will not be located on a **slope of greater than 40 percent.**" This same evaluation practice is carried forward into Lane County Code as referenced in LC16.211(5)(a) "Residences, dwellings, and structures must be sited as follows: (i) Near dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or **slope greater that 40 percent** (40%);"

For purposes of our discussion it would seem appropriate to continue the evaluation of the terrain of the subject property in terms of slope and percent of slope.

Without wishing to be beating this to death, but hopefully to rein in the emotional hyperbole, please take a moment to review the graph included with this letter at Exhibit 4. This graph depicts the correlation of degrees of angle and percent of grade. A slope angle of 45 degrees is equal to a percent of grade of 100%. A 10 degree angle of slope is equivalent to an approximate 17.6% slope. So while the claim is made that 95% of the landslides occur in the range of 10 degrees to 45 degrees, as shown in the drawing at Exhibit 1, there is a huge range of grade to be covered in this spread.

I well suspect that 95% of the deep slope landslides actually do occur on grades in the range of 10 degrees to 45 degrees, virtually all of that range substantially exceeds the area proposed for the placement of the dwelling. I must note again, the area surrounding the proposed dwelling site is virtually level, the downslope from the site to the west is measured at 18%, the bottom of the range of concern noted by Mr. Mulkey when 10 degrees is shown as correlating to a slope of approximately 17.6%.

The issue of landslide hazard is not solely defined by the grade of the terrain. Mr. Mulkey throws out raw numbers in support of his position, but fails to consider the important issues of precipitation and soil type. A review of the landslide susceptibility of any grade in the west slope of the Coast Range, that may receive upwards of 100 inches of rain a year, is going to be totally different than a review of a grade in the foothills of the Cascades where precipitation will typically amount to less than half that number.

Gary Darnielle

Applicant's Final Rebuttal
November 27, 2019
Mark Twain said it best:

"There are three kinds of lies - Lies, damn lies and statistics."

The introduction of the SLIDO report at this point of the appeals process is at best questionable, but any consideration given to the carefully selected statistics Mr. Mulkey is putting forth needs to be disregarded until they are accompanied by a more thorough overall picture of the various interactions of grade, weather and soil. The objections of the Appellants do not include this critical information.

Thank you for your attention to my thoughts in this matter.

Sincerely,

Jim Belknap

R. R. Baker Road, Springfield, Oregon

Dear Mr. Belknap,
At your request, we have reviewed comments from appellants in the subject matter and are providing a written response. These comments include those made by Mr. Sean Malone (representing LandWatch Lane County) dated November 21, 2019 and Mr. Andrew Mulkey (representing 1000 Friends of Oregon).

The scope of our review and response is limited to landslide hazard.

Response to Mr. Andrew Mulkey Comments
The recommendations that K & A Engineering, Inc. provided for the subject parcels (dated October 31, 2019 for tax lot 507 and November 13, 2019 for tax lot 506) summarize what is termed a "Level I" evaluation of slope stability for the project site(s). Level I evaluations typically include:

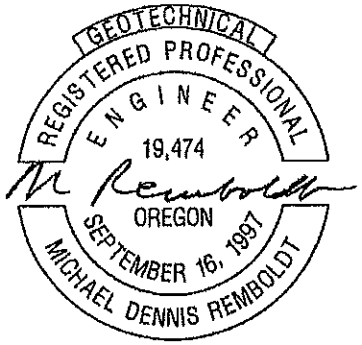
- **Literature Search:** a review of available reports and maps available in the literature for the site describing geology and geologic hazards. We consulted geologic maps of the area, DOGAMI hazard maps, and aerial photography of the site and surrounding areas.
- **Site Review:** Level I evaluations include a visual site inspection. We visited the site and spent time looking for visual indicators that are always present in areas of active slope movement including tension cracks, fresh scarps, sloughing, depositional areas, and ponding. We also inspected road cuts to determine the general nature and depth of subsurface conditions in the area.
- **Preliminary Stability Evaluation:** Based on our field observations and available topographic data we made an evaluation of the general nature of slope stability of the area. There are other parameters that affect slope stability in addition ground slope, such as soil shear strength, soil depth, groundwater, root strength, just to name a few. Basing decisions of stability on ground slope gradient alone is bad science.

Recommendations for further investigation and a more detailed evaluation of slope stability are made based on the findings of the Level I evaluation. In this case, we recommended a Level II geotechnical investigation for these parcels because of their location within or near the DOGAMI high-hazard mapping. The Level II investigation is a detailed study requiring geotechnical borings, laboratory testing, calculation of factors of safety, etc. and will incorporate the specific nature of the proposed structure and grading plans.

This methodology is a logical approach to ensure that the hazard is carefully and thoroughly understood in an efficient and cost-effective manner.

Thus, it is untrue that K & A Engineering, Inc. failed in the evaluation of slope stability. What we did was provide a first step in the process of a rational methodology that is accepted as the standard of care by qualified geotechnical engineers for similar projects. In the long run, following this process will result in a complete, detailed, and rational evaluation of slope stability that meets the needs of all parties involved.

Response to Mr. Sean Malone Comments



- **Substantial Evidence:** Malone, like many others, seems to believe that "substantial evidence" consists of volumes of written documentation. Substantial evidence can be and most often should be very simple and brief in scope.
- **Landslide Scarps:** Scarp sizes, slope gradients, and shapes can vary widely depending on the nature of the slope movement and the age of the slope movement. Steep scarps erode and weather over time, resulting in less-steep slopes and more rounded features. Very old scarps can indeed be difficult to define unless they include zones of harder rock that weather and degrade more slowly than surrounding unconsolidated soil deposits. There is nothing "equivocal" about stating that a location is within or near to a scarp because, as is the case here for very old slope movements, weathering and natural transport of materials downhill eventually result in reduced slope angles.
- **Recent or Ancient:** By recent we mean active landslides or landslides that occurred whereby fresh evidence of movement is visible.
- **"Near the Road:"** The actual proposed length is less than 200-feet, not 300-feet. "Near" is a subjective opinion. This is a convoluted and irrational paragraph that morphs from "near the road" to turnout construction, the land use code, and the feared "chimney effect" – none of which have much, if anything, to do with landslide hazard.
- **"Extensive or Drastic Safeguards:"** Mr. Malone's conclusion is that "it is irrelevant whether any extensive or drastic safeguards may or may not be called for because the issue is whether or not a geotechnical report/evaluation is needed..." The fact is that we are moving forward with a *rational process* of geotechnical evaluation and investigation, with more detailed studies of the impact of development (such as grading, drainage, and foundation loads) required as a result of our Level I evaluation. Making detailed studies at this point makes no sense and does a disservice to the process because it forces limiting assumptions that may or may not exist when the serious details of actual development are determined which usually include things like an actual grading plans, actual foundations (location, depth, type, loads, etc.), real changes to drainage patterns, etc.

  Our level I review is appropriate for undeveloped areas and its use in the determination of the likely nature of slope stability in the current condition and if further study is needed for ground

disturbing development. The whole point of the Level I review was to determine of the proposed action would significantly heighten landslide hazard and require extreme measures for mitigation. Mr. Malone obfuscates the analysis process.

Thank you for the opportunity to be of service. Please call me if you have any questions.

Sincerely,

Subject: RE: Open Record Request PA19-05298

If I understand, the request is that the record be fully reopened to allow for new evidence, response to that evidence and rebuttal closing on December 12, December 26 and January 2 respectively. Therefore, it seems a 30 day timeline waiver is appropriate since the record is being extended from December 2 to January 2.

Do I have this right?

Thanks,
Rachel

Subject: Re: Open Record Request PA19-05298

Ms. Serslev and Mr. Darnielle,

In preparing my final rebuttal for 05298 (Nimpkish) and discussing the same with Mr. Belknap, there is more than one reference in Mr. Malone's final response that suggests that Lane County's Goal 5 acknowledgment compliance is in question particularly with regard to the forest template dwelling provisions in LC 16.211(5) and (8). Since this issue will no doubt be raised in subsequent appeals, including PA19-05299 for an adjoining parcel, we would request that the record be left open in this matter for a limited time and purpose to allow all parties to submit County and DLCD records pertaining to Lane County's Goal 5 Acknowledgment including but not limited to before 1984 and on through to the present. This would allow all parties to review and submit documents relating to Lane County's response to the amended Goal 5 rules adopted in 1996 (OAR 660-023-0000 et seq). Since the open record period deadline in 05299 is 4:00PM, December 12, we would propose the same for this appeal. Thereafter, each party would have two weeks to comment on the new evidence, December 26, and we would then have until Thursday, January 2, to submit our final overall rebuttal. Because of the Holidays, we are very receptive to any changes in this schedule to accommodate all parties. Of course, if the extension is granted, we would agree to a corresponding extension for the County's final decision due date.

Michael Farthing

Re: LandWatch responsive testimony in opposition to Request for Template Dwelling in the F-2 zone, 509-PA19-05298 (Nimpkish).

On behalf of LandWatch Lane County, please accept this testimony in support of the appeal and in opposition to the application described above.

In response to Mr. Farthing's November 7, 2019, letter, where he attempts to provide the "legislative context in which Lane County's Goal 5 policies were adopted in 1984," LandWatch presents the following responses. First, an issue overlooked by Mr. Farthing is that the administrative rules for Goal 5 were amended subsequent to that time, as indicated by the erroneous reference to "OAR 660-16-000," which is the previous location of Goal 5 before the amendment that placed Goal 5 provisions in OAR 660-023-0000 through -0250. In other words, it is an open question as to whether the Lane County comprehensive plan has been acknowledged to comply with Goal 5, as amended. The same is true of the administrative provisions implementing the forest template dwelling statute, which occurred subsequent to applicant's focus on the "legislative context in which Lane County's Goal 5 policies were adopted in 1984." Again, it is an open issue as to whether the comprehensive plan has been acknowledged to comply with the administrative rules implementing the current version of Goal 5 and the forest template dwelling statute. The applicant has ignored these subsequent wrinkles in its testimony.

Next, the Farthing letter also takes issue with the applicability of OAR 660-006-0025(6). If those provisions were not enough, three additional provisions of statute and rule also raise the prospect of the applicability of comprehensive plans to template dwellings. *see also* ORS 215.416(4)(a), (8)(a); OAR 660-006-0027(6)(a) ("A proposed 'template' dwelling under this rule

is not allowed ... if it is prohibited by or will not comply with the requirements of an acknowledged comprehensive plan, acknowledged land use regulations, or other provisions of law."). Despite the plain language of provisions cited above, Mr. Farthing alleges that they do not apply to policies "that are in the form of providing direction to the County who, as is discussed later herein, responded to that direction by adopting the F-1 zone that prohibits residences and then applied that zone to 84% of the County's designated forest land." Mr. Farthing's attempt to explain that provision is not straightforward and resorts to an unsupported theory that designating 84% of the county as F-1 was done to protect a Goal 5 resource, specifically big game resources. In fact, the 1988 Supreme Court Decision in *1000 Friends of Oregon v LCDC (Lane County)*, 752 P2d 271 (1988), which preceded and directed the County's adoption of an 80-acre minimum parcel size for the F1 zone, is silent on the issue of the zone protecting any goal 5 resources.

Mr. Farthing's citation to the Evans/Betz matter is irrelevant in light of the *Cattoche* analysis because the *Cattoche* case rebuts the characterization of the Flora and Fauna working paper in the Betz/Evans matter. In addition, Evans/Betz was a Hearings Official decision which carries no legal authority over subsequent applications. What has escaped Mr. Farthing is that *densities to protect big game were not incorporated into zoning, which was the assumption of the Betz/Evans matter*. LandWatch has readily conceded that *Cattoche* was a plan amendment case. The focus when reading *Cattoche* is the difference in how the Hearings Official and LUBA read the Flora and Fauna working paper. The failure to focus on the issue is not helpful to Mr. Farthing's argument.

Mr. Farthing then moves on to the Howe and Mann letters, alleging that they are "first-hand accounts of how and why the RCP Goal 5, Flora and Fauna Policies ... were addressed during the 1984 RCP adoption and acknowledgment process." Any factual information contained in those letters *must* be supported by something more than a bare allegation.[1] Aside from a reference to a 1984 LCDC Acknowledgment of Compliance, there is no other evidentiary support, and that support was subsequently amended by LCDC in 1988 following the 1988 Supreme Court decision noted above. More specifically, the allegations by Howe and Mann assert the adoption of the F-1 zoning that prohibited residences was some grand compromise. The problem is that neither of these experts point to any evidence to support that theory. If there is evidence, bring it forth. If not, there is no support for relying on their allegations.

At the heart of the allegations from Howe and Mann is that "clustering requirements" or presumably siting standards were imposed on residential development in peripheral and major big game areas in the F-2 zone in order to protect big game. The first problem with that theory is that the excerpt pointed to specifically aims "too [*sic*] carry out the intent of the Flora and Fauna Policy II." Looking to the Flora and Fauna Policy II, however, relates to "recogniz[ing] existing

[1] For example, Mr. Farthing, Howe, and Mann continually refer to 84% of Lane County as zoned F-1 but there has been no evidentiary showing. Appellant also takes issue with the bluster that "Mr. Howe's credentials and expertise about Lane County's RCP acknowledgement process are impeccable...." To the contrary, Appellant believes Mr. Howe's tenure at Lane County has been rather controversial.

federal and state programs protecting threatened or endangered fish and wildlife species." Comprehensive Plan Policy 2. The Howe and Mann letters do not specify what the "Flora and Fauna Policy II" is if they consider it something other than was indicated in the aforementioned quote. That is an important issue that the Howe and Mann letters gloss over.

Elsewhere in the 1984 LCDC Acknowledgment of Compliance, at page 10-11 of 45, the commission notes the policy of Lane County in big game range areas in the context of an attempt to reduce the acreage for a particular development referred to as Cerro Gordo:

> Requirement
>
> 11. Amend the plan to justify the potential one dwelling unit per 5-acre density authorized for Cerro Gordo's 600 acres in view of ODFW's accepted wildlife habitat density standard for cluster developments of one dwelling unit per 40 acres. (See also Goal 2's cluster development issue.)
>
> Response
>
> The County's policy is to abide by ODFW's density recommendations unless the entire Goal 5 process is applied and a decision to exceed these recommendations is justified. Lane County has adopted supplementary findings (Order No. 84-9-11-23) and has revised its ESEE consequences analysis and wildlife habitat management plan for Cerro Gordo to justify development in a recognized big game habitat area, in excess of ODFW's recommended density standards. A meeting was held on August 14, 1984, with ODFW, Cerro Gordo and DLCD representatives to discuss this issue. It was determined that, in this case, ODFW density recommendations do not have as much bearing on the acceptability of the development as do other factors. These factors include the overall number and location of dwellings and roads, as well as mitigating measures incorporated into the development. The following factors in the revised Cerro Gordo proposal are particularly relevant (Order No. 84-9-11-23):
>
> 1. There is an overall "cap" on the number of lots which could be developed (i.e., 60 lots).
> 2. No more than one-third of the residences will be located north of the BLM road (the habitat area considered more sensitive to human disturbances).
> 3. Wildlife corridors from 600 to 1800 feet in width shall be provided along streams.
> 4. Residential development will be confined to a band 2,400 feet in width along an existing BLM road.
> 5. Residences must be clustered.
> 6. Goal 2 cluster subdivision requirements shall apply (see the Goal 2 section of this report for details).
> 7. Cerro Gordo is either adjacent to or near large tracts of federal and private forest land.
> 8. Lane County will provide ODFW with the opportunity to review and comment on the preliminary subdivision application to assure mitigation measures are achieved through proper clustering.
> 9. Road development will be minimized and private roads within forested areas will be closed to vehicular use except for emergencies, maintenance, and forest management activities.
> 10. A Cerro Gordo Design Committee as well as the Cerro Gordo Cooperative itself shall review and monitor actions and changes in wildlife conditions on an ongoing basis.
> 11. Pets shall be limited.

Because of these and other factors addressed in the County's amended findings, the impacts on big game range are thought to be acceptable by ODFW. Allowing such conflicts to occur, but with restrictions outlined above, is a (3C) decision under the Goal 5 Administrative Rule. The County has justified this decision.

Conclusion

The requirement has been met.

What this tells us is that, first, ODFW's clustering requirement *was* included in the density recommendations, here for peripheral at one dwelling per 40 acres: "in view of ODFW's accepted wildlife habitat density standard for cluster developments of one dwelling unit per 40 acres." Moreover, it shows that the "County's policy is to abide by ODFW's density recommendations unless the entire Goal 5 process is applied and a decision to exceed these recommendations is justified." In that case, the minimum density of one dwelling per 40 acres was exceeded, so it was necessary to revise its ESEE analysis and come up with additional siting standards, presumably as the "program to achieve goal 5." In other words, because the residential density recommendations are exceeded, an ESEE analysis must occur to determine whether to allow, allow in part, or prohibit the conflict and to propose a program to achieve goal 5. That is, in essence, what is required by Flora and Fauna Policy 11, where any density above what is recommended in the working paper would require an ESEE analysis:

> "Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resources zoning program."

(emphasis added). The working paper presents those recommendations, as noted in prior testimony:

> "The primary conflict to big game, as mentioned earlier is residential use at certain densities. ODFW has recommended overall residential densities for Peripheral Big Game Range at one dwelling unit per 40 acres; for Major Big Game Range at one dwelling unit per 80 acres. * * * to restate the conflict: overall residential density greater than one dwelling unit/40 acres in Peripheral Range * * * conflicts with habitat for big game." Flora and Fauna Draft Working Paper, Page 24.

Because this template dwelling application is proposing a density that exceeds 80 acres per dwelling in an area designated as Major Big Game, the comprehensive plan requires that the ESEE analysis be adhered to, including a determination of whether to allow, allow in part, or prohibit the use, as well as a program to achieve goal 5.

Wholly disregarding the 40- and 80-acre recommendations for argument's sake, and assuming the applicant is correct that the siting standards are the *only* applicable provision to

achieve goal 5 for template dwellings, there is a further problem. The template dwelling rule (which originated in statute) was adopted in 1993 and the Goal 5 ESEE analysis was significantly revised in 1996, both occurring after the 1984 Acknowledgment of Compliance. As such, it is questionable as to how those siting criteria apply to a use not contemplated at the time and apply under a regime not in place at the time. As LUBA has noted, "acknowledgment is limited to compliance with the statewide planning goals and *administrative rules in effect when the local ordinance was acknowledged.* Pursuant to ORS 197.646(3), subsequent goal or rule amendments apply directly until a local government amends its land use code to implement post-acknowledgment goal or rule amendments." *White v. Lane County*, __ Or LUBA __ (LUBA No. 2013-063, Dec. 12, 2013) slip op at 13. The applicant has not demonstrated that the clustering or siting criteria alleged to resolve an issue in 1984 are applicable to template dwellings and the amended Goal 5 ESEE process. More specifically, current Goal 5 ESEE provisions require that the program to achieve goal 5 be couched in "clear and objective" terms. *See* OAR 660-023-0050(2) ("When a local government has decided to protect a resource site under OAR 660-023-0040(5)(b), implementing measures applied to conflicting uses on the resource site and within its impact area shall contain clear and objective standards."). OAR 660-023-0050(2) goes on to list examples of such standards, none of which mesh with the obviously subjective criteria that are listed in the 1984 Acknowledgment of Compliance. For example, the words and phrases "near," "minimal intrusion," and "where possible" are subjective criteria. It should also be noted that where there were specific criteria in Lane Code for Big Game between 1984 and 1992, there is nothing in the current code that specifically purports to apply to big game range (whether peripheral or major) in the F-2 zone. *See* LC 16.211.

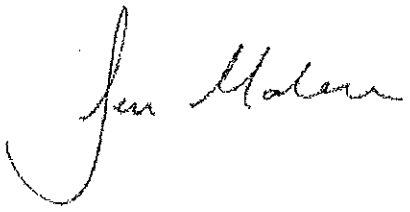
Here, because minimum residential density is exceeded, pursuant to the plain terms of the comprehensive plan and the working paper, an ESEE analysis is necessary to resolve the conflict. In circumstances where the minimum residential density standard is not exceeded, siting criteria can be used to as the program to ensure compliance with Goal 5. There is also the unresolved problems pertaining to whether the comprehensive plan has ever been determined to comply with the template dwelling provisions in rule and the amendments to the Goal 5 ESEE analysis process.

In response to the November 7, 2019, staff memo, staff appears to conflate and misconstrue the excerpts cited from the RCP, Goal 7 Policies in stating that "according to the policies a land use decision should use the Natural Hazards Working Paper as a *guide* and be based upon inventory and on-site or other evaluations of hazards." The footnoted excerpt from the Lane County Rural Comprehensive Plan does not support that interpretation; what it actually says is that there are two categories of land use decisions and that the category 'general land use decisions' "shall be guided by the NHWP", and that 'specific land use decisions' "shall be based upon inventory and upon on-site or other evaluation as appropriate."[2] It is readily apparent that

[2] "GOAL SEVEN: AREAS SUBJECT TO NATURAL DIASTERS AND HAZARDS

1. The Natural Hazards Inventory, as contained in the 1982 Natural Hazards Working Paper and associated materials, shall be used as a guide for general land use decisions.

this application is a specific land use decision. County counsel has provided no basis for his interpretation that "the Goal 7 policies should not be applied as approval criteria" and staff's assertion that the "land use decision considers DOGAMI inventory of landslide hazards fails to specify in what manner the DOGAMI mapping has been considered.



The "site specific survey" staff notes as "demonstrating the slopes of the subject property" is not evidence of soil stability nor is there a need for paid "Professional Registered Land Surveyor" to "demonstrate slopes" when contour mapping is readily available and accessible; land slide susceptibility is a function of multiple factors, including but not limited to slope, drainage, soil types, and physical disturbance from excavation and grading.

In response to the K&A submission, dated October 31, 2019, the letter addresses the development area and states "our understanding is that a small portion of the project site, located at the SE corner near the road is proposed for development as a single family residence." This statement shows that the review, for which no substantial evidence has been provided, did not consider the access (300 +/- foot long driveway), or accessory developments such as garages and other similar structures. Moreover, the letter is equivocal, stating that the "project site is located within, or near, the south end of the upper scarp zone of a very large, ancient landslide that moved soils and rock to the west." There is a substantial difference as to whether the development would occur within a scarp or near a scarp, and the conflation of the two are questionable. A scarp is defined as a "very steep bank or slope; an escarpment." If proposal is within the scarp, that is significantly different than if it is near the scarp, whatever is meant by "near." The letter also fails to distinguish between "recent slope movement" and "ancient" slides when concluding without so much as a test pit or other form of subsurface exploration that the slide is "ancient." It also raises the issue of whether an older slide, when construction occurs on it, can result in geotechnical hazards. In other words, without more, it is not apparent that only recent slides will cause geotechnical hazards. If that is not the case, the applicant has not provided any information to support its position.

The letter also states that the 'project site' is "near the road"; this is a subjective statement without evidence or context. In land use parlance, near the road usually refers to proximity to a public county road, rather than an access easement road through forest land as is the case here; in addition, a 300 foot long driveway from the access easement road to the development site is not necessarily 'near' a road, and the engineer failed to consult the land use code for information about turnout and turnaround construction standards, including the issue of chimney-effect across slopes. The letter concludes that "extensive or drastic safeguards are NOT needed to ensure safety on or off the property . . . "; it is irrelevant whether any extensive or drastic safeguards may or may not be called for because the issue is whether or not a geotechincal report/evaluation is needed that would ostensibly establish what safeguards might be necessary considering the general area and the entirety of the subject property are mapped as having severe landslide susceptibility.

Specific land use decisions shall be based upon inventory and upon on-site or other evaluation as appropriate "

Sincerely,

Sean T. Malone

PROPOSED LANE COUNTY RARE & ENDANGERED VASCULAR PLANTS

The plants which the Native Plant Society of Oregon suggests for protection in Lane County at the present time are:

Aster curtus

Aster vialis

Darlingtonia californica

Draba aureola

Erigeron cascadensis

Erigeron decumbens var. decumbens

Eriogonum umbellatum var. hausknechtii (research needed)

Frasera umpquaensis

Gentiana newberryi

Howellia aquatilis (research needed)

Lathyrus holochlorus

Lomatium bradshawii

Montia diffusa (research needed)

Microcala quadrangularis

Microseris bigelovi (research needed)

Ophioglossum vulgatum

Pellaea andromedaefolia

Phacelia verna

Pityopus californica

Pleuricospora fimbriolata (research needed)

Romanzoffia thompsonii

Sagittaria latifolia (research needed)

RECEIVED
JAN 2
ENVIRONMENTAL
LANE COUNTY

Scoliopus hallii (research needed)

Sidalcea campestris

Sidalcea hendersonii (research needed)

Sidalcea nelsoniana

Smelowskia ovalis

COOPERATIVE AGREEMENT

BETWEEN

OREGON STATE BOARD OF FORESTRY

and

OREGON STATE FISH AND WILDLIFE COMMISSION

This agreement made and entered into upon the dates hereinafter indicated, by and between the Oregon State Board of Forestry, hereinafter referred to as OSBF, and the Oregon State Fish and Wildlife Commission, hereinafter referred to as OF&WC.

PREAMBLE

Whereas, the policy of OSBF as required by ORS 527.630 is to encourage forest practices that maintain and enhance the multiple forest benefits and resources while recognizing various forest conditions; and,

Whereas, the policy of OF&WC as required by ORS 496.012 is to maintain all species of wildlife at optimum levels and prevent the serious depletion of any indigenous species, and

Whereas, the various counties, under the provisions of ORS 197.175, are required to provide for protection of certain resources under Goal 5 and 17 of the Statewide Planning Goals and Guidelines, and may use the Oregon Forest Practices Act to implement the Goals; and

Whereas, Goal 5 identifies the need to protect and manage critical wildlife habitat and streamside wildlife habitat; and

Whereas, Goal 17 requires protection of major marshes, critical wildlife habitat, and riparian habitat in coastal shoreland areas:

Now, therefore, it is hereby understood and agreed by and between OSBF and OF&WC to implement the following process:

1. The OF&WC will furnish to the OSBF a current list of critical wildlife habitat sites (which will include major marshes in the coastal shoreland area) situated on lands subject to the provisions of the Forest Practices Act. The list will be updated as needed considering new information including those sites inventoried in local comprehensive plans.

2. The OSBF will recognize the list furnished by OF&WC as critical wildlife habitat to be protected through administration of the Forest Practices Act.

3. The OF&WC will provide OSBF with the current policies and standards used by OF&WC to identify the quality, quantity, and location of critical habitat sites.

4. The OSBF will classify any operation near or within a listed critical wildlife habitat site as a high priority operation requiring a joint inspection between OSBF and OF&WC prior to commencement of the operation on the sites.

5. The OSBF, OF&WC, and landowner/representative will jointly inspect the site to determine if the planned use of the site is a conflict. If no conflict is identified, the operation is to be limited only be current Forest Practice Rules.

6. If the planned use of the site is identified as a conflict between the operation and the wildlife habitat, OSBF will require a plan to resolve the conflict. The plan will determine reasonable measures sufficient to resolve the conflict on the site by limiting conflicting practices. Reasonable measures may include limiting conflicting forest operations during the time of the year wildlife need the site, limiting operations to meet other wildlife needs or excluding forest operations on the site.

7. The OSBF and OF&WC will cooperate in the development of standards and procedures for streamside protection and management including riparian habitat within coastal shore land areas, to be applied in administration of the Forest Practices Act on commercial operation. The OSBF will apply these procedures during administration and enforcement of the Forest Practices Act, consistent with the Forest Practices Act and Forest Practices Rules.

8. This Cooperative Agreement shall become effective upon execution of the parties hereto and shall be operative until terminated by either party by written notice to the other party and to DLCD and those local jurisdictions relying on the agreement for compliance to Goal 5. The notice to terminate shall be submitted at least thirty (30) days prior to the termination date.

FLORA AND FAUNA WORKING PAPER

INTRODUCTION

Oregon's wildlife and fish resources are varied and abundant. Lane County alone with its large land area and highly diverse landscape from snow level to sea level provides numerous specialized habitat areas for more than 290 species of birds, 70 mammal, 13 reptile, 17 amphibian and over 50 fish species. This diversity also is apparent in the vegetation of the County from coastal salt spray meadows inland to the treeless crests of the Cascade range.

Inventories of fish and wildlife species were compiled from Oregon Department of Fish and Wildlife information, various environmental assessment or impact statements and the Eugene-Springfield Metropolitan Area Wildlife Study. These lists are presented in the appendix to this report.

Inventories of habitat types are presented on USGS maps at a scale of one inch equaling one mile (15-minute series). This shows unique, endangered or threatened sites such as eagle nests, snowy plover sites, heron rookeries, band-tailed pigeon mineral springs, osprey snags and northern spotted owl sites. Further, major and Peripheral Big Game Range and general riparian vegetation around Class I streams are shown on these maps. Noncoastal wetlands and Sensitive Fish and Waterfowl areas are depicted on other maps.

The USGS maps also show general locations of Nature Conservancy sites and sites inventoried by the Oregon Natural Area Preserves Advisory Committee (NAPAC) which are in Lane County's Inventory.

Statewide Planning Goal #5 - Open Spaces, Scenic and Historic Areas, and Natural Resources - requires consideration of numerous resources, among them fish and wildlife habitat, ecologically and scientifically significant natural areas and wetlands.

Wetlands are considered here as fish and wildlife habitat. Although they have many valuable functions, their habitat value is a primary one. The original list of ecologically and scientifically significant areas included 86 sites from the Nature Conservancy Inventory and 12 sites from the Natural Area Preserves Advisory Committee. These are further refined in this paper.

Several deficiencies in Lane County's treatment of fish and wildlife habitats and natural areas were noted by LCDC. These were:

1. Updated inventory information required for sensitive fish and waterfowl areas and noncoastal wetlands.

2. Provide more specific information on Nature Conservancy Inventory sites.

3. Adopt mandatory policies regarding the protection of natural areas and noncoastal wetlands and clarify this with existing policies that encourage drainage projects.

4. Adopt implementing measures for the protection and/or resolution of conflicts with noncoastal wetlands, natural areas and the following types of fish and wildlife habitat: big game range, riparian areas and sensitive fish and waterfowl areas.

After these orders to comply were written, LCDC adopted administrative rule 660-16-00 which gives very specific procedures for evaluating Goal 5 resources. The administrative rule applied to Lane County due to the continuance status of the County. Therefore, this paper addresses the items set out in the orders to comply and does so in the format of OAR 660-16-00. Specifically, this rule requires that when conflicts to Goal 5 resources can be anticipated in the plan, the economic, social, environmental and energy (ESEE) consequences of the conflict are analyzed and resolution to the conflict proposed. In cases where a resource is considered significant but conflicts cannot be anticipated, procedures are established to analyze conflicts as they are identified.

The contents of this paper are as follows:

A. General Findings. Concise statements summarizing facts on Lane County's flora and fauna resource and potential impacts of certain land use activities.

B. Habitat Types. A description of the 12 habitat types found in Lane County.

C. Endangered or Threatened and Special Concern Species. A listing of the threatened or endangered species found in the County and special habitat requirements for some of them.

D. Habitats of Particular Concern. Location, quality and quantity information and conflict analysis for the following types of habitat:

Riparian vegetation
Noncoastal wetlands
Sensitive fish and waterfowl
Big game range

E. Natural Areas. Location, quality and quantity of the sites on the Nature Conservancy and NAPAC lists determined to be significant, including conflict analysis.

F. Policy Recommendations.

G. Appendices. Includes lists of species.

FINDINGS

1. Lane County's fish and wildlife resource is highly varied. Diverse habitats, ranging from coastal to alpine, support nearly 400 vertebrate species. Status of individual species extends from common to endangered.

2. Four physiographic provinces - coast, coast range, western interior valleys and western Cascades - are found in Lane County. Each province represents differences in climate, substrate, topography and other physical

2843
4520

001219

and chemical variables. Each is distinct and represents a unique diversity, supporting flora and fauna which are adapted to the region.

3. Twelve distinct wildlife habitats are found in Lane County: estuary and bay (includes subtypes coastal salt marsh, tidelands and eelgrass), inland marsh, lakes and reservoirs, wet meadows, annual and perennial grasslands, riparian vegetation, coastal shore pine/spruce, Douglas fir/trailing blackberry, true fir/alpine, deciduous hardwoods, agricultural lands and cities.

4. Lane County's fish and wildlife resource provides substantial social, economic and ecological values.

5. A diversity of habitats is required to maintain Lane County's fish and wildlife fauna. Distribution of many species is limited by specialized habitat requirements.

6. Coordination between Lane County and state and federal agencies is necessary to properly harmonize wildlife needs and other resource values.

7. There will be a continuing need to review and update fish and wildlife inventory information.

8. Numerous land use activities have the potential to diminish the quality and quantity of fish and wildlife habitat. Habitat losses for a broad spectrum of fish and wildlife continue to occur. Sound resource management is necessary to minimize this loss.

9. Lack of biological information for many species handicaps the development of management procedures such as habitat guidelines.

10. Species not presently endangered or threatened may become so if their habitats are not adequately protected.

11. Examples of habitats of special value to fish and wildlife include high quality riparian and wetlands areas, estuaries, Major and Peripheral Big Game Ranges and other sensitive, fragile or unique areas.

12. Protecting water quality and quantity is vital to fish and wildlife resources.

13. A majority of certain habitat types and major watersheds lie within federal ownerships in Lane County. Therefore, public land managers have prime responsibility for protection of these habitats and watersheds. Where private lands support certain habitats, County land use planning needs to take into consideration wildlife needs, Statewide Planning Goal objectives and the rights and management objectives of the private landowner.

14. Land use activities which could negatively impact fish and wildlife habitat if uncontrolled include:

    a. Conversion of agricultural and forest lands to other uses;

b. Division of large tracts of farm and forest lands to small parcels;

c. Field burning, fencerow clearing, wetland drainage and certain other agricultural practices;

d. Careless or unplanned road construction;

e. Gravel extraction from streambeds.

f. Logging and road building activities which do not conform strictly to the Oregon Forest Practices Act.

15. Designated natural areas in Lane County provide examples of unique or outstanding habitat or species assemblages.

WILDLIFE HABITATS

The following descriptive information on Lane County habitat types is derived primarily from Oregon Department of Fish and Wildlife materials. This material is not considered an inventory and is not accompanied by maps. It is intended merely as background information.

1. Estuary and Bay (includes salt marsh, tidelands and eelgrass)

   a. Description

      That area from the mouth of a bay or river inland to the mean high tide line. Within this type will occur coastal salt marsh, tideland, eelgrass and open water. Includes all salt, brackish and freshwater area below the mean high tideline. Climate basically mild winters and cool summers. Precipitation is heavy, about 40 inches.

   b. Value to Wildlife

      A very important type to wildlife species. Estuaries and bays support thousands of waterfowl, waterbirds and shorebirds. The shallow tidal areas are critical feeding areas for many species because of the abundance of small food organisms. Eelgrass beds in certain coastal bays are the most important black brant feeding areas. Coastal salt marsh is valuable feeding and nesting area for waterfowl, snipe, yellowlegs, plover, godwits, rails, etc. Mud flats, in addition to being important for many shorebirds, waterfowl and water birds may also serve as haul-out grounds for seals. Raccoons are common foragers in this type. Band-tailed pigeons use the tide flats and salt marsh channels in specific areas for drinking and often concentrate in large numbers at these places.

   c. Location

      Siuslaw River and minor estuaries.

2. Inland Marsh

   a. Description

      This type is a shallow water area, not including coastal bay marsh, with water remaining year-around. Usually vegetated throughout or with patches of open water. Tules and cattails are common indicator plants of this type. Further discussion of this important habitat is found in the Riparian and Wetlands section of this report and under Sensitive Fish and Waterfowl Areas.

   b. Value to Wildlife

      Contains some of the most important waterfowl and waterbird nesting and wintering areas. This is critical habitat because of the limited acreage of this type in Lane County. Muskrats are common mammals found

2846
0523

001222

in this type. Redwing and yellow-headed blackbirds use this type for nesting. Amphibians and reptiles such as frogs, toads, salamanders, turtles and certain snakes are found in this type.

c. Location

Fern Ridge Reservoir and numerous smaller sites.

3. Wet Meadows

a. Description

Boggy or damp areas with many small springs or bisected by slow-moving streams. Contain sedges, monkey flower, skunk cabbage, false hellebore, aspen, cone flowers or similar species. May be found throughout the County from low foothill areas to high elevations in the Cascade Mountains. These are generally seasonal wetlands. Further discussion of wetlands is found in the Riparian and Wetlands section of this report.

b. Value to Wildlife

A very important vegetation type. Provides summer, fall and sometimes winter forage to big game. Utilized as wallows by bear and elk. Important to amphibians such as toads and frogs. This type is usually important for watering area. Can be excellent beaver habitat. Beaver ponds and slow-moving streams in this type can be excellent fish-producing area also because of the abundant food supply.

c. Location

Numerous sites Countywide from low foothills to high Cascades.

4. Lakes and Reservoirs

a. Description

All open fresh-water areas in the County. Borders sometimes vegetated with water-tolerant forbs, shurbs and trees. There are 11 major reservoirs in Lane County. Lowland and coastal lakes total 10 and 27 respectively. High lakes are abundant in the Cascade Mountains with approximately 250 located in Lane County.

b. Value to Wildlife

The value of these areas varies with type and location. Most offer resting, nesting and limited feeding areas to waterfowl. Many of the large, deep reservoirs are of low value because of continuous water level fluctuation. Some of the wildlife species present in these bodies of water are: furbearing animals--otter, beaver, muskrat, nutria; waterfowl--ducks, geese, swans, coots, rails, grebes and loons; amphibians and reptiles--frogs, toads, snakes, turtles and salamanders.

c. Location

Countywide.

5. Riparian Vegetation

a. Description

This type occurs along streams, rivers and slough banks. Vegetation is usually in a dense, narrow band. Species of plants identifying this type are those dependent on water such as willow, cottonwood, alder and aspen. Further discussion is found in the Riparian and Wetlands section and the Sensitive Fish and Waterfowl section of this report.

b. Value to Wildlife

An important wildlife habitat type. The riparian vegetation is a concentration point for a great variety of game and nongame species, providing food and cover. This vegetation renders the more open grassland and agricultural areas suitable for wildlife feeding areas by providing the necessary cover. The riparian strip also acts as a food supply for beaver and muskrat and can provide nesting cover, including snags for cavity-nesting birds. Valuable for maintaining good water quality for aquatic organisms.

c. Location

Countywide.

6. Annual and Perennial Grasslands

a. Description

This type contains the annual and perennial grassland areas of the County. Species of forbs and grasses differ with the geophysical area.

In Western Oregon the type may typically be found in small acreages but may be in large tracts of several hundred acres which are commonly called prairies. Many species of native and domestic grasses may be found in this type. In the Cascades and Coast Range this type occurs on shallow soils. Bracken fern may be a common plant on these sites also.

b. Value to Wildlife

A very important type for elk, deer, grouse, turkey, mountain quail, moles, gophers, ground squirrels, hawks and owls and many smaller species of wildlife. This type is heavily used on winter range and summer range by deer and elk. Grouse and quail use the prairies for feeding on insects which are a vital part of the young birds' diet in the summer.

2848
0525

001224

c. Location

Countywide.

7. Coastal Shore Pine/Spruce

a. Description

A narrow belt along the coast from the beach inland to the coastal foothills. Shore Pine and spruce are the main trees with salmonberry, red elderberry, salal, alder and thimbleberry being other species present. The coastal sand dunes and beach grass areas are also included in this type.

b. Value to Wildlife

Mature, dense stands of spruce and shore pine are of limited food value to big game species, but are necessary for the protection, shelter, travel lanes, etc., that they provide. Areas that have been burned, logged or otherwise disturbed produce good black-tailed deer, Roosevelt elk, black bear, blue and ruffed grouse and band-tailed pigeon habitat. Numerous species of small birds, shore birds and mammals are associated with this habitat type.

The coastal sand dunes near Florence provide an important area for whistling swans during the winter months.

c. Location

Narrow coastal strip.

8. Douglas Fir/Trailing Blackberry

a. Description

Trees are Douglas fir, western hemlock, red and Port Orford cedar, big-leafed and vine maple, red alder, trailing blackberry, salmonberry, salal and other similar species. Douglas fir and hemlock are the most abundant. Brush species are present in wildfire burn, logged and other disturbed sites. This is the largest habitat type in Lane County.

b. Value to Wildlife

Mature dense stands of Douglas fir are of limited food value to most species of big game; however, they are necessary for the shelter, protection, etc., that they afford. Many species of birds and mammals, however, spend their entire life dependent upon these mature stands of vegetation (ex. northern spotted owl, pileated woodpecker, flying squirrels). With logging and fires these timbered areas are opened to produce abundant foods in the form of berries, forbs, browse and grasses.

Big game species associated with this habitat type are the black-tailed deer, Roosevelt elk, black bear and mountain lion. Upland game species

include the blue and ruffed grouse, mountain quail and the band-tailed pigeon.

Numerous species of small birds and mammals are associated with this habitat type, including several important furbearers.

c. Location

Valley foothills, coast range and Cascade range.

9. True Fir/Alpine

a. Description

This type occurs primarily in the Cascades above the Douglas fir-trailing blackberry area. Noble fir, Engelmann spruce, white fir, grand fir, mountain hemlock and mountain alder are the most common species. High elevation areas are densely covered with huckleberry, a preferred browse plant for many species of animals.

This habitat type contains numerous small lakes and meadow areas that are extremely important to wildlife.

b. Value to Wildlife

This habitat type is important summer range for black-tailed deer and Roosevelt elk. Some mule deer also spend the summer months in this area. This area contains the pine martin, fisher, wolverine, coyote and pikas. The black bear is also found in this habitat type.

Game bird species present are the blue grouse and occasionally band-tailed pigeon.

Many small birds and mammals are associated with this type.

This type contains numerous meadow and prairie areas that are very important to wildlife species and every effort must be made to preserve them. These meadows are important for resting, feeding, calving areas for elk and during most winters a place for animal survival. Many wet meadows remain open during deep snows and thus provide an important wintering area for animals.

c. Location

High elevations of Cascades - primarily in federal ownership.

10. Deciduous Hardwoods

a. Description

This forest type consists of white oak and black oak, with undergrowth of poison oak, ceanothus sp. and grasses. May also contain scattered or small clumps of Douglas fir or pines. Found primarily in the Willamette Valley and along the foothills.

2850
0527

001226

b. Value to Wildlife

This area is the year-around habitat of the black-tailed deer, black bear, bobcat, coyote and silver gray squirrel. Upland game species include the ruffed grouse, valley and mountain quail and in many areas the ring-necked pheasant. The mourning dove and band-tailed pigeon also use this habitat. Other species include many types of song birds, small mammals, hawks and owls.

This habitat type value varies with its location, but most of it offers resting, feeding and nesting for many species of wildlife.

Its location along the valley foothills provide cover for species that utilize the agricultural areas for food. Some of the best black-tailed deer habitat in Lane County is found in this habitat type.

c. Location

Numerous sites primarily on valley foothills.

11. Agricultural Lands

a. Description

Includes the irrigated and nonirrigated agricultural forage and croplands and dry land seeded pastures.

b. Value to Wildlife

This land type provides important upland game and waterfowl habitat. The black-tailed deer is also found using these areas, but mainly for food, as long as adjacent land types are available for cover.

Many furbearing species such as the beaver, muskrat, mink, etc., are found in the waterways associated with this land type.

Several hundred species of song birds, small and large mammals, hawks and owls are dependent upon this habitat type. The availability of food provided by this habitat type also attracts many species of wildlife from the adjacent habitats.

c. Location

Willamette Valley and assorted small valley floors.

12. Cities

Not applicable to rural Lane County.

ENDANGERED, THREATENED AND SPECIAL CONCERN SPECIES

Both plant and animal species which have been identified by the state or federal government as endangered or threatened are present in Lane County. Some species not presently threatened or endangered may become so if their habitat is further altered by man's influence and present practices.

It is important to note that many of these species are found on public lands. Those management agencies have prime responsibility for conservation and protection of the species on their lands.

No deficiencies were noted by LCDC during compliance review for threatened and endangered species. Two policies regarding threatened, endangered, and special interest species are presently part of the Lane County Plan. These policies are:

- Recognize and support existing federal and state programs protecting threatened or endangered fish and wildlife species.

- Provide special consideration to protection of sensitive species (those susceptible to significant population declines resulting from habitat modification).

The following definitions apply:

Endangered Species - Those likely to become extinct if present trends continue.

Threatened Species - Those whose population trends indicate that endangerment is forthcoming if present trends continue.

Special Interest Species - Those rare and uncommon species because of numbers or trends. Designations tend to be rather subjective and are therefore generally unofficial.

Endangered Animals and Plants

Columbian white-tailed deer
California brown pelican
American peregrine falcon
Gray wolf
Oregon chub
Bradshaw's desert parsley
Meadow sidalcea
Wayside aster (suggested as endangered)
Pacific fleabane (suggested as endangered)
Howellia (suggested as endangered)

Threatened Animals and Plants

Sea otter
Wolverine
Western spotted frog
Northern spotted owl
Western snowy plover
Silver spotted butterfly
Northern bald eagle
Wapato, broadleaf arrowhead
Darlingtonia, California pitcher plant

2852
0529

001228

Special Interest or Protected Animal and Plant Species

Mary's Peak salamander
Sharp-tailed snake
Western rattlesnake
American osprey
Northern purple martin
Red tree vole
Cony (pika)
Short horned lizard
Oregon slender salamander
Tailed frog
Marine mammals

Allium amplectons
Aster hallii (curtus)
Cypripedium californicum
Draba aureola
Erigeron cascadensis
Eriogonum umbellatum
Gentiana newberryi
Ledum groenlandicum
Montia diffusa
Pellaea andromedaefolia
Phacelia verna
Phlox peckil (Phlox diffusa)
Pleuricospora fimbriolata
Scoliopus hallii
Sidalcea nelseniana
Silene douglasii var. monantha
Sinclowskia calycina
Sullivantia oregona
Vaccinium oxycoccus var. intermedium
Viola adunca var. bellidifolia

Specific Species Requirements

1. Northern spotted owl. Recent recommendations to an Interagency Spotted Owl Task Force from research in Oregon suggests maintaining 1,000 acres of old growth timber within 1-1/2 miles of the nesting tree of a pair of spotted owls. An Oregon Interagency Spotted Owl Management Plan has been drafted. This plan recommends a minimum nesting pair quota in Oregon of 400 pairs. Of these 400, 290 pairs should be located on US Forest Service land, 90 pairs on BLM land and the remaining 20 pairs on "other lands." Other lands include, but are not limited to state, county, national park, and private lands. Protection is not required on private lands by any state or federal laws.

   The major economic loss to a private landowner which would result from maintaining 1,000 acres of old growth timber for the purpose of one pair of spotted owls does not seem justified when 98 percent of the quota of owls is proposed for federal lands. A restriction on harvesting 1,000 acres of old growth from private property would be excessive and would very possibly constitute a "taking" under the law.

   No known spotted owl nests occur on private property in Lane County at this time. Because of the unreasonable burden protection of this species would place on a private landowner, no special provisions are recommended for any nests which may be found or constructed on private property.

   Maintaining a viable population of this species is recognized as an important goal by the County. As part of their multiple purpose mandate, the Forest Service and the Bureau of Land Management are encouraged in their efforts to protect this species on public lands in Oregon.

2. Northern Bald Eagle. This nationally threatened species requires buffer areas around nest sites with restricted activities during nesting seasons. Federal land management policies provide protection for this bird on federal lands. No nests on private land are presently known in Lane County. If nest sites are identified on private land, an ESEE analysis should be done on conflicts which would either destroy the nest site or inhibit fledgling viability. The County should then work with the Oregon Department of Forestry to make them aware of the location of these areas and implementation methods adopted by the County for conflict resolution.

3. Wolverine. This threatened species requires remote, high elevation areas of the Cascades free of logging and intensive human activities. These areas are in federal ownership and therefore not under County jurisdiction.

4. Silverspot butterfly. This species is on the National list of Threatened and Endangered species. It requires undisturbed salt spray meadows and adjacent upland brush and treeline areas. It is only found along a small section of the Oregon coast. The Coastal Resources Management Plan of Lane County recognizes this species and applies a Prime Wildlife Management Unit to its habitat.

5. Western snowy plover. This species, threatened in Oregon, requires undisturbed areas of dry sand along the beach between the highest tide line and the vegetation line. The Oregon Department of Transportation, State Parks Division, regulates activities including vehicular use of this area. The Oregon Department of Fish and Wildlife is currently preparing a state management plan for the snowy plover. This plan will probably include recommendations for areas closed to vehicles either year round or seasonally to protect the habitat of this bird and other important shorebirds.

   Since the habitat is within state jurisdiction, Lane County proposes no direct action, but does support state activities to protect this species.

6. American osprey. This bird is a special interest species because its very specific nesting requirements in timber areas make it susceptible to population losses from habitat modification. The bird is neither threatened nor endangered and is found throughout the County, although not in great numbers. Some protection is already provided around coastal lakes and in the Willamette River Greenway. No special zoning provisions will be adopted by the County for osprey nesting sites. Nest sites are shown on the Wildlife Inventory maps. If these sites are confirmed by ODFW, their maintenance will be a consideration in land divisions and special use permits.

RIPARIAN AND WETLAND AREAS

LCDC Orders to Comply mandate updated inventory information on the location, quality and quantity of noncoastal wetlands and implementation measures for the protection and/or resolution of conflicts with these wetlands and with riparian habitat areas. The discussion in this section does not distinguish between coastal and noncoastal wetlands. Although many coastal wetlands are protected by Goal 17, many are not and should be considered along with wetlands on a Countwide basis.

Several areas within the County presently have regulations dealing with riparian vegetation. These are the Willamette River Greenway, the Siuslaw River Estuary, and coastal lakes. Also, lands zoned for timber production are regulated by the Oregon Forest Practices Act which considers buffer strips around streams. The County is not attempting to preempt state authority in forestry zoned areas. The discussion on conflicts and conflict resolution, therefore, does not apply to those areas.

It is difficult to separate discussions of wetlands and riparian (streamside) vegetation. Conditions which give rise to both are very similar and habitat values are similar. Riparian vegetation is that vegetation alongside streams and lakes which is structurally and physiologically adapted to living in saturated conditions.

Defining a wetland is more difficult and must be considered as a continuum of conditions not in direct relation to a lake or stream. There are many different definitions of wetlands - open water may or may not be present, the area may be seasonally or permanently wet, different vegetation types may occur. For purposes of this paper, a wetland is an area in which open, standing water is present for at least six months out of the year and is a minimum size of one acre. Vegetation types can range from grasslands to areas with mature, water-loving trees (Oregon white ash, cottonwood, alder and willow). The wetland must be large enough to be important for wildlife feeding and watering. The one-acre minimum size is intended to exclude small, backyard wet areas, and to give an indication of the type of areas intended to be covered by this definition of wetland. In a case of dispute over whether an area is important for wildlife and should be considered a wetland, the ODFW's recommendations will be relied upon.

For areas of the County covered by the National Wetland Inventory, that Inventory shall be considered the maximum number of sites which may possibly be considered wetlands. If sites occur there, though, which are streams or do not have open water present, they will not be considered a wetland by this definition.

These wetlands correspond to the Inland Marshes discussed in the Habitat Types section of this paper, rather than the Wet Meadows.

Riparian and wetland ecosystems are characterized by the combination of high species diversity, high species densities and high productivity. Continuous interactions occur between riparian and wetland ecosystems and adjacent uplands by transfer of energy, food and species.

Riparian habitats have been recognized as one of the most important and valuable land types in Oregon for several reasons: (1) they play an essential role in determining the quality of fish habitat; (2) they provide a vegetative buffer for streambank stability; (3) they offer seasonal and year-long habitat to the greatest numbers and diversity of terrestrial wildlife populations than any other habitat type; (4) they accommodate and attract important recreational activities such as hunting, fishing, boating, camping and hiking; (5) their aesthetic value is high because of the pleasing combination of land and water, attractive and unique vegetation types, and abundant animal life; (6) their ability to control pollution by filtration; and (7) their ability to assist in flood control by water containment.

Fishery habitat is directly related to the conditions in the surrounding watershed, especially the adjacent riparian zone. Riparian vegetation provides a number of important features to aquatic habitat: (1) streambank stabilization and erosion control which reduces sedimentation and helps maintain an oxygen supply to eggs and juvenile fish; (2) a natural filter to settle out sediments and reduce downstream siltation; (3) shade to maintain suitable water temperatures for aquatic life; (4) organic debris to feed aquatic insects which are essential to the diets of many fish; (5) bank stability to minimize stream damage from torrential floods; (6) overhanging bank cover from the roots of trees, shrubs, and other vegetation to provide fish with protective cover and terrestrial insects; and (7) groundwater recharge by its ability to absorb water. When a riparian zone is adversely affected by human activities, the quality and quantity of fish production will be affected.

Riparian vegetation likewise plays a vital role for wildlife. The habitat is a gradation between aquatic habitat of the stream and surrounding terrestrial habitat. The riparian zone usually provides all four basic habitat components: water, food, cover and space. The habitat is generally more diverse than upland plant communities, and therefore supports greater wildlife diversity and higher numbers of individuals. Certain fish and wildlife species are totally dependent on the riparian ecosystem, other species use the area as a travel corridor, or for feeding, roosting, nesting or watering. The significance of riparian habitat to game and nongame wildlife, both within and in the vicinity of the area, surpasses that of any other habitat type (American Fisheries Society, 1980).

Very similar statements can be made for wetland ecosystem species diversity and habitat importance as for riparian areas. Their variety of habitats, and often their inaccessibility, make them very important for many species. Wetlands which occur in agricultural or developed areas take on an even greater degree of significance as they are often a refuge for animals which have been displaced and can provide some of the only available living space for many forms of wildlife.

Administrative Rule 66-16-000 requires examination of the location, quality and quantity of Goal 5 resources, including wetlands and fish and wildlife habitat. Riparian vegetation, being an important habitat type, was distinguished in the Orders to Comply as needing better implementing procedures for protection or resolution of conflicts.

After examination of location, quality and quantity, a decision must be made whether the resource sites are significant. If so, conflicting uses must be

identified. An analysis of ESEE consequences must be done, then a program developed for resolution of conflicts. The resolution can take three courses: a) preserve the resource site; b) allow the conflicting use fully; or c) specifically limit conflicting use.

Location

Although the total amount of riparian and wetland vegetation is much reduced from the amount prior to human habitation of Lane County, these habitat types still exist all around us. Unless the water regime which supports the area changes, areas which have been cleared will revert to riparian or wetland vegetation without constant upkeep.

All lakes, reservoirs and Class I streams in Lane County have been mapped. These maps are not included here for budgetary purposes, but are available in the Planning Department offices. Class I is a designation used by the Oregon Forestry Department and the Oregon Department of Fish and Wildlife to indicate streams important for fish life. Class I streams are those valuable for domestic use, important for angling or other recreation, and/or used by significant numbers of fish for spawning, rearing or migration routes. Stream flows may be either perennial or intermittent during parts of the year. Unless in a disturbed state, riparian vegetation will exist around all of these. Certain areas of stream and lake banks have been designated as "sensitive fish and waterfowl habitat," and will be discussed and analyzed later in this report. This section, then, deals only with riparian areas outside of the "sensitive" areas.

In the northwest quarter of the County, wetlands have been mapped by the US Fish and Wildlife Service. The maps, called the National Wetland Inventory, are very detailed and use an intricate classification system to show types of wetland vegetation. Most of the mapping is done at a scale of 1" = one mile, with the area close to Eugene at a scale of 1" = 2000'. Neither of these scales work well for most site specific uses. They give general ideas about where within a section wetland vegetation occurs, but field examination would be necessary to determine exactly where the wetland occurs.

This mapping should eventually be completed for all of the County, but lack of federal funding may extend that effort. Mapping for the southwest quarter of the County should be released in draft form by summer, 1982. As mentioned earlier, where this Inventory exists, it will be considered the maximum number of sites which will be considered wetlands. Where this mapping is not yet completed, only the earlier definition of a wetland will be used to identify sites.

Quality

For the most part, quality of riparian and wetland areas is discussed as it relates to quality for fish and wildlife habitat, as this is considered one of their prime functions. The "sensitive fish and waterfowl" areas designated by the ODFW are a subunit of riparian and wetland areas. These areas, discussed in the next section, are the most important and highest quality riparian and wetland areas.

The many other riparian and wetland areas in the County range from undisturbed, very diverse areas to fringe marshes and riparian zones in urban areas. Often the small marshes and riparian zones in agricultural and urban areas take on a greater degree of importance due to their scarcity. They may provide a refuge for species whose habitat has been destroyed elsewhere.

Quality can be degraded in different ways. Certainly, removal of vegetation most immediately destroys most habitat value of an area. This can be done either directly by tearing out plants or by draining away water so that wetland or riparian vegetation can no longer survive. Human presence can drive off some forms of wildlife, but if not in large numbers will not generally degrade habitat values too much. Intense activities, such as recreation sites, will have a greater effect on habitat values and should be closely examined in view of this prior to approval.

Another activity which can greatly damage riparian and wetland areas, but which is only a minor problem in Lane County, is livestock grazing. The continual disturbance of streambanks can retard vegetation and can cause severe erosion.

Quantity

No good inventory exists on the quantity of riparian habitat in Lane County. Mapping of riparian habitat around Class I streams gives only a general indication of its location, but no figures on depth of the zone from the waterbody or cleared areas. The Willamette River Greenway and coastal lakes and rivers have the best mapping of riparian vegetation, often by aerial photography on large-scale maps, but these areas already have mechanisms to protect riparian vegetation.

The National Wetland Inventory maps will shortly cover about one-half of the County. General location of wetlands is given but no quantification of acreage by wetland type (and no indication of wetland quality). This mapping system, prepared by US Fish and Wildlife Service, will eventually cover the entire County.

Conflicting Uses

Two major activities conflict with preservation of riparian and wetland habitat areas:

1. Destruction of vegetation for any purpose; forestry, agriculture, construction, recreation, aggregate extraction, etc.; and

2. Draining surface or subsurface water which then changes the vegetative structure and generally the habitat value.

The end result of both of these activities is reduction in habitat value, flood control, water pollution control, and stability along streambanks for riparian vegetation.

An ESEE analysis for loss of riparian and wetland areas from either direct destruction or drainage follows.

ESEE Analysis

Economic Consequences

1. Since wetland and riparian vegetation decrease water velocity and damage from floods, removal of this vegetation could increase economic damage from flooding.

2. Merchantable timber removed from riparian and wetland areas is a source of employment, income and revenue in Lane County, although most species growing there have low economic value compared to some other species of timber.

3. Lands cleared for agricultural use could increase economic activity from that source.

4. Lands disturbed for aggregate extraction could increase economic activity from that source.

5. Removal of riparian and wetland vegetation could result in a loss of revenue from hunting which could result from a decrease in game species of fish and wildlife.

Social Consequences

1. Decline in wildlife diversity can be an important factor for many persons who enjoy living in proximity to watchable wildlife.

2. Regulations aimed at maintaining riparian and wetland vegetation, not just requiring building setbacks from those areas, would result in a much greater degree of governmental restrictions on most lands than presently exist. The sort of enforcement effort it would require to regulate vegetation removal in riparian and wetland areas Countywide would be truly massive. The payoff from this sort of effort must be particularly questioned since a majority of the County is timberland which is regulated by the State Forest Practices Act, not County regulations for riparian and wetland areas.

3. The question of aesthetics varies greatly with the viewer. Some persons prefer the look of natural vegetation along a water body, others find an artificial park-like setting preferable. A law requiring maintenance of riparian vegetation would force one perspective on a landowner.

4. The greater erosion potential when riparian and wetland vegetation is removed could result in more turbid water. This could have an effect on downstream recreational uses.

Environmental Consequences

1. Removal of riparian and wetland vegetation would result in decreased wildlife habitat, with a decrease in wildlife diversity.

2. Bank stability would be decreased with removal of vegetation. This causes more erosion, dirtier water and negative effects on aquatic life.

3. Water holding capacity is decreased with removal of vegetation in wetlands and riparian areas.

4. Water purification through filtration is a function of riparian and wetland vegetation which would be missing if the vegetation were removed.

5. The values of floodwater retention and decrease in floodwater velocity would be missing with removal of riparian and wetland vegetation.

Energy Consequences

1. If riparian vegetation is removed, bank erosion can increase. This causes more turbid water which may be more expensive and require more energy to treat downstream.

Conflict Resolution

After examination of the conflicts to riparian and wetland vegetation, and the ESEE consequences of those conflicts, the decision must be made as to preserving the resource totally, allowing the conflicting use totally, or specifically limiting the conflicting use. The third option, specifically limiting the conflicting use, seems the only prudent course of action. To disregard the value of riparian and wetland vegetation and not even consider it in permit applications does not make sense, when the valuable functions of the areas are taken into account. On the opposite end of the spectrum, to have a program which requires the County to be involved in any activity, no matter how minor, in riparian and wetland areas, also does not make sense. A program which recognizes the value of wetlands and riparian areas by way of strong policy statements, requires reasonable setbacks from Class I streams and wetlands so construction will not occur in the wetland or riparian zone, requires a balancing of wetland and agricultural values before drainage projects are undertaken, and which carefully considers input from the Oregon Department of Fish and Wildlife prior to approval of Special Use Permits and land divisions will ensure that these important areas receive the evaluation and attention they deserve.

SENSITIVE FISH AND WATERFOWL AREAS

LCDC Orders to Comply required implementation measures for the protection and/or resolution of conflicts for fish and wildlife habitats in general, and sensitive fish and waterfowl habitats in particular. Lane County's previous plan discussed riparian areas around all Class I streams. The Oregon Department of Fish and Wildlife (ODFW) objected to this being too broad brush. Correspondingly, LCDC required that the category of sensitive fish and waterfowl areas be called out.

This category is a subset of the riparian and wetland areas discussed above. Maps have been provided by ODFW showing important waterfowl nesting habitat and streams which receive high use by anglers and/or game fish. Streams which are consistently used by large numbers of anglers are considered to contain large numbers of game fish, even though creel censuses have not been done in each of the areas. These identified areas are considered the highest quality fish and waterfowl habitat in Lane County.

Location

Certain of the areas identified by ODFW already receive a high degree of protection for the surrounding riparian vegetation. These are the Willamette River within the Greenway and coastal lakes and marshes covered by management units under the Coastal Resources Management Plan.

Other of the areas fall under the jurisdiction of the Oregon Forest Practices Act. In areas zoned for the primary purpose of timber production, state rules take precedence over County regulations. Buffer strips and critical wildlife and aquatic habitat are considered by the Oregon Department of Forestry prior to approving harvest plans.

Still other of the areas identified by ODFW are within federal lands where the County has no jurisdiction.

Instead of providing a map in this text (at a scale which is difficult to interpret) a list of the areas involved will be provided. The map is available in the Planning Division office for review.

Portions of the following streams are sensitive fish habitats:

Tenmile Creek	McKenzie River
Big Creek	Gate Creek
Cape Creek	Blue River
Sutton Creek	South Fork McKenzie River
North Fork Siuslaw	Horse Creek
Siltcoos River	Lost Creek
Woahink Creek	Middle Fork Willamette
Maple Creek	Fall Creek
Fiddle Creek	Little Fall Creek
Sweet Creek	Winberry Creek
Siuslaw River above Mapleton	North Fork, Middle Fork Willamette
Lake Creek	Salmon Creek

2861
0538

001237

Indian Creek
Deadwood Creek
Whittaker Creek
Esmond Creek
Wildcat Creek
Wolf Creek
Long Tom River
Willamette River Main Stem
Mohawk River
Salt Creek
Hills Creek
Steamboat Creek
Coast Fork Willamette
Row River
Mosby Creek
Sharps Creek
Brice Creek
Layng Creek

All or portions of the following areas are considered sensitive waterfowl habitat:

Fern Ridge periphery exclusive of parks
Old Long-Tom channel below Fern Ridge
Main Long-Tom channel below Fern Ridge
Amazon Canal where not riprapped
North Fork Siuslaw Freshwater marsh
Maple Creek marsh
Siltcoos Lake/Westlake marsh

Quality

Since these are the areas identified as important, sensitive fish and waterfowl areas, they can all be considered high quality for that purpose.

Quantity

Most of the major rivers and creeks in the County are designated Sensitive Fish and Waterfowl areas, but not the many miles of smaller, less significant Class I streams.

Conflicts

Maintenance of natural vegetation in waterfowl nesting areas is of prime importance to those species. Maintaining riparian vegetation around sensitive fish areas is essential to water quality and aquatic life. Removal of riparian vegetation in these areas is considered a conflict, whatever the purpose.

ESEE Consequences

ESEE consequences for Sensitive Fish and Waterfowl areas is generally the same as for Riparian and Wetlands, with a few additions. Since the areas in this category are considered more valuable for fish and waterfowl habitat than others in the County, the effects of vegetation removal can be more significant.

Economic consequences

Same as for Riparian and Wetland areas.

Social consequences

Same as for Riparian and Wetland areas plus the following:

1. Sensitive Fish and Waterfowl areas are important for recreational purposes, both private and public. They also influence nearby recreational values. For instance, severe erosion from one property can influence fishery values downstream.

Environmental consequences

Same as Riparian and Wetland areas plus the following:

1. Sensitive Waterfowl areas serve as important resting and feeding areas for migratory birds. Destruction of this habitat causes effects which reach far beyond Lane County.

Energy consequences

Same as Riparian and Wetland areas.

Conflict Resolution

To repeat the procedure, after examination of ESEE consequences of potential conflicts, a decision must be made to preserve the resource fully, allow the conflicting use fully, or to specifically limit the conflicting use. In this case, preserving the resource fully would be to completely protect riparian vegetation in the identified waterfowl nesting areas and adjacent to the identified streams. Allowing the conflicting use fully would mean that no implementation requirements would exist protecting that riparian vegetation. The third option is a compromise between the two.

The third option, limiting the conflicting use, is the most appropriate, with the limitation weighed in favor of maintenance of the vegetation. Since these areas are the most important fish and waterfowl areas in the County, the riparian vegetation should be maintained whenever possible. As with Riparian and Wetland areas, a 50-foot building setback from the high water mark of the waterway shall be required. But within these Sensitive areas a 30-foot strip of indigenous vegetation shall be left along the waterway. Exceptions to this requirement shall be very limited and will include areas necessary for water-dependent uses, and areas which are now unvegetated and developed.

Regulations for riparian vegetation maintenance will be similar to those currently existing in the coastal shoreland overlay zones. One example, from the Residential Development Combining District (LC 10.255-30(3)):

"Within the setback area . . . all indigenous vegetation except that removed to provide paths to the water body shall be retained within an area 30 feet in width measured at right angles from the mean high water line of the water body. For the remainder of the required setback area brush may be removed but trees shall be retained."

Policy statements pertaining to Riparian and Wetland areas are also applicable here.

BIG GAME RANGE

LCDC Orders to Comply required implementing measures for the protection and/or resolution of conflicts with Big Game Range. The County must clarify the types of uses which conflict with big game habitat, and would therefore be reviewable by the County under any implementing measures developed. The primary conflicting use mentioned by LCDC is residential use at certain densities.

Location. The Oregon Department of Fish and Wildlife (ODFW) has divided big game range in Lane County into three categories as follows:

Major Big Game Range - That portion of the County which supports the majority of big game. In general these lands are sparsely developed commercial forest lands. They also provide the majority of big game recreational opportunity.

Peripheral Big Game Range - Foothill areas of the County generally located between commercial forest lands and valley floors. These lands support substantial big game populations and serve as a wintering area for animals in severe winters.

Impacted Big Game Range - Those areas of the County that have existing levels of land use which preclude future wildlife management options of maintaining viable wildlife populations and recreational opportunity. These areas frequently contain populations of big game animals.

These areas are mapped on Lane County Wildlife Inventory maps. As a general depiction, Major Big Game Range occurs on federal lands, large timber company holdings, and some private lands which are sparsely developed. Peripheral Big Game Range encompasses primarily foothills and smaller valleys. Impacted Range includes cultivated fields and developed areas, often on valley floors.

Because of the large amount of undeveloped timberland in Lane County, the majority of the County is Major Big Game Range. But, due to scattered ownership patterns, many areas within the Major Range are small, private parcels. Peripheral Range often falls along small valley floors which are privately owned and often fairly extensively developed. For example, most of the Fall Creek, Mohawk and Lorane valleys are within Peripheral Range, as well as large tracts of land west of Elmira.

Wildlife Inventory maps have not been included in this Working Paper due to budget constraints, but are available for review in the Planning Department office.

Quality. The majority of big game use occurs on Major Range. This can be considered the highest quality habitat as man's intrusion with developments is the least. Peripheral Range is also important habitat, and can be particularly crucial in severe winters, but has enough development to limit big game use and management options. Impacted Range is the lowest quality habitat of the three categories. It is already developed to an extent that precludes viable management of the species, although populations may still exist there.

One other category of lands should be mentioned here. Outside Urban Growth Boundaries, areas exist which are committed to nonresource use. Exceptions for these areas will be taken as "Built Upon and Committed Lands" and acknowledged by LCDC. These small pockets of development within Major or Peripheral Range are essentially Impacted areas due to their level of use by man. They were not large enough, generally to include on the Big Game maps as Impacted. These areas will be treated as Impacted areas for implementation purposes.

Quantity. Areas of of Major, Peripheral and Impacted Big Game Range have not been computed. Figures for acreage of some other categories of land may be useful, though, for illustrative purposes.

Total amount of land in Lane County	2,959,400 acres
Commercial forest land (primarily Major Range)	1,813,228 acres
Other public lands (primarily Major Range, some Peripheral Range)	735,112 acres
Farms (primarily Impacted Range)	255,712 acres

Over 61 percent of the County is considered commercial forest land, a category with essentially no residential development. Including other public lands, such as the Dunes National Recreation Area, Oregon State lands, Corps of Engineers lands and County parks, approximately 85 percent of the County is not available for residential use. A good portion of the remaining acreage is farmland, a category very difficult to justify as available for residential use, but also not prime big game habitat.

Conflict Identification

The clearing of natural vegetation for agricultural purposes decreases an area's habitat value for big game. But since important, existing agricultural lands are already considered Impacted Big Game Range, this is not an issue now. Impacted Range has essentially been "written off" for big game management.

Management of land for timber production does not conflict with big game habitat. With proper forest management techniques, big game habitat can be significantly enhanced. The forage provided to deer and elk in clear-cut areas is very important, but the combination of areas in various successional stages is probably the vital factor in enhancing numbers of deer and elk. Lands zoned for the primary purpose of timber production are subject to the requirements of the Oregon Forest Practices Act. For our purposes, timber harvesting activities do not constitute a conflict to Big Game Range.

The primary conflict to big game, as mentioned earlier is residential use at certain densities. ODFW has recommended overall residential densities for Peripheral Big Game Range at one dwelling unit per 40 areas; for Major Big Game Range at one dwelling unit per 80 acres. Therefore, to restate the conflict: overall residential density greater than one dwelling unit/40 acres in Peripheral Range and one dwelling unit/80 acres in Major Range conflicts with habitat for big game.

The following paragraphs basically outline procedures to be used for implementation of the ODFW density recommendations in big game ranges. The premise is to work overall density figures into minimum lot size recommendations for regions of the County, rather than postponing the issue by referrals to ODFW for every land division application. The anticipated result is to base zoning

by region on the overall residential densities or ODFW minimum parcel size recommendations, thereby creating no conflict with Goal 5.

The County will be divided into regions convenient for planning purposes. These have not yet been determined, but will probably result in 10-20 regions in the County.

Within these regions, determinations will be made of acreages, number of existing residences, and additional number of residences allowable to still fall within the overall density level. Built upon and committed areas are subtracted out, as they are treated as Impacted Range. From the figure of remaining residences and acreage, a residential carrying capacity will be determined. This figure, or the ODFW figure of 40 or 80 acres, whichever is lesser, will be recommended in the region for residential density for big game purposes. This, along with other resource land requirements will be used to determine appropriate zoning in an area.

If this figure is ever exceeded, it constitutes a conflict with Big Game Range. ESEE consequences must be determined and analyzed at that time. Prior to dividing the County into regions and making the above determinations, it is impossible to determine if conflicts will exist in any regions. The expectation, based on examining trial areas, is that the recommendations of ODFW can be incorporated without creating a conflict.

Special uses which may be allowed in resource zones have the potential of conflicting with Big Game Range. To preclude that conflict, criteria will be incorporated into the Special Use review considering the effect on big game. Recommendations will be requested from ODFW and considered as part of the review process.

As a final note regarding residences in Big Game Range, damage to landscaping and gardens is a common problem around these residences. For new residential building permits within Major and Peripheral Range, the applicant will be notified that compatibility problems with big game may exist.

Several recommendations in the Policies Section of this Working Paper relate to the method the County will use to protect Big Game Range.

NATURAL AREAS

Lane County's original work on natural areas included just a listing of sites from the Oregon Natural Heritage Program (ONHP) and the Governor's Natural Area Preserves Advisory Committee (NAPAC). A very brief narrative was included with the NAPAC sites, but only site names for the 86 ONHP sites. LCDC's review mentions 12 NAPAC sites; in fact, there are only nine sites in this category.

In its review of Lane County's plan, LCDC noted that adequate quality, quantity and locational data existed for the NAPAC sites. The 86 sites from the Nature Conservancy Inventory, though, required more specific information on location, quality and quantity.

The Goal 5 Administrative Rule (66-16-000), adopted after LCDC's review of Lane County's plan, contains procedures for more detailed review of Goal 5 resources. Accordingly, both the ONHP and NAPAC sites are re-examined and divided into three categories as laid out in the rule:

1A: Available information on location, quality and quantity indicates resource site not important; not included on plan inventory.

1B: Some information available but inadequate to identify resource site; included on plan inventory with special status; plan statement to address resource site when information available.

1C: Information on location, quality and quantity indicate site is significant; conflicting uses, if any, identified; ESEE analysis of conflicting uses; conflict resolution proposed.

Criteria for Evaluation

For those sites with adequate information on location, quality and quantity, it was necessary to determine if the site was "significant." If so, it fell in an 1C category; if not, in a 1A category. This decision required criteria upon which to base that judgment. Six questions were answered for each site or group of similar sites. These were:

1. Uniqueness?
2. Number of examples limited?
3. Site unusual due to size?
4. Rare or endangered species present?
5. Site already protected by County zones?
6. Examples already protected on public lands?

In some cases final decisions were necessarily subjective and were judgment calls. In other cases, the decision was based on other plan policies. For instance, one of the sites determined not to be significant was the Noti Osprey nest. The portion of this Working Paper on Endangered, Threatened and Special Interest Species stated that no special zoning measures will be taken in Lane County for Osprey nests.

Sites placed in the 1B category had inadequate information on location, quality and quantity to allow use of these criteria. When information is available, the

same method will be used to place them in either a 1A or 1C classification. Moving a site out of the 1B category will be considered a plan amendment.

1B Category

Six sites have been placed in this category. These are:

1. Booth Island/Siltcoos Lake
2. McKenzie River Island
3. South Fork Gate Creek
4. Swamp Creek
5. Marshall Island Heronry
6. Willamette Valley Quaking Aspen Grove

These sites are individually discussed below. No specific timetable is set for dealing with the first four sites. When information is presented to this department which will allow a determination of significance of the site, it will be analyzed and placed in either a 1A or 1C category, based on the criteria mentioned above. Site #5, Marshall Island Heronry, will be field inspected by ODFW later this year. Based on the results of their investigation, the site will be placed in a 1A or 1C category later this year. Site #6 will also be placed in a 1A or 1C category within 1982. Field inspection of the site by knowledgeable botanists is essential here.

a. Booth Island--Siltcoos Lake (ONHP #82). ODFW is unaware of a band-tailed pigeon mineral spring on this island.

b. McKenzie River Island (ONHP #52). ONHP Inventory states "Good riparian habitat and river island." No further data is available.

c. South Fork Gate Creek (NAPAC #12). No way to locate this site any more specifically. Defined only as "old Douglas fir, western hemlock and relatively steep slopes . . . patches of red alder and vine maple."

d. Swamp Creek (ONHP #49). This unsurveyed, unverified ONHP site is described in their Inventory only as "small stream, riparian vegetation."

e. Marshall Island Heronry (ONHP #113). This heronry is on a parcel divided by state and private ownership. Logging on large cottonwoods in the private ownership in 1980 may have destroyed the rookery. ODFW plans flights of the Willamette this spring to inspect heronrys, followed by field surveys later in the spring. If the heronry exists, this site will be placed in a 1C category; if not, in a 1A category. If in 1C, the nest trees and a buffer around them should be protected with a Natural Resource Zone. If the heronry turns out to exist on private property, the Parks Department or the Fish and Wildlife Department are urged to acquire this property.

f. Willamette Valley Quaking Aspen Grove (ONHP #2). This site is reported as a one-acre stand of Quaking Aspen located west of Elmira along Highway 126. The site is a remnant, native stand of trees. Conflicting directions to the site listed in the Nature Conservancy file have made it impossible to locate this site to date. Botanists from the Nature Conservancy and the University of Oregon are very interested in assisting the County to find this site, if it still exists.

The ONHP report states: "Very rare, relict remnant stand of Quaking Aspen. Very rare in the WV [Willamette Valley] of extreme botanical interest due to long separation from the major Aspen gene pool and because of its novelty and rarity in the Willamette Valley."

If the trees still exist, the site will be placed in a 1C (significant) category. A full ESEE analysis will be done at that time, which will include information and recommendations from botanists. The following items should be considered when and if a full ESEE analysis is prepared:

Under economic consequences, the possibility of reduction of income to the private property owner if the land cannot be converted to another use. Also the fact that the property owner may gain tax advantages if an NR zone is applied and an open space tax deferral approved.

Under social consequences, the loss of a rare site such as this is inherently displeasing to many persons, even though the site is on private property and not open to the public.

Under environment consequences, the fact that the tree is very abundant in other parts of the US. Also that the long separation from the major Aspen gene pool could result in valuable research opportunities.

No energy consequences can be anticipated at this time.

1C Category

Fifty-six sites fall within this category. These sites have been divided into four groups and will be discussed in this order:

1. Sites owned by USFS and BLM
2. Sites which are State Parks
3. Sites covered by the Coastal Resources Management Plan or the Willamette River Greenway
4. Others

- -

1. Sites Owned by USFS or BLM

No additional research has been done on these 29 sites. Available information from the Nature Conservancy on location, quality and quantity indicates these resource sites are significant, and therefore are placed in a 1C category. Because they are in US Forest Service and BLM ownership, however, no conflicts exist based on uses allowed in zoning districts. Lane County does not have jurisdiction on federal lands. Although, as a matter of policy, zoning districts are applied to federal lands in the County, these zones have no effect unless the land is converted to nonfederal ownership. Besides the issue of lack of jurisdiction, the Forest Service

and BLM are required by federal law to consider natural areas as part of their multiple-use mandate.

Inventory of Resource Sites Owned by the US Forest Service

1. Bob Creek (ONHP #55) 15-11, 15-12
2. Buck Creek (ONHP #99) 18-45-4,5
3. Cox Rock (ONHP #16) 17-12-10
4. Diamond Peak Wilderness Area (ONHP #124) 24-55,65
5. Fossil Beds (ONHP #137) 21-1E-30
6. French Pete Wilderness Area (ONHP #140) 17,18-5E,6E
7. Gold Lake Bog RNA (ONHP #95) 22-6E-20,29
8. Hagan-Block Proposed Research Natural Area (ONHP #148) 16-4E,11-15
9. H. J. Andrews Experimental Forest (ONHP #105) 16-5E,6E
10. Karnowsky Creek Bald Eagle Nest (ONHP #119) 18-11-22
11. Lamb Butte Scenic Area (ONHP #126) 17-6E22
12. Lily Lake (ONHP #4) 17-12-15
13. Lost Creek Headwaters (ONHP #54) 16-6E-19, 17-6E-24
14. Lowder Mountain Geological Area (ONHP #127) 17-6E-19
15. Mount Washington Wilderness (ONHP #123) 15-7E
16. Olallie Ridge Research Natural Area (ONHP #96) 17-6E
17. Parrot Rock (ONHP #115) 17-12-4
18. Quaking Aspen Swamp (ONHP #129) 17-6E-28
19. Rebel Rock Geological Area (ONHP #128) 18-6E-30
20. Siuslaw South Jetty Area (ONHP #68) 18-12-21
21. Three Sisters Wilderness (ONHP #122) 15-19-6E-9E
22. Torry Charlton Forest (ONHP #149) 20,21-6E
23. Yankee Mountain Scenic Area (ONHP #125) 17-5E-26

Inventory of Resource Sites Owned by BLM

1. Dorena Heronry (ONHP #111) 20-2-31
2. Eagle Rock (ONHP #1) 17-3E-10
3. Hula Creek Headland Forest (ONHP #101) 17-8-N1/2 NW1/4 6
4. Long Tom River (ONHP #6) 16-5
5. Poodle Creek Heronry (ONHP #112) 17-7-13
6. Shaw Creek Heronry (ONHP #110) 20-5-6

2. Sites Within State Parks

These sites, owned by the State of Oregon, are within the State Parks and Highways System. There is no question as to the significance of these sites, that is why they have been set aside as State Parks and Waysides. The sites are placed in a 1C category. No conflicts exist based on uses allowed in zoning districts. The sites are all zoned in Public Reserve Zones and are presently being managed by the State Parks Division and the Oregon Department of Transportation.

a. Ben and Kay Dorris State Park (NAPAC #11) 16-2E-36. Douglas fir-alder vegetation. Existing recreational use does not negatively impact this vegetation.

b. Darlingtonia State Wayside (ONHP #109) 17-12-35. Unique plant protected in this wayside.

c. Dexter Island and Dexter Dam State Park (ONHP #108) 19-1-5,8,9. Riparian vegetation and heron rookery. The approved Master Plan for this park (now called Elijah Bristow State Park) indicates that the rookery and riparian vegetation areas will not be negatively affected.

d. Washburne Memorial State Park (ONHP #58) 16-12-22. Unique vegetation complexes, including an unusual sphagnum moss bogs, are protected in this park.

e. Washburne Wayside (ONHP #40 and NAPAC #4) 15-5-12. Douglas fir and white oak vegetation. Minimal development in this wayside.

3. Sites Within the Coastal Resources Management Plan or Willamette River Greenway Plan

Information on the location, quality and quantity of these sites indicates that they are all significant and are being placed in a 1C category. Two special purpose plans, the Coastal Resources Management Plan (CRMP) and the Willamette River Greenway Plan, have been adopted by the County. Different parts of these plans cover the 21 sites listed here.

Because of the degree of protection already afforded these sites, and the amount of planning which has already gone into them, no conflicts are determined to exist with use of these sites as they are presently zoned.

During development of Management Units within the Coastal Resources Management Plan, natural values of the area were a major factor. Those same values are the basis of the Greenway Plan. Detailed information on these plans, and the Management Units, is available in the Planning Division office.

a. Big Creek (ONHP #45) CRMP--Management Unit (MU) 45, Prime Wildlife Area.

b. Big Creek, Rock Creek and Tenmile Creek. Silverspot Butterfly sites (ONHP #5,56,130). CRMP--MUs 38,45, Prime Wildlife Area for this nationally threatened species.

c. Butterfly, Grass, Reed and Jernigan Islands (ONHP #83). CRMP--Siltcoos Lake MU 1, Significant Natural Area. The riparian vegetation on these islands provides excellent wildlife, particularly bird, habitat.

d. Camp Baker (Boy Scout Camp) (ONHP #46) CRMP--Siltcoos Lake MUs 5 and 6. A Prime Wildlife Area MU extends 150 feet inland from the shore of the lake to cover riparian vegetation and marshy areas; the remainder of the site is in a Natural Resources Conservation MU.

e. Coast Fork Willamette River (ONHP #93). Greenway Plan. Riparian vegetation, the important value listed at this site, is protected by Greenway Development permit requirements.

f. Cox Island (ONHP #65) CRMP-MUTI, Natural. This island is owned and managed by the Nature Conservancy.

g. Duncan Slough and Marsh (ONHP #61) CRMP--MU N, Natural. A unique marsh complex and a band-tailed pigeon mineral spring are protected by this MU.

h. Heceta Beach Dunes (ONHP #37) CRMP--Beaches and Dunes section and Beaches and Dunes Combining District of the zoning ordinance guide development in dunal areas.

i. Heceta Head/Conical Rock (ONHP #53,114) CRMP--MU 48, Significant Natural Area. Conical Rock is part of the Oregon Islands National Wildlife Refuge. Heceta Head is an important bird nesting area, as well as being an outstanding scenic site.

j. McCarty Marsh Heronry (ONHP #62) CRMP--MU 25, Prime Wildlife Area. The private property owner has an agreement with ODFW to protect this rookery.

k. Mercer Lake (ONHP #145) CRMP--Mercer Lake MUs. Several MUs are used to surround the shoreline of this lake, protecting its natural values.

l. Middle Fork Willamette River (ONHP #91) Greenway Plan. The valuable riparian vegetation here is protected by the Greenway Plan and Development Permit.

m. Miller Arm/Maple Creek Marsh (ONHP #81) CRMP--Siltcoos Lake MU 4, Prime Wildlife Area. This MU protects an uncommon canary grass/tule marsh.

n. North Fork Siuslaw River Marsh (ONHP #60) CRMP--MU H, Natural. The proximity of four marsh types and the extent of the marshes make this site unusual. The Natural designation provides protection for this area.

o. Siboco Slough and South Inlet Pigeon Springs (ONHP #63,132) CRMP--MU I, Natural. These marsh areas and the mineral springs are protected by the Natural designation.

p. Siltcoos Lake (ONHP #85) CRMP--Siltcoos Lake MUs. The Lane County portion of Siltcoos Lake's shoreline is surrounded by MUs which recognize the importance of the riparian vegetation and the marshlands.

q. Siltcoos Lake Dunes (ONHP #84) CRMP--Beaches and Dunes Section. This section of the Plan, as well as a Beaches and Dunes Zoning District guide development in dunal areas and preserve the important values of the dunes.

r. Siuslaw River Estuary (ONHP #67) CRMP. The entire estuary portion of the CRMP is designed to recognize and preserve the various values of the estuary and its shoreline.

s. Sutton Lake Marsh (ONHP #20) CRMP--Sutton Lake MU 4, Significant Natural Area. This MU covers an important willow, sedge and bullrush marsh.

t. Woahink Lake Bog (ONHP #14) CRMP--Woahink Lake MU 2, Prime Wildlife Area. An uncommon plant is protected by this MU.

4. Others

1. Upper Yachats Elk Pasture (ONHP #146). A portion of this site, previously in private ownership, has been purchased by ODFW. The remainder is in the Siuslaw National Forest. SNF and ODFW have an agreement concerning use of the site as an elk wintering area. The site is zoned FM - no conflicts exist.

2. Fern Ridge (ONHP #8). The reservoir itself is owned by the Corps of Engineers and operated under a management plan done in 1980. This plan recognizes the vital role of Fern Ridge to wildlife, particularly waterfowl. The ODFW manages wildlife in the area, including plots south of the reservoir being farmed for wildlife utilization only. The reservoir is considered "sensitive fish and waterfowl habitat," discussed earlier in this report. As such, riparian vegetation around the reservoir is protected. No conflicts exist.

POLICY DISCUSSION

Several existing policies relate to flora and fauna. These are:

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize and support existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Provide special consideration to protection of sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies shall be encouraged to work with landowners to conserve wildlife habitats.

5. Lane County shall be encouraged to investigate and utilize fee acquistions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to implement these policies.

While these policies are adequate as far as they go, there are other areas discussed in this Working Paper for which policies have not been developed. The general areas with policy gaps will be mentioned and examples of possible policies given.

- Policy gap: Riparian and wetland vegetation. Examples of policies are:

    1. Riparian and wetland vegetation is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Maintenance of this vegetation shall be encouraged with setbacks from Class I streams and wetlands, and consideration of the areas in other land use activities such as Special Use Permits and Zone Changes.

    2. Drainage of wetland areas will not be promoted by Lane County. Any drainage project over which Lane County has permit authority shall be approved only after analysis of the ESEE consequences of such an action.

- Policy gap: Sensitive Fish and Waterfowl areas. An example of a policy is:

    1. Sensitive Fish and Waterfowl areas are recognized as the most valuable habitat of their type in the County. Maintenance of riparian vegetation shall be a prime consideration in zoning districts in these areas.

- Policy gap: Big Game Ranges. Some policy examples are:

    1. Residential building permits issued within Major or Peripheral Big Game Range shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

    2. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big Game Range.

3. ODFW recommendations on overall residential density with Peripheral and Major Big Game Range shall be a determinant in minimum parcel size for regions of the County.

- Policy gap: Conflicts not anticipated or identified in the plan. Example of policy:

1. If uses are identified (which were not previously identified in the plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-00 will be followed.

APPENDIX A

WILDLIFE OF LANE COUNTY

1. Birds

Approximately 305 species are thought to occur in Lane County. Frequency of occurrence may range from common to rare or accidental; further, some occurrences are seasonal only. This inventory is as complete as current resources allow. Updating and further verification is anticipated, as populations are not static but dependent upon habitat, nesting occurrence, threatened or endangered species, etc.

Common Loon
Arctic Loon
Red-Throated Loon
Horned Grebe
Eared Grebe
Western Grebe
Pied-Billed Grebe
Red-Necked Grebe
Black-Footed Albatross
Fulmar
Pink-Footed Shearwater
Sooty Shearwater
Slender-Billed Shearwater
Leach's Storm Petrel
Fork-Tailed Petrel
White Pelican
Brown Pelican
Double-Crested Cormorant
Brandt's Cormorant
Pelagic Cormorant
Common Egret
Black-Crowned Night Heron
Great Blue Heron
Green Heron
Great Egret
Snowy Egret
American Bittern
Whistling Swan
Trumpeter Swan
Canada Goose
White-Fronted Goose
Snow Goose
Black Brandt
Mallard
Gadwall
Northern Pintail
Green-Winged Teal
Blue-Winged Teal
Cinnamon Teal
European Widgeon
Harlequin Duck
White-Winged Scoter
Red-Breasted Merganser
Surf Scoter
Ruddy Duck
Hooded Merganser
Turkey Vulture
White-Tailed Kite
Goshawk
Sharp-Shinned Hawk
Cooper's Hawk
Red-Tailed Hawk
Swainsen's Hawk
Rough-Legged Hawk
Ferruginous Hawk
Golden Eagle
Bald Eagle
Marsh Hawk
Osprey
Prairie Falcon
Peregrine Falcon
Pigeon Hawk
Merlin
American Kestrel (Sparrow Hawk)
Blue Grouse
Ruffed Grouse
California Quail
Mountain Quail
Ring-Necked Pheasant
Sandhill Crane
Virginia Rail
Sora
American Coot
Black Oystercatcher
Semipalmated Plover
Snowy Plover
Killdeer
American Golden Plover
Black-Bellied Plover
Surfbird

ADDENDUM TO WORKING PAPER:

FLORA & FAUNA

November, 1983

2881 8568

001257

MEMORANDUM

lane county

TO Interested Persons and Groups

FROM Land Management Division

SUBJECT Revision of General Plan Working Papers DATE November 1983

In order to fully comply with the requirements of Oregon statewide planning Goals as promulgated by the Oregon Land Conservation and development Commission, Lane County must revise certain elements of its rural General Plan. Following the revision action, the Plan must be submitted to LCDC for acknowledgement.

Part of the revision effort is directed toward improving the information base and Policy suggestions of the Working Papers. These documents were originally intended to serve as technical foundations (by pulling together information and in some cases indicating where it was already available) for Plan development. The actual Plan was to take the form of Policies and a Plan Diagram, both of which were completed and, in the case of the Policies, adopted. Working Papers were to serve as reference material.

To bring the Plan into better compliance with state Goals, all three elements -- Working Papers, Policies and Plan Diagram -- need some revision. Since the Policies are generated from information in the Working Papers, it follows that new Policy statements must be founded in the form of Working Paper revisions.

Attached for your review and comment are revisions to one of the existing Working Papers. It is the intention of the County to follow essentially the same process of public review that was followed when the Working Paper were originally published. Bear in mind that in some instances, revisions pre-empt or modify or add to material now in the Working Papers.

After action is completed on all Working Paper revisions, the Policy statements generated by this procedure will be compiled and brought before the public and County officials for adoption as amendments to the General Plan Policies document. When the Plan Diagram is made available for similiar action, it too will contain pertinent directives of this and the other Working Papers.

2882

REVISIONS TO "FLORA AND FAUNA WORKING PAPER"

I. Introduction

The "Flora and Fauna Working Paper" was published by Lane County in March, 1982. It was brought before both County Planning Commissions in a public hearing format in March and April, with testimony taken and responses given. In May, 1982, both Planning Commissions issued formal reports to the Board of County Commissioners, recommending tentative Policies to be formulated from both the Working Paper and the testimony received about it. The tentative Policies were reviewed and adopted by the Board of County Commissioners in December 1982.

In early 1983, staff of the DLCD reviewed the Working Paper and identified some aspects of it that needed to be adjusted before it would comply with statewide planning Goal requirements. The purpose of this Revision report is to correct those deficiencies.

Changes to the "Flora and Fauna Working Paper" take the form of technical data additions, and of Policy statements. Only the Policy statements are intended to be formally adopted as part of the Plan.

II. Working Paper Revisions

A. ADD the following language to page 5 of the Working Paper, directly following the first (leading) paragraph of the section entitled, "Wildlife Habitats":

The description of a habitat type in the following section is intended to provide a setting for identification of more specific resource types and sites. Because several of the following habitat types are so prominent in the County (e.g, "Douglas Fir/Trailing Blackberry", "Deciduous Hardwoods"), mapping the information would be of little value. Likewise, it is not practical to make Plan designations of these types, thereby eliminating the need for the "Goal 5 Rule" application. It is assumed that existing land use regulations (such as forest land zoning) will properly protect these habitat types, allowing the County to focus its regulator efforts on specific types (such as riparian lands) discussed later in this Working Paper.

B. DELETE the list of "sensitive fish habitats" which appears on pages 20 and 21 of the Working Paper, and ADD the more detailed list below:

001259

MIDDLE FORK WILLAMETTE BASIN

Middle Fork Willamette	Dexter Reservoir to Confluence of Coast and Middle Forks Hills Creek Reservoir to Lookout Point Reservoir Staley Creek to Hills Creek
North Fork of Middle Fork Willamette	East Boundary of 19-65-26 to Middle Fork Willamette
Salmon Creek	Black Creek to Middle Fork Willamette
Salt Creek	East Boundary of 22-55-21 to Middle Fork Willamette
Hills Creek	Warfield Creek to Hills Creek Reservoir
Fall Creek	Fall Creek to Middle Fork Willamette Gold Creek to Fall Creek Reservoir
Little Fall Creek	West Boundary of 18-25-07 to Fall Creek
Winberry Creek	South Fork Winberry Creek to Fall Creek Reservoir

COAST FORK WILLAMETTE BASIN

Coast Fork Willamette	Cottage Grove Reservoir to Confluence of Coast and Middle Fork Willamette
Big River	East Boundary of 23-25-17 to Cottage Grove Reservoir

SIUSLAW RIVER BASIN	
Siuslaw River	Confluence of North and South Forks Siuslaw to Coastal Resource Management Plan (CRMP) Management Units (MU's)
North Fork Siuslaw River	Hawley Creek to Siuslaw River
South Fork Siuslaw River	Tucker Creek to Siuslaw River
Esmond Creek	County Line to Siuslaw River
Wolf Creek	Panther Creek to Siuslaw River
Whitacker Creek	County Line to Siuslaw River
Wildcat Creek	South Line of 18-07-13 to Siuslaw River
Lake Creek	East Boundary of 15-07-15 to Triangle Lake Triangle Lake to Siuslaw River
Deadwood Creek	Panther Creek to Lake Creek
Indian Creek	North Fork Indian Creek to Lake Creek
Sweet Creek	South Boundary of 18-10-33 to CRMP MU's
North Fork Siuslaw	West Boundary of 16-10-30 to CRMP MU's
SILTCOOS BASIN	
Maple Creek	East Boundary of 19-11-12 to CRMP MU's
Fiddle Creek	East Line of 19-11-36 to County Line
Woahink Creek	Woahink Lake to Siltcoos Lake Exclusive of CRMP MU's
COASTAL DRAINAGES	
Tenmile Creek	Wildcat Creek to CRMP MU's
Big Creek	East Boundary of 16-11-21 to CRMP MU's
Cape Creek	East Boundary of 16-11-31 to Pacific Ocean
Sutton Creek	Sutton Lake to Pacific Ocean Exclusive of CRMP MU's Mercer Lake to Sutton Lake Exclusive of CRMP MU's

Row River	Dorena Reservoir to Coast Fork Willamette Layng Creek to Dorena Reservoir
Layng Creek	South Boundary of 21-15-24 to Row River
Brice Creek	South Boundary of 22-25-29 to Row River
Sharps Creek	Clark Creek to Row River
Mosby Creek	Tom Creek to Row River
MAIN STEM WILLAMETTE BASIN	
Springfield Mill Race	Middle Fork Willamette to Main Stem Willamette
Main Stem Willamette	Confluence of Coast and Middle Forks Willamette to County Line
MC KENZIE RIVER BASIN	
McKenzie River	County Line to Main Stem Willamette
Mohawk River	Drury Creek to McKenzie River
Gate Creek	Minney Creek to McKenzie River
Blue River	Blue River Reservoir to McKenzie River County Line to Blue River Reservoir
South Fork McKenzie River	Cougar Reservoir to McKenzie River Roaring River to Cougar Reservoir
West Fork Horse Creek	Horse Creek to McKenzie River
Horse Creek	Separation Creek to McKenzie River
Lost Creek	South Boundary of 16-65-13 to McKenzie River
UMPQUA BASIN	
Steamboat Creek	Horse Heaven Creek to County Line

001262

C. DELETE the sixth paragraph on page 20 (concerning a map) and ADD the following:

A small-scale map of the streams identified below appears in this Working Paper. Streams listed have been called out by ODFW, and reaches noted by agency staff. A large-scale map is also available for review in County planning offices.

D. DELETE the text under "Quantity" (page 21), and ADD the following:

Several hundred miles of waterway are involved, all of it subject to the Riparian Lands setback requirements discussed in that section of the Working Paper. Since fish habitat is confined to the streams themselves, all such habitat is automatically included in riparian land designations. Waterfowl nesting areas extend beyond the water surface, normally in Wetland areas as identified in that section of the Working Paper.

Although occuring in all parts of the County, sensitive fish habitat has very similiar characteristics throughout -- it is highly dependant on the existence of riparian vegetation. Such vegetation is the subject of recommended protective measures (setback and vegetation management provisions) along Class I waterways.

Because of the vast quantity of waterway designated sensitive fish habitat, and the unifying requirement of riparian vegetation, it is not useful to attempt site-specific conflict analysis. Conflict analysis for waterfowl nesting areas coincides with that for wetlands.

E. DELETE the last three sentences in paragraph 2 of the section entitled "Conflict Resolution" on page 22 (beginning with, "As with Riparian...."). ADD the following language:

The Oregon Fish and Wildlife Department has recommended building setbacks of 50 to 100 feet (depending on zone, which in turn reflects location) along waterways designated as sensitive fish habitat, and the use of a NR zone for wetlands not falling into the riparian strip. These setbacks can be the same rules as have been proposed for Class I streams (see previous section of the Working Paper). Since sensitive fish habitat consists of specified portions of Class I waterways, the riparian land management program should effectively protect such habitat. The NR zone should be applied to wetlands not protected by Coastal zoning or federal ownership.

F. DELETE paragraph 5 on page 14 of the Working Paper (in section entitled, "Riparian and Wetland Areas"), and ADD the following:

For areas of the County covered by the National Wetland Inventory, wetlands shall be defined through a program of consultation with fish and wildlife experts of the Oregon Fish & Wildlife Department and its federal counterpart. For interim purposes of this section, streams and areas of open water shall not be considered wetlands.

G. DELETE the first two sentences of paragraph 1, page 16 of the Working Paper (under section entitled, "Location"), and ADD the following:

The Oregon Fish and Wildlife Department has assisted the County in providing maps of all Class I streams, as well as major significant wetland areas. Attached to this Working Paper is a summary map of those areas, and detailed maps are available for review in County offices.

H. DELETE last two paragraphs under section entitled "Location" on page 16 of the Working Paper, and ADD the following:

A vast array of wetland types has been identified from air photo analysis by the U.S. Fish and Wildlife Service. That agency's product, known as the National Wetland Inventory, includes wetland types from open water to small, seasonal marshes. The scale of the maps is at 1"=62,500 feet (scale of USGS quadrangles) and 1"=24,000 feet. Such a scale, although permitting total coverage of the County, requires much supplementary interpretation and field checking before specific Plan designations and regulations can be placed on the sites.

Presently, about half the County (from the Willamette Valley to the Coastal Zone) has been so mapped, and it is expected that the rest of the County will be completed within a year or two. Although it is not possible -- because of the interpretation requirements mentioned above and of incomplete County coverage -- to designate a large number of minor wetlands, the maps have been useful in identifying "major wetlands." These major wetlands are considered by ODFW staff as being sufficient in size and value to merit County identification. They are located in the following areas:

- Fern Ridge periphery exclusive of parkland;
- Old Long Tom River channel below Fern Ridge dam, including lands between it and new channel.
- North Fork Siuslaw freshwater marsh;
- Maple Creek marsh;
- Amazon Canal at its confluence with the waters of Fern Ridge Reservoir.

Staff of the ODFW indicate that protection of the above major wetlands will enable the County to meet basic Goal 5 requirements, and the later interpretation and application of NWI mapped data will completely fulfill such requirements.

The areas listed above are mapped in detail on the County's Plan Diagram maps. Additionally, a small-scale map showing their general location is attached to this Working Paper. They are discussed in more detail in the "ESEE Analysis" section.

The County should take the Goal 5 Rule "1B" option on interpreting and applying the NWI data, within a timetable of one or two years (or when complete County coverage finally occurs).

001264

I. DELETE both paragraphs of the section entitled, "Quantity" on page 17 of the Working Paper, and ADD the following:

The quantity of riparian and wetland areas is difficult to estimate in terms of acres or square miles. For purposes of this analysis, "quantity" of riparian lands is defined as all lands along both banks of Class 1 streams in Lane County, to a setback line 100 feet from ordinary high water. This area may or may not contain riparian vegetation; uses of it vary depending on location.

Major wetlands as previously defined vary in size from a few to several hundred acres. Each wetland is discussed individually in the "conflict analysis." The quantity of wetlands on the National Wetlands Inventory probably measures in hundreds of square miles; until a full analysis is done per the Goal 5 rule "1B" option, there is no way of knowing.

J. DELETE the section entitled, "ESEE Analysis" on pages 18 and 19 of the Working Paper. ADD the following material to replace it:

Riparian Lands

For purposes of conflict analysis, riparian lands are divided into the following categories:

- Resource Areas (forested and agricultural);
- Rural Lands (partially/sparsely developed);
- Developed & Committed areas (including communities).

The analysis is carried out for each category.

1. Resource Areas

a) Economic Impacts:

1) Merchantable timber removed from riparian areas is a source of employment and revenue in the County.

2) Use of riparian areas for farming purposes increases available land for farming; usually, riparian lands consist of soils types suitable for agriculture.

3) Riparian lands used for aggregate production increase the economic benefits of that resource.

4) Loss of riparian vegetation destroys fish and waterfowl habitat, increases flood risks, and destroys the river-bank itself, all of which produce net costs to the area.

b) Social Impacts:

1) Loss of income from reduced forest and farming activities adversely affects Land County residents, and could require relocation, etc.

2) Regulations to restrict activities in the riparian strip may conflict with the Forest Practices Act, and in any case will increase the burden on the landowner. Enforcement of such regulations in Resource Areas would be difficult.

3) The social consequences of reduced water quality, flooding, and fish/wildlife quantity, stemming from loss of riparian lands could be significant, especially for those oriented toward outdoor recreation and those living in flood-prone areas.

c) Environmental Impacts:

1) Loss of riparian vegetation would have a significant adverse impact on the riverine environment, as already discussed, and on the wildlife species dependent on that environment.

2) Reduced bank stability, more turbid water, flooding, etc., has generally negative impacts on downstream environments. Flood control would be more difficult to achieve, water purification would be necessary for jurisdictions using surface water for municipal supply, and the risk of health hazards from poorer water quality and/or flooding would increase.

d) Energy Impacts:

1) Reduction of agricultural or forestry production would require a greater investment of energy to more intensively manage unaffected areas and/or obtain the resource products from other areas.

2) Loss of riparian vegetation and a reduction in environmental quality could result in increased downstream energy costs (water treatment, greater travel in search of suitable outdoor recreational sites, flood cleanup)

2. Rural Lands

a) Economic Impacts:

1) Riparian land development restrictions can decrease the availability/usability of Rural Lands, thus increasing land costs.

2) In much the same manner as with Resource Areas, loss of riparian areas for noncommercial forestry, farming, etc., can increase landowner costs and reduce income.

3) Reduced riparian land quality can reduce property values and increase costs to landowners through flood risk, higher insurance costs, less wildlife, and poorer water quality.

b) Social Impacts:

1) Rural residents who desire high-quality riparian environments would be adversely impacted by loss of riparian land and associated consequences.

001266

2) Restrictions on building and land use in the riparian strip would adversely impact landowners through reduction of their options for building siting, etc.

c) Environmental Impacts:

1) In rural areas, riparian environments often contrast to open lands used for pasture, or once covered with timber, or cleared for homesites. Loss of such lands would damage those environments and thus the quality of the overall community or area.

2) The quality of surface and groundwater, upon which rural landowners depend, would be adversely impacted.

d) Energy Impacts:

1) Energy costs to landowners would be higher if riparian restrictions forced them to live elsewhere. Costs would be lower if riparian restrictions preserved water quality, provided natural flood control, and so forth.

3. Developed and Committed Areas

a) Economic Impacts:

1) Especially on small parcels, the preservation of riparian vegetation through County use restrictions could have serious impacts on the owner.

2) Siting of structures, riparian land use, and vegetation management would all be affected by riparian regulations, possibly increasing costs to landowners.

3) Loss of riparian vegetation through no management would decrease the desirability of the local environment and adversely impact property values. Physical damage to the riverbank through loss of riparian vegetation could cause bank erosion which in turn would increase costs to the landowner to combat it, or because of damages to structures and other improvements.

b) Social Impacts:

1) Within developed areas, riverbanks are often valued for both public and private recreational purposes. Usually, riparian land has a higher social value than equivalent nonriparian land. Loss of that resource would be detrimental to such qualities.

2) The burden of riparian use restrictions on the landowner would amount to another layer of regulation, and could be difficult to enforce.

c) Environmental Impacts:

1) The adverse impacts of flooding, bank erosion, loss of wildlife and fish habitat, reduced water quality and increased runoff would be significant if riparian vegetation was not protected in some manner.

001267

2) Excessive restrictions on riparian lands within developed and committed areas could result in an aesthetic environment which would displease those who prefer manicured, park-like community settings to more wild, natural settings.

d) Energy Impacts:

1) Restrictions on riparian land use could increase energy costs to those forced to find other land upon which to build.

2) Public service costs in areas not subject to flooding or other adverse impacts of destroyed riparian areas, including the energy costs of those services, would be controlled.

Conflict Resolution

Following the analysis of conflicts, a decision must be made whether to 1) preserve the resource totally, 2) allow unlimited conflicting uses, or 3) limit the conflicting uses. Such limitation should be in the form of regulations and similiar implementing measures.

Considering the value of riparian vegetation to the County's ecosystem, and the impacts of its loss, option 2) above is not prudent. On the other hand, a complete limitation of all activities-- option 1)-- in the 100-foot riparian area is equally unfeasible. As with most resources, a compromise is the most practical -- the third option.

In Goal 5 Rule language, a "3C" decision should be made. This should take the form of Policies and land use regulations which accomplish the following:

1. Requires building setbacks* from all Class 1 streams. (The actual setback should be 50 feet in rural development zones and 100 feet in rural resource zones. According to ODFW officials, these setbacks are justifiable, and have been used in other Oregon counties. Specific language should be introduced to each zoning district to this end.)

2. Provides for vegetation management within the riparian setback strip. (ODFW officials have provided the County with suggested vegetation management regulations, based in part on the County's Coastal Resources Management Plan shoreland provisions, to be applied within the riparian strip. The actual area of application should be 30 feet for the 50-foot strip, and 50 feet for the 100-foot strip. See the County's "Natural Resources Conservation" shoreland overlay for fuller justification and explanation.)

3. Provides for flexibility. (It must be recognized that situations will occur where the above regulations are overly burdensome. A provision for landowner appeal for a relaxation of the standards needs to be written into each zoning district along with the other standards suggested above. Upon such appeal, the vegetative

*for non-water dependent uses.

001268

management area -- as well as the wider riparian setback area itself -- could be modified upon consultation with, and approval by, officials of the ODFW.)

4. Does not conflict with the provisions of the Forest Practices Act. (Presently, it has not yet been resolved in Oregon whether or not Goal 5 concerns take precedence over activities regulated by the FPA -- an example being timber cutting along a Class 1 stream. Until and if that issue is resolved in favor of Goal 5 concerns, County action to limit conflicting uses should not be applied to lands subject to FPA regulation.)

5. Uses existing regulations wherever practical. (Both the Willamette Greenway Permit and the Coastal Resources Zoning regulate activites in the riparian zones of respective waterways. There is no need for an additional layer of regulation on lands already subject to such regulation. In fact, those standards should be used as a basis for management of riparian lands in areas beyond WGP or CRZ jurisdiction.)

Wetlands

The Major Wetlands listed earlier can each be evaluated seperately for Goal 5 Rule conflict analysis.

1. Fern Ridge Reservoir

a) Location: Marshy areas on perimeter of the Reservoir, including lands to southeast of Reservoir (see map).

b) Quality: High. The major fresh water wetland of the County. Contains freshwater marsh, warm water game fish, submerged & emergent vegetation, fur bearers, and many species of waterfowl, shorebirds, song birds and small mammals.

c) Quantity: Several hundred acres of land, most of it owned by the U.S. Army Corps of Engineers, some of which is managed by ODFW under an interagency agreement.

d) Conflicting Uses: Any use which would result in destruction of vegetation or drainage of surface/subsurface water.

e) ESEE Analysis:

1) Economic: The principal value of the area is for its present use. Alternative uses, such as development, would require expensive land alteration. As a focal point for outdoor, water-related recreation in central Lane County, Fern Ridge Reservoir and its wetlands provide a significant economic benefit. Maintenence of the Reservoir also provides valuable flood control benefits to downstream landowners.

2) Social: Social consequences of protecting the resource parallel the economic ones -- generally beneficial.

3) Environmental: The site provides a highly valuable area for a variety of life-forms. Destruction of the wetlands would destroy the habitat values, and would probably degrade the quality of the Reservoir and adjacent lands for flood control and recreational purposes.

001269

4) Energy: Destruction of the wetland resource could result in greater energy expenditures for those wishing to locate a more distant, and similiar, area for recreational purposes. Since wetlands act as sponges, flood control costs (including energy outlay) could also increase (more riprapping, etc.).

2. Lower Long Tom

a) Location: Immediately below the dam and ponds on the north side of the Reservoir, between the old river channel and the new one, and on the east side of the old channel.

b) Quality: High. A large, natural wetland containing many of the same attributes as the area to the south. "Representative" habitat.

c) Quantity: about 300 acres, owned by the Corps and by private individuals.

d) Conflicting Uses: See above entry.

e) Conflict Analysis: See above entry.

3. North Fork Siuslaw

a) Location: On the North Fork about two miles north of the main channel (18-11-19). See map.

b) Quality: High. An old salt water marsh converted to freshwater marsh by existence of a tidegate. Contains sedges, emergent vegetation, various waterfowl and furbearers.

c) Quantity: About 50 acres, in private ownership.

d) Conflicting Uses: See first entry, above.

e) Conflict Analysis:

1) Economic: Similiar to Fern Ridge Reservoir, although because of smaller size and non-flood control function, less significant.

2) Social: Impacts of destruction would eliminate a distinct habitat type from being available to persons in the area for wildlife study, etc. Maintainence would appear to have little additional impact since area is presently subject to major restrictions under Coastal Zoning overlay of "Significant Natural Shorelands Combining".

3) Environmental: This, like any major wetland, provides valuable habitat for fish and wildlife, and serves as a natural flood control facility. Impacts of destruction would be significant; impacts of maintenence, negligible, since it is now a natural system.

4) Energy: Possible flooding impacts.

001270

4. Maple Creek Marsh

a) Location: Maple Creek where it meets northeast extent of Siltcoos Lake (19-11-30). See map.

b) Quality: High. One of the largest freshwater marshes in the area. Major use by water birds, beaver, furbearers, salmonids, shorebirds, emergent grasses, canary grass, sedges.

c) Quantity: About 30 acres, in private ownership.

d) Conflicting Uses. Same as entry #3.

e) Conflict Analysis: Same as entry #3. Also in a similiar manner, this site is under the protection of Coastal Resources zoning. The area is presently zoned with an overlay district of "Prime Wildlife," which is intended to maintain its existing character. A base zone of Exclusive Farm Use additionally restricts potentially conflicting uses.

5. Amazon Canal

a) Location: Amazon Canal for about the first ¼-mile from its confluence with the waters of Fern Ridge Reservoir.

b) Quality: High. Part of the Fern Ridge wetland system, although more open water than marsh. Water level varies. Provides habitat for various bird and acquatic animal species.

c) Quantity: About 200 yards of water and banks. Owned by Corps.

d) Conflicting Uses: Same as entry #1.

e) Conflict Analysis: Same as entry #1, although site plays less of a sponge function and more of a flood control function.

Conflict Resolution

Conflict resolution for wetlands should be much the same as for riparian lands: limit the conflicting uses (the "3C" option). Those areas which are owned by the Corps of Engineers can be considered to have sufficient protection from conflicting uses without the futile effort of County regulation of federally-controlled resources. Areas presently under the jurisdiction of Coastal Resource Zoning can also be assumed to have adequate protection, since the fundamental purpose of the County's Coastal Zoning was to restrict activities that posed a threat to Coastal resources -- shorelands, estuarine areas, and beaches and dunes. Areas not in either of the above categories should be designated with a "Natural Resource" land use category and appropriately zoned. As with most zones, it should contain language permitting flexibility when merited -- without the violation of Goal 5 purposes.

001271

J. DELETE text beginning with the last paragraph on page 24 of the Working Paper through the remainder of text on page 25, and ADD the following in its place:

Although this is a useful index, officials of the ODFW stress the fact that a mere "numbers game" is not the optimum manner to deal with conflicts to the Big Game Range resource. While overall densities are important indicators of conflict, the manner in which these densities occur can either create worse conflict or reduce that which already exists.

A prime example is that of "clustering" dwelling units in Peripheral or Major Range areas -- siting dwellings on large tracts of timber or agricultural land near lot lines, near roads, and near one another. This leaves the balance of the land unimpacted.

The means to prevent conflict is appropriate zoning and siting regulations. As a general rule, the County's 80-acre forest land zone will satisfy the requirements of Major Range, and the 40-acre zone will satisfy the requirments of Peripheral Range. Since commercial timber zoning is very restrictive of dwelling unit placement, it is unlikely that conflicts will occur.

Within Developed and Committed areas, ODFW officials are examining the utility of continuing to designate some of these lands as either Peripheral or Major Range. Developed and Committed areas should be considered as Impacted, and conflicting uses permitted.

The County should continue to work with the ODFW to resolve the issue of Big Game Range designation and protection in a mutually acceptable manner -- including the involvement of that agency in land use regulation development. If the zoning procedure described above does not succeed in pre-empting conflicts with the resource, it will be necessary for the County to go through the ESEE process and determine new ways of dealing with conflicts. The process should follow the Goal 5 Rule format, and center on weighing the relative benefits of dwelling unit construction against those of Big Game Range maintenence.

Policies concerning this issue are proposed in the concluding section of this Working Paner.

001272

K. DELETE the first full paragraph on page 27 (following the list of "1B" sites) in "Natural Areas" section, and ADD the following:

The six sites are individually discussed below. Since proper evaluation of each of them requires field inspection and reporting by knowledgable experts (biologists, botanists, etc.), and such staff capability is not presently available to the County, the County should commit itself to a timetable of developing the necessary information to satisfy the Goal 5 Rule, for each of of these sites. It is proposed that they be fully evaluated, and placed in "1A" or "1C" categories, within two years of the adoption of the Plan Policies, or equivalent statements, proposed in this Working Paper.

L. DELETE item "a" at the top of page 30 (Ben & Kay Dorris State Park), and re-letter the following four items "a" through "d"; ADD the following statement in a paragraph to conclude the listing:

The State of Oregon Parks and Recreation Division has, in a letter to Lane County, stated that the natural area values of these parks are being and will be protected, and that no conflicts with the resource are foreseen.

M. DELETE the third full sentence in item 6. on page 13 of the Working Paper ("American Osprey"), and ADD the following in place of it:

Through protection of the vegetative fringe along waterways, the habitat requirements of the osprey are protected by existing County regulations (e.g., Willamette Greenway Permit, Coastal Shoreland zoning overlays) and are expected to be further protected by new zoning restrictions intended to fulfill the County's responsibility for protection of riparian and wetland resources (see later sections of this Working Paper).

N. DELETE the material on pages 33 and 34 under "Policy Discussion." ADD the following in that location:

Following the publication of the first draft of this Working Paper, a number of Policies were adopted -- drawing in part on suggestions made in the Working Paper -- and placed in the General Plan Policies document (itself adopted December 1982). These Policies are duplicated at the conclusion of this section, for reader reference.

In order to comply with LCDC directives, and to implement proposed resource management programs discussed on the preceding pages, a few of the adopted Policies need to be revised, and some new ones added. These are proposed in the following paragraphs.

1. Revise existing Policy 3 as follows:

"3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification)."

001273

2. Revise existing Policy 6 as follows:

"6. Riparian vegetation along all Class I streams in the County is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Riparian lands shall be defined as the lands within 100 feet of ordinary high water on Class I streams, and shall be considered "significant" "1C" areas (in the language of OAR 660-16-000/025); "3C" protection of the riparian resource shall be achieved through development setbacks and vegetation management regulations within the riparian strip. The setback distance will vary from 100 feet from ordinary high water in rural resource zones to 50 feet from ordinary high water in developed and committed areas; provided a means is made available for review and modification of these requirements where it can be demonstrated that an unduly restrictive burden would be placed on the property owner. Such review and modification shall be spelled out in the zoning districts affected, and shall involve consultation with officials of the Oregon Department of Fish and Wildlife."

3. Revise existing Policy 7 as follows:

"7. Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal/state ownership; where these do not occur, the "Natural Resources" zone shall be applied. Other wetlands from the National Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per Goal 5 requirements if it is clearly demonstrated that an unprotected significant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction."

4. Revise existing Policy 8 as follows:

"8. The County shall not establish restrictions, based on Goal 5 objectives, on timber management activities subject to the Forest Practices Act which are more severe than the requirements of the Act itself. Goal 5 resources which are not dealt with by the Act shall be protected by the County per Goal 5 and OAR 660-16-000/025 requirements."

5. Revise existing Policy 9 as follows:

"9. Sensitive Fish and Waterfowl Areas as identified in the 1983 Revision to the Flora and Fauna Working Paper, shall be considered "significant" "1C" resources per OAR 660-16-000/025, and protected per "3C" requirements through protection of riparian and wetland resources as described in the above Policy statements."

6. To existing Policies 10 and 11, add the following words (underlined):

   "...the 1982 Lane County Working Paper on Flora and Fauna, as revised and updated in 1983...."

7. Add to existing Policy 12 the following statement:

   "The County shall work with ODFW officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similiar activities which are already a part of the County's rural resource zoning program."

8. Add a new Policy 14 as follows:

   "14. In its program of protecting "1C" resources, the County shall make maximum practical use of existing land use regulations (e.g., Willamette Greenway Permit, Coastal Resources Zoning overlays, rural forest and agricultural resource zones) to achieve such protection. Duplication of existing standards shall be avoided wherever practicable, provided County-determined Goal 5 and OAR 660-16-000/025 objectives are met."

Existing (December 1982) Policies are duplicated on the following two pages of this document. They do not include the changes proposed above.

III. Conclusion and Necessary Action

The preceding pages of material is intended to meet LCDC requirements and thereby assist the County in complying with statewide planning Goal 5 requirements. It is recommended that the Planning Commissions and the Board of County Commissioners

- Receive the material and review it as technical supportive data,

- Consider the proposed Policy revisions in light of the new data,

- Carry the proposed Policy revisions -- or modified versions thereof -- forward to public hearings and adoption as amendments to the General Plan Policies document.

Ordinance language intended to implement the Policy proposals is now being prepared and will be brought before the Planning Commissons and Board as a part of the Lane Code revision effort. Changes to the Policies will possibly require parallel changes to the proposed ordinance language.

###

001275

EXISTING FLORA AND FAUNA POLICIES from GENERAL PLAN POLICIES Document....

Flora and Fauna

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Provide special consideration to protection of sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies are encouraged to work with landowners to conserve wildlife habitats.

5. Lane County is encouraged to investigate fee acquisitions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to protect Goal 5 resources.

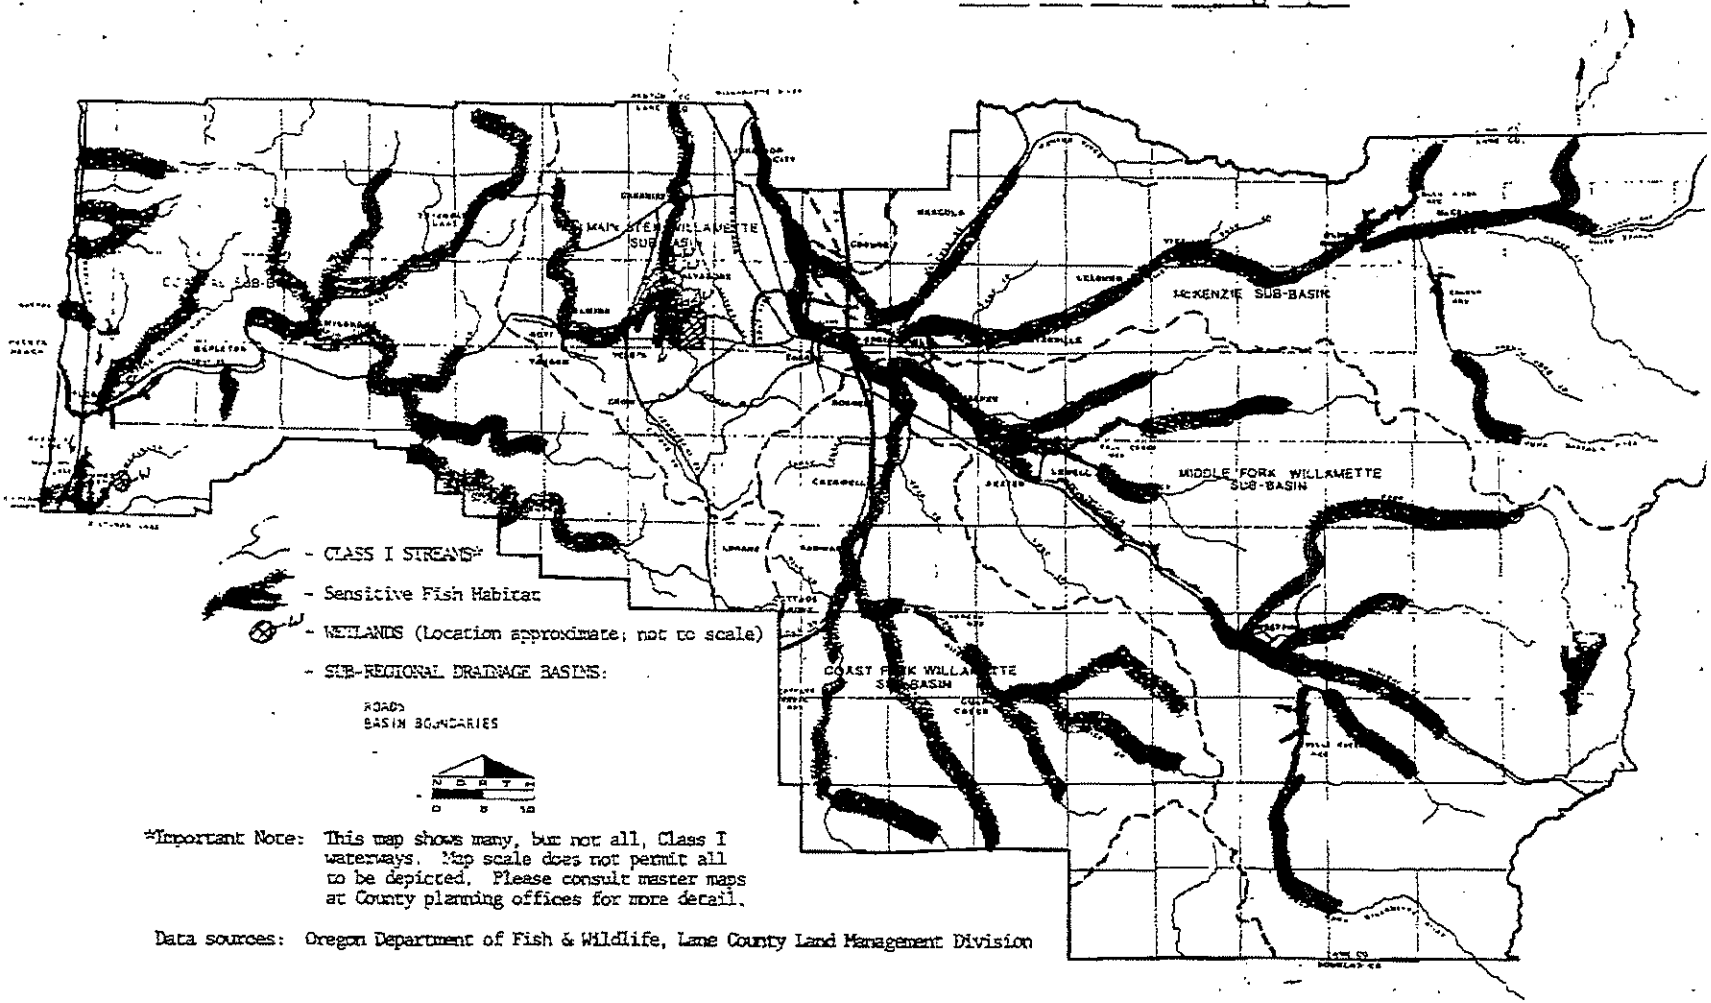
6. Riparian vegetation along all Class I streams is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Maintenance of this vegetation shall be encouraged with setbacks from Class I streams and shall be a consideration in Special Use Permits and Zone Changes.

7. Because of the inadequate inventory in Lane County, freshwater wetlands are being placed in a 1B category (insufficient data existing, per Goal 5 requirements, to decide on preserving the resource or not). When National Wetland Inventory (or equivalent) maps are available for all private lands in the County, these wetlands will be evaluated for quality and quantity as per the Goal 5 administrative rule (OAR 660-16-000). If the wetlands are determined to be significant, they will be evaluated against the rule's standardized set of ESEE (Environmental-Special-Economic-Energy) factors and conflict resolution proposed. This action will take place within one plan update period after the maps are available.

8. Lane County shall rely on the Oregon Forest Practices Act for protection of wildlife habitats and areas on lands zoned for the primary use of commercial growing and harvesting of forest tree species. Such habitats and areas shall include sensitive fish and waterfowl areas, riparian vegetation, wetlands areas, and big game ranges.

9. Sensitive Fish and Waterfowl Areas, as identified in the 1982 Lane County Working Paper on Flora and Fauna, are recognized as the most valuable habitat of their type in the County. Maintenance of riparian vegetation shall be a prime consideration in zoning districts in these areas.

001276



10. Residential building permits issued within Major or Peripheral Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna, shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

11. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna.

12. Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000.

13. If uses are identified (which were not previously identified in the plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

HABITAT DATA SUMMARY: "Revision Report to Flora and Fauna Working Paper"

*Important Note: This map shows many, but not all, Class I waterways. Map scale does not permit all to be depicted. Please consult master maps at County planning offices for more detail.

Re: PA19-05298, NIMPKISH, LLC Template Test Dwelling Special Use Permit, Tax Lot 18-02-11-00-00507

Dear Mr. Darnielle:

I have had the opportunity to review the Additional Material submitted by the Appellants, LandWatch Lane County, and their legal counsel, Mr. Malone in his letter dated November 7, 2019. I have also reviewed the submission by Andrew Mulkey, Rural Lands Staff Attorney for 1000 Friends of Oregon, dated November 7, 2019, offered in support of the appeal made by LandWatch.

Please let me start with addressing the submission of Mr. Malone which fails to introduce anything of substance in the way of additional information worthy of consideration of the appeal.

Mr. Malone offers the overlay map produced from Lane County ArcGis showing that the property, outlined in red, is designated Major Big Game. See his Exhibit A. We do not dispute the inclusion of the subject property in the area designated by Oregon Department of Fish and Wildlife (ODFW) as Major Big Game habitat. The vast majority of F2 zoned land in Lane County falls into some classification of big game habitat as identified by ODFW.

Gary Darnielle
PA 19-05298
Response to Submission of Additional Material by Appellant
November 20, 2019

The issue of protective measures taken for Major and Peripheral Big Game habitat, as discussed in the Flora and Fauna Working Paper and considered in the preparation of the Lane County Comprehensive Plan, which was acknowledged by the Land Conservation and Development Commission (LCDC) in 1984, has been discussed in detail in our previous submissions.

1. Lane County, in adopting the F1 zoning which prohibits the placement of residential improvements, and which encompasses 2,449,775 acres of the total 2,595,131 acres of forest zoned lands in the county, provides a remarkable level of protection for big game habitat. This statistic is cited by LCDC in their acknowledgement of the Comprehensive Plan, previously provided in our submissions. This proposal was met in the acknowledgement process as satisfying the issues raised by ODFW of recommended overall forest density standards of 40 acre and 80 acre minimum parcel sizes in the Peripheral and Major Big Game Habitat recommendations.
2. The provisions of Lane County Code that allow for placement of a dwelling under the strict rules of the Template Test fully comply with the requirements of the acknowledged Comprehensive Plan and acknowledged land use regulations.
3. The consideration of the 40/80 acre recommendations for Peripheral/Major Big Game Habitat are applicable in a request for an amendment to the Comprehensive Plan and a change in zoning that will result in greater density of parcels and dwellings, not in the application of the Template Test for approval of a single dwelling. The Appellants, relying on the Cattoche Case, fail to make this distinction.

With regards to Mr. Malone's concerns over the DOGAMI overlay showing the subject property as being within a "Very High" landslide susceptibility area, his letter of November 7, 2019 effectively defuses the basis of his argument. To quote Mr. Malone:

> "The Natural Hazards Inventory, as contained in the 1982 Natural Hazards Working Paper and associated materials, shall be used as a **guide** for general land use decision. Specific land use decisions shall be based upon inventory and upon **on-site or other evaluation as appropriate.**"
>
> "Here, because this is a specific land use decision, the application must include '**on-site or other evaluation as appropriate.**'... It is therefore, incumbent upon the applicant to **provide expert testimony** to demonstrate that the above comprehensive plan criteria have been satisfied."

My emphasis added

Mr. Malone ignores the testimony offered at the hearing on September 26, 2019 by Michael Remboldt, a Professional Engineer and Geotechnical Expert and principal with K&A Engineering. Mr. Remboldt's on-site inspection of the property and his testimony is summarized in his letter dated October 31, 2019, concluding with the following:

> "Therefore, it is my professional opinion that there is not a significant landslide hazard in the proposed homesite development area, and extensive or drastic safeguards are NOT needed to ensure safety on or off the property with respect to hazards associated with slope movement."

Mr. Remboldt's testimony at the September 26, 2019 hearing, reiterated in his letter of October 31, 2019, meets at every level of inspection the demands made by Mr. Malone for "on-site or other evaluation" and "expert testimony."

The memorandum dated November 7, 2019, authored by Rachel Serslev, Planner with Lane County Land Management Division, makes the concise and accurate assessment of the Goal 7 issue:

> "According to the policies, a land use decision should use the Natural Hazards Working Paper as a *guide* and be based upon inventory and on-site or other evaluations of hazards. For the purpose of evaluation the Oregon State Building Code can be the sole means of safeguard against natural hazards."

Mr. Malone offers as his Exhibit B a slope map that, as he discusses, shows slopes on the subject property exceeding 40%. Mr. Malone refers to these as "steep slopes." In my original response to the objections raised by LandWatch in the opportunity for public comment I noted the term steep is something akin to beautiful, it's in the eye of the beholder. We have acknowledged that there are portions of the property at the north end, substantially removed from the proposed building site, that are in the area of 40% slope.

As noted in the application, the soils of the subject property in the area of the proposed building site are 107C, Philomath silty clay, with slopes that vary from 3% to 12%. These slopes are borne out in the on-site evaluation made by David J. Collier, a registered professional land surveyor in the State of Oregon, where he notes the slopes in the immediate area around the proposed building site as virtually level traversing a downward slope as one moves from the building site to the western boundary of the property where the grade is measured at 18% along that course. This grade results in an increase of the primary fuel break safety zone from 30 feet around the dwelling to 80 feet, as shown in the site plan.

The issue is Lane Code 16.211(5) Siting Standards, Subsection (a): Residences, dwellings and structures must be sited as follows:

> (i) Near dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent (40%).

LC16.211(5)(i) is taken from ORS 217.750(1)(b)(B) "the dwelling will not be sited on a slope of greater than 40%."

Simply put, there are no slopes greater than 40% within 30 feet of the proposed building site. Mr. Malone's letter is the continuing attempt at obfuscation for the application at hand.

The letter dated November 7, 2018 from Andrew Mulkey, and the 47 pages found in his attachments at Exhibit 2 and Exhibit 3 display an incredible lack of knowledge of basic real estate law. Mr. Mulkey argues that the ownership of the subject property in PA19-05298, NIMPKISH, LLC, is the same as the ownership of adjoining parcels by Gray and Dorotea Goodman as husband and wife, title being vested in a tenancy by the entirety. I am enclosing at Attachment A to this letter an informational summary provided by Cascade Title Company, one of the longest standing title insurance companies in Oregon. This summary page offers a concise discussion of the vesting of title to real property. The first three discussion points summarize the ways title can be held by in individual. At the end of the discussion is the summary of "Limited Liability Company (LLC):"

> "This form of ownership is a legal entity and is similar to both the corporation and the partnership. The operating agreement will determine how the LLC functions and is taxed. Like the corporation **its existence is separate from its owners**."

Emphasis added.

While this is a very rhetorical question, would Mr. Mulkey wager his Bar membership on a recommendation to a client to accept a deed for real property executed by individuals, for example, John Smith and Susan Smith, husband and wife, where title to the property is held by Smith Properties, LLC? The obvious answer is "no" as the deed would not convey fee title to his clients. No title insurance company in Oregon would insure the vesting of title executed in such a manner, no reputable escrow company would prepare such a flawed deed.

Mr. Mulkey's position is simply a wish that things should be so, but there is no basis in law for his position. I would expect a first year law school student to be able to make the distinction in

vesting. For Pete's sake, someone seeking to obtain a real estate salesperson's license is expected to have a deeper understanding of title law than that displayed by Mr. Mulkey.

Once the fallacious position that there is a common ownership of the adjoining properties is addressed and set aside the balance of Mr. Mulkey's letter continues to fall apart. Mr. Mulkey asserts "The proposed site plan fails to show the minimum primary and secondary fuel breaks required by state law and lane (sic) code." This is simply untrue. Please review Attachment 2 to the Supplement to PA19-05298. The attachment is the proposed site plan with the overlay of the primary and secondary fuel breaks. Noted on this plan are the grades surrounding the proposed building site and the appropriate fuel break requirements set out in Lane County Code. This site plan is attached at "Exhibit C, Site Plan Approved 6/25/19" to the Notice of Pending Land Use Decision by the Lane County Planning Director, dated 8/2/19, for 509-PA19-05298.

Mr. Mulkey offers the recitation that "fuel breaks must be on land 'owned or controlled by the owner in accordance with the provisions in Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads.'... " The proposed, and accepted, site plan with the fuel break overlay precisely meets this requirement. The fuel breaks depicted are on land owned or controlled by the owner.

Mr. Mulkey goes on to state:

> "A homeowner cannot maintain the vegetation within the fuel breaks to the appropriate standards if the fuel break extends off the property and beyond the owner's control. For that reason the provisions required the landowners to establish fuel breaks on land they either own of control."
>
> – So far, so good. Then Mr. Mulkey's train leaves the tracks. –
>
> "If they do not own the land, the law requires landowners to obtain an easement to ensure their control over the minimum distances."

No, it doesn't.

Mr. Mulkey, I'm going to need to see chapter and verse to support that claim. The law makes no such requirement. To the contrary, the law is quite clear: "fuel breaks must be on land owned or controlled by the owner." There is no requirement to force an adjoining landowner to grant an easement for fuel break measures, nor is there a requirement of a landowner proposing a forest dwelling to obtain such an easement.

Mr. Mulkey attaches at his Exhibit 7, Page 2, the Conditions of Approval made by Lane County in Planning Action 02-5486. In that document he notes a requirement from Lane County for a landowner to "Physically establish the primary and secondary fuel breaks as depicted on the approved Detail Development Plan, Exhibit C and as necessary on the adjoining property in accordance with recorded instrument #2002-031079." He then attaches at his Exhibit 7, Page 6, a copy of that recorded instrument.

While the standards of approval applied by Lane County in 2002 may have required a landowner to obtain an easement from a neighboring landowner for establishment of a fuel break, Mr. Mulkey fails to recite the County Code or Oregon Revised Statute provision that in fact "requires" a landowner to obtain such an easement. That is because no such requirement exists today.

I mention this false statement as I am opposed to such a requirement being established by precedent in this planning action. If Mr. Mulkey can establish the code or statutory requirement for such an easement then we may consider such for future applications as being appropriate, but short of that our objection needs to be noted.

Without wishing to belabor the point, the adjoining landowners, Gray Goodman and Dorotea Goodman (owners of Tax Lot 506), have agreed to grant an easement on their Tax Lot 506 beneficial to Tax Lot 507, the subject property, for establishment of 100 foot secondary fuel break as it may extend onto Tax Lot 506. If the Hearings Official determines that the secondary fuel break is required to extend onto Tax Lot 506 we will have an easement prepared to allow for such an extension, with the provisions of the secondary fuel break appearing similar to that shown in the map at Attachment B to this letter.

Mr. Mulkey makes a statement that is either a total misrepresentation of the code and policy of Lane County or is intended to mislead the reader:

> "The conditions of approval paraphrase the code and give ultimate discretion of how to establish the fuel breaks in compliance with those provisions (LC16.211(8)(c) to the **building department**. Applying the fuel break standards requires a degree of judgment and discretion. The county cannot defer the task of determining the fuel break distances to a future, non-public decision-making process.

My emphasis added.

Mr. Mulkey displays a complete ignorance of how the fuel break provisions are established in the application review process and the final inspections carried out by Lane County, though his

Exhibit 7 is a complete summary of the process in the 2002 application to which he attempts to refer.

In the application process the applicant shows their proposed site plan and depicts fuel breaks around the dwelling that conform to the standards of County Code and State Statute. If the proposal meets such standards, and a multitude of other requirements, the staff issues a conditional approval of the application. Among the conditions of approval is:

> "Physically establish the primary and secondary fuel breaks in compliance with Lane Code 16.211(6)(c) and as depicted on the applicant's site plan. These fuel breaks shall be maintained in perpetuity. The minimum primary safety zone surrounding the proposed dwelling shall be at least 30 feet plus the Additional Safety Zone Down Slope, as applicable. The minimum secondary fuel breaks surrounding the primary safety zone shall be at least 100 feet on lands owned or controlled by the owner." –
>
> See Condition #6 of "Exhibit A Conditions of Approval 509-PA19-05298" attached to the "Notice of Pending Land Use Decision by the Lane County Planning Director" dated 8-2-19.

The Conditions of Approval follow with:

> "9. Upon completion of conditions #2 through #8, the applicant shall complete and submit a Land Use Application form to Verify Compliance with conditions of Approval, with the required processing fee."
>
> Notably, an example of this is Page 4 of Exhibit 7 to Mr. Mulkey's letter.

The Conditions of Approval then (as shown in the subject application, PA19-05298) follow with:

> "10. As part of the Verification of Conditions process, the access road, driveway and fuel breaks must be field **inspected by Planning Office staff** to verify that requirements stated in conditions #4 and #6 have been met...."

My emphasis added

> #11. Upon completion of Verification of Conditions, submit a building permit to verify that the construction of the dwelling meets current Oregon Structural Specialty Code application for the proposed dwelling with the appropriate deposit fee."

Again to Mr. Mulkey's statement:

> "The conditions of approval paraphrase the code and give ultimate discretion of how to establish the fuel breaks in compliance with those provisions to the **building department.**"

My emphasis added. And again, no they do not.

Contrary to Mr. Mulkey's assertion, at no point is "the task of determining the fuel break distances (deferred) to a future, non-public decision-making process." That is a total fabrication of 1000 Friends of Oregon.

The process of establishing the fuel break distances is made on-site by the applicant in his or her assessment of the grade of the subject property and in the initial phases of preparing their plot plan and in determining if the various elements of County Code can be fulfilled. In the case of PA19-05298 the assessment of grade was further confirmed and described by a Registered Professional Surveyor in the State of Oregon.

The site plan with the specific notations of grade and the appropriate fuel break distances was submitted to the County staff for review. Public notice and opportunity for comment was made and eventually public notice of the intent to approve the plan was made and we arrive at where we are today.

When the fuel break provisions are completed by the landowner a representative of the County Land Management Division staff will conduct an on-site inspection of the property to confirm that the conditions of approval have been met (as shown clearly in Mr. Mulkey's Exhibit 7). There is no subjectivity to this final inspection, the fuel break standards as conditionally approved are either met or they are not. 30 feet is 30 feet, 100 feet is 100 feet, this is not a "subjective" evaluation, no interpretation or judgement is being applied at this point. Then, and only then, can the landowner proceed with submitting their application for a building permit and the process of further inspections (such as for foundations and framing, etc.) transfers from the planning staff to the building department officials.

One or more of several things is happening in Mr. Mulkey's letter:

1. Despite his many years of legal representation of LandWatch Lane County and the opportunity to review and evaluate numerous Template Test Dwelling applications in Lane County, Mr. Mulkey fails to understand the process of application, staff review, public notice, decision and verification of conditions by County Staff.

2. Mr. Mulkey chooses to not read or has simply ignored the Conditions of Approval set forth in PA19-05298.
3. Mr. Mulkey is pandering to the Land Use Board of Appeals in misinterpreting their decision in Eng v. Wallowa County (LUBA No. 2018-085) in stretching that decision to somehow imply that Lane County is deferring to some "future, non-public decision making process" the on-site inspection by County Land Management Division Staff in their verification of conditions of approval, an approval that is only achieved after extensive public notice has been provided. This inspection process is not left to an "interpretation or judgment." To the contrary, the physical on-site inspection is carried out with staff members holding measuring tapes and precisely calculating if the fuel break provisions have been met.

If Mr. Mulkey's interpretation of the Eng v. Wallowa County decision is correct, then the question must be asked: Is LUBA saying that when the landowner has completed their fuel break conditions another public hearing must be held to allow public input as to whether the conditions have been met? Is the public to be invited to every parcel of private land to conduct their own site inspection and offer testimony as to whether they believe the standards of approval are satisfied? If this is the box that is being opened, how do we deal with aspects of privacy, safety, liability for injuries, damage to private roads, etc.? Should the "public inspectors" be required to sign indemnity agreements for when their wanderings about and taking of measurements leads them into a ground dwelling hornet's nest, a batch of Poison Oak or a trip over a tree branch leading to a broken arm? While my question moves into the theater of the absurd, I believe this is the position Mr. Mulkey is attempting to make.

The county staff is paid a substantial fee to evaluate an application, solicit public input and prepare an approval or denial, based on the standards of County Code and State Statute with the opportunity for public hearing. In the event of approval a variety of conditions will be made by the planning staff which shall fall to the landowner to complete. When the landowner believes they have satisfactorily completed those conditions another fee will be paid and a member of the planning staff will conduct an on-site inspection to confirm that the conditions have been met, or to deny the verification of conditions and to send the landowner back to the task at hand. That process is depicted in Mr. Mulkey's Exhibit 7 and his discussion of a deferring the "task of determining fuel break distances to a future, non-public decision making process" is simply a figment of his imagination.

Gary Darnielle
PA 19-05298
Response to Submission of Additional Material by Appellant
November 20, 2019

The final decision made by the county that the "applicable wildfire standards are satisfied," is an evaluation of the performance of the applicant to the conditions of approval, not a deferment to a future process that must allow public participation.

Mr. Mulkey concludes his letter with:

> "1000 Friends requests that the hearings official issue conditions of approval that require compliance with an approved site plan that demonstrates compliance with the minimum fuel break standards."

Mr. Darnielle, there is no need for you to issue such conditions of approval, they have already been set forth by the Lane County Land Management Division Staff and the applicant concurs in those conditions.

Thank you for your attention to my comments.

Sincerely,

Jim Belknap

CASCADE TITLE CO.

Title Vesting

Methods of Holding Title in Oregon

Tenancy by the Entirety

Tenancy by the entirety is a form of ownership recognized in Oregon that is available only to legally married husband and wife. The law sees the husband and wife as one person. Therefore, they do not own one-half interests in the property, but each own the entire property. When either spouse dies, the survivor doesn't inherit the decedent's interest, but continues to own the entire property. A tenant cannot will his interest in the property to someone else. If a married couple divorces, they would then automatically hold title as tenants in common, unless their divorce decree stated otherwise.

Tenancy in Common

A tenancy in common is created when two or more people each have an undivided interest in the same property. To have an undivided interest is to be a partial owner of the whole property, not the sole owner of a separate piece of the property. Co-owners have equal rights of possession, but might or might not have equal interests (percentages of ownership. Tenancy in common does not include rights of survivorship. Co-owners can sell or otherwise dispose of their share of the property without regard to the other co-owners.

Not as Tenants in Common, But With Rights of Survivorship

As the wording implies, this creates a survivorship between the vested owners. In the event of one owners death, the property vests in the surviving owner.

Trust*

A trust is an arrangement whereby legal title to the property is transferred by the grantor to a person called a trustee, to be held and managed by that person for the benefit of the people specified in the trust agreement, called beneficiaries.

Partnership*

A partnership is an association of two or more persons who can carry on business for profit as co-owners, as governed by the Uniform Partnership Act. A partnership may hold title to real property in the name of the partnership.

Corporation*

A corporation is a legal entity, created under state law, consisting of one or more shareholders but regarded under law as having an existence and personality separate from such shareholders.

Assumed Business Name*

The term "assumed business name" means one or more words or numerals (or a combination of words or numerals) that a person uses to identify a business or conducts a business under, where the person does not conspicuously disclose the "real and true name" (surname and initials) or each person who is carrying on or conducting the business. If property is held in this manner it must state both the party doing business and the entity, ie, John Q. Smith dba Smith and Sons Realty.

Limited Liability Company (LLC)*

This form of ownership is a legal entity and is similar to both the corporation and the partnership. The operating agreement will determine how the LLC functions and is taxed. Like the corporation its existence is separate from its owners.

Remember: How title is vested has important legal consequences. You may wish to consult an attorney to determine the most advantageous form of ownership for your particular situation.

*In cases of corporate, partnership, LLC or trust ownership, required documents may include corporate articles and bylaws, partnership agreements, LLC operating agreement and trust agreements and/or certificates.

RE: Response Statement in 509-PA19-05298, Nimpkish application for a forest template dwelling

Please accept the following statement for the record on behalf of 1000 Friends of Oregon in the Nimpkish application (509-PA19-05298) for a forest template dwelling on tax lot 507 (map no. 18-02-11-00). Ex 1. Please include 1000 Friends in any subsequent notice of decision and any further correspondence related to this application.

Goal 5

The applicant fails to demonstrate that the code provisions for siting dwellings in the F-2 zone comply with the county's comprehensive plan flora and fauna policy 11 or the minimum density standards described in the Flora and Fauna working paper. ORS 215.750(4)(a); OAR 660-006-0027(6)(a), 660-006-0025(6). The applicant lacks support for its argument that Goal 5 density standards are addressed through zoning. Many parcels within the F-2 zone are less than the 80-acre minimum parcel size (ORS 215.780), and minimum parcel sizes for the zone are not the same residential density standards. Lane County's code does not contain a minimum parcel size for dwellings. *Cattoche v. Lane County*, (LUBA No 2018-109, Opinion, May 22, 2019) (slip op at 18) (slip op at 20) ("We observe that the F-2 zone does not provide a general residential density standard.").

As LUBA explained in *Cattoche*, "[t]he Flora and Fauna Working Paper states that the county will be divided into regions and the county will determine the number of existing residences and the[] 'additional number of residences allowable to still fall within the overall density level.'" (slip op at 19) (quoting Flora and Fauna working paper). The County must either determine a "residential carrying capacity" or rely on the ODFW density standards "whichever is lesser." *Id.* In this case, the county never defined the applicable regions or determined a "residential carrying capacity" figure. If the allowable density "is exceeded, then there is a

conflict and an ESEE analysis is required." *Id.* The recommended ODFW density standards for major big game habitat that is one dwelling for 80 acres.

The comprehensive plan policy 11 applies directly to decisions allow additional dwellings: "Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County." And "[a]ny density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000," referring outdated Goal 5 requirements. OAR 660-023-0000 *et seq*. The applicant has not shown that the additional dwellings allowed on the subject properties and nearby properties comply with the one dwelling per 80-acre ODFW density standards for major big game, nor has the applicant gone through the required ESEE analysis.

The applicant's reference to clustering requirements does not demonstrate compliance with the comprehensive plan density standards referenced in Flora and Fauna policy 11. First, the presence of a clustering provision in the code does not address overall density standards. Nothing the applicant cites indicates that the clustering provisions supplant the density requirements in the comprehensive plan.[1] LC 16.007. The applicant fails to demonstrate that its proposed dwelling does not cause a Goal 5 conflict. Second, the applicant's assertion that creation of the F-1 zone addressed ODFW's concerns about big game is not supported by substantial evidence in the record. Nothing in the comprehensive plan or the zone demonstrates that dwellings in the F-2 zone do not have to comply with the density standard in Flora and Fauna policy 11. As explained in *Cattoche*, Lane County has "adopted an implied interpretation of the Residential Density Standard as requiring only consideration of the subject property." *Cattoche*, (LUBA No 2018-109, Opinion, May 22, 2019) (slip op at 18). If a property in the F-2 zone does not meet the required size for one dwelling per 80-acres, then the fact that the F-1 zone does not allow dwellings does not address the Goal 5 conflict. The applicant cannot ignore the language of the comprehensive plan.

Goal 7

The applicant failed to adequately address landslide hazard. DLCD's recent report on landslide hazards notes that "according to SLIDO 3.4 data (Burns, 2017), 10,335 *deep* landslides have been mapped in Oregon. The mean slope angle is 27 degrees, and 95% of these deep

[1] The applicant also does not address the fact that LCDC's acknowledgement of the 1984 version of the comprehensive plan was appealed, reversed, and remanded. *1000 Friends of Oregon v. Land Conservation and Development*, 305 Or 384 (1988).

landslides occur on 10–45 degree slopes." And, "[a]lso according to SLIDO 3.4, 4,904 *debris flow* type landslides have been mapped in Oregon (Burns, 2017). The mean slope angle is 13 degrees, and 95% of these debris flow type landslides occur on slopes less than 26 degrees." The applicant's review of the landslide potential for the subject property does not address the potential for landslides on slopes greater than 10 percent. The applicant ignores the potential for landslides above the proposed dwelling site, and the applicant ignores the fact that the DOGAMI maps indicate that the existing landslide susceptibility for the property is "Very High." The applicant did not do any type of soils analysis to determine that the DOGAMI landslide potential is wrong.

Sincerely,

Andrew Mulkey
Rural Lands Staff Attorney
1000 Friends of Oregon
(503) 497-1000x138
andrew@friends.org

1000 Friends of Oregon is a non-profit organization founded by Governor Tom McCall shortly after the Legislature passed Senate Bill 100, which created the land use planning rules that shape Oregon's communities. Since its founding in 1975, 1000 Friends has served Oregon by defending Oregon's land use system—a system of rules that creates livable communities, protects family farms and forestlands, and conserves the natural resources and scenic areas that make Oregon such an extraordinary place to live. 1000 Friends accomplishes this mission by monitoring local and statewide land use issues, enforcing state land use laws, and working with state agencies and the Legislature to uphold the integrity of the land use system.

HAND DELIVERED

Gary Darnielle, Lane County Hearings Official
c/o Rachel Serslev, Planner
Lane County Land Management Division
3050 North Delta Highway
Eugene, OR 97408

Re: **509-PA-05298 (Nimpkish LLC)**
Appeal of Director Approval of Template Dwelling in F-2 zone
by Landwatch Lane County
Second Post-Hearing Response Submission

Mr. Darnielle,

Please enter this letter into the record of the above-referenced appeal that I am submitting on behalf of the applicant, Nimpkish LLC., and in support of the Director's decision and findings.

The appellant, Landwatch, through its attorney, Sean Malone, submitted a letter with exhibits, dated November 7, 2019, in opposition ro the Nimpkish template dwelling application. On the same date, Andrew Mulkey, staff attorney for 1000 Friends of Oregon, also submitted a letter with exhibits in opposition to the Nimpkish application. I will respond to both letters and their various exhibits, Mr. Belknap, in a separate submission, has provided a comprehensive response to both letters.

Malone Letter (11-07-19)

Mr. Malone submitted three maps as exhibits with his letter. Exhibit A shows the subject property as being located within Lane County's acknowledged Goal 5 Big Game Range. (Exhibit A). We already know that. Exhibit B depicts the slopes on the property and Exhibit C shows it to be within a County-designated landslide hazard area. Again, we know all about the slopes and the

generalized DOGAMI landslide hazard maps.

Mr. Malone does not provide any new information or analysis. Instead, he launches into LandWatch's well-worn argument that Goal 7 Natural Hazards policies apply directly to this template dwelling application and that ". . . [T]he application must include 'on-site or other evaluation as appropriate'." What Mr. Malone does not acknowledge or mention is that Mr, Remboldt, a registered professional engineer, testified at the hearing on September 26 and followed with a letter dated October 31, 2019, that was submitted as part of our first post-hearing record submission for new evidence.

Therefore, apparently when he wrote his October 7 letter, Mr. Malone had forgotten about Mr. Remboldt's hearing testimony and had not read Mr. Remboldt's October 31 letter which confirmed his September 26 oral testimony at the public hearing that Mr. Malone attended with Ms. Segel. In his letter, Mr. Remboldt concluded:

> "*Therefore, it is my professional opinion that there is not a significant landslide hazard in the proposed homesite development area, and extensive or drastic safeguards are NOT needed to ensure safety on or off the property with respect to hazards associated with slope meovement.*"

Mr. Malone's response to Mr. Remboldt's September 26 testimony and October 31 letter is to state that it is "incumbent upon the applicant to provide expert testimony" and that "[I]n the absence of a qualified geotechnical report . ." and that "the application [be] denied."

After this sequence of events, it impossible to determine what Mr. Malone is trying to argue when he ignores facts and testimony. Did he not read and hear Mr. Remboldt's conclusion, i.e. there is not a landslide hazard in the vicinty of the proposed homesite? Does Mr. Malone reject Mr. Remboldt's opinion and that is why he claims there is an "absence of a qualified geotechnical report"? What is LandWatch's rationale for rejecting Mr. Remboldt's testimony?

At this point, Mr. Malone and LandWatch have got what they asked for, a "qualified geotechnical report". Mr. Remboldt is qualified by degree, license and

experience. If the Goal 7 policies have any applicability to this application, a point that we do not agree with, then they have been fully addressed and satisfied by Mr. Remboldt's report. The building phase is when a specific proposal will be evaluated pursuant to Conditions 11-14 at which time the County Building Department can require an additional geotech report. *See* Attachment 3 to September 19, 2019 Staff Report.

Finally, in footnote 1, Mr. Malone claims that the County's template dwelling provisions are unacknowledged. Mr. Malone does not offer any explanation for this law-defying fact that he claims Lane County was able to accomplish; that being to adopt new forest zoning regulations without obtaining LCDC's blessing in the well-worn acknowledgment process. Again, Mr. Malone and LandWatch are engaging in idle speculation and wishful thinking rather than thoughtful legal analysis. Mr. Malone's letter offers nothing of substance.

Mulkey Letter (11-07-19)

Mr. Mulkey submitted seven exhibits (1-7) with his letter ranging from maps and real property records for the subject property and adjacent properties to a 1991 ODF Fire Siting Standards pamphlet. There is nothing in these documents that relates specifically to the relevant criteria in LC 16.211(5) and (8). The property records confirm what we already know: Nimpkish, LLC owns Tax Lot 507, the subject property, and no other contiguous property. Mr. Mulkey also confirmed the lawful existence of Nimpkish, LLC and that its two members are Gray and Dorotea Goodman.

Using this information, Mr. Mulkey asserts: (1) "The County cannot approve multiple forest template dwellings on a tract" and (2) "The County cannot ignore the minimum fuel break standards." I will address each allegation separately.

"The County cannot approve multiple forest template dwellings on a tract"

Standing alone, Mr. Mulkey's statement is true since it simply reflects ORS 215.750(4)(c) and (d). Mr. Mulkey goes further however, and argues that a "tract" exists in these circumstances because it includes the Nimpkish-owned parcels (Tax Lots 507 and 508) and those owned by Gray and Dorotea Goodman, individually, (Tax Lots 501, 506 and 509). Mr. Mulkey cites the definition of "Tract" in ORS

215.010(2) as:

> ". . . one or more contiguous lots are parcels under the same ownership."

Mr. Mulkey's unsubstantiated and vacuous conclusion does not address basic real property law or the difference between "under the same ownership"as used in the definition of "tract" and "controlled by the owner" as used in Lane Code fuel break siting standards. LC 16.211(8)(c)(i) (". . . owners . . . Shall maintain . . . fuel break on land surrounding the dwelling . . . that is owned or controlled by the owner . . ." emphasis supplied). "Under the same ownership" and controlled by "owner" are two very distinctive legal positions.

"Owner", for purposes of real property law and without any additional qualifer, is the person or entity that received a deed for the dirt, i.e. fee simple title.[1] In this case, Nimpkish, LLC, was granted fee title to the subject property by a deed signed by Gray and Dorotea Goodman. *See* Attachment 1. In order for Nimpkish to convey fee title for the subject property, Nimpkish LLC would have to be the grantor, not Gray and Dorotea Goodman. The Goodmans, individually, cannot convey fee title to the subject property because they do not "own" the dirt. Instead, they "own" paper (articles of organization) that establishes they own a legal entity, Nimpkish, LLC, that does own fee title to the dirt in the subject property. ORS 63.239. It is personal property. Id.

There are no qualifiers like for the term "ownership" as used in the definition of "tract". Ownership can only be fee title ownership of the dirt. It is the full "bundle of sticks" that Nimpkish owns while the Goodmans own the Nimpkish basket into which that bundle is placed. The Goodmans own the Nimpkish basket, not the bundle of ownership sticks that are placed in that basket. Pardon the analogy but there is a very real legal difference in who the owner is as between an LLC and individuals.

---

[1] Chapter 16 does not define "owner" or "ownership" and in the absence of such, relies on *Webster's Third International Dictionary of the English Language*, Unabridged, Copyright 1981, Principal Copyright 1961. That dictionary defines "owner", in part, as: "one that owns: one that has the legal or rightful title whether the possessor or not".. "ownership" is the noun and is "the fact of being the "owner".

(2) "The County cannot ignore the minimum fuel break standards"

Neither the County nor the applicant are ignoring the fuel break standards. Rather, they are being meticulously followed and graphically displayed by Mr. Collier on the applicant's site plan. Mr. Belknap's accompanying letter goes to great length in refuting Mr. Mulkey's arguments in this section and I will not repeat those here.

The important part is that the Goodmans, as the adjoining owner, have agreed to grant a secondary fuel break easement for the benefit of the subject property that is owned by Nimpkish, LLC. We do not believe "under the control" legally requires the Goodmans to grant such an easement as it extends on to Tax Lot 506 but they have elected to do voluntarily.

Finally, Mr. Mulkey cites several cases beginning with *Eng v. Wallowa County*, ____Or LUBA ____ (LUBA No. 2018-085, Sl Op, May 7, 2019) for the proposition that determining the fuel break distances at a "future, non-public decision-making process is inappropriate." We would agree except that Mr. Mulkey has before him the fuel break area that is measured, scaled and identified on a site plan. Mr. Mulkey does not dispute those facts but, instead, apparently believes a public hearing should be held when the County staff goes on to the subject property to measure the distances and view the site clearing.

That, of course, is ridiculous because those tasks are routinely performed by the staff after a public process has been provided to determine whether compliance with the conditions is "feasible". *Rhyne v. Multnomah County*, 23 Or LUBA 442-447 (1992). In stark contrast to the present case, in *Eng*, the county blatantly acknowledged that compliance with its wildfire standards would be satisfied at a future, non-public date. *Eng* at 36. Unlike *Eng*, we are determining compliance with fuel break standards at this time.

LandWatch and 1000 Friends do not challenge our site plan and identified setback areas. Condition 6 requires the applicant to "[P]hysically establish the primary and secondary fuel breaks" as depicted on the site plan and including the area of the secondary fuel break located on the adjacent property owned by the Goodmans. These fuel breaks will be field verified by County staff before a building permit is issued. The condition is clear and objective. There is no

discretion. *See Gould v Deschutes County*, 227 Or App 601, 612 (2209); *Northgreen Property LLC v City of Eugene*, 65 Or LUBA 83 (2012).

Conclusion

To date, neither LandWatch or 1000 Friends have offered any substantive facts, arguments or legal analysis to support reversal of the Director's approval and conditions. Their blatant disregard of testimony provided by the applicant is confirmation of the emptiness of their position. We urge you to affirm that decision.

Sincerely,

Michael E. Farthing

Re: LandWatch testimony in opposition to Request for Template Dwelling in the F-2 zone, 509-PA19-05298 (Nimpkish).

On behalf of LandWatch Lane County, please accept this testimony in support of the appeal and in opposition to the application described above.

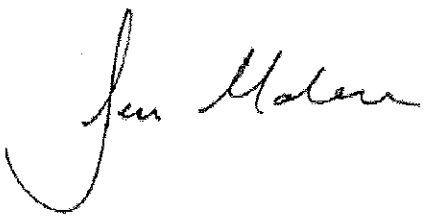
Attached is an overlay map produced from Lane County ArcGIS showing that the property, outlined in red, is designated as Major Big Game. *See* Exhibit A.

As indicated by Exhibit B (slopes map) and Exhibit C (landslide susceptibility map), the subject property contains steep slopes (exceeding 40%) and the property is entirely within the "very high" landslide susceptibility category, as represented by the dark red on the map. Pursuant to OAR 660-006-0025(6) and ORS 215.750(4)(a) the applicant must satisfy relevant comprehensive plan criteria for Goal 7. *See* OAR 660-006-0025(6) ("[n]othing in this rule relieves governing bodies from complying with other requirements contained in the comprehensive plan or implementing ordinance such as the requirements addressing other resource values (e.g., Goal 5) that exist on forest lands."); ORS 215.750(4)(a) (template dwelling not permitted "[i]f it is prohibited by or will not comply with the requirements of an acknowledged comprehensive plan and acknowledged land use regulations or other provisions of law"). Lane County Rural Comprehensive plan policies related to hazardous areas include Goal 7 policies 1, 2, and 3, which provide as follows:

> "1. The Natural Hazards Inventory, as contained in the 1982 Natural Hazards Working Paper and associated materials, shall be used as a guide for general land use decision.

Specific land use decisions shall be based upon inventory and upon on-site or other evaluation as appropriate.

2. Development shall be commensurate with the type and degree of any natural hazard(s) present and appropriate safeguards against flooding, ponding, landslides, land slippage, erosion or other natural hazards applicable shall be assured. For purposes of evaluation and in the absence of any specific proposal, the provisions of the Oregon State Building Code shall be assumed to [be] the sole means of safeguard[ing] against natural hazards.

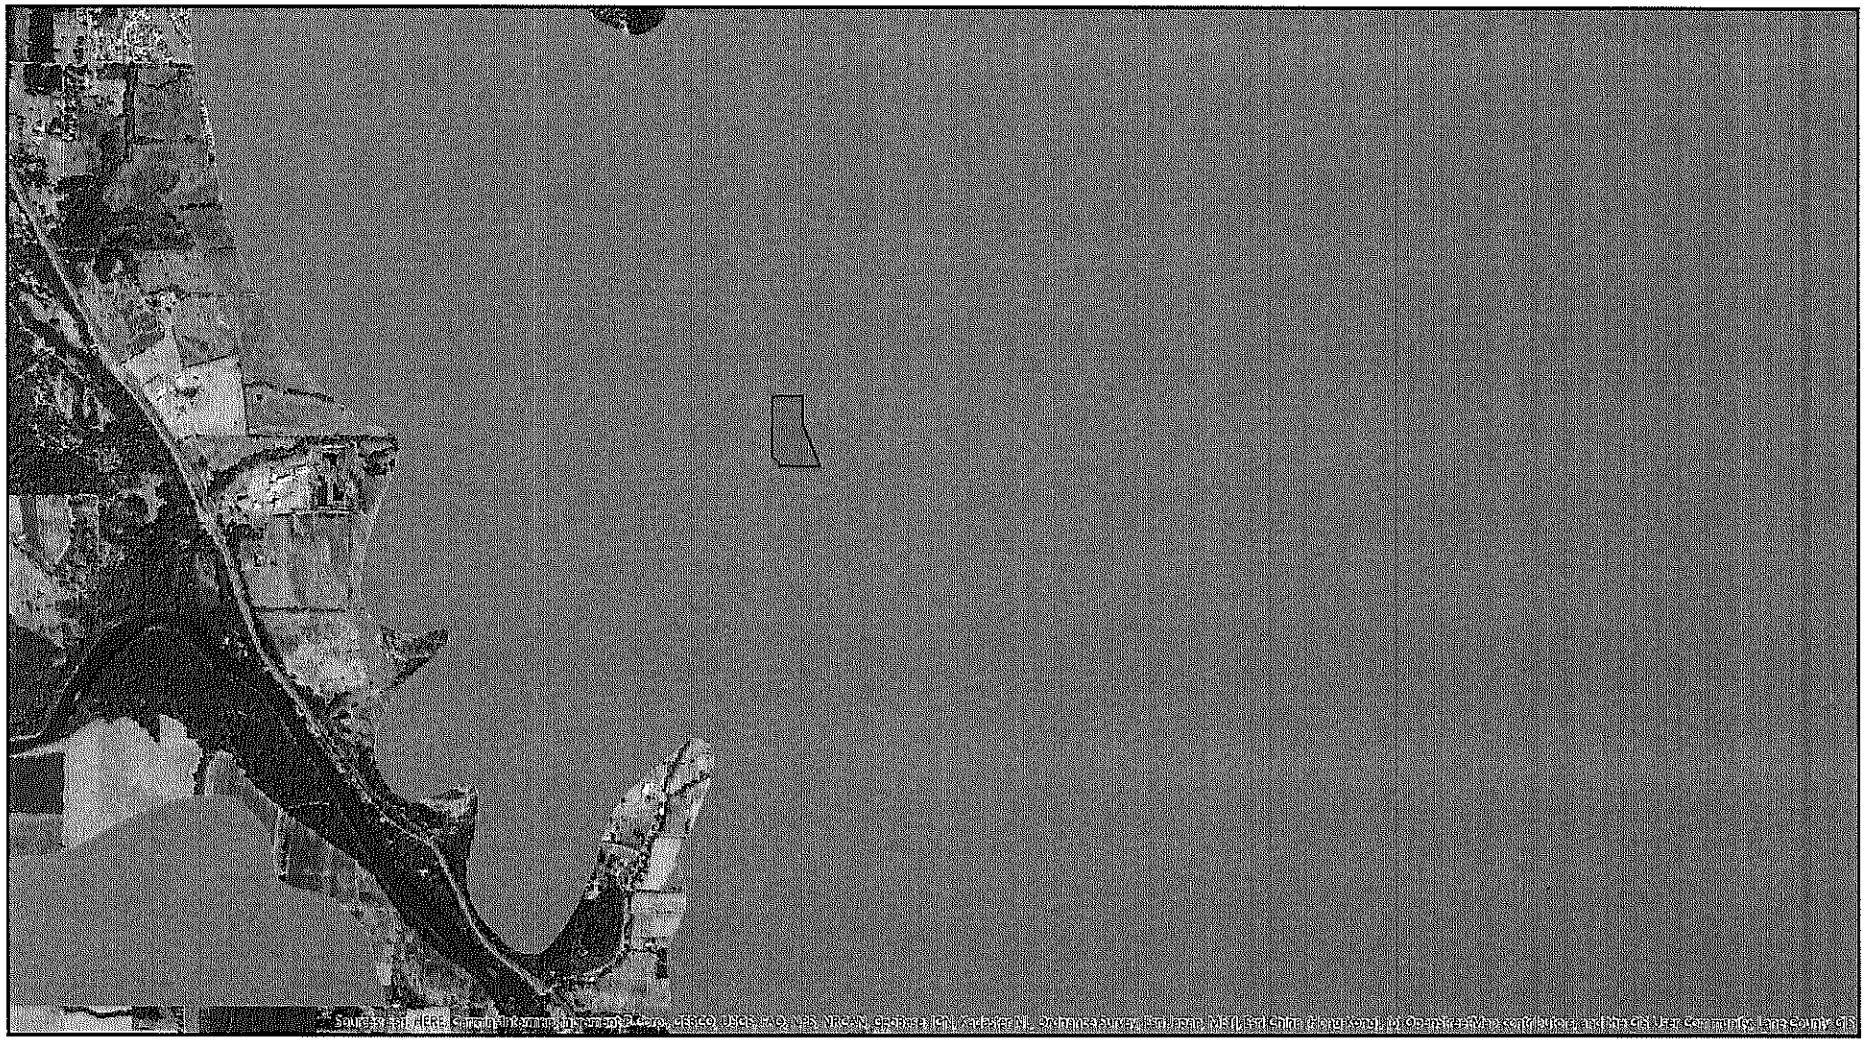


3. When extensive or drastic safeguards must be employed in conjunction with development proposals, the immediate and ultimate impact, (including financial and economic considerations) of such safeguards on the environment and the public shall be considered."

Here, because this is a specific land use decision, the application must include "on-site or other evaluation as appropriate." Moreover, the development should be limited to the degree it is "commensurate with the type and degree of any natural hazard(s) present and appropriate safeguards against … landslides, land slippage, erosion or other natural hazards applicable shall be assumed." Finally, because of the steep slopes and the highest rated landslide susceptibility, it is apparent that "extensive or drastic safeguards must be employed in conjunction with development proposals. It is, therefore, incumbent upon the applicant to provide expert testimony to demonstrate that the above comprehensive plan criteria have been satisfied.[1]

In the absence of a qualified geotechnical report, as well as compliance with all other relevant criteria, I respectfully request that the decision of the Planning Director be reversed and the application denied.

[1] It is also relevant that Lane County's Rural Comprehensive Plan was last updated in 1984 and the template dwelling statute was promulgated in 1993. This means that, as it relates, to template dwelling approvals, the County Comprehensive Plan has not been acknowledged. As such, Goal 7 should apply directly, including the requirement that "[w]hen reviewing development requests in high hazard areas, local government should require site-specific reports, appropriate for the level and type of hazard (e.g., hydrologic reports, geotechnical reports or other scientific or engineering reports) prepared by a licensed professional. Such reports should evaluate the risk to the site as well as the risk to the proposed development may pose to other properties." Goal 7, Implementation Policy 4.



Sincerely,

Sean T. Malone
Attorney for LandWatch Lane County

MEMORANDUM

To: Gary Darnielle, Lane County Hearings Official

From : Rachel Serslev, Planner

Date: November 7, 2019

Re: Appeal of Application File No. 509-PA19-05298

As staff expressed in their report to the Hearings Official (dated September 19, 2019), Rural Comprehensive Plan (RCP) Goal 7 does not apply directly to a template dwelling approval. Staff's understanding of the approval criteria is that Lane Code 16.211(5) and (8) apply to template dwelling approvals and these code sections do not explicitly require compliance with RCP Goal 7 policies.

According to the policies, a land use decision should use the Natural Hazards Working Paper as a *guide* and be based upon inventory and on-site or other evaluations of hazards. For the purpose of evaluation, the Oregon State Building Code can be the sole means of safeguard against natural hazards.[1]

To the extent that the RCP Goal 7 policies are relevant, it is staff's position that the land use decision process adequately addresses and satisfies these policies without them being explicit approval criteria of the land use decision. Staff did consult with County Counsel regarding this position and Counsel concurred that the Goal 7 policies should not be applied as approval criteria.

Specific to department file No. 509-PA19-05298, the land use decision considers Department of Oregon Geology and Mineral Industries (DOGAMI) inventory of landslide hazards. The applicant also provided a site specific survey completed by a Professional Registered Land Surveyor demonstrating the slopes of the subject property. Based on the inventory and the site specific survey, staff notified the applicant through an informational condition of approval that a geotechnical engineer's report may be necessary when a building permit for the structure is sought. At the time of building permit, the decision to require a geotechnical report is based on clear and objective standards regarding slopes that are located in the Oregon State Building Code.

The Oregon Structural Specialty Code (OSSC) provides the authority to assess the soils and slopes at the building site, and to require a geotechnical report if necessary. **Attachment 3** of staff's report to the Hearings Official provides guidance regarding when a geotechnical report is required in conjunction with building permit submittals.

---

[1]Excerpt from the Lane County Rural Comprehensive Plan:

GOAL SEVEN: AREAS SUBJECT TO NATURAL DIASTERS AND HAZARDS

1. The Natural Hazards Inventory, as contained in the 1982 Natural Hazards Working Paper and associated materials, shall be used as a guide for general land use decisions. Specific land use decisions shall be based upon inventory and upon on-site or other evaluation as appropriate.
2. Development shall be commensurate with the type and degree of any natural hazards(s) present and appropriate safeguards against flooding, ponding, landslides, land slippage, erosion or other natural hazards applicable shall be assured. For purposes of evaluation and in the absence of any specific proposal, the provisions of the Oregon State Building Code shall be assumed to the sole means of safeguard against natural hazards.

Re: PA19-05298, NIMPKISH, LLC Template Test Dwelling Special Use Permit, Tax Lot 18-02-11-00-00507

Dear Mr. Darnielle:

I am writing to address a number of points raised by the Appellant, LandWatch Lane County, and their attorney, Sean Malone, with regards to the appeal of the above referenced Planning Action.

On October 3, 1984 the Lane County Comprehensive Plan was acknowledged by the Land Conservation and Development Commission (LCDC). Incorporated into the acknowledgement of the Comprehensive Plan were Goals 5 and 7, referenced by Mr. Malone in his letter dated September 26, 2019 with specific reference to the Flora and Fauna Working Paper, upon which portions of the Comprehensive Plan were based.

At the acknowledgement of Lane County's Comprehensive Plan in 1984 was the establishment of two specific classifications of forestland zoning: The F1 zoned land was defined as "Non-Impacted" forestland, and had no provisions for placement of a dwelling, the F2 zoned land was defined as "Impacted" forestland and allowed dwellings under a variety of approval processes. At the time of the Comprehensive Plan Acknowledgement the specific minimum parcels sizes in the F2 zoned area varied from 20 acres to 64 acres based on a soils analysis process.

Gary Darnielle
PA 19-05298
Submittal of Additional Information
November 6, 2019

With the passage of House Bill 3661 in 1993 the minimum parcel size of 80 acres was adopted for all forestland zoned designations and that standard remains in place today. This 80 acre standard is applicable to all proposed divisions of forestland zoned tracts, a distinct difference from the approval criteria for placement of a dwelling.

What must be considered is that the F2 zoning replaced a previous effort on the part of Lane County to manage smaller tracts of mixed agricultural and forestland uses, that zoning was identified as Farm-Forest 20 (FF-20), having a minimum parcel size of 20 acres. With a virtual all-encompassing stroke of the brush, acknowledged by LCDC, land that had been previously zoned FF-20 became zoned F2. While there were notable exceptions with a very few parcels being zoned Rural Residential (RR), a slightly larger number of parcels zoned Exclusive Farm Use (EFU) and additional lands re-zoned to F1, the application of the F2 zoning was sweeping across the former FF-20 zoned lands.

Attached at Exhibit A is the "Land Conservation and Development Commission Acknowledgement of Compliance, Lane County, Dated September 13, 1984." It is this document, the acknowledgement of the Lane County Comprehensive Plan, that establishes the framework for the Lane County Code and meets the criteria set by the State of Oregon for land use decisions.

Under Goal 4: Forest Lands, Requirement 3, the State sets forth on page 19 to 20:

"Amend the County zoning map by rezoning private non-industrial ownerships capable of commercial forest management (including forested portions of commercial farm-forest operations) currently zoned F-2 with an appropriate resource zone. An acceptable forest zone is the F-1 zone or forest zone containing a minimum lot size of at least 80 acres as justified by the County's 'Forest Working Paper Addendum.'

Also, where the County can justify such a decision, the County may apply the marginal lands zone or rural residential zones to 'committed' or nonresource lands."

The acknowledgement document goes on with the Lane County Response on page 20:

"(b) To substantially limit any adverse impacts upon commercial forest management which might result from land **divisions** and subsequent residential development (accessory and necessary to commercial forest management) a minimum area of 80 acres shall be required for the **division** of large forest tracts:

(i) Zoned F-2
(ii) Containing at least 160 acres
(iii) For the creation of lots or parcels adjacent to F-1, RCP zone lands"

Emphasis added

The Conclusion of Section 3 as set forth in the acknowledgement document is:

"Lane County has satisfied this requirement.

The County has amended its zoning map, through the rezoning of some lands previously zoned F-2, in a manner consistent with this requirement. With the elimination of 56,080 acres from the F-2 zone, the County's current application of the F-2 Zone is more representative of the ownership patterns within areas where non-commercial forest management and other non-resource activities occur."

The effect of the acknowledgement of the F2 zoning and the eventual adoption of the 80 acre minimum parcel size was to essentially "lock in place" the number of parcels that existed on October 3, 1984. While provisions existed to partition or subdivide F2 zoned land, the reality was for any lawful division to take place the originating base parcel would have to exceed 160 acres as statute and code prohibited the creation of a substandard parcel, i.e. less than 80 acres in size. This standard remains in place today and the actual event of partitioning or subdividing F2 zoned land is a rare occurrence; as it has occurred no parcel smaller than 80 acres has been created.

As the term "density" is being used in this discussion, perhaps it is appropriate to consider the meaning of that term.

> Density: "The quantity per unit volume, unit area, or unit length: as **a**: the mass of a unit of a substance per unit volume **b**: the average number of individuals or units per space unit." Webster's Seventh New Collegiate Dictionary, 1969.

In the discussion of density, as it is applicable to Lane County, it must be considered that the "unit area" is all forestland zoned lands of the county. The number or quantity of "units" within that space area is the number of parcels that exist.

In making this statement I use the term "parcel" as synonymous with that of "lawfully created unit of land" as that term is defined in Oregon Statute:

> *(1) The terms defined in ORS 92.010 shall have the meanings given therein, except that "parcel":*
>
> *(a) Includes a unit of land created:*
>
> *(A) By partitioning land as defined in ORS 92.010;*
>
> *(B) In compliance with all applicable planning, zoning and partitioning ordinances and regulations; or*
>
> *(C) By deed or land sales contract, if there were no applicable planning, zoning or partitioning ordinances or regulations.*
>
> *(b) Does not include a unit of land created solely to establish a separate tax account.*

In Lane County the term "Legal Lot" is used in describing a lawfully created unit of land. The definition of a Legal Lot, or lawfully created unit of land, is relevant to the discussion of the elements

of this appeal in that ORS 92.017 sets forth "A lot or parcel lawfully created shall remain a discrete lot or parcel, unless the lot or parcel lines are vacated or the lot or parcel is further divided, as provided by law."

Lane County recognizes three areas as being subject to "applicable planning, zoning or partitioning ordinances or regulations" those areas being the Eugene-Springfield Urbanizing area having an effective date of May 2, 1962; the Cottage Grove Urbanizing area, having an effective date of July 3, 1970; and the remainder of Lane County having an effective date of March 26, 1975.

In effect, the lawfully created units of land that existed on October 3, 1984, the date of acknowledgement of the Comprehensive Plan, were those that existed for most of Lane County in 1975. To that number one can add the addition of parcels that were created by partition or subdivision until 1993 to arrive at the number of individual units that exist within the F1 and F2 zoned area of Lane County. Certainly, this is the case for the subject property and the surrounding area. In the F2 zoned areas such lawfully created units of land became subject to the approval criteria in place under the Comprehensive Plan as it allowed for residential improvement.

The significance of the chronology of events is the number of parcels we see today in F2 zoned land is effectively the same number of parcels that were in existence in 1993 when the 80 acre minimum parcel size was adopted. The matter of density, the quantity per unit volume, was established and approved by LCDC with the acknowledgement of the County's Comprehensive Plan.

It must be noted that the criteria for placing a residential improvement was distinctly different in 1984 than it is today, that change occurring with the adoption of the Template Dwelling Test in 1993 as outlined in ORS 215.750.

To this point, it was in 1983 when the Oregon Department of Fish and Wildlife (ODFW) submitted their comments to the Lane County Flora and Fauna Working Committee, recommending the establishment of 40 acre or 80 acre minimum parcels, based, respectively, for area within the Peripheral or Major Big Game Habitat. The recommendations made by ODFW were clearly based on the belief that every parcel could be approved for placement of a dwelling and a presumption that such an event would happen. Again, the approval process for a dwelling was substantially different than that found after 1993 with the adoption of the Template Test process.

Referring again to the attached Exhibit A, the "Land Conservation and Development Commission Acknowledgement of Compliance, Lane County, Dated September 13, 1984," Goal 5, Open Spaces,

Scenic and Historic Areas, and Natural Resources, it is notable to review on page 25 and page 26 the Requirement:
"2. Fish and Wildlife Habitat:

d. Amend the F-2 and EFU zones to carry out the intent of Flora and Fauna Policy 11. Specifically, the zones must either require larger minimum lot sizes in the Big Game Habitat portions of these zones, or contain clustering requirements in those areas."

The Response from Lane County was as follows:
"Lane County has added the following new language to both the F-2 and EFU Zones:

'(a) The Approval Authority shall balance the setback standards of LC211(8)(a) with the siting requirements and application approval criteria specified elsewhere in LC 16.211 in order to minimize adverse impacts upon forest uses and to assure optimal siting of proposed residences consistent with the purposes the F-2 [EFU] Zone.

(i) Residences to be sited upon tracts located within a big game range as designated by the Department of Fish and Wildlife shall be sited as follows:

(aa) Near residences on other tracts.

(bb) With minimal intrusion into forest areas undeveloped by nonforest uses.

(cc) Where possible, when considering LC16.211(8)(a)(i)(aa) and (bb) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU"

The Land Conservation and Development Commission responded with the following:

"Conclusion
Requirement 2d has been met."

These standards remain in Lane Code and are applicable to any party wishing to seek approval of a dwelling in the F2 Dwelling Template Test development process. The application form for such a dwelling requires the applicant to address these exact criteria.

Before I conclude my discussion of the "Land Conservation and Development Commission Acknowledgement of Compliance, Lane County, Dated September 13, 1984" I would like to draw attention to page 22, "Conclusion – Goal 4"
"Lane County complies with Goal 4.

Lane County's approach to conserving forest lands contains some plan policy and ordinance provisions unique to Lane County. **The strength of their forest lands conservation program is the F-1 zone which prohibits the siting of all dwellings** (other than those required to be authorized by state statutes). This zone is applied to 2,449,775 acres of Lane County's forest lands.

Emphasis Added

The County's F-2 zone is applied to 145,356 acres of privately owned lands which consist generally of large lot rural residential parcels, nonproductive or marginally productive resource lands, or underutilized resource lands. Lands zoned F-2 are generally located adjacent to or near developed urban or rural areas and well travelled transportation routes; all of which have an impact on the commercial management of forest lands.

In the F-2 Zone, the County requires that before a permanent dwelling is sited on forest land, assurances are obtained that forest production on the lot will be enhanced by active forest management."

This final statement predated the adoption of the Template Test requirements now found in ORS 215.750 and related to a dwelling approval process involving the demonstration of an "accessory and necessary" standard for dwelling placement. Again, the "accessory and necessary" standard has long since been abandoned in Lane County.

The essence of this quoted passage on page 22 is the comparison of the total forestland base of 2,595,131 acres (2,449,775 + 145,356 = 2,595,131), establishing the "unit area," for a density evaluation of lands that are zoned for forest uses. The evaluation of density is then completed in the application of the F2 zoning to 145,356 acres, and the lawfully created units of land within that 145,356 acres (the "number of units within the unit area") where a dwelling may be placed if all other criteria are met. It is within this analysis that the discussion of "density" needs to occur. The Appellants fail to make this analysis.

The adoption of the Template Test is applicable only in F2 zoned land. Michael Farthing, legal counsel for the applicants in PA 19-05298, has provided letters from James Mann, former Principal Planner for Lane County, dated October 16, 2019 and Kent Howe, former Lane County Director of Planning, dated October 14, 2019, discussing the adoption of the F2 zoning in the final approval of the Lane County Comprehensive Plan. In Mr. Howe's letter it is noted that the area of F1 zoning comprised 84% of the lands in Lane County, a zoning that prohibited the placement of residential improvements. Contrary to the assertions made by the Appellants in this matter, the adoption of the Lane County Comprehensive Plan fully conforms to the recommendations of ODFW and the provisions of Goal 5.

Gary Darnielle
PA 19-05298
Submittal of Additional Information
November 6, 2019

The Appellants argue that the approval of PA19-05298 violates Section 11 of Goal Five of the adopted Comprehensive Plan for Lane County:

"Oregon Department of Fish and Wildlife recommendations on ***overall*** residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County."

Emphasis added

As discussed in detail, the overall residential density was intended to be considered for all forestland zoned areas of Lane County, inclusive of lands that were ultimately zoned F1 and F2.

The final adoption of the F1 and F2 zoning in 1984, and its acknowledgement by LCDC, addressed the concern by ODFW that every forestland parcel would be approved for residential improvement. In reality, as discussed by James Mann and Kent Howe, 84% of the zoned lands in Lane County, being zoned F1, specifically disallows placement of a dwelling. The remaining 16%, zoned F2, had provisions that allowed for dwellings with requirements for clustering of such dwellings "near residences on other tracts" and "with minimal intrusion into forest areas undeveloped by non-forest uses." As the Template Test process was adopted in 1993 those standards remained applicable and have continued in place in Lane County for 35 years, and were applicable and adhered to in PA19-05298. The rigid standards of the Template Test have eliminated the ability of many F2 zoned tracts to qualify for dwelling approval, though such parcels might have readily qualified prior to 1993.

The issue of "density" as the Appellant attempts to argue, conflates the number of residences with the number of parcels in a specific area. Again, this conflation stems from the original ODFW position that every forestland zoned tract of land would be assumed to allow for placement of a dwelling. As has been noted in previous decisions by the Lane County Hearings Official (notably the Betz decision in PA 17-05951) the consideration today of the Flora and Fauna Working Paper, and it's adoption into Goal 5 supporting the 40 acre/80 acre standard of Peripheral/Major Big Game Habitat, is applicable to a request for a change in zoning to allow smaller parcels and greater density of units of land as well as the outright approval for residential improvements. The presumption being made that each unit of land will qualify for placement of a residence, a presumption that cannot stand the application of the Template Test standards.

The Appellants fail to establish that the addition of dwellings as allowed in the Template Test requirements and limited to F2 zoned lands violates the density, the number of parcels with approved dwellings per the total of all forestland zoned tracts within the county. No evidence is submitted by the Appellants that the total of all forestland zoned property within Lane County, broken down to Major Big Game habitat and Peripheral Big Game habitat, with each respective area

then divided by the number of parcels with dwellings, is in violation of the ODFW recommendations and the findings of the Flora and Fauna Working Paper as to density. Certainly the Appellants present no evidence that the approval of a single additional dwelling, as has been made in PA19-05298, violates the density recommendations of ODFW in the overall residential density of all forestland in Lane County.

The Appellants rely heavily on a Land Use Board of Appeals (LUBA) decision, Cattoche v. Lane County, LUBA No. 2018-109, May 22, 2019, that reviewed critically the approval by Lane County of a Plan Amendment and Zone Change to rezone land from F2 to Rural Residential, and an accompanying change in parcel density that would result from a change of a minimum parcel size of 80 acres (F2) to 5 acres (RR). Without arguing the merits or deficiencies of the decision in LUBA No. 2018-109, the comparison of that decision to the one being made in the approval of PA19-05298 is flawed.

In the approval of PA19-05298 no new parcels have been created, no greater density of units has been established, the "lawfully created unit" of land that existed on March 26, 1975 remains that today, the criteria for placement of a dwelling meets the rigorous standards of the Template Test and those standards comply with the density recommendations for protection of big game as discussed in Section 11 of Goal Five of the Lane County Comprehensive Plan.

The objections raised by the Appellant in the opposition to PA19-05298 based on a violation of Goal 5 and a breach of the density objectives set forth by ODFW in forestland zoned areas of Lane County are without merit and the conclusion must be to deny any finding of error on the part of the Lane County Land Management Division staff.

In addition to the objections raised under Goal 5 of the Comprehensive Plan the Appellants also argued the approval of PA19-05298 violated Goal Seven: Areas Subject to Natural Disasters and Hazards, specifically Section 2 –

"Development shall be commensurate with the type and degree of any natural hazard(s) present and appropriate safeguards against flooding, ponding, landslides, land slippage, erosion or other natural hazards applicable shall be assured. For purposes of evaluation and in the absence of any specific proposal, the provisions of the Oregon State Building Code shall be assumed to be the sole means of safeguard against natural hazards."

At the hearing on September 26, 2019, it was pointed out the approval of PA19-05298 by Lane County included the following comment:

"The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:

14. The entire property, according to DOGAMI, is within a 'Very High' landslide susceptibility area and contains landslide deposits. These designations may require a geotech report with the submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 for more information."

At that hearing we argued that the requirement by Lane County to provide a geotech report with the submittal of a building permit application met the criteria set forth in Section 2 that the provisions of the Oregon State Building Code adequately safeguarded against natural hazards.

As was noted at the hearing, this comment was considered lacking, though testimony by Michael Remboldt, a professional engineer specializing in geotechnical engineering, was offered to discuss the implication of the DOGAMI listing. It was suggested that Mr. Remboldt's comments, or other testimony from a geotechnical engineer, geologist or other expert be put into writing and submitted into the record. Enclosed at Exhibit B is a letter dated October 31, 2019 from Michael Remboldt, PE, GE, principal engineer for K & A Engineering, Inc. It must be noted that Mr. Remboldt summarizes his evaluation of the subject property with the following:

"Therefore, it is my professional opinion that there is not a significant landslide hazard in the proposed homesite development area, and extensive or drastic safeguards are NOT needed to ensure safety on or off the property with respect to hazards associated with slope movement."

Addressed at the September 26, 2019 hearing was an additional objection raised by the Appellant: A factually untrue statement that a dwelling did not exist on Tax Lot 18-02-11-00-00601 on January 1, 1993. This objection has been previously raised in an earlier appeal of a Template Dwelling (PA17-05951). In the appeal of that Planning Action the county staff noted the dwelling in question had originally been placed in 1982 under Mobile Home Placement Permit 81-2367. Subsequently the dwelling was replaced under a Verification of Replacement Rights approved in PA98-05159. The appeal of PA17-05951 was denied. In the application that is the subject of the current appeal, the applicant noted these permits in establishing the qualification of the dwelling on Tax Lot 601 to be considered in the dwelling count of the Template Test.

Additionally, we are reiterating the point made at the September 26, 2019 hearing that the Staff Report confirmed a total of five (5) dwellings as being located within the template. While not conceding in any way that the dwelling on Tax Lot 601 does not meet the "existing on January 1, 1993" standard, a finding of such would not preclude the subject property from meeting the 3 dwelling requirement of the Template Test.

Gary Darnielle
PA 19-05298
Submittal of Additional Information
November 6, 2019

The allegation of error on the part of the Lane County Staff must be denied.

At the outset of the hearing regarding this appeal it was noted the appeal process is a "quasi-judicial" event. This letter does not attempt to set forth a judicial argument; that work will be left to the legal counsel for the applicant. Rather, this letter attempts to establish the course of events that occurred over 35 years ago in the acknowledgement of the Lane County Comprehensive Plan and the adoption of zoning code that has carried out that plan, noting the significant change that occurred with the incorporation of the Template Test for the approval process of obtaining a dwelling in F2 zoned land.

This letter follows the chronological flow of events from the adoption of the Comprehensive Plan, the consistent application of the zoning code and the logical conclusion that the application under appeal does not violate the goals of the Comprehensive Plan.

Thank you for your attention to these comments.

Sincerely,

Jim Belknap

Jim Belknap

LAND CONSERVATION AND DEVELOPMENT COMMISSION
ACKNOWLEDGMENT OF COMPLIANCE
Lane County
(Rural Portion, Excluding Eugene Metro Area)
Supplement to Staff Reports of June 29, 1984 and July 19, 1984 as Amended

DATE RECEIVED:
August 16, 1984 through September 13, 1984

DATE OF COMMISSION ACTION:
September 13, 1984

I. REQUEST

Acknowledgment of Compliance with the Statewide Planning Goals for the comprehensive plan and implementing measures.

II. SUMMARY OF RECOMMENDATIONS

Staff

Recommends the Commission acknowledge the rural portion of Lane County's plan and land use regulations to be in compliance with Statewide Planning Goals 1-14.

FIELD REPRESENTATIVES: Bob Rindy, Glen Hale
Phone: 378-4095

LEAD REVIEWER: Doug White, Mike Rupp, Claire Puchy
Phone: 378-4926

PLANNING DIRECTOR: Roy Burns
Phone: 687-3958

Date of Supplemental Report: September 12, 1984

III. BACKGROUND INFORMATION

On June 29, 1984, the Department issued a staff recommendation for Goals 1-4, 6-14, in response to Lane County's request for acknowledgment. The Commission took testimony but did not take final action on the request at the July 19, 1984 meeting. Also, on July 19, 1984, the Department issued a staff recommendation regarding Goals 5 and 15, and Goal 2 nonresource lands. At their August 17, 1984 meeting, the Commission again postponed final action on the June 29, 1984 report, and on the July 19, 1984 report, except for the portions pertaining to the rural areas in the Eugene/Springfield Metro Plan. These areas were granted a continuance to October 11, 1984.

In the period following the issuance of the Department recommendations, Lane County has made numerous revisions to their comprehensive plan and implementing ordinances in response to the Department's recommended in-order-to-comply requirements. These amendments were made under the provisions of the Expedited Notice Procedure for Acknowledgment (OAR 660-03-033). According to County Notices (July 19, 1984 and August 23, 1984), commentors and objectors were notified and provided opportunities for review and comment on these amendments prior to County adoption.

Section IV below summarizes the DLCD proposed requirements from the June 29 and July 19 reports and summarizes the County's response to each requirement. These are intended as supplemental findings, rather than as amendments to the previous DLCD recommendations.

Submitted Documents

Document	Ordinance	Adoption
Revisions to Development Code (Chapter 16)	9-84; 11-84	8-9-84; 9-12-84
Amendments to Plan Policies and Comprehensive Plan	889; 892	8-9-84; 9-12-84
Revisions to Development Code (Chapters 13 and 14)	10-84	8-9-84
Amendments to Comprehensive Plan	888	9-12-84
Supplemental Findings for Exceptions, Maringal Lands and Non-Resource Areas	84-9-11-22 (Order) 84-9-11-23 (Order)	9-12-84 9-12-84
Revised Comprehensive Plan Map and Zoning Map	891; PA 884	9-12-84

IV. FINDINGS

GOAL 2: LAND USE PLANNING

Requirement

1. Provide legible maps for all rural lands showing adopted plan categories.

Response

Lane County adopted a set of revised plan maps (ORD. No. 884). These plan maps replace previously submitted plan maps. The plan designations are site specific following legally identifed boundaries. Each plan designation is identified by a specific code symbol and defined in the County's plan.

Conclusion

The requirement has been met.

Requirement

2. Clearly define which zones are intended to implement each plan category.

Response

The County's plan was amended (ORD. 889) to include the following plan policy (Goal 2, Policy 26):

"Each of the land use designations applied to the Plan Diagram shall be implemented by one or more zoning districts as follows:

Plan Designation(s)*	Zone Classification
Forest land	Nonimpacted Forest Lands
Forest Land	Impacted Forest Lands
Agriculture Land	Exclusive Farm Use
Natural Resource	Natural Resource
Marginal Land	Marginal Lands
Park and Recreation	Park and Recreation
Natural Resource	Quarry and Mining Operations Combining
Natural Resource	Sand, Gravel and Rock Products
Natural Resource	Sand, Gravel and Rock Products Processing
Public Facility, Community	Public Facility
Commercial, Community	Limited Commercial
Comercial, Community	Neighborhood Commercial
Commercial, Community	Commercial
Rural Commercial	Rural Commercial
Industrial, Community	Limited Industrial

Industrial, Community	Light Industrial
Industrial, Community	Heavy Industrial
Rural, Community	Suburban Residential
Rural, Community	Garden Apartment Residential
Rural, Community	Rural Residential
Destination Resort	Destination Resort
Historical Structure/Site	Historic Structures or Sites Combining
Natural Estuary	Natural Estuary
Conservation Estuary	Conservation Estuary
Development Estuary	Development Estuary
Sign. Natural Shorelands	Significant Natural Shorelands Combining
Prime Wildlife	Prime Wildlife Shorelands Combining
Natural Resources Consv.	Natural Resources Conservation Combining
Residential Development	Residential Development Shorelands Combining
Shorelands Mixed Develop.	Shorelands Mixed Development Combining
Dredge Material/Mitigation	Dredge Material/Mitigation Site Combining
Beaches & Dunes	Beaches and Dunes Combining
	Floodplain Combining
Airport	Commercial Airport Safety District
Airport	Airport Safety District
Airport	Airport Operation
Nonresource	Rural Residential

* Note: The 'Community' Plan Designation is implemented by various zoning districts as indicated, zones which also implement specific Plan designations other than 'Community'."

Conclusion

The requirement has been met.

Requirement

3. Delete the provision in Sections 16.015 and 16.252 which permit legislative zone amendments to be adopted by order rather than by ordinance.

Response

Lane County's Development Code (Section 16.015) was amended (Ord. 9-84) to require that only quasi-judicial zone amendments be adopted by order. The section in the County Code which permits adoption by order applies to the County Board, Planning Commission and Hearings Official. An adoption by Ordinance is required for all legislative amendments.

Conclusion

The requirement has been met.

Requirement

4. Amend the Committed Lands Exception to provide additional information addressing OAR 660-04-025 requirements or rezone these lands identified in the Goal 2 Exception with the appropriate resource zone.

Response

Early in the review of the County's built and committed exceptions areas, Department staff identified certain areas that were not justified. In response to these noted deficiencies, the County adopted the first set of supplemental findings prior to issuance of the DLCD June 29, 1984 report (Order No. 84-6-19-16). These findings were reviewed in that report and found to address most of the deficiencies identified by Department staff. However, the Commission did not accept and approve these findings at their July 19, 1984 meeting because the County had not complied with the Expedited Notice Procedures for Acknowledgment (OAR 660-04-033) (See Lane County Acknowledgment Report, June 29, 1984, p. 26). To correct the oversight, the County followed the Expedited Notice Procedures leading up to the adoption of the second set of supplemental findings and provided oportunities for commentors and objectors to review the first set of supplemental findings. As a result of compliance with OAR 660-03-033, the first set of supplemental findings (Order No. 84-6-19-16) along with the other revisions can be affirmed.

In response to IOTC (4), Lane County redesignated 870 acres to an appropriate resource desigation (ORD. No. 891). For the remaining areas, the County adopted the second set of supplemental findings (Order No. 84-9-11-23) to justify the areas as committed. These findings provide additional information on recent partitions and subdivision activities along with information on more recent development. This information was not provided in the earlier submittal because of outdated maps and ownership listings. Address maps showing location of dwellings, mobile homes and recent road development provide most of the information addressing the deficiencies noted earlier. In addition, specific findings provide reasons why it is impracticable to apply a resource goal to areas that are not built upon but are irrevocably committed to nonresource uses.

Conclusion

The requirement has been met.

Based on the information contained in the County's original exception document and supplemental findings (Order No. 84-6-19-16 and Order No. 84-9-11-23), the County has provided substantial evidence consistent with OAR 660-04-025 and OAR 660-04-028 to support the conclusion that all areas, for which the County has taken a Goal 2 exception are no longer available for resource use and are irrevocably committed in their entirety.

Requirement

5. Amend the plan to clearly identify areas zoned PR which are within built and committed exception areas. For those areas within an exception area, provide for information addressing OAR 660-04-025 requirements or exclude those lands from areas designated as a built and committed exception area.

Response

The plan was amended (Ord. No.889) to include a list of tax lots zoned PR that are within built and committed exception areas. This action satisfies the first part of the above requirement. Information addressing the exception criteria can be found in the County's original exception document (Ord. No. 884) and the two sets of supplemental findings (Order No. 84-6-19-16 and Order No. 84-8-11-23). The adequacy of these findings is discussed under Goal 2 requirement 4 of this report.

Conclusion

The requirement has been met.

Requirement

6. Amend the PR-RCP Zone to include standards for uses permitted outright (consistent with ORS 215.213(2)). Note: These should not include review of minor betterment activities as described in ODOT's State Agency Coordination Program.

Response

The PR-RCP Zone was amended (ORD. 9-84) to require that uses authorized under ORS 215.213(2)(G) be subject to Director approval consistent with ORS 215.213(2)(LC 16.215(3)). Minor betterments and general improvement of existing parks or recreational facilities are permitted outright (LC 16.215(2)(d)).

Conclusion

The requirement has been met.

Requirement

7. Amend the zoning code to exempt maintenance and improvments in Jennie B. Harris State Park and Squaw Creek State Wayside from conditional use procedures. This is most easily accomplished by zoning all of these parks to PR.

Response

The County plan and zoning maps were amended (Ord. No. 898) redesignating Jennie B. Harris State Park and Squaw Creek State Wayside as Park and Recreation (PR).

Conclusion

The requirement has been met.

Requirement

8. In conjunction with compliance requirements under Goal 11 of this report, the County must (1) clearly define uses, densities, unit quantity, and levels of service appropriate to rural "cluster" subdivisions, and (2) adopt appropriate ordinance amendments implementing these standards. Densities exceeding those appropriate for rural areas shall additionally require a Goal 14 exception.

Response

The County has amended the plan to contain a policy which insures that urban levels of development will not occur in rural areas under the Cluster Subdivision Standards. The policy contains language parallel to the Commission's administrative rule on establishing new urban uses in rural areas (OAR 660-14-040). Prior to approving a cluster subdivision, with more than 20 units and which includes any lots less than 5 acres, the County must make findings similar to those required for an exception under Goal 14. These amended requirements are as follows (Ordinance PA 889):

> "Cluster subdivisions shall be deemed appropriate to a rural area when the following criteria are satisfied:
> 1. Consistent with the intent and requirements of OAR 660-14-040(2) and (3), a showing must be made that the development will not represent an urban population or demand an urban level of facilities and services. For purposes of meeting this standard, affirmative findings must be made addressing the following:
> a. The level of development represented by the development cannot be reasonably accommodated through the expansion of an existing urban growth boundary or by intensification oif development at an existing rural center.
> b. The long-term environmental, economic, social and energy consequences resulting from the development, considering measures designed to mitigate negative impacts, are appropriate to the rural area. Factors to be considered include whether the size of the development is appropriate to the proposed rural area and whether the air, water, energy and land resources of the surrounding area are adequate to serve and not adversely affected by the development.
> c. The proposed development is compatible with or can be made compatible with adjacent uses considering:

(1) Whether the development detracts from the ability of existing cities and service districts to provide services, and
(2) Whether the potential for continued resource management of the land at present levels surrounding and nearby the development is assured.

d. An appropriate level of rural facilities and services are available or can be provided in a timely and efficient manner.
e. The approval of the development is coordinated with affected jurisdictions and is consistent with the comprehensive plans of the affected jurisdictions and the Lane County Rural Comprehensive Plan.

2. The development will not:
   a. Generate traffic which will exceed the carrying capacity, as defined by Lane Code Chapter 15, of adjacent public and private roads.
   b. necessitate a higher level of police service than presently provided to the surrounding area.
   c. Occur within one mile of an existing urban growth boundary and/or share any urban service provided within a neighboring urban growth boundary.
   d. On the whole require an urban level of service.
3. Reasonable assurances must be provided that the cluster shall not generate students in excess of the capacity of affected facilities within the appropriate school district.
4. The development represents a concentration of people who generally reside and work in the area.
5. Deed restrictions which ensure that commucnity water and sewer systems shall remain viable and under private ownership shall be required. Cluster subdivisions which propose to form or use a public water or sewer system shall not be allowed.
6. Cluster subdivsions shall be limited to residential use. No commercial or industrial uses will be allowed within existing or proposed cluster subdivisions.
7. All cluster subdiviions must be within an existing Rural Fire Protection District.
8. No other identifiablke substantial increase of a public service shall be necessitated by the approval of a cluster subdivision."

The cluster development standards also contain provisions to assure their application to a series of small cluster developments (i.e., less than 20 units and therefore, exempt from standards 1 through 8 above).

Conclusion

The requirement has been met.

The Lane County cluster development standards contain the same standards as OAR 660-014-040. These standards assure that urban development will not occur in rural areas except where OAR 660-14-040 criterion are met.

Requirement

9. Amend Lane Code Chapter 16 to correct inconsistencies in the cross-referencing system, where subsections are referred to within the same section of the ordinance.

Response

The County Rural Zoning Ordinance (Chapter 16) has been codified eliminating cross referencing from the older Zoning Ordinance (Chapter 10). As a result, all inconsistencies previously identified have been corrected.

Conclusion

The requirement has been met.

Requirement

10. Amend the plan (a) to include additional findings justifying the claim that Goals 3 and 4 do not apply to property known as Dillard Highland's 2nd Addition, or (b) justify an exception to Goals 3 and 4, or (c) rezone the subject property with a suitable resource zone. If the County chooses option (a) or (b), Goal 5 wildlife habitat issues must also be addressed.

Response

Lane County amended its nonresource findings for Dillard Highland's Second Addition to include additional findings supporting the claim that Goals 3 and 4 do not apply as well as information indicating that the Goal 5 wildlife habitat issue has been resolved. The contents of the County's supplementary findings includes the following information: (1) amended soils information, introduced by soil scientist Joel A Norgren, PHD, which concludes that (a) 99.5 acres (65 percent) of the 154-acre parcel consists of SCS agricultural capability classes VI, and (b) 85.5 acres (56 percent of the 154-acre parcel consist of soils with no woodland site class; and (2) findings indicating why it is impractical to apply Goals 3 and 4 to this property. Reasons supporting these findings include the following:

"a) The Dillard Highlands is located on the east side of Dillard Road and the south hills ridgeline approximately one-third of a mile southeast of the Eugene city limits and the urban growth boundary.

It is within an area of very poor soils as indicated by the Soil Conservation Service maps. It is surrounded by a sloping terrain and a 'Developed and committed' area to the west, a 'developed and committed' area and a major BPA powerline to the north, a 'developed and committed' 260 feet power line and natural gas easement to the east, and an approved 'Non-Resource' area to the south. Although man-created boiundaries, they make it impracticable to apply the resource goals to he subject property (Dillard Highland's 2nd Addition; Supplemental Findings, August 24, 1984, pp. 15, 16).

b) Dillard Highland's status as a significant wildlife habitat has already experienced significant impacts because of existing urban and rural residential development in the area. Areas with 'built and committed' exceptions and this level of existing conflict are defined as 'Impacted Big Game Range' by Lane County's Flora & Fauna working paper (March 1982). These are areas 'that have existing levels of land use which preclude future wildlife management options of maintaining viable wildlife populations and recreational opportunity...the subject property is already impacted as big game habtat..." (Dillard Highlands, 2nd Addition, Supplemental Findings, August 24, 1984, pp. 18-19).

Conclusion for Dillard Highland's Second Addition

The claim that Goals 3 and 4 do not apply to Dillard Highland's Second Addition is sustained.

Substantial evidence has been provided by the County indicating that the 154 acres of Dillard Highland's Second Addition is not composed of predominantly SCS Class I-IV agricultural soils or soils with a cubic foot site index capable of producing commercial forest species.

In addition, the County indicates that the property is considered "impacted" big game habitat because of surrounding development activities and that, issues regarding Goals 4 and 5's habitat requirements are therefore resolved.

The supplemental findings of August 24, 1984, when combined with the findings previously discussed in the Departments' July 19, 1984 (addressing the "other lands" tests contained in Goal 3's definition and the remaining aspects of Goal 4's definition) are adequate to support the position that Goals 3 and 4 do not apply.

Requirement

11. Amend the plan to justify the potential one dwelling unit per 5-acre density authorized for Cerro Gordo's 600 acres in view of ODFW's

accepted wildlife habitat density standard for cluster developments of one dwelling unit per 40 acres. (See also Goal 2's cluster development issue.)

Response

The County's policy is to abide by ODFW's density recommendations unless the entire Goal 5 process is applied and a decision to exceed these recommendations is justified. Lane County has adopted supplementary findings (Order No. 84-9-11-23) and has revised its ESEE consequences analysis and wildlife habitat management plan for Cerro Gordo to justify development in a recognized big game habitat area, in excess of ODFW's recommended density standards. A meeting was held on August 14, 1984, with ODFW, Cerro Gordo and DLCD representatives to discuss this issue. It was determined that, in this case, ODFW density recommendations do not have as much bearing on the acceptability of the development as do other factors. These factors include the overall number and location of dwellings and roads, as well as mitigating measures incorporated into the development. The following factors in the revised Cerro Gordo proposal are particularly relevant (Order No. 84-9-11-23):

1. There is an overall "cap" on the number of lots which could be developed (i.e., 60 lots).

2. No more than one-third of the residences will be located north of the BLM road (the habitat area considered more sensitive to human disturbances).

3. Wildlife corridors from 600 to 1800 feet in width shall be provided along streams.

4. Residential development will be confined to a band 2,400 feet in width along an existing BLM road.

5. Residences must be clustered.

6. Goal 2 cluster subdivision requirements shall apply (see the Goal 2 section of this report for details).

7. Cerro Gordo is either adjacent to or near large tracts of federal and private forest land.

8. Lane County will provide ODFW with the opportunity to review and comment on the preliminary subdivision application to assure mitigation measures are achieved through proper clustering.

9. Road development will be minimized and private roads within forested areas will be closed to vehicular use except for emergencies, maintenance, and forest management activities.

10. A Cerro Gordo Design Committee as well as the Cerro Gordo Cooperative itself shall review and monitor actions and changes in wildlife conditions on an ongoing basis.

11. Pets shall be limited.

Because of these and other factors addressed in the County's amended findings, the impacts on big game range are thought to be acceptable by ODFW. Allowing such conflicts to occur, but with restrictions outlined above, is a (3C) decision under the Goal 5 Administrative Rule. The County has justified this decision.

Conclusion

The requirement has been met.

Requirement

12. Remove the AO zoning from all privately owned parcels within the Mahlon Sweet Airport Exception Area consistent with Transportation Policy 11 and apply an appropriate resource zone to these lands.

Response

This requirement pertains to the Eugene-Springfield Metro plan which has been segmented and continued until October 11, 1984.

Requirement

13. Amend the Committed Lands Exception to provide additional information addressing OAR 660-04-025 requirements or rezone TL 1600 in the Royal Avenue Exception area with the appropriate resource zone.

Response

This requirement pertains to the Eugene-Springfield Metro plan which has been segmented and continued until October 11, 1984.

Requirement

14. Amend the zoning code to exempt maintenance and improvements in Armitage State Park from conditional use procedures. This is most easily accomplished by zoning all of this park to PR.

Response

This requirement pertains to the Eugene-Springfield Metro plan which has been segmented and continued until October 11, 1984.

Conclusion - Goal 2

Lane County complies with Goal 2 for the rural portions of the County, excluding the Metro Plan area.

The findings contained in this supplemental report and those contained in the Department's June 29, 1984 review support the decision that Lane County complies with Goal 2.

GOAL 3: AGRICULTURAL LANDS

Requirement

1. Amend the EFU Zone to require disqualification from farm tax deferral of parcels prior to final building permit approval for nonfarm dwellings pursuant to ORS 197.236.

Response

Lane County's Development Code was amended (ORD. 9-84) to include a provisions requiring compliance with ORS 215.236 regarding the establishment of nonfarm dwellings in the EFU Zone (LC 16.215(4)(j)(IV)).

Conclusion

The requirement has been met.

Requirement

2. Adopt a plan policy requiring a plan amendment to the County Plan when designating land as Marginal Lands.

Response

The County plan was amended (ORD 889) to include the following plan policy (Goal 2, Policy 25):

> "Outside of designated 'Community' areas, all changes to Plan Diagram designations shall be evaluated through the County's Plan Amendment procedure (LC 16.400) and approval based upon fulfillment of criteria therein."

Conclusion

The requirement has been met.

Although this policy might imply that plan amendments are not necessary to change designations in community aras, in fact there is only one category--"community"--that can be applied to community areas. The policy should be clarified in the future to indicate that it is zoning within community areas that maybe changed without a plan amendment.

Requirement

3. Amend the plan to include adequate findings and reasons for applying the marginal lands zone to the Merz/603, Harrison, Peters, Hledik, G.E. Credit Corp., and KVAL properties and provide the required information to determine compliance with ORS 197.247. If the information provided shows that the land does not qualify as marginal land under ORS 197.247, plan and rezone the properties with appropriate resource designations and implementing zones.

Response

The County's plan was amended (Order No. 84-9-11-23) to include additional findings and reasons for applying marginal lands to the Merz/602, Harrison, Mathers and G.E. Credit Corp. properties. The County has also amended the plan and adopted an additional marginal land area known as the Moshofsky property (Order No. 84-19-11-22). The Peters, Hledix, and KVAL properties have been redesignated an appropriate resource designation (Ord. No. 898).

Information regarding the five marginal land areas is described below (Source: Order No. 84-9-11-22 and 84-9-11-23 (Moshofsky)):

Merz/603 - 70 acres

57.3 acres - SCS Class VIII (Dune Land)
12.7 acres - SCS Class III/Forest Site Class 3

Harrison - 45 acres

13.5 acres - SCS Class III
7. acres - SCS Class IV
49.5 acres - SCS Class VI
No woodland suitability

Mathers - 111 acres

4.7 acres - SCS Class III/Forest Site Class 3
13.7 acres - SCS Class IV/Forest Site Class 3
92.6 acres - SCS Class VI

G.E. CREdit - 20 acres

20 acres - SCS Class VI
No woodland suitability

Moshofsky - 68 acres

14.5 acres - SCS Class III
8.7 acres - SCS Class IV
42.6 acres - SCS Class VI
2.1 acres - SCS Class VII

MOSHOFSKY SOIL CALCULATIONS
AS PER F-2 WOODLAND SITE CLASS STANDARDS

Woodland Site Class	Acreage Needed Disqualification	Acreage Found Moshofsky	Percentage Of Standard
2	17	8.7	51.1%
3	24	0	0%
4	34	14.5	42.6%
5	43	2.1	4.8%
None		42.65	

Percentage Total = 98.5%

0638

Conclusion

The requirement has been met.

The previous findings found lacking for these properties have now been corrected as is required under ORS 197.247.

Based on the evidence submitted, and along with the findings in the previous staff recommendations, the following areas qualify as marginal lands under ORS 197.247:

Mertz/603
Harrison
Mathers
G.E. Credit Corp
Moshofsky

Requirement

4. Amend the Plan Map and Zoning Map for the Cuddeback and Rodman properties to an appropriate resource designation and implementing zone.

Response

The Cuddeback and the Rodman properties have been redesignated Impacted Forest Lands (Ord. No. 898).

Conclusion

The requirement has been met.

Conclusion - Goal 3

Lane County complies with Goal 3.

The findings contained in this supplemental report and those contained in the Department's June 29, 1984 review support the decision that Lane County complies with Goal 3.

GOAL 4: FOREST LANDS

Requirement

1. Amend the Forest Working Paper and addendum to:

   a. Provide justification for the F-1 Zone's 40 acre minimum.

   b. (1) include information on the pattern of contiguous ownerships (either map or statistical) in support of a decision to retain current F-2 zoning. Such information must show that the minimum lot size is representative of the ownership pattern of the area

and that the zone actually limits further opportunity for development; or (2) include information justifying an alternative approach consistent with Goal 4 taken to resolve issues raised regarding the F-2 Zone.

c. Amend the Forest Working Paper Appendix 1--Lane County Forest Soils--to include "all commercial forest soils" in a manner consistent with an appropriate definition of commercial forest lands.

Response

1. a. Lane County has adopted additional information supporting its decision for assigning a 40-acre minimum lot size in the F-1 Zone. Specifically, the County has included as findings, two letters from Carl Ehlen (Lane County Landowners Assoc. and Rex Timber Co.) regarding the viability of a 40-acre parcel to be commercially managed as a forest parcel and Exhibit "D" from Ordinance No. PA 889 which cites the following findings:

"1) In support of the proposed Comprehensive Plan developed in 1982 the Lane County Landowners Association provided written testimony that the minimum land division size of 40 acres in the F-1 Zone represented an acreage that could be an operationally and economically manageable unit within the industry. At that time, the F-1 Zone proposal allowed dwellings on parcels down to the minimum size. (See attached letter dated November 23, 1982)

2) The Addendum to the Forest Lands Working Paper dated November 1983, justifies the 40 acre minimum land division from the data which show a significant number of parcels and amount of acreage that represent that size class within the industrial forest land ownership.

The following excerpt is from Suggestion Policy XI. 1) of the Addendum to the Forest Lands Working Paper:

'92% of the Industrial forest land acreage that lies on parcels less than 80 acres in size occurs on parcel sizes between the range of 40 to 80 acres, with approximately 25% of that area occuring at the 40 acre parcel size category.'

'75% of the number of parcels in the Industrial owned forest land that lies on parcels less than 80 acres in size occurs on parcel sizes between the range of 40 to

80 acres, with approximately 28% of the number of parcels occuring within that range at the 40 acre parcel size category.'

3) The letter received June 21, 1984, from the Lane County Landowners Association reiterates their former position in support of the 40 acre minimum land division standard noting that under the current proposal the F-1 Zone excludes residences. (See copy attached.)

4) In addition, preliminary data from the computerized zoning file of the current F-1 proposal indicates that of the parcels zoned F-1 that are between 40 and 80 acres in size, 27% of the acreage occurs on parcels of the 40 acre size class which represents 39% of the number of parcels between 40 and 80 acres in size."

The County has indicated further that the County's decision establishing the 40-acre minimum lot size in the F-1 Zone is supported because:

> "Commercial forest representatives in Lane County requested 40 acres as a minimum lot size in the F-1 Zone based upon 40 acres being a commonly acquired, managed and exchanged unit of commercial forest land in Lane County."

Because Lane County's F-1 Zone does not allow dwellings, the price of forest land will reflect forest land values instead of rural residential values and conflicts with forest management activities will be minimal. Thus, a small minimum lot size conducive to commercial forest management, such as the F-1's 40-acre minimum is appropriate.

b. Lane County has rezoned approximately 56,080 acres of land from F-2 to F-1 and EFU in accordance with requirement "1.b(1)." Lands for which the F-2 zone was retained generally exhibit one or more of the characteristics for impacted forest lands presented in the response to requirement "2a." In addition, the County's revised Goal 4 Policy 12 provision (discussed under Goal 4 Response 3 of this report) presents additional limitations on divisions of resource land by establishing a 80-acre minimum lot size for all forest parcels which are (1) 160 acres in size, (2) zoned F-2, and (3) adjacent to F-1 zoned lands.

c. Lane County has amended, through Ordinance No. PA 889 (p. 6), their definition of commercial forest land to be 50 cubic feet per acre per year. By adopting a single commercial forest lands definition in its forest lands working paper rather than relying

on inconsistent references to 20 cubic feet, 50 cubic feet or the list of forest soils contained in Appendix 1, a consistent standard for inventorying forest lands and evaluating nonresource lands is established.

Conclusion

Lane County satisfies this requirement.

Requirement

2. Amend the comprehensive plan to:

   a. Include a Forest Policy which establishes precise criteria for applying the F-1 and F-2 Zones. (At a minimum, criteria for applying the F-1 Zone must include ownerships of a size capable of being managed as commercial forest lands.)

   b. Amend the four characteristics discussed under the Goal 4 conclusion for policies to establish criteria which apply only to lands appropriately zoned F-2 as per the examples discussed under "application;" or

   c. Include a policy which requires a plan amendment to rezone lands from F-1 to F-2.

   d. Delete the following from Forest Policy 11(a) "if adjacent to other nonimpacted forest lands.

Response

2a. In response to the above requirement, Lane County revised the criteria for applying the Non-Inpacted (F-1) and Impacted (F-2) Zone designations to eliminate the specific "vague" criteria discussed in the June 29, 1984 review. The revised criteria can be used to more specifically determine the proper zone designation. Ordinance No. P. 899 (p. 5, Item 10) adds Goal 4, Policy 19 which reads as follows:

"Lands designated within the Rural Comprehensive Plan as forest land shall be zoned Non-Impacted Forest Lands (F-1, RCP) or Impacted Forest Lands (F-2, RCP). A decision to apply one of the above zones or both of the above zones in a split zone fashion shall be based upon:

'a. A conclusion that characteristics of the land correspond more closely to the characteristics of the other forest zone. The zoning characteristics referred to are specified below in subsections b and c. This conclusion shall be supported by a statement of reasons explaining why the facts support the conclusion.

'b. Non-impacted Forest Land Zone (F-1, RCP) Characteristics

'i. Predominantely ownerships not developed by residences or nonforest uses.
'ii. Predominantely contiguous ownerships of 80 acres or larger in size.
'iii. Predominantely ownerships contiguous, to other lands utilized for commercial forest or commercial farm uses.
'iv. Accessed by arterial roads or roads intended primarily under commercial forest management.

'c Impacted Forest Land Zone (F-1, RCP) Characteristics

'i. Predominantly ownerships developed by residences or nonforest uses.
'ii. Predominantely ownerships 80 acres or less in size.
'iii. Ownerships generally contiguous to tracts containing less than 80 acres and residences and/or adjacent to developed or committed areas for which an exception has been taken in the Rural Comprehensive Plan.
'iv. Provided with a level of public facilities and services, and roads, intended primarily for direct services to rural residences."

In addition, nonforest uses authorized under the F-1 Zone (LC 16.2104) can not be used as the basis for supporting a zone change from F-1 to F-2; the criteria established in LC 16.210(5) require as a condition of approval that findsigs be provided indicating such uses do not significantly impact forest uses. Thus, establishment of such nonforest uses in an F-1 Zone can not be the basis for a zone change to F-2 under the "impacted" criteria adopted by Lane County.

2b. or c.

Lane County revised its plan to delete the four vague characteristics used in applying the F-1 and F-2 zones. As indicated in the conclusion to "2a," the revised criteria successfully address the issue.

2d. On page 4 of Lane County Ordinance "No. PA 889, #8," the County states: "Goal No. 4, Policy No. 11a--delete if adjacent to other nonimpacted forest lands."

Conclusion

Lane County satisfies this requirement.

Requirement

3. Amend the County zoning map by rezoning private non-industrial ownerships capable of commercial forest management (including forested portions of commercial farm-forest operations) currently zoned F-2 with an appropriate resource zone. An acceptable forest zone is the F-1 Zone or forest zone containing a minimum lot size of

at least 80 acres as justified by the County's "Forest Working Paper Addendum."

Also, where the County can justify such a decision, the County may apply the marginal lands zone or rural residential zones to "committed" or nonresource lands.

Response

Lane County has rezoned 24,075 acres of land from F-2 to F-1 and rezoned 32,005 acres from F-2 to EFU. Generally, ownerships greater than 120 acres in size capable of being managed as a farm unit were rezoned to EFU. Ownerships of 160 acres or greater capable of being managed as commercial forest lands were rezoned to F-1. Some large ownerships were zoned with more than one zone depending on adjacent land uses and impacts. Also, the F-2 zone was retained on a few large ownerships, where soils information indicated that non-commercial forest soils predominate.

In order to reduce potential conflicts between authorized land uses in the F-2 Zone and commercial forest management activities occuring on F-1 lands, Lane County adopted a new version of Goal 4 Policy 12 (Ordinance No. PA 889, p. 4, Item 9) which contains the following provision:

> "(b) To substantially limit any adverse impacts upon commercial forest management which might result from land divisions and subsequent residential development (accessory and necessary to commercial forest management) a minimum area of 80 acres shall be required for the division of large forest tracts:
> '(i) zoned F-2
> '(ii) containing at least 160 acres
> '(iii) for the creation of lots or parcels adjacent to F-1, RCP zoned lands."

Conclusion

Lane County has satisfied this requirement.

The County has amended its zoning map, through the rezoning of some lands previously zoned F-2, in a manner consistent with this requirement. With the elimination of 56,080 acres from the F-2 Zone, the County's current application of the F-2 Zone is more representative of the ownership patterns within areas where non-commercial forest management and other non-resource activities occur.

Requirement

4. Amend LC 16.210(4)(i) of the F-1 Zone and LC 16.211(5)(ii) to require that "lodges" be evaluated against the "generally unsuitable test" in addition to the other review standards already applied to this specific use.

Response

Lane County through the adoption of Ordinance No. 9-84 amended LC 16.210(4)(i) and LC 16.211(5)(ii) to require under LC 16.210(4)(i) and LC 16.211(5)(r) that in addition to other review criteria, lodges will be required to locate on land generally unsuitable for forest uses in the F-1 and F-2 Zones or an exception to Goal 4 would be necessary.

The County also adopted Plan Policy No. 27 which requires an exception to resource Goals for transmission lines with right-of-way widths in excess of 50 feet (Ord. No. PA 889, p. 4). In addition, the County has limited farm equipment maintenance to that "incidental to a forest repair" (Ord. No. 9-84, p. 16-29).

Conclusion

Lane County satisfies this requirement.

Requirement

5. Amend the F-2 zoning provisions as follows:

   a. In 16.211(3)(b), adopt informational requirements for the "detailed forest management plan." At a minimum, such provisions must require sufficient information to establish adequate findings that a proposed "forest" dwelling is "necessary" and "incidental and subordinate to" the primary forest management activities described in the forest management plan.

   b. Include in LC 16.211(3)(b) a "floor" or minimum parcel size requiring parcels below 10 acres to be assessed against the nonforest dwelling or lot of record provisions.

   c. Amend 16.211(7)(b) to apply to all commercial forest grazing operations zoned F-2 the larger size (120 acres) for extensive animal grazing as required by LC 16.212(6)(d).

Response

5a. Lane County has amended LC 16.211(3)(b), through the adoption of Ordinance NO.9-84, to include specific requirements for preparing an acceptable forest management plan. Included within the revised LC 16.211(3)(b) is the following additional requirement:

> "(iii) The forest management plan shall specify how the following practices, when applicable, are to be addressed: road and fire trail construction and maintenance, site preparation, reforestation, stand conversion, planting of nonstocked openings, competition reduction/release, precommercial thinning, harvest scheduling/rotation and special site treatments for topography and other concerns."

Because active forest management is required to retain forest land taxation rates and failure to implement the forest management plan is a violation of LC 15.211(3)(b). The combination of the above requirements for forest related dwellings in the F-2 Zone assures that active forest management must occur on forest lands in order to establish a forest related dwelling; thus, satisfying the accessory and necessary test. These requirements for approving a forest related dwellings in Lane County's F-2 Zone are similar to the provisions contained in Benton County's acknowledged secondary forest zone.

5b. Through the adoption of Ordinance No. 9-84, Lane County amended LC 16.211(3)(b) of the F-2 Zone to include a "10 acre" floor which will be used for assessing "forest" dwelling applications. Applications for dwellings on parcels zoned F-2 which are less than 10 acres will be reviewed as nonforest dwellings.

5c. Upon further review of LC 16.211(7)(c) regarding the F-2 zone's minimum lot size requirements for farm unit size requirements for commercial grazing operations, it was determined that this provision's 40-acre minimum "farm unit size" requirement is identical to the County's EFU Zone minimum farm unit size requirement. For specific uses, such as dwellings, LC 16.212(2)(f) of the EFU Zone must be satisfied before approval can be granted.

Conclusion

The County satisfies this requirement.

Conclusion - Goal 4

Lane County complies with Goal 4.

Lane County's approach to conserving forest lands contains some plan policy and ordinance provisions unique to Lane County. The strength of their forest lands conservation program is the F-1 Zone which prohibits the siting of all dwellings (other than those required to be authorized by state statutes). This zone is applied to 2,449,775 acres of Lane County's forest lands.

The County's F-2 Zone is applied to 145,356 acres of privately owned lands which consist generally of large lot rural residential parcels, nonproductive or marginally productive resource lands, or underutilized resource lands. Lands zoned F-2 are generally located adjacent to or near developed urban or rural areas and well travelled transportation routes; all of which have an impact on the commercial management of forest lands.

In the F-2 Zone, the County requires that before a permanent dwelling is sited on forest land, assurances are obtained that forest production on the lot will be enhanced by active forest management. The requirements associated with the siting of dwellings in the F-2 Zone are similar to those provisions approved by the Commission in Benton County's acknowledgment with recent changes to the County's forest policies and

ordinance provisions. The findings contained in this supplemental report and those contained in the Department's June 29, 1984 review support the decision that Lane County complies with Goal 4.

GOAL 5: OPEN SPACES, SCENIC AND HISTORIC AREAS, AND NATURAL RESOURCES

Requirement

1. Mineral and Aggregate Resources: Apply the Goal 5 process to sites zoned SC which are not included on the County's (1C) inventory and, based on an analysis of the ESEE consequences of conflicting uses, either (1) add them to the (1C) inventory if justified, or (2) rezone the sites for other uses.

Response

In responding to this IOTC, Lane County discovered that not only were there sites zoned SG which were not on its (1C) inventory, but that there were other errors on its inventory. Therefore, the County revised its (1C) inventory as well as its (1B) inventory. Supplemental findings to Ord. No. PA 892 state:

> "The IOTC to correct the zoning citations was the stimulus for a complete review of sites listed in Appendix D vs. zoned sites. Several of those in the original Appendix D have been deleted--none of which carried SG or QM zoning. No "unzoning" will be necessary. Most of those deleted are also reflected in Appendix F of the Working Paper, which is the "pool" for later evaluation under the Goal 5 Rule "1B" option. Thus, any sites deleted in this effort are not lost from consideration, merely set aside for more detailed examination later on. All but one of the sites of Appendix D correspond with on-the-ground zoning of SG or QM."

The one site referred to in the last sentence of the previous quote (site #21) is an active site. The County completed all steps of the Goal 5 Administrative Rule for the site, and subsequently zoned it QM (Ord. No. PA 891). These findings are now part of the County's Mineral and Aggregate Resources Working Paper.

The County's three Mineral and Aggregate Resources inventories--Appendices D, E, and J--have been revised as follows: Appendix D has been reorganized to read more clearly, the Conflict Analysis (Appendix J) expanded to deal with new sites per the IOTC, and a third map (Appendix E) created to display the sites on new Appendix D. The original Appendix E--a listing of sites in the Metro Area--has been deleted since it was inconsistent with the list contained in the Metro Plan.

Conclusion

Requirement 1 has been met.

Requirement

2. Fish and Wildlife:

a. Amend the Natural Resource Zone to include riparian setback and vegetation maintenance standards.

Response

Lane County has amended its Natural Resource Zone to include riparian setback and vegetation maintenance standards similar to those in other resource zones (Ord. No. 11-84).

Conclusion

Requirement 2a has been met.

Requirement

2. Fish and Wildlife Habitats:

b. Amend the C-1, C-2, C-3, M-1, M-2, M-3, and RG zones to either (1) include riparian setback and vegetation and maintenance standards, or (2) incorporate by reference anothr section of the Lane Code which contains such standards.

Response

Lane County has amended the above zoning districts to include appropriate riparian setback and vegetation maintenance standards as required (Ord. No. 9-84).

Conclusion

Requirement 2b has been met.

Requirement

2. Fish and Wildlife Habitats:

c. Apply riparian setback and vegetation maintenance requirements along lakes and Class II streams, or otherwise justify not providing such protection, based on an ESEE consequences analysis of conflicting uses.

Response

Lane County has responded to this IOTC by amending the Flora and Fauna Working Paper Addendum (p. 7) to include the following justification for not applying riparian setback and vegetation maintenance requirements to lakes or Class II streams (Ord. No. PA 892):

> "For purposes of this analysis, only Class I riparian lands are considered. Class II streams (using ODF standards) are not fish-bearing streams, according to Oregon Fish and Wildlife Department staff, and often dry up in the summer months. Additionally, they are located in remote areas in public ownership or limited to resource uses by resource zones. Many of them have not been inventoried, and location maps are not easily available. Most lakes outside of the coast are impoundments, such as Fern Ridge Reservoir, and have COE easements plus County PR zoning to protect their shorelines. The remaining natural lakes are protected by coastal overlays or are in High Cascade wilderness areas such as Waldo. The Oregon Fish & Wildlife Department, which worked closely with the County in devising a method of protecting Class I riparian lands, did not indicate a need to similarly protect Class II riparian lands. In the nomenclature of the Goal 5 Rule, the County determines the Class II streams are to be considered '1A' resources--not to be included on the Plan inventory."

Conclusion

Requirement 2c has been met.

Requirement

2. Fish and Wildlife Habitats:

   d. Amend the F-2 and EFU zones to carry out the intent of Flora and Fauna Policy II. Specifically, the zones must either require larger minimum lot sizes in the Big Game Habitat portions of these zones, or contain clustering requirements in those areas.

Response

Lane County has added the following new language to both the F-2 and EFU Zones:

> "(a) The Approval Authority shall balance the setback standards of LC.211(8)(a) with the siting requirements and application approval criteria specified elsewhere in LC 16.211 in order to minimize adverse impacts upon forest uses and to assure optimal siting of

proposed residences consistent with the purposes the F-2 [EFU] Zone.

(i) Residences to be sited upon tracts located within a big game range as designated by the Department of Fish and Wildlife shall be sited as follows:

(aa) Near residences on other tracts.

(bb) With minimal intrusion into forest areas undeveloped by nonforest uses.

(cc) Where possible, when considering LC 16.211(8)(a)(i)(aa) and (bb) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU."

Conclusion

Requirement 2d has been met.

Requirement

2. Fish and Wildlife Habitats:

e. Amend the Flora and Fauna Working Paper to include location, quality and quantity information for sensitive bird habitat areas, including great blue heron rookeries, bald eagle and osprey nests, and pigeon mineral springs. Apply all applicable steps of the Goal 5 process to all known sensitive bird sites. Flora and Fauna Policy 15 must also be modified, consistent with these tasks.

Response

Lane County has adopted (Ord. No. PA 892) as part of its Flora and Fauna Working Paper, an inventory of known sensitive bird sites, including location, quality and quantity information. The County has identified conflicting uses and analyzed ESEE consequences. Based on this analysis, Lane County has decided to adopt a procedure for "flagging" areas in which such sites occur and requiring conflicting uses to be subject to conditional use approval. For all conflicting uses except timber management activities, the County has adopted "Sensitive Bird Habitat Protection Standards and Criteria" as part of the Lane Code (Ord. No. 11-84). Excerpts from that zone section are as follows (LC 16.005(4)(l)):

"(b) Development Plan Submittal. The person proposing the development shall submit plans to the

Department which sufficiently identify the location, nature and scope of the proposed use or activity.

(c) Referral. Upon receipt of the plan identified in LC 16.005(4)(b) above, the Department shall refer a copy of the plans to the Oregon Department of Fish and Wildlife (ODFW).

(d) ODFW Review. Upon receipt of the plans identified in LC 16.005(4)(b) above, the ODFW shall review the proposed use or activity and make a determination of whether or not the use or activity would affect a sensitive bird habitat. In making this review and determination, the ODFW shall consult with the affected landowner(s) and appropriate state agencies, and shall address the standards in LC 16.005(4)(d)(i) and (ii) below. The basis for the determination shall be stated in writing, completed within seven working days of receipt, and then submitted to the Department (Lane County).

(i) A sensitive bird habitat will be considered affected by a use or activity if the use or activity is located within 660 feet of an eagle or osprey site or within 300 feet of a heron rookery or pigeon mineral spring.

(ii) A sensitive bird habitat may also be considered affected by a use or activity if the use or activity is located a greater distance than specified in LC 16.005(4)(d)(i) above, considering unique conditions of topography to the individual habitats of the bird(s).

(e) No Affects Determined. If the ODFW determines that the senstive habitat area will not be affected, then the ODFW will give the Department written notice of its determination, and Lane County may proceed with authorization o the use or activity, or with the processing of any other required applications.

(f) Affects Determined and Protection Plan. If the ODFW determines that the sensitive habitat area will be affected, the ODFW shall work with the affected landowner(s) in the development of a site specific habitat protection plan. The plan shall consider the proposed use or activity and its interrelationship to and affects upon nesting trees, perch trees, critical nesting period roosting sites and/or buffers for wind, vision and noise. The plan must contain a statement of reasons, supported by facts, explaining why the sensitive bird habitat would not be adversely affected by the proposed use or activity. The plan shall then be submitted to the Department.

(g) Director Approval. The proposed uses or activities identified in the habitat protection plan shall be reviewed by the Director pursuant to LC 14.100 and shall be allowed if in conformance with the following approval criteria:

(i) The proposed use or activity would not adversely impact a sensitive wildlife habitat.

(ii) Conditions placed upon the approval of the habitat protection plan would avoid or eliminate any adverse impacts upon a sensitive wildlife habitat. Conditions may include setbacks, limitations upon the time period for the operation of the use or activity and/or prohibition of conflicting uses.

(h) LC 16.005(4)(a)-(g) do not apply to the protection of sensitive bird habitat from forest practices as regulated by the Forest Practices Act and as regulated by the COOPERATIVE AGREEMENT BETWEEN OREGON STATE BOARD OF FORESTRY AND OREGON STATE FISH AND WILDLIFE COMMISSION as adopted by Lane County in Rural Comprehensive Plan Goal 5 Flora and Fauna Policy 17."

The following new Policy 17 has been adopted to replace old Flora and Fauna Policy 15 (Ord. No. PA 892):

"The Cooperative Agreement between Oregon State Board of Forestry and Oregon State Fish and Wildlife Commission shall constitute Lane County's means of protecting sensitive bird habitat sites from conflicts which may result from forest practices as regulated by the Forest Pracices Act. Within two years of the date of acknowledgment of the Rural Comprehensive Plan, Lane County shall evaluate the effectiveness of the use of this agreement in providing actual protection to sensitive bird habitat sites, and if necessary, shall consider the adoption of more effective means of protecting sensitive bird habitat sites. This agreement is incorporated into the Lane County General Plan Policies as Flora and Fauna, Exhibit 'A'."

The following new Flora and Fauna policy has also been adopted (Ord. No. PA 892):

"18. Owners of property designated as a sensitive bird habitat and as identified in Lane Manual 11.400 shall be encouraged to develop a management plan in conjunction with the Oregon Department of Fish and Wildlife prior to beginning any development which may adversely affect the habitat. Such management plans shall consider nesting trees, perch trees, critical nesting period, roosting sites and buffer zones, and shall demonstrate how the proposed development will not adversely affect the sensitive bird habitat site. The policy shall not apply to forest practices covered by the above Flora and Fauna Policy 17."

Conclusion

Requirement 2e has been met.

Requirement

2. Fish and Wildlife Habitats:

f. Modify the definition of "wetlands" used in the Flora and Fauna Working Paper to be consistent with the definition contained in the Statewide Planning Goals.

Response

Lane County has replaced its definition of "wetland" with the following definition (Ord. No. PA 892):

> "For purposes of County management, wetlands should be defined as land areas where excess water is the dominant factor determining the nature of soil development and the types of plant and animal communities living at the soil surface. Wetland soils retain sufficient moisture to support aquatic or semi-aquatic plant life. In marine and estuarine areas, wetlands are bounded at the lower extreme by extreme low water; in freshwater areas, by a depth of six feet. The areas below wetlands are submerged lands."

This new definition is consistent with that contained in the Statewide Planning Goals.

The Working Paper has also been amended to contain the following explanation:

> "For purposes of County management, principal concern shall be given to wetlands of an acre or greater in size, to exclude small 'backyard' areas, unless the future County evaluation of the National Wetlands Inventory and/or information from ODFW indicate that specified wetlands smaller than one acre in size require the same level of protection as their larger counterparts."

Conclusion

Requirement 2f has been met.

Requirement

2. Fish and Wildlife Habitats:

g. Amend the Flora and Fauna Working Paper to identify the Goal 5 wetland area east of Highway 101 and south of Sutton Lake. Apply all applicable steps of the Goal 5 Rule to this site.

Response

The County examined this site ("Blueberry Acres") and documented its location, quality and quantity. Conflicting uses were identified, and an ESEE consequences analysis was performed by the County. Based on this analysis, the County determined that the wetland required additional protection. It, therefore, has applied its Natural Resource Zone to the site. The Addendum to the Flora and Fauna Working Paper has been amended to contain background information and findings regarding application of the Goal 5 process to "Blueberry Acres" (Ord. No. PA 892).

Conclusion

Requirement 2g has been met.

Requirement

2. Fish and Wildlife Habitats:

h. Amend the ML Zone to require compliance with the Goal 5 Administrative Rule in future applications of the zone. For those sites currently zoned ML, identify the Goal 5 resources present, identify conflicting uses and ESEE consequences, and develop a program to achieve the Goal, consistent with the Goal 5 Rule.

Response

Section 13.050(1) of the Lane Code requires conformity with the Comprehensive Plan (including all plan policies) when considering partition or subdivision plans.

Also, Policy 14 (Goal 3) has been amended so as to require compliance with Goal 5 policies 11 and 12 in the future application of the ML Zone. Policy 11 requires conformance to ODFW density recommendations, unless justified through a separate Goal 5 analysis. Policy 12 requires a Goal 5 analysis if conflicting uses are identified that were not contemplated in the Plan.

Findings have been added to the Flora and Fauna Working Paper Addendum (p. 14) which discuss application of current ML zoning in Goal 5 resource areas. Goal 5 conflicts with many of these sites are primarily with big game habitat. The County has analyzed the ESEE consequences of conflicting uses for these areas and has decided to apply the ML Zone in spite of the conflicts.

Conclusion

Requirement 2h has been met.

Requirement

3. Natural Areas: Amend the Flora and Fauna Working Paper to include inventory information on the Goal 5 Darlingtonia natural area east of the City of Florence. Apply all applicable steps of the Goal 5 Rule to this site.

Response

Supplementary Findings to Ordinance No. PA 892 adopted by Lane County provide the following explanation:

> "This site is shown on the Coastal Resources Inventory maps as being located east of North Fork Road, near the Chief Drew historical site. It was field-checked by County and ODFW staff. Neigher effort could locate Darlingtonia, although a small bog existed in the approximate area of the site. A larger bog to the north (within the Florence UGB) may be the one referred to in the Inventory, but has been partially filled by structures and is not within the concern of the Rural Comprehensive Plan--the Florence plan having been acknowledged in 1983. It too was found to contain no Darlingtonia.
>
> Thus, it appears that no rezoning action will be necessary to preserve the reported bog."

Page 27 of the Flora and Fauna Working Paper has been amended to include the following new paragraph:

> "1A Category
>
> One site--identified on the Coastal Resources Inventory as a significant natural area--has been placed in the '1A' category because it was either erroneously identified in the Inventory or because conditions have changed since the Inventory was done which have destroyed the feature that first caused its inclusion. This area is noted as "unique Darlingtonia habitat" east of North Fork Road in 18-12-24. Because DLCD raised the issue of preservation of this resource under Goal 5 Rule requirements, field checks were conducted by both County staff and staff of the Oregon Fish & Wildlife Department. Neither effort could locate any Darlingtonia. A bog north of the one shown on the inventory map (excerpt attached) may have been the one referred to, but that particular bog has been partially filled and is also located within the UGB of Florence

which has an acknowledged Plan. Even assuming the Plan should be changed, that northern bog (at the intersection of Munsel Lake and North Fork Roads) is not significant enough Darlingtonia area to merit further action by the City/County. In sum, the area should be deleted from the Plan inventory as a '1A' site, with no further action required on it."

Conclusion

Requirement 3 has been met.

Requirement

4. Scenic Views and Sites: Inventory known scenic views and sites and apply all applicable steps of the Goal 5 Administrative Rule to those sites.

Response

Lane County has adopted an Addendum to its Recreational Resources Working Paper (Ord. No. PA 892) which contains an inventory of scenic resources in the County, including the coastal strip, the Willamette River Greenway, Coburg Ridge, McKenzie River Valley, Willamette Highway/Salt Creek Valley Corridor, and ODOT-identified scenic areas. Each is described and location, quality and quantity documented. Each is evaluated in terms of conflicting uses and ESEE consequences. Based on these analyses, the County has determined that existing coastal zoning is sufficient protection for the coastal zone, and that the County Greenway Plan and Permit process should be the implementing measure in the Willamette Greenway. No conflicts were identified with ODOT scenic areas. Coburg Ridge is essentially undeveloped and partly in BLM ownership or in ranchland. Slopes exceed 100 percent in many places. Therefore, conflicts appear to be limited primarily to forestry activities, which are regulated by the FPA. Most of the McKenzie Valley and the Willamette Highway/Salt Creek Corridor is within the Willamette National Forest.

Conclusion

Requirement 4 has been met.

Requirement

5. Historic Sites:

   a. Amend the zoning maps to show that the Historic Structures of Sites Combining Zone has been applied to all (1C) sites identified in the Working Paper, and amend the Zoning Code to make it clear that the combining zone applies to all (1C) sites.

Response

The County has ensured that all (1C) sites appear on zoning maps with the "/H" symbol, except for 20 covered bridge sites (Supplementary Findings to Ord. No. PA 892). The County indicates that these are not on maps because they are bridges and are not keyed to tax lot citations. This prevents the digitized Plan Diagram maps from properly displaying them. However, all are publicly-owned, and are covered by the /H Combining Zone (Ord. No. 892).

Lane County has added a definition of "Historic Structure or Site" to the definition section of its ordinance. This definition specifically includes property which had been identified by Lane County in its adopted Rural Comprehensive Plan findings as historically significant. (This list includes the 20 covered bridges as well as all other (1C) sites.)

Conclusion

Requirement 5a has been met.

Requirement

5. Historic Sites:

   b. Justify deletion of sites 32, 39, and 42 from the inventory of historic sites, and amend the Historic Sites Working Paper to reflect these deletions; or apply the Historic Sites Combining Zone to those sites.

Response

Lane County has deleted sites 34 and 57 as well as sites 32, 39 and 42 from its historic sites inventory, and has amended the Addendum to its Historical Resources Working Paper as follows:

> "From the above list, five sites have been deleted by County action: sites 32, 34, 49, 42 & 57. Sites 34 and 57 are not within the purview of the Rural Comprehensive Plan and thus are the responsibility of other planning efforts. Site 32 (Keeney House) is no longer considered historically significant because the structure has been relocated on its site and has been remodeled both inside and outside. Site 39 (Paschelke House) is incorrectly represented in the State Inventory and has been extensively remodeled. Site 42 (Fall Creek Christian Church) has been remodeled several times from its original use as a school building, and is being expanded. These sites should be exempted from the Historical Combining District which is being applied to the other sites on the above list."

Conclusion

Requirement 5b has been met.

Requirement

6. Oregon Recreation Trails:

a. Amend the Recreational Resources Working Paper to provide more detailed locational information (text or maps) for all the existing trails and trail segments.

Response

Lane County has amended the Recreational Resources Working Paper (p. 15) by inserting a new paragraph indicating that ODOT has supplied the County with detailed maps of trail segments. Such information is included as Appendix A to the Working Paper (Ord. No. PA 892).

Conclusion

Requirement 6a has been met.

Requirement

6. Oregon Recreation Trails:

b. Adopt policies to:

(1) Cooperate with ODOT in the protection of existing trails; and

(2) Coordinate with ODOT in applying the Goal 5 Rule during any future identification, or establishment of proposed trail segments.

Response

Goal 5 (Policy 4) has been replaced with the following new policy (Ord. No. PA 892):

"The County shall recognize and acknowledge existing and potential recreational trails designated by the Oregon Parks Outdoor Recreation Plan, shall cooperate with the Oregon Department of Transportation in the identification of specific routes for potential trails, and in the completion of applicable steps of OAR 660-160-000/025. Existing developed trails shall be displayed on the County's planning documents."

Conclusion

Requirement 6b has been met.

Requirement

7. Scenic Rivers and Waterways:

a. Amend the Recreational Resources Working Paper to recognize that:

(1) Waldo Lake and the North Fork of the Middle Fork of the Willamette River to about one mile upstream from Westfir are within the designated State Scenic Waterway system; and

(2) The portions of the Alsea River, and Steamboat Creek that are on the federal potential list are also on the state list of potential scenic waterways.

Response

The County has adopted an Addendum to its Recreational Resources Working Paper (Ord. No. PA 892). This addendum recognizes Waldo Lake and the North Fork of the Middle Fork of the Willamette River to about one mile upstream from Westfir as within the State Scenic Waterway system (p. 8). It also recognizes portions of the Alsea River and Steamboat Creek that are on the federal and state potential lists (p. 9).

Conclusion

Requirement 7a has been met.

Requirement

7. Scenic Rivers and Waterways:

b. Amend Open Space and Scenic Areas Policy 5 (p. 17) to also indicate that the County will coordinate with appropriate state and federal agencies in applying all applicable steps of the Goal 5 Administrative Rule in studying rivers for possible designation and in actually selecting wild and scenic rivers for designation.

Response

Policy 5 has been replaced with the following policy language:

"The County shall cooperate with appropriate state and federal agencies in the selection of wild and scenic rivers, and will cooperate with these agencies in the completion of applicable steps of OAR 660-16-00/025 in making such selections" (Ord. No. PA 892).

Conclusion

Requirement 7b has been met.

Requirement

8. Adopt implementing measures to resolve conflicting uses for the area known as Russel Creek Basin, based on the ESEE consequences analysis and conflicting-resolution recommendations contained in the Metro Plan Update Working Paper.

Response

This requirement pertains to the Eugene/Springfield Metro Plan which has been segmented and continued until October 11, 1984.

Conclusion - Goal 5

Lane County complies with Goal 5.

GOAL 7: AREAS SUBJECT TO NATURAL DISASTERS AND HAZARDS

Requirement

1. Amend the Development Code to require review of any proposed development within known geologic hazard areas.

Response

Lane County Development Code was amended (ORD. 9-84) to include the following provision (LC 16.005):

> "(2) Grading, Excavation and Clearing. Grading and clearing by mechanical equipment for either road and/or development purposes may be restricted or regulated by the Approval Authority either at the time of approval of a development permit or of an application if there is a finding that such grading or clearing presents a real threat of pollution, contamination, silting of water bodies or water supplies, erosion and slide damage, or alteration of natural drainage patterns in the area. In all cases, excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and erosion control. The character of soils for fills and the characteristics of parcels or lots made usable by means of fill shall be suitable for the intended purpose."

Conclusion

The requirement has been met.

The County Development Code has been amended to require a review of any proposed development that is found to present a threat to life and property.

Requirement

2. Adopt standards which will be applied to development in known geologic hazardous areas.

Response

Lane County Development Code was amended (Ord. 9-84) to include the following standards pursuant to LC 16.005(2) cited previously under Goal 7, Requirement 1 (LC 16.005):

"(3) Conditions. The following conditions may be imposed at the time of approval of a development for which a permit or application is required and for which a finding has been made as required in LC 16.005(2) above in order to ensure site and area stability:

(a) Maintain vegetation and eliminate widespread destruction of vegetation.

(b) Carefully design new roads and buildings with respect to:

(i) Placement of roads and structures on the surface topography.

(ii) Surface drainage on and around the site.

(iii) Drainage from buildings and road surfaces.

(iv) Placement of septic tank disposal fields.

(c) Careful construction of roads and buildings:

(i) Avoid cutting toeslopes of slump blocks.

(ii) Careful grading around the site, especially avoiding oversteepened cut banks.

(iii) Revegetating distubed areas as soon as possible.

(d) Certification by a geologist or engineer that the above conditions have been complied with and/or that a hazard does not exist."

Conclusion

The requirement has been met.

Lane County has adopted appropriate standards which will be applied to development in geologic hazard areas.

Conclusion - Goal 7

Lane County complies with Goal 7.

The findings contained in this supplemental report and those contained in the Department's June 29, 1984 review support the decision that Lane County complies with Goal 7.

GOAL 11: PUBLIC FACILITIES AND SERVICES

Requirement

1. Adopt a plan policy which specifies the appropriate levels of service for rural areas, including unincorporated minor development centers and rural service centers. Note: This IOTC can be satisfied by adopting a policy identifying land classifications and service levels similar to those contained in the Public Facilities and Service Working Paper--Appendix B. If Appendix B is used, the classification titles must be amended to correspond with "current" classification titles (Example: Forest Lands I is now called Non-Impacted).

Response

Through the adoption of Ordinance No. PA 889 (Item 13), Lane County deleted Goal 11 Policies 1 and 2 and replaced them with the following:

"Lane County shall provide an orderly and efficient arrangement for the provision of public facilities, services and utilities. Designation of land into any given use category, either initially or by subsequent plan amendment, shall be consistent with the minimum level of services established for that category."

The County also adopted Policy No. 6 which references descriptions of their plan designations and service levels which are as follows:

Forest Land

Nonimpacted (F-1):

"Service Level: No minimum level of services is established for this category as it is intended primarily for resource management and not for habitation."

Impacted (F-2):

"Service Level: No minimum level of services is established. The category is intended primarily for resource management and although some degree of habitation will occur space population patterns are expected."

Agricultural Land

Exclusive Farm Use:

"Service Level: No minimum level of services is established. The category is intended primarily for resource management and although some degree of habitation will occur, sparce population patterns are expected."

Natural Resource

Mineral:

"Service Level: No minimum level of services is established. Category is intended for resource management and not habitation."

Rural Residential:

"Service Level: Schools, on-site sewage disposal, individual water supply systems, electrical service, telephone service, rural level fire and police protection, reasonable access to solid waste disposal facility."

Community:

"Service Level: Schools, on-site or community sewage disposal, individual or community water supply, electrical service, telephone service, rural level of fire and police protection, reasonable access to solid waste disposal facility."

Rural Commercial:

"Service Level: The same as required for Rural Residential (outside Community Designations)" (Ord. No. PA 892, Goal 11, Appendix 4).

Industrial (outside community designation):

"Service Level: The same as required for Rural Residential (outside Community Designations)" (Ord. No. PA 892, Goal 11, Appendix 4).

Park or Recreation:

"Service Level: No minimum level of services is established for Park or Recreation areas outside committed areas. Service level for Park or Recreation areas inside committed areas shall be consistent with that level required for the Community or committed area outside of a Community."

Marginal Lands:

"Service Level: Consistent with service levels for Rural Residential outside a Community designation."

Nonresource:

"Service Level: Consistent with service levels for Rural Residential outside a Community designation. The service level for cluster subdivisions of nonresource shall be consistent with Goal 2 policy 24."

Conclusion

Lane County satisfies this requirement.

Requirement

2. a. By policy or zoning provisions, limit development (in a manner consistent with Goal 11 (and the County's decisions regarding rural sewage systems) within unincorporated rural communities with known or suspected sewerage problem (Chesire, Elmira, Heceta, Goshen, Mapleton, Marcola and Vaughn); or

   b. Provide additional information which justifies in a manner consistent with the discussion under Goal 11, the county's decisions regarding development in rural communities with known or suspected sewerage problems.

Response

With the adoption of Ordinance 9-84, Lane County amended Chapter 16.004(5) of their Development Code to address IOTC 2a by including the following:

> "Prior to the zoning or rezoning of land under this Chapter, for lands situated within the designated community areas listed below, an affirmative conclusion stating the reasoning and facts relied upon, must be made that densities allowed by the proposed rezoning are low enough to provide reasonable assurance that any existing sewage problems will not be further aggrevated by development of the subject property:
>
> (a) Cheshire
> (b) Elmira
> (c) Goshen
> (d) Heceta
> (e) Mapleton
> (f) Marcola
> (g) Vaughn"

In addition, LC 13.050(12)(b), which established the County's requirements for obtaining individual sewage disposal systems, requires "reasonable proof that each prosposed parcel or lot can accommodate an individual sewage disposal system and at least one acceptable replacement area which meets the criteria established by OAR Chs.340-71-005 to 45." The above requirement provides adequate assurance that additional development in the seven referenced communities with existing or potential sewage problems will not aggrevate the sewerage situation.

Conclusion

Lane County satisfies this requirement.

Requirement

3. Amend Sections 13.050(12) and 13.050(13) to indicate that the establishment of rural sewage or water systems must be consistent with the appropriate of levels of service policies required by Goal 11, IOTC 1.

Response

Ordinance 10-84 amends Chapter 13.010(12) and (13) of Lane County's Development Code to require that the establishment of rural sewerage facilities and water systems shall be consistent with RCP Goal 2 Policy 24 and RCP Goal 11 Policies, including level of service definitions. Lane County also indicates the following:

> "With this ordinance, Land County has amended Sections 13.050(12) and (13) to provide that the

establishment of rural sewerage and water facilities must be consistent with RCP Goal 2 Policy #24, provision of services to cluster subdivisions in the rural area, and RCP Goal 11 policies. By requiring consistency between the provision of services in the rural areas and the above-mentioned policies, Lane County is ensuring the 'timely, orderly and efficient provision of services' to new development approved within the rural areas. Sections 13.050(12) and 13.050(13) now require community sewer or community water systems be established only in a manner consistent with public facility and service policies (including appropriate levels of service for rural areas)" (Ordinance 10-84, Exhibit A, p. 2).

Conclusion

Lane County satisfies this requirement.

Conclusion - Goal 11

Lane County complies with Goal 11. Lane County's Public Facilities Working Paper, Goal 11 Plan Policies and Development Code requirements as well as specific amendments which include: (1) level of service definitions for each plan designation, (2) a requirement to examine proposed zone changes in suspected rural "sewerage" problem areas to insure that any existing problems will not be aggrevated through an intensification of density, and (3) policy and ordinance requirments that rural development consistent with the specified rural level of service definitions, all contribute to the orderly provision of public facilities and services in rural Lane County.

GOAL 15: WILLAMETTE RIVER GREENWAY

Requirement

1. Amend zoning maps 304, 304A, 305, 330, 332, 347, 396, 411, 417, 418, 425, 437, 440, 448, 471, 528, 1005, 1006, 1008, 1010, 1011, 1012, and 1013 to display the correct LCDC-approved Greenway Boundary.

Response

The County has amended the zoning maps listed above that apply to areas outside the Eugene/Springfield Metro Area so as to display the correct LCDC-approved Greenway Boundary. Changes to maps 347, 396, 411, 437, 528, 1005, 1006, 1008 and 1012 will be corrected in conjunction with the Eugene/Springfield Metro Area continuance.

Conclusion

The requirement has been met.

Requirement

2. Amend the Greenway ordinance to clearly require protection of significant fish and wildlife habitats, agricultural lands, and identified scenic qualities and viewpoints, per Sections C.3.d., a., and c. of the Goal.

Response

Lane County has eliminated the term "guidelines" from the Greenway Development Permit Approval section of its Greenway Ordinance (Section 16.254(4)) and has added the following as criteria for permit approval:

"(i) Preservation and maintenance of land inventoried as 'agriculture' in the adopted Willamette River Greenway Plan for farm use and minimize interference with the long-term capacity of lands for farm use.

(ii) Protection, conservation or preservation of significant scenic areas, viewpoints and vistas...

(xiv) Protection of significant fish, wildlife habitat and natural areas."

A decision to approve a Greenway Development Permit must require findings that the proposed intensification, change of use or development conforms to these (as well as other) criteria, according to Section 16.254(4) of the Greenway Ordinance.

Conclusion

The requirement has been met.

Requirement

3. Amend Section 16.254(2)(k) of the Greenway Ordinance to eliminate all language following the phrase, "or personal noncommercial use."

Response

Section 16.254(2)(k) of the Greenway Ordinance has been amended to eliminate all language following the phrase, "or personal noncommercial use." This was done so that only the propagation or cutting of timber for public safety or personal noncommercial use is exempt from local Greenway Permit review, consistent with Goal 15.

Conclusion

The requirement has been met.

Requirement

4. Amend Section 16.254(c) of the Lane Code to ensure that only water-dependent and water-related uses themselves are exempt from the 100-foot Greenway setback requirement.

Response

Section 16.254(b) has been amended (Ord. No. 11-84) so as to eliminate the phrase "those in conjunction with." Therefore, the Code exempts only water-dependent and water-related uses themselves from the Greenway setback requirement.

Conclusion

The requirement has been met.

Requirement

5. Amend Section 16.254(6) of the Lane Code to require notification of ODOT of actions taken on applications for intensification, change of use or development in the Willamette Greenway.

Response

Section 16.254(6) of the Code has been amended to require notification of ODOT of actions taken on applications for a Greenway Permit, as required.

Conclusion

The requirement has been met.

Requirement

6. Amend Section 16.254(2)(a) of the Greenway Ordinance to require either:

   a. Greenway permits in areas designated "urban" beyond 150 feet of the ordinary low water line, or

   b. Some other mechanism which ensures protection of Greenway values in these areas.

(Note: This could also be accomplished by LCDC amendment of the ODOT Greenway Plan by changing the designation of the area south of the Cottage Grove UGB from "urban" to "rural.")

Response

Section 16.254(2)(a) has been deleted from the Greenway Ordinance. This has the effect of requiring Greenway permits in areas designated "urban" beyond the 150-foot line.

Conclusion

The requirement has been met.

Requirement

7. Adopt implementing measures that protect the Pudding Creek Heronry.

Response

This requirement pertains to the Eugene/Springfield Metro Plan, which has been segmented and continued until October 11, 1984.

Requirement

8. Either adopt findings which explain how the current zone designations for Big Island protect the Confluence Heronry, or adopt other implementing measures that protect the Confluence Heronry.

Response

This requirement pertains to the Eugene/Springfield Metro Plan which has been segmented and continued until October 11, 1984.

Requirement

9. Modify Mineral and Aggregate Resources Policy 11 to also reference Section C.3.d. of Goal 15 to ensure protection and significant fish and wildlife habitats in the Willamette Greenway.

Response

Lane County has amended Mineral and Aggregate Policy 11 to also reference Section C.3.d. of Goal 15 (Ord. No. PA 892).

Conclusion

This requirement has been met.

Conclusion - Goal 15

Lane County complies with Goal 15.

The findings contained in this supplemental report and those contained in the Department's July 19, 1984 review support the decision that Lane County complies with Goal 15.

Submission of
Additional Material

Subject: Geotechnical Summary of the Nature of Landslide Hazard
Proposed Residential Development
Tax Lot 507 (a.k.a. Parcel 2), Tax Map 18-02-11; Lane County
R. R. Baker Road, Springfield, Oregon

Dear Mr. and Mrs. Goodman,

Our understanding is that a small portion of the project site, located at the southwest corner near the road, is proposed for development as a single-family residence. At your request, we have reviewed the subject project site for the purpose of making a preliminary determination of the nature of landslide hazard and to present practical recommendations for site development. Our services, to date, have included:

- A visual inspection of the subject 10-acre site,
- Review of landslide hazards mapped for the site by the Department of Geology and Minerals Industries and Geology,
- Review of mapped geology and faulting of the general area,
- Review of current and historic aerial photography of the area, and
- These recommendations.

To summarize our review:

- The project site is located within, or near, the south end of the upper scarp zone of a very large, ancient landslide that moved soils and rock to the west.
- There are no visible indications of recent slope movement on the subject project site or on undisturbed areas on adjacent properties. The DOGAMI mapping of landsliding in this area indicates the approximate extent of the ancient landslide but does not include mapping of any active landslide activity.
- Outside of the project site, we observed areas of localized soil creep on the south side of the R. R. Baker Road which are most likely the result of over-steepened road cut embankments.
- The ground surface gradient at the proposed area for homesite development is low, in the range of approximately 10 to 15-percent. Based on our extensive experience in geotechnical engineering for similar projects in similar areas, the existing or future hazard of landsliding is low and manageable for developments similar to what is being proposed in this geologic setting.

Therefore, it is my professional opinion that there is not a significant landslide hazard in the proposed homesite development area, and extensive or drastic safeguards are NOT needed to ensure safety on or off the property with respect to hazards associated with slope movement.

To verify subsurface ground conditions, confirm the low probability of any slope movement in the proposed development area, and to ensure that development will be designed and constructed in a manner that will not induce any geotechnical hazards, *we recommend that a qualified professional geotechnical engineer make a geotechnical investigation of the home site prior to foundation design and construction*. This investigation should include:

- Geotechnical probing and/or borings which adequately characterize subsurface conditions,
- A written Report that summarizes site conditions and makes recommendations for:
  - The current nature of slope stability,
  - Suitable foundation types and load capacity,
  - Drainage, and
  - General earthwork and site construction methods.

This geotechnical investigation should be a requirement for obtaining a building permit to construct the proposed residence.

Thank you for the opportunity to be of service. Please call me if you have any questions.

Sincerely,

EXPIRES: DECEMBER 31, 2020

RE: Open Record Statement in 509-PA19-05298, Nimpkish application for a forest template dwelling

Please accept the following statement for the record on behalf of 1000 Friends of Oregon in the Nimpkish application (509-PA19-05298) for a forest template dwelling on tax lot 507 (map no. 18-02-11-00). Ex 1. Please include 1000 Friends in any subsequent notice of decision and any further correspondence related to this application.

The County cannot approve multiple forest template dwellings on a tract

The subject property does not qualify for a forest template dwelling because it is part of a tract that already contains a dwelling and dwelling approvals. Ex 1 (showing existing dwelling sites); Ex 5 (dwelling applications and dwelling approvals). The template dwelling statute does not allow the siting of a template dwelling on a tract that already contains a dwelling. ORS 215.750(4)(c). A tract is "one or more contiguous lots or parcels under the same ownership." ORS 215.010(2). The subject property, tax lot 507, is part of a tract owned by Gray and Dorotea Goodman. The Goodmans own tax lots 501, 506, 507, 508, and 509. Ex 2; Ex 3. Those five tax lots are contiguous. Ex 4. The Goodmans own 507 and 509 as the sole owners and members of Nimpkish, LLC. Ex 2; Ex 3 at 22, 32. For that reason, the Goodmans have sole ownership and control of all five parcels. The tax lots are "under the same ownership," and constitute a single tract.

One of the parcels within the tract already contains a dwelling, and two have dwelling approvals. Tax lot 501 contains an existing dwelling at 86690 RR Baker Road. Ex 3 at 1, Ex 1 at 2. The county has approved tax lots 508 and 509 for dwellings. Ex 5. The Goodman's cannot hide their ownership of the tract behind an entity for the purpose of obtaining multiple forest template dwellings. ORS 215.750(4)(c), 215.010(2).

The County cannot ignore the minimum fuel break standards

The proposed site plan fails to show the minimum primary and secondary fuel breaks required by state law and lane code. OAR 660-006-0035(3); LC 16.211(8)(c). The conditions of approval paraphrase the code, and give ultimate discretion of how to establish the fuel breaks in compliance with those provisions to the building department. Applying the fuel break standards requires a degree of judgment and discretion. The county cannot defer the task of determining the fuel break distances to a future, non-public decision-making process. *Eng v. Wallowa County*, ___ Or LUBA ___ (LUBA No 2018-085, Opinion, May 7, 2019) (slip op at 37); *see Van Dyke v. Yamhill County* (City of Carlton), ___ Or LUBA ___ (LUBA No 2019-047, Opinion, Oct 11, 2019) (slip op at 43-45) (discussing "punting" of discretionary decisions to a later decision); *see also*, *Wachal v. Linn County*, ___ Or LUBA ___ (LUBA No 2018-034, Opinion, Sept 28, 2018) (slip op at 12-13).

State law requires landowners to "maintain a primary fuel-free break area surrounding all structures" and "maintain a secondary fuel-free break" on land surrounding dwellings. OAR 660-006-0035(3). The fuel-free breaks must be on land "owned or controlled by the owner in accordance with the provisions in 'Recommended Fire Siting Standards for Dwellings and Structures and Fire Safety Design Standards for Roads'...," published by the Oregon Department of Forestry (ODF). *Id.*

The ODF standards recommend a primary safety zone "extending a minimum of 30 feet in all directions around structures." Ex 6 at 2. Similarly, the standards recommend a secondary fuel break "extending a minimum of 100 feet in all directions around the primary safety zone." *Id.* at 2-3. The primary fuel break distance increases "[a]s slope increases... parallel to the slope and down the slope[.]" *Id.* at 2. To that end, the ODF standards provide a table that shows the "Feet of Additional Safety Down Slope" that corresponds to down slope slopes of 10 percent or greater. *Id.* at 3.

In accordance with the ODF standards required by OAR 660-006-0035(3), Lane Code 16.211(8)(c) reproduces the ODF language. Lane Code requires a "primary safety zone... extending a *minimum* of 30 feet in all directions around dwellings." LC 16.211(8)(c)(i)(aa) (emphasis added). The code requires a secondary fuel break "extending a *minimum* of 100 feet in all directions around the primary safety zone." *Id.* (8)(c)(i)(bb) (emphasis added). And dwelling owners are required to maintain the primary and secondary fuel breaks "on land surrounding the dwelling... that is owned or controlled by the owner in compliance with these requirements." *Id.* (8)(c)(i); *see* OAR 660-006-0035(3) (stating same). The code also requires additional primary

safety zone as the slope increase away from and down the slope from the dwelling or structure. *Id.* (8)(c)(i)(aa).

The current site plan fails to show the secondary fuel break extending a minimum of 100 feet in all directions around the primary safety zone. Instead, the secondary fuel break in the site plan stops at the edge of the parcel boundary and does not extend the required minimum of 100 feet. For that reason, the approved site plan and fuel breaks violates state law and the county's code.

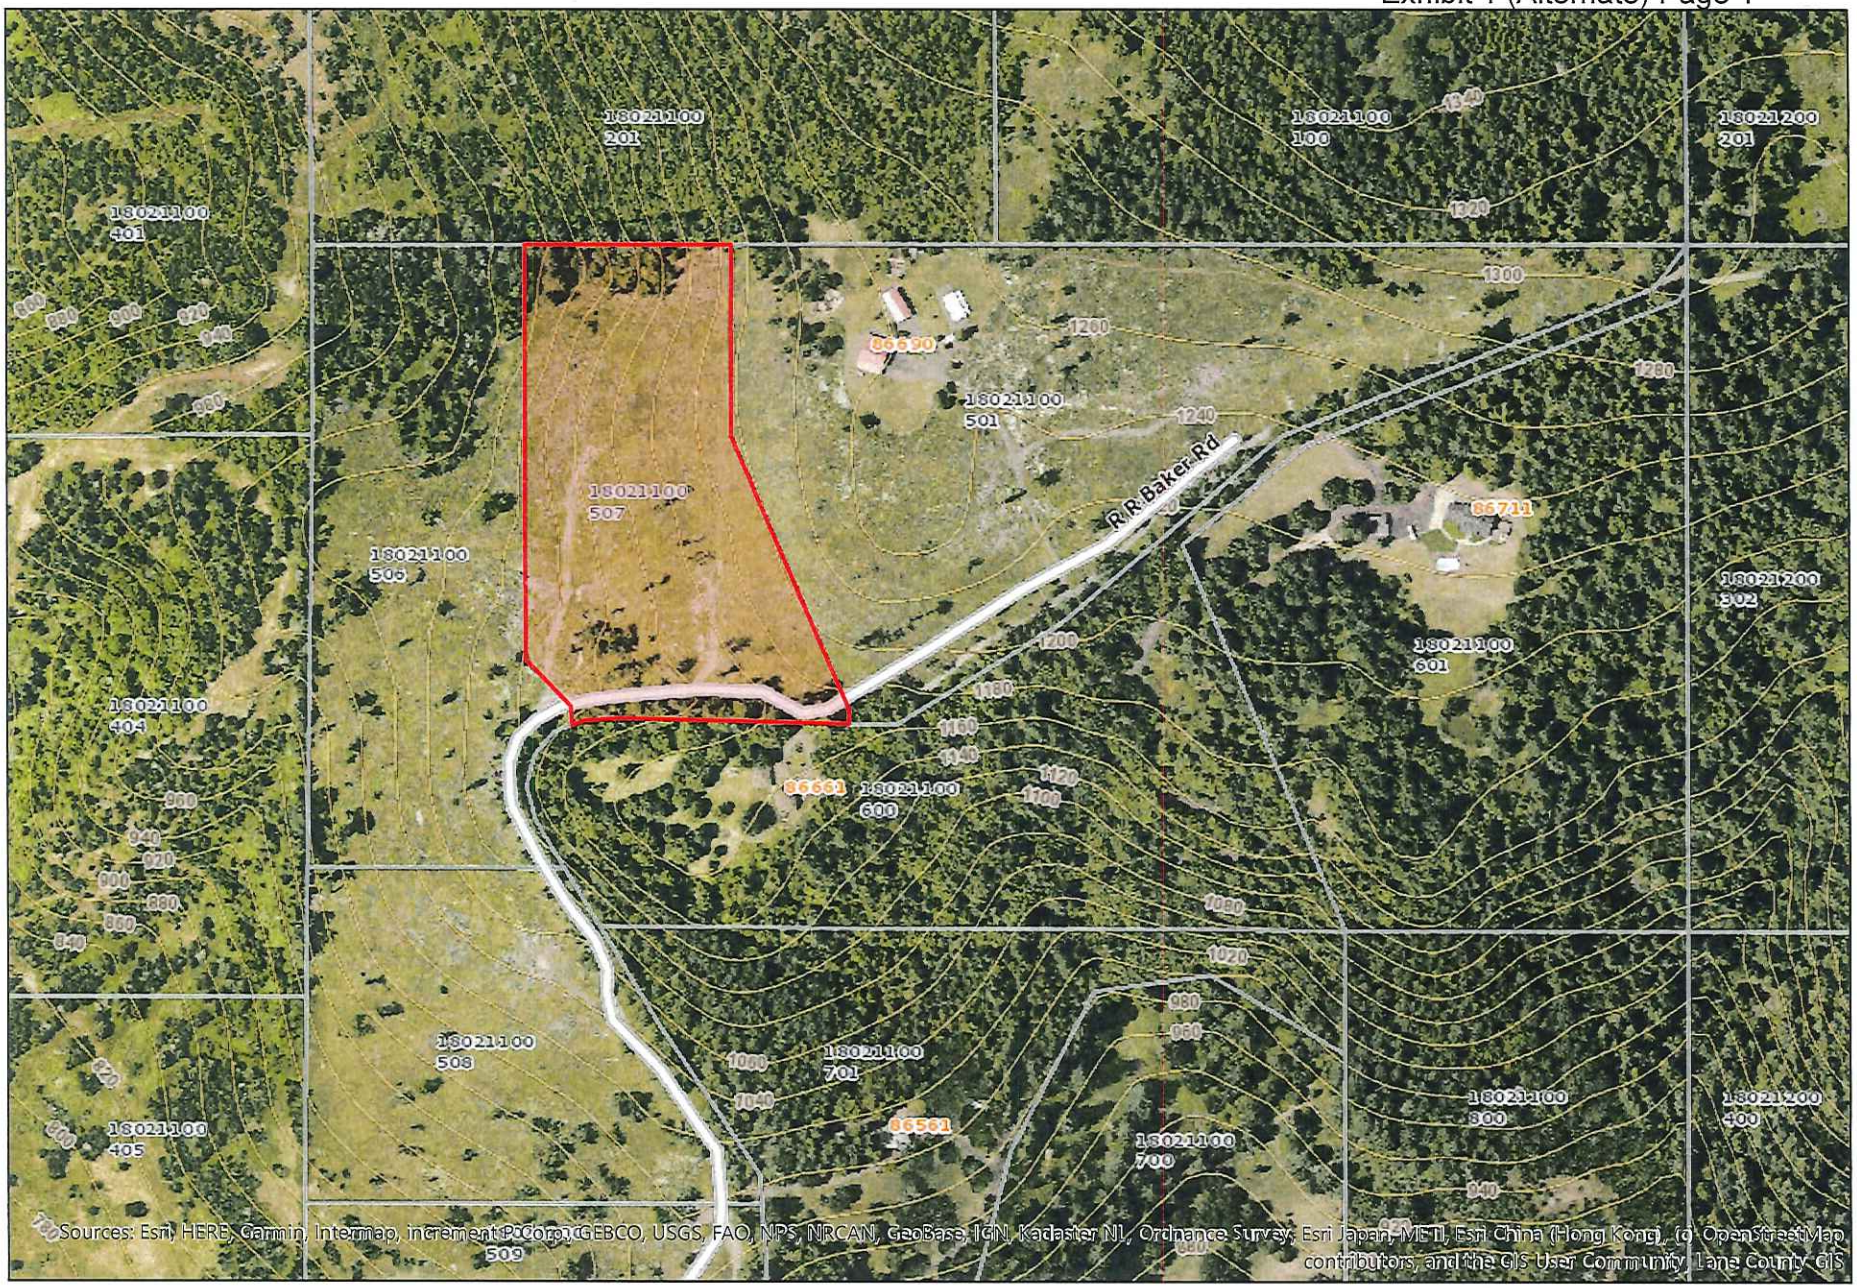
A homeowner cannot maintain the vegetation within the fuel breaks to the appropriate standards if the fuel break extends off the property and beyond the owner's control. For that reason, the provisions require the landowners to establish fuel breaks on land they either own or control. If they do not own the land, the law requires landowners to obtain an easement to ensure their control over the minimum distances. The county has previously required developers to comply with this requirement. Ex 7 (requiring fuel breaks to be established to minimum distances, whether on the subject property or through an easement). The language of the code has not changed since that time, and for that reason, the county's about face is inexplicable and arbitrary and capricious.

The county's failure to require the applicant to establish the required minimum fuel break distances fails to give effect to the language in the 1991 ODF siting standards cited by OAR 660-006-0035(3) and the language in the county's own code. The county's interpretation allows landowners to establish fuel breaks that are less than the required minimum distance. Fuel breaks are an important component of ensuring the safety of residents who live in the wildland urban interface and first responders. Adequate fuel breaks are meant to protect people and property in the event of a wildfire. The county cannot override state law and impose a standard that is less protective of health, safety, and welfare than the state requirement.

In this case, the Goodmans own and control the adjacent parcel, tax lot 506. Ex 3 at 30. The county has no basis for failing to extend secondary fuel break to the minimum 100-foot distance. And the county has no basis for failing to require the Goodmans to establish an easement for the fuel break onto tax lot 506 so that any future owner of tax lot 507 can maintain the fuel break for as long as the dwelling remains on the property.

Conclusion

1000 Friends asks that the hearings official to deny the applicant's request for a forest template dwelling. The applicants' tract already contains a dwelling, and the county cannot approve a second forest template dwelling. In the alternative, the applicant must submit a site



plan that includes the minimum secondary fuel break distance required by law (and accompanying easement to establish control over the entirety of the fuel break if necessary). 1000 Friends requests that the hearings official issue conditions of approval that require compliance with an approved site plan that demonstrates compliance with the minimum fuel break standards. The county cannot defer ultimate review of the site plan and evaluation of whether the site plan complies with the applicable code provisions to a non-public proceeding.

Sincerely,

Andrew Mulkey
Rural Lands Staff Attorney
1000 Friends of Oregon
(503) 497-1000x138
andrew@friends.org

1000 Friends of Oregon is a non-profit organization founded by Governor Tom McCall shortly after the Legislature passed Senate Bill 100, which created the land use planning rules that shape Oregon's communities. Since its founding in 1975, 1000 Friends has served Oregon by defending Oregon's land use system—a system of rules that creates livable communities, protects family farms and forestlands, and conserves the natural resources and scenic areas that make Oregon such an extraordinary place to live. 1000 Friends accomplishes this mission by monitoring local and statewide land use issues, enforcing state land use laws, and working with state agencies and the Legislature to uphold the integrity of the land use system.

REGISTRY NUMBER: 1530329-91

In accordance with Oregon Revised Statute 192.410-192.490, the information on this application is public record. We must release this information to all parties upon request and it will be posted on our website.

For office use only

Please Type or Print Legibly in Black Ink. Attach Additional Sheet if Necessary.

1. **NAME OF LIMITED LIABILITY COMPANY:** (Must contain the words "Limited Liability Company" or the abbreviations "LLC" or "L.L.C.")

NIMPKISH, LLC

2. **DURATION:** (Please check one.)

● Duration shall be perpetual.

○ Latest date upon which the Limited Liability Company is to dissolve is _____

3. **PRINCIPAL OFFICE:** (Must be a physical street address)

86690 RR BAKER ROAD
SPRINGFIELD OR 97478

4. **REGISTERED AGENT:** (Individual or entity that will accept legal service for this business)

GRAY GOODMAN

5. **REGISTERED AGENT'S PUBLICLY AVAILABLE ADDRESS:** (Must be an Oregon Street Address, which is identical to the registered agent's office.)

86690 RR BAKER ROAD
SPRINGFIELD OR 97478

6. **ADDRESS WHERE THE DIVISION MAY MAIL NOTICES:**

86690 RR BAKER ROAD
SPRINGFIELD OR 97478

7. **HOW WILL THIS LIMITED LIABILITY COMPANY BE MANAGED?**

● This LLC will be member-managed by one or more members.

○ This LLC will be manager-managed by one or more managers.

8. **IF RENDERING A LICENSED PROFESSIONAL SERVICE OR SERVICES, DESCRIBE THE SERVICE(S) BEING RENDERED:** ORS 58.015(5)(m)

9. **OPTIONAL PROVISIONS:** (Attach a separate sheet if necessary.)

○ **BENEFIT COMPANY:** The Limited Liability Company is a benefit company subject to sections 1 to 11 of chapter 269, Oregon Laws 2019. (additional requirements apply)

● **INDEMNIFICATION:** The company elects to indemnify its members, managers, employees, agents for liability and related expenses under ORS 63.160 - 63.170.

○ SEE ATTACHED

10. **NAME AND ADDRESS OF EACH PERSON WHO IS FORMING THIS BUSINESS:** (ORGANIZER)

GRAY GOODMAN
DOROTEA GOODMAN
86690 RR BAKER ROAD
SPRINGFIELD OR 97478

IN THE CIRCUIT COURT OF THE STATE OF OREGON FOR LANE COUNTY

GRAY McKENZIE GOODMAN and DOROTEA E.C. GOODMAN,

Plaintiffs,

vs.

ROBERT G. REYNOLDS, ALMA REYNOLDS, LOUIE T. REYNOLDS, and unknown heirs, devisees, successors and assigns of RUSSELL O. REYNOLDS and VERNA MAE REYNOLDS,

Defendants.

Case No. 15CV26890

GENERAL JUDGMENT (DECLARATORY)

THIS MATTER came on before the Court on the motion of Plaintiffs for an order of default against Defendants ROBERT G. REYNOLDS, ALMA REYNOLDS, LOUIE T. REYNOLDS, and unknown heirs, devisees, successors and assigns of RUSSELL O. REYNOLDS and VERNA MAE REYNOLDS; it appearing from the records that Defendants were served with true copies of the Summons and Complaint in Lane County, Oregon on or before October 19, 2015, and that Defendants have not answered nor made any appearances herein, although the time provided therefore has now since expired;

IT FURTHER appearing that Defendants are not or were not at the time of service or at any time during the pendency of these proceedings members of the military of the United States or any of its allies; nor are the Defendants minors, nor are any of the Defendants incapacitated persons;

The Court having entered an order of default against the Defendants and finding generally in favor of Plaintiffs and against Defendants in regards to Plaintiffs' complaint; **NOW, THEREFORE;**

IT IS HEREBY ORDERED AND ADJUDGED that Plaintiffs have judgment against Defendants ROBERT G. REYNOLDS, ALMA REYNOLDS, LOUIE T. REYNOLDS, and unknown heirs, devisees, successors and assigns of RUSSELL O. REYNOLDS and VERNA MAE REYNOLDS as detailed below.

1. Plaintiffs are hereby declared to be the owner in fee simple of the real property described as Tract 1 in the Complaint, as shown in attached Exhibit A, more particularly described with the legal description as follows:

> BEGINNING at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A. Wallace Donation Land Claim No. 40 of said Township and Range; thence, Northerly along said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence, Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe set on the centerline of a private road; thence, Southwesterly along the center of the private road the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51° 30' West 564 feet; South 60° West 372 feet; North 89° 30' West 555 feet; South 86° West 75 feet; South 69° West 75 feet; South 41° West 75 feet; South 14° West 75 feet; South 16° East 75 feet; South 31° East 775 feet; South 04° East 274 feet; South 34° West 260 feet; South 74° 30' West 290 feet; South 45° West 75 feet and South 11° West to a point on the North line of said Claim No. 40; thence, Westerly along said Claim line to the point of beginning in Lane County, Oregon, TOGETHER with the East 1/2 of said private road, being a strip of land 20 feet in width lying adjacent to and East of the above described center line.
>
> ALSO: All of the remainder of the private road (being a strip of land 40 feet in width) extending from the above mentioned intersection of the centerline thereof with the Northerly line of said Claim No. 40 in a Southeasterly direction to the Northerly line of County Road No. 421 the centerline of which is more particularly described as follows: Beginning at the Southeast corner of Section 11, Township 18 South, Range 2 West of the Willamette Meridian; thence, West 1199.5 feet and North 816.5 feet to an iron pipe set on the Northerly line of County Road No. 421 as now located through said Section 11, and marking the TRUE POINT OF BEGINNING; thence, Northwesterly along said centerline the following courses and distances: North 0° 30' West 470 feet; North 12° West 75 feet; North 26° West 75 feet; North 52° West 75 feet; West 200 feet; North 74° West 145 feet; South 77° West 590 feet; North 89° West 75 feet; North 37° West 75 feet and North 11° East to its intersection with the North line of said Claim No. 40 and the most Southerly point on the centerline of the private road as described above.

LEAHY & KIERAN
Attorneys At Law
223 A Street

Springfield Oregon
(541) 746-9621
Fax:(541)746-4109

ALSO: A strip of land 20 feet in width lying adjacent to and East of the East line of said 40 foot private road and extending 224 feet Northerly from the intersection of the East line of said 40 foot private road with the Northerly line of County Road No. 421 (being 40 feet in width).

2. Plaintiffs are hereby declared to be the owner in fee simple of the real property described as Tract 2 in the Complaint, as shown in attached Exhibit A attached hereto for identification, more particularly described with the legal description as follows:

Commencing at a Lane County Brass Cap monument marking the Northwest corner of the John Wallace Donation Land Claim Number 40 in Township 18 South, Range 2 West, Willamette Meridian; thence along the north line of Donation Land Claim Number 40, North 89°54'43" East a distance of 2051.55 feet to a 5/8" rebar with a yellow plastic cap marked "D.W. Baker PLS 1978" on the North-South centerline of Section 11, Township 18 South, Range 2 West, Willamette Meridian and the **TRUE POINT of BEGINNING**; thence leaving the North-South centerline of Section 11 and continuing along the north line of Donation Land Claim Number 40, North 89°54'43" East a distance of 365.26 feet to the point of intersection of the North line of Donation Land Claim Number 40 and the westerly boundary of a 40 foot wide private road (commonly known as R.R. Baker Road); thence along the westerly boundary of said private road and along the arc of a 95.00 foot radius curve left (chord bears South 30°56'28" West 61.34 feet) an arc distance of 62.46 feet to a point marked by a 1/2" iron pipe set in County Survey File Number 17663 (record calls 5/8" iron pin); thence leaving the westerly boundary of said 40 foot private road and along the north boundary of the property described in a Warranty Deed recorded July 6, 1998 on Reel 2438R, Instrument No. 9852390, Lane County, Oregon Official Records, North 87°20'48" West a distance of 334.35 feet to the intersection of the North-South centerline of Section 11 and said north boundary, as described on Reel 2438R, Instrument No. 9852390, Lane County, Oregon Official Records, said intersection point being marked by a found 6" x 6" x 18" Stone set on the North-South centerline of Section 11 in County Survey Number 1102; thence along the North-South centerline of Section 11, North 0°16'18" East a distance of 36.63 feet to the **TRUE POINT of BEGINNING**, all in Lane County, Oregon and containing 15,530 square feet.

3. Plaintiffs are entitled to possession of Tract 1 and 2, as described above, thereof, free of any estate, title , claim, lien, or interest.

4. It is hereby declared that title is quieted in the premises of Plaintiffs as Tract 1 and 2.

5. It is hereby declared that Defendants and any others claiming under Defendants are enjoined from asserting any title, estate, claim, lien or interest in Tract 1 and 2 or any portion thereof;

6. It is further declared that Defendants have no adverse claims as to Plaintiffs' ownership in fee simple of the real property described as Tract 1 and 2; and

7. Plaintiffs shall bear all costs for this action and the recording of, survey and legal description for Tract 1 and 2. Plaintiffs are responsible for their own attorney fees, costs and assessments.

8. This General Judgment may be recorded at Lane County Deeds and Records at Plaintiff's expense.

BARGAIN AND SALE DEED

Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman, Husband and Wife, Grantor, conveys, bargains and sells to NIMPKISH, LLC, Grantee, the following real property situated in Lane County, Oregon, and more particularly described as follows:

See Exhibit A attached hereto and incorporated herein by reference.

Subject to Easements, Reservations and Restrictions of Record and Specifically including, but not limited to, that certain Declaration of Easement and Road Maintenance Agreement dated 03/20/2019, received 03/21/2019, Reception No. 2019-10357, Lane County Deeds and Records.

The true consideration of this conveyance is other than monetary.

BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON TRANSFERRING FEE TITLE SHOULD INQUIRE ABOUT THE PERSON'S RIGHTS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010. THIS INSTRUMENT DOES NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY THAT THE UNIT OF LAND BEING TRANSFERRED IS A LAWFULLY ESTABLISHED LOT OR PARCEL, AS DEFINED IN ORS 92.010 OR 215.010, TO VERIFY THE APPROVED USES OF THE LOT OR PARCEL, TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES, AS DEFINED IN ORS 30.930, AND TO INQUIRE ABOUT THE RIGHTS OF NEIGHBORING PROPERTY OWNERS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010.

DATED this 20 day of March, 2019.

Gray McKenzie Goodman

Dorotea Elizabeth Chiara Goodman

STATE OF OREGON)

NEW TAX LOT

Exhibit B NTL 508

Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence Northerly along said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe set on the centerline of a private road; thence Southwesterly along the center of the private road the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51°30' West 564 feet; South 60° West 372 feet; North 89°30' West 555 feet; South 86° West 75 feet; South 69° West 75 feet; South 41° West 75 feet; South 14° West 75 feet; South 16° East 75 feet; South 31° East 775 feet; South 04° East 274 feet; South 34° West 260 feet; South 74°30' West 290 feet; South 45° West 75 feet and South 11° West to a point on the North line of said Claim No. 40; thence Westerly along said Claim line to the point of beginning in Lane County, Oregon, TOGETHER with the East ½ of said private road, being a strip of land 20 feet in width lying adjacent to and East of the above described centerline.

CANCELLED 2019

ALSO: All of the remainder of the private road (being a strip of land 40 feet in width) extending from the above mentioned intersection of the centerline thereof with the Northerly line of said Claim No. 40 in a Southeasterly direction to the Northerly line of County Road No. 421 the centerline of which is more particularly described as follows: Beginning at the Southeast corner of Section 11, Township 18 South, Range 2 West of the Willamette Meridian; thence West 1199.5 feet and North 816.5 feet to an iron pipe set on the Northerly line of County Road No. 421 as now located through said Section 11, and marking the TRUE POINT OF BEGINNING; thence Northwesterly along said centerline the following courses and distances: North 0°30' West 470 feet; North 12° West 75 feet; North 26° West 75 feet; North 52° West 75 feet; West 200 feet; North 74° West 145 feet; South 77° West 590 feet; North 89° West 75 feet; North 37° West 75 feet and North 11° East to its intersection with the North line of said Claim No. 40 and the most Southerly point on the centerline of the private road as described above.

ALSO: A strip of land 20 feet in width lying adjacent to and East of the East line of said 40 foot private road and extending 224 feet Northerly from the intersection of the East line of said 40 foot private road with the Northerly line of County Road No. 421 (being 40 feet in width).

LESS: Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence Northerly along

said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe set on the centerline of a private road, being the TRUE POINT OF BEGINNING; thence Southwesterly along the center of the private road the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51°30' West 564 feet; South 60° West 372 feet; North 89°30' West 315 feet; thence leaving said centerline North to the said North line of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the said North line of the South 1/2 of the Northeast 1/4 of said Section 11 to the point of beginning, in Lane County, Oregon, TOGETHER with the East ½ of said private road, being a strip of land 20 feet in width lying adjacent to and East of the above described centerline.

CANCELLED 2019

ALSO LESS: Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian with the North line of the James A Wallace Donation Land Claim No. 40 of said Township and Range; thence Northerly along said 1/4 line to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence Easterly along the North line of the South 1/2 of the Northeast 1/4 of said Section 11 to an iron pipe; thence Southwesterly the following courses and distances: South 34° West 101 feet; South 70° West 774 feet; South 51°30' West 564 feet; South 60° West 372 feet; and North 89°30' West 315 feet to the TRUE POINT OF BEGINNING, said point being on the West boundary of that land described in Exhibit A of that deed recorded December 22, 2017, as Instrument No. 2017-062866, Lane County Oregon Deed Records, said point also being the centerline of a private road; thence along the center of the private road North 89°30' West 240.00 feet; thence South 86° West 75.00 feet; thence leaving said centerline North 43°50'00" West 303.43 feet; thence North 666.20 feet, more or less, to the said North line of the South 1/2 of the Northeast 1/4 of said Section 11; thence along the said North line of the South 1/2 of the Northeast 1/4 of said Section 11 East 525.00 feet to the Northwest corner of that property described in Exhibit A of said Instrument No. 2017-062866; thence along the West line of said property South 883.30 feet, more or less, to the point of beginning, in Lane County, Oregon, TOGETHER with the Southerly 1/2 of said private road, being a strip of land 20 feet in width lying adjacent to and Southerly of the above described centerline.

ALSO LESS: Beginning at the intersection of the 1/4 line running North and South through Section 11, Township 18 South, Range 2 West of the Willamette Meridian, with the North line of the James A. Wallace Donation Land Claim No. 40, of said Township and Range; thence along said 1/4 line N0°16'18"E 1204.00 feet to the TRUE POINT of BEGINNING; thence continuing along said 1/4 line N0°16'18"E 1209.50 feet, more or less, to the Northwest corner of the South 1/2 of the Northeast 1/4 of said Section 11; thence along the North line of said South 1/2 of the Northeast 1/4 of said Section 11 N89°59'29"E 316.28 feet to the Northwest corner of the property described as Exhibit A in property line adjustment recorded on July 7, 2018, as

Instrument No. 2018-034401, Lane County Oregon Deed Records; thence leaving said North line of the South 1/2 of the Northeast 1/4 of said Section 11 and along the West line of said property South 681.08 feet, more or less, to a point; thence S43°50'00"E 303.43 feet to a point on the centerline of a private road (RR Baker Rd.) described in deed recorded on March 6, 2014, as Instrument No. 2014-007870, Lane County Oregon Deed Records; thence leaving said West line and along said centerline S69°00'00"W 75.00 feet; thence S41°00'00"W 75.00 feet; thence S14°00'00"W 75.00 feet; thence S16°00'00"E 75.00 feet; thence S31°00'00"E 97.34 feet; thence leaving said centerline N89°43'42"W 465.60 feet to the point of beginning, in Lane County, Oregon, TOGETHER with the Easterly 1/2 of said private road, being a strip of land 20 feet in width lying adjacent to and Easterly of the above described centerline.

BARGAIN AND SALE DEED

Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman, Husband and Wife, Grantor, conveys, bargains and sells to NIMPKISH, LLC, Grantee, the following real property situated in Lane County, Oregon, and more particularly described as follows:

See Exhibit A attached hereto and incorporated herein by reference.

Subject to Easements, Reservations and Restrictions of Record and Specifically including, but not limited to, that certain Declaration of Easement and Road Maintenance Agreement dated 03/20/2019, received 03/21/2019, Reception No. 2019-10337, Lane County Deeds and Records.

The true consideration of this conveyance is other than monetary.

BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON TRANSFERRING FEE TITLE SHOULD INQUIRE ABOUT THE PERSON'S RIGHTS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010. THIS INSTRUMENT DOES NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY THAT THE UNIT OF LAND BEING TRANSFERRED IS A LAWFULLY ESTABLISHED LOT OR PARCEL, AS DEFINED IN ORS 92.010 OR 215.010, TO VERIFY THE APPROVED USES OF THE LOT OR PARCEL, TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES, AS DEFINED IN ORS 30.930, AND TO INQUIRE ABOUT THE RIGHTS OF NEIGHBORING PROPERTY OWNERS, IF ANY, UNDER ORS 195.300, 195.301 AND 195.305 TO 195.336 AND SECTIONS 5 TO 11, CHAPTER 424, OREGON LAWS 2007, SECTIONS 2 TO 9 AND 17, CHAPTER 855, OREGON LAWS 2009, AND SECTIONS 2 TO 7, CHAPTER 8, OREGON LAWS 2010.

DATED this 20 day of March, 2019.

Gray McKenzie Goodman

Dorotea Elizabeth Chiara Goodman

STATE OF OREGON)
) ss.
County of Lane)

This instrument was acknowledged before me on March 20, 2019, by Gray McKenzie Goodman and Dorotea Elizabeth Chiara Goodman.

Applicant: GRAY GOODMAN
Owner: GOODMAN GRAY MCKENZIE & DOROTEA E C
Agent: JAMES BELKNAP
Assessor's Map & Taxlot: 18-02-11-00-00506
Contiguous Property: None
Base Zone: F2
Combining Zone: /NONE

Proposal: A request for Director Approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(2)-2.4, (3), (5) and (6).

The purpose of this notice is to acquaint you with the proposed development, to gather information you may have about the project, and provide an opportunity to comment and express concerns related to the approval criteria, prior to the Planning Director's decision to approve or deny the proposal.

The application and related materials are available for inspection at the Lane County Land Management Division at no cost and copies will be provided at reasonable cost. The name of the Lane County Land Management Division representative to contact concerning this application is Shawna Adams, 541-682-8904, or Shawna.ADAMS@co.lane.or.us.

Approval criteria are found in the section(s) of Lane Code cited above. The criteria may be obtained or viewed at the Land Management Division or at the internet address below. You may submit information in the spaces provided on the last page and return this document to the attention of Shawna Adams, Lane County Land Management Division, 3050 N. Delta Hwy., Eugene, OR 97408, Fax to ATTN: Shawna Adams, (541) 682-3947, or email to Shawna.ADAMS@co.lane.or.us. Please be sure to reference the department file number shown above, and submit your comments by **4:00 P.M.** on JUN 24 2019.

Concerns/comments submitted in writing will be considered in making the decision as they relate to the criteria under which the proposal must be evaluated.

Your comments are important and will greatly improve the decision making process, but please note that you will not receive an individual response to information submitted. By law, comments received that are not related to the approval criteria may not be considered. General planning information is available by calling 541/682-3577, or by visiting the Public Works Customer Service Center at 3050 N. Delta Hwy. weekdays between 9 a.m. and 4:00 p.m.

Links to applicable law are available through our Planning homepage:

http://www.lanecounty.org/Departments/PW/LMD/LandUse/Pages/default.aspx

Mailed copies of the approval criteria are also available, at cost, by calling Land Management Division Staff at 541/682-6917. Please allow one week for mailing.

ASSESSMENT & TAXATION

NOTICE OF PENDING LAND USE DECISION

BY THE LANE COUNTY PLANNING DIRECTOR

Date:	8-1-19
Department File:	**509-PA19-05198**
Owner / Applicant:	Nimpkish LLC
Agent:	James E. Belknap
Map & Tax Lot:	18-02-11-00-00508
Address:	No Site Address
Size:	10.21 acres
Base Zone:	Impacted Forest Land (F-2)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information, and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: A Request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(2)-2.4

Enclosed is a vicinity map and site plan showing the proposed location of the template dwelling.

The proposed use that could be authorized by approval of the land use application is: One single family dwelling on the subject property.

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report are available for inspection at the Lane County Land Management Division at no cost, and copies will be provided at reasonable cost. You can contact the Lane County Land Management Division representative **Rachel Serslev** at **(541) 682-6903** or **rachel-serslev@co.lane.or.us** to obtain more information about this notice.

This decision will become final at **4:00 PM** on 8-13-19 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the County LMD. **This application form is enclosed and must be used if you wish to appeal this decision. To complete this form and appeal the decision:**

1. Fill in the required information and attach it along with the appeal fee, materials, and information required on the appeal form.

2. Submit the completed appeal to the Planning Director so that the Planning Director receives it prior to the date and time that the decision becomes final (see above deadline). The Planning Director will reject an appeal if it: (a) is not received prior to the date and time that the decision becomes final or (b) is incomplete.

3. To be accepted, appeals must satisfy all the requirements of Lane Code 14.080(1). A Type II decision issued by the Director for which a hearing has not been held may be appealed by a person who is entitled to written notice or any person who is adversely affected or aggrieved by the application.

Failure to raise an issue in a hearing—in person or in writing—or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

LAND USE PLANNING NOTES

"STEWARDSHIP IN FORESTRY"

NUMBER 1 • MARCH 1991

PURPOSE: This technical bulletin has been developed jointly by the Department of Forestry and structural fire protection agencies in Oregon as technical guidance and recommended minimum standards to meet the requirements of new administrative rules, OAR 660-06-035 (fire siting standards for dwellings and structures) and OAR 66006-040 (fire safety design standards for roads) adopted by the Land Conservation and Development Commission for forest land zones (Goal 4 lands). Counties are encouraged to adopt stricter rules in forest zones where these recommendations might not adequately address a particular hazard or risk.

RULE REQUIREMENTS:

OAR 660-06-035 (Fire Siting Standards for Dwellings and Structures) requires that:

"[T]he following fire siting standards or their equivalent apply to new dwelling or structures in a forest or agriculture/forest zone:

"(l) If a water supply is available and suitable for fire protection, such as a swimming pool, pond, stream, or lake, then road access to within 15 feet of the water's edge shall be provided for pumping units. The road access shall accommodate the turnaround of fire fighting equipment during the fire season. Permanent signs shall be posted along the access route to indicate the location of the emergency water source.

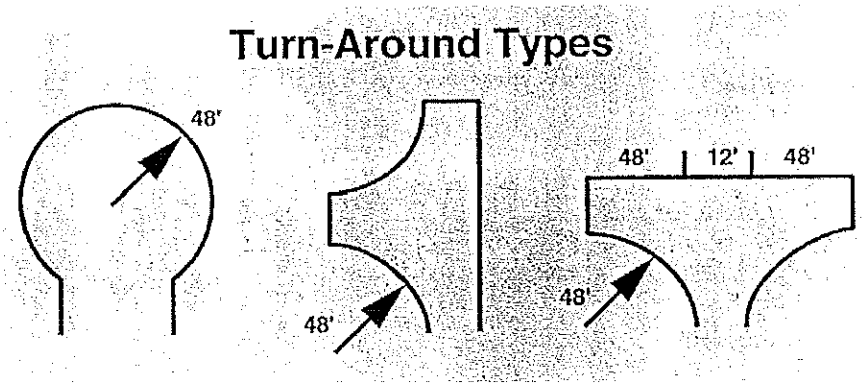
"(2) Road access to the dwelling shall meet road design standards described in OAR 660-06-040.

"(3) The owners of the dwellings and structures shall: maintain a primary fuel-free break area surrounding all structures; clear and maintain a secondary fuel-free break area; and maintain adequate access to the dwelling for fire fighting

Recommended Fire Siting Standards for Dwellings and Structures

and

Fire Safety Design Standards for Roads



Published by:

Salem, OR 97310

equipment vehicles in accordance with the provisions in *Protecting Your home from Wildfire* (National Fire Protection Association)."

OAR 660-06-040 (Fire Safety Design Standards for Roads) requires that:

"[T]he governing body shall establish road design standards, except for private roads and bridges accessing only commercial forest uses, which ensure that public roads, bridges, private roads and driveways are constructed so as to provide adequate access for fire fighting equipment. Such standards shall address maximum grade, road width, turning radius, road surface, bridge design, culverts, and road access taking into consideration seasonal weather conditions. The governing body shall consult with the appropriate Rural Fire Protection District and Forest Protection District in establishing these standards."

Though there are no similar rule requirements to be met in rural residential zones in forested areas, the Department of Forestry encourages the adoption by local government of these recommended fire safety standards in these zones as well.

Though some of the recommendations are strictly to accommodate structural fire protection apparatus and needs, it is recommended that the standards be applied to all lands within forest zones, regardless of the presence or absence of a rural (structural) fire protection district. The standards should be applied in anticipation of structural fire protection eventually becoming present.

RECOMMENDED FIRE SITING STANDARDS FOR DWELLINGS AND STRUCTURES:

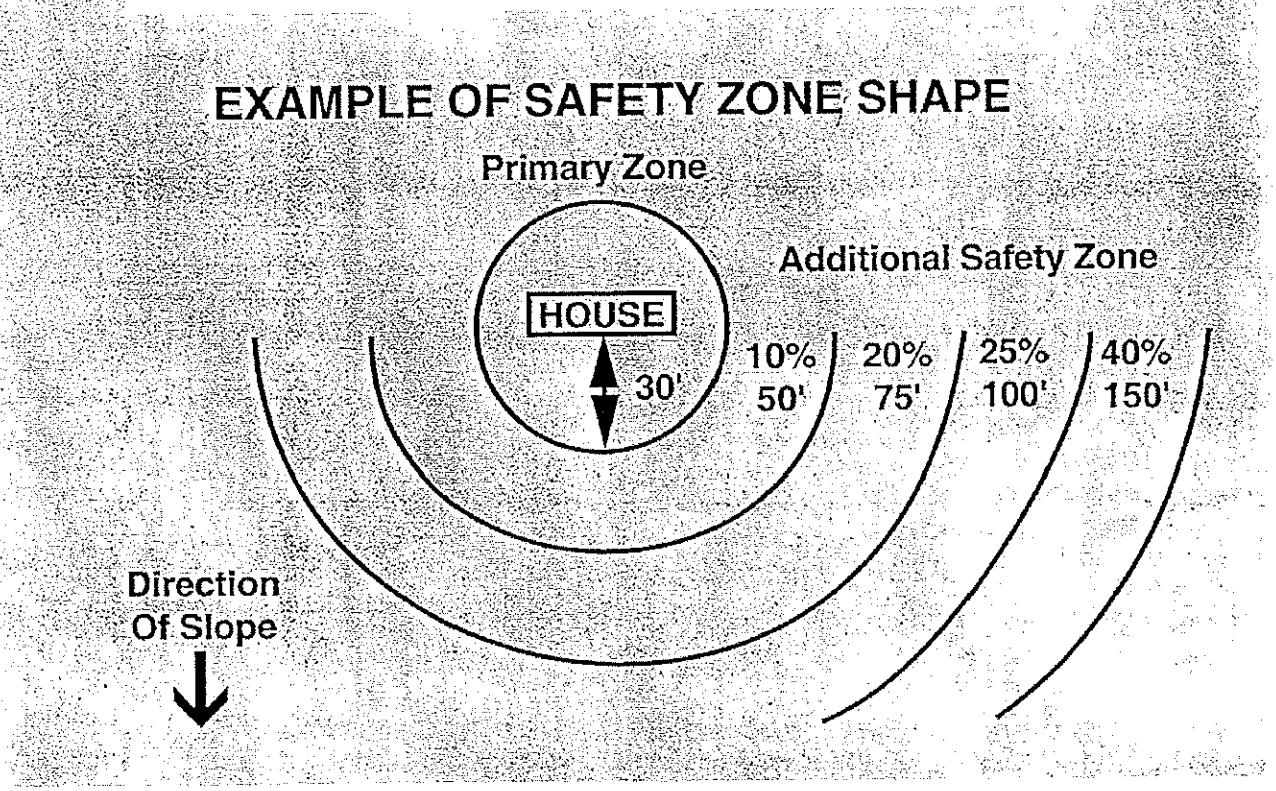
A. Water Supply Standards:

1. Access— If a water supply—such as a swimming pool, pond, stream, or lake—of 4,000 gallons or more exists within 100 feet of the driveway or road at a reasonable grade (12%) an all-weather approach to a point within 15 feet of the water's edge should be provided. The all-weather approach should provide a turn-around with a 48-foot radius of one of the types shown in the illustration below.

2. Identification— Emergency water supplies should be clearly marked along the access route with a county approved sign.

B. Fuel Break Standards:

1. Primary Safety Zone— The primary safety zone is a fire break extending a minimum of 30 feet in all directions around structures. The goal within the primary safety zone is to remove fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees should be spaced with greater than 15 feet between the crowns and pruned to remove dead and low (less than 8 feet) branches. Accumulated leaves, needles, limbs and other dead vegetation should be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) should be placed next to the house.



As slope increases, the primary safety zone should increase away from the house, parallel to the slope and down the slope, as shown in the table and illustration on the next page.

2. Secondary Fuel Break— The secondary fuel break is a fuel break extending a mini-

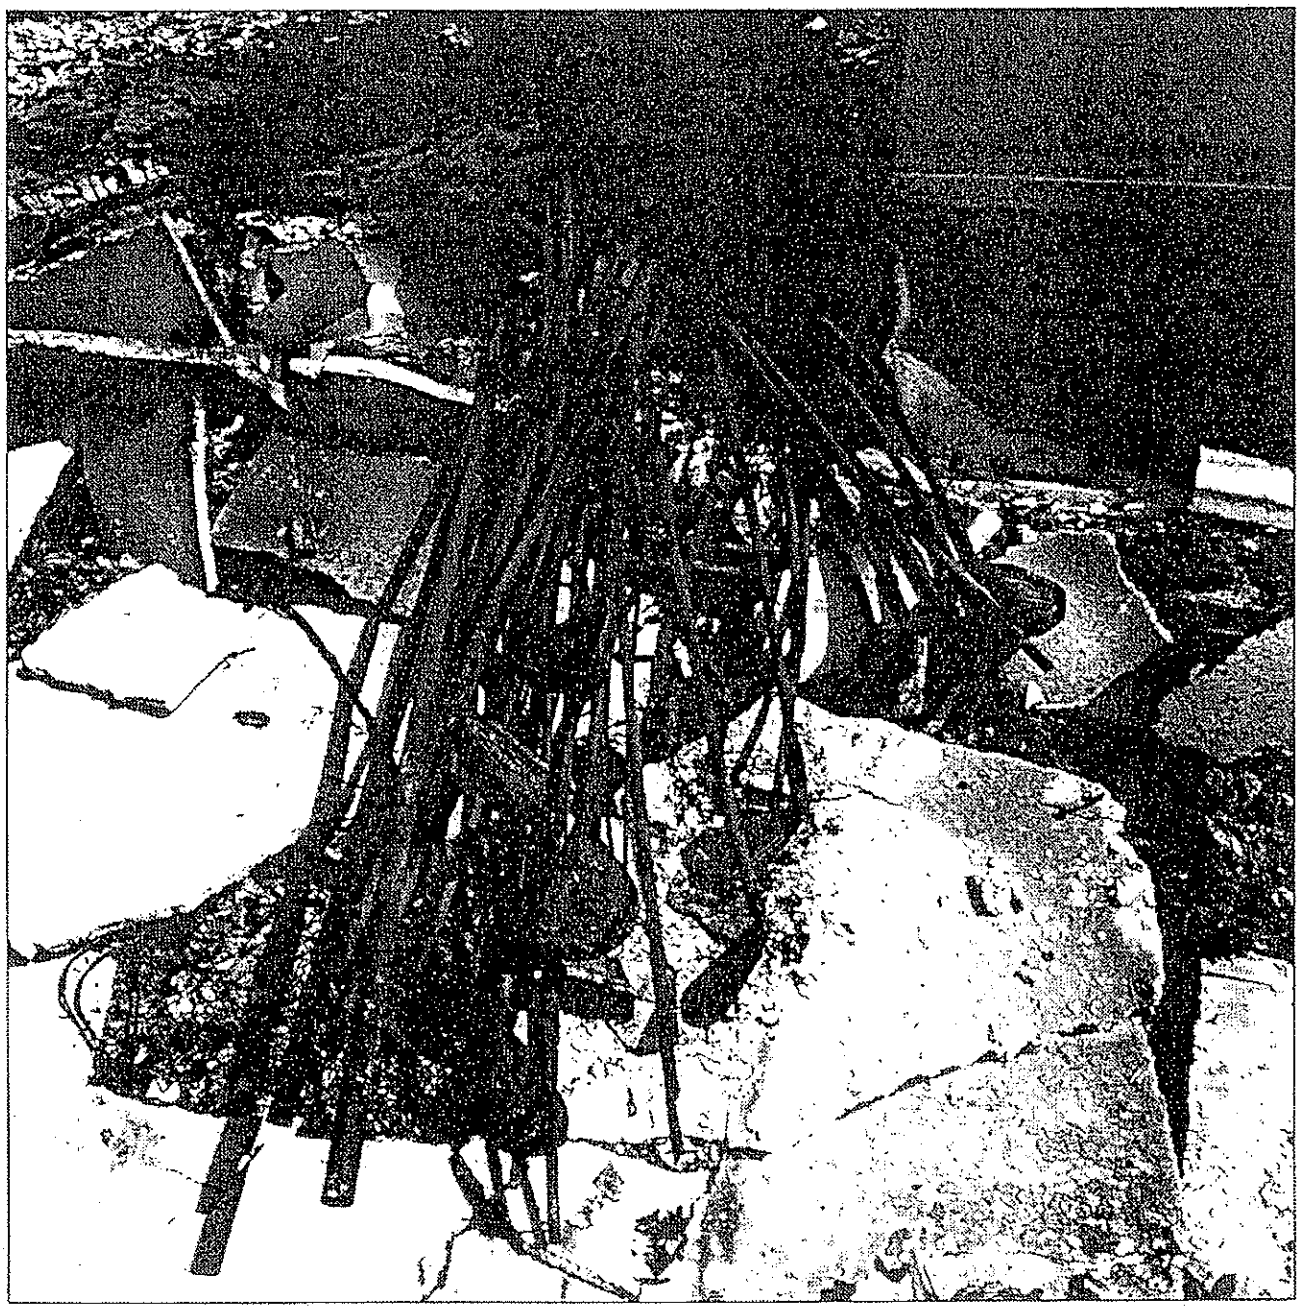
Size of Primary Safety Zone by Percent Slope

Slope	Feet of Primary Safety Zone	Feet of Additional Safety Zone Down Slope
0%	30	0
10%	30	50
20%	30	75
25%	30	100
40%	30	150

Buildings should be restricted to slopes of less than 40 percent.

mum of **100** feet in all directions around the primary safety zone. The goal of the secondary fuel break should be to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break should be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees should be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels should be removed.

RECOMMENDED FIRE SAFETY DESIGN STANDARDS FOR ROADS:



A. Road Standards (public roads and private roads accessing 2 or more residences):

1. Right-of-ways— Roads should be built and maintained to provide a minimum **20** foot width of all-weather surface capable of supporting gross vehicle weights of **50,000** pounds, a minimum curve radius of **48** feet and a vertical clearance of **13'6"**.

2. **Cul-de-Sacs**— Cul-de-sacs should be defined as dead-end roads over **150** feet in length. Cul-de-sacs should have turn-arounds of not less than **48** feet radius at a maximum spacing of **500** feet between turn-a-rounds. All turn-a-rounds should be marked and signed as "NO PARKING."

3. **Bridges and Culverts**— Bridges, culverts, and other structures in the road bed should be constructed and maintained to support gross vehicle weights of 50,000 pounds.

4. **Road Grades**— Road grades should not exceed an average of **8** percent, with a maxi-

A set of burned golf clubs lay in the ruin of a home burned by the 1990 Awbrey Hall Fire. Twenty-two homes burned during this fire, which raced along the outskirts of Bend, Oregon. Most of the burned homes had insufficient fuel breaks surrounding them.

Photograph courtesy of The Bulletin, *Bend*

mum of **12** percent on short pitches. Variances could be granted by the fire service having responsibility for the area when topographic conditions make these standards impractical.

5. Identification— Roads should be uniquely named or numbered and visibly signed at each road intersection. Letters or numbers should be a minimum of three inches in height and constructed of reflectorized material.

B. Driveway Standards (private roads accessing a single residence):

1. Driveways— Driveways should be built and maintained to provide a minimum **12**-foot width of all-weather surface capable of supporting gross vehicle weights of **50,000** pounds, a minimum curve radius of **48** feet and a vertical clearance of **13'6"**.

2. Vehicle Passage Turnouts— Driveways in excess of **200** feet should provide **20**-foot wide by **40**-foot long passage space (turnouts) at a maximum spacing of 1/2 the driveway length or **400** feet, whichever is less. Wherever visibility is limited, these distances should be reduced appropriately.

3. Dead-end-driveways— Dead-end-driveways are defined as dead-end roads over **150** feet in length serving a single residence. Dead-end-driveways should have turn-a-rounds of not less than **48** feet radius.

4. Bridges and Culverts— Bridges, culverts, and other structures in the road bed should be constructed and maintained to support gross vehicle weights of 50,000 pounds.

5. Driveway Grades— Driveway grades should not exceed an average of **8** percent, with a maximum of **12** percent on short pitches. Variances could be granted by the fire service having responsibility for the area when topographic conditions make these standards impractical.

6. Identification— Driveways should be marked with the residence's address unless the residence is visible from the roadway and the address is clearly visible on the residence. Letters or numbers should be a minimum of three inches in height and constructed of reflectorized material.

C. Certification:

1. If bridges or culverts are involved in the construction of a road or driveway, written verification of compliance with the 50,000 gross vehicle weight standard should be provided from an Oregon Registered Professional Engineer. Otherwise, written verification of compliance should be provided by the applicant.

BASIS FOR RECOMMENDATIONS:

A. Water Supply

Water is a critical tool in fire suppression. Hydrants are generally not available in forested areas. Therefore, fire suppression in forested areas is dependent upon the water carried in the responding fire equipment and water sources available for refill or that can be pumped from an engine. Water available for refilling an engine can mean the difference between saving or losing a structure, or preventing a wildfire from escaping initial attack. When a fire engine or tanker runs out of water, turn around time to a refill site may be quite lengthy. A 4,000 gallon water supply is large enough to refill a large tanker or several smaller fire engines. Requiring construction of an all weather approach to within 15 feet of 4,000 gallon or larger water sources within 100 feet or less of a driveway or road will greatly help fire protection agencies.

B. Fuel Breaks

The steeper the slope, the greater the flame length, the hotter the flame front, and the faster the rate of fire spread. This greater fire activity is primarily due to preheating of the vegetation upslope from the fire, increased draft of fresh air to the fire from below, and more flame contact with upslope fuels. On steeper slopes, failure to provide for larger safety zones downslope from a residence will make it more difficult for fire personnel to protect the structure. The

firefighter is also in a more tenuous safety position.

On the last page are two graphs showing the relationships of flame length and dozer line construction speeds to slope for two fuel types. Flame lengths increase with slope and dozer fire line construction rates decrease. Other fire fighting methods such as water attack and hand line construction are also hampered by steep slopes. Generally, hand lines are useless when flame lengths reach 4 feet; dozer lines fail with 8-foot flame lengths.

C. Road & Driveway Specifications

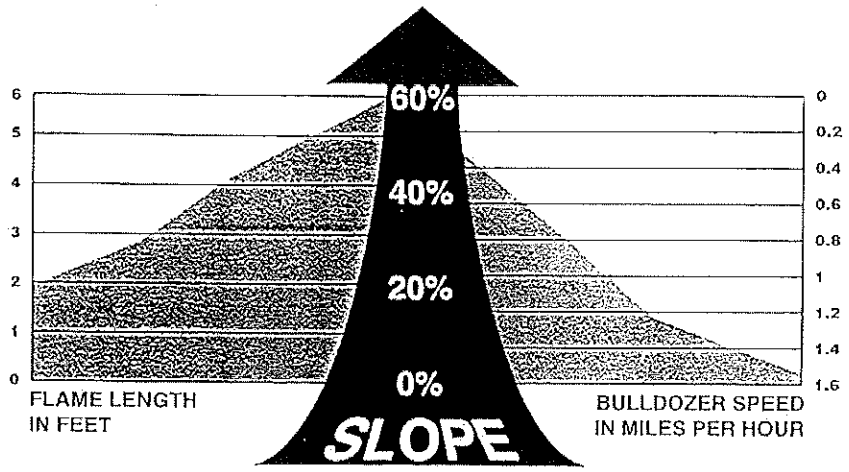
Fire fighting apparatus (fire engines, tankers, dozer and lowboy, etc.) are much larger and heavier than personal vehicles. These vehicles require greater road width and clearance for passage, wider road curves for turning, and level or at most moderate road grades for maintaining vehicle engine performance and driver safety.

- The 1988 Oregon Uniform Fire Codes, Chapter 10.207 specifies that all roads shall be all weather surfaced, minimum 20 feet width, and have a vertical clearance of 13' 6".

- A filled, fully equipped 3,000 gallon tanker weighs around 40,000-45,000 pounds. Many rural fire departments utilize this size tanker as a water source for the small fire engines. A minimum road surface load limit of 50,000 pounds provides for this load plus an appropriate safety margin.

- Large, heavy vehicles have difficulty driving up and down steep road grades. Additionally, most rural fire departments are principally staffed by volunteers and most forest fire agency employees are seasonal. While these people are capable drivers, very few are professional truck drivers and they may have a more difficult time maneuvering a truck up a steep winding road than would the professional driver.

- Rural address identification is extremely important. While the local resident may be familiar with the localized road or driveway system, emergency responders generally will not. Proper signing of roads and driveways with 3" or larger reflectorized letters or numbers will assist fire fighters in locating threatened residences, especially when visibility is impaired by darkness or smoky conditions.

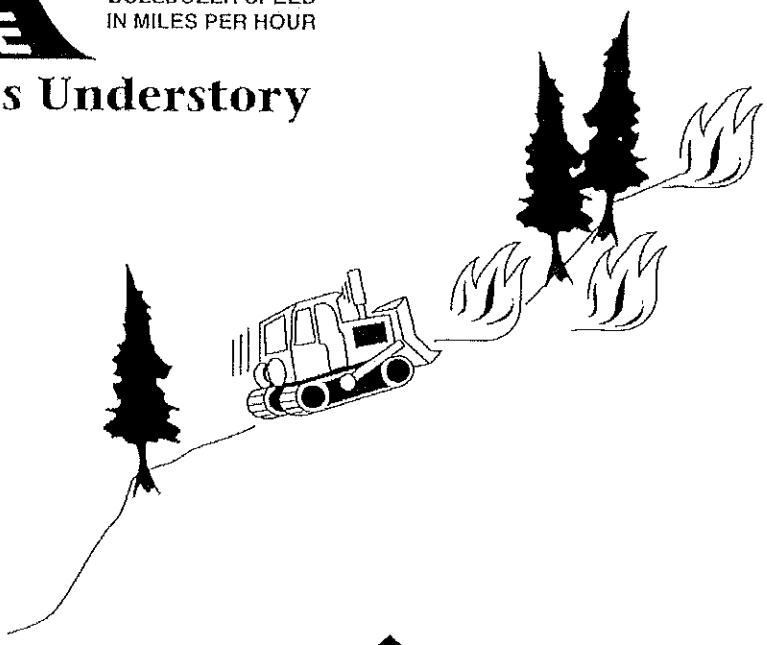


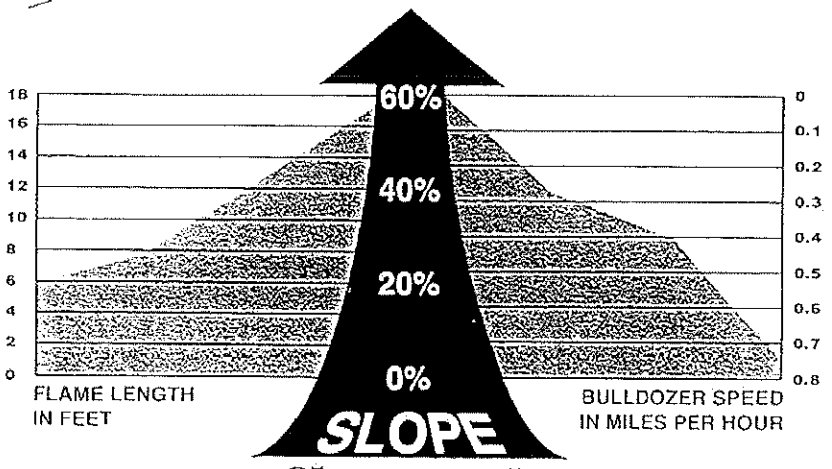
- It is very difficult to back up long distances in large fire apparatus, and this difficulty can be compounded if driveway grade is not level. Therefore, turnouts and turnarounds are very important.

The 1989 Dooley Mountain Fire threatened the residents of Baker City.

Photograph courtesy of the Democrat-Herald, *Albany*

The Relationship of Flame Length to Fuel Type and Slope: Two Situations





Timber with Grass Understory

These two graphs illustrate the effect of slope on flame length and bulldozer speed in two common fuel types.

In open timber with grass, flames traveling up a 20% slope can reach 3-4 feet in length. Chaparral, on the same slope, will generate flame lengths of 6-8 feet. Hand-constructed fire lines usually fail to stop fires having 4-foot or longer flame lengths. Bulldozer-constructed fire lines usually fail to stop fires having 8-foot or longer flame lengths.

Fire lines become less effective as slope increases and as fuel loads increase.

Chaparral

CONDITIONS OF APPROVAL FOR PA 02-5486

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of **PA 02-5486** is valid for a **four-year** period from 12-9, **2002**, the final date of approval until 12-9, **2006**, the expiration date of this approval. Lane County may grant an initial extension period of **two years** if:
   (a) an applicant makes a written request with the required fee for an extension of the development approval period;
   (b) the request is submitted to the county prior to the expiration of the development approval period;
   (c) the applicant states reasons that prevented the applicant from beginning or continuing development within the approval period;
   (d) the county determines that the applicant was unable to begin or continue development during the approval period for reasons which the applicant was not responsible; and
   (e) when applicable criteria for the decision have not changed.

   Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision.

The following conditions shall be met prior to the expiration date in condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease.

DONE 6/7/04

2. Complete, have notarized, and record the enclosed *Farm and Forest Management Agreement* with an attached "Exhibit B" depicting the legal description of the property (which must be recorded together with the Agreement at the Lane County Deeds and Records office). Record the documents at the Lane County Deeds and Records Office. DOC# 2004-028664

DONE 5/14/04

3. Submit a stocking survey report for the subject parcel prepared by a qualified forester to the Lane County Assessor. The applicant shall provide a copy of the stocking survey to Land Management Division with evidence of receipt from the Assessor.

DONE PD 05-5055

4. Construct the driveway from its entrance Abbott Lane to the proposed dwelling to the minimum standards of Lane Code 16.211(8)(e). A written certification of compliance with the minimum standards of Lane Code 16.211(8) may be required from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director. Please contact Don Nickell, 541/682-3989 with questions about driveway, bridge and road construction requirements in LC 16.211(8)(e).

DONE LETTER TO FD 4/21/04

5. Submit written documentation obtained from the Cottage Grove/South Lane Rural Fire Protection District stating that the roads and driveway leading from the fire station to the home site are adequate for their fire fighting equipment to access the use, fire fighting equipment and water supply.

DONE PD05-5055

6. Physically establish the primary and secondary fuel breaks as depicted on the approved Detail Development Plan, Exhibit C and as necessary on the adjoining property in accordance with recorded instrument #2002-031079. **These fuel breaks shall be maintained in perpetuity.** The minimum primary safety zone surrounding the proposed dwelling shall be 30 feet. The minimum secondary

DONE

fuel breaks surrounding the primary safety zone shall be 100 feet. Please contact Don Nickell, 541/682-3989 with questions about fuel break requirements.

7. Provide evidence to the Planning Director that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule (OAR Chapter 629). WELL LOG # 152909

8. Submit a building or placement permit application for the proposed dwelling, with the appropriate deposit fee. Contact the Building Department at 682-3823 and the On-Site Sewage Department at 682-3754 with questions regarding building and sanitation requirements

9. In the building or placement permit application submittal, the applicant shall submit a site plan demonstrating that the parcel configuration, and the proposed dwelling, driveway, and septic system, are located as on the approved site development plan, Exhibit C. Any deviation from the approved site plan may require an application to Modify Planning Director Conditions of Approval with the required processing fee at the discretion of the Planning Director.

10. Upon completion of conditions #2 through #7, the applicant shall complete and submit a Land Use Application form to Verify Compliance with Conditions of Approval for PA 02-5486, with the required processing fee ($310 as of the date of these conditions). [Attachment "1"] **Attach to this form:**
    - Copy of signed, notarized and recorded *Farm Use and Forest Management Agreement* and description of property;
    - Copy of the stocking survey to Land Management Division with evidence of receipt from the Assessor;
    - Copy of letter from the Cottage Grove/Lane County Rural Fire Protection District regarding adequacy of roads and driveway;
    - A copy of the approved Site Development Plan, or a plot plan that conforms with the approved plans, drawn to scale, including the same information, and meeting other minimum standards of the Land Management Division. These final plans shall include the primary and secondary fuel breaks surrounding the proposed dwelling as required by Lane Code 16.211(8)(c)(i).

11. As part of the Verification of Conditions process, the driveway, and fuel breaks shall be field inspected by Planning Office staff to verify that requirements stated in conditions #4 and #6 have been met. Failure to meet minimum fuel break and/or driveway and/or grade standards as in LC 16.211(8)(c) and (e) upon first inspection may require an additional Application for Fuel Break and Road Inspection, with the applicable fee, at the discretion of the Planning Director

The following condition shall be met prior to approval for legal occupancy of the proposed dwelling.

12. The proposed dwelling shall meet these requirements in LC 16.211(8)(c)(iii), to be verified by the Lane County Building Official:

"(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two

Conditions of Approval
PA 02-5377

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of **PA 02-5377** is valid for a four-year period from July 17, **2002**, the final date of approval until July 17, **2006**, the expiration date of this approval. Lane County may grant a two-year extension period if:
   (a) an applicant makes a written request with the required fee for an extension of the development approval period;
   (b) the request is submitted to the county prior to the expiration of the development approval period;
   (c) the applicant states reasons that prevented the applicant from beginning or continuing development within the approval period;
   (d) the county determines that the applicant was unable to begin or continue development during the approval period for reasons which the applicant was not responsible; and
   (e) When applicable criteria for the decision have not changed.

   Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision.

The following conditions shall be met prior to the expiration date in condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease.

OK 2. Complete, have notarized, and record the enclosed *Farm and Forest Management Agreement* with an attached "Exhibit A" depicting the legal description of the property (which must be recorded together with the Agreement at the Lane County Deeds and Records office). Record the documents at the Lane County Deeds and Records Office. Copy in file

OK 3. Submit written documentation obtained from the Cottage Grove/South Lane Rural Fire District stating that the roads and driveway leading from the fire station to the home site, including all public and private roads on the subject parcel are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply. Copy in file

OK 4. Physically establish the primary and secondary fuel breaks as depicted on the approved site development plan, Exhibit "B-1". **These fuel breaks shall be maintained in perpetuity.** The minimum primary safety zone to the north, south, east, and west shall be 30 feet. The minimum secondary fuel breaks to the north, south, east and west shall extend 100 feet from the primary safety zone. Both shall be established within the subject property boundaries. Please contact Don Nickell, 541/682-3989 with questions about fuel break requirements. Copy in file

OK 5. Construct the road, driveway and existing bridge to the minimum standards of Land Code 16.211(8)(e). A written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director. Please contact Don Nickell, 541/682-3989 with questions about driveway, bridge and road construction requirements cited below:

DECLARATION OF RESTRICTIVE COVENANT FOR FIRE BREAK EASEMENT

THIS DECLARATION OF RESTRICTIVE COVENANT ("Declaration") is made by Connie A. Green ("Declarant"), for the benefit of Charles D. Green

RECITALS

A. The Declarant owns Tract 3, on Exhibit "B" of that document recorded, October 24, 2001 on reception Number 2001-070532, Lane County Deeds and Records, and Deeded to Connie Green on that document recorded, March 19, 2002 on reception Number 2002-021322, Lane County Deeds and Records.

B. Charles D. Green owns the real property described as Tract 1, on Exhibit "A" of that document recorded, October 29,2001 on Reception Number ~~2001-07186~~ 2001-071466, Lane County Deeds and Records.

B.

C. Charles D. Green indends to apply for a Special Use Permit and homesite placement approximately 65 feet from the property line adjoining the Declarant's property.

D. The Lane County Code requires a 30-foot primary fuel break around structures in F-2 zones, LC 16.211(8)(c)(i)(aa), and an additional 100-foot secondary fire break. LC 16.211(8)(c)(I0(bb).

E. The 30-foot primary fuel break around the dwelling falls entirely on Tract 3. A portion of the secondary fuel break, however, extends onto the Declarant's property.

DECLARATION

Now, therefore, based upon the foregoing recitals, Declarant hereby makes the following Declaration of Restrictive Covenant, to and for the behalf of Charles D. Green.

1. Declarant hereby declares and argues that Declarant and Declarant's successor and assigns will provide, during occupancy of the dwelling on Tract 1, on Exhibit "A" of that document recorded, October 29, 2001 on reception Number ~~2001-07186~~ 2001-071466, Lane County Deeds and Records, for a secondary fuel break on the portion of his property extending 130 feet in all directions from the aforementioned dwelling, sufficient to comply with LC 16.211(8)(c)(I)(bb). Vegetation within the break shall be pruned and spaced so that the fire will not spread between crowns of trees. Small trees and brush growing underneath large trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

2. This Declaration shall touch and concern the property and shall benefit and burden in the manner described above.

DATEDand signed this 22 Day of APRIL ,2002.

RECITALS

A. The Declarant owns the real property described as Tract 1, on Exhibit "A" of that document recorded, October 29,2001 on Reception Number 2001-07166, Lane County Deeds and Records.

B. Connie A. Green owns adjacent Tract 3, on Exhibit "B" of that document recorded, October 24, 2001 on reception Number 2001-070532, Lane County Deeds and Records, and Deeded to Connie Green on that document recorded, March 19, 2002 on reception Number 2002-021322, Lane County Deeds and Records.

C. Connie A. Green indends to apply for a Special Use Permit and homesite placement approximately 100 feet from the property line adjoining the Declarant's property.

D. The Lane County Code requires a 30-foot primary fuel break around structures in F-2 zones, LC 16.211(8)(c)(i)(aa), and an additional 100-foot secondary fire break. LC 16.211(8)(c)(I0(bb).

E. The 30-foot primary fuel break around the dwelling falls entirely on Tract 3. A portion of the secondary fuel break, however, extends onto the Declarant's property.

DECLARATION

Now, therefore, based upon the foregoing recitals, Declarant hereby makes the following Declaration of Restrictive Covenant, to and for the behalf of Connie A. Green.

1. Declarant hereby declares and argues that Declarant and Declarant's successor and assigns will provide, during occupancy of the dwelling on Tract 3, on Exhibit "B" of that document recorded, October 24, 2001 on reception Number 2001-070532, Lane County Deeds and Records, for a secondary fuel break on the portion of his property extending 130 feet in all directions from the aforementioned dwelling, sufficient to comply with LC 16.211(8)(c)(I)(bb). Vegetation within the break shall be pruned and spaced so that the fire will not spread between crowns of trees. Small trees and brush growing underneath large trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

2. This Declaration shall touch and concern the property and shall benefit and burden in the manner described above.

DATEDand signed this 25 Day of March ,2002.

HAND DELIVERED

Gary Darnielle, Lane County Hearings Official
c/o Rachel Serslev, Planner
Lane County Land Management Division
3050 North Delta Highway
Eugene, OR 97408

Re: **509-PA-05298 (Nimpkish LLC)**
Appeal of Director Approval of Template Dwelling in F-2 zone
by Landwatch Lane County
First Post-Hearing Evidentiary Submission

Mr. Darnielle,

Please enter this letter and attachments into the record of the above-referenced appeal that I am submitting on behalf of the applicant and in support of the Director's decision and findings.

The purpose of this letter is to provide additional evidence and analysis during the first post-hearing record submission period. It includes eyewitness accounts about the County's adoption of Goal 5 policies in 1984 relating to residential densities in the various Big Game Range areas (Major, Peripheral, Impacted) and the relevance of these policies, if any, to individual applications for forest template dwellings in the F-2 zoning district. Given the importance of evaluating the "overall residential density for protection of big game habitat" (Goal 5, Flora and Fauna, Goal 11) and in light of LandWatch's repeated and unsuccessful efforts to breathe life into an ambiguous and, as we have determined, fully implemented policy, Mr. Belknap has prepared a more detailed analysis of the term "density" as it swirls in and through LandWatch's earlier missives as well as Mr. Malone's most recent September 26 letter. My letter will also provide an explanation of the purpose and relevance of the new evidence concerning the Goal 5 density policy as it relates to the template dwelling criteria.

First, the following responds to Mr. Malone's letter and then introduces the new evidence under separate headings.

Malone September 26 Letter

At the September 26 hearing, Mr. Malone, attorney for LandWatch, submitted a letter that primarily addresses a recent LUBA decision, *Cattoche v Lane County*, ___Or LUBA ____ (LUBA NO. 2018-109, May 22, 2019) in an inter-woven discussion that includes selected quotes from that decision. I will discuss this part of his letter later in the section that addresses Goal 5,the *Cattoche* decision and its relevance to this template dwelling application. His analysis of Goal 5 has no sound basis or support in the law or in the legislative context in which Lane County's Goal 5 policies were adopted in 1984.

At the outset, it is important to object to Mr. Malone's generous interpretation of OAR 660-006-0025(6)[1] which he asserts is a portal through which any Lane County Rural Comprehensive Plan ("RCP") policy of LandWatch's choosing can move through and be applied to any and all template dwelling applications. Without any analysis or discussion of the actual text of the rule, Mr. Malone quotes the text and in the next sentence concludes:

> "*** On its face, this rule requires that comprehensive plan policies are approval criteria for template dwelling approvals."

This rule requires nothing close to what Mr. Malone claims but, instead, says that if there are "other requirements contained " in the comprehensive plan or implementing ordinance, "then the template dwelling process does not preclude or affect the applicability of those specific plan or zoning provisions."

It does not apply to plan policies that are in the form of providing direction to the County who, as is discussed later herein, responded to that direction by adopting the F-1 zone that prohibits residences and then applied that zone to 84% of the County's designated forest land. There is no RCP Goal 5 plan policy that ". . .imposes a residential density standard of one dwelling per 80 acres" as Mr. Malone claims in his next paragraph. The 80-acre minimum lot size in the F-2 zone is derived from Goal 4 policies, not Flora and Fauna Policy #11 as claimed by Mr. Malone.

---

[1] OAR 660-006-0025(6) states: Nothing in this rule relieves governing bodies from complying with other requirement contained in the comprehensive plan or implementing ordinances such as the requirements addressing other resource values (e.g., Goal 5) that exist on forest lands.

The point of this introduction is to re-emphasize the lack of legal and factual support provided by LandWatch for its various positions with regard to the applicability of RCP policies to individual forest template dwelling applications. The following sections will provide substantial evidence to support the conclusion that the RCP Goal 5 policies, claimed by LandWatch and Mr. Malone to impose 40-acre and 80-acre minimum densities to applications for template dwellings in the F-2 zoning district, have no relevance to those applications, like the present one. The next section describes the present position Lane County, through you, the Hearings Official, and staff, have taken, to date, toward the applicability of the Goal 5 policies which is that they have no relevance as criteria for a forest template dwelling application in the F-2 zone.

Hearings Official Decision, PA 17-05951 (Evans/Betz, 08-08-18)

Lane County, as articulated in your recent decision cited above, has determined that the Big Game Range density standards in the Goal 5 policies are not an applicable standard for forest template dwelling applications. You found in that case:

> "The Appellant makes the following allegations of error:
>
> a. *The Director's approval violates the dwelling density standards of Big Game Ranges.*
>
> The Appellant notes that the entire TRS within which the subject property exists is designated Big Game Range cites OAR 660-006-0027(I)(f) which require that the siting of the dwelling be consistent with density limitations imposed by the acknowledged comprehensive plan and land use regulations. However, the Flora and Fauna Working Paper of the Rural Comprehensive Plan explains that the Big Game Range density standards were integrated into the zoning classifications and minimum lot size recommendations on a regional basis. The density recommendations were not applicable to existing parcels but were to be considered in rezoning applications. Therefore, the approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards.

b. The Director's approval violates Goal 4 and 5 policies of the Rural Comprehensive Plan.

> Lane County's Rural Comprehensive Plan was acknowledged by LCDC in 1984. In regard to compliance with Statewide Planning Goal 5, Lane County did categorize Big Game Habitat as a 1C significant Goal 5 resource.[10] However, as noted above, the County incorporated the protections recommended in the Flora and Fauna Working Paper into the zoning ordinance. Accordingly, residential development was limited in Big Game Habitat areas and further restriction of development was not necessary to comply with Statewide Planning Goal 5.
>
> The Appellant specifically cites Rural Comprehensive Plan Goal 4 Policy #11 which states "*Encourage the consolidation of forest land ownership in order to form larger more viable forest resource units.* First, this policy is aspirational and does not provide an objective standard that applies to a quasi-judicial land use permit process. Second, the action taken by the County does not have any impact upon parcelization. Rather, the template dwelling process forces an applicant to recognize and work within the existing parcelization pattern within a 160-acre square template."

(footnote omitted, emphasis supplied) To date, Mr. Malone has not provided any rational or even plausible explanation as to why these original RCP policies have suddenly sprung into life and became applicable to forest template applications that only come into existence after 1993. Mr. Malone's dependence on the *Cattoche* decision is entirely misplaced for several reasons with the most obvious being that *Cattoche* involved a plan amendment from a Forest designation and F-2 zoning to Non-Resource and Rural Residential 5-acre zoning. The present application requests permission to construct a single dwelling on an existing legal lot while *Cattoche* involved the creation of new residential lots. Mr. Malone is comparing apples to elephants.

Lane County RCP Goal 5, Flora and Fauna Policies 11, 12 and 13

After quoting at length from the *Cattoche* case, Mr. Malone concludes that the

". . . application is not consistent with the 80-acre standard . . ." and must be denied. He makes no attempt to address your *Betz* analysis and particularly the part where you state the ". . .density recommendations were not applicable to existing parcels but were to be considered in rezoning applications", like the *Cattoche* case. Mr. Malone has no response because there is none.

As further support for the County's position towards the ODFW Goal 5 density recommendations I enclose the following documents:

ATTACHMENT "A": Kent Howe letter (10-14-19) re: RCP Goal 4 and Goal 5 policies ("Howe Letter")

ATTACHMENT "B": James Mann letter (10-16-19) re: Template dwellings and RCP Goal 5 ("Mann Letter")

Both of these letters provide first-hand accounts of how and why the RCP Goal 5, Flora and Fauna Policies, specifically Policy 11 that contained the much-discussed ODFW recommendations for "overall residential density", were addressed during the 1984 RCP adoption and acknowledgment process.

The following will provide a brief description of the relevance of each letter although they speak for themselves as to how they relate to the current state of template dwelling applications and RCP Goal 5 "density" recommendations. Let there be no doubt about what happened to the Policy 11 recommendations — they were addressed and implemented in 1984 with the adoption of F-1 zoning and the prohibition of residences in that zone. Acknowledgment by LCDC in 1984 confirmed this conclusion.

Howe Letter

Mr. Howe's credentials and expertise about Lane County's RCP acknowledgment process are impeccable and that is reflected in his straight-forward account of what occurred in 1983-84 when Lane County's RCP was in its final stages of adoption. Mr. Howe succinctly describes the tension in 1983-84 between Goals 4 and 5 and how that conflict was eventually resolved with the adoption of F-1 zoning that prohibited residences on 84% of the designated forest land in the County. That action addressed ODFW's concerns and, as Mr. Howe states, "complied with the rule".

Mann Letter

Mr. Mann's credentials are equal to Mr. Howe's as to what occurred in 1984 with

regard to the recommendations of ODFW for Big Game Habitat protections during the RCP adoption and acknowledgment process in 1983-84. Mr. Mann not confirms Mr. Howe's description of how and why the F-1 zoning was applied to 84% of the County's designated forest land with a prohibition on residential development in those areas. For the remaining F-2 zoned lands, clustering of residences was required as evidenced by the excerpt of the DLCD staff report attached to Mr. Mann's letter.

Both letters confirm your previously-reached conclusion in the *Betz* decision that the ODFW residential density recommendations "are not applicable to existing parcels but were to be considered in rezoning applications". *Betz*, p 10. Mr. Belknap's letter, submitted on this date, provides a comprehensive explanation of how the finite number of lawful units of land, at least in the forest-designated areas of Lane County, was essentially fixed on October 3, 1984, the date LCDC acknowledged Lane County Rural Comprehensive Plan ("the RCP"). The criteria for placing residences on those F-2 zoned parcels changed with the adoption of the template dwelling statute and regulations in the early 1990's. Since then, and even since 1984, the "density" of lawful units of land within this F-2 zoned area (only 16% of the total forest-designated land area in the County) has effectively not changed. Very few F-2 zoned parcels have actually been created since 1984.

Conclusion

The enclosed documents together with Mr. Belknap's letter and attached letter from Mr. Remboldt provide additional evidence to address the concerns raised about the applicability of Goal 5 and 7 to this template dwelling application. LandWatch, in contrast, has not provided any relevant evidence or analysis.

Sincerely,

Michael E. Farthing

October 14, 2019

Gary Darnielle,
Lane County Hearings Official
Subject: Wildlife Habitat

This is written to document the development of the Rural Comprehensive Plan in 1984 when I was a Planner working on the acknowledgement effort.

RCP Goal 5, Flora and Fauna Policies 9, 10 and 11 were developed in 1983 and 1984 in an effort by Lane County to address the concerns of the Oregon Department of Fish and Wildlife (ODFW) about the impacts of residential development on Big Game Habitat areas. The discussions in the 1982 Flora and Fauna Working Paper and the requirements in Policies 9, 10 and 11 are about limiting residential densities with specific siting requirements (still applicable in the resource zones) in order to minimize the impacts of new residential development on Big Game Habitat areas.

At the same time, Lane County was trying to comply with Goal 4 requirements for Forest Lands and Lane County adopted Goal 4, Policy 5 that prohibited new dwellings on Non-Impacted Forest Lands zoned F-1. This prohibition applied to 84% of Lane County and substantially addressed the concerns of residential impacts on Big Game Habitat raised under Goal 5 by the ODFW. As a result, Polices 9,10 and 11 of the 1982 Flora and Fauna Working Paper do not designate any Big Game Habitat areas as significant "1 C".

Lane County limited residential development in Big Game Habitat areas by prohibiting new dwellings in 84% of Lane County (the F-1 zone). Lane County complied with the Goal 5 Rule and did not need to further restrict development in Big Game Habitat areas because so much land was preserved from development. Lane County's Big Game Habitat was not categorized as a significant Goal 5 resource. Based on this recognition, no analysis of residential densities is required in wildlife habitat areas in Lane County. Therefore, there are no development limitations on residential densities in Lane County's acknowledged comprehensive plan.

Kent Howe

October 16, 2019

Gary Darnielle
Lane County Hearings Official

Re: Wildlife Densities for the F-1 and F-2 Zones

Mr. Darnielle:

This is written in response to assertions that additional protections are required for the approval of template dwellings in the F-2 zone, for the protection of wildlife and big game habitat arreas.

In 1983 and 1984, Lane County developed and adopted the Lane County Rural Comprehensive Plan policies and implementing ordinances in order to comply with the Statewide Planning Goals and to obtain acknowledgement from LCDC for these requirements. I was employed by Lane County during this time as a Principle Planner with the primary responsibility of overseeing this effort, working with other involved County planners, and drafting Lane Code Chapter 16 including the requirements for the F-1 zone in LC 16.210 and the F-2 zone in LC 16.211.

In the early stages of developing these requirements, dwellings were allowed as special uses in the draft F-1 and F-2 zones and LC 16. Therefore, the need for dwelling densities to protect wildlife and big game habitat areas was especially important and was discussed in the Flora and Fauna Working Papers. At the 11th hour of the public hearings process, Lane County decided to significantly change the forest policies and LC 16.210 by prohibiting new dwellings on Nonimpacted, F-1 zoned lands. F-1 zoned lands included approximately 84% of the designed forest lands. After the prohibition on new dwellings on nonimpacted forest lands and F-1 zoned lands was adopted, the need for parcel sizes and dwelling densities on F-1 zoned lands evaporated.

On the remaining 16% of Lane County's forest lands, Impacted forest lands zoned F-2, an acceptable alternative to imposing dwelling and land division densities to protect wildlife and big game habitat areas was developed and adopted by Lane County. This alternative consisted of dwelling clustering requirements. During the hearings process when this alternative was reviewed, a representative from the Oregon Department of Fish and Wildlife was present. e

Attached to this letter is an excerpt from pages 25 and 26 of the September 12, 1984 DLCD report to LCDC for the acknowledgement of the Rural Comprehensive Plan that specifically stated,

> *"Amend the F-2 and EFU zones too carry out the intent of the Flora and Fauna Policy II. Specifically, the zones must either require larger minimum parcel sizes*

Attachment "B"

in the Big Game Habitat portions of these zones or containing clustering requirements in those areas."

The DLCD report expressly identified the clustering requirements in the F-2 zone. These requirements are substantially the same today. LCDC acknowledged these requirements as consistent with Flora and Policy II and as in compliance with Goal 5. It therefore appears that we are not required to do this again today.

Sincerely,

James A. Mann LLC

Attachment "B"

Response

Lane County has responded to this IOTC by amending the Flora and Fauna Working Paper Addendum (p. 7) to include the following justification for not applying riparian setback and vegetation maintenance requirements to lakes or Class II streams (Ord. No. PA 892):

> "For purposes of this analysis, only Class I riparian lands are considered. Class II streams (using ODF standards) are not fish-bearing streams, according to Oregon Fish and Wildlife Department staff, and often dry up in the summer months. Additionally, they are located in remote areas in public ownership or limited to resource uses by resource zones. Many of them have not been inventoried, and location maps are not easily available. Most lakes outside of the coast are impoundments, such as Fern Ridge Reservoir, and have COE easements plus County PR zoning to protect their shorelines. The remaining natural lakes are protected by coastal overlays or are in High Cascade wilderness areas such as Waldo. The Oregon Fish & Wildlife Department, which worked closely with the County in devising a method of protecting Class I riparian lands, did not indicate a need to similarly protect Class II riparian lands. In the nomenclature of the Goal 5 Rule, the County determines the Class II streams are to be considered '1A' resources--not to be included on the Plan inventory."

Conclusion

Requirement 2c has been met.

Requirement

2. Fish and Wildlife Habitats:

   d. Amend the F-2 and EFU zones to carry out the intent of Flora and Fauna Policy II. Specifically, the zones must either require larger minimum lot sizes in the Big Game Habitat portions of these zones, or contain clustering requirements in those areas.

Response

Lane County has added the following new language to both the F-2 and EFU Zones:

> "(a) The Approval Authority shall balance the setback standards of LC.211(8)(a) with the siting requirements and application approval criteria specified elsewhere in LC 16.211 in order to minimize adverse impacts upon forest uses and to assure optimal siting of

Attachment "B"

0766

proposed residences consistent with the purposes the F-2 [EFU] Zone.

(i) Residences to be sited upon tracts located within a big game range as designated by the Department of Fish and Wildlife shall be sited as follows:

(aa) Near residences on other tracts.

(bb) With minimal intrusion into forest areas undeveloped by nonforest uses.

(cc) Where possible, when considering LC 16.211(8)(a)(i)(aa) and (bb) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU."

Conclusion

Requirement 2d has been met.

Requirement

2. Fish and Wildlife Habitats:

e. Amend the Flora and Fauna Working Paper to include location, quality and quantity information for sensitive bird habitat areas, including great blue heron rookeries, bald eagle and osprey nests, and pigeon mineral springs. Apply all applicable steps of the Goal 5 process to all known sensitive bird sites. Flora and Fauna Policy 15 must also be modified, consistent with these tasks.

Response

Lane County has adopted (Ord. No. PA 892) as part of its Flora and Fauna Working Paper, an inventory of known sensitive bird sites, including location, quality and quantity information. The County has identified conflicting uses and analyzed ESEE consequences. Based on this analysis, Lane County has decided to adopt a procedure for "flagging" areas in which such sites occur and requiring conflicting uses to be subject to conditional use approval. For all conflicting uses except timber management activities, the County has adopted "Sensitive Bird Habitat Protection Standards and Criteria" as part of the Lane Code (Ord. No. 11-84). Excerpts from that zone section are as follows (LC 16.005(4)(1)):

"(b) Development Plan Submittal. The person proposing the development shall submit plans to the

Good Morning Rachel,

I am attaching a letter to Gary Darnielle, in care of your office, requesting an extension of the deadline for response to the submittals of the Appellant in PA19-05298. The current deadline is October 10, 2019, we are requesting that date be extended to November 7, 2019. The request provides for the previously granted two week period to follow the submittal deadline for all parties to be able to respond to information that has been submitted during this initial period and a final one week period for rebuttal by the Applicant. I have also attached a Request for Waiver of the Statutory Timelines, extending the applicable timelines by 45 days. If you feel additional time for the waiver is appropriate please let me know.

Thank you for your attention to this matter. Please let me know as soon as possible if the Hearings Official is amenable to our request.

Re: PA19-05298

Original by U.S. Mail, Electronic Copy to Rachel.Serslev@co.lane.or.us

Dear Mr. Darnielle:

On behalf of NIMPKISH, LLC, the owner of the property known as Tax Lot 18-02-11-00-00507 and the subject of the referenced Planning Action, I am requesting an extension of the deadline for filing additional information relating to the pending appeal from the current scheduled date of October 10, 2019 to November 7, 2019.

The issues raised by the Appellant, in particular their demand that previous decisions of the County Hearings Official be reversed, and policies of County Staff that have been relied upon based on those decisions be dramatically changed, are of profound importance to the citizens of Lane County. While I have not yet been provided with a copy of the appeal, I understand that LandWatch Lane County has also filed an appeal of a similar application for a Template Test Special Use Permit, basing their appeal on issues identical to those raised in this action.

With your concurrence I suggest that following the November 7, 2019 deadline all parties be granted a two week period to submit such information as they deem appropriate followed by a one week period for the Applicant to file a final rebuttal. We will also file an appropriate Request for Extension of Timelines with the Land Management Division, extending the statutory timelines by 45 days.

Thank you for your continuing courtesies in this matter.

Sincerely,

Jim Belknap

AGENDA
LANE COUNTY HEARINGS OFFICIAL

DATE: Thursday, September 26th, 2019

TIME(S): 9:30 A.M.

LOCATION: Lane County Customer Service Center (CSC) Goodpasture
Rm 3050 N Delta Hwy, Eugene OR, 97408

Lane County complies with state and federal laws and regulations relating to discrimination, including the Americans with Disabilities Act of 1990 (ADA). The meeting location is wheelchair-accessible. If one needs special accommodations (hearing impaired, language translation, chemical sensitivity needs or large print copies of the agenda), please request at least 48 hours prior to the meeting by calling Amber Wolles 541-682-6917.
*SPECIAL DATE

ITEM	FORMAT
1. 509-PA19-05298: Description: An appeal of a request for Director Approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(2)-2.4, (3), (5) and (6). Map and Tax Lot: 18-02-11-00-00507 Owner: Nimpkish LLC Applicant: Jim Belknap Appellant: LandWatch Lane County Staff: Rachel Serslev Hearings Official: Gary Darnielle	a) Announcement of the nature & purpose of the hearing b) Announcement of opportunities for submission of information & appeal. c) Disclosure of ex parte contacts d) Report by the Director e) Applicant's testimony f) Testimony of persons in favor g) Testimony of other persons h) Any additional comments by the Director i) Applicant rebuttal j) Conclude the hearing The Hearings Official will not make a decision on these matters at this hearing. The County Code requires that a written decision must be made within 10 days of this hearing date. To receive a copy of the Hearings Official's decision, fill out a request form at the public hearing or call the Lane County Land Management Division at 541-682-6917.

Re: LandWatch testimony in opposition to Request for Template Dwelling in the F-2 zone, 509-PA19-05298 (Nimpkish).

On behalf of LandWatch Lane County, please accept this testimony in support of the appeal and in opposition to the application described above.

OAR 660-006-0025(6) explains that "[n]othing in this rule relieves governing bodies from complying with other requirements contained in the comprehensive plan or implementing ordinance such as the requirements addressing other resource values (e.g., Goal 5) that exist on forest lands." On its face, this rule requires that comprehensive plan policies are approval criteria for template dwelling approvals. LandWatch cannot identify any caselaw addressing this provision, and, therefore, its meaning appears to be a matter of first impression.

It is well-known that the comprehensive plan imposes a residential density standard of one dwelling per 80 acres for Major Big Game habitat.[1] The subject property is designated

[1] Flora and Fauna policy 11 states:

> "Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use

0777

Major Big Game, and, therefore, the applicant must demonstrate that the density is no greater than one dwelling per 80 acres.

LandWatch is also aware of the Hearings Official's ruling in another matter referenced by staff, in which the Hearings Official determined that:

> "Big Game Range density standards were integrated into the zoning classification and minimum lot size recommendations on a regional basis. The density recommendations were not applicable to existing parcels but were to be considered in rezoning applications. Therefore, approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards."

Hearings Official Decision, 509-PA17-05951, (Evans/Betz). The problem with the Hearings Official's conclusion is that it is simply not supported by the Flora and Fauna working paper. While integrating density standards into zoning classifications may have been one of the initial goals, that is not what actually occurred. LUBA addressed this in detail in a recent decision:

> "As discussed below, as part of its program to achieve Goal 5, the county has adopted a standard of no more than one dwelling per 40-acres to protect Peripheral Big Game Range (Residential Density Standard). That standard is found in the Flora & Fauna March 1992 Lane County Comprehensive Plan Working Paper Revisions document (Flora and Fauna Working Paper), [ ]. The Flora and Fauna Working Paper indicates that the initial intent was to preserve the 40-acre standard through *zoning*. However, the county's inclusion of the subject property in the Peripheral Big Game Range inventory is geographical and is not tied to or dependent on the current F-2 zoning. The challenged decision does not purport to remove the subject property from the Peripheral Big Game Range inventory and associated habitat protections, including the limitation of one dwelling per 40 acres.

> regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resources zoning program."

The Flora and Fauna Working paper provides the residential densities recommended from ODFW:

> "The primary conflict to big game, as mentioned earlier is residential use at certain densities. ODFW has recommended overall residential densities for Peripheral Big Game Range at one dwelling unit per 40 acres; for Major Big Game Range at one dwelling unit per 80 acres. * * * to restate the conflict: overall residential density greater than one dwelling unit/40 acres in Peripheral Range * * * conflicts with habitat for big game." Flora and Fauna Draft Working Paper, Page 24.

* * *

The Flora and Fauna Working Paper the county incorporated into its findings explains that the Big Game Range protection:

> 'premise is to work overall density figures into minimum lot size recommendations for regions of the County, rather than postponing the issue by referrals to ODFW for every land division application. The anticipated result is to base zoning by region on the overall residential densities or ODFW minimum parcel size recommendations, thereby creating no conflict with Goal 5.' [ ].

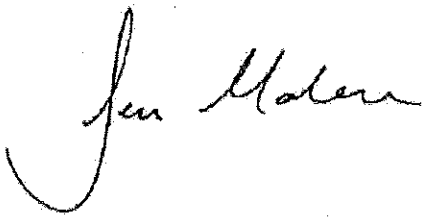
The Flora and Fauna Working Paper states that the county will be divided into regions and the county will determine the number of existing residences and the:

> 'additional number of residences allowable to still fall within the overall density level. Built upon and committed areas are subtracted out, as they are treated as Impacted Range. From the figure of remaining residences and acreage, a residential carrying capacity will be determined. This figure, or the ODFW figure of 40 [or 80] acres, whichever is lesser, will be recommended in the region for residential density for big game purposes.
>
> * * * * *
>
> If this figure is ever exceeded, it constitutes a conflict with Big Game Range. [ ].'

The Body of the Flora and Fauna Working Paper therefore states that the lesser of this figure or the county's 40-acre figure [or in this case the 80-acre figure] will be 'recommended in the region for residential density for big game purposes.' *Id.* If this figure is exceeded, there is a conflict and an ESEE analysis is required. *Id.* Ultimately, however, the Flora and Fauna Working Paper identified as its selected strategy that 'ODFW recommendations on overall residential density with Peripheral and Major Big Game Range shall be a determinant in minimum parcel size for regions of the County.' [].

In the challenged decision, the county did not identify the level of residential density allowed in the F-2 zone * * * *

We observe that the F-2 zone does not provide a general residential density standard. The use table for impacted forest zones lists six types of dwellings allowed in the F-2 zone. LC Table 16.211, 2.1-2.6. Those dwellings include: (1) caretaker residence for public parks and pubic fish hatcheries, (2) large tract forest dwelling, (3) lot of record dwelling, (4) template dwelling, (5) replacement dwelling, (6) temporary hardship dwelling. *Id.* A large tract forest dwelling may be allowed in the F-2 zone on a tract that is 'at least 160 contiguous acres or 200 acres in one ownership that are not



contiguous but are in Lane County or adjacent counties and zoned for forest use.' LC 16.211(3)(a)(ii). The remaining five types of dwellings do not require a particular minimum lot or parcel size. LC 16.211(3). The minimum lot or parcel size for new or adjusted lots or parcels in the F-2 zone is 80 acres. LC 16.211(7); *see also* ORS 215.780 (providing generally applicable 80-acre minimum requirement); OAR 660-006-0026 (same). However, the F-2 zoning indicates that predominant land ownerships are 80 acres or less. Accordingly, as we understand it, the county did not quantify a residential density allowed in the F-2 zone, and instead used the ODFW 40-acre standard for areas inventoried as Peripheral Big Game Range."

Cattoche v. Lane County, __ Or LUBA __ (LUBA No. 2018-109, May 22, 2019), *16-21. (italicized emphasis in original; underline emphasis added).

A complete reading of the *Cattoche* case and the Flora and Fauna Working Paper establishes that, ultimately, densities were not incorporated into the zoning – let alone the F-2 zoning. Instead, it was the 40- and 80-acre residential density standards for Peripheral and Major Big Game designations, respectively, and that this standard *is the program to achieve Goal 5*.[2] Because the application is not consistent with the 80-acre standard, the application must be denied and the Planning Director's decision must be reversed.

I respectfully request that the decision of the Planning Director be reversed and the application denied.

Sincerely,

Sean T. Malone
Attorney for LandWatch Lane County

Cc:
Client

[2] Indeed, the 40- and 80-acre standard is consistent with the criteria for the programs to achieve goal 5 because it is a "clear and objective standard[]" that satisfies two of the three provisions identified in OAR 660-023-0050(2). More specifically, the standard is a "fixed numerical standard" and "[i]t is a nondiscretionary requirement." *Id.*

HAND DELIVERED

Gary Darnielle, Lane County Hearings Official
c/o Rachel Serslev, Planner
Lane County Land Management Division
3050 North Delta Highway
Eugene, OR 97408

Re: **509-PA-05298 (Nimpkish LLC)**
Appeal of Director Approval of Template Dwelling in F-2 zone
by Landwatch Lane County

Mr. Darnielle,

Please enter this letter and attachment into the record of the above-referenced appeal that I am submitting on behalf of the applicant and in support of the Director's decision and findings.

The purpose of this letter is twofold. First, I want to fully support Mr. Belknap's detailed response to Landwatch's appeal statement. At this time, there is really no substance or merit to any aspect of Landwatch's appeal.

This leads to my other point which is to vigorously refute Landwatch's speculations about the applicability of Statewide Planning Goal 7 and, more specifically, the County's "Goal 7 (Hazards) working paper" to this template dwelling application. It should be stated clearly: Goal 7 and the County's Natural Hazards Working Paper (dated: "JAN-1982") has no relevance to nor is it part of the criteria that my client must, and has, addressed for this application. That Working Paper has been implemented in various ways including at the building permit level. Attachment 3 to the September 19 staff report reflects that process.

More to the point for this appeal, I have attached the County's 15-page Forest Template Dwelling Application form which contains all of the applicable standards and criteria that must be addressed by a template dwelling applicant, like our clients, the Goodmans, and Nimpkish LLC, the property owner. Nowhere in this multitudinous array of requirements is there any mention of Goal 7, the DOGAMI landslide maps or the County's thirty-seven year old "draft" Natural Hazards Working Paper. Landwatch is free to sift through these various standards to find anything about Goal 7.

As with their venture into Goal 5 and Big Game Habitat that has been repeatedly rejected, so too, this wandering into Goal 7 should also be quickly and summarily rejected. The staff

report articulates this response in a clear and concise manner. Without something more from Landwatch, Goal 7 should follow in the footsteps of Goal 5.

Sincerely,

Michael E. Farthing

Enclosure

September 23, 2019

Re: PA19-05298

Dear Mr. Darnielle:

This Thursday, September 26, 2019, you will be hearing an appeal of the above referenced planning action. Rachel Serslev is the planner at Lane County Land Management who has been quite ably handling this application. Last week I presented a letter to Ms. Serslev and, as these things are wont to go, I believe there is an abundance of information that Ms. Serslev has been preparing for your review. My intent with this correspondence is to summarize what appears to be the three elements of the appeal being made by LandWatch Lane County and to insure that our response to those three points is presented to you prior to the hearing so that we may be able to discuss them directly at that time.

Objection No. 1. The Appellant objects to the inclusion of a dwelling located on Tax Lot 18-02-11-00-00601 (herein Tax Lot 601) in the dwelling count of three as established in the template test provided by our company, representing the applicant, NIMPKISH, LLC. This objection has previously been made by LandWatch, most recently in PA 17-05951, a request for a Special Use Permit using the template test for Tax Lot 18-02-11-00-00201. As noted in our application and as discussed in the appeal of PA17-05951, the dwelling located on Tax Lot 601 was originally established in a mobile home placement permit under BP2367-81 and was replaced with a site built structure under provisions of a Verification of Replacement Rights approved under PA98-05159. In PA17-05951 the Appellant (LandWatch) argued that the dwelling located on Tax Lot 601 did not meet the criteria for construction on or before January 1, 1993 and "continues to exist." This allegation requests the inclusion of the dwelling located on Tax Lot 601 be denied in PA17-05951. The allegation of error was dismissed.

Gary Darnielle
PA19-05298
September 23, 2019

The 14 page decision in the appeal of PA17-05951 made by the Lane County Hearings Official on August 8, 2018 is included with this letter as Exhibit A. Attention is directed to page 11 of 16, Section No. 4. In what might be addressed as courtroom parlance, the issue raised by the Appellant in the matter at hand, PA 19-05298, that the dwelling located on Tax Lot 601 cannot be considered in the parcel count of the template test, "has been asked and answered." The dwelling located on Tax Lot 601 was lawfully established in 1981 under BP 2367-81, and was lawfully replaced in 1998 under the Verification of Replacement Rights approved in PA98-05159.

The specific question as to the recognition of the dwelling on Tax Lot 601 is identical to that addressed in PA15-05734 and PA15-05735. In both of the those applications the Hearings Official, affirmed by decision of the Lane County Board of Commissioners (Board Order 16-05-17-06), recognized that a dwelling replaced under provisions of a Verification of Replacement Rights, met the standard of "continues to exist."

I must note with interest that our application showed the presence of three dwellings within the template test, the minimum standard required by statute and code, but brought to light the potential for a fourth dwelling to be recognized in Tax Lot 18-02-12-00-00303. I am appreciative of the Land Management Division's attention to the details of the application such as was accomplished and completed the research necessary to confirm that a pre-1/1/93 dwelling did, in fact, exist on Tax Lot 303. I also appreciate the additional research that was completed by the staff in reviewing the dwelling on Tax Lot 18-02-12-00-00302. Of note, we did not claim a dwelling on Tax Lot 18-02-11-00-00600; as was noted in the Staff Report of 9/19/19, the dwelling on Tax Lot 600 does not qualify as a pre-1/1/93 dwelling. We concur.

While the question of the status of the dwelling on Tax Lot 18-02-11-00-00601 is clearly answered in the previous Hearings Official decision, and in the records of LMD, whether or not this is allowed to be counted in the current application towards the dwelling count of three is irrelevant as the required dwelling count is met even without consideration of this lot.

Objection No. 2. The Appellant argues the subject property, Tax Lot 18-02-11-00-00507, is "within an area designated Major Big Game; the county has incorrectly taken the position that zoning protects big game and was adopted to do just that, without providing evidence of how subverting the 80 acre minimum lot/parcel size in favor of underlying fragments has protected zoning meant to protect Major big game by retaining a density of one dwelling/80 acres."

Again, this question "has been asked and answered." Referring to the decision made by the Lane County Hearings Official on August 8, 2018 in the appeal of PA17-05951, noting again a copy of this decision is attached at Exhibit A, one should review page 10 of 14, Section 3. The Appellant in the application under review, PA19-05298, offers the same argument that has been addressed in the appeal of PA17-05951.

The salient points of the Hearings Official's decision in PA17-05951 are the following:

"...the Flora and Fauna Working Paper of the Rural Comprehensive Plan explains that the Big Game Range density standards were integrated into the zoning classifications and minimum lot size recommendations on a regional basis. The density recommendations were not applicable to existing parcels but were to be

considered in rezoning applications. ***Therefore, the approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards."*** *

"Lane County's Rural Comprehensive Plan was acknowledged by LCDC in 1984. In regard to compliance with Statewide Planning Goal 5, Lane County did categorize Big Game Habitat as a 1C significant Goal 5 resource. However, as noted above, the county incorporated the protections recommended in the Flora and Fauna Working Paper into the zoning ordinance. Accordingly, residential development was limited in Big Game Habitat areas and further restriction of development was not necessary to comply with Statewide Planning Goal 5."

"The appellant (LandWatch) specifically cites Rural Comprehensive Plan Goal 4 Policy #11 which states *'Encourage the consolidation of forest land ownership in order to form larger more viable forest resource units.'* First, this policy is aspirational and does not provide an objective standard that applies to a quasi-judicial land use permit process. Second the action taken by the County does not have any impact upon parcelization. Rather, the template dwelling process forces an applicant to recognize and work within the existing parcelization pattern within a 160 acre square template."

***My emphasis is added**

As noted in the enclosed Exhibit A, the allegation of error was dismissed.

Objection No. 3. LandWatch opines:

"the subject property is in an area designated by DOGAMI as severe landslide danger; the Goal 7 (Hazards) working paper policies provide:

Each of these proposed policies is intended to fulfill a significant intent of Goal 7.

Policy 1. Establishes that Lane County plans shall be based on an inventory of known areas of natural disaster and hazard It (sic) is also intended to establish that in rural areas, **specific on-site evaluation is invaluable in avoiding or minimizing hazardous conditions.***

Policy 2. Establishes that the types(s) and degree of hazards(s) present must be considered as significant factors in determining compatible types and intensities of development. A primary determinant of compatibility being whether a development may be reasonably safeguarded. The policy further establishes that safeguards must be provided as a provision for approval of proposed developments. **Also the policy establishes the building code as an assumed level of safeguard.***

Policy 3. Given the technological capabilities available in today's society it is probable that any given development could be protected against the worst of natures (sic) hazards; but at what cost to the environment and the public? This policy establishes that an assessment of these costs is a necessary part of the review process."
***(My emphasis added)**

Gary Darnielle
PA19-05298
September 23, 2019

Let us note again, the Lane County Comprehensive Plan was approved in 1984 and in that approval was the discussion of Goal 7. The zoning code of Lane County, specifically Chapter 16.211, is adopted to carry out the provisions of the acknowledged Comprehensive Plan. At no place within LC16.211 is reference made to a requirement to address landslide risk. There are provisions that prohibit siting of a dwelling within "30 feet of any ravine, ridge or slope greater than 40 percent (40%)" – LC16.211(5)(a)(i). There are an abundance of limitations made within LC16.211 for purposes of mitigating the hazard of fire danger, but nowhere is a discussion made of landslide risk.

In the Director's Approval of PA 19-05298, on page 5 of 20, Section 14, the staff sets forth:
"The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:
14. The entire subject property, according to DOGAMI, is within a "Very High" landslide susceptibility area and contains landslide deposits. The designations may require a geotech report with submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 for more information."

This informational condition is set forth by Lane County in total compliance with Goal 7. The Staff Report of 9/19/19 makes this point perfectly clear and accurately concludes "The approval criteria for a template dwelling, located at Lane Code 16.211(2)-2.4 do not include RCP Goal 7."

The Appellant concedes **"the building code as an assumed level of safeguard."** The **"on-site evaluation"** is intended to specifically avoid or minimize the risk of **"hazardous conditions"** and is to be considered by the building department in their evaluation of an application for a building permit.

We concur.

The DOGAMI overlay of landslide risk is, by anyone's definition, a very broad stroke of the brush. A copy of the map reflecting the subject property and adjoining lands is included with this letter at Exhibit B. The area shown in the DOGAMI overlay encompasses hundreds of acres as potentially having a landslide risk. As a specific response to the inclusion of the subject property and the adjoining lands in the DOGAMI map as a "Very High" risk of landslide, this overlay extends onto Tax Lot 501 to the east of the subject property, taking in an area that is virtually level. A reasonable person may ask what landslide risk there is on a level tract of land?

What may be more appropriate for consideration is the soils map for the subject property, which was included in the original application at Exhibit 5C. I am including at Exhibit C to this letter a copy of the soils map depicting the subject property showing the northern portion of the parcel being comprised of Soil Type 113G, Ritner cobbly silty clay loam, 30 to 60 percent slopes, and the southern portion of the property being comprised of Soil Type 107C, Philomath cobbly silty clay, 3 to 12 percent slopes.

Also included with this letter at Exhibit D is the summary of Soil Type 113G and Soil Type 107C as presented in the "Soil Survey of Lane County Area, Oregon" as prepared by the United States Soil Conservation Service in their catalogue issued in September of 1987. In the discussion of Soil Type 107C no limitations are offered for homesite development and no risks of soil movement are highlighted. In the discussion of Soil Type 113G the notation is made "The soil in this unit is subject to slumping, especially where road cuts are made in the steeper areas. Slumping can be minimized by locating roads in the more gently sloping areas and by using

properly designed road drainage systems." This discussion goes on to state "If this unit is used for homesite development, the main limitations are steepness of slope, depth to bedrock, low soil strength, cobbles, and moderately slow permeability. Roads and streets built on the soil in this unit are subject to slippage because of the steepness of slope."

Referring again to the soils map included at Exhibit C, the proposed dwelling is to be located in the area of Soil Type 107C, the Philomath cobbly silty clay, and no risks of "slumping" are noted by the Soil Conservation Service in their catalogue of 1987. Enclosed at Exhibit E to this letter is a copy of Attachment 1 to a Supplement to Application, provided with the original information for staff review. Exhibit E is the Parcel Plan for the subject property showing an overlay of contour lines depicting the effort to site the dwelling on the most level portion of the property and also showing the location of the proposed dwelling to be in the area of Soil Type 107C.

In short, the Director's notation that in any building permit submittal the applicant for that permit needs to provide a "geotech report" in evaluation of the proposed building site is appropriate and meets clearly whatever risk may exist in the soils of the subject property. This is a building permit question, not a land use question.

Thank you for your attention to these thoughts, I look forward to discussing this matter in person with you at the upcoming hearing.

Sincerely,

Jim Belknap

LANE COUNTY HEARINGS OFFICIAL
APPEAL OF A PLANNING DIRECTOR APPROVAL OF A TEMPLATE DWELLING WITHIN AN F-2 DISTRICT

Application Summary

On November 30, 2017, a request to establish a dwelling in the Impacted Forest Lands (F-2) zone was submitted to Lane County Land Management Division by Geri Betz. The application was deemed complete on January 5, 2018. On May 8, 2018, the Director issued a determination that the subject property complied with the applicable standards and criteria for a Forest Template Dwelling pursuant to LC 16.211(5) and (8). Notice of the determination was mailed to surrounding property owners and interested parties. On May 21, 2018, a timely appeal was submitted by LandWatch Lane County.

Parties of Record

Geri Betz	LandWatch Lane County	Mike Evans

Mike Farthing	Bob Smejkal	

Application History

Hearing Date: June 14, 2018
(Record Held Open Until July 26, 2018)

Decision Date: August 8, 2018

Appeal Deadline

An appeal must be filed within 12 days of the issuance of this decision, using the form provided by the Lane County Land Management Division. The appeal will be considered by the Lane County Board of Commissioners.

Statement of Criteria

Lane Code (LC) 16.211(5)&(8)
ORS 215.730(1)(b)

Findings of Fact

1. The property subject to this application, hereinafter referred to as the "subject property," is located on tax lot 201, assessor's map 18-92-11. The subject property is located approximately half a mile from the Urban Growth Boundary of the City of Springfield. The subject property is vacant, is 18.5 acres in size, and is

owned by the Applicant. It is zoned F-2 Impacted Forest Lands. The subject property is not contiguous to any other properties under the same ownership and therefore is not part of a tract. It is bordered on all sides by property zoned F-2 Impacted Forest Lands.

The subject property is primarily grass with about eight acres of young Douglas fir. It has moderate to steep slopes that slope downward from the north east to the southwest. The proposed development area is located on a relatively flat area in the southeast corner of the property.

2. The subject property received a preliminary legal lot verification per Land Management Division file No. 509-PA07-05916. This preliminary verification was noticed and became final with department file No. 509-PA07-05924. The property has not been reconfigured.

3. Fifty-six percent of the subject property is composed of soils that have a forest capability rating of above 70 cubic feet per acre per year.

Soil Map Unit #	Soil Type Description	% of Tax Lot	Cu.Ft./ Ac./Yr.
113G	Ritner Cobbly Silty Clay Loam, 30 to 60% Slopes	41%	149
116G	Rock Outcrop-Witzel Complex, 10 to 70% Slopes	23%	21
107C	Philomath Silty Clay, 3 to 12% Slopes	21%	45
138G	Witzel Very Cobbly Loam, 30 to 75% Slopes	14%	70
138E	Witzel Very Cobbly Loam, 3 to 30% Slopes	1%	70

Based upon the average soil productivity of the subject property, which is between 50 to 85 cubic feet per acre per year of wood fiber, the 7-parcel template test required by LC 16.211(5)(c)(ii)(aa) is applicable to this application. In addition, LC 16.211(5)(c)(ii)(bb) requires that at least three dwellings existed on January 1, 1993, and continue to exist on lots located within a 160-acre square centered on the subject property. The following table documents eight parcels relied upon by the Applicant to satisfy Lane Code 16.211(5)(c)(ii)(aa):

Count	Assessor's Map	Tax Lot	Year of Creation	Documentation / Deed / LLV / Land Division
1	18-02-11	401	1811	132/519, LLV 509-PA 04-05476
2	18-02-11	404	1922	10/332, LLV 509-PA 04-05480
3	18-02-11	501	1944	LLV 509-PA 15-05130
4	18-02-11	506	1944	LLV 509-PA 15-05130

5	18-02-11	601	1982	Parcel 2 of Partition M 43-81
6	18-02-11	100	1953	460/253
7	18-02-02	200	1973	R631/13118
8	18-02-10	100	1941	222/81

4. Lane Code 16.211(5)(c)(ii)(bb) requires that at least three dwellings existed on January 1, 1993, and continue to exist on lots located within a 160 acre square centered on the subject property. The Applicant has relied upon the following dwellings/tax lots:

Count	Assessor's Map	Tax Lot	Year	Year of Dwelling on Property
1	18-02-11	501	1944	1968 per replacement rights 509-PA 01-05598
2	18-02-11	601	1982	1982 per replacement rights 509-PA 98-05159
3	18-02-11	100	1953	1978 per replacement rights 509-PA 01-05596

The proposed dwelling is located approximately 500 feet from the nearest dwelling on the adjacent Tax Lot 501 to the south east. To the east, Tax Lot 100 also contains a dwelling that is over 1,000 feet from the proposed home site. the home site is located 130 feet from the eastern property boundary, 200 feet from the southern property boundary, approximately 310 feet from the northern property boundary, and over 1,000 feet from the western property boundary.

Slopes are approximately 10 percent at the proposed location of the home site and it is occupied by vegetation that includes grasses, brush, and non-commercial Black Oak trees. The soils in this area are Philomath Silty Clay with 3 to 12 percent slopes, which has a low capability rating compared to soils on most other parts of the subject property. A contour map submitted by the Applicant does not show any ravines, ridges, or slopes greater than 40 percent within 30 feet of the home site.

5. The property is currently accessed by a 1500-foot, existing dirt road off of Weyerhaeuser Haul Road that will be improved to standards required by LC 16.211(8(e). The Applicant proposes an easement for the use of Weyerhaeuser Haul Road from Wallace Creek County Road to the subject property. The Weyerhaeuser Haul Road is asphalt with a gravel shoulder width of over 16 feet and a grade of less than 16 percent. No other dwellings currently use this road for access. Access to the subject property from the Weyerhaeuser Haul Road will be a private driveway that crosses Tax Lots 302, 403, 404, 401, and 200. In the event that an easement to use Weyerhaeuser Haul Road is not obtained, the applicant proposes an easement using Brand S. Road from Bob Straub Parkway (a Lane County road) to the crossing at Weyerhaeuser Road. A crossing is reserved in a

August 19, 1947 deed. (See Book 354, Pages 176–181, Lane County Deeds and Records.) Brand S Road varies from 12 to 20 feet in width and consists of an all-weather gravel surface with some paved sections. It serves several dwellings and has no grades that exceed 16 percent.

An existing, unimproved road near the proposed home site that will be improved to function as the private access road and driveway to the proposed dwelling. The driveway follows an existing unimproved road that appears (from aerial imagery) to end at the northern boundary of the subject property. The driveway will be extended through an open, grassy area to the home site. Furthermore, the applicant states that the road will only be relocated where required by Lane Code to meet grade requirements. Because the driveway is in excess of 200 feet it is required by LC 16.211(8)(e)(ii) to have a turnout.

6. Consistent with ORS 215.730(1)(b)(D), the subject property is located within the service boundary of the Pleasant Hill Rural Fire Protection District and the District has submitted written verification of compliance with standards specified in LC 16.211(8)(e). Steve Abel, the Interim Fire Chief, inspected the access road through the subject property and tax lots 200, 302, 401, 402, 403 and 404. In a March 7, 2017 memorandum to Doug Wolf and Mike Evans, the Fire Chief listed the equipment that would access the subject property and did not identify any topographic features that would prevent the Applicant from satisfying the County road standards contained in LC 16.211(8)(e).

7. Well logs from surrounding properties show an average yield of 33 gallons per minute, indicating that an adequate supply of water is available. The water source is from an aquifer as there are no Class I streams on the subject property.

Decision

THE PLANNING DIRECTOR DECISION APROVING THE REQUEST (PA 17-05951) BY GERI BETZ FOR A TEMPLATE FOREST DWELLING ON TAX LOT 201, ASSESSOR'S MAP 18-02-11 IS AFFIRMED.

Justification for the Decision (Conclusion)

The subject property is zoned F-2 Impacted Forest Land. The Applicant is requesting approval to construct a single-family dwelling as provided by LC 16.211(5)(c). Dwellings authorized by this provision are known as "forest template" dwellings because some of the applicable approval criteria of LC 16.211(5) must be analyzed through the placement of a 160-acre square template centered on the center of the subject property (tract). Additionally, the placement of a dwelling on non-impacted forest land must meet the siting standards provided by LC 16.211(8).

Under the template dwelling regulations, the standards differ depending upon the soil productivity of the property upon which the dwelling is to be placed. In the present case,

a majority of the soils on the subject property are capable of producing about 70 cubic feet per acre per year of wood fiber. Therefore, LC 16.211(5)(c)(ii) is applicable. Under Subsection (aa) of this standard, an applicant must demonstrate that there were seven dwellings that existed on January 1, 1993 that are located within the 160-acre square template that is centered on the subject property. Under Subsection (bb) of this standard, an applicant must demonstrate that there were three legal lots that existed on January 1, 1993 and that continue to exist on the other lots or parcels described in LC 16.211(5)(c)(ii)(aa).

In the present case, the Planning Director found that the application satisfied the approval criteria of LC 16.211(5)(c) and the siting standards of LC 16.211(8). The Appellant raises the following allegations of error:

1. *Tax lot 501, assessor's map 18-02-11, one of the tax lots used to satisfy LC 16.211(5)(c)(ii), was subject to a 2017 property line adjustment that moved the dwelling from one lot to another and therefore it did not "continue to exist" as required by LC 16.211(5)(c)(ii)(bb).*

   This application for a template dwelling was submitted on November 30, 2017. A property line adjustment that resulted in a new parcel configuration for the dwelling on tax lot 501 became final on December 18, 2017 via PA 17-05695. The new parcel configuration was not recorded until December 22, 2017 (Instrument No. 2017-062866). Since a permit application must be reviewed under the conditions that exist on the date that it was filed, this property line adjustment is irrelevant to the current appeal.

   This allegation of error is dismissed.

2. *The dwelling on tax lot 501, assessor's map 18-02-11, one of the tax lots used to satisfy LC 16.211(5)(c)(ii), does not continue to exist.*

   This allegation of error raises several issues. These issues are as follows:

   a. *Whether a replacement dwelling meets the "continued to exist" standard of OAR 660-006-0027(3)(b)(B) and Lane Code 16.211(5)(c)(ii)(bb).*

      In the present application, the Applicant is required to satisfy by LC 16.211(5)(c)(ii)(bb) in regard to identifying three dwellings located on lots within the template that existed on January 1, 1993 and continue to exist. The Appellant argues that the dwelling that existed on January 1, 1993 was subsequently replaced and therefore cannot be shown to "*continue to exist.*"

      ORS 215.750 recognizes that a dwelling on some forest land is appropriate depending upon the amount of parcelization and development in the area and the quality of the subject property's soils. Indeed, Multnomah County

has acknowledged that the purpose of the statute as authorizing a limited amount of residential development on forest lands that are parcelized and developed with occupied dwellings.[1] The importance of the dwelling is its existence. That is, the three-dwelling requirement can be satisfied by a 5,000 square foot stick-built home or a single-wide mobile home. The importance lies with the residential use that it represents not the structure itself. In that regard, the lawful replacement of a dwelling that has met the January 1, 1993 threshold is consistent with this understanding.

As a matter of policy, the Lane County Board of Commissioners has held that a replacement dwelling meets the standard of "continue to exist."[2] In addition, I would point to Multnomah County where this interpretation has been codified into the zoning ordinance.[3] Arguably, if either LUBA or the Oregon Court of Appeals would have taken exception to Multnomah County's explicit allowance of replacement dwellings they would have so stated.

Based upon adopted Lane County policy, I must conclude that a dwelling that lawfully replaced a dwelling that was lawfully established on January 1, 1993 meets the "*continues to exist*" standard of Lane Code 16.211(5)(c) and OAR 660-006-0027(3)(b).

b. Whether a lawfully established dwelling may be replaced on forestland if it does not exist at the time of the application of the replacement dwelling permit.

The Appellant argues that a lawfully established dwelling on forestland may only be replaced if it exists at the time of the application of the replacement dwelling permit. If it did not, then the replacement dwelling permit was improperly approved and therefore the dwelling that existed in 1993 no longer 'continues to exist' for purposes of satisfying LC 16.211(5)(c)(ii)(bb). I agree with the Appellant on this issue.

ORS 215.755(1) provides that a dwelling may be replaced if it *has [emphasis mine]* intact exterior walls and roof, indoor plumbing, interior wiring for lighting, and a heating system.[4] The language of this provision is in the present tense and suggests that the necessary features of the dwelling to be replaced must be present.[5] Indeed, in *West v. Multnomah County*[6], LUBA agreed with the County that its definition of dwelling

[1] *West v. Multnomah County*, 70 Or LUBA 235, 242 (2014)
[2] Lane County Board of Commissioners Order No. 16-05-17-06, adopted May 17, 2016.
[3] *West v. Multnomah County*, 70 Or LUBA 235 (2014), 269 Or App 518 (2015)
[4] Contrast this language with Subsection (2)(n) of Section 2 of Chapter 462, Oregon Laws 2013 which provides that a dwelling in an EFU zone may be replaced if it "has, or formerly had.." the listed fixtures.
[5] *Hegele v. Crook County*, 56 Or LUBA 156, 165 (2008)
[6] *West v. Multnomah County*, 70 Or LUBA 235 (2014) *affirmed*, 269 Or App 518, 350 P3d 203 (2015)

would exclude inclusion of a structure that is long abandoned and in a condition that would preclude it being used as a residence. By the same token, for the purposes of a template dwelling test, a dwelling that was removed prior to an application for its replacement would not qualify for a replacement dwelling permit even if it could be shown that it had previously met the structural facilities listed in ORS 215.755(1).

c. *May the County's determination that the dwelling on tax lot 501 existed on January 1, 1993 and continues to exist be challenged in this appeal?*

This issue is whether the theory of issue preclusion prevents a re-examination of a previous decision regarding the lawfulness of the replacement of the dwelling on tax lot 501. Tax lot 501, and its dwelling, were the subject of contention in another appeal of a template dwelling by the Planning Director (PA 15-05734). In that case, tax lot 501 was one of the three parcels relied upon by the applicant Goodman to satisfy Lane Code 16.211(5)(c)(i)(bb). The hearings official explicitly found, as a factual matter, that the mobile home had been removed in a manner consistent with the replacement dwelling regulations.

The Applicant argues that legal status of the dwelling on tax lot 501 was settled in PA 15-05734 and, under the doctrine of issue preclusion, cannot be challenged in this proceeding. The Applicant cites the ruling in *Nelson v. Emerald People's Utility Dist.*, 318 Or 99, 104 (1993) as providing the five-factor test that the Oregon Supreme Court identified regarding issue preclusion. The five factors, as a discussion of their applicability to the current case, are addressed as follows:

i. *The issue in the two proceedings is identical;*

In PA 15-05734 the issue was exactly the same as in the present appeal where the dwelling on tax lot 501 is used to satisfy the three-dwelling requirement of ORS 215.750(1), as implemented by OAR 660-006-0027(3), and Lane Code 16.211(5)(c). Both appeals question whether the replacement of the dwelling on tax lot 501 complied with Lane Code and administrative rule requirements for replacement dwellings and whether a dwelling that had been replaced qualifies as a dwelling that "continues to exist" under OAR 660-006-0027(3)(b)(B) and Lane Code 16.211(5)(c).

ii. *The issue was actually litigated and was essential to a final decision of the merits in the prior proceeding;*

The prior application, as in the present application, was approved by the Planning Director and appealed to the Hearings Official.

The status of the dwelling on tax lot 501 was crucial in meeting the three-dwelling count in the template dwelling test for the applicant in PA 15-05734 as it is for the current applicant in the present appeal. The issue of whether the dwelling had satisfied the replacement dwelling regulations and whether a replacement dwelling qualified as a dwelling that "continued to exist" was raised by the appellant, rebutted by the applicant, and addressed by the Planning Director, the Hearings Official, and the Board of Commissioners in their respective decisions.

iii. *The party sought to be precluded had a full and fair opportunity to be heard on that issue;*

LandWatch Lane County was the official appellant in PA 15-05734 as it is in the present appeal. In both appeals, LandWatch Lane County fully participated in the proceedings.

iv. *The party sought to be precluded was a party or was in privity with a party to the prior proceeding;*

As stated above, LandWatch Lane County was the appellant in PA 15-05734 as it is in the present appeal.

v. *The prior proceeding was the type of proceeding to which preclusive effect will be given.*

In regard to this factor, LUBA has spoken clearly that it does not believe that the doctrine of issue preclusion applies to local land use proceedings.[7]

d. *Assuming the doctrine of issue preclusion does not apply, does the record support a finding that the dwelling on tax lot 501 was lawfully issued a replacement permit in 2001?*

The Appellant argues that the dwelling on tax lot 501 had been removed from the property prior to the filing of an application for a replacement dwelling. In specific, the Appellant argues that the mobile home had been removed prior to October of 2000 and not in April of 2001 as determined by the Planning Director.

[7] *Lawrence v. Clackamas County*, 40 Or LUBA 507,520 (2001)

Except for when the mobile home was removed from tax lot 501, the facts are uncontested. The applicant in PA 15-05734 applied for a permit for the verification and replacement of a lawfully established dwelling on April 20, 2001.[8] However, the same report stated that the mobile home had been removed in April of 2001.

In PA 15-05734, the Hearings Official relied upon the Planning Director's determination that the mobile home was removed in April of 2001 plus notarized testimony that the mobile home existed in 2000. Department of Assessment and Taxation data was felt to be inconclusive as the age of the mobile home could have rendered its value as zero. The owner also offered to provide dated receipts of the donation of the mobile home's heating system but this circumstantial evidence was not placed into the record.

As evidence that the mobile home was removed from tax lot 501 prior to the application for its replacement, the Appellant offers a copy of two photographs. The first photograph, submitted by the Applicant in a July 5, 2018 submission, is a relatively high-resolution color photograph alleged to have been taken August 1, 2000. This photograph shows a square structure and a rectangle structure in a clearing. The photograph is annotated with the dimensions "46'x 12' MH" in parenthesis. This would indicate that the rectangular structure is the mobile home. In its June 21, 2018 submission, the Appellant introduces a copy of a black and white photograph at a lesser scale apparently taken in October of 2000. Despite the Appellant's assertions, this photograph shows the rectangular structure that was present in the earlier photograph. The scale of the photograph does not definitively show whether the square structure remains.

Taken as a whole, the evidence in the record does not indicate that the mobile home on tax lot 501 was removed from the property prior to the filing of the application for its replacement. The determination of the Planning Director made in PA 01-5598 and the Hearings Official in PA 15-05734 regarding the existence of the mobile home and the validity of the replacement dwelling permit is confirmed.

e. *There was no dwelling on the property between 1997 and 2006.*

As pointed out in PA 15-05734, the age of the mobile home between 1997 and when it was removed from the property explains why the Lane County Assessor assigned a zero value to the structure.[9] After the property owner

[8] The Planning Director's staff report incorrectly noted that the application was submitted on May 5, 2001. In fact, the application was submitted on April 20, 2001 (as noted in the Appellant's March 3, 2016 submission), and then put on hold by the Applicant on May 5, 2001.
[9] See May 26, 2016 letter from Mike Cowles, Lane County Assessor.

applied for a replacement dwelling permit and then removed the dwelling, an occupancy-certified structure was not completed until 2006. As explained in the Hearings Official's decision in PA 15-05734, while the building permit process was irregular, the County never did cancel that permit and ultimately issued an occupancy permit for the current dwelling.

This allegation of error is dismissed.

3. ***The application is inconsistent with several working papers to the Lane County Rural Comprehensive Plan, policies for Goals 4 and 5 of the Rural Comprehensive Plan, and OAR 660-006-0027(1)(d) and (f).***

The Appellant makes the following allegations of error:

a. *The Director's approval violates the dwelling density standards of Big Game Ranges.*

The Appellant notes that the entire TRS within which the subject property exists is designated Big Game Range cites OAR 660-006-0027(1)(f) which require that the siting of the dwelling be consistent with density limitations imposed by the acknowledged comprehensive plan and land use regulations. However, the Flora and Fauna Working Paper of the Rural Comprehensive Plan explains that the Big Game Range density standards were integrated into the zoning classifications and minimum lot size recommendations on a regional basis. The density recommendations were not applicable to existing parcels but were to be considered in rezoning applications. Therefore, the approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards.

b. *The Director's approval violates Goal 4 and 5 policies of the Rural Comprehensive Plan.*

Lane County's Rural Comprehensive Plan was acknowledged by LCDC in 1984. In regard to compliance with Statewide Planning Goal 5, Lane County did categorize Big Game Habitat as a 1C significant Goal 5 resource.[10] However, as noted above, the County incorporated the protections recommended in the Flora and Fauna Working Paper into the zoning ordinance. Accordingly, residential development was limited in Big Game Habitat areas and further restriction of development was not necessary to comply with Statewide Planning Goal 5.

The Appellant specifically cites Rural Comprehensive Plan Goal 4 Policy #11 which states "*Encourage the consolidation of forest land ownership in*

[10] *Save TV Butte v. Lane County*, LUBA No. 2017-031, Slip Op at 26 (1/8/2018)

order to form larger more viable forest resource units." First, this policy is aspirational and does not provide an objective standard that applies to a quasi-judicial land use permit process. Second, the action taken by the County does not have any impact upon parcelization. Rather, the template dwelling process forces an applicant to recognize and work within the existing parcelization pattern within a 160-acre square template.

c. *The Planning Director's approval violates OAR 660-006-0027(1)(f).*

OAR 660-006-0027(1)(f) applies to "Lot of Record" dwellings in forest zones. Template dwellings are covered by OAR 660-006-0027(3). While "Lot of Record" standards require habitat protection, template dwelling regulations do not.

This allegation of error is dismissed.

4. ***The dwelling on tax lot 601 does not "continue to exist."***

The dwelling on tax lot 601 is being counted towards the application's compliance with LC 16.211(5)(c)(ii)(bb). A 1972 Hilcrest 20' x 40' manufactured dwelling was placed on tax lot 601 in 1981 (BP 2367-81). At this time the property was zoned FF-20, which allowed a dwelling as a permitted use. The current dwelling replaced that structure in 1998 via replacement dwelling permit PA 98-05159. Prior to the replacement dwelling, the manufactured dwelling was assessed on a separate tax account for personal property (MH 4141121). When a manufactured dwelling is replaced with a stick-built dwelling the value of the new dwelling is added to the property's land account and the account for the manufactured dwelling is removed. The discussion above regarding Allegation of Error #2 is applicable.

This allegation of error is dismissed.

5. ***Tax lot 600 is not a legal lot.***

The Appellant alleges that tax lot 600 was created via a circuit court foreclosure order and therefore it was not lawfully created. Tax lots 600 and 701 were created as independent foreclosures. Per ORS 92.010(9)(a) exempts property created by lien foreclosure as a division of land that requires partition approval. It was verified as a legal lot in PA 2509-92.

Regardless of the history of tax lot 600, the reliance upon this tax lot or its dwelling is not necessary to satisfy LC 16.211(5)(c)(ii)(aa) or (bb).[11]

[11] The Planning Director did not base her findings that the application satisfied LC 16.211(5)(c)(ii)(aa) or (bb) on this tax lot.

This allegation of error is dismissed.

6. ***The application does not comply with the access requirements in Lane Code 16.211(8)(e).***

The Appellant alleges that the Applicant has not demonstrated that both of the alternative routes meet the slope, width and turnout criteria of LC 16.211(8)(e).

The Applicant's preferred access route is over an existing driveway, passing through multiple properties zoned Impacted Forest Lands, to Weyerhaeuser Road, which is owned by Willamalane Park and Recreation District. The access will then follow Weyerhaeuser Road to Wallace Creek Road, travelling through rural residentially zoned property as it nears the latter road. Weyerhaeuser Road has at least a 16-foot travel surface and not grades in excess of 16 percent. This is consistent with the standards of Lane Code 16.211(8)(e)(i) and (iv). In the event that permission is not granted to use Weyerhaeuser Road, the alternative access would be to cross Weyerhaeuser Road and travel west along Brand S Road until it intersects with Bob Straub Parkway. Brand S Road also has a minimum travel surface of 16 feet and no slopes in excess of 16 percent. Lane County transportation staff have noted that both Weyerhaeuser Road and Brand S. Road meet current access standards.[12]

Either access route requires the use of the existing driveway that has been inspected by the Pleasant Hill Fire Protection District and has been found adequate and feasible to be improved, where necessary, to fire district and Lane Code standards. Compliance with the road access standards of LC 16.211(8)(e) have been made a condition of approval.

This allegation of error is dismissed.

7. ***The Applicant has not submitted deeds showing that all of the lots used by the Applicant were lawfully created.***

The evidentiary standard is one of "preponderance of the evidence." Deeds are one type of relevant evidence as are County decisions that verify, either in a preliminary or final way, the legal lot status of property. Other types of evidence such as partition or subdivision approvals, the deed description cards created by the County Assessor, and executed and recorded land sale contracts are also relevant.

The Planning Director relies upon eight parcels to conclude that LC 16.211(5)(c)(ii)(aa) has been satisfied. The Planning Director's decision cites documentation regarding the creation of each parcels and lists its date of creation.

[12] See March 15, 2018 statement from Lane County Transportation Planning. (Exhibit "F" to the Planning Director's decision.)

This list was reviewed by County staff who are skilled in the reading of deeds and other documents regarding the creation of property.

More definitively, the record contains the following documentation regarding the lawful creation of the subject property and the properties relied upon by the Planning Director for the satisfaction of LC 16.211(5)(c)(ii)(aa):

- In regard to the subject property, final legal lot verification and notice for tax lot 201, assessor's map 18–02–11. (PA 07–5916)
- A preliminary legal lot verification for tax lot 401, assessor's map 18–02–11. (PA 04–5476)
- A preliminary legal lot verification for tax lot 404, assessor's map 18–02–11. (PA 04–5480)
- A final legal lot verification and notice for tax lot 501, assessor's map 18–02–11. (PA 15–5130)
- A final legal lot verification and notice for tax lot 506, assessor's map 18–02–11. (PA 15–5130)
- Final partition approval M 43–81, dated June 22, 1982, for tax lot 601, assessor's map 18–02–11 plus Lane County Assessor deed description card.
- Lane County Assessor deed description card for tax lot 100, assessor's map 18–02–11 showing property creation in 1953.
- County Assessor deed description card for tax lot 200, assessor's map 18–02–02 showing property creation in 1973. The 1973 deed is also in the record.
- Lane County Assessor deed description card for tax lot 100, assessor's map 18–02–10 showing property creation in 1942.
- A final legal lot verification and notice for tax lot 201, assessor's map 18–02–11. (PA 07–5916)

Absent any objective evidence by the Appellant that the above–documentation is incorrect, I must conclude that the Applicant has shown by a preponderance of the evidence that all of the properties relied upon by the Planning Director for the satisfaction of LC 16.211(5)(c)(ii)(aa) and the subject property were lawfully created.

This allegation of error is dismissed.

8. ***The Application does not meet the siting standards of Lane Code 16.211(8).***

In its June 21, 2018 submission, the Appellant raises many questions regarding compliance with the siting standards of LC 16.211(8). Pages 11 through 18 of the Planning Director's decision addresses conformity with these standards. I have reviewed this analysis and find that it is supported by evidence in the record and

based upon this evidence, I believe that the standards of LC 16.211(8)(a)–through(b) were adequately weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site. Where necessary, conditions of approval have been required to ensure compliance with various requirements of LC 16.211(8).

This allegation of error is dismissed.

Summary

The Appellant has raised numerous issues regarding the Planning Director's decision, the most substantial of which is in regard to whether replacement dwellings are consistent with the "*continue to exist*" standard of OAR 660–006–0027(3)(b)(B) and Lane Code 16.211(5)(c)(ii)(bb) and whether, in the present case, the dwelling on tax lot 501 was lawfully replaced. This decision answers both questions in the affirmative.

For the reasons outlined above, I concluded that the Planning Director's decision must be affirmed.

Respectfully Submitted,

Gary Darnielle

shrink-swell potential of the highly plastic clay, low soil strength, and the very slow permeability.

If buildings are constructed on this unit, properly designing foundations and footings and diverting runoff away from buildings help to prevent structural damage as a result of shrinking and swelling. Roads for year-round use need heavy base rock. The seasonal high water table is perched above the dense clay substratum, and drainage should be provided if buildings with basements and crawl spaces are constructed. Plants that tolerate a seasonal high water table and droughtiness should be selected if drainage and irrigation are not provided.

This map unit is not assigned a capability classification.

107C—Philomath silty clay, 3 to 12 percent slopes. This shallow, well drained soil is on foothills adjacent to the Willamette Valley. It formed in colluvium and residuum derived from basic igneous rock. Areas are irregular in shape and are 5 to 75 acres in size. The vegetation in areas not cultivated is mainly Oregon white oak, wild rose, poison-oak, and grasses. Elevation is 350 to 1,400 feet. The average annual precipitation is 40 to 60 inches, the average annual air temperature is 52 to 54 degrees F, and the average frost-free period is 165 to 210 days.

Typically, the surface layer is very dark brown silty clay about 6 inches thick. The subsoil is very dark brown clay about 8 inches thick. Weathered bedrock is at a depth of 14 inches. Depth to bedrock ranges from 12 to 20 inches. In some areas the surface layer is cobbly silty clay.

Included in this unit are small areas of Dixonville and Hazelair soils. Included areas make up about 15 percent of the total acreage.

Permeability of this Philomath soil is slow. Available water capacity is about 2 to 3 inches. Water supplying capacity is 13 to 15 inches. Effective rooting depth is 12 to 20 inches. Runoff is medium, and the hazard of water erosion is moderate.

This unit is used mainly for pasture. It is also used as homesites and for recreation.

This unit is suited to pasture. Erosion control is a major management concern. Fertilizer is needed for optimum growth of grasses and legumes. It should be applied in spring, when there is adequate soil moisture for plant growth. Use of proper stocking rates, pasture rotation, and restricted grazing during wet periods helps to keep the pasture in good condition and to protect the soil from erosion and compaction.

If this unit is used for recreational development, the main limitations are slow permeability, clay content, and depth to rock. Good drainage should be provided for paths and trails.

If this unit is used for homesite development, the main limitations are slow permeability, small stones, and depth to bedrock. The deep cuts needed to provide essentially level building sites can expose bedrock. In most areas the bedrock is rippable; therefore, blasting is not required for excavation of basements. Support and stability for buildings can be provided by placing footings below a depth of 12 to 20 inches. Roads for year-round use need heavy base rock.

This map unit is in capability subclass VIe.

108C—Philomath cobbly silty clay, 3 to 12 percent slopes. This shallow, well drained soil is on foothills adjacent to the Willamette Valley. It formed in colluvium and residuum derived from basic igneous rock. Areas are irregular in shape and are 15 to 30 acres in size. The vegetation in areas not cultivated is mainly Oregon white oak, poison-oak, wild rose, and grasses. Elevation is 350 to 1,400 feet. The average annual precipitation is 40 to 60 inches, the average annual air temperature is 52 to 54 degrees F, and the average frost-free period is 165 to 210 days.

Typically, the surface layer is very dark brown cobbly silty clay about 6 inches thick. The subsoil is very dark brown cobbly silty clay about 8 inches thick. Weathered bedrock is at a depth of 14 inches. Depth to bedrock ranges from 12 to 20 inches. In some areas the surface layer is silty clay.

Included in this unit are small areas of Dixonville, Hazelair, Panther, and Witzel soils. Included areas make up about 15 percent of the total acreage.

Permeability of this Philomath soil is slow. Available water capacity is about 2 to 3 inches. Water supplying capacity is 13 to 15 inches. Effective rooting depth is 12 to 20 inches. Runoff is medium, and the hazard of water erosion is moderate.

This unit is used mainly for pasture. It is also used for recreation and as homesites.

This unit is suited to pasture. Erosion control is a major management concern. Fertilizer is needed for optimum growth of grasses and legumes. It should be applied early in spring, when there is adequate soil moisture for plant growth. Use of proper stocking rates, pasture rotation, and restricted grazing during wet periods helps to keep the pasture in good condition and to protect the soil from erosion and compaction.

If this unit is used for recreational development, the main limitations are the high clay content, slow permeability, and small stones. Use is limited primarily to paths and trails, for which good drainage should be provided.

If this unit is used for homesite development, the main limitations are small stones, shallow depth to bedrock, slow permeability, and shrink-swell potential. Even in areas where sewer systems exist, the unit has low potential for residential development. The deep cuts needed to provide essentially level building sites can expose bedrock. In most locations the bedrock is rippable; therefore, blasting is not required for excavation

001506

rage annual precipitation is 40 to 60 inches, the annual air temperature is 50 to 54 degrees F, average frost-free period is 165 to 210 days. ally, the surface is covered with a mat of leaves, and twigs about 1 inch thick. The layer is dark reddish brown cobbly silty clay loam inches thick. The subsoil is dark reddish brown wish red very cobbly silty clay loam about 25 hick. Highly fractured basalt is at a depth of 32 Depth to bedrock ranges from 20 to 40 inches. ed in this unit are small areas of Jory, Nekia, el soils. Included areas make up about 15 of the total acreage.

eability of this Ritner soil is moderately slow. e water capacity is about 3 to 6 inches. Water g capability is 16 to 23 inches. Effective rooting 20 to 40 inches. Runoff is medium, and the of water erosion is moderate.

reas of this unit are used for timber production e habitat. A few areas are used for pasture, recreation, and homesites.

it is suited to pasture and orchard crops. It is mainly by stoniness and steepness of slope. In irrigation is required for maximum production. Irrigation is a suitable method of applying water. eeds to be applied slowly to minimize runoff and Trees and grasses respond to nitrogen, and respond to phosphorus and lime. Proper g rates, pasture rotation, and restricted grazing eep the pasture in good condition and to protect from erosion.

it is suited to the production of Douglas-fir. On s of a 100-year site curve, the mean site index as-fir is 131. The potential production per acre cubic feet from an even-aged, fully stocked trees 60 years old or 76,770 board feet rnal rule, one-eighth-inch kerf) from an even- stocked stand of trees 80 years old.

methods of harvesting timber generally are but the soil may be compacted if it is moist heavy equipment is used. Because the clayey soil y when wet, most planting and harvesting ment can be used only during dry periods. Roads andings can be protected from erosion by ructing water bars and by seeding cuts and fills.

e preparation is not adequate, competition from rable plants can prevent or retard natural or ial reestablishment of trees. Competing vegetation e controlled by proper site preparation and by ng, cutting, or girdling to eliminate unwanted s, brush, or trees. Reforestation can be lished by planting Douglas-fir seedlings.

s unit is used for recreational development, the mitations are steepness of slope, small stones, ayey soil texture. Use generally is limited to paths ails, which should extend across the slope.

If this unit is used for homesite development, the main limitations are steepness of slope, depth to bedrock, low soil strength, cobbles, and moderately slow permeability. The deep cuts needed to provide essentially level building sites can expose bedrock. Special foundations for dwellings without basements may be needed to overcome the low soil strength.

This map unit is in capability subclass VIs.

113G—Ritner cobbly silty clay loam, 30 to 60 percent slopes. This moderately deep, well drained soil is on side slopes of foothills. It formed in cobbly colluvium derived from basic igneous rock. Areas are irregular in shape and are 5 to 100 acres or more in size. The native vegetation is mainly Douglas-fir, bigleaf maple, Oregon white oak, western brackenfern, hazelnut, poison-oak, and grasses. Elevation is 400 to 1,800 feet. The average annual precipitation is 40 to 60 inches, the average annual air temperature is 50 to 54 degrees F, and the average frost-free period is 165 to 210 days.

Typically, the surface is covered with a mat of needles, leaves, and twigs about 1 inch thick. The surface layer is dark reddish brown cobbly silty clay loam about 7 inches thick. The subsoil is dark reddish brown and yellowish red very cobbly silty clay loam about 25 inches thick. Highly fractured basalt is at a depth of 32 inches. Depth to bedrock ranges from 20 to 40 inches.

Included in this unit are small areas of Nekia and Witzel soils and Rock outcrop. Included areas make up about 15 percent of the total acreage.

Permeability of this Ritner soil is moderately slow. Available water capacity is about 3 to 6 inches. Water supplying capacity is 16 to 23 inches. Effective rooting depth is 20 to 40 inches. Runoff is rapid, and the hazard of water erosion is high.

This unit is used for timber production, watershed, and wildlife habitat.

This unit is suited to the production of Douglas-fir. On the basis of a 100-year site curve, the mean site index for Douglas-fir is 131. The potential production per acre is 7,860 cubic feet from an even-aged, fully stocked stand of trees 60 years old or 76,770 board feet (International rule, one-eighth-inch kerf) from an even-aged, fully stocked stand of trees 80 years old.

Management that minimizes the risk of erosion is essential in harvesting timber. In some areas highlead or other cable logging systems may be necessary to avoid the excessive soil disturbance caused by tractor logging. Roads and landings can be protected from erosion by constructing water bars and by seeding cuts and fills.

The soil in this unit is subject to slumping, especially where road cuts are made in the steeper areas. Slumping can be minimized by locating roads in the more gently sloping areas and by using properly designed road drainage systems.

Because the soil is sticky when wet, most harvesting equipment can be used only during dry periods. After

001507

timber is harvested, the hazard of erosion can be reduced by revegetating the site as quickly as possible. Plant competition delays natural regeneration but does not prevent the eventual development of a fully stocked stand of trees. Reforestation can be accomplished by planting Douglas-fir seedlings.

If this unit is used for homesite development, the main limitations are steepness of slope, depth to bedrock, low soil strength, cobbles, and moderately slow permeability. Roads and streets built on the soil in this unit are subject to slippage because of the steepness of slope.

This map unit is in capability subclass VIIs.

114—Riverwash. This map unit consists of deep, excessively drained to poorly drained islands or sand and gravel bars in and along major streams and rivers. Riverwash consists of recent deposits of sand and gravel derived dominantly from mixed sedimentary and igneous rock. Slope is 0 to 3 percent. Areas generally are elongated in shape and are 2 to 100 acres in size. The native vegetation is mainly occasional bunches of grass and scattered willows. Elevation is 290 to 1,500 feet. The average annual precipitation is 40 to 100 inches, the average annual air temperature is 47 to 52 degrees F, and the average frost-free period is 150 to 210 days.

Typically, Riverwash is highly stratified sand and gravel to a depth of 60 inches or more.

Included in this unit are small areas of Fluvents and Camas soils. Included areas make up about 15 percent of the total acreage.

Permeability of Riverwash is very rapid. Available water capacity and water supplying capacity are very low. Effective rooting depth is 10 to 40 inches. Runoff is slow, and the hazard of water erosion is very high.

Areas of this unit that do not contain an excess amount of fines can be used for roadfill and as a source of sand and gravel.

Riverwash is subject to overflow when the water level of the rivers and streams is high, and it is extremely droughty when the water level is low. During periods of overflow, material is deposited or eroded away.

This map unit is in capability subclass VIIIw.

115H—Rock outcrop-Kilchis complex, 30 to 90 percent slopes. This map unit is on ridgetops and side slopes of uplands in the Cascade Range. Areas are irregular or elongated in shape and are 5 to 200 acres in size. The native vegetation is mainly vine maple, western swordfern, tall Oregon-grape, western brackenfern, and scattered, slow-growing Douglas-fir. Elevation is 500 to 3,500 feet. The average annual precipitation is 60 to 90 inches, the average annual air temperature is 45 to 52 degrees F, and the average frost-free period is 145 to 200 days.

This unit is 65 percent Rock outcrop and 20 percent Kilchis stony loam. The components of this unit are so intricately intermingled that it was not practical to [illegible] them separately at the scale used.

Included in this unit are small areas of Bohan[illegible] Digger, and Klickitat soils and a soil that is simila[illegible] Kilchis soil but is less than 12 inches deep to bed[illegible] Included areas make up as much as 15 percent [illegible] total acreage.

Rock outcrop is mainly exposed areas of barre[illegible] moss-covered rock. In some areas are a few inche[illegible] weathered rock fragments mixed with a high perc[illegible] of organic material consisting of moss, roots, and decaying needles, leaves, twigs, and wood fragm[illegible] The rock dominantly is basalt that generally is har[illegible] enough to quarry or to serve as a source of rock fo[illegible] roadbuilding.

The Kilchis soil is shallow and well drained. It fo[illegible] in colluvium and residuum derived from basalt and breccia. Typically, the surface is covered with a ma[illegible] needles, twigs, and leaves about 1 inch thick. The surface layer is dark brown stony loam about 4 inc[illegible] thick. The next layer is dark reddish brown very co[illegible] loam about 8 inches thick. The subsoil is reddish br[illegible] very stony loam about 7 inches thick. Fractured ba[illegible] at a depth of 19 inches. Depth to bedrock ranges fro[illegible] 12 to 20 inches.

Permeability of the Kilchis soil is moderately rapid. Available water capacity is about 1 inch to 2 inches. Water supplying capacity is 13 to 20 inches. Effective rooting depth is 12 to 20 inches. Runoff is rapid, and hazard of water erosion is high.

This unit is used mainly for wildlife habitat and as [illegible] quarries. It is also used for recreation.

This unit is not suited to the production of merchantable Douglas-fir. The areas that support vegetation are small and scattered, and the trees in these areas are stunted and twisted. Because of the poor quality and quantity of the trees, it is not economically feasible to use the unit for timber production.

If this unit is used for recreational development, the main limitations are slope and the areas of Rock outcrop. The unit is suited to paths and trails, except in rockfall areas. Paths and trails should extend across the slope in some areas.

This map unit is in capability subclass VIIs.

116G—Rock outcrop-Witzel complex, 10 to 70 percent slopes. This map unit is on ridgetops and side slopes of foothills adjacent to the Willamette Valley. Areas are irregular or elongated in shape and are 3 to 80 acres in size. The native vegetation at lower elevations is mainly annual grasses, forbs, poison-oak, Oregon white oak, and scattered Douglas-fir. Grasses, forbs, and shrubs dominate the plant community at the higher elevations; however, Douglas-fir may be more abundant than at lower elevations. Elevation is 400 to 2,000 feet. The average annual precipitation is 40 to 60

Re: PA19-05298, Tax Lot 18-02-11-00-00507

Dear Rachel:

Thank you for providing me with a copy of the appeal of the above referenced Planning Action and the associated comments offered by the Appellant, LandWatch Lane County. I have also received the Staff Report for review by the Hearings Official dated September 19, 2019 and appreciate the detailed analysis given to the application and the elements of the appeal. As you have noted in the 9/19/19 Staff Report, the Appellant's comments seem to focus on three specific objections or assignments of error in the Director's approval of the Special Use Permit. Your summary of the review of those objections is concise and accurate, though I would like to take this opportunity to offer additional comments in response to the specific points made by the Appellant.

Objection No. 1. The Appellant objects to the inclusion of a dwelling located on Tax Lot 18-02-11-00-00601 (herein Tax Lot 601) in the dwelling count of three as established in the template test provided by our company, representing the applicant, NIMPKISH, LLC. This objection has previously been made by LandWatch, most recently in PA 17-05951, a request for a Special Use Permit using the template test for Tax Lot 18-02-11-00-00201. As noted in our application and as discussed in the appeal of PA17-05951, the dwelling located on Tax Lot 601 was originally established in a mobile home placement permit under BP2367-81 and was replaced with a site built structure under provisions of a Verification of Replacement Rights approved under PA98-05159. In PA17-05951 the Appellant (LandWatch) argued that the dwelling located on Tax Lot 601 did not meet the criteria for construction on or before January 1, 1993 and "continues to exist." This allegation requests the inclusion of the dwelling located on Tax Lot 601 be denied in PA17-05951. The allegation of error was dismissed.

The 14 page decision in the appeal of PA17-05951 made by the Lane County Hearings Official on August 8, 2018 is included with this letter as Exhibit A. Attention is directed to page 11 of 16, Section No. 4. In legal parlance, the issue raised by the Appellant in the matter at hand, PA 19-05298, that the dwelling located on

Rachel Serslev
PA 19-05298, Response to LandWatch Appeal
September 20, 2019

Tax Lot 601 cannot be considered in the parcel count of the template test, "has been asked and answered." The dwelling located on Tax Lot 601 was lawfully established in 1981 under BP 2367-81, and was lawfully replaced in 1998 under the Verification of Replacement Rights approved in PA98-05159.

The specific question as to the recognition of the dwelling on Tax Lot 601 is identical to that addressed in PA15-05734 and PA15-05735. In both of the those applications the Hearings Official, affirmed by decision of the Lane County Board of Commissioners (Board Order 16-05-17-06), recognized that a dwelling replaced under provisions of a Verification of Replacement Rights, met the standard of "continues to exist."

The 9/19/19 Staff Report to the Hearings Official makes the same summary as I have noted above.

I must note with interest that our application showed the presence of three dwellings within the template test, but brought to light the potential for a fourth dwelling to be recognized in Tax Lot 18-02-12-00-00303. I am appreciative of your attention to the details of an application such as this and completed the research necessary to confirm that a pre-1/1/93 dwelling did, in fact, exist on Tax Lot 303. I also appreciate the additional research that was completed by the staff in reviewing the dwelling on Tax Lot 18-02-12-00-00302. Of note, we did not claim a dwelling on Tax Lot 18-02-11-00-00600; as you note in the 9/19/19 report, the dwelling on Tax Lot 600 does not qualify as a pre-1/1/93 dwelling. We concur.

While the question of the status of the dwelling on Tax Lot 18-02-11-00-00601 is clearly answered in the previous Hearings Official decision, and in the records of LMD, whether or not this is allowed to be counted in the current application towards the dwelling count of three is irrelevant as the required dwelling count is met even without consideration of this lot.

Objection No. 2. The Appellant argues the subject property, Tax Lot 18-02-11-00-00507, is "within an area designated Major Big Game; the county has incorrectly taken the position that zoning protects big game and was adopted to do just that, without providing evidence of how subverting the 80 acre minimum lot/parcel size in favor of underlying fragments has protected zoning meant to protect Major big game by retaining a density of one dwelling/80 acres."

Again, this question "has been asked and answered." Referring to the decision made by the Lane County Hearings Official on August 8, 2018 in the appeal of PA17-05951, copy attached at Exhibit A, one should review page 10 of 14, Section 3. The Appellant in the application under review, PA19-05298, offers the same argument that has been addressed in the appeal of PA17-05951.

The salient points of the Hearings Official's decision in PA17-05951 are the following:

"...the Flora and Fauna Working Paper of the Rural Comprehensive Plan explains that the Big Game Range density standards were integrated into the zoning classifications and minimum lot size recommendations on a regional basis. The density recommendations were not applicable to existing parcels but were to be considered in rezoning applications. ***Therefore, the approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards." ****

"Lane County's Rural Comprehensive Plan was acknowledged by LCDC in 1984. In regard to compliance with Statewide Planning Goal 5, Lane County did categorize Big Game Habitat as a 1C significant Goal 5 resource. However, as noted above, the county incorporated the protections recommended in the Flora and Fauna Working Paper into the zoning ordinance. Accordingly, residential development was limited in Big Game Habitat areas and further restriction of development was not necessary to comply with Statewide Planning Goal 5."

"The appellant (LandWatch) specifically cites Rural Comprehensive Plan Goal 4 Policy #11 which states '*Encourage the consolidation of forest land ownership in order to form larger more viable forest resource units.*' First, this policy is aspirational and does not provide an objective standard that applies to a quasi-judicial land use permit process. Second the action taken by the County does not have any impact upon parcelization. Rather, the template dwelling process forces an applicant to recognize and work within the existing parcelization pattern within a 160 acre square template."

As noted in the enclosed Exhibit A, the allegation of error was dismissed.

> ***This sentence is directly quoted in the Staff Report of 9/19/19 and is at the essence of the basis of dismissal of this allegation of error in the appeal under consideration.***

I would like to take a moment to digress from the direct response to the LandWatch appeal. My concern at this time is what appears to be the resubmittal of objections that have already been addressed. By anyone's standard our land use planning system is challenging. At the very least we should be working toward consistency in the decision making process. An applicant that seeks to establish the presence of a minimum of three dwellings using the template test needs to be able to rely on previous decisions made by the Land Management Division staff that a dwelling was lawfully placed, such as in a Verification of Replacement Rights. If we are to set a precedent that such an applicant must go back and "revalidate" a previously rendered decision, we are establishing a level of complexity to the process that undermines public confidence in government. The same concern is applicable to the discussion over the Big Game Habitat question and the applicability of Goal 5. The objections being made are spurious at best, but to continue to throw up the same objections after they have been addressed in a previous appeal process is nothing less than an attempt to undermine the land use process.

In no small way I am reminded of raising my three daughters. It was amazing how many ways and how many times they could ask the same question, hoping for a different answer. They are now all approaching middle age and, blessedly, our family unit has survived. I hope for a similar outcome for our land use system.

Objection No. 3. LandWatch opines:

"the subject property is in an area designated by DOGAMI as severe landslide danger; the Goal 7 (Hazards) working paper policies provide:

Each of these proposed policies is intended to fulfill a significant intent of Goal 7.

Policy 1. Establishes that Lane County plans shall be based on an inventory of known areas of natural disaster and hazard it (sic) is also intended to establish that in rural areas, **specific on-site evaluation is invaluable in avoiding or minimizing hazardous conditions.**

Policy 2. Establishes that the types(s) and degree of hazards(s) present must be considered as significant factors in determining compatible types and intensities of development. A primary determinant of compatibility being whether a development may be reasonably safeguarded. The policy further establishes that safeguards must be provided as a provision for approval of proposed developments. **Also the policy establishes the building code as an assumed level of safeguard.**

Policy 3. Given the technological capabilities available in today's society it is probable that any given development could be protected against the worst of natures (sic) hazards; but at what cost to the environment and the public? This policy establishes that an assessment of these costs is a necessary part of the review process."

(My emphasis added)

At this point we are wandering into a blissful discussion of "wouldn't it be nice" rather than the specific elements of county code and state statute, though I will acknowledge that LandWatch has come up with something new to throw against the wall in hopes that it will stick.

Let me note in the Director's Approval of PA 19-05298, on page 5 of 20, Section 14, the staff sets forth:
"The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:
14. The entire subject property, according to DOGAMI, is within a "Very High" landslide susceptibility area and contains landslide deposits. The designations may require a geotech report with submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 for more information."

This informational condition is set forth by Lane County in total compliance with Goal 7. The Staff Report of 9/19/19 makes this point perfectly clear and accurately concludes "The approval criteria for a template dwelling, located at Lane Code 16.211(2)-2.4 do not include RCP Goal 7."

The Appellant concedes **"the building code as an assumed level of safeguard."** The **"on-site evaluation"** is intended to specifically avoid or minimize the risk of **"hazardous conditions"** and is to be considered by the building department in their evaluation of an application for a building permit.

We concur.

The DOGAMI overlay of landslide risk is, by anyone's definition, a very broad stroke of the brush. A copy of the map reflecting the subject property and adjoining lands is included with this letter at Exhibit B. The area shown in the DOGAMI overlay encompasses hundreds of acres as potentially having a landslide risk. As a specific response to the inclusion of the subject property and the adjoining lands in the DOGAMI map as a "Very High" risk of landslide, this overlay extends onto Tax Lot 501 to the east of the subject property, taking in an area that is virtually level. A reasonable person may ask what landslide risk there is on a level tract of land?

What may be more appropriate for consideration is the soils map for the subject property, which was included in the original application at Exhibit 5C. I am including at Exhibit C to this letter a copy of the soils map depicting the subject property showing the northern portion of the parcel being comprised of Soil Type 113G, Ritner cobbly silty clay loam, 30 to 60 percent slopes, and the southern portion of the property being comprised of Soil Type 107C, Philomath cobbly silty clay, 3 to 12 percent slopes.

Also included with this letter at Exhibit D is the summary of Soil Type 113G and Soil Type 107C as presented in the "Soil Survey of Lane County Area, Oregon" as prepared by the United States Soil Conservation Service in their catalogue issued in September of 1987. In the discussion of Soil Type 107C no limitations are offered for homesite development and no risks of soil movement are highlighted. In the discussion of Soil Type 113G the notation is made "The soil in this unit is subject to slumping, especially where road cuts are made in the steeper areas. Slumping can be minimized by locating roads in the more gently sloping areas and by using properly designed road drainage systems." This discussion goes on to state "If this unit is used for homesite development, the main limitations are steepness of slope, depth to bedrock, low soil strength, cobbles, and moderately slow permeability. Roads and streets built on the soil in this unit are subject to slippage because of the steepness of slope."

Referring again to the soils map included at Exhibit C, the proposed dwelling is to be located in the area of Soil Type 107C, the Philomath cobbly silty clay, and no risks of "slumping" are noted by the Soil Conservation Service in their catalogue of 1987. You may wish to refer again to Attachment 1 that was included in the supplement to the original application, dated July 11, 2019. I am enclosing at Exhibit E to this letter a copy of Attachment 1 to the supplemental information previously provided.

In short, the Director's notation that in any building permit submittal the applicant for that permit needs to provide a "geotech report" in evaluation of the proposed building site is appropriate and meets clearly whatever risk may exist in the soils of the subject property. This is a building permit question, not a land use question.

Rachel Serslev
PA 19-05298, Response to LandWatch Appeal
September 20, 2019

Thank you for the opportunity to comment on the issues raised by LandWatch Lane County in their appeal. As all too commonly seems to be the case, these issues are simply without merit and, notably, have been previously addressed.

Sincerely,

Jim Belknap

Jim Belknap

LANE COUNTY HEARINGS OFFICIAL

Staff Report

Department File:	509-PA19-05298
Hearing Date:	September 26, 2019
Report Date:	September 19, 2019
Applicant/Owner:	Nimpkish LLC
Agent:	James E. Belknap
Appellant:	LandWatch Lane County
Assessor's Map & Tax Lot:	18-02-11-00-00507
Size:	10.06 Acres
Base Zone:	Impacted Forest Lands (F-2)
Staff:	Rachel Serslev, Planner

I. PROPOSAL

A Request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(2)-2.4

II. BACKGROUND INFORMATION

The subject property is identified as Assessor's Map and Tax Lot 18-02-11-00-00507. It is located approximately 0.5 of a mile east of the City of Springfield's Urban Growth Boundary and north of Wallace Creek Road, with access off of RR Baker Road, a private road. The property is vacant and does not have an address.

The property is approximately 10.06 acres in size. The property slopes from the north-west corner to the east property boundary, from a mean sea level (MSL) of approximately 1060 feet to 1200 feet MSL determined with Lane County contour data. The County LiDAR data show that slopes range from less than 10% to 40% or more with steep slopes located in the north-west and north-central portion of the subject property. More gentle slopes on the subject property are located in the south-west corner. The property is primarily open pasture with some scattered, low-lying brush and Douglas Fir.

The property is designated Forest in the Lane County Rural Comprehensive Plan, and is zoned Impacted Forest Land (F-2, RCP), consistent with that plan designation. The property abuts F-2 zoned properties on all sides. The surrounding area can generally be characterized as a mix of forest and low-density, rural residential uses. The property does not contain floodplain, a Class 1 stream, or mapped wetlands.

On April 18, 2019, the applicant submitted a request to establish a dwelling in the Impacted Forest Lands (F-2) zone to Lane County Land Management Division. The application materials were reviewed by staff and the application was deemed complete on May 17, 2019.

On May 17, 2019, referral responses were solicited from affected agencies, service providers and surrounding property owners. On June 26, 2019, the applicant provided a 60 day timeline extension in order to address comments received during the referral period. Additional information was provided on July 12, 2019, and the applicant requested the application be taken off hold.

On August 2, 2019, the Director issued a decision approving the proposal. On August 14, 2019, LandWatch Lane County submitted a timely appeal of the Director's decision. The Director reviewed the appeal pursuant to Lane Code 14.080(2)(a) and pursuant to Lane Code 14.080(3)(a)(i), elected not to reconsider, and affirmed the August 2, 2019 decision. An appeal hearing was scheduled for September 26, 2019 and notice of the hearing was mailed on September 6, 2019.

III. SUBSTANCE OF THE APPEAL

The appeal statement is provided as **Attachment 1**. Generally, the appellant asserts that the record does not contain sufficient evidence to demonstrate compliance with approval criteria. The specific appeal issues are discussed below with staff's response to the information provided by the appellant.

1. **The appellant argues that the dwelling on Map and Tax Lot 18-02-11-00-00601 did not exist in 1993 and cannot be used to find compliance with Lane Code 16.211(3)(C).**

   The verification of replacement rights (509-PA98-05159) referenced in the Director's staff report indicates that a mobile home has remained on the property and occupied from 1982 until the present date (9/30/1998). The mobile home placement permit 81-2367 validates the placement of a dwelling in 1982. Specifically, the appellant argues that no dwelling was taxed between 1993 and 1998 according to the Regional Land Information Database (RLID). However, RLID actually shows an improvement value of zero from 1998 to 1999. This time frame aligns with the verification of replacement rights planning action, which secured the replacement rights in 1998 and after which, it is reasonable expect that the subject dwelling was replaced, resulting in an improvement value of zero in 1998 and 1999. Therefore, staff maintains that the dwelling on Map and Tax Lot 18-02-11-00-00601 can be utilized to qualify the subject property for a template dwelling. This is consistent with the Hearings Official's previous interpretations in department file No.'s 509-PA15-05734 and 509-PA17-05951.

   Regardless, staff has evaluated all of the qualifying dwellings proposed by the applicant. In the Director's decision, staff only verified the minimum number of dwellings required to meet the criteria. The applicant provided a list of six dwellings. Below, staff has evaluated all of the dwellings to show compliance with the approval criteria for a template dwelling.

Count	Assessor's Map	Tax Lot	Date of Dwelling on Property
1	18-02-12	201	1910; RLID
2	18-02-11	601	1982/1999; Verification of Replacement Rights 509-PA98-5159

3	18-02-11	100	1958/2001; Verification of Replacement Rights 509-PA01-05596
4	18-02-12	303	1993; Building permit for replacement dwelling 509-BP93-04658
5	18-02-12	302	1993; RLID, Building permit to place mobile home 509-BP93-03712
6	18-02-11	600	1994; Building permit 509-BP94-04080; Planning action for dwelling approval in 1992 and building permit for dwelling in 1994; DOES NOT QUALIFY

2. **The appellant argues that the County has not protected Major Big Game in accordance with the Flora and Fauna Working Paper of the Rural Comprehensive Plan by allowing a density greater than one dwelling per 80 acres.**

   The approval criteria for a template dwelling, located at Lane Code 16.211(2)-2.4, does not include criteria relating to the Flora and Fauna Working Paper or the density requirement of one dwelling per 80 acres. Therefore, the Director's decision did not make findings regarding the working paper. This is consistent with a previous Hearings Official decision (509-PA17-05951, Evans/Betz), which found that the "Big Game Range density standards were integrated into the zoning classification and minimum lot size recommendations on a regional basis. The density recommendations were not applicable to existing parcels but were to be considered in rezoning applications. Therefore, approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards."

3. **The appellant argues that the Director's decision does not address the Rural Comprehensive Plan (RCP) Goal 7 (Areas subject to natural disasters and hazards) working paper policies.**

   The approval criteria for a template dwelling, located at Lane Code 16.211(2)-2.4, do not include RCP Goal 7. Therefore, the Director's decision did not make findings regarding the Goal 7 working paper policies. Given DOGAMI's classification of "Very High" landslide susceptibility, staff did provide the following informational condition of approval:

   > "The entire subject property, according to DOGAMI, is within a "Very High" landslide susceptibility area and contains landslide deposits. These designations may require a geotech report with submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 for more information."

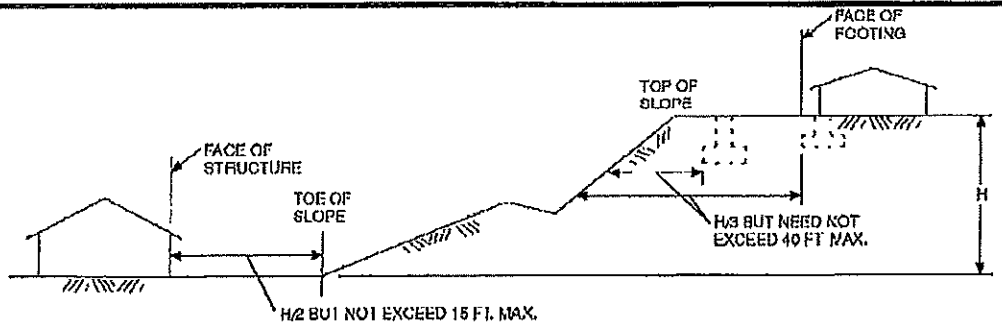
   The Oregon Structural Specialty Code (OSSC) provides the authority to assess the soils and slopes at the building site, and require a geotechnical report if necessary. This assessment is completed when a residential building permit is applied for, during the plan review phase. **Attachment 3** provides guidance regarding when a geotechnical report is required with the submittal of a building permit.

V. SUMMARY

Based upon the analysis above, staff finds that the application for a dwelling in the Impacted Forest Zone meets the 'template test' provisions of Lane Code 16.211(2)-2.4 and other applicable criteria. Therefore, the Director respectfully requests that the Hearings Official affirm the decision to approve file 509-PA19-05298.

VI. ATTACHMENTS

1. Appeal Statement *(6 pgs.)*
2. Director's Decision with Exhibits, including Vicinity Map and Site Plan *(49 pgs.)*
3. Lane County Building Program Geotechnical Report Guidance *(1 pg.)*



The entire file record is available for review at the Land Management Division Office.

NOTICE TO APPLICANT
Residential (1 & 2 Family Dwellings and Accessory Structures)

The Lane County Building Division will be reviewing residential structural permit applications to more closely assess geotechnical hazards. This is important to better protect the homes we build, helping the community to be more resilient to earthquakes.

A geotechnical or soils report (OSSC Section 1803.6) from a qualified design professional licensed in Oregon will be required if the site for the proposed development:

1. Has ascending or descending slopes that do NOT meet the foundation clearance of Section R403.1.9 and Figure R403.1.9.1 of the 2017 Oregon Residential Specialty Code;

oot = 304.8 mm.

FIGURE R403.1.9.1
FOUNDATION CLEARANCE FROM SLOPES

2. *Is within a soils hazard area: site soils are susceptible to liquefaction; or site prone to landslides. Below is an internet link that will connect to the DOGAMI website where one can find information on the specific site conditions:
   www.oregongeology.org/hazvu
   Landslide: High and Very High will require a geotechnical report.
   Liquefaction: Moderate or High will require a geotechnical report
3. *Has a building site with a 20% (2:10 or 11.3 degrees) or greater slope prior to excavation.
4. Or, is required by Lane County Land Use Planning to have a special foundation system.

All site plans submitted will be required to show any known fill sites or landslide hazards areas.

The soil report shall address: soil bearing capacity, liquefaction, soil classification, stability for lateral (seismic) loading, slope stability, and recommendations for excavation, structural fill and foundation design.

*Items 2 & 3 above will not be applicable to residential accessory structures less than 1000 square feet and one story in height.

NOTICE OF APPEAL HEARING

Department File:	**509-PA19-05298**
Owner / Applicant:	Nimpkish LLC
Agent:	Jim Belknap
Appellent:	Landwatch Lane County
Map & Tax Lot:	18-02-11-00-00507
Size:	10.06 acres
Zone:	Impacted Forest Lands (F-2)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

Proposal: Appeal of a request for Director Approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(2)-2.4, (3), (5) and (6).

An appeal for the above-cited application was submitted by the appellant on August 14, 2019 and accepted by the Planning Director on August 16, 2019 pursuant to Lane Code 14.520 and 14.530, and the decision was affirmed by the Planning Director.

You received this notice because you own property located near the property that is the subject of this notice. Per Lane Code 14.300(3), Lane County is required to notify you of the appeal of the above-cited decision so that you have the opportunity to comment and/or participate in the De Novo public hearing for the appeal. Lane County is required only to notify the applicant, owner, owners of record of property of adjacent properties per the most recent property tax assessment roll, and other persons identified by LC 14.060(4)(a). **You may want to share this notice with others in your neighborhood as some may not be aware of the proposal.**

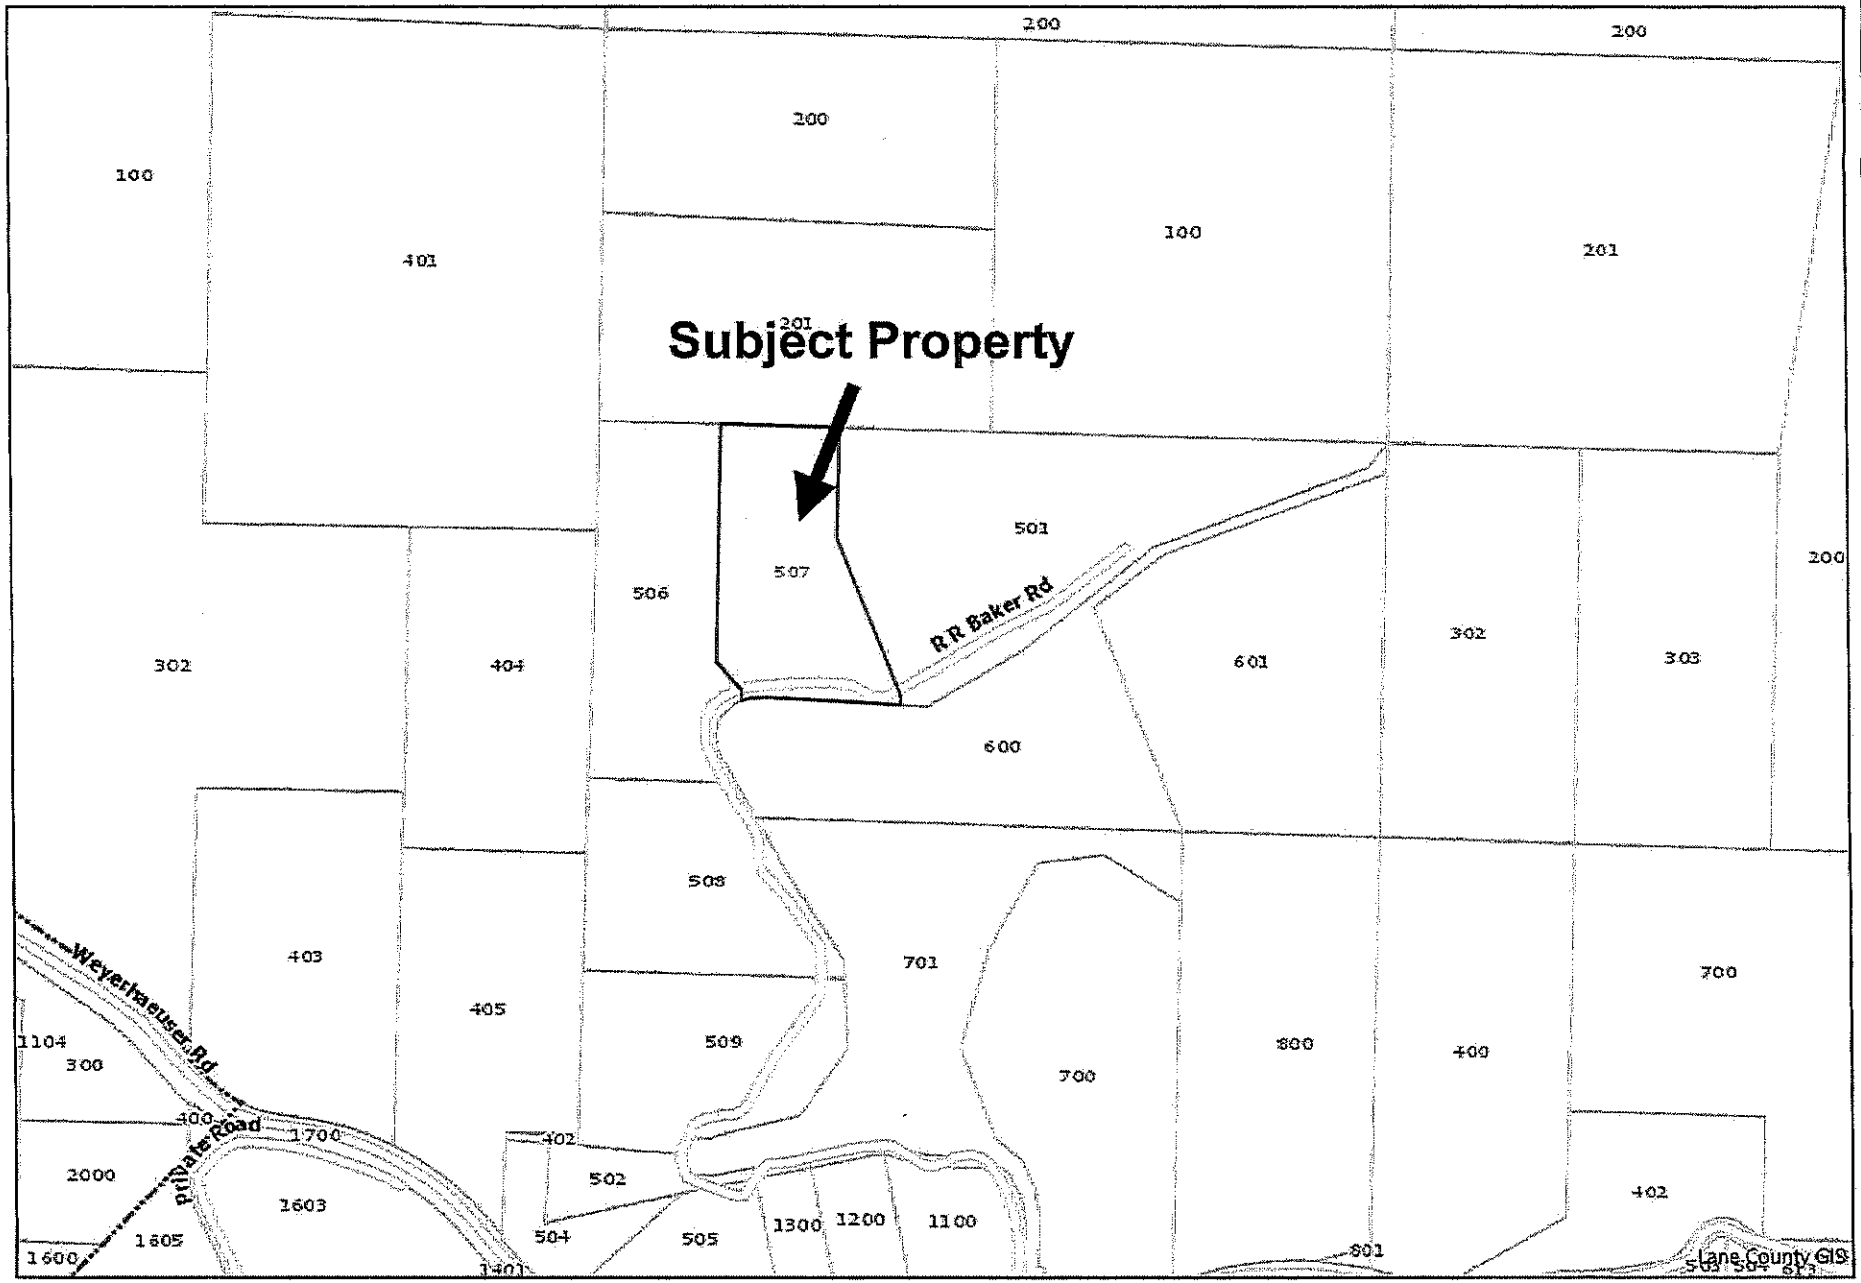
Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be promptly forwarded to the purchaser.

Enclosed is a vicinity map for the subject property.

The Lane County Hearings Official is the Approval Authority who will conduct a De Novo public hearing, pursuant to Lane Code 14.300. **The hearing will be held on Thursday, September 26, 2019, at 9:30 A.M., in the Lane County Customer Service Center, Goodpasture Room, 3050 North Delta Highway, Eugene, Oregon 97408.**

The order of procedure for the conduct of the hearing will generally be as follows:

a. Announcement of the nature and purpose of the hearing
b. Announcement of opportunities for submission of information and appeal.
c. Disclosure of ex parte contacts
d. Report by the Director



e. Applicant's testimony
f. Testimony of persons in favor
g. Testimony of other persons
h. Any additional comments by the Director
i. Applicant rebuttal
j. Conclude the hearing

Failure to raise an issue in a hearing, in person or by writing, or failure to provide statements or evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

The application, all documents and evidence relied upon by the applicant, and the applicable criteria are available for inspection at no cost at the Land Management Division. A copy of the staff report will be available for inspection at no cost at least one week prior to the public hearing. Copies of these materials will be provided at a reasonable cost upon request.

The representative of the Land Management Division to contact regarding this application and hearing is **Rachel Serslev** and the telephone number where more information can be obtained is **541-682-6903**. Please submit written materials to: Lane County Land Management Division, Attn. Rachel Serslev, 3050 North Delta Highway, Eugene, Oregon 97408. Written materials may be submitted prior to, or during the public hearing.

The meeting location is wheelchair-accessible. Persons needing special accommodation (e.g., hearing impaired, language translation, chemical sensitivity needs, and large print copies of the agenda) are instructed to submit their request at least 48 hours prior to the meeting by calling Amber Wolles at 541-682-6917.

The information on this map was derived from digital databases on the Lane County regional geographic information system. Care was taken in the creation of this map, but it is provided "as is". Lane County cannot accept any responsibility for errors, omissions or positional accuracy in the digital data or the underlying records. Current plan designation, zoning, etc., for specific parcels should be confirmed with the appropriate agency. There are no warranties, expressed or implied, accompanying this product. However, notification of any errors will be appreciated.

REQUIRED SUBMITTALS. A notice of appeal must be filed with the Director prior to the end of business (4 pm PST) on the 12th day after the date the notice of decision is mailed.

Please note that your appeal application will be rejected if it does not meet all the requirements of Lane Code 14.080(1) except LC 14.080(1)(c)(vi). Failure to address all appeal requirements, including all information requested by this form, may result in the appeal being rejected.

1. A copy of the decision being appealed, with the department file number: PA 19 05298 and date of the decision 8-2-19
2. The $250 appeal fee, payable to Lane County.
3. The appeal deadline, as stated in the Director's Decision: 8-14-19
4. Address each of the following standards:
   a. State how the appellant is a person who is entitled to written notice under LC 14.060 or a person who is adversely affected or aggrieved by the application:
      ☐ I am a person entitled to receive the Notice of Decision per LC 14.060
      ☑ I am adversely affected or aggrieved by the application because (explain):
      attached

See Page 2, appeal form continued. →

b. State the reason(s) why the Director's decision was made in error or why the Director should reconsider the decision.

c. Provide an explanation with detailed support specifying one or more of the following as assignments of error or reasons for reconsideration (attach a separate letter if necessary):

- ☐ The Director exceeded their jurisdiction;
- ☐ The Director failed to follow the procedure applicable to the matter;
- ☐ The Director rendered a decision that is unconstitutional; or
- ☐ The Director misinterpreted the Lane Code or Lane Manual, state law or federal law, or other applicable standards and criteria.

5. Include any other additional information in support of your appeal.

Eugene, OR 97408

Appeal of Director's Decision (Nimpkish) 509 PA1905298, approving a dwelling in the Impacted Forest Lands (F-2) zone pursuant to the "Template Dwelling" provision in Lane Code Chapter 16.211(2)-2.4.

Justification for Appeal

- It does not appear a dwelling existed on tl# 601 (18021100) in 1993, the operative date; although there is evidence of a 1981 MH being approved in 1982, the assertions made in the 1998 replacement dwelling decision regarding an existing dwelling with intact exterior walls and roof structure, indoor plumbing, interior wiring and a lighting system, no evidence was provided and RLID records indicate no improvement dwelling on the tax rolls between 1993 and 1998
- the subject property is within an area designated Major Big Game; the county has incorrectly taken the position that zoning protects big game and was adopted to do just that, without providing evidence of how subverting the 80 acre minimum lot/parcel size in favor of underlying fragments has protected zoning meant to protect Major big game by retaining a density of one dwelling/80 acres
- the subject property is in an area designated by DOGAMI as severe landslide danger; the Goal 7 (Hazards) working paper policies provide:

  Each of these proposed policies is intended to fulfill a significant intent of Goal 7.

  - Policy 1. Establishes that Lane County plans shall be based on an inventory of known areas of natural disaster and hazard It is also intended to establish that in rural areas, specific on-site evaluation is invaluable in avoiding or minimizing hazardous conditions.
  - Policy 2. Establishes that the type(s) and degree of hazard(s) present must be considered as significant factors in determining compatible types and intensities of

development. A primary determinant of compatibility being whether a development may be reasonably safeguarded. The policy further establishes that safeguards must be provided as a provision for approval of proposed developments. Also the policy establishes the building code as an assumed level of safeguard.

- Policy 3. Given the technological capabilities available in today's society it is probable that any given development could be protected against the worst of natures hazards; but at what cost to the environment and the public? This policy establishes that an assessment of these costs is a necessary part of the review process.

- The hazards working paper implementation provisions include:

    - Implementation: LCDC determined that in addition to plan deficiencies the County's implementing measures were also inadequate. The denial order contains three specific requirements necessary to gain compliance:

    - 1. Amend the Lane Code to require that the initial review of conditional and other special uses consider known natural hazards;
    - 2. Specify the types of "appropriate safeguards" which will be applied to development in known hazards areas

LANDWATCH
LANE COUNTY
Protecting Our Natural Heritage
From the Coast to the Cascades
P.O. Box 5347 • Eugene, OR 97405 • (541) 741-3625 • www.landwatch.net

August 14, 2019

LandWatch Lane County is a 501(c)(3) tax exempt, nonprofit organization dedicated to protecting Lane County's water, soils and air so that our natural areas, farms and forests will remain vital in perpetuity.

LandWatch is committed to protecting Lane County's farms, forests and open space from urban sprawl by promoting responsible and sustainable land use policies.

The over-parcelization and development of productive resource land leads to negative impacts for commercial resource use and protection of Goal 5 resources.

LandWatch is aggrieved by the Directors recent approval of a forest template dwelling in the forest zone because the PD approval fails to consider the severe landslide danger present in the area and on the subject property and misconstrues the existence of a dwelling relied on in the applicants dwelling count.

For these reasons LWLC is an aggrieved party.

NOTICE OF PENDING LAND USE DECISION

BY THE LANE COUNTY PLANNING DIRECTOR

Date:	8-2-19
Department File:	**509-PA19-05298**
Owner / Applicant:	Nimpkish LLC
Agent:	James E. Belknap
Map & Tax Lot:	18-02-11-00-00508 S ½ 50+
Address:	No Site Address
Size:	10.06 acres
Base Zone:	Impacted Forest Land (F-2)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information, and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: A Request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(2)-2.4

Enclosed is a vicinity map and site plan showing the proposed location of the template dwelling.

The proposed use that could be authorized by approval of the land use application is: One single family dwelling on the subject property.

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report are available for inspection at the Lane County Land Management Division at no cost, and copies will be provided at reasonable cost. You can contact the Lane County Land Management Division representative **Rachel Serslev** at **(541) 682-6903** or **rachel-serslev@co.lane.or.us** to obtain more information about this notice.

This decision will become final at 4:00 PM on 8-14-19 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the County LMD. **This application form is enclosed and must be used if you wish to appeal this decision. To complete this form and appeal the decision:**

1. Fill in the required information and attach it along with the appeal fee, materials, and information required on the appeal form.

2. Submit the completed appeal to the Planning Director so that the Planning Director receives it prior to the date and time that the decision becomes final (see above deadline). The Planning Director will reject an appeal if it: (a) is not received prior to the date and time that the decision becomes final or (b) is incomplete.

3. To be accepted, appeals must satisfy all the requirements of Lane Code 14.080(1). A Type II decision issued by the Director for which a hearing has not been held may be appealed by a person who is entitled to written notice or any person who is adversely affected or aggrieved by the application.

Failure to raise an issue in a hearing—in person or in writing—or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

EXHIBIT A

CONDITIONS OF APPROVAL

509-PA19-05298

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of **509-PA18-05298** is valid for a **four-year** period from the date of final approval unless an extension is granted in accordance with Lane Code Chapter 14 provisions.

   An extension may be granted if:

   a. An applicant makes a written request with the required fee and the request complies with LC 14.090(6) and (7);

   b. The request is submitted prior to the expiration of the approval period; and

   c. The request is submitted not sooner than six months before the expiration date.

Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision.

The following conditions shall be met prior to the expiration date in condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease:

2. Complete, have notarized, and record the enclosed *Farm and Forest Management Agreement* (**Exhibit G**) with an attached "Exhibit A" depicting the legal description of the property, which must be recorded together with the Agreement at the Lane County Deeds and Records office.

3. Submit a stocking survey report for the subject parcel prepared by a qualified forester to the Lane County Assessor. The applicant shall provide a copy of the stocking survey to Land Management Division with evidence of receipt from Lane County Assessment and Taxation.

4. Improve the access road and construct the driveway to the minimum standards of Lane Code 16.211(6)(b), as was found feasible by staff in **Findings 17 through 24**, and the applicable standards of Lane Code Chapter 15. Oregon Registered Professional Engineer or fire district certifications must be provided for any driveway culverts, bridges, or grades exceeding eight percent.

5. Submit written verification from Pleasant Hill Rural Fire Protection District, or written certification from an Oregon Registered Professional Engineer, stating that the route of access for firefighting equipment from the fire station to the building site, across public roads, bridges, private roads, private access easements, and driveways comply with meet the construction standards Lane Code 16.211(6)(b) and fire district standards.

6. Physically establish the primary and secondary fuel breaks in compliance with Lane Code 16.211(6)(c) and as depicted on the applicant's site plan. **These fuel breaks shall be maintained in perpetuity.** The minimum primary safety zone surrounding the proposed dwelling shall be at least 30 feet plus the Additional Safety Zone Down Slope, as applicable. The minimum secondary fuel breaks surrounding the primary safety zone shall be at least 100 feet on lands owned or controlled by the owner.

7. The dwelling must be located at least 30 feet away from any ravine, ridge or slope greater than 40 percent.

8. Provide evidence to the Planning Director that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule (OAR Chapter 629). This can be satisfied by providing a copy of the Well Log for the property. The well must comply with the groundwater appropriation standards of ORS 537.545(1)(d) and have a sustained yield of five gallons per minute for a duration of not less than five hours of continuous pumping as required by Lane Manual 9.160.

9. Upon completion of **conditions #2 through #8**, the applicant shall complete and submit a Land Use Application form to Verify Compliance with Conditions of Approval, with the required processing fee. **Attach to this form a copy of:**

   - Signed, notarized, and recorded *Farm Use and Forest Management Agreement* and description of property, along with all required exhibits;
   - Forest stocking survey with evidence of receipt from the County Assessor;
   - A copy of a water use permit, well log or well constructor's report;
   - Verification letter from Pleasant Hill Rural Fire Protection District, or written certification from an Oregon Registered Professional Engineer, regarding adequacy of access route; and
   - Approved Site Development Plan, or a plot plan that conforms with the approved plans, drawn to scale, including the same information, and meeting other minimum standards of the Land Management Division. These final plans shall include the primary and secondary fuel breaks surrounding the proposed dwelling as required by Lane Code 16.211(6)(c) and this approval.

10. As part of the Verification of Conditions process, the access road, driveway and fuel breaks must be field inspected by Planning Office staff to verify that requirements stated in **conditions #4 and #6** have been met. Failure to meet minimum fuel break and/or driveway and/or grade standards as in LC 16.211(6)(b) and (c) upon first inspection may require an additional application for fuel break and road inspection, with the applicable fee, at the discretion of the Planning Director.

11. Upon completion of Verification of Conditions, submit a building permit to verify that the construction of the dwelling meets current Oregon Structural Specialty Code application for the proposed dwelling, with the appropriate deposit fee. Contact the Building Program at 541-682-4651 and the On-Site Wastewater Program at 541-682-3754 with questions regarding building and sanitation requirements.

12. In the building or placement permit application submittal, the applicant shall submit a site plan demonstrating that the parcel configuration, and the proposed dwelling, driveway, and septic system, are located consistent with the approved site development plan, unless modification is authorized by

the Planning Director. Modification to the approved site plan may require an application for Modification of Conditions with the required processing fee, at the discretion of the Planning Director.

The following condition shall be met prior to approval for legal occupancy of the proposed dwelling.

13. The proposed dwelling shall meet the following requirements, to be verified by the Lane County Building Official:

a. All buildings or structures with chimneys shall have a spark arrester on all chimneys.

b. Wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs.

Please contact a Lane County plans examiner at 541-682-4651 with questions about building code requirements.

The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:

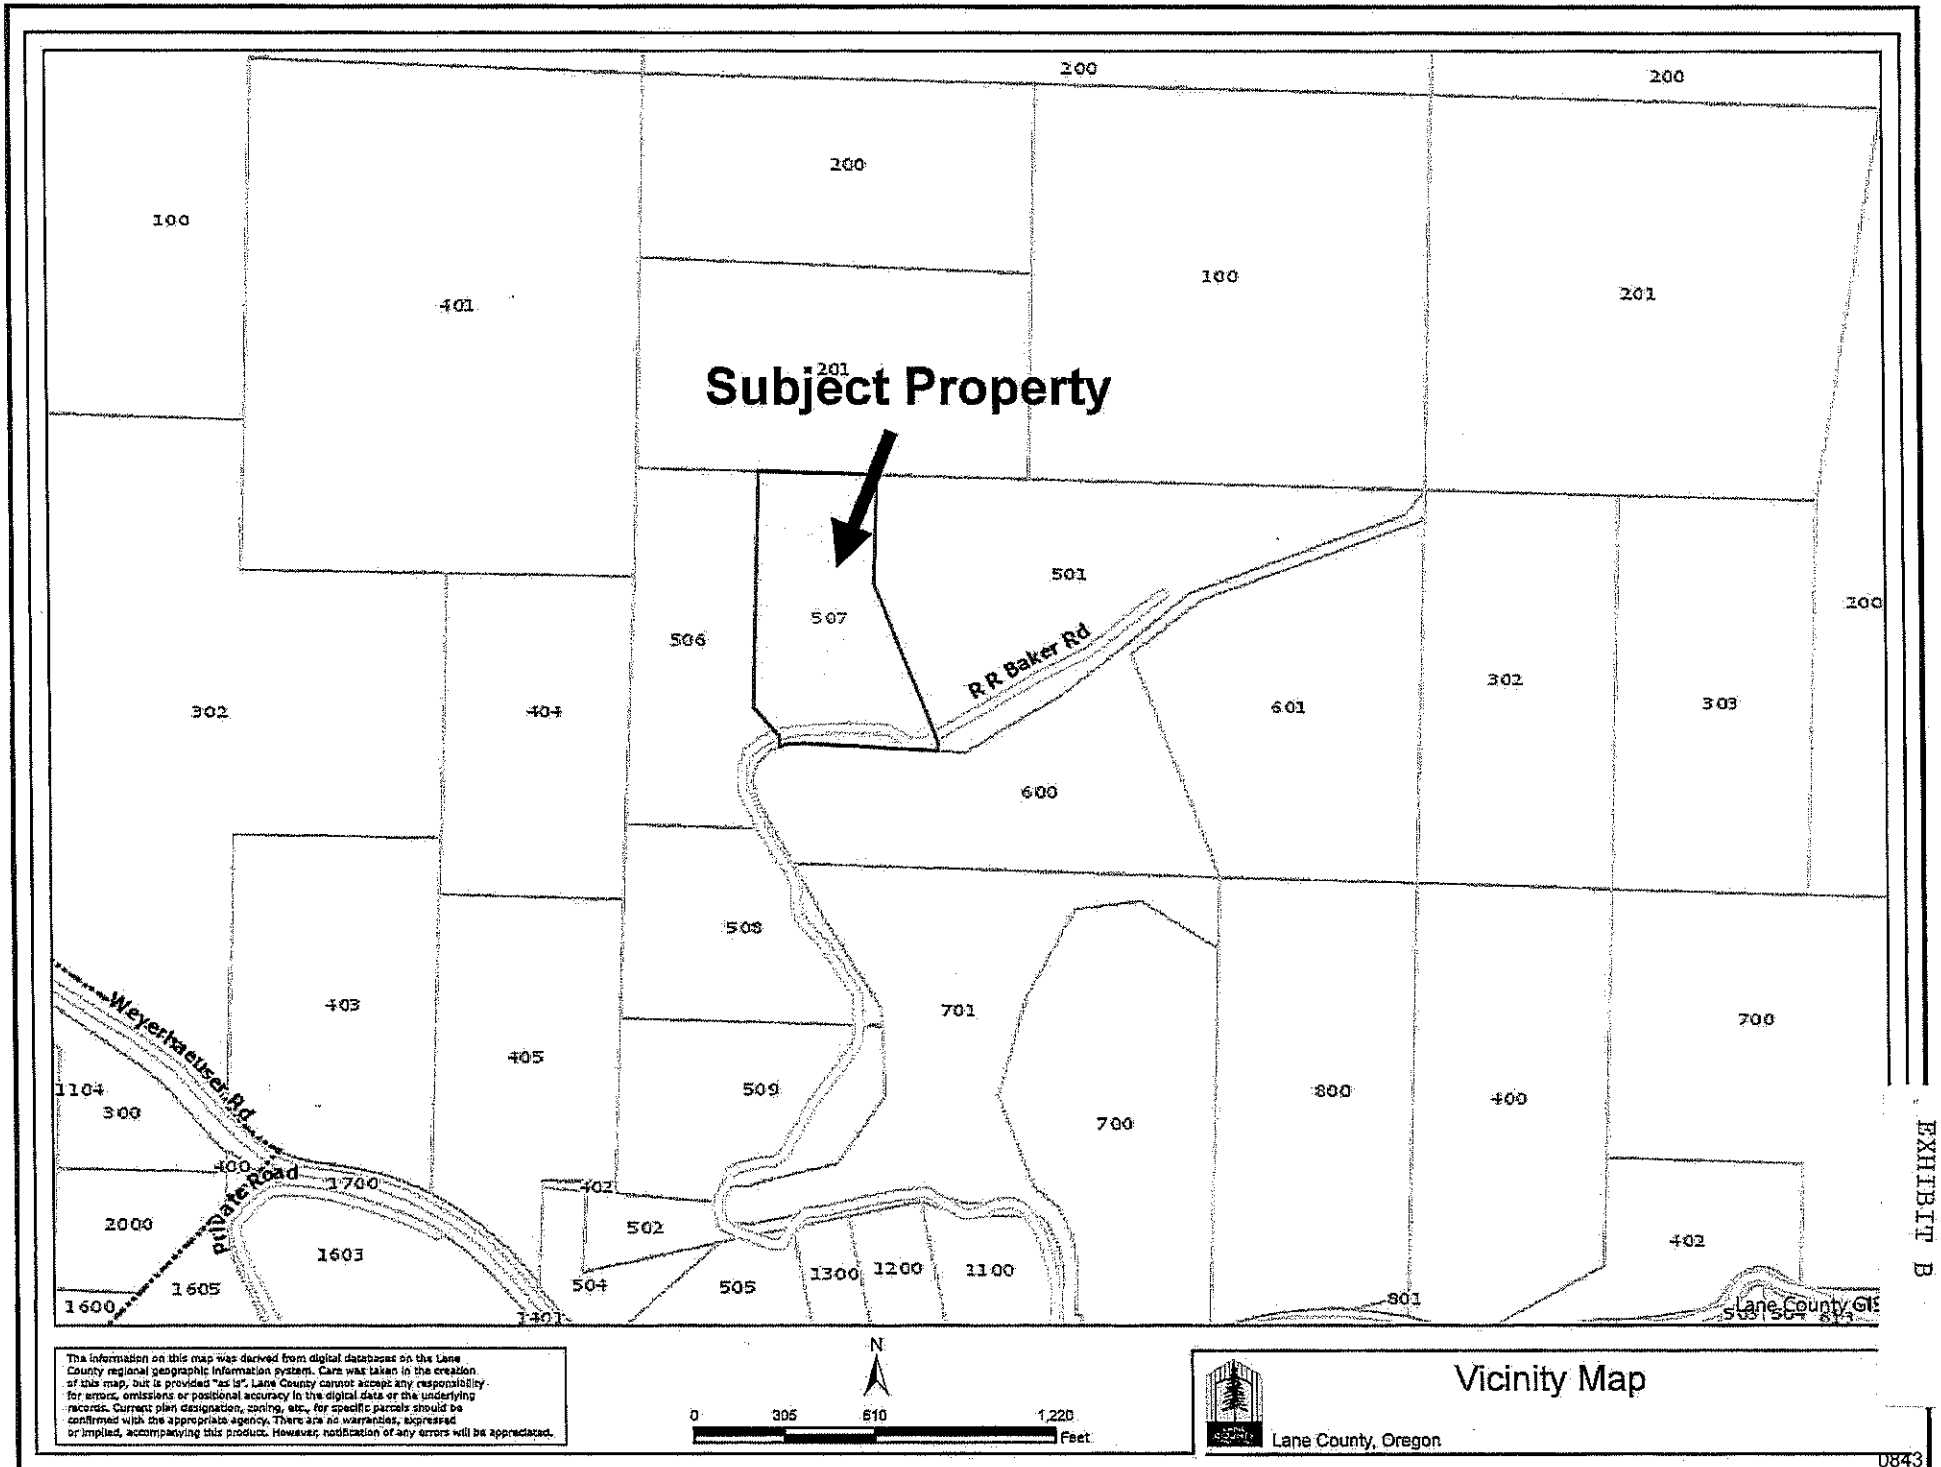
14. The entire subject property, according to DOGAMI, is within a "Very High" landslide susceptibility area and contains landslide deposits. These designations may require a geotech report with submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 for more information.

15. Excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and erosion control. The character of soils for fills and the characteristics of parcels or lots made usable by means of fill shall be suitable for the intended purpose.

16. The applicant is responsible for complying with any applicable local, state, and federal laws.

17. In accordance with Lane Manual 15.515, stormwater runoff from private property must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches. Ditches adjacent to County roads are designed solely to accommodate stormwater runoff generated by roadways themselves.

18. The approval is valid for four years as stated in condition one. An extension, if sought and granted in compliance with Lane Code Chapter 14, is limited to a single 2 year extension unless State law or Lane Code amendments allow otherwise.



19. The owner shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules. It is the owner's responsibility to document that the required tree planting was done in conformance with the criteria of Lane Code 16.211(5)(d). If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372. Information regarding Department of Forestry stocking requirements can be obtained through

the Department of Forestry at (541) 935-2283 (in western Lane County); (541) 726-2501 (in eastern Lane County); or online at: http://www.oregon.gov/ODF/privateforests/fpaReforestation.shtml.

20. The following is provided for informational purposes as an **Advisory Notice**: Section 93.040(1) of the Oregon Revised Statutes requires the following statement to be included in the body of any instrument transferring or contracting to transfer fee title to real property:

> "THIS INSTRUMENT WILL NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY APPROVED USES AND TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES AS DEFINED IN ORS 30.930."

This Oregon Law disclosure requirement serves a constructive purpose. Approval of a residence for this property is contingent upon compliance with the conditions of the special use permit, and any future owners of the subject property need to understand and adhere to these conditions. This disclosure statement should alert the cautious and potential purchaser to inquire with the Lane County Land Management Division about the conditions of this special use permit.

The information on this map was derived from digital databases on the Lane County regional geographic information system. Care was taken in the creation of this map, but is provided "as is". Lane County cannot accept any responsibility for errors, omissions or positional accuracy in the digital data or the underlying records. Current plan designation, zoning, etc., for specific parcels should be confirmed with the appropriate agency. There are no warranties, expressed or implied, accompanying this product. However, notification of any errors will be appreciated.

STAFF REPORT

509-PA19-05298

Department File:	**509-PA19-05298**
Owner / Applicant:	Nimpkish LLC
Agent:	James E. Belknap
Map & Tax Lot:	18-02-11-00-00507
Address:	No Site Address
Size:	10.06 acres
Base Zone:	Impacted Forest Land (F-2)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)
Staff:	Rachel Serslev, Planner

I. PROPOSAL

A request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(2)-2.4.

II. BACKGROUND INFORMATION

On April 18, 2019, the applicant submitted a request to establish a dwelling in the Impacted Forest Lands (F-2) zone to Lane County Land Management Division. The application materials were reviewed by staff and the application was deemed complete on May 17, 2019.

On May 17, 2019, referral responses were solicited from affected agencies, service providers and surrounding property owners. Copies of all written comments are included in the application file for this proposal and are incorporated in the findings and decision below in the context of the approval criteria, as applicable. On June 26, 2019, the applicant provided a 60 day timeline extension in order to address comments received during the referral period. Additional information was provided on July 12, 2019, and the applicant requested the application be taken off hold.

III. PROPERTY DESCRIPTION

A. **LOCATION:** The subject property is identified as Assessor's Map and Tax Lot 18-02-11-00-00507. It is located approximately 0.5 of a mile east of the City of Springfield's Urban Growth Boundary and north of Wallace Creek Road, with access off of RR Baker Road, a private road. The property is vacant and does not have an address.

B. **PROPERTY DESCRIPTION AND SURROUNDING USES:** The property is approximately 10.06 acres in size. The property slopes from the north-west corner to the east property boundary, from a mean sea level (MSL) of approximately 1060 feet to 1200 feet MSL determined with Lane County contour data. The County LiDAR data show that slopes range from less than 10% to 40% or more with steep slopes located in the north-west and north-central portion of the subject property. More gentle slopes on the subject property are located in the south-west corner. The property is primarily open pasture with some scattered, low-lying brush and Douglas Fir.

The property is designated Forest in the Lane County Rural Comprehensive Plan, and is zoned Impacted Forest Land (F-2, RCP), consistent with that plan designation. The property abuts F-2 zoned properties on all sides. The surrounding area can generally be characterized as a mix of forest and low-density, rural residential uses. The property does not contain floodplain, a Class 1 stream, or mapped wetlands.

IV. APPLICABLE CRITERIA AND FINDINGS OF FACT

This application is evaluated pursuant to the applicable criteria found in Lane Code 16.211(3), (5) and (6) and other standards as applicable. The code language is in **boldface** type, followed by the findings of fact.

(3) Use Standards

(C) A single family "template" dwelling authorized on a lot or parcel located within a forest zone pursuant to the following:

(i) If the lot or parcel is predominantly composed of soils that are:

(aa) Capable of producing zero to 49 cubic feet per acre per year of wood fiber if:

(A) All or part of at least three other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(bb) Capable of producing 50 to 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least seven other lots of parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(cc) Capable of producing more than 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least 11 other lots of parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

Finding 1. The applicant documents the presence of at least 11 other lots or parcels and five dwellings that existed on January 1, 1993, within a 160-acre acre rectangle that meets Lane Code 16.211(3)(c)(iv) centered on the subject tract. The applicant provides soils data showing that the property is composed of two soil types, 107C Philomath silty clay and 113G Ritner cobbly clay loam, which have forestland capability

of an estimated 45 and 149 cubic feet per acre per year, respectively. Soil type 107C composes approximately 53% of the subject property. Staff has confirmed this using the Lane County GIS measuring tools and soils data. Therefore, the subject property must meet the standards of Lane Code 16.211(3)(c)(i)(aa). The subject property is a lawfully created unit of land in its current configuration resulting from a property line adjustment approved with department file No. 509-PA18-05833.

Based on staff's review of the current property description cards, other documentation submitted by the applicant, and available County records, staff finds that seven of the 11 parcels identified by the applicant appear to have been lawfully created prior to January 1, 1993, and are partially within the 160-acre template area as required. The seven parcels, lots, and units of land that are found to be within the template are described in in **Figure 1** below.

FIGURE 1: LOTS, PARCELS AND UNITS OF LAND WITHIN TEMPLATE AREA

Count (*dwelling)	Assessor's Map	Tax Lot	Date of Creation	Documentation / Deed / ILV / Partition
1	18-02-11	600	1982	Parcel 1 of M43-81

6*	18-02-11	100	1953	460/235
7	18-02-10	100	1941	222/81

*Verification of the status of the parcels referenced above is preliminary and does **not** constitute a determination of legal lot status.*

The applicant's materials demonstrate that three of the 11 properties within the template area contain existing dwellings that have existed since January 1, 1993. Staff verified the three dwellings on lots or parcels identified as within the template area. The properties with these dwellings are denoted with an asterisk in **Figure 1** and the dwellings are described in **Figure 2** below. Staff verified that dwellings identified in **Figure 2** have existed since January 1, 1993 and continue to exist, based on the reports from Regional Land Information Database (RLID) and aerial photography.

Staff finds the proposal meets the criteria that all or part of at least three other lots of parcels that existed on January 1, 1993, are within a 160-acre template centered on the center of the subject tract; and at least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

FIGURE 2: QUALIFYING DWELLINGS WITHIN TEMPLATE DWELLING

Count	Assessor's Map	Tax Lot	Date of Dwelling on Property
1	18-02-12	201	1910; RLID
2	18-02-11	601	1982/1999; Verification of Replacement Rights 509-PA98-5159
3	18-02-11	100	1958/2001; Verification of Replacement Rights 509-PA01-05596

(ii) Lots or parcels within urban growth boundaries cannot be used to satisfy the eligibility requirements of subsection (i) above;

Finding 2. Lots or parcels identified in **Table 1** above are not located within urban growth boundaries. Therefore, staff find this criterion met.

(iii) A dwelling, as used in subsection (i) above, is considered to be in the 160-acre template if any part of the parcel is in the 160-acre template;

Finding 3. **Table 2** lists dwellings on lots or parcels within the 160-acre template area. These dwellings are considered in the template area because they are located on lots or parcels identified in **Table 1**. The lots or parcels that contain qualifying dwellings have asterisks next to the count number in **Table 1**, and these lots or parcels are also listed in **Table 2**. Therefore, staff find this criterion met.

(iv) Except as provided by subsection (v) below, if the subject tract abuts a road that existed on January 1, 1993, the measurement required in (i) above may be made by creating a 160 acre rectangle that is one mile long and ¼ mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

Finding 4. The applicant has correctly centered the 160 acre rectangle that is one mile long and a quarter mile wide on the subject property. The abutting road is RR Baker Road, which is described on a 1982 survey, indicating that the road existed prior to January 1, 1993. The template appears to be aligned with the RR Baker Road to the maximum extent possible. Therefore, staff find this criterion met.

(v) The following applies where a tract 60 acres or larger abuts a road or perennial stream:

(aa) The measurement must be made in accordance with paragraph (iv). However, one of the three required dwellings must be on the same side of the road or stream as the tract, and:

(A) Be located within a 160-acre rectangle that is one mile long and one-quarter mile wide centered on the center of the subject tract and that is, to the maximum extent possible aligned with the road or stream; or

(B) Be within one-quarter mile from the edge of the subject tract but not outside the length of the 160 acre rectangle, and on the same side of the road or stream as the tract;

(bb) If a road crosses the tract on which the dwelling will be located, at least one of the three required dwellings must be on the same side of the road as the proposed dwelling;

Finding 5. The subject tract is 10.06 acres in size. Therefore, the above criterion is not applicable.

(vi) A proposed "template" dwelling under this section is not allowed:

(aa) Unless no dwellings are allowed on other lots of parcels that make up the tract and deed restrictions established under paragraph (3)(a)(iii) for the other lots or parcels that make up the tract are met; or

(bb) If the tract on which the dwelling will be sited includes a dwelling;

(vii) Where other lots or parcels that make up a tract in Subsection (vi):

(aa) The applicant must provide evidence that the covenants, conditions, and restriction from adopted as: "Exhibit A" in OAR chapter 660, division 6 has been recorded with the county clerk of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(bb) The covenants, conditions, and restrictions are irrevocable, unless a statement of release is signed by an authorized representative of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(viii) The Director shall maintain a copy of the covenants, conditions, and restrictions filed in the county deed records pursuant to this sections and a map or other record depicting tracts do not qualify for the siting of a dwelling under the covenants, conditions, and restrictions filed in the county deed records pursuant to this section. The map or other record required by this subsection shall be readily available to the public in the county planning office.

Finding 6. No parcels meeting the definition of "contiguous" in LC 16.090 and under the same ownership abut the subject property. The property is owned by Nimpkish LLC. All adjacent properties are under different ownership. Therefore, the vacant subject vacant property is not part of a tract developed with a dwelling. Staff find the criteria met.

(Q) For single-family dwellings, the landowner must sign and record in the deed records for the County a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

Finding 7. As a condition of approval, the applicant is required to submit proof of a Farm and Forest Management Practices Agreement (**Exhibit G**) recorded in the Lane County Deeds and Records office. This requirement must be satisfied prior to the issuance of a building permit for a single family dwelling or a placement permit for a manufactured home.

(5) Siting Standards for Uses, Activities, and Structures

The following siting criteria apply to all new uses, activities, and structures allowed by LC 16.211. These criteria are designed to make such uses compatible with forest operations, to minimize wildfire hazards and risks and to conserve values found on forest lands. The Director must consider the criteria in this section together with the requirements of Section (6) to identify the building site.

(a) Residences, dwellings, and structures must be sited as follows:

(i) Near dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet from any ravine, ridge or slope greater than 40 percent (40%);

Finding 8. The properties surrounding the subject property to the north and west do not contain any dwellings; although some of those properties have conditional approval for dwellings. Tax Lot 501, to the east of the subject property, and Tax Lot 600, across RR Baker Road to the south, contain the nearest existing dwellings. These dwellings are approximately 460 and 880 feet from the proposed home site.

The nearest public road is Wallace Creek Road, located to the south of the subject property. The subject property is proposed to take access from RR Baker Road, a private road adjacent to the subject property. The proposed homesite is approximately 140 feet from RR Baker Road. Further, the homesite will be accessed by an existing spur road that will be improved to act as the dwelling's driveway. Given this information, staff find that the proposed home site is as near to existing roads as possible.

The applicant provided a contour map for the entire property, as well as a site plan showing the contours of the property at and surrounding the homesite location (**Exhibit E**). Both maps were produced and stamped by a professional land surveyor. Based on this information, staff find that the proposed home site is the most level part of the subject property, consistent with the applicant's statement. Further, it appears the homesite is located at least 30 feet from a ravine ridge or slope greater than 40%. To ensure compliance, this has been made a condition of approval.

The applicant attests that the proposed location of the homesite contains the poorest soils on the subject property. The applicant indicates that the subject property is composed of 107C Philomath silty clay and 113G Ritner cobbly clay loam soils, which have forestland capability of an estimated 45 and 149 cubic feet per acre per year, respectively. The proposed homesite is located on the Philomath soil, which is the soil type with a lower capability as compared to other soils on the subject property. Therefore, the homesite is on the least suitable portion of the tract for forest use.

Per the above discussion, staff find that the proposed dwelling site substantially conforms to the criteria described above, as conditioned, and when balancing with other siting criteria in Lane Code 16.211(8)(a) through (b).

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses;

Finding 9. The subject property is largely clear of timber and is open pasture with low vegetation. The homesite is located in an area already clear of timber and developed with a roadway that will be improved to meet driveway standards. Therefore, staff find the proposal does not intrude into forest areas undeveloped by non-forest uses.

(iii) Where possible, when considering LC 16.211(5)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining line of property zoned F-2 or EFU; and

Finding 10. The subject property is surrounded by other Impacted Forest Land (F-2) zoned property. Per the applicant's site plan, the proposed homesite is located at least 100 feet from adjoining lines of property also zoned F-2. Therefore, staff find this criterion met.

(iv) The amount of forest lands used to site access roads, service corridors, and structure must be minimized.

Finding 11. The applicant's site plan demonstrates that the proposed homesite is approximately 189 feet away from RR Baker Road, an existing private road. The homesite is also proposed near an existing spur road previously used for logging that will be upgraded to the dwelling's driveway. The home site is located as near to the existing roadway as possible when considering the fuel break requirements of LC 16.211(6)(c). Therefore, staff find that the proposed homesite location minimizes the amount of forest land proposed to be used for roads and structures. Staff find this criterion met.

(b) Setbacks. Structures other than a fence or sign cannot be located closer than:

(i) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(ii) 30 feet from all property lines other than those described in Section (5)(b)(i).

(iii) The minimum distance necessary to comply Sections (5)(a) and (6).

(iv) Riparian Setback Area. A riparian setback area applies to the area between a line that is 100 feet from an parallel to the ordinary high water of a Class I stream designated in the Rural Comprehensive Plan. No structure other than a fence may be located closer than 100 feet from the ordinary high water of a Class I stream unless a riparian modification application is approved in accordance with LC 16.253(3). Vegetation maintenance, removal, and replacement standards and exceptions to these setbacks are found in LC 16.253.

Finding 12. The proposed dwelling site is at least 100 feet from all surrounding property lines in order to comply with LC 16.211(5)(a) and (b), and to accommodate the necessary fire breaks required in LC 16.211(6). There are no Class I streams on the property; therefore, the riparian setback area does not apply to the subject property. Based on this information, staff find that this criteria is met.

(c) Domestic Water Supplies. For new dwellings and non-farm structures on vacant land, evidence must be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources located entirely on the property, then the applicant must provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(5)(c) above, evidence of domestic water supply means:

(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or

(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant must submit the well constructor's report to the Director upon completion of the well.

Finding 13. The applicant proposes establishing a private well on the property to provide the dwelling with domestic water supply. Given the residential uses on properties surrounding the subject property, staff find it feasible that a domestic water supply can be established and that the above criteria can be met. Per a recent Hearings Official decision (department file No. 509-PA18-05804), the proposed well must comply with ORS 537.545(1)(d) and Lane Manual 9.160. The above standards have been made a condition of approval and the applicant must supply evidence that domestic water supply is from an authorized source as described above. Therefore, staff find these standards conditionally met.

(d) As a condition of approval, if road access to the dwelling is by a road owned and maintained by a private party or by the Oregon Department of Forestry, the U.S. Bureau of Land Management, or the U.S. Forest Service, then the applicant must provide proof of a long-term road access use permit or agreement. The road use permit may require the applicant to agree to accept responsibility for road maintenance.

Finding 14. The property is proposed to be accessed by a private road, RR Baker Road, and a private driveway located fully on the subject property. The applicant provides a copy of an (recorded 3/21/2019 with recording number 2019-010337) easement and road maintenance agreement that allows for the subject property's use of RR Baker Road for access (Exhibit 4 of the application materials). Therefore, staff find this criterion is met.

(e) Approval of a dwelling is subject to the following requirements:

(i) Approval of a dwelling requires the owner of the tract to plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in department of Forestry administrative rules.

(ii) The Director must notify the County Assessor of the above condition at the time the dwelling is approved.

(iii) Stocking survey report:

(aa) If the lot or parcel is more than ten acres, the property owner must submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(bb) Upon notification by the Assessor, the Department of Forestry will determine whether the tract meets minimum stocking requirement of the Forest Practices Act. If the Department of Forestry determines that the tract does not meet those requirements, that department will notify the owner and the Assessor that the land is not being managed as forest land. The Assessor will then remove the forest land designation pursuant to ORS 321.359 and impose the additional tax.

Finding 15. The subject property is more than 10 acres in size and must submit a stocking survey report to the County Assessor to verify minimum stocking requirements. The owner must plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules. These

requirements have been made conditions of approval and the property owner must submit a stocking survey report to the County Assessor and provide a receipt from Lane County Assessment and Taxation.

(f) Signs.

(i) Signs cannot extend over a public right-of-way or project beyond the property line;

(ii) Signs cannot be illuminated, flashing, blinking, contain scrolling images, or capable of movement; and

(iii) Signs are to be limited to 200 square feet in area.

Finding 16. No signs are requested as part of this application. These criteria are not applicable.

(6) Fire-siting standards for Dwelling and Structures

The following fire-siting standards or their equivalent apply to new residences, dwellings, manufactured dwellings, or structures allowed in Lane Code 16.211:

(a) The dwelling must be located upon a parcel within a fire protection district or must be provided with residential fire protection by contract. If the dwelling is not within a fire protection district, the applicant must provide evidence that the applicant has asked to be included within the nearest such district. If the Director determines that inclusion within a fire protection district or contracting for residential fire protection is impracticable, the dwelling must comply with the following fire safety plan requirements:

Finding 17. The subject property is located within the boundaries of the Pleasant Hill Rural Fire Protection District. The applicant provides a letter (d. 5/14/2019) from the Fire Protection District that confirms service to the RR Baker Road area. Specifically, the review pertains to Map 18-02-11 Tax Lots 501 and 506, which were the tax lot numbers associated with the land that is now Tax Lot 507, the subject property. Therefore, a fire safety plan is not required, and staff find that the above criterion is met.

(b) Fire Safety Design Standards for Roads and Driveways

(i) Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for firefighting equipment, from the fire station to the destination point, across public roads, bridges, private road or private access easements and driveways must comply with the standards specified below. Evidence of compliance with the standards specified below. Evidence of compliance with the standards specified in (6)(b) should include objective information about the firefighting equipment, the physical nature of the access route, the nature of any proposed improvements to access route, and it may also include a written certification of compliance from an Oregon registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

Finding 18. The letter in the record from the Pleasant Hill Rural Fire Protection District confirms that the subject property will be serviced by the District and a list of the firefighting equipment that the District has access to and would use to fight a fire on the property. The applicant also provides information

regarding the nearest fire station at 36745 Jasper-Lowell Road, approximately 2.5 miles from the subject property. The way of access from the fire station to the subject property involves paved County roads and RR Baker Road. As proposed and conditioned, RR Baker Road and the proposed driveway can meet the above requirement. Compliance will be field verified by LMD staff as part of the Verification of Conditions application. Staff find the above criterion met.

(ii) Road and Driveway Surfaces. Roads must have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, and unobstructed area two feet in width at right angles with each side of the constructed surface , curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways must have: constructed widths of at least 12 feet with at least six inches of gravel and must have a vertical clearance of 13 feet 6 inches.

Finding 19. Access to the subject property is proposed from Wallace Creek Road, a County road, to RR Baker Road, a private road, to a proposed driveway utilized to access the homesite. It appears that RR Baker Road currently serves more than one dwelling. Therefore, the portion of RR Baker Road from Wallace Creek Road to the subject property must meet the above road standards. The applicant's access site plan (**Exhibit J**) shows RR Baker Road as having a width of 40 feet. The application indicates that the road has a travel width of 16 to 18 feet. Further, the applicant's site plan shows the proposed driveway from RR Baker Road to the homesites as having a 12 foot width. Therefore, staff find it feasible that the road standards can be met. As proposed and conditioned, the access easement and driveway must meet the above requirements. Compliance will be field verified by LMD staff as part of the Verification of Conditions application.

(iii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County must meet these standards for turnarounds. Dead-end roads must have turnarounds spaced at intervals of not more than 500 feet. Turnarounds must comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) must intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They must be constructed to the standards for driveways in LC 16.211(6)(b)(i) above and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds must have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(cc) No cul-de-sacs or hammerhead turnarounds must be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road

and, where necessary, by the creation of permanent fire breaks around the road.

Finding 20. The applicant is proposing a dead-end road over 200 feet long. Access is proposed via an existing access easement road that will be improved to meet the above standards because it serves more than one single family dwelling. The road from Wallace Creek to the subject property must have seven turnarounds given the above standard and the road's length. Per the applicant's access site plan (**Exhibit J**) and photographs of the turnaround points as they exist, it is feasible that the necessary turnarounds can be established and improved to meet the above standards. The above standards have been made a condition of approval and compliance will be field verified by LMD staff as part of the Verification of Conditions application.

(iv) Bridges and Culverts. Bridges and culverts must be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirement, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard if 50,000 lbs.

Finding 21. The applicant attests that there are several existing culverts that provide drainage for RR Baker Road as presently constructed. Two new culverts are proposed, one where RR Baker Road meets the proposed driveway and another along the proposed driveway. These culverts must be constructed to meet the Road Fire Safety Design requirements of LC 16.211(6)(b). These criteria have been made a condition of approval and will be field verified by LMD staff as part of the Verification of Conditions application.

(v) Road and Driveway Grades. Road and driveway grade cannot exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment and water supply.

Finding 22. Materials submitted by the applicant indicate that slopes for the proposed driveway vary between zero and 14 percent. The driveway slopes are indicated on the applicant's site plan which is stamped by a registered professional land surveyor, David J. Collier. The applicant also provides a letter from the Pleasant Hill Goshen Fire and Rescue District (d. 3/14/2019 and Exhibit 7 of the applicant's submittal) that provides preliminary verification of compliance regarding access to the subject property. Therefore, staff find it feasible that the private access easement and proposed driveway can meet the above standards. Compliance with the above criteria has been made a condition of approval, and the proposed driveway and road grades will be field verified as part of the verification of conditions. As conditioned, compliance with any applicable standards of LC 16.211(6)(b) is required, and must be verified by staff as part of the Verification of Conditions application.

(vi) Identification. Roads must be named and addressed in compliance with LC 15.305 through 15.335.

Finding 23. Lane County Transportation Planning has commented on the proposal (**Exhibit F**) and do not indicate that LC 15.305 through 15.335 apply to this proposal.

(vii) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet must provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

Finding 24. The applicant's site plan shows that the existing driveway will be approximately 230 feet in length. The applicant proposes a single turnout midway up the driveway to the homesite. This proposed turnout is depicted on the site plan and complies with the above standard, which has been made a condition of approval. Compliance with this standard is required and must be field verified by staff as part of the Verifications of Conditions application.

(viii) Modifications and Alternatives. The standards in (6)(b)(i) through (6)(b)(vii) above may be modified by the approval authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for firefighting equipment from its point of origination to its point of destination.

Finding 25. The applicant has not requested any modifications or alternatives. This criterion is not applicable.

(c) Fuel-Free Breaks. The owners of dwellings and structures must maintain a primary safety zone surrounding all structures and clear and maintain a secondary safety zone on land surrounding the dwelling that is owned or controlled by the owner in compliance with these requirements.

(i) Primary Safety Zone. The primary safety zones is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures, unless otherwise specifically stated in LC 16.211. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees must be spaced with greater than 15 feet between the crowns and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation must be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) must be placed next to the house.

(aa) As slope increase, the primary safety zone must increase away from the house, parallel to the slope and down the slope, as shown in the table and figure below:

(ii) Secondary Safety Zone. The secondary safety zone is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary safety zone is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary safety zone must be pruned and space so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees must be removed

to prevent spread of fire up into the crowns of the larger trees. Dead fuels must be removed.

Finding 26. The proposed development site accounts for the required primary and secondary safety zones surrounding the dwelling. The primary safety zone is proposed as 30 feet on the east side of the home site. West of the home site, there is a 17% down slope which requires an additional 75 feet of primary safety zone down slope. This requirement is depicted on the applicant's site plan with an 80 foot primary fire break on the west side of the homesite. The primary safety zone with the additional down slope fit entirely within the boundaries of the subject property. Surrounding the primary safety zone will be a secondary safety zone of 100 feet in all directions on property owned or controlled by the owner. As a condition of approval, Planning Office staff will field inspect the primary and secondary fuel breaks to verify the Fuel Free Break standards of LC 16.211 (6)(c) above are met. With the Verification of Conditions application, staff find that this criterion is conditionally met.

(d) The dwelling must have a fire retardant roof.

Finding 27. As a condition of approval, the applicant must provide evidence that the building plans meet this requirement and this requirement will be field verified. Staff find this above criterion conditionally met.

(e) Dwellings or manufactured dwellings must be sited at least 30 feet away from a ravine, ridge, or any slope greater than 40 percent slope.

Finding 28. See **Finding 8**. It is feasible that this requirement can be met and it has been made a condition of approval.

(f) If the dwelling has a chimney or chimneys, each chimney must have a spark arrester.

Finding 29. As a condition of approval, the applicant must provide evidence that the building plans meet this requirement and this requirement will be field verified. Staff find this above criterion conditionally met.

V. OTHER DEVELOPMENT STANDARDS:

Lane Code Chapter 15:

Finding 30. Lane County Transportation Planning submitted referral comments on the proposal (**Exhibit F**). The comments did not include or require any conditions of approval.

Other Considerations:

LandWatch Lane County (LWLC) submitted referral comments (**Exhibit H**) on the subject application, raising several concerns about the application. The applicant submitted a response to these comments addressing the issues (**Exhibit I**). Staff has reviewed LandWatch Lane County's concerns about the proposal and the applicant's response, and find that all approval criteria have been satisfactorily addressed as demonstrated in the above findings of fact.

IV. DECISION

Based upon the findings above, the application for a forest template dwelling meets the criteria of Lane Code 16.211(3), (5), and (6), and other applicable criteria. Therefore, **APPROVAL** is granted, subject to the conditions stated in **Exhibit A** of this staff report.

Please accept the following comments from Lane County Transportation Planning. Thank you for the opportunity to review and comment on the request.

COMMENTS FROM LANE COUNTY TRANSPORTATION PLANNING

Pursuant to Lane Code 15.055(2)(c), Lane County Transportation Planning defers to the Lane County Land Management Division to apply the standards of Lane Code Chapter 16 as necessary to determine the adequacy of the private access easement road condition.

CONDITIONS

Lane County Transportation Planning does not recommend conditions of approval specific to Lane Code Chapter 15.

FINDINGS

Based on the site plan, the applicant proposes to take access to the subject property from R R Baker Road. R R Baker Road is a Private Road.

Lane Code 15.055: Minimum Requirements for Private Access Easements

(2) When a Private Access Easement is used to provide access to a vacant lot or parcel where development is proposed, prior to land use and zoning authorization for the proposed development the following shall apply:

(c) The requirements specified above in LC 15.055(2)(a) through (b) shall apply only to lands outside of a County-designated Forest zone. Lands within a Forest zone shall be governed by the siting and development standards of the applicable zoning district.

Transportation Planning defers to Land Management Division to ensure the proposed site meets the applicable siting and development standards of the Impacted Forest Lands Zone (F-2).

is/are the owner(s) of real property as described on Exhibit "A", attached hereto. In accordance with the conditions set forth in the decision of the Lane County Land Management Division dated _____ approving Planning Action PA # _____, for Assessor's Map and Tax Lot _____ **Grantor(s)** hereby grant(s) to the owner(s), **(Grantees),** of all property zoned for farm or forest use, a perpetual non-exclusive farm use and forest practices management easement as follows:

1. The Grantor(s), the heirs, successors, and assignees acknowledge by the granting of this easement that the above described property is situated in a farm or forest zone in Lane County, Oregon, and may be subjected to conditions resulting from farm use or commercial forests operations on lands zoned for farm or forest use. Such operations may include farm use as defined in ORS 215.203 and management and harvesting of timber, disposal of slash, reforestation, application of chemicals, road construction and maintenance, and other accepted and customary forest management activities conducted in accordance with Federal and State Laws. Said farm use and forest management activities ordinarily and necessarily produce noise, dust, odors, smoke and other conditions, which may conflict with Grantor's use of Grantor's property for residential purposes, and Grantor(s) hereby give(s) an easement to the property owners of lands zoned for farm or forest use for the resultant impact on Grantors property caused by the farm use or forest management activities on such lands.

2. Grantor(s) shall comply with all restrictions and conditions for maintaining residences in farm and forest zones that may be required by State, Federal, and local land use laws and regulations. Grantor(s) will comply with all fire safety regulations developed by the Oregon Department of Forestry for residential development within a forest zone.

This easement is appurtenant to all property zoned for farm or forest use, and shall bind the heirs, successors, and assignees of Grantor(s), and shall endure for the benefit of the owners of lands zoned for farm or forest use, their heirs, successors, and assignees. The grantees, their heirs, successors, and assignees are hereby expressly granted the right of third party enforcement of this easement.

****

The history of the forest-zoned lands within township 18, range 02, section 11, much of which is in the ownership of developers with insider access to past LC planning directors and elected officials, is a sad yet all too common example of the effects of some past practices of the planning department.

Recently, efforts by the Planning Director to amend the Code to enable backing away from some past practices was resisted by the developers, their simpatico - the planning commission, and some commissioners, essentially curtailing that effort (at least for now).

LandWatch hopes the Commissioners will take note of the all too common scenario explained below, and will think about the economics of a property tax system that allows tax deferred forest land to be converted to rural residential-sized tax lots while stilling being zoned for forest use and eligible for the forestland property tax deferral. The forestland property tax deferral was established as a 'compensation' mechanism owed to forestland owners managing those lands at a level that would contribute to the state's commercial forest economy. A subsidy to manage forest land for commercial forest uses. This is, in part, the reason behind the 80-acre minimum parcel size that is supposed to apply to forest zoned lands. The subsidy is the only part of the deal that remains today - mostly unchecked.

If you represent any city dwellers, understand that they are responsible for the majority of property tax receipts the county receives, and that city folk are essentially subsidizing the rural developers who are exploiting weak laws with lots of large holes enacted in part by state and local elected officials. Which might not be so bad if the developers were upholding their end of the bargain.

If any of the Commissioners believe the county needs to allow more places for people to live, it might be worthwhile to first arrange for a tour of the two or three dozen or so dwelling sites that should be 'ready to go' for the housing market. Check out the inventory, the accessibility, the infrastructure and availability of services. Prepare a report for Homes for Good, always on the look-out for market rate housing options. Let's hear why those permits haven't been turned into market rate housing yet

In any case, because this is an issue most commissioners are unaware of, we hope you will, at the least, take note and ask some questions.

- Applicant , Nimpkish LLC, is also known as Gray McKenzie Goodman & Dorotea E C Goodman; deed shuffling has enabled four 2019 template dwelling applications (tax lots 506, 507, 508, 509)each on a zombie lot born out of tax lot 501; a 2007 replacement dwelling for a nonexistent dwelling on parent tax lot #501 has already been used to justify approvals for forest template dwellings on other zombie lots owned by other developers with ownerships within TRS 180211. One 60 acre tax lot was turned into five RR10-sized lots without any requirements to consider public health and safety issues that a legitimately approved subdivision would require.

- The four new RR sized tax lots are scheduled to receive a forest property tax deferral once the new fiscal year rolls around and assessment and taxation can legally recognize the zombies for purposes of taxation, which was skillfully avoided for the 2018-19 tax year. Parent tax lot 501 has been receiving a significant forestland property tax deferral since at least 1995; the development of a 2500 square foot 'replacement dwelling raised the tax from less than $100/year (on a RMV ranging from $ 40,000 to $80,000) to $2600/year on a RMV of $388,374. $2600 is .006 percent of the real market value. For comparison, my 'inside the city' 2500 square foot home on .17 acres has a RMV of $324,060, and my property tax is 4,140 (twice what Goodman/Nimpkish is assessed for their now 20 acres with a dwelling tax lot), which is 12% of the RMV. Sure, the city provides water/sewer to my home, but Goodman/Nimpkish and others just like them whose property taxes are subsidized by many people like me come to the city and benefit from the city streets, city water, public safety services that people like me pay for. Does anyone really think that rural property taxes that are a fraction of RMV's are sufficient to cover public services such as public safety, public roads, etc? This is not a sustainable model and is an example of why counties are so underfunded

- The applicant asserts there are no steep slopes on the subject property. According to RLID soils data the subject property does contains steep slopes, where 45% of the subject property has slopes between 30-60 percent. Steep slopes are not a matter of opinion, and development is not allowed in areas where slopes exceed 40%

Soil Map Unit#	Soil Type Description	% of Taxlot	Ag Class	Hydric %
107C	Philomath silty clay, 3 to 12 percent slopes	55%	6	0
113G	Ritner cobbly silty clay loam, 30 to 60 percent slopes	45%	7	0

The applicant's site plan does not show a secondary fuel break NW, W, or SW of the proposed dwelling site; the secondary fuel break must be established on adjacent tl#506, which is controlled by the owner of the subject property

- the site plan does not show the slope of the proposed driveway, stated as between 0 - 14%, and does not indicate its length to inform a finding regarding turnouts; also - the site plan is not overlaid with a contour map and is merely a one dimensional representation of the applicant's desired development site

- Why misstate what the naked eye can see? The applicant states "The vegetation is scattered mixed low lying brush and Himalayan Blackberry with Trailing Blackberry and a well-stocked stand of 4 year old Douglas Fir seedlings, and native grassland" - the site is clear cut with invasive brush/vegetation taking over, and any stand of doug fir seedlings is either on adjacent property controlled by the applicant or is not a 'stand' but rather a patch; it is not clear what "native grasslands" exist in a western Oregon clearcut

- The explanation for the question "Explain how the location of the dwelling and driveway minimize intrusion into the forest" misconstrues the facts. Intrusion into the forest is not a function of the driveway or dwelling location because the forest has been removed - thus no intrusion. the development site has been excavated, thus no slopes - this is not what Mr. Riddle and other LC development interests told the legislature in 1993 - the legislature was told forest dwellings would enable better forest management, but instead forest management has become a sideshow to preparation of forest land for rural residential-like housing on forest lands outside urban growth boundaries

- The site plan does not indicate the "seven turnarounds" the applicant asserts will be constructed on the dead end road that is close to 6000 feet long; the PD must not only determine that the turnarounds are feasible, but also that they WILL BE constructed, regardless of whether or not the fire district has commented on the required turnarounds;

- Driveway turnout on the site plan does not indicate length, the percent of slopes or actual size of turnout; the PD must establish how many turnouts are necessary and whether the development of the turnouts is feasible; the site plan must also show the surrounding driveways in order for the PD to make a finding about compliance with LC 15.138 driveway spacing criteria

- It is not adequate to defer compliance with siting standards to conditions of approval based on broad statements such as " . . . construct the proposed access, road and driveway . . . to the minimum standards of LC 16.211(8)(e)"; the PD must establish feasibility of compliance with specific standards based on the site conditions, dwelling location, etc.; although it is no secret that these zombie lots and forest template dwelling permits are intended for lucrative real estate transactions, the county has no responsibility to enable these transactions. The county's responsibility is to ensure the protection of the public health and safety of the people living here, and that requires applying the siting standards in a manner that ensures compliance. What does it matter if a rural fire district has 3 engines, 2 water trucks, and new station within 3 miles of a proposed development if five dwellings located within less than 1/4 or 1/8 mile of each other, all on steep slopes, have inadequate driveway turnouts, roadway turnarounds, fuel breaks and setbacks.

Re: PA 19-05298
Tax Lot 18-02-11-00-00507

Dear Rachel:

I appreciate your very timely processing of this application and apologize for bringing forth these changes that may require you to re-write some of your report, though I don't believe the enclosed information will change the outcome.

Since the time you provided me with the comments offered by LandWatch Lane County and I prepared our response I have had the opportunity to review several recent decisions made by the Lane County Hearings Official and also visit with other members of the Lane County Land Management Staff regarding the adoption of "new" policies brought about by the recent changes to LC 16.211. Accordingly, I think it is appropriate that we supplement our application and am doing so herein.

At Attachment 1 to this letter you will find a Parcel Map depicting what is now known as Tax Lot 18-02-11-00-00507, the subject of our application. This map has an overlay of contour lines on the entire parcel that clearly depicts the slope and grade of the tract. The map was prepared by David J. Collier, a Registered Surveyor in the State of Oregon and owner of Pacific Survey. While I have maintained it is not a requirement for an applicant to provide a map displaying the slopes and grade of an entire parcel, it appears this has been something of a bone of contention of LandWatch and upon discussion with my client and the owner of the property, NIMPKISH, LLC, we are providing this information at this time.

Attachment 2 to this letter is a re-drawn Site Plan. The location of the proposed dwelling, the annotations of grade and the setbacks and primary and secondary fuel breaks have not changed from the original application. The re-drawn Site Plan has an overlay of contour lines and the boundaries of the primary and secondary fuel breaks are depicted in conformance to the recent revisions to LC 16.211(6)(c) and Figure 16.211-1 showing, for lack of a better term, the expanded "wings" of the outer edges of the increased fuel break areas. Our original Site Plan (Exhibit 3, submitted with the application) was drawn by Mr. Collier using the requirements associated with the slope and grade of the property, but was drawn prior to the adoption of the change to LC16.211(6)(c) and the example shown in Figure 16.211-1. As I have noted, there is no change to the proposed building site, no change to the proposed fuel breaks (other than the addition of the side "wings") and the proposal continues to conform to the requirements of Lane Code.

The third component of this Supplement is of some substance and may require your indulgence in reviewing your report. I have reviewed the concerns voiced by LandWatch over our Road Design submitted at Exhibit 2 to the original application. It would seem that our application could stand on its merits. I contend the letter from Chief Andrew Smith following his on-site review of the road and his approval of the road design proposal on behalf of the Pleasant Hill-Goshen Fire and Rescue Department met the conditions of LC 16.211(6)(b)(i) and that should have been the end of the discussion of the road access provisions. A copy of that letter was included with the original application.

However, given the propensity of LandWatch to file appeals, and what appears to be the likelihood that this application will be subject to an appeal, I think it is appropriate we reconsider our original road design proposal. I have reviewed the concerns voiced by LandWatch with legal counsel for the owner and have met on site with our surveyor and a road construction contractor. The summation is we are proposing a new road plan and copy of that is attached with this letter at Attachment 3.

It is important to note that the original proposal for turn around points intended to use existing residential driveways to nearby houses and existing roads that were constructed for various forest management activities over the years with the subject property. This proposal would have reduced the impact on the forestland nature of the property, complying with the requirements of LC 16.211(5)(a)(iv) "The amount of forest lands used to site access roads, service corridors and structures must be minimized." Ms. Segel-Vaccher expresses concern that our application does not "provide evidence in record of existing driveways." My response was our road design was a proposal, the approval of which by the Director would have been conditioned upon a final inspection that the road was constructed in accordance with our plan. The point was, we didn't need to submit the evidence she was demanding, the road plan was a proposal that would be "proved up" upon completion of the reconstruction. All of this ignores the fact that Chief Smith conducted an on-site evaluation of the road, reviewing the proposed turn around points, and said the proposal would meet the standards of his department. Again, upon reviewing my position with legal counsel for the owners I have been encouraged to provide "evidence" of feasibility of the proposed turn around points. Attachment 4 to this letter is a display of photographs depicting the proposed turn around points. The map included in Attachment 4 is numerically labeled to correspond to the proposed turn around points and the respective photographs.

As discussed, having considered the objections raised by LandWatch to the original road proposal and having reviewed several recent decisions made by the Lane County Hearings Official, we believe it is appropriate to reconsider the original Road Proposal and are submitting with this letter at Attachment 3 a revised Road Proposal titled "Goodman Access Site Plan." This revised Road Proposal will continue to use the existing R. R.

Baker Road, the easement provisions for access remain unchanged, and the use of the existing driveways and forest management road approaches for turn around points will continue though we will be constructing additional turn around points as discussed in this proposal.

The original Road Proposal, Exhibit 2 to the application, showed 7 turn around points and noted the applicant would be re-constructing R. R. Baker Road to its terminus at the eastern edge of Tax Lot 501. After reviewing this proposal with legal counsel and considering the objections raised by LandWatch the revised Road Proposal does not entail reconstructing R. R. Baker Road to its terminus. In concert with the adjoining landowners of Tax Lots 18-02-11-00-00509, 00508 and 00506 the reconstruction of R. R. Baker Road will terminate at the driveway access point to Tax Lot 507, the subject of this application. See Attachment 3.

The owners of Tax Lot 507, NIMPKISH, LLC, under PA 19-05298, are required to provide an improved road of 18 feet width to their driveway approach. This road, as it passes Tax Lots 509, 508 and 506, will be reconstructed to insure an improved 18 foot wide surface and turn around points placed so as to not exceed a 500 foot spacing between such points. The obligation of the owner in this application is to insure an 18' wide road, with appropriate turn around points, is constructed to the intersection with the driveway serving the proposed dwelling on Tax Lot 507. There is no obligation on the part of any of the owners to extend the reconstruction of R. R. Baker Road further to the east for the benefit of adjoining landowners who presently use the road, but are not seeking land use approval for their properties that would be subject to the road requirements of County Code. Specifically, no additional turn around points will be constructed to the east of the driveway benefitting Tax Lot 507.

The road shown in Attachment 3 will provide for the reconstruction of the existing road to insure a minimum of an 18 foot improved gravel surface. In addition, the road will continue to use 4 of the existing driveway approaches and forest management roads and landing areas for turn around points. These 4 points were part of the original 7 proposed turn around points as depicted in Exhibit 2 to the application. The existing turn around points are noted on the road plan at Attachment 3 in dark and annotated as "Turnaround in Driveway." In addition, 5 turn around points are to be constructed, noted in an outline form in the legend of the plan at Attachment 3 and labeled "Turnaround To Be Constructed Per Fire Marshal Requirements." We note this road must be reviewed in its final form after completion of the reconstruction and be approved by the Pleasant Hill-Goshen Fire and Rescue Department. The "Goodman Access Site Plan" has been prepared by Dave Collier, an Oregon Registered Surveyor, and notes the spacing of the existing and proposed turn around points as not exceeding 500 feet. Also noted in this road plan is the grade of various segments of R. R. Baker Road as it will be applicable to the proposal being made by the applicant and the adjoining landowners in their individual proposals.

While the applicant is proposing to revise their road plan, I will again stand by the position that the requirements of Lane County Code are met in the original design with the review and approval of the Pleasant Hill Goshen Fire and Rescue Department, in precise conformance to LC 16.211(6)(b)(i).

Attachment 5 to this letter is a copy of correspondence from Hendrickson Well Drilling, Inc., a road and general excavation contractor, confirming that their company "will be able to construct the road as you have it designed." A copy of the road design plan is attached to Mr. Hendrickson's letter.

Rachel Serslev, Planner
PA 19-05298
July 11, 2019

I will reiterate the point I made in my discussion with another member of the Lane County Land Management Division staff regarding another application, the obligation of the applicant is to submit a development plan that conforms to County Code. The objective of the review process, if it determines that the plan so conforms, is to arrive at a conditional approval that requires the applicant to develop the property in such a manner as to meet the conditions of approval. If we are to start down the slope of "proving feasibility" for each of the conditions being addressed in the site development plan we are moving significantly away from the objective requirements of code and entering into a much more subjective evaluation of whether an application is feasible.

Thank you for your time. Please advise me if you have any questions regarding the enclosed information and attachments.

Sincerely,

Jim Belknap

Re: PA 19-05298
Tax Lot 18-02-11-00-00507

Dear Rachel:

I appreciate your very timely processing of this application and apologize for bringing forth these changes that may require you to re-write some of your report, though I don't believe the enclosed information will change the outcome.

Since the time you provided me with the comments offered by LandWatch Lane County and I prepared our response I have had the opportunity to review several recent decisions made by the Lane County Hearings Official and also visit with other members of the Lane County Land Management Staff regarding the adoption of "new" policies brought about by the recent changes to LC 16.211. Accordingly, I think it is appropriate that we supplement our application and am doing so herein.

At Attachment 1 to this letter you will find a Parcel Map depicting what is now known as Tax Lot 18-02-11-00-00507, the subject of our application. This map has an overlay of contour lines on the entire parcel that clearly depicts the slope and grade of the tract. The map was prepared by David J. Collier, a Registered Surveyor in the State of Oregon and owner of Pacific Survey. While I have maintained it is not a requirement for an applicant to provide a map displaying the slopes and grade of an entire parcel, it appears this has been something of a bone of contention of LandWatch and upon discussion with my client and the owner of the property, NIMPKISH, LLC, we are providing this information at this time.

Attachment 2 to this letter is a re-drawn Site Plan. The location of the proposed dwelling, the annotations of grade and the setbacks and primary and secondary fuel breaks have not changed from the original application. The re-drawn Site Plan has an overlay of contour lines and the boundaries of the primary and secondary fuel breaks are depicted in conformance to the recent revisions to LC 16.211(6)(c) and Figure 16.211-1 showing, for lack of a better term, the expanded "wings" of the outer edges of the increased fuel break areas. Our original Site Plan (Exhibit 3, submitted with the application) was drawn by Mr. Collier using the requirements associated with the slope and grade of the property, but was drawn prior to the adoption of the change to LC16.211(6)(c) and the example shown in Figure 16.211-1. As I have noted, there is no change to the proposed building site, no change to the proposed fuel breaks (other than the addition of the side "wings") and the proposal continues to conform to the requirements of Lane Code.

The third component of this Supplement is of some substance and may require your indulgence in reviewing your report. I have reviewed the concerns voiced by LandWatch over our Road Design submitted at Exhibit 2 to the original application. It would seem that our application could stand on its merits. I contend the letter from Chief Andrew Smith following his on-site review of the road and his approval of the road design proposal on behalf of the Pleasant Hill-Goshen Fire and Rescue Department met the conditions of LC 16.211(6)(b)(i) and that should have been the end of the discussion of the road access provisions. A copy of that letter was included with the original application.

However, given the propensity of LandWatch to file appeals, and what appears to be the likelihood that this application will be subject to an appeal, I think it is appropriate we reconsider our original road design proposal. I have reviewed the concerns voiced by LandWatch with legal counsel for the owner and have met on site with our surveyor and a road construction contractor. The summation is we are proposing a new road plan and copy of that is attached with this letter at Attachment 3.

It is important to note that the original proposal for turn around points intended to use existing residential driveways to nearby houses and existing roads that were constructed for various forest management activities over the years with the subject property. This proposal would have reduced the impact on the forestland nature of the property, complying with the requirements of LC 16.211(5)(a)(iv) "The amount of forest lands used to site access roads, service corridors and structures must be minimized." Ms. Segel-Vaccher expresses concern that our application does not "provide evidence in record of existing driveways." My response was our road design was a proposal, the approval of which by the Director would have been conditioned upon a final inspection that the road was constructed in accordance with our plan. The point was, we didn't need to submit the evidence she was demanding, the road plan was a proposal that would be "proved up" upon completion of the reconstruction. All of this ignores the fact that Chief Smith conducted an on-site evaluation of the road, reviewing the proposed turn around points, and said the proposal would meet the standards of his department. Again, upon reviewing my position with legal counsel for the owners I have been encouraged to provide "evidence" of feasibility of the proposed turn around points. Attachment 4 to this letter is a display of photographs depicting the proposed turn around points. The map included in Attachment 4 is numerically labeled to correspond to the proposed turn around points and the respective photographs.

As discussed, having considered the objections raised by LandWatch to the original road proposal and having reviewed several recent decisions made by the Lane County Hearings Official, we believe it is appropriate to reconsider the original Road Proposal and are submitting with this letter at Attachment 3 a revised Road Proposal titled "Goodman Access Site Plan." This revised Road Proposal will continue to use the existing R. R.

Baker Road, the easement provisions for access remain unchanged, and the use of the existing driveways and forest management road approaches for turn around points will continue though we will be constructing additional turn around points as discussed in this proposal.

The original Road Proposal, Exhibit 2 to the application, showed 7 turn around points and noted the applicant would be re-constructing R. R. Baker Road to its terminus at the eastern edge of Tax Lot 501. After reviewing this proposal with legal counsel and considering the objections raised by LandWatch the revised Road Proposal does not entail reconstructing R. R. Baker Road to its terminus. In concert with the adjoining landowners of Tax Lots 18-02-11-00-00509, 00508 and 00506 the reconstruction of R. R. Baker Road will terminate at the driveway access point to Tax Lot 507, the subject of this application. See Attachment 3.

The owners of Tax Lot 507, NIMPKISH, LLC, under PA 19-05298, are required to provide an improved road of 18 feet width to their driveway approach. This road, as it passes Tax Lots 509, 508 and 506, will be reconstructed to insure an improved 18 foot wide surface and turn around points placed so as to not exceed a 500 foot spacing between such points. The obligation of the owner in this application is to insure an 18' wide road, with appropriate turn around points, is constructed to the intersection with the driveway serving the proposed dwelling on Tax Lot 507. There is no obligation on the part of any of the owners to extend the reconstruction of R. R. Baker Road further to the east for the benefit of adjoining landowners who presently use the road, but are not seeking land use approval for their properties that would be subject to the road requirements of County Code. Specifically, no additional turn around points will be constructed to the east of the driveway benefitting Tax Lot 507.

The road shown in Attachment 3 will provide for the reconstruction of the existing road to insure a minimum of an 18 foot improved gravel surface. In addition, the road will continue to use 4 of the existing driveway approaches and forest management roads and landing areas for turn around points. These 4 points were part of the original 7 proposed turn around points as depicted in Exhibit 2 to the application. The existing turn around points are noted on the road plan at Attachment 3 in dark and annotated as "Turnaround in Driveway." In addition, 5 turn around points are to be constructed, noted in an outline form in the legend of the plan at Attachment 3 and labeled "Turnaround To Be Constructed Per Fire Marshal Requirements." We note this road must be reviewed in its final form after completion of the reconstruction and be approved by the Pleasant Hill-Goshen Fire and Rescue Department. The "Goodman Access Site Plan" has been prepared by Dave Collier, an Oregon Registered Surveyor, and notes the spacing of the existing and proposed turn around points as not exceeding 500 feet. Also noted in this road plan is the grade of various segments of R. R. Baker Road as it will be applicable to the proposal being made by the applicant and the adjoining landowners in their individual proposals.

While the applicant is proposing to revise their road plan, I will again stand by the position that the requirements of Lane County Code are met in the original design with the review and approval of the Pleasant Hill Goshen Fire and Rescue Department, in precise conformance to LC 16.211(6)(b)(i).

Attachment 5 to this letter is a copy of correspondence from Hendrickson Well Drilling, Inc., a road and general excavation contractor, confirming that their company "will be able to construct the road as you have it designed." A copy of the road design plan is attached to Mr. Hendrickson's letter.

Rachel Sersiev, Planner
PA 19-05298
July 11, 2019

I will reiterate the point I made in my discussion with another member of the Lane County Land Management Division staff regarding another application, the obligation of the applicant is to submit a development plan that conforms to County Code. The objective of the review process, if it determines that the plan so conforms, is to arrive at a conditional approval that requires the applicant to develop the property in such a manner as to meet the conditions of approval. If we are to start down the slope of "proving feasibility" for each of the conditions being addressed in the site development plan we are moving significantly away from the objective requirements of code and entering into a much more subjective evaluation of whether an application is feasible.

Thank you for your time. Please advise me if you have any questions regarding the enclosed information and attachments.

Sincerely,

Jim Belknap

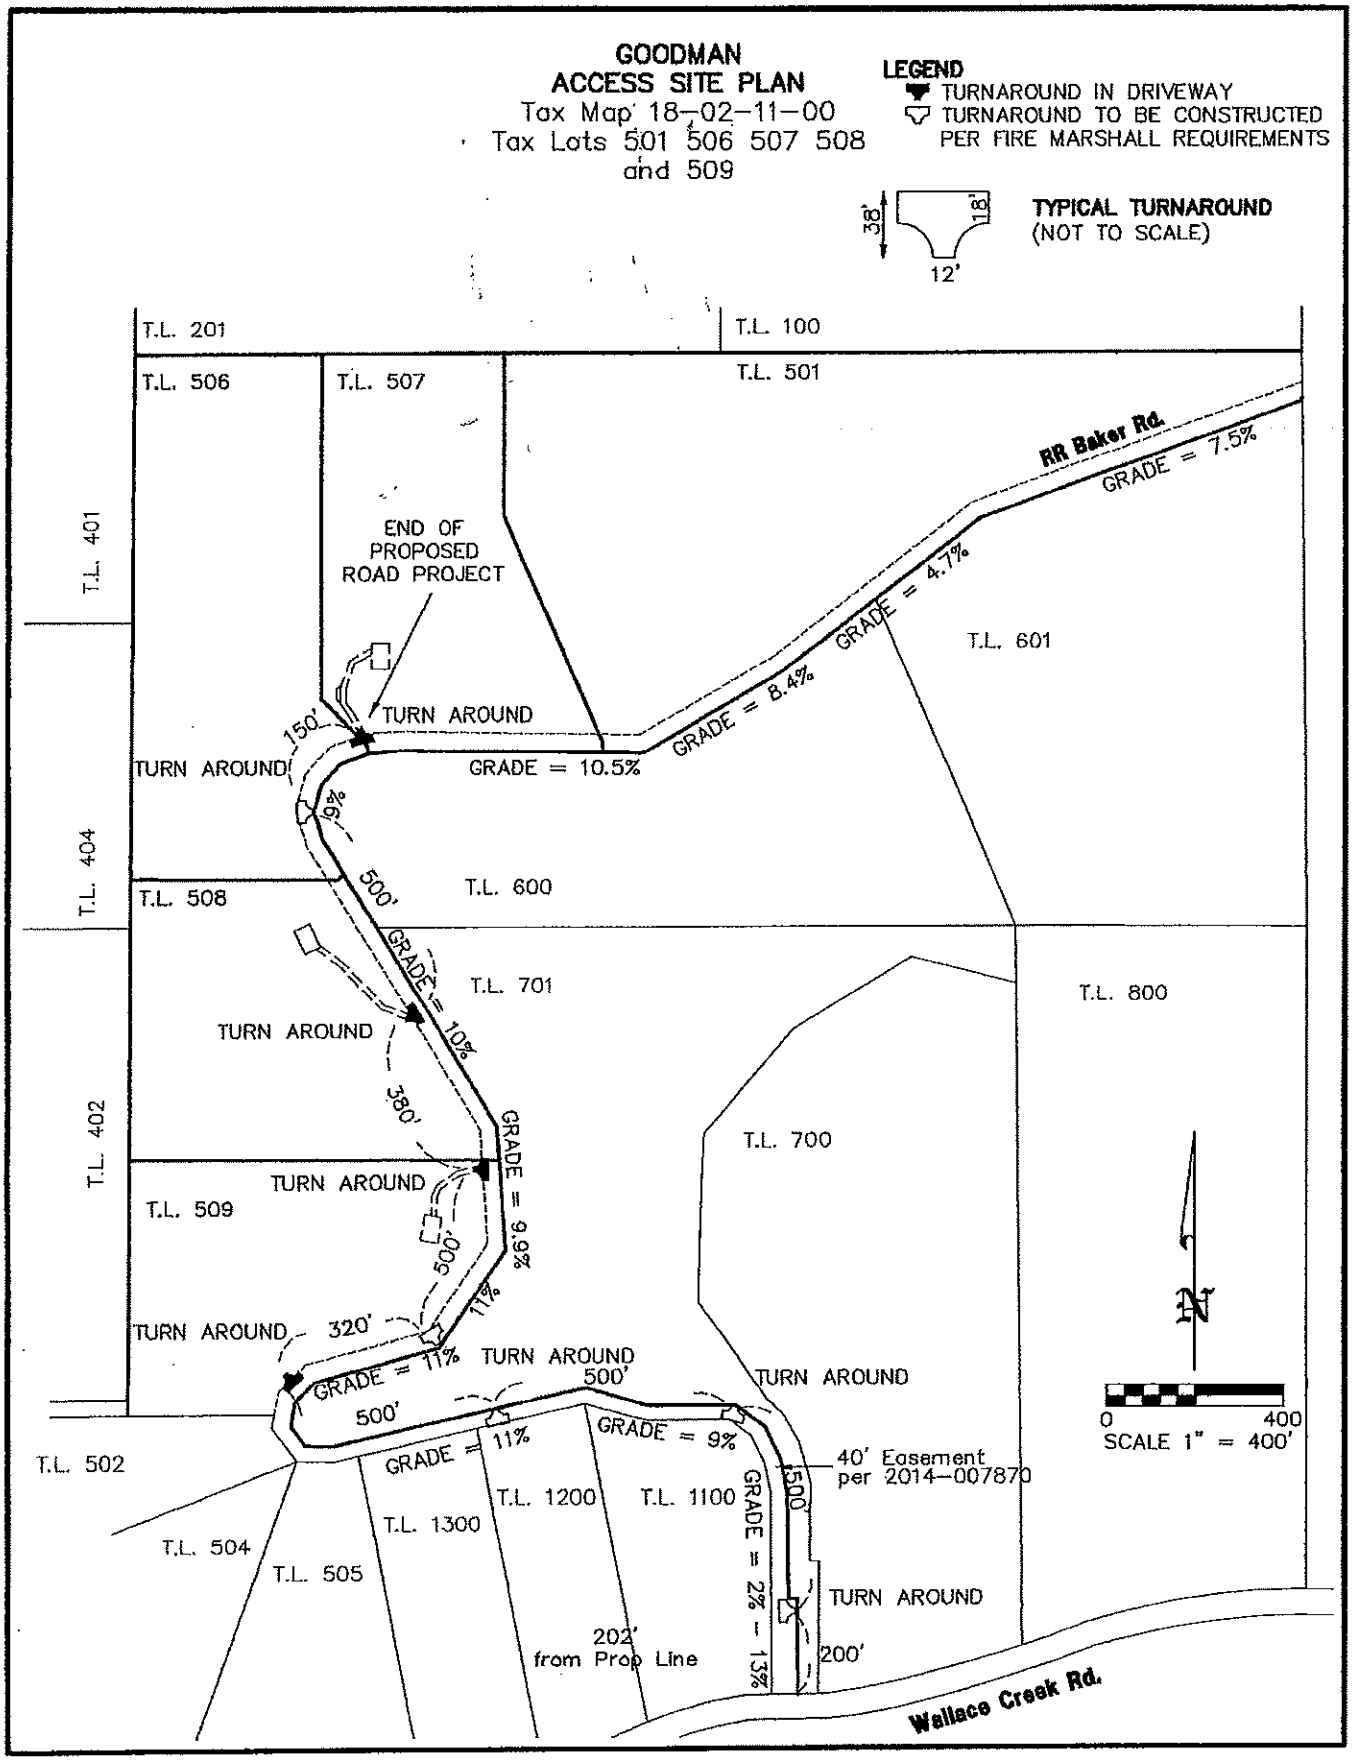
Re: Tax Lots 18-02-11-00-509, 508, 506 and 507

Dear Mr. Belknap:

Thank you for the opportunity to complete an on-site evaluation of your proposed road project to serve the referenced properties. We understand you are intending to construct a road with an 18' wide travel surface with several turnaround points to conform to Chapters 15 and 16 of Lane County Code. I am attaching a copy of the road design proposal you presented to us with the annotated turnaround points and driveway intersections.

This letter will confirm that our company will be able to construct the road as you have it designed. The question you have posed to us is: "Is this construction proposal feasible?" Our very succinct answer is: "yes."



Please contact me if you have any questions.

Sincerely,

Jeffery Hendrickson

Re: PA 19-05298

Dear Rachel:

This letter is to request a 60 day extension of the timelines for processing the above referenced Planning Action, a Template Test Special Use Permit for property now known as Lane County Tax Lot 18-02-11-00-00507.

As we have discussed, I will be submitting supplemental information to be considered in the processing of this application. The primary information will be a re-designed road proposal. I do not anticipate we will need the complete 60 days to submit our additional information, and understand you are close to completion of the processing of the application at this time. I think some minor modifications of the road proposal will remove any questions as to the compliance with Lane Code. As I mentioned in my email yesterday, my hope is to have this information to you the week of July 8, 2019 and anticipate you will be able to complete your work shortly thereafter.

Thank you for your continuing cooperation, please let me know if you have any questions.

Sincerely,

Jim Belknap

Jim Belknap

****

The history of the forest-zoned lands within township 18, range 02, section 11, much of which is in the ownership of developers with insider access to past LC planning directors and elected officials, is a sad yet all too common example of the effects of some past practices of the planning department.

Recently, efforts by the Planning Director to amend the Code to enable backing away from some past practices was resisted by the developers, their simpatico - the planning commission, and some commissioners, essentially curtailing that effort (at least for now).

LandWatch hopes the Commissioners will take note of the all too common scenario explained below, and will think about the economics of a property tax system that allows tax deferred forest land to be converted to rural residential-sized tax lots while stilling being zoned for forest use and eligible for the forestland property tax deferral. The forestland property tax deferral was established as a 'compensation' mechanism owed to forestland owners managing those lands at a level that would contribute to the state's commercial forest economy. A subsidy to manage forest land for commercial forest uses. This is, in part, the reason behind the 80-acre minimum parcel size that is supposed to apply to forest zoned lands. The subsidy is the only part of the deal that remains today - mostly unchecked.

If you represent any city dwellers, understand that they are responsible for the majority of property tax receipts the county receives, and that city folk are essentially subsidizing the rural developers who are exploiting weak laws with lots of large holes enacted in part by state and local elected officials. Which might not be so bad if the developers were upholding their end of the bargain.

If any of the Commissioners believe the county needs to allow more places for people to live, it might be worthwhile to first arrange for a tour of the two or three dozen or so dwelling sites that should be 'ready to go' for the housing market. Check out the inventory, the accessibility, the infrastructure and availability of services. Prepare a report for Homes for Good, always on the look-out for market rate housing options. Let's hear why those permits haven't been turned into market rate housing yet

In any case, because this is an issue most commissioners are unaware of, we hope you will, at the least, take note and ask some questions.

- Applicant , Nimpkish LLC, is also known as Gray McKenzie Goodman & Dorotea E C Goodman; deed shuffling has enabled four 2019 template dwelling applications (tax lots 506, 507, 508, 509)each on a zombie lot born out of tax lot 501; a 2007 replacement dwelling for a nonexistent dwelling on parent tax lot #501 has already been used to justify approvals for forest template dwellings on other zombie lots owned by other developers with ownerships within TRS 180211. One 60 acre tax lot was turned into five RR10-sized lots without any requirements to consider public health and safety issues that a legitimately approved subdivision would require.

- The four new RR sized tax lots are scheduled to receive a forest property tax deferral once the new fiscal year rolls around and assessment and taxation can legally recognize the zombies for purposes of taxation, which was skillfully avoided for the 2018-19 tax year. Parent tax lot 501 has been receiving a significant forestland property tax deferral since at least 1995; the development of a 2500 square foot 'replacement dwelling raised the tax from less than $100/year (on a RMV ranging from $ 40,000 to $80,000) to $2600/year on a RMV of $388,374. $2600 is .006 percent of the real market value. For comparison, my 'inside the city' 2500 square foot home on .17 acres has a RMV of $324,060, and my property tax is 4,140 (twice what Goodman/Nimpkish is assessed for their now 20 acres with a dwelling tax lot), which is 12% of the RMV. Sure, the city provides water/sewer to my home, but Goodman/Nimpkish and others just like them whose property taxes are subsidized by many people like me come to the city and benefit from the city streets, city water, public safety services that people like me pay for. Does anyone really think that rural property taxes that are a fraction of RMV's are sufficient to cover public services such as public safety, public roads, etc? This is not a sustainable model and is an example of why counties are so underfunded

- The applicant asserts there are no steep slopes on the subject property. According to RLID soils data the subject property does contains steep slopes, where 45% of the subject property has slopes between 30-60 percent. Steep slopes are not a matter of opinion, and development is not allowed in areas where slopes exceed 40%

Soil Map Unit#	Soil Type Description	% of Taxlot	Ag Class	Hydric %
107C	Philomath silty clay, 3 to 12 percent slopes	55%	6	0
113G	Ritner cobbly silty clay loam, 30 to 60 percent slopes	45%	7	0

The applicant's site plan does not show a secondary fuel break NW, W, or SW of the proposed dwelling site; the secondary fuel break must be established on adjacent tl#506, which is controlled by the owner of the subject property

- the site plan does not show the slope of the proposed driveway, stated as between 0 - 14%, and does not indicate its length to inform a finding regarding turnouts; also - the site plan is not overlaid with a contour map and is merely a one dimensional representation of the applicant's desired development site

- Why misstate what the naked eye can see? The applicant states "The vegetation is scattered mixed low lying brush and Himalayan Blackberry with Trailing Blackberry and a well-stocked stand of 4 year old Douglas Fir seedlings, and native grassland" - the site is clear cut with invasive brush/vegetation taking over, and any stand of doug fir seedlings is either on adjacent property controlled by the applicant or is not a 'stand' but rather a patch; it is not clear what "native grasslands" exist in a western Oregon clearcut

- The explanation for the question "Explain how the location of the dwelling and driveway minimize intrusion into the forest" misconstrues the facts. Intrusion into the forest is not a function of the driveway or dwelling location because the forest has been removed - thus no intrusion. the development site has been excavated, thus no slopes - this is not what Mr. Riddle and other LC development interests told the legislature in 1993 - the legislature was told forest dwellings would enable better forest management, but instead forest management has become a sideshow to preparation of forest land for rural residential-like housing on forest lands outside urban growth boundaries

- The site plan does not indicate the "seven turnarounds" the applicant asserts will be constructed on the dead end road that is close to 6000 feet long; the PD must not only determine that the turnarounds are feasible, but also that they WILL BE constructed, regardless of whether or not the fire district has commented on the required turnarounds;

- Driveway turnout on the site plan does not indicate length, the percent of slopes or actual size of turnout; the PD must establish how many turnouts are necessary and whether the development of the turnouts is feasible; the site plan must also show the surrounding driveways in order for the PD to make a finding about compliance with LC 15.138 driveway spacing criteria

- It is not adequate to defer compliance with siting standards to conditions of approval based on broad statements such as " . . . construct the proposed access, road and driveway . . . to the minimum standards of LC 16.211(8)(e)"; the PD must establish feasibility of compliance with specific standards based on the site conditions, dwelling location, etc.; although it is no secret that these zombie lots and forest template dwelling permits are intended for lucrative real estate transactions, the county has no responsibility to enable these transactions. The county's responsibility is to ensure the protection of the public health and safety of the people living here, and that requires applying the siting standards in a manner that ensures compliance. What does it matter if a rural fire district has 3 engines, 2 water trucks, and new station within 3 miles of a proposed development if five dwellings located within less than 1/4 or 1/8 mile of each other, all on steep slopes, have inadequate driveway turnouts, roadway turnarounds, fuel breaks and setbacks.

3040 N DELTA HIGHWAY | EUGENE, OR 97408

May 21, 2019

LMD FILE:	509-PA19-05298
APPLICANT/OWNER:	Nimpkish, LLC
AGENT:	James E. Belknap
MAP & TAX LOT:	18-02-11-00-00507
ZONING:	Impacted Forest Lands (F-2) Zone
PROPOSAL:	**A REQUEST FOR DIRECTOR APPROVAL OF A DWELLING IN THE IMPACTED FOREST LANDS ZONE (F-2), IN ACCORDANCE WITH THE 'TEMPLATE TEST' PROVISIONS OF LANE CODE 16.211(2)-2.4, (3), (5) AND (6).**

Please accept the following comments from Lane County Transportation Planning. Thank you for the opportunity to review and comment on the request.

COMMENTS FROM LANE COUNTY TRANSPORTATION PLANNING

Pursuant to Lane Code 15.055(2)(c), Lane County Transportation Planning defers to the Lane County Land Management Division to apply the standards of Lane Code Chapter 16 as necessary to determine the adequacy of the private access easement road condition.

CONDITIONS

Lane County Transportation Planning does not recommend conditions of approval specific to Lane Code Chapter 15.

FINDINGS

Based on the site plan, the applicant proposes to take access to the subject property from R R Baker Road. R R Baker Road is a Private Road.

Lane Code 15.055: Minimum Requirements for Private Access Easements

(2) When a Private Access Easement is used to provide access to a vacant lot or parcel where development is proposed, prior to land use and zoning authorization for the proposed development the following shall apply:

(c) The requirements specified above in LC 15.055(2)(a) through (b) shall apply only to lands outside of a County-designated Forest zone. Lands within a Forest zone shall be governed by the siting and development standards of the applicable zoning district.

Transportation Planning defers to Land Management Division to ensure the proposed site meets the applicable siting and development standards of the Impacted Forest Lands Zone (F-2).

Proposal: A request for Director Approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(2)-2.4, (3), (5) and (6).

The purpose of this notice is to acquaint you with the proposed development, to gather information you may have about the project, and provide an opportunity to comment and express concerns related to the approval criteria, prior to the Planning Director's decision to approve or deny the proposal.

The application and related materials are available for inspection at the Lane County Land Management Division at no cost and copies will be provided at reasonable cost. The name of the Lane County Land Management Division representative to contact concerning this application is RACHEL SERSLEV, 541-682-6903, or rachel.serslev@co.lane.or.us.

Approval criteria are found in the section(s) of Lane Code cited above. The criteria may be obtained or viewed at the Land Management Division or at the internet address below. You may submit information in the spaces provided on the last page and return this document to the attention of RACHEL SERSLEV, Lane County Land Management Division, 3050 N. Delta Hwy., Eugene, OR 97408, Fax to ATTN: RACHEL SERSLEV, (541) 682-3947, or email to rachel.serslev@co.lane.or.us. Please be sure to reference the department file number shown above, and submit your comments by **4:00 P.M.** on JUN 03 2019.

Concerns/comments submitted in writing will be considered in making the decision as they relate to the criteria under which the proposal must be evaluated.

Your comments are important and will greatly improve the decision making process, but please note that you will not receive an individual response to information submitted. By law, comments received that are not related to the approval criteria may not be considered. General planning information is available by calling 541/682-3577, or by visiting the Public Works Customer Service Center at 3050 N. Delta Hwy. weekdays between 9 a.m. and 4:00 p.m.

Links to applicable law are available through our Planning homepage:

http://www.lanecounty.org/Departments/PW/LMD/LandUse/Pages/default.aspx

Mailed copies of the approval criteria are also available, at cost, by calling Land Management Division Staff at 541/682-6917. Please allow one week for mailing.

Notice of Complete Land Use Application

Applicant/Owner:
Nimpkish LLC
86690 RR Baker Road
Springfield, OR 97478

Agent:
James E. Belknap
77898 Chisholm Trail Drive
Cottage Grove, OR 97424

Application File: 509-PA19-05298
Received: April 18, 2019
Date Deemed Complete: May 17, 2019

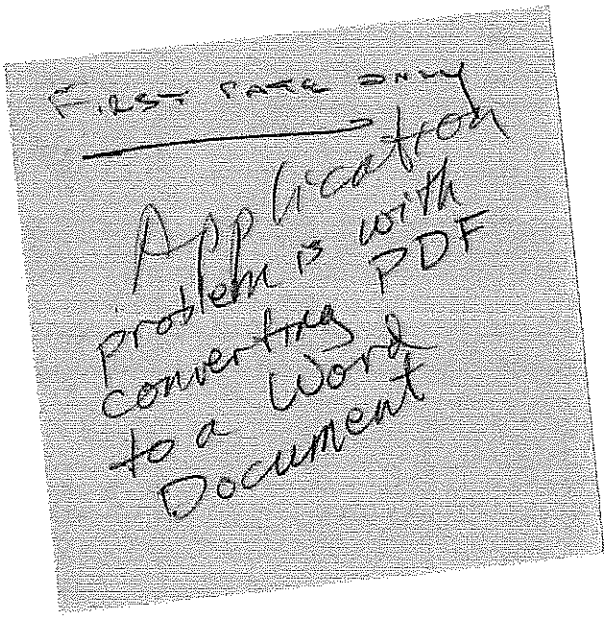
Proposal: A request for Director Approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(2)-2.4, (3), (5) and (6).

The land use application(s) referenced above has/have been deemed complete and accepted for processing pursuant to Lane Code (LC) 14.050(1). Acceptance as a complete application does not involve determining if the application is approvable based on the applicable approval criteria. It is the responsibility of the applicant to demonstrate that the application meets the approval criteria. The information provided by the applicant may or may not be adequate for this purpose.

Staff are required by LC 14.050(1)(d) to mail this written notice to the applicant when an application is deemed complete. Staff will process your application according to LC Chapter 14 Type II procedures. A referral notice will be sent to the applicant, agent, agencies and surrounding property owners allowing a minimum 15 day comment period. Following the comment period, staff will process your application and evaluate whether the approval criteria are met. A land use decision with findings of fact and conditions of approval will then be mailed to the applicant, parties of record and surrounding property owners. Absent an appeal and upon expiration of the 12 day appeal period, your land use decision becomes final.

I am the staff contact for this application unless notice is provided otherwise. If you have any questions concerning this letter or your application, please feel free to contact me, at 541-682-6903 or rachel.serslev@co.lane.or.us.

Sincerely,



Rachel Serslev, Planner

PROPOSAL: A request for Type II determination for a Template dwelling in the Impacted Forest Lands (F-2) Zone, pursuant to the provisions of Lane Code 16.211(2)-2.4.

Version 2/2019

REQUIRED SUBMITTALS (Also reference the Application Standards handout)

Lane Code 14.020 (3)(b) Electronic Materials.

(i) **When application or appeal materials submitted in hard copy format are over five pages in length, an applicant or appellant must provide an identical electronic version of the submitted materials in addition to a hard copy. Any other party submitting written materials into the record that are over five pages is also encouraged to submit an identical electronic copy. Any electronic materials must be in a format acceptable to the Director. This provision should not be interpreted to prohibit electronic submittals of materials less than five pages in length. The County will scan submitted materials upon request for fee. The County cannot be held responsible for electronic submittals that are not received by the Director or not confirmed by the Director to have been received.**

(ii) **When electronic materials over five pages in length are submitted by any party for inclusion in an application record, an identical hard copy of the materials must also be submitted unless this requirement is waived by the Director.**

Lane Code 14.040 Application Requirements

(1) **Minimum Submittal Requirements. Applications for a Type I through Type IV procedure must be submitted on a form provided by the Director, address all applicable standards and criteria, and include the following materials and information:**

(a) **Applications must include at least one hard copy of all application materials, no larger than 11 inch x 17 inch in size;**

(b) **All applicable information requested on the application form;**

(c) **Required filing fee, except that the required filing fee may not be required when Lane County initiates an application;**

(d) **Signature of each applicant;**

(e) **Signature of a property owner or property owner's authorized representative;**

(f) **Proof of property ownership by providing a certified or recorded copy of a deed, or land sale contract, or Lane County Tax Assessor's records;**

(Deed reflecting ownership is attached at Exhibit 1)

(g) **Assessor's map and tax lot number of the subject property;**

(h) **A site plan drawn to a standard engineer's scale, and conforming to the County's site plan submittal standards;**

(Site Plan is attached at Exhibit 3)

A site plan must be included. Refer to the handout entitled "How to prepare your plot plan." Identify nearby driveways. Driveways spacing standards are contained in Lane Code 15.138.

(i) **Information demonstrating compliance with any applicable prior decisions and conditions of approval for the subject property;**

(j) **A written narrative clearly indicating what action is requested and addressing all applicable standards and criteria;** (See the Narrative at Exhibit 9.)

(k) **Supporting information required to evaluate the application and address the applicable standards and criteria;**

(l) **A written statement indicating whether a railroad-highway crossing provides or will provide the only access to land that is the subject of an application; and**

Does a railroad-highway crossing provide the only access to the subject property? Yes

___ No _X__

(m) Additional information needed to evaluate applicable standards and criteria.

(2) Fees Required. In addition to any other applicable approval criteria, an approvable Type II or III application must be accompanied by the appropriate filing fee unless the Director authorizes a waiver or reduction to filing fees pursuant to Lane Manual Chapter 60.850.

(3) Determination of Application Requirements. The Director may waive any of the requirements of subsection (1) above if deemed to be inapplicable to the application.

(4) Applicant's Burden. It is the applicant's responsibility to provide evidence demonstrating that the application complies with all applicable standards and criteria.

ADDITIONAL INFORMATION REQUESTED FOR THIS APPLICATION:

ZONING F-2 **ACREAGE:** 10.06 Acres

DESCRIBE THE ACCESS TO THE PROPERTY (circle the answer):

State Hwy County Rd Public Rd Private Easement

Road name: R. R. Baker Road, a private road, provides access to the subject property, see Exhibit 2. R. R. Baker Road connects to Wallace Creek Road, County Road 421. An easement exists over property adjoining to the south that provides for access to the county road. A copy of the access easement is attached at Exhibit 4.

NUMBER OF EXISTING DWELLINGS ON PARCEL: 0

EXISTING IMPROVEMENTS: What structures or improvements does the property contain (i.e., outbuildings, roads, driveways, wells, septic tanks, drainfields)? Will any structure or improvement be removed/demolished?

The only structure is a well constructed gravel and oil road that extends from Wallace Creek Road to the subject property and runs along the east boundary of the property. No other improvements exist.

PHYSICAL FEATURES: Describe the site.

- The Vegetation on the property: The vegetation is scattered mixed low lying brush and Himalayan Blackberry with Trailing Blackberry and a well-stocked stand of 4 year old Douglas Fir seedlings, and native grassland. The area immediately surrounding the proposed building site is a level bench of poor quality soil that has marginally supported the reproduction seedlings.

- The Topography of the property: The western portion of the property is moderately sloping up from the west up to the east. The building site is proposed at a level bench located towards the southwest corner of the tract. The land continues from the bench in a moderate upward slope to the east and to the south. As depicted in the Site Plan, the driveway follows the grade from the building site up to R.R. Baker Road at a grade from level to 14%.

- Any Significant Features of the property (steep slopes, water bodies, etc.): There are no water bodies or steep slopes on the subject property.

APPROVAL CRITERIA

Lane Code 16.211(2) contains the Impacted Forest Lands (F-2) Zone Table of Permitted Uses. Use 2.4, the template dwelling, is subject to (3)(c), (3)(q), (3)(r), (5), and (6).

(3) Use Standards

(c) A single family "template" dwelling authorized on a lot or parcel located within a forest zone pursuant to the following:

The subject property must be a lawfully established unit of land:

- Was the property created by a partition or subdivision? List plat number _____
- If not, a final legal lot verification is required prior to submittal of this application. What is the file number for the legal lot verification?

See Property Line Adjustment approved under PA 18-05833, the Subject Property is identified as Property 2.

(i) If the lot or parcel is predominantly composed of soils that are:

The minimum number of parcels within the template depends on the productivity of the soil type. At least 51% of the acreage of the parcel is composed of soils capable of producing:

__X__ (1) Less than 50 cubic feet per acre per year: See subsection (aa)

____ (2) 50 to 85 cubic feet per acre per year: See subsection (bb)

____ (3) More than 85 cubic feet per acre per year: See subsection (cc)

See Soils Maps at Exhibits 5a and 5b. Exhibit 5a is the soils map prepared by the Lane Council of Governments (LCOG). Exhibit 5b is the LCOG map overlayed onto the surveyor's map of the Subject Property reflecting the Property Line Adjustment in PA 18-05833 calculating the respective soil types. The surveyor's calculation establishes 4.68 acres in Soil Type 113G, being 46.02% of the land mass, and 5.49 acres in Soil type 107C, being 53.98% of the land mass.

Soil Type	(Cubic ft/acre/yr)	% of Parcel
107 C Philomath sic, 3-12% slope	45	53.98%
113 G Ritner Cobbly silty clay loam, 30-60% slope	149	46.02%
Total (must equal 100 %)		100 %

(aa) Capable of producing zero to 49 cubic feet per acre per year of wood fiber if:

(A) All or part of at least <u>three</u> other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(bb) Capable of producing 50 to 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least seven other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(cc) Capable of producing more than 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least 11 other lots or parcels that existed on January 1, 1993, are within a 160 acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

Include a scaled map and the template used to verify the requirements in (aa), (bb), or (cc) showing the 1993 configuration of the parcels.

The Template Map is attached at Exhibit 6

How many lots or parcels existed on January 1, 1993? 11

How many dwellings existed on January 1, 1993 and continue to exist? 3

Complete the following table to support your answers on the previous page.

	map and tax lot	deed & date	dwelling date
1.	18-02-12-00-00201	Originally Tax Lot 200 as shown on 8/22/1989. Tax Lot 201 was established by Legal Lot Verification and Property Line Adjustment under PA 14-05513. The original 1910 structure was recognized by a Verification of Replacement Rights in PA 1036-90 and currently remains on the property (see Assessment and Taxation appraisal summary), an additional dwelling was constructed by building permit as a replacement dwelling under BP 1037-90.	1910
2.	18-02-12-00-00303	Parcel 1 of Partition Plat 92-P0221 filed 6/1/1992. No record of previously placed dwelling on the property, but under Building Permit 4658-93, dated 12/29/1993 a mobile home placement permit was approved citing replacement of an "Existing Mobile Home" and the replacement dwelling was connected to an "existing septic system." The replacement dwelling was "finalled" in 1999. This replacement dwelling is not being considered in the dwelling count of this application.	1999
3.	18-02-12-00-00302	Parcel 2 of Partition Plat 92-P0221 filed 6/1/1992	10/23/93
4.	18-02-11-00-00601	Parcel 2 of Partition M43-81, Recorded 6/21/1982 in Reel 1198R, Recorder's Reception Number 82-17934. Deed R1200 Recorder's Reception No. 82-20162, Dated 6/10/1982 Current 1999 Dwelling was approved under Verification of Replacement Rights in PA 98-5159 showing the original dwelling was constructed by building permit in BP 81-2367 (dated 11/13/1981), finalled 2/24/1982	1982

5.	18-02-11-00-00600	Parcel 1, Partition M43-81, Recorded 6/21/1982 in Reel 1198R, Recorder's Reception Number 82-17934. Deed R1275/83-46855 Dated 11/7/1983	2003
6.	18-02-11-00-00404	Originally Tax Lot 400, Verified as a Legal Lot in PA04-5480, Noticed in PA 07-5919	
7.	18-02-11-00-00302	Former Tax Lot 300, Verified as a Legal Lot in PA 04-5478, Noticed in PA 07-5920	
8.	18-02-10-00-00100	Deed Book 222, page 81, Dated 07/30/1941	
9.	18-02-11-00-00401	Originally Tax Lot 200, Verified as a Legal Lot in PA 04/5476, Noticed in PA 07/5923	
10.	18-02-11-00-00201	Originally Tax Lot 201 as 40 Acres Verified as a Legal Lot in PA 04/5477. Noticed in PA 07-5916	
11.	18-02-11-00-00100	Deed Vol 460 Page 235 Dated 5/14/1952 Current dwelling was established in 2001, permitted by Verification of Replacement Rights in PA 015596 showing the original dwelling was constructed in 1958	1958
12.			
13.			

Include property description cards, which you can obtain from Lane County Assessment & Taxation.

If necessary, see the Planner on Duty for prior partitions/subdivision/legal lot status of surrounding properties. If a property was created via a partition or subdivision, please list that above in the deed/date column. If a legal lot verification was completed on a property, please include the PA# along with the year of creation.

If the dwelling is a manufactured dwelling, provide evidence it was placed on the property prior to January 1, 1993.

(ii) **Lots or parcels within urban growth boundaries cannot be used to satisfy the eligibility requirements of subsection (i) above;**

(iii) **A dwelling, as used in subsection (i) above, is considered to be in the 160-acre template if any part of the parcel is in the 160-acre template;**

(iv) **Except as provided by subsection (v) below, if the subject tract abuts a road that existed on January 1, 1993, the measurement required in (i) above may be made by creating a 160 acre rectangle that is one mile long and 1/4 mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;**

(v) **The following applies where a tract 60 acres or larger abuts a road or perennial stream:**

(aa) The measurement must be made in accordance with paragraph (iv). However, one of the three required dwellings must be on the same side of the road or stream as the tract, and:

(A) Be located within a 160-acre rectangle that is one mile long and onequarter mile wide centered on the center of the subject tract and that is, to the maximum extent possible aligned with the road or stream; or

(B) Be within one-quarter mile from the edge of the subject tract but not outside the length of the 160 acre rectangle, and on the same side of the road or stream as the tract;

(bb) If a road crosses the tract on which the dwelling will be located, at least one of the three required dwellings must be on the same side of the road as the proposed dwelling;

Will you be using the 160 acre rectangle template aligned with the road? Yes _X_ No ___

Evidence of the existence of R. R. Baker Road on or before January 1, 1993 is provided at Exhibits 8a, 8b and 8c. There is no precise information regarding the exact date R. R. Baker Road was constructed, it is believed to have been in existence since the 1940's. The question as it pertains to Lane Code 16.211(3)(c)(iv) is whether the road can be shown to have been in existence on or before January 1, 1993. Attached at Exhibit 8a is a copy of a survey dated January 4, 1982 recorded with the Lane County Surveyor's Office in File No. 25341 depicting the center line of R. R. Baker Road. Attached at Exhibit 8b is an easement dated August 22, 1991 (Recorder's Reception No. 9142256) granted by Lee Goodman, predecessor in interest to NIMPKISH, LLC, granting an easement for use of a "40 foot easement strip, including the existing Roadway" in favor of Jack C. Pearce and Joyce A. Pearce. This easement makes specific reference to "the entire roadway known as R. R. Baker Road..." Also attached is Exhibit 8c being a copy of the conveyance deed dated April 11, 1967 from Robert E. Barrett and Doris E. Barrett to Irwin Lee Goodman and Ruth Gray Goodman, recorded in Reel 342R, Recorder's Reception Number 81490. The legal description in this deed provides for a specific reference to a "private road" and provides a description of that road, indicating its existence in April of 1967.

If yes, is least one of the dwellings used in the dwelling count located on the same side of the road as the proposed dwelling? Yes _X_ No ___ (If no, you cannot use the rectangle template)

(vi) A proposed "template" dwelling under this section is not allowed:

(aa) Unless no dwellings are allowed on other lots or parcels that make up the tract and deed restrictions established under paragraph (3)(c)(vii) for the other lots or parcels that make up the tract are met; or

(bb) If the tract on which the dwelling will be sited includes a dwelling;

Does the tract contain any other dwellings? Yes ___ No _X_

(vii) Where other lots or parcels that make up a tract in Subsection (vi):

(aa) The applicant must provide evidence that the covenants, conditions, and restrictions form adopted as "Exhibit A" in OAR chapter 660, division 6 has been recorded with the county clerk of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(bb) The covenants, conditions, and restrictions are irrevocable, unless a statement of release is signed by an authorized representative of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(viii) The Director shall maintain a copy of the covenants, conditions, and restrictions filed in the county deed records pursuant to this section and a map or other record depicting tracts do not qualify for the siting of a dwelling under the covenants, conditions, and

restrictions filed in the county deed records pursuant to this section. The map or other record required by this subsection shall be readily available to the public in the county planning office.

(q) For single-family dwellings, the landowner must sign and record in the deed records for the County a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

If this application is approved, this will be made a condition of approval.

(r) For single-family dwellings, the approval is valid for four years from the date of approval, unless otherwise specified in the approval or by other provisions of Lane Code. Notwithstanding the requirements of LC Chapter 14, an application for a two year extension of the timelines for the permit approval can be made and approved pursuant to LC Chapter 14.

Pursuant to ORS 215.417, this application, if approved, will be valid for four years from the date of approval and one two year extension of the timelines can be made. This will be made a condition of approval.

SITING CRITERIA

(5) Siting Standards for Uses, Activities, and Structures

The following siting criteria apply to all new uses, activities, and structures allowed by LC 16.211. These criteria are designed to make such uses compatible with forest operations, to minimize wildfire hazards and risks and to conserve values found on forest lands. The Director must consider the criteria in this section together with the requirements of Section (6) to identify the building site.

(a) Residences, dwellings, and structures must be sited as follows:

(i) Near dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet from any ravine, ridge or slope greater than 40 percent (40%);

Explain the reason for the proposed location. You must address the following issues:

- How is the new dwelling close to other dwellings on adjacent property? Explain.

The nearest dwelling is located on Tax Lot 18-02-11-00-00600 and is approximately 510 feet from the subject proposed dwelling. The second nearest dwelling is to the east on Tax Lot 18-02-11-00-00501 and is approximately 740 feet from the proposed dwelling site. The proposed dwelling site is selected for its relatively level topography, close proximity to the existing road and conforming to the preferred minimum setbacks from adjoining ownerships of at least 100 feet in the F-2 zone as well as being in an area of the poorest soils on the property in its ability to support conifer timber. Conforming to these criteria the distance to the adjacent dwellings is set forth by the distance of those dwellings from their mutual boundaries with the Subject Property. Addressing these criteria places the proposed dwelling site at the indicated distances from adjoining dwellings.

- How is the dwelling near existing roads?

The proposed dwelling is approximately 140 feet from R.R. Baker Road, which is also the south boundary of the subject property. See the site plan attached at Exhibit 3.

- Will a new driveway be constructed or will an existing driveway be extended?

The driveway will use an existing logging spur road that has a heavy rock surface. The turn around at the dwelling site will entail approximately 50 feet of new construction.

- What is the most level part of the property?

The most level part of the property is the area immediately surrounding the proposed dwelling site.

- What is the area that is least suitable for forest use based on the soil productivity, forest management and forest harvesting practices?

  The area surrounding the proposed building site encompasses the poorest quality soils, Soil Type 107C, Philomath Silty Clay at a 3-12% slope and having a forestland capability estimated by the Oregon Department of Forestry at 45 cubic feet per acre per year.

- Is there a ravine, ridge or slope greater than 40% within 30 feet of the new dwelling?

  No

(ii) With minimal intrusion into forest areas undeveloped by nonforest uses;

Will the dwelling encroach into a forested area? Or will it be located in an existing developed or open area? Explain how the dwelling location will cause minimal intrusion to forested areas:

The proposed dwelling site is an area that has previously had scattered conifer timber and various hardwoods. The area where the dwelling is to be sited abuts a former landing site for a previous logging operation that is open and has a heavily rocked surface. The driveway will use an existing constructed and rocked surface road.

(iii) Where possible, when considering LC 16.210(5)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

[It is believed by the applicant that this code reference is meant to be LC 16.211 not 16.210]

Is the dwelling within 500 feet of adjoining property zoned F-1? Yes ___ No _X_

If yes, explain: _____

_____

_____

Is the dwelling within 100 feet of adjoining property zoned F-2 or EFU? Yes ___ No _X_

If yes, explain: The adjoining properties are zoned F-2, the nearest being approximately 111 feet to the west of the proposed dwelling site and 180 feet from the F-2 zoned property to the south.

(iv) The amount of forest lands used to site access roads, service corridors, and structures must be minimized.

Explain how the location of the dwelling and driveway minimize intrusion into the forest. Attach additional pages if necessary.

As discussed previously, the proposed driveway will utilize an existing heavily rocked logging road. The primary access road, R.R. Baker Road, over which the property holds an existing easement, has existed for over 70 years and is utilized by nine neighbors. The proposed building site abuts a non-stocked rock surface area that has been used as a landing site and will not supported forest growth.

(b) Setbacks. Structures other than a fence or sign cannot be located closer than:

(i) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(ii) 30 feet from all property lines other than those described in Section (5)(b)(i).

(iii) The minimum distance necessary to comply Sections (5)(a) and (6).

Does the property front County Right-of-way? Yes ___ No X

If yes, what is the distance from the proposed dwelling to the County Right-of-way? N/A Feet

How far is the proposed dwelling from the northern property line? 790 Feet

How far is the proposed dwelling from the eastern property line? 395 Feet

How far is the proposed dwelling from the southern property line? 180 Feet

How far is the proposed dwelling from the western property line? 111 Feet

Are these setbacks at least the minimum distance to comply with (5)(a) and (6)?

Yes.

(iv) Riparian Setback Area. A riparian setback area applies to the area (iv) between a line that is 100 feet from and parallel to the ordinary high water of a Class I stream designated in the Rural Comprehensive Plan. No structure other than a fence may be located closer than 100 feet from the ordinary high water of a Class I stream unless a riparian modification application is approved in accordance with LC 16.253(3). Vegetation maintenance, removal, and replacement standards and exceptions to these setbacks are found in LC 16.253.

Is there a designated Class 1 stream on the property? Yes ___ No X

If yes, how far will the dwelling be from the Class 1 stream? N/A Feet

(c) Domestic Water Supplies. For new dwellings and non-farm structures on vacant land, evidence must be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant must provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(5)(c) above, evidence of domestic water supply means:

(i) **Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;**

(ii) **A water use permit issued by the Water Resources Department for the use described in the application; or**

(iii) **Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant must submit the well constructor's report to the Director upon completion of the well.**

What is your proposed water source (check the answer):

Private Well _X__ Community System ___ Public system ___

Describe: A private well will be constructed upon the Subject Property.

For a community or public system, do you have written verification the provider can serve your dwelling?

Yes ___ No ___ If yes, include a copy with this application.

Do you have a water use permit (well log) for an existing well, issued by the Water Resources Department? Yes ___ No _X__

If yes, include a copy with this application. Copies can be obtained by searching for groundwater data at the following website: https://www.oregon.gov/OWRD/pages/index.aspx

(d) **As a condition of approval, if road access to the dwelling is by a road owned and maintained by a private party or by the Oregon Department of Forestry, the U.S. Bureau of Land Management, or the U.S. Forest Service, then the applicant must provide proof of a long-term road access use permit or agreement. The road use permit may require the applicant to agree to accept responsibility for road maintenance.**

(e) **Approval of a dwelling is subject to the following requirements:**

(i) **Approval of a dwelling requires the owner of the tract to plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in department of Forestry administrative rules.**

(ii) **The Director must notify the County Assessor of the above condition at the time the dwelling is approved.**

(iii) **Stocking survey report:**

(aa) **If the lot or parcel is more than ten acres, the property owner must submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and**

(bb) **Upon notification by the Assessor, the Department of Forestry will determine whether the tract meets minimum stocking requirements of the Forest Practices Act. If the Department of Forestry determines that the tract does not meet those requirements, that department will notify the owner and the Assessor that the land is not being managed as forest land. The Assessor will then remove the forest land designation pursuant to ORS 321.359 and impose the additional tax.**

If this proposal is approved, (d) and (e) above will be made conditions of approval.

(6) Fire-Siting Standards for Dwellings and Structures

The following fire-siting standards or their equivalent apply to new residences, dwellings, manufactured dwellings, or structures allowed in Lane Code 16.211:

(a) The dwelling must be located upon a parcel within a fire protection district or must be provided with residential fire protection by contract. If the dwelling is not within a fire protection district, the applicant must provide evidence that the applicant has asked to be included within the nearest such district. If the Director determines that inclusion within a fire protection district or contracting for residential fire protection is impracticable, the dwelling must comply with the following fire safety plan requirements:

Is the property within a fire district? Yes _X_ No ___ If yes, go to (b) below.

The property is within the Pleasant Hill-Goshen Fire and Rescue District.

If the property is not within a fire district, you have two options (choose one):

____ (A) Submit evidence of a long term services contract with the nearest fire district and request annexation into the fire district, or

____ (B) Develop a Fire Protection Plan. It must comply with standards in (i) - (v) below. The Fire Protection Plan will be verified as a Condition of Approval, but it is recommended that you submit the plan with this application.

(i) The means selected may include a fire sprinkling system, onsite equipment and water storage or other methods that are reasonable, given the site conditions;

(ii) If a water supply is required for fire protection, it must be a swimming pool, pond, lake, or similar body of water that at all times contains at least 4,000 gallons or a stream that has a continuous year round flow of at least one cubic foot per second;

(iii) The applicant must provide verification from the Water Resources Department that any permits or registrations required for water diversion or storage have been obtained or that permits or registrations are not required for the use;

(iv) Road access must be provided to within 15 feet of the water's edge for firefighting pumping units. The road access must accommodate the turnaround of firefighting equipment during the fire season. Permanent signs must be posted along the access route to indicate the location of the emergency water source; and

(v) A 100-foot wide primary safety zone and a 100-foot wide secondary safety zone surrounding the perimeter of the dwelling or manufactured dwelling structures must be provided and maintained in perpetuity in compliance with the standards in (6)(c).

(b) Fire Safety Design Standards for Roads and Driveways.

(i) Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for firefighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways must comply with the standards specified below. Evidence of compliance with the standards specified in (6)(b) should include objective information about the firefighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for

more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

Attach to this application objective information demonstrating compliance or feasibility of compliance with Lane Code 16.211(6)(b)(i), including:

__X__ Itemized list of firefighting equipment. Obtain from the fire district (if applicable).

Attached at Exhibit 10 is a printed copy of an email from Chief Andrew Smith of the Pleasant Hill-Goshen Fire and Rescue District confirming the following equipment as being available for firefighting purposes:

3 Water Tank Trucks, 2,500 gallon, 3,000 gallon and 3,500 gallon

5 Structural Engines (Pump Trucks), 2 carrying 1,000 gallons, 2 carrying 750 gallons and 1 carrying 500 gallons

2 Type 6 Engines (Commonly called Brush Trucks), 1 250 gallon and 1 300 gallon.

__X__ Description and evidence of physical nature of access or driveway route. Topography maps, photos, or other evidence may be included in the application.
The nearest fire station is at Jasper (36745 Jasper-Lowell Road), approximately 2.5 miles from the subject property. Access is by paved county road from Jasper over Jasper-Lowell Road travelling west to Wallace Creek Road, then north on Wallace Creek, also a paved county road, to the intersection with R.R. Baker Road which is 16' to 18' in width, graveled with a partial oil surface. R.R. Baker road ascends to the subject property where it makes the southern boundary of said land. As noted in the letter from Chief Andrew Smith of the Pleasant Hill-Goshen Fire and Rescue Department in his on-site review of the property, see Exhibit 7, the physical nature of access is considered adequate for firefighting purposes.

__X__ Description of proposed improvements to access or driveway route. Design drawings may be included in the application.
The roadway of R.R. Baker Road is currently 16 to 18 feet in width, with the approval of this Special Use Permit the roadway will be improved to be a complete 18 feet in width with turnarounds as noted in Exhibit 2 The driveway will be 12 feet in width with sufficient gravel surface to comply with the standards of Chapter 15 of Lane County Code. As depicted in the Site Plan at Exhibit 3 a single turnout will be constructed in the driveway.

In addition to the above items, the application may also include:

__X__ A preliminary written verification of compliance from the agency providing fire protection, or a preliminary written certification of compliance from an Oregon Registered Professional Engineer. However, please note that such certification will also be made a condition of approval to verify final access and/or driveway construction.

See the letter from Chief Andrew Smith of the Pleasant Hill-Goshen Fire and Rescue Department discussing his on-site review of the road proposal at Exhibit 7.

The standards below will be a condition of approval and will be verified by staff.

(ii) Road and Driveway Surfaces. Roads must have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways must have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and must have a vertical clearance of 13 feet 6 inches.

Will an existing driveway be extended to serve the new dwelling? Yes _X_ No ___

Will there be a new driveway in a new location? Yes ___ No _X_

As noted above the area where the dwelling is to be sited abuts a former landing site for a previous logging operation that is open and has a heavily rocked surface. The driveway will use an existing constructed and rocked surface road, though a final extension of approximately 40 feet will extend from the presently constructed rock logging road to the building site and be constructed to provide for vehicle turnaround at the dwelling.

(iii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County must meet these standards for turnarounds. Dead-end roads must have turnarounds spaced at intervals of not more than 500 feet. Turnarounds must comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) must intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They must be constructed to the standards for driveways in LC 16.211(6)(b)(i) above and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds must have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(cc) No cul-de-sacs or hammerhead turnarounds must be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

Are you proposing a dead-end road? Yes _X_ No ___

Is it over 200 feet long? Yes _X_ No ___

If yes, it must contain turnouts. Explain:

The applicant believes the term you are intending to use in this section is "turnarounds" not "turnouts." The existing road is approximately 5,700 feet in length, seven vehicle turnarounds are to be improved at existing driveway turnouts from the road with a hammerhead turnaround constructed at the end of the road. The road will be constructed to a width of 18 feet and by

county code no turnouts are required, though a single turnout is proposed to be constructed approximately 700 feet from Wallace Creek Road, see Exhibit 2.

(iv) Bridges and Culverts. Bridges and culverts must be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Will the new driveway or extension of the driveway contain any culverts or bridges? Yes X No ___

If yes, explain:

Several culverts provide drainage for R. R. Baker Road as it is presently constructed. A culvert is anticipated to be placed at the intersection of the existing heavy gravel former logging road and R. R. Baker Road. One culvert is anticipated to be constructed for drainage of the driveway extension from the existing logging road to the building site. All culverts will meet the minimum load support standards of Chapter 15 of Lane County Code.

(v) Road and Driveway Grades. Road and driveway grades cannot exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment and water supply.

Will the road or driveway contain any slopes in excess of 8%? Yes X No ___

If yes, explain:

The driveway grade will vary from 0% to14%, see the Site Plan at Exhibit 3. See the letter from Chief Andrew Smith of the Pleasant Hill-Goshen Fire and Rescue Department at Exhibit 7 discussing the adequacy of the existing road and access proposal that followed his on-site review of the property.

(vi) Identification. Roads must be named and addressed in compliance with LC 15.305 through 15.335.

Please be advised that staff will evaluate the route of the road serving your dwelling, from the homesite back to the public road to which it connects. Staff will determine if the road is to be named, per LC 15.312 and LM 15.015(3).

(vii) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet must provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

The driveway must be 12 feet wide. How wide is the driveway? 12 feet _____

Is it over 200 feet long? Yes X No ___

If yes, it must contain turnouts. Turnouts are not required if the driveway is 16 feet wide.

Will the driveway have turnouts? Yes _X_ No ___

Will the driveway be 16 feet wide? Yes ___ No _X_

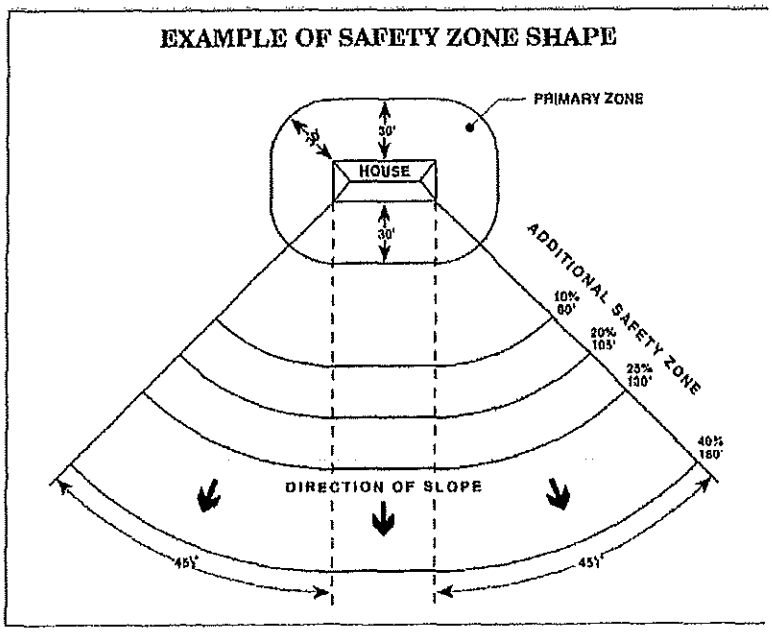
(viii) Modifications and Alternatives. The standards in (6)(b)(i) through (6)(b)(vii) above may be modified by the approval authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for firefighting equipment from its point of origination to its point of destination.

Are you proposing any modifications or alternatives to the road or driveway standards? If yes, explain. Attach additional pages of necessary.

No modifications or alternatives to the road or driveway standards are proposed.

(c) Fuel-Free Breaks. The owners of dwellings and structures must maintain a primary safety zone surrounding all structures and clear and maintain a secondary safety zone on land surrounding the dwelling that is owned or controlled by the owner in compliance with these requirements.

(i) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures, unless otherwise specifically stated in LC 16.211. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees must be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation must be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) must be placed next to the house.



(aa) As slope increases, the primary safety zone must increase away from the house, parallel to the slope and down the slope, as shown in the table and figure below:

The new dwelling must be surrounded by a 30 foot primary safety zone. If the dwelling is on a slope, the safety zone will increase, as shown in the table.

Table 16.211-2 Minimum Primary Safety Zone

Slope	Feet of Primary Safety Zone	Feet of Additional Primary Safety Zone Down Slope
0%	30	0
10%	30	50
20%	30	75
25%	30	100
40%	30	150

Figure 16.211-1

(ii) Secondary Safety Zone. The secondary safety zone is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary safety zone is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary safety zone must be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees must be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels must be removed.

The secondary fuel break must be established an additional 100 feet from the primary safety zone, but only on property you own.

* Show the fuel breaks on the site plan. If approved, the primary safety zone and the secondary fuel break will be verified as a condition of approval. Contact staff (541-682-3577) or visit the Planning website (www.lanecounty.org/planning) for details regarding fire break standards.

See the Site Plan at Exhibit 3 to review the proposed fuel breaks and safety zones.

* The establishment and maintenance of fuel breaks within the Riparian Setback Area must comply with the applicable requirements of Lane Code 16.253.

(d) The dwelling must have a fire retardant roof.

(e) Dwellings or manufactured dwellings must be sited at least 30 feet away from a ravine, ridge, or any slope greater than 40 percent slope.

Substantial evidence may need to be submitted with the application to determine slope. This could include photos, slope calculations, and/or evidence from a private engineer or surveyor such as a stamped site plan. What is the slope of the land within 30 feet of the dwelling?

To the north, east and south of the proposed dwelling site the land is virtually flat, to the west of the site the slope approaches 18% at the outer edge of the 30 foot fuel break and an additional 50 feet is designed, to encompass a full 80 foot primary fuel break. See the Site Plan at Exhibit 3 prepared by David J. Collier, registered professional land surveyor.

(f) If the dwelling has a chimney or chimneys, each chimney must have a spark arrester.

If the proposal is approved, (d) and (f) above will be made conditions of approval and will be verified by staff.

N E¼ NW¼ Sec. 11, T. 18S. R2W., W.M.
Jan. 4, 1982 Scale 1" = 200'

NARRATIVE: This survey fills one of the requirements of Partition 43-81. Found L.C.O monuments define the East line of the section and lines of properties described therefrom. The centerline of R.R. Baker road and the Easterly R/W line thereof (which lines the Westerly and Northerly boundary of Parcel 1), are described in Reception 81490, Reel 342 of L.C.O. Deed Records The Easterly boundary boundary of Parcel 1 is described from the E¼ Cor Westerly and Southerly, Thence following a fence erected on said line to point parallel with and 60 feet distant from the East R/W of Baker Road to Wallace Creek Road and terminating of said E¼ R/W line.

GRANTOR: LEE GOODMAN

GRANTEE: JACK C. PEARCE AND JOYCE A. PEARCE, HUSBAND AND WIFE

FOR VALUABLE CONSIDERATION, receipt and sufficiency of which is hereby acknowledged, Grantor LEE GOODMAN hereby grants, transfers, and conveys to Grantee JACK C. PEARCE and JOYCE A. PEARCE, husband and wife, their heirs, successors, and assigns, a perpetual, nonexclusive easement to use the entire roadway known as R.R. Baker Road (the Roadway), upon the terms and conditions hereinafter set forth, which Roadway is a strip of land 40 feet in width, the centerline of which is described as follows:

SEE EXHIBIT A ATTACHED HERETO AND INCORPORATED HEREIN BY REFERENCE.

1. This easement is not personal or in gross but is to be appurtenant to each and every portion of the following described property owned by Grantee:

SEE EXHIBIT B ATTACHED HERETO AND INCORPORATED HEREIN BY REFERENCE.

2. This easement is granted over and across property owned by Grantor in Lane County, Oregon described as follows:

SEE EXHIBIT C ATTACHED HERETO AND INCORPORATED HEREIN BY REFERENCE.

3. This grant is made upon the following terms:

3.1 Grantee is granted the right to use the 40-foot easement strip, including the existing Roadway, as a means of ingress and egress to and from the land described in Exhibit B, or any portion thereof. Grantee further is granted the right to use the described strip for the installation and maintenance of such public utilities as may be needed to serve the property described in paragraph 1, or any portions thereof. It is expressly understood that no rights outside the 40-foot easement strip are provided.

3.2 The use of the easement shall be limited as follows:

3.2.1 The easement and right-of-way shall be restricted to use of the property described on Exhibit

B attached hereto as a single residence and not for parcels created as a result of future subdivisions thereof without the prior written consent of Grantor;

3.2.2 The easement and right-of-way may be used for residential purposes only. ~~including, but not limited to, vehicular and pedestrian ingress and egress, the hauling of logs related to removal of timber for fire, disease and insect control and landscaping activities occurring on the property described in Exhibit B attached hereto~~. It is expressly understood that use of the easement and right-of-way for commercial purposes shall not occur without the prior written consent of Grantor;

3.2.3 Grantee shall not significantly widen or change the present location of the existing Roadway without the prior written consent of Grantor; and

3.2.4 The removal of trees of commercial value from and activities causing substantial physical or economic damage to areas within the right-of-way, but outside the existing Roadway, shall not be undertaken by Grantee without the prior written consent of Grantor.

3.3 Any party may cause the right-of-way, or any portion thereof, to be maintained, repaired, or reconstructed. The party causing such maintenance, repair, or reconstruction work to be done shall pay for such work, and any party using the easement other than Grantor Lee Goodman shall be liable for contribution based on the relative use proportional to the total Roadway use; provided, however, heirs, successors, and assigns to Grantor Lee Goodman shall be liable for such contribution. Grantor shall pay the real property taxes on the easement strip, said tax payments to be deducted from Grantor's maintenance contribution obligations herein.

3.4 Grantor shall, at all times and without restriction, have the right to use the easement property and Roadway for purposes not inconsistent with the Grantee's full enjoyment of the rights herein granted.

3.5 The grant of this easement shall run with the land and shall be binding upon and inure to the benefit of the Grantor and Grantee and their respective heirs, successors, and assigns.

3.6 Each party shall indemnify and save the other party harmless from any liability, loss, or expense resulting from any claim for injury to person or property resulting from the party's use of the Roadway or use of

the Roadway by that party's agents and employees, any independent contractor hired by that party, and that party's permittees, invitees, licensees, and guests, unless that injury is caused in part by the other of the party's failure to contribute to the expense of maintaining the Roadway.

3.7 This easement is granted subject to all easements, reservations, restrictions, conditions, and encumbrances of record affecting the Roadway.

IN WITNESS THEREOF, Grantor has executed this Easement and Maintenance Agreement on this 22 day of August, 1991.

Exhibit 9

NIMPKISH, LLC
Forest Dwelling: Template Dwelling
Tax Lot 18-02-11-00-00506 (part of)

Applicant's Narrative

Applicant proposes to place a dwelling on the Subject Property pursuant to a Special Use Permit authorized under the Template Dwelling Test as provided in Lane Code 16.211.(3)(c)(i) and (iv).

The application demonstrates the soils of the Subject Property as being 53.98% Soil Type 107C, Philomath sic, 3-12% with a forestland capability of 45 cubic feet per acre per year. Under this soil capability the template test must show the presence of at least 3 parcels as they existed on or before January 1, 1993. The application demonstrates the existence of 11 parcels. Under the Template Dwelling process the application must substantiate the presence of 3 or more dwellings within the template area as being in existence on or before January 1, 1993 and continuing to exist. The application demonstrates the presence of 3 dwellings.

The application is accompanied by a letter from the Pleasant Hill-Goshen Fire and Rescue Department that followed a site inspection by Chief Andrew Smith. The letter from Chief Smith confirms the road proposal for the use of R. R. Baker Road as being adequate for firefighting purposes.

To: andrew.smith@pleasanthillfire.org

Chief Smith,
Thank you for taking the time to visit today. As we discussed on the phone, I have prepared an application for a Special Use Permit allowing a dwelling under the provisions of what is called the Template Test, this is the application we visited about on-site last month when you reviewed the access road.

As I shared with you today on the phone, part of the application addresses the following:
"Attach to this application objective information demonstrating evidence of compliance with Lane Code 16.211(8)(e), now referenced as Lane Code 16.211(6)(b)(i), including:
Itemized list of firefighting equipment. Obtain from the fire district (if applicable)."

In a previous telephone conversation with a member of your department I was advised you have the following equipment:
3 Water Tank Trucks. One of 2,500 gallons, one of 3,000 gallons and one of 3,500 gallons
5 Structural Engines (Pump Trucks), Two carrying 1,000 gallons, two carrying 750 gallons and one carrying 500 gallons
2 Type 6 Engines (commonly called Brush Trucks), One carrying 250 gallons and one carrying 300 gallons.

When we met at the property you confirmed this equipment was available to fight a fire on the subject property and also indicated your department has cooperating agreements with other fire departments in the area to assist if necessary.

I provided the above list of equipment to Lane County in our application, but they have deemed the application "incomplete." the staff planner has stipulated "It may be beneficial to supplement the statement (my statement in the application) with evidence directly from the fire district pertaining to the district's available firefighting equipment, such as a letter form the fire district..."

Would you please be so kind as to review the information I provided in the application, set forth above, and if this reflects the equipment your department has available for firefighting acknowledge this email as accurately depicting such equipment. I will print a copy of your response and include it with a supplement to our application.

Thank you for your continuing courtesies with this matter.

Andrew Smith <andrew.smith@pleasanthillfire.org> Mon, Apr 15, 2019 at 8:09 AM
To: Jim Belknap <jim.e.belknap@gmail.com>

Good Morning Jim,

Sorry for the delay in returning you email. You are correct with the expected response for a fire at the locations addressed above. This equipment is available from the nearby stations through our own agency and or support from Automatic aid. Should you need a further letter to verify this, let me know and I will be glad to assist.

The following list of inspections are required to be completed prior to occupying this mobile/manufactured home. It is recommended that the called inspections follow the order below.

NOTE: IF CONTINUOUS (STRIP) FOOTINGS ARE TO BE USED, THE MANUFACTURER'S INSTALLATION INSTRUCTIONS MUST BE ON THE JOB SITE AND AVAILABLE TO THE INSPECTOR TO RECEIVE AN INSPECTION AND APPROVAL FOR THE FOOTING - OR - THE FOOTINGS ESTABLISHED BY THE STATE OF OREGON MUST BE INSTALLED.

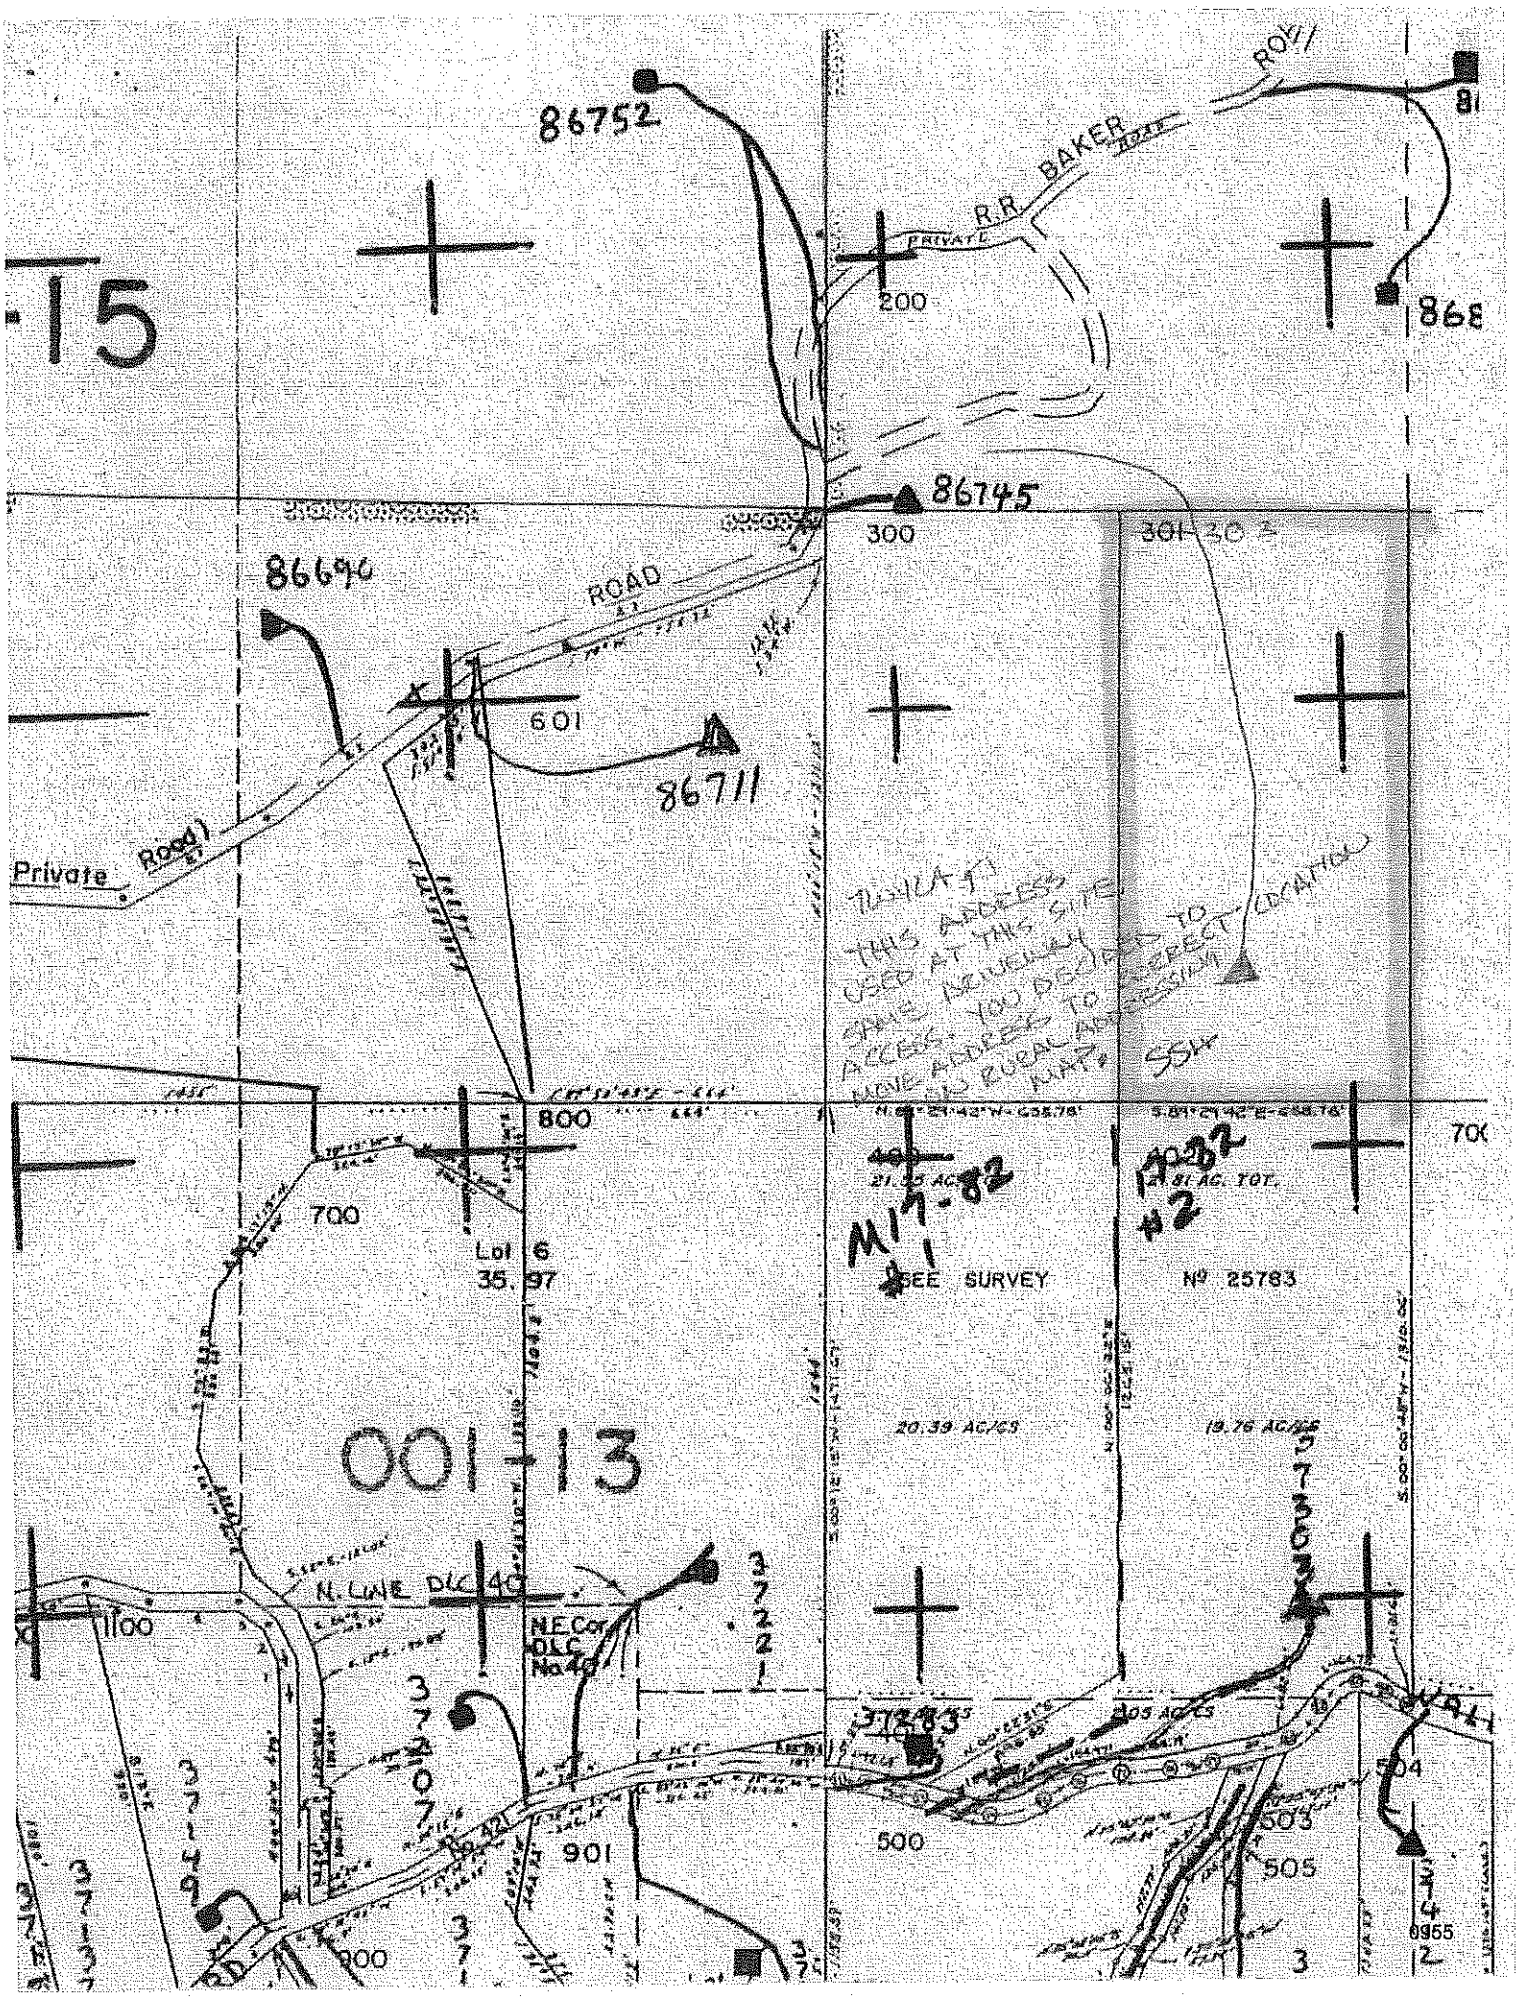
MOBILE HOME PLACEMENT INSPECTION

FINAL PLUMBING INSPECTION

SKIRTING INSPECTION

MH ELECTRICAL FEEDER INSPECTION

FINAL STATE ELECTRICAL INSPECTION



FINAL MOBILE HOME INSPECTION

Failure to secure an inspection within 180 days of the date issued - or - if the inspections lapse more than 180 days, prior to receiving final approval to occupy the mobile/manufactured home, will cause your permit to expire by limit. A new permit will then be required for the placement of your mobile home.

NOTE: A SEPARATE FACILITY PERMIT IS NEEDED PRIOR TO CONSTRUCTING ANY WORK WITHIN THE RIGHT-OF-WAY OF A ROAD UNDER COUNTY JURISDICTION. THIS INCLUDES DRIVEWAY APPROACHES, CULVERTS, UTILITY PLACEMENT, ETC. CALL THE LANE COUNTY PUBLIC WORKS DEPARTMENT AT 341-6900 FOR INFORMATION.

CALL 687-4065 TO REQUEST AN INSPECTION.

Land Use Decision By The Planning Director
Within The
Non-Impacted Forest Land Zone

Department File No.:	**PA 98-5159**
Property Owner:	**Rocky Quinn**
Agent:	**Same**
Property Address:	**86711 RR Baker Road Springfield, Oregon 97478**
Zoning:	**Impacted Forest Lands F2/RCP**
Map & Tax Lot Numbers	**18-02-11 TL 601**

Proposal: Planning Director Approval to allow a Replacement Residence at the same location on the property (expanded footprint) within the Impacted Forest Land Zone, F2/RCP.

General description of the property and the structure for which a "Lawfully Established Dwelling" verification is being requested:

The subject property is approximately 20 acres in size and located at 86711 RR Baker Road, Springfield, Oregon #97478. According to the records reviewed in the Land Management property files, a valid mobile home placement permit was issued for the subject property and received a final inspection on February 24, 1982. According to the applicant's submittal, the mobile home has remained on the property and occupied from 1982 until the present date. Mobile Home Placement Permit 81-2367 validates the applicant's submittal.

The subject parcel is currently designated Forest Land in the Lane County Rural Comprehensive Plan and is Zoned Impacted Forest Land, F2/RCP, consistent with that designation. The owner's of the property intends to replace the residence at the same development site (expanded footprint) as the previous residence and the replacement residence will be connected to the existing sewage disposal system. The replacement site will not require the removal of any commercial timber species or disturbance of an agricultural area under cultivation.

See the attached plot plan with the location of the structure drawn on it.

The purpose of this report is to verify if the above referenced structure complies with the requirements of ORS 660 Division 33 and Lane Code 16.210 and therefore qualifies as a "lawfully established dwelling" with rights for alteration, repair or replacement. Based on the findings in this report, the above referenced structure:

x **Is a "lawfully established dwelling" with rights for alteration, repair and replacement. An explanation of what the rights for alteration, repair and replacement entail is included at the end of this report.**

☐ **Is not a "lawfully established dwelling" with rights for alteration, repair and replacement.**

1. **The above referenced structure has been "lawfully established" as a dwelling. "Lawfully established" is interpreted to mean that at the time the dwelling was established, its establishment complied with any zoning and land use regulations applicable to the subject property or its establishment predated any zoning and land use regulations applicable to the subject property.**

   The subject property is currently zoned Impacted Forest Land, F2/RCP. Because the residential use of the property was established legally with the placement of a legal mobile home (BP81-2367) and because the mobile home has remained on the property until the present date, this request meets the requirements of OAR 660-06-025(3)(p) and the residence (mobile home) in question qualifies as lawfully established with rights for replacement at the same exact location (expanded footprint) on the property.

2. **The above referenced structure has intact exterior walls and roof structure.**

   The applicant's statement is accepted as evidence that the residence (mobile home) in question has in tact exterior walls and a roof structure.

3. **The above referenced structure has indoor plumbing consisting of a kitchen sink, toilet and bathing facilities connected to a sanitary waste disposal system.**

   The applicant's statement is accepted as evidence that the residence in question has indoor plumbing, a kitchen sink, a toilet and bathing facilities connected to a sanitary waste disposal system. Final inspection on the sewage disposal system was completed on December 4, 1981.

4. **The above referenced structure has interior wiring for interior lights.**

   The applicant's statement is accepted evidence that the residence in question has wiring for interior lighting.

5. **The above referenced structure has a heating system.**

   The applicant's statement is accepted as evidence that the residence had central heating.

Prepared By: _____ **Date:** 9/30/98

Exhibit "A"

Conditions: PA 98-5159 **Lawfully Established SFD**

Approval of this request is supported by findings of fact that establish compliance with all applicable criteria of Lane Code 16.211 and OAR 660 Division 33. This Planning Director Decision is subject to the following conditions of approval:

1. Approval of Permit PA 98-5159 will be valid for a two year period from the final date of approval of September 30, 1998. Lane County may grant an extension period of up to 12 months if: (a) An applicant makes a written request for an extension of the development approval period; (b) The request is submitted to the county prior to the expiration of the development approval period; (c) The applicant states reasons that prevented the applicant from beginning or continuing development within the approval period; (d) The county determines that the applicant was unable to begin or continue development during the approval period for reasons which the applicant was not responsible. Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision. Additional one year extensions may be authorized where applicable criteria for the decision have not changed.

2. Any proposed placement or construction permit for a dwelling or mobile home on the subject property shall be submitted to the Building Official within the two-year time period authorized in Condition #1 above. In the event the legal owners fail to apply for a building permit within the two-year period the development rights conditionally allowed by PA98-5159 shall cease unless the legal owners have complied with the extension provisions in Condition #1 above.

3. The proposal must meet all applicable building codes and Department of Environmental Quality requirements for on site sewage disposal requirements.

4. A new residence or mobile home shall have a fire retardant roof.

5. If the mobile home or residence has a chimney, the chimney shall have a spark arrester.

6. The existing, lawfully established dwelling shall be removed from the parcel within 90 days following the final inspection for legal occupancy of the replacement dwelling by the Building Official.

7. Applicant shall contact Don Nickell for the required Fuel Break Inspection as per 98-5160 682-3989.

DEED

MARVIN G. DENNIS and DONALD J. McKENDREE, Grantors, convey to ARNE V. WILJANEN and BETTE J. WILJANEN, husband and wife, as Grantees, all of Grantors' right, title and interest in and to that parcel of real property in Lane County, Oregon described in Exhibit A which is attached hereto and by this reference expressly incorporated herein.

This deed is a conveyance absolute in effect as well as in form and conveys all of Grantors' right, title and interest and to the real property described above to the Grantees and does not operate as a mortgage, trust conveyance or security of any kind.

This deed does not effect a merger of the fee ownership and a lien of the fee ownership and the lien of the mortgage from Jeffry W. Powell to Arne V. Wiljanen and Bette J.Wiljanen, husband and wife, dated April 21, 1981, recorded April 22, 1981, Reel No. 1132, Reception No. 81-17512 in Lane County Oregon Records. The fee and lien shall hereafter remain separate and distinct.

By acceptance of this deed, Grantees convenant and agree that they will forebear taking any action whatsoever against Grantors, other than by foreclosure, on a certain mortgage from Jeffry W. Powell in favor of Grantees, dated April 21, 1981, recorded April 22, 1981, at Reel No. 1132, Reception No. 81-17512, in Lane County, Oregon, given to secure a certain promissory note for the sum of $32,000. Further, Grantees agree not to seek, obtain or permit a deficiency judgment against Grantors, their heirs or assigns, such rights and remedies being hereby waived.

Without limiting the generality of the foregoing conveyance, it is the specific intent of Grantors to, and Grantors do hereby convey, surrender, waive and relinquish to Grantees any equity of redemption and statutory rights of redemption concerning the real property and mortgage described above.

Grantors are not acting under any misapprehension as to the legal effect of this deed, nor under any duress, undue influence or misrepresentations of Grantees, their agents or attorneys or any other person.

The true and actual consideration for this transfer is other value 30750001 12/12/83 REC 16.00

RE: Report and Verification of a Legal Lot

Tax Map: 18-02-11-00 Taxlot: 300 (revised 50.1 acre parcel)

A more exact description by reference to Deed or Land Sales Contract Is Document No. 2007-049979; 2007-049980; and 2007-049981

Based upon the Findings provided in this report, the above referenced property **constitutes a preliminary legal lot**. A legal lot means:

1. Ownership to this property may be conveyed with the assurance that such a conveyance would not require approval by Lane County land division regulations; and
2. Upon the completion of the "Final Notice" process, Lane County will recognize this property as a legally separate unit of land for the purposes of development. Nevertheless, development will still be subject to applicable zoning, sanitation, access, and building regulations.

(A **Preliminary Legal Lot Determination** establishes the legality of the creation of this unit of land. Lane County makes no claim as to ownership, title or boundary location).

Findings

1. The subject property was revised as a separate parcel on July 23 2007

   See attached instrument(s) Document No. 2007-049979; 2007-049980; and 2007-049981

2. The creation of the subject property as a separate parcel complied with all effective land division, zoning and comprehensive plan regulations, and it therefore constitutes a legal lot:

   a. Land division regulations:

   ☒ There were land division regulations in effect governing the creation of this parcel, and the creation of this parcel was specifically exempted by these regulations from compliance because This property line adjustment is allowed per O.R.S. Chapter 92 for 4 legal lots. The original parcel, TL 300, has been determined to be a final legal lot by the Lane County Planning Department, see the preliminary legal lot verification on PA# 04-5478, and notice of the final legal

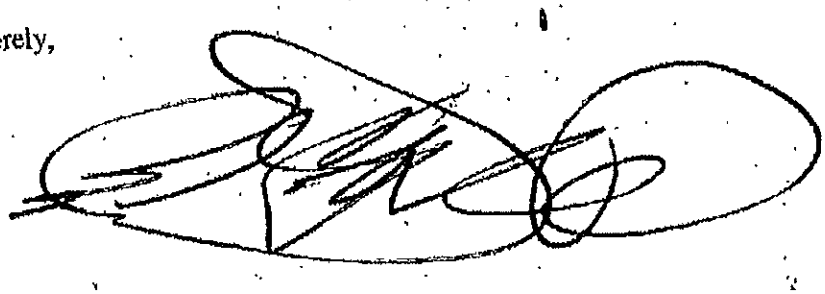
lot on PA# 05-5303. The other parcels that are affected by the property line adjustment are as follows: TL 400, has been previously determined to be a legal lot, see the preliminary legal lot verification on PA# 04-5480, and notice of final legal lot on PA# 05-5303; TL 1100 of Map No. 18-02-10, has been previously determined to be a legal lot, see the preliminary legal lot verification on PA# 04-5489, and notice of final legal lot on PA# 05-5303; and TL 200, has been previously determined to be a legal lot, see the preliminary legal lot verification on PA# 04-5476, and notice of the final legal lot on PA# 05-5303. All of the parcels met the Land Use Laws in effect at the time of their creation.



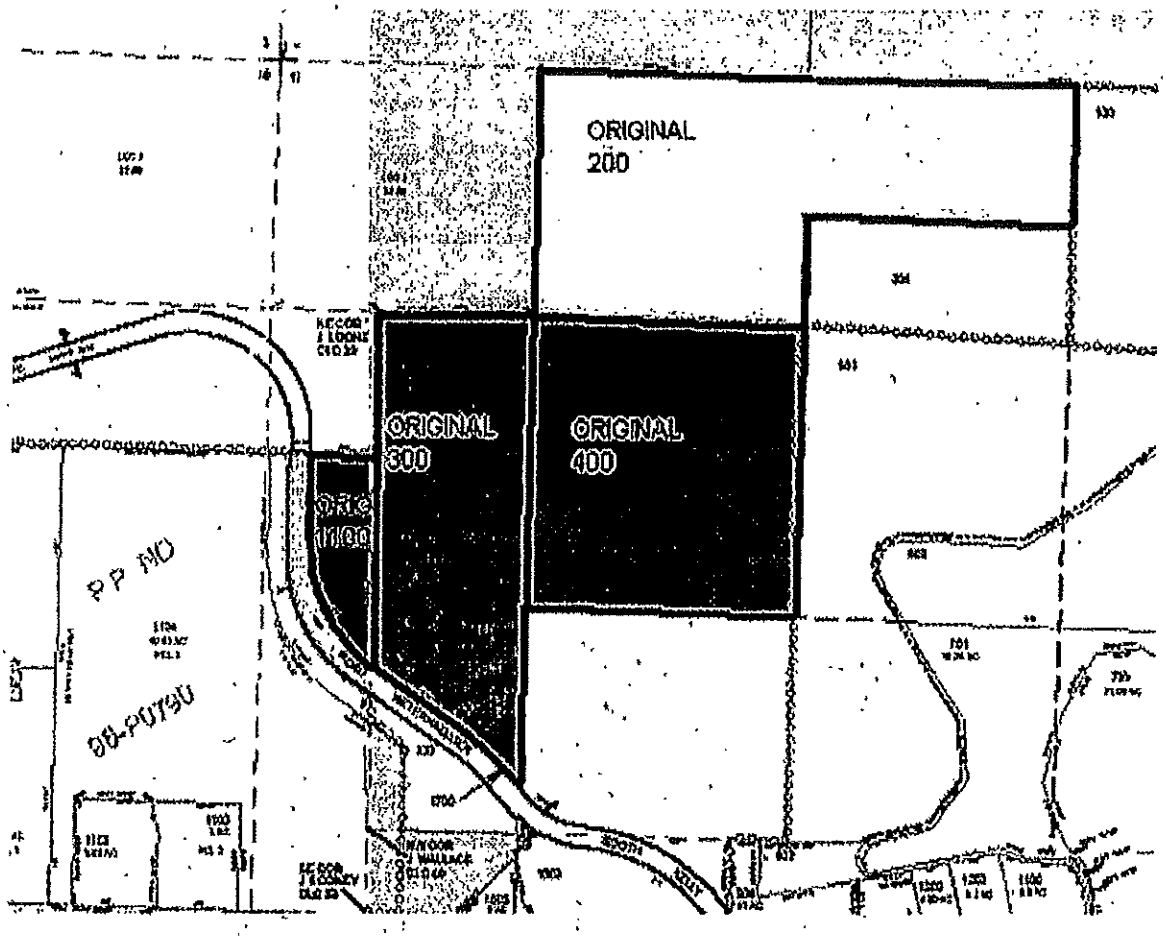
b. Zoning regulations:

☒ When the subject parcel was created, there were the following zoning regulations in effect which the parcel complied with because the original and revised parcel is substandard to the F-2 zone. Lane County Planning Department policy allows property line adjustments of substandard parcels to remain substandard, therefore this revised parcel meets the zoning requirements.

c. Additional Comments:
The requirements of the State Law for Property line adjustments per O.R.S. Chapter 92 have been completed. Enclosed are copies of the recorded Property line Adjustment documents. No survey is required because the affected parcels are both over 10 acres in size, per O.R.S. Chapter 92. There does not appear to be access. Please contact the Lane County Planning Department for more information on the access issue.

This Legal Lot Verification report is a **preliminary** indication that the above referenced property, as further designated on the enclosed map, is preliminarily a legal lot. The final legal lot decision will be made at the time of "Application for Notice," which is a notice that is sent to adjacent property owners per L.C. 13.020. Please be aware that if the boundary of this preliminary legal lot changes by the time a permit or application requiring a legal lot is submitted, then a new Legal Lot Verification will be required."

Sincerely,



D. G. NICKELL, P.L.S.O.

DECLARATION OF PROPERTY LINE ADJUSTMENT

This Declaration of Property Line Adjustment is the second in a series of four (2 of 4) property line adjustments recorded to relocate the boundaries between six commonly owned parcels of land, OWNED BY JAMES A. SMEJKAL.

The purpose of the second property line adjustment is to move a common boundary line between Parcel 3 and Parcel 4 according to Lane County Land Use Regulations and ORS 92.190.

The deed reference for Parcel 3 is the deed recorded June 2, 1871 on Book H Page 332 Lane County, Oregon Deed Records. Parcel 3 was determined to be a legal lot by Lane County Planning Action Number PA 04-5480.

The deed reference for Parcel 4 is the warranty deed recorded February 9, 1914 on Book 102, Page 573 Lane County, Oregon Deed Records. Parcel 4 was determined to be a legal lot by Lane County Planning Action Number PA 04-5478.

Following this property line adjustment the legal description for Parcel 3 is described on Exhibit 'A'.

Following this property line adjustment the new adjusted boundary between Parcel 3 and Parcel 4 is underlined on the description of Parcel 3 attached as Exhibit 'A'.

A sketch of this adjustment is attached as Exhibit 'B'.

DECLARATION OF PROPERTY LINE ADJUSTMENT

This Declaration of Property Line Adjustment is the third in a series of four (3 of 4) property line adjustments recorded to relocate the boundaries between six commonly owned parcels of land, OWNED BY JAMES A. SMEJKAL.

The purpose of the third property line adjustment is to move a common boundary line between Parcel 4 and Parcel 5 according to Lane County Land Use Regulations and ORS 92.190.

The deed reference for Parcel 4 is the deed recorded February 9, 1914 at Book 102 Page 573 Lane County, Oregon Deed Records as adjusted by the previous step two of this series property line adjustment recorded this date.

The deed reference for Parcel 5 is the warranty deed recorded July 14, 1893 at Book 37, Page 203 Lane County, Oregon Deed Records. Parcel 5 was determined to be a legal lot by Lane County Planning Action Number PA 04-5489.

Following this property line adjustment the legal description for Parcel 5 is described on Exhibit 'A'.

Following this property line adjustment the new adjusted boundary between Parcel 4 and Parcel 5 is underlined on the description of Parcel 5 attached as Exhibit 'A'.

A sketch of this adjustment is attached as Exhibit 'B'.

DECLARATION OF PROPERTY LINE ADJUSTMENT

This Declaration of Property Line Adjustment is the fourth in a series of four (4 of 4) property line adjustments recorded to relocate the boundaries between six commonly owned parcels of land, OWNED BY JAMES A. SMEJKAL.

The purpose of the fourth property line adjustment is to move a common boundary line between Parcel 4 and Parcel 6 according to Lane County Land Use Regulations and ORS 92.190.

The deed reference for Parcel 4 is the deed recorded February 9, 1914 at Book 102, Page 573 Lane County, Oregon Deed Records as adjusted by the previous steps 2 and 3 of this series property line adjustment recorded this date.

The deed reference for Parcel 6 is the warranty deed recorded August 12, 1922 at Book 132, Page 519 Lane County, Oregon Deed Records. Parcel 6 was adjusted by a previous property line adjustment recorded this same date as Lane County Reception No. 2007-49977.

Following this property line adjustment the legal description for Parcel 4 is described on Exhibit 'A' and the legal description for adjusted Parcel 6 is described on Exhibit 'B'.

Following this property line adjustment the new adjusted boundary between Parcel 4 and Parcel 6 is underlined on the description of Parcel 6 attached as Exhibit 'B'.

A sketch of this adjustment is attached as Exhibit 'C'.

RE: Report and Verification of a Legal Lot
Tax Map: 18-02E-10.00 Taxlot: 1100 (APPROX. 4.9 ACRE PARCEL)

A more exact description by reference to Deed or Land Sales Contract is BOOK 37 PAGE 703.

Based upon the Findings provided in this report, the above referenced property constitutes a legal lot, which means:

1. Ownership to this property may be conveyed with the assurance that such a conveyance would not require approval by Lane County land division regulations; and
2. Lane County recognizes this property as a legally separate unit of land for the purposes of development. Development would still be subject to applicable zoning, sanitation, access and building regulations.

Findings

1. The subject property was created as a separate parcel on JULY 14 1893
See attached instruments BOOK 37 PAGE 703

2. The creation of the subject property as a separate parcel complied with all effective land division, zoning and comprehensive plan regulations, and it therefore constitutes a legal lot:

a. Land division regulations:

[X] When the subject parcel was created, there were not land division regulations in effect to govern its creation. Lane County did not adopt applicable regulations for this kind of division until MARCH 7TH 1975.

[ ] There were land division regulations in effect governing the creation of this parcel, and the creation of this parcel was specifically exempted by these regulations from compliance because _____

Lane County
Public Works
LAND MANAGEMENT DIVISION

b. Zoning regulations:

[X] When the subject parcel was created, there were no zoning regulations in effect at this time. The zoning for this property was adopted on NOV. 12 1975.

[ ] When the subject parcel was created, there were the following zoning regulations in effect which the parcel complied with because _____

c. Additional Comments:

THIS LEGAL LOT IS FOR THAT PORTION OF THE LAND THAT IS NORTH AND EAST OF THE WEYERHAEUSER ROAD, BEING THE LAND DESCRIBED IN THE WEYERHAEUSER ROAD WAS ESTABLISHED ON FEB. 27 1897 AS A 120 FOOT WIDTH, SEE DEED 354, PAGE 170. THIS LEGAL LOT DOES NOT APPEAR TO CONTAIN ANY LEGAL ACCESS.

"This is a preliminary indication that the above referenced property, as further designated on the enclosed map, is a legal lot. The decision that this property constitutes a legal lot will be made at the time of the first permit or application action where a legal lot is required. If the boundaries of this legal lot have changed at the time of a permit or application which requires a legal lot, a new Legal Lot Verification will be required."

Sincerely,

D. G. NICKELL P.L.S.O.

NOTICE OF A LAND USE DECISION
BY THE LANE COUNTY PLANNING DIRECTOR

LAND MANAGEMENT DIVISION
http://www.LaneCounty.org/PW_LMD/

Department File:	PA# 05-5303 & PA# 04-5476 (LLV) PA# 04-5477 (LLV); PA# 04-5478 (LLV); PA# 04-5479 (LLV); PA# 04-5480 (LLV); PA# 5484 (LLV); PA# 04-5485 (LLV); PA# 04-5486 (LLV); PA# 04-5487 (LLV); PA# 04-5488 (LLV); PA# 04-5489 (LLV); PA# 04-5490 (LLV); & PA# 04-5491
Property Owners:	James Smejkal
Applicant:	Land Planning Consultants
Assessor's Map & Tax Lot:	18-02-10-00 Tax Lots 1100; 18-02-11-00, Tax Lots 200, 300, 400, and 1600; 18-02-15-00, Tax Lots 100 and 1799

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information, and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: Request for a Director Approval of a final legal lot verification per Lane Code Chapter 13.020.

Enclosed is a Assessment and Taxation map or Survey Map of the subject property and surrounding properties.

LEGAL LOT VERIFICATION (No property line adjustment)

Land division laws effective on: May 2, 1962 June 4, 1970 X March 26, 1975

DIAGRAM OF THE LEGAL LOTS

see additional page for diagram

This legal lot verification does not approve any development. In accordance with LC 13.010 and LC 13.020, a legal lot verification is "A determination that a unit of land was created in conformance with the Lane Code and other applicable law." This legal lot verification identifies a unit of land that was created in conformance with the applicable county and state laws.

WARRANTY DEED

THIS INDENTURE WITNESSETH: That C. Bardwell and Margaret E. Bardwell, husband and wife, the grantors, for and in consideration of the sum of ten dollars to them paid, do hereby bargain, sell and convey unto Charles E. Wethered and Ebba M. Wethered, husband and wife, the grantees the following described premises, towit:

CT-21041 AM

All of the following lying east of County Road No. 266: The south half of the southwest quarter of section 2, the southeast quarter of the southeast quarter of section 3, lot 1 in section 11, lot 7 in section 10, also commencing at the northeast corner of John C. Looney Donation Land Claim No. 39, in section 11, running thence north 89° 41' west 47.78 chains, thence west to a point north of the northwest corner of lot 4, in section 9, thence south to the northwest corner of said lot 4, thence east 97.78 chains, thence north 10.70 chains, more or less to the place of beginning, all in township 18 South Range 2 West of the Willamette Meridian, in Lane County, Oregon. Also lot 6 in section 10, lots 2, 3, and 4 in section 9, and commencing 10.70 chains north of the easterly southeast corner of the John Smith Donation Land Claim No. 48, in section 10 and running thence north 27.05 chains, thence west to the west line of said claim, thence south on the west line of said claim, to a point west of the place of beginning, thence east to the place of beginning. Also beginning on the west line of said Donation Land Claim No. 48, at the northeast corner of lot 9 in section 9, running thence south 20 chains, thence east to the east line of the all of said D. L. C. No. 48, thence north 20 chains, thence west to the place of beginning, all in township 18 South of Range 2 West of the Willamette Meridian, in Lane County, Oregon. Except from the above described property that certain tract conveyed to Oregonian Railroad Company by deed recorded Aug. 27, 1890, at page 163 of vol. 25 Lane County Oregon Deed Records. Also except that certain tract conveyed to The Oregon and California Railroad Company by deed recorded March 27, 1891 at page 255 of vol. 29 Lane County Oregon Deed Records. Also except the following described premises towit: Beginning at a point on the west line of the John Smith Donation Land Claim No. 48, in township 18 South Range 2 West of the Willamette Meridian, 37.25 chains south of the northwest corner of said claim, and running thence south along the west line of the claim, 29.18 chains, more or less, to a point 30 feet south of the northeast corner of lot 9 of section 9, of same township, thence east 30 feet, thence north 29.18 chains, more or less, to a point due east of the point of beginning, thence west 30 feet to the place of beginning. All in Lane County, Oregon.

TO HAVE AND TO HOLD the said premises, with their appurtenances, unto the said Grantees, their heirs and assigns forever.

And the said Grantors do hereby covenant to and with the said grantees their heirs and assigns that they are the owners in fee simple of said premises; and that they are free from all incumbrances and that they will warrant and defend the same from all lawful claims whatsoever, except a mortgage to The Federal Land Bank of Spokane, recorded Nov. 28, 1939 at page 286 of vol. 89 Lane County Oregon Mortgage Records, to secure the payment of a note for $5000.00, also except a mortgage to Land Bank Commissioner, recorded Nov. 28, 1939 at page 174 of vol. 91 Lane County Oregon Mortgage Records, to secure the payment of a note for $3000.00.

Verification and Replacement of a Lawfully Established Dwelling in the Same Location within the (F2/RCP) Impacted Forestland Zone

Report Date:	May 7, 2001
Department File:	PA 01-5596
Property Owner:	Jerod K. & Susan J. Reeder
Applicant:	Jerod K. & Susan J. Reeder
Property (Mailing) Address:	86752 RR Baker Road, Springfield, OR 97478-9542
Assessor's Map:	18-02-11 **Tax Lot:** 100
Acreage:	40 acres
Base Zone:	Impacted Forest Land (F2)
Combining Zone:	None
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)
Staff Planner:	Bill Sage, 541/682-3772

I. PROPOSAL

Administrative Approval to allow a Replacement Dwelling within the Impacted Forest Zone (F2), as authorized by Oregon Administrative Rule (OAR) 660-06-0025(3)(p).

II. BACKGROUND INFORMATION

A request to replace a dwelling in the Impacted Forest Zone (F2) was submitted to the Lane County Land Management Division on May 1, 2001. The subject property is located southwest of RR Baker Road. The 40 acre parcel has an active site address of 86752 RR Baker Road, Springfield, OR 97478-9542. The property is designated Forestland in the Lane County Rural Comprehensive Plan and is zoned Impacted Forest Zone (F2/RCP), consistent with the designation.

The property is currently developed with a single-family dwelling, garage, driveway and septic system. The applicant proposes to replace the exiting dwelling in approximately the same location. The replacement dwelling will be located approximately 568 feet, 500 feet, 687 feet and 659 feet from the Northern, eastern, southern, and western boundaries respectively.

III. APPROVAL CRITERIA & FINDINGS OF FACT

The purpose of this report is to verify if the above referenced structure complies with the requirements of OAR 660-06-025(3)(p), and therefore qualifies as a "lawfully established dwelling" with rights for alteration, repair or replacement. "Lawfully established" is interpreted to mean that at the time the dwelling was established, its establishment complied with any zoning and land use regulations applicable to the subject property or its establishment predated any zoning and land use regulations applicable to the subject property. The code language is in **boldface** type, followed by the Findings of Fact.

OAR 660-06-025(3)(p): A lawfully established dwelling is a single family dwelling which:
(A) Has intact exterior walls and roof structure;
(B) Has indoor plumbing consisting of a kitchen sink, toilet and bathing facilities connected to a sanitary waste disposal system;

(C) Has interior wiring for interior lights; and
(D) Has a heating system;

Based on Lane County Land Management Division, the subject dwelling was placed on the property in 1958 prior to requirements for a Lane County building permit. Lane County Assessment and Taxation records verify that the dwelling was inspected/appraised by LC AT&T in 1978. The dwelling has been occupied continuously since that time. Based on these records and the applicant's submittals, the dwelling provides the basic living improvements listed above.

The subject property was zoned Farm-Forestry (FF-20) in 1976. In 1984, the property was re-zoned to its current zoning of F2. The establishment of the subject mobile home occurred prior to the current zoning and would have complied with the earliest regulations in 1976.

Because the establishment of the dwelling in question appears to have complied with zoning and land use regulations applicable to the subject property, and because it provides the required basic living improvements, the application is consistent with the criteria. The dwelling in question qualifies as lawfully established with rights for replacement.

OAR 660-06-025(3)(p) In the case of replacement, the dwelling to be replaced shall be removed, demolished, or converted to an allowable use within three months of the completion of the replacement dwelling.

The applicant has indicated the dwelling will be burned by the local RFPD as a practice burn. The applicant shall provide a letter from the RFPD attesting to the fact that the structure was destroyed on a particular date. Or, if the structure is not burned, the dwelling shall be demolished within three months of the authorization by the Lane County Building Official for occupancy of the replacement dwelling. The demolition would require a permit authorized by the Building Official.

Siting Standards

LC 16.211(8)(a) Property Line Setbacks: The proposal meets all property line setbacks, and is therefore consistent with this standard.

LC 16.212(8)(c) Class I Stream Riparian Setback Area: No Class I streams are located within 100 feet from the existing dwelling. Therefore, the proposal is consistent with this standard.

LC 16.244, Floodplain (/FP) requirements: The replacement dwelling site is not located with a flood hazard area.

LC 16.005(4), Sensitive Bird Habitat Protection: The subject property is not identified as unique wildlife habitat site. Therefore, the proposal is consistent with this standard.

ORS 215.418, Wetlands: The site of replacement dwelling site does contain mapped wetlands or waterways as indicated on the National Wetlands Inventory Map Springfield 4.

IV. DECISION

The findings above demonstrate that this application for replacement of a lawfully established residence meets the provisions and criteria of OAR 660-06-025(3)(p) and is subject to all conditions of approval.

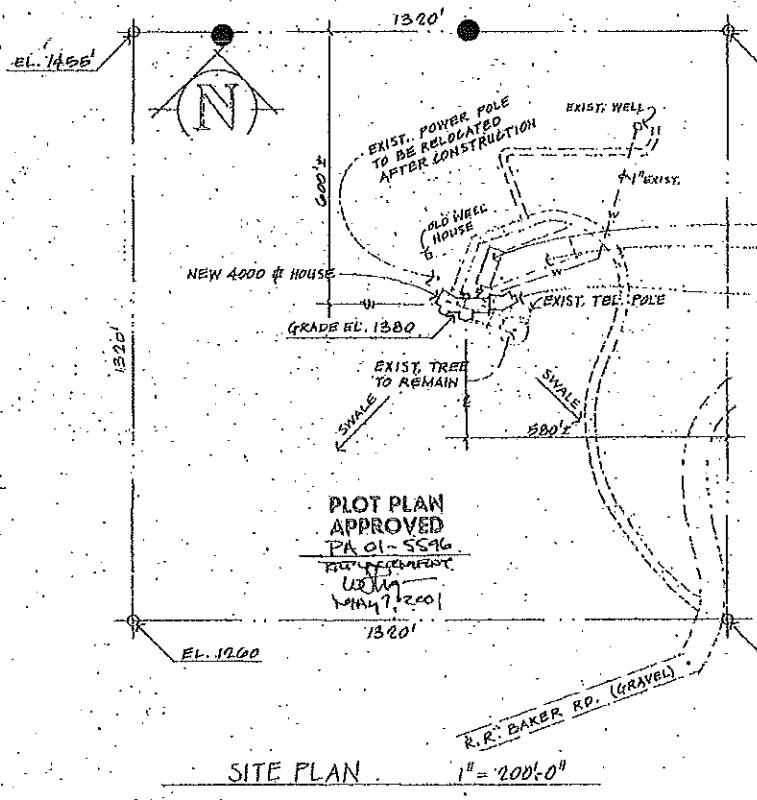
CONDITIONS OF APPROVAL
PA 01-5596

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of Permit **PA 01-5596** is valid for a two-year period from May 7, 2001, the final date of approval until May 7, 2003, the expiration date of this approval. Lane County may grant one extension period of up to 12 months if:
   (a) An applicant makes a written request for an extension of the development approval period;
   (b) The request is submitted to the county prior to the expiration of the development approval period;
   (c) The applicant states reasons that prevented the applicant from beginning or continuing development within the approval period;
   (d) The county determines that the applicant was unable to begin or continue development during the approval period for reasons that the applicant was not responsible.

   Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision. Additional one-year extensions may be authorized where applicable criteria for the decision have not changed.



2. The dwelling location shall be as represented by the applicant's written statement the approved plot plan dated May 7, 2001 unless modified by the Planning Department.

3. The existing dwelling must be removed within 90 days of three months of the completion of the replacement dwelling.

4. The replacement dwelling must meet all applicable building and sanitation requirements.

5. For informational purposes, it is the applicant's responsibility to secure any other applicable local, state, or federal authorizations.

Good evening, Attached is a Hearings Official order to modify the open record periods for the Oakridge Airport King template dwelling appeals. The revised open record period deadlines are also pasted below.

March 18, 2021: First open record period
April 1, 2021: Responses to materials submitted during first open record period
April 8, 2021: Final rebuttal by applicant

Shawna Adams | Senior Planner
Lane County | Land Management Division

Re: Order--Open Record Period in PA 20-05066 and 20-05064 (King/EJK Investments)

Dear Shawna:

At the public hearing on this matter on March 4, 2021, I announced the scheduled open record period as follows:

March 11, 2021: First open record period
March 18, 2021: Responses to materials submitted during first open record period
March 25, 2021: Final rebuttal by applicant

The applicant has since requested that the open record period be extended as follows:

March 18, 2021: First open record period
April 1, 2021: Responses to materials submitted during first open record period
April 8, 2021: Final rebuttal by applicant

LandWatch Lane County has agreed to the request.

Accordingly, the open record period is revised as set forth above. Please provide notice to the parties of this Order.

Sincerely,

Anne C. Davies
Lane County Hearings Official

Re: King and EJK Inv.; Reissue Expired Director's Decision for Template Dwellings; PA 20-05066 and PA 20-05064, Map 21-35-07-30, TL 2800 and 2900

Ms. Davies:

These decisions were appealed on a single issue: LUBA's recent decision addressing Big Game density. *LandWatch v. Lane County*, ____ Or LUBA ____ (2021)(LUBA No. 2020-030)(*Nimpkish*).

I. Background

TL 2800 is 13.28 acres of vacant F-2 land located adjacent to the Oakridge airport. TL 2900 is 12.05 acres of vacant F-2 land located adjacent to the Oakridge airport. Both are located within Major Big Game habitat. TL 2900 is adjacent to Impacted Big Game habitat.

Policy 15(c) of the Lane County RCP Goal 4 Forest Lands element acknowledges that there are a significant number of forest properties in Lane County less than 80 acres in size, and that those properties are more likely to be impacted and thus zoned F-2. Exhibit B. LC 16.211 does not have a minimum lot size for template dwellings. As such, the Code acknowledges that properties zoned F-2 can be developed with a template dwelling regardless of size, if template test requirement are met. Thus, the RCP and its implementing ordinance acknowledge that parcel size is not a limiting factor for template dwelling development. Both of these documents were acknowledged by LCDC.

Policy 11 of the Lane County RCP Goal 5 Flora and Fauna element, states:

> *"Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range*

> *through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resources zoning program."* (emphasis added)

The Flora and Fauna Working Paper ("Working Paper") of the RCP states,

> *"ODFW has recommended overall densities for Peripheral Big Game Range at one dwelling unit per 40 [acres]; for Major Big Game Range at one dwelling unit per 80 acres. Therefore, to restate the conflict: overall residential density greater than *** one dwelling unit/80 acres in Major Range conflicts with habitat for big game."* (emphasis added)

In *Nimpkish*, LUBA determined that it was irrelevant that the County had not divided the County into "regions" consistent with Policy 11 and the Working Paper,

> *"*** the county's failure to take the steps of identifying regions and basing zoning by region on either overall residential densities or ODFW minimum parcel size recommendations does not mean that the county is absolved from protecting land included on the Big Game Habitat Inventory as Major Big Game Range through the residential density recommendations referred to in the RCP Goal 5, Flora and Fauna Policy 11, or that the density recommendations simply do not apply. Rather *** Policy 11 remains operative, and it provides that "[a]ny density above [the ODFW-recommended density] limit shall be considered to conflict ***." Pg 13.*

The end result is that if overall density exceeds one dwelling per 80 acres in Major Big Game Range areas, then a conflict exists and an ESEE analysis must be done. If overall density does not exceed one dwelling per 80 acres, then there is no conflict and no further analysis is needed.

II. Development of the subject property does not result in an overall density that exceeds one dwelling per 80 acres.

The acreage of the subject property is irrelevant to this analysis. The focus is on the "overall" density.

In response to *Nimpkish*, our office commissioned a Major Big Game Density report from Lane Council of Governments (LCOG). Exhibit A. Based on that report, there are 2,571,426 acres of Major Big Game in Lane County[1]. There are 3,137 existing dwellings within that Major Big Game area. As such, the overall density is 1 dwelling per 819 acres. This density is significantly lower than ODFW recommendations.

[1] When Major Big Game was originally digitized, exclusions required by the RCP were not omitted (Metro Plan, UGB area and Developed and Committed Areas). The LCOG report refines that digitized layer to omit the required exclusions.

While reviewing the Major Big Game mapping for the entire County, we noticed that the I-5 corridor is largely mapped as Impacted and Peripheral Big Game Range, which results in a break in range continuity. Exhibit A, Map 1. Further, while larger big game species can conceivably cross a 4 to 6 lane interstate with a median, it seems unlikely that they often do, and so the corridor also serves as a potential physical deterrent. Given that continuity provides the ability to roam freely, and that such freedom of movement is a major element of habitat, it seems logical that the I-5 corridor might serve to divide the county into two Major Big Game regions[2]. Further, a division along the I-5 corridor would be "convenient for planning purposes." Flora and Fauna Working Paper, page 25. To be thorough, we requested that LCOG analyze each region (East and West) independently. Based on that analysis, the overall density of East Lane County is one dwelling per 1,435 acres; and the overall density of West Lane County is one dwelling per 406 acres. Both are significantly lower than ODFW recommendations.

In Summary:

The subject properties are located east of I-5. Based on the above analyses, whether viewed as a whole or as a region, many more residences can be added in the Major Big Game Range before exceeding the ODFW density standard. The proposed additional of two dwellings will not result in the East region (or the Major Big Game Range area as a whole) exceeding ODFW overall density standards. The addition of two dwelling does not change the overall density. In fact, the addition of 100 homes to the entire Major Big Game Range would only increase density to 1 dwelling per 794 acres. Based on the above, there is no conflict. No ESEE analysis is required.

Sincerely,
/s/ *Kimberly JR O'Dea*
Kimberly J.R. O'Dea

Exhibits:

A: LCOG Major Big Game Report dated March 2, 2021
B: RCP and Working Paper excerpts
C: *Nimpkish* LUBA decision

[2] Within those two Major Big Game regions, there would also be additional Peripheral Big Game regions that are not relevant here. Those regions could also be identified based on continuity/proximity. A cursory review of the Peripheral Big Game overlay shows roughly 6-8 regions. There would be additional Impacted Big Game regions. As such, the applicant's approach results in a number of regions that is consistent with what is anticipated in the Flora and Fauna Working Paper, page 25.

Report - Major Big Game Range in Lane County RCP

There were three objectives for the analysis:

1. Determine the acreage of the Major Big Game Range within Lane County's Rural Comprehensive Plan outside of Metro Plan, UGB's and Developed and Committed Areas.
2. Identify the number of dwellings that fall within that amount of acreage.
3. Determine the overall density of dwellings per acre.

ESRI GIS software and geoprocessing tools in combination with various data (see sources below) was used to perform the analysis, which included filtering specific data both spatially and tabularly.

The acreage within the study area was calculated from the digitized boundary layer of the Major Big Game Range. This acreage was then refined by subtracting acreage that was found to be within the Metro Plan, UGB's and Developed and Committed Areas. Analysis was also performed separately for the east and west parts of the County as the Major Big Game Range is not contiguous across the lands within and adjacent to the I-5 corridor.

Spatial and tabular filters were applied to the Lane County's Rural Plan Designation layer, specifically, those designated Residential, Commercial, or Industrial. All lands that have a plan designation of R, C or I that are outside of UGB's and the Metro Plan boundary by necessity must be within a Developed and Committed Lands Exception (D&C) Area to receive that Plan designation. All areas within a D&C Area are considered Impacted Big Game Range (per Lane County RCP Goal 5 Flora and Fauna Policy #10) and not Major Big Game Range. Therefore, any of the D&C areas that lie within the digitized boundary layer of the Major Big Game Range were excluded from the total acreage calculation. Since there is no specific digitized layer for D&C areas outside of the Metro Plan, the only way to identify and exclude these lands was to utilize the Rural Plan Designation layer.

Tabular filters were also applied to the regional address layer to determine residential dwellings outside of exclusion areas. Specifically, only addresses with a HUD/BPR residential use code (D,K,M,N,S,Q) were used. The official reference for the HUD/BPR codes (also commonly known as the SLUCM codes) is the Standard Land Use Code Manual from the Urban Renewal Administration, Bureau of Public Roads published in 1965. The coding scheme has been modified in its details to meet the local needs of Lane County. Address points are almost always located where the structure/dwelling exists, and there may be instances where a portion of a given parcel or property is within an exclusion area, while the dwelling is not.

EXHIBIT A

Analysis Results (acreage values are as mapped):
Total Acres (land & water) in Lane County = 2,955,953
Major Big Game Range in Lane County (no exclusions) = 2,596,120 acres

Map 1:
Major Big Game Range in Lane County with exclusions = 2,571,426 acres
Residential Addresses (dwellings) outside of exclusion areas = 3,137
Overall Density = 1 dwelling / 819 acres

Map 2:
Major Big Game Range in Lane County east of I-5 with exclusions = 1,818,537 acres
Residential Addresses (dwellings) outside of exclusion areas and east of Interstate 5 = 1,285
Overall Density = 1 dwelling / 1,415 acres

Map 3:
Major Big Game Range in Lane County west of I-5 with exclusions = 752,889 acres
Residential Addresses (dwellings) outside of exclusion areas and west of Interstate 5 = 1,852
Overall Density = 1 dwelling / 406 acres

EXHIBIT B 1

GOAL 4: FOREST LANDS

1. Conserve forest lands by maintaining the forest land base and protect the state's forest economy by making possible economically efficient forest practices that assure the continuous growing and harvesting of forest tree species as the leading use on forest land consistent with sound management of soil, air, water, and fish and wildlife resources and to provide for recreational opportunities and agriculture.

   Forest land shall include lands which are suitable for commercial forest uses including adjacent or nearby lands which are necessary to permit forest operations or practices and other forested lands that maintain soil, air, water, and fish and wildlife resources.

2. Forest lands will be segregated into two categories, Non-impacted and Impacted and these categories shall be defined and mapped by the general characteristics specified in the Non-Impacted and Impacted Forest Land Zones General Characteristics.

3. Forest lands that satisfy the requirements of ORS 197.247 (1991 Edition), may be designated as Marginal Lands and such designations shall also made in accordance with other Plan policies. Uses and land divisions allowed on Marginal Lands ands shall be those allowed by ORS 197.247 (1991 Edition).

4. Forest operations, practices and auxiliary uses shall be allowed on forest lands subject only to such regulation of uses as are found in the Oregon Forest Practices Act, ORS 527.722.

5. Prohibit residences on Non-Impacted Forest Lands except for the maintenance, repair or replacement of existing residences.

6. Dwellings shall be allowed in the Impacted Forest Land (F-2/RCP) Zone District as provided in OAR 660-06.

7. The minimum land division size for the Nonimpacted Forest Lands (F-1/RCP) Zone and the Impacted Forest Lands (F-2/RCP) zone shall comply with OAR 660-06.

8. New structures must comply with the Siting and Fire Safety Standards of OAR 660-06-029 and 660 06-035.

9. Recreational activities in the Park and Recreation (PR/RCP) Zone District within resource areas that are outside lands for which a built or committed exception to a Statewide Planning Goal has been taken shall be limited to those uses consistent with Statewide Planning Goals 3 and 4.

10. The effects of a projected shortfall in timber supplies within the near future are of considerable concern to Lane County. The County supports efforts by state and federal agencies in developing plans that will address the situation. The County intends to be an active, committed participant in such plan development.

11. Encourage the consolidation of forest land ownership in order to form larger more viable forest resource units.

12. Encourage the conversion of under-productive forest lands through silvicultural practices and reforestation efforts.

13. Encourage the development of assistance programs, tax laws, educational programs and research that will assist small woodland owners with the management of their forest land.

14. Lane County recognizes that the Oregon Forest Practices Act sha11 be the only mechanism regulating the growing and harvesting of forest tree species on commercial forest lands unless Goal #5 resource sites have been recognized and identified as being more important through an analysis of ESEE consequences and conflict resolution as per Goal #5. No other findings, assumptions, goal policy or other planning regulation shall be construed as additional regulation of forest management activities.

15. Lands designated within the Rural Comprehensive Plan as forest land shall be zoned Non-Impacted Forest Lands (F-1, RCP) or Impacted Forest Lands (F-2, RCP). A decision to apply one of the above zones or both of the above zones in a split zone fashion shall be based upon:

    a. A conclusion that characteristics of the land correspond more closely to the characteristics of the proposed zoning than the characteristics of the other forest zone. The zoning characteristics referred to are specified below in subsections b and c. This conclusion shall be supported by a statement of reasons explaining why the facts support the conclusion.

    b. Non-impacted Forest Land Zone (F-l,RCP) Characteristics:
        (1) Predominantly ownerships not developed by residences or nonforest uses.
        (2) Predominantly contiguous, ownerships of 80 acres or larger in size.
        (3) Predominantly ownerships contiguous to other lands utilized for commercial forest or commercial farm uses.
        (4) Accessed by arterial roads or roads intended primarily for forest management. Primarily under commercial forest management.

    c. Impacted Forest Land Zone (F-2, RCP) Characteristics:
        (1) Predominantly ownerships developed by residences or nonforest uses
        (2) Predominantly ownerships 80 acres or less in size.
        (3) Ownerships generally contiguous to tracts containing less then 80 acres and residences and/or adjacent to developed or committed areas for which an exception has been taken in the Rural Comprehensive Plan.

(4) Provided with a level of public facilities and services, and roads, intended primarily for direct services to rural residences.

GOAL FIVE: OPEN SPACES, SCENIC AND HISTORIC AREAS AND NATURAL RESOURCES

Historical Resources

1. A group known as the "Lane County Historic Resource Committee" is to be established and given permanent status by the Board of County Commissioners. The Committee shall represent a wide array of historical interests and the interests of property owners. Its tasks shall include: general concern with historical matters in the County; to monitor conditions affecting such resources; to devise criteria and methods for the selection of newly-designated historical resources; to advise the staff and officials of the County on proposed new historical sites and structures; to oversee the administration of the Historic Structures or Sites ordinance; and other related tasks and duties. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

2. The County shall administer the "Historic Structures or Sites" section of Lane Code Chapter 10 as a means of protecting historic resources. These regulations shall be applied to all sites contained in list of "Historic Structures or Sites" referenced by the ordinance, which are sites deemed significant by the County, and therefore meriting protection from conflicting uses by a limitation of such conflicting uses.

3. The Goal 5 conflict resolution process (OAR 660-16-000 through 660-16-025) which has been applied in the selection of historical sites and structures contained in the General Plan and implemented through the "Historic Structures or Sites" ordinance, shall continue to be applied, where appropriate, to historic sites and places prior to regulation of them.

4. The County shall seek to enlist voluntary compliance with individual landowners in the addition of their property as historical sites, and landowners shall be notified of Public Hearings, including information about inclusion as a Historical Site.

5. The County shall encourage its own agencies, and communities within the County, to emphasize their historical, geographic and other unique qualities.

6. The County shall review proposals for development or changes in land use for possible impacts with designated historical sites. When proposed development or land use changes will cause harm or degradation of a designated site, such effects shall be mitigated in a satisfactory manner.

7. The County shall continually develop and refine, through review, and update, its inventory of historic sites and resources. A long-term objective shall be in the inclusion of historical sites in the County's geo-data system.

8. The County shall take advantage, where practical, of state and federal programs to assist in the identification and protection of historical resources, including the use of financial assistance from these programs.

8. Encourage farm and forestry use of aggregate land prior to extraction; minimize negative environmental impacts during extraction; require reclamation after extraction which is compatible with adjacent uses.

9. Lane County shall apply the appropriate district (SG, SG/CP, /QM) to the sites listed in Appendix "J" of the Mineral and Aggregate Working Paper. Those sites with potential conflicts shall be placed in the SG/CP or QM/SR Districts.

10. Sites for which not enough information is presently available to determine quality, quantity and conflicts with other uses which include those sites listed in Appendix "F" of the "Mineral and Aggregate Working Paper, shall be considered " Significant" in terms of OAR 660- 16-000 through 660-16-025, but requiring that the Goal 5 evaluation process be delayed (the "1B" option). At such a time as it is clear that these sites will be needed within the county's advance framework, they shall be evaluated per the Goal 5 rule including conflict analysis and implementation of protective measures. Such evaluation will take the form of Plan amendment or revision studies. Notwithstanding the above schedule, all "1B" sites will be evaluated within five years of the date of this Policy adoption. These sites are included herein as Goal #5 Mineral and Aggregate Exhibit A.

11. Mineral and aggregate extraction activities within the Willamette Greenway shall comply with the requirements of Statewide Planning Goal 15 (Willamette Greenway). Significant fish and wildlife habitat areas shall be protected in accordance with sections C.3.d. and C.3.i. of the Goal. The provisions of the Lane County Greenway Plan and implementing regulations shall be used to this purpose.

Flora and Fauna

1. Implement construction, development and other land use activities which significantly alter natural systems only after evaluation of effects on wildlife habitats and natural areas.

2. Recognize existing federal and state programs protecting threatened or endangered fish and wildlife species.

3. Through the use of County regulations including zoning, seek to minimize the adverse impacts of land use changes on sensitive species (those susceptible to significant population declines resulting from habitat modification).

4. Public agencies are encouraged to work with landowners to conserve wildlife habitats.

5. Lane County shall investigate fee acquisitions, easements, cluster developments, preferential assessment, development rights acquisition and similar techniques to protect Goal 5 resources.

6. Riparian vegetation along all Class I streams in the County is recognized as being of high value for many purposes, notably wildlife habitat and streambank stabilization. Riparian lands shall be defined as the lands within 100 feet of ordinary high water on Class I streams, and shall be

000/025); "3C" protection of the riparian resource shall be achieved through development setbacks and vegetation management regulations within the riparian strip. The setback distance will vary from 100 feet from ordinary high water in rural resource zones to 50 feet from ordinary high water in developed and committed areas; provided a means is made available for review and modification of these requirements where it can be demonstrated that an unduly restrictive burden would be placed on the property owner or, that riparian vegetation does actually extend all the way into the 50 foot or 100 foot setback to the location of the proposed improvements.

Such review and modification shall be spelled out in the zoning districts affected, and shall involve consultation with officials of the Oregon Department of Fish and Wildlife.

7. Because of incomplete County coverage by, and interpretation of, the National Wetlands Inventory, wetland resources are to be considered "significant" in terms of OAR 660-16-000/025 and placed in "1B" and "1C" categories. Major wetlands designated "1C" resources shall be protected per the "3C" option through a combination of existing County Coastal and Greenway zoning regulations, and federal; state ownership; where these do not occur, an appropriate wetlands zoning district shall be developed and applied. Other wetlands from the National Wetlands Inventory shall be evaluated per "1B" requirements within two years of the date of Plan adoption, and decisions made on the protection or use of the resource. The County shall consider enlarging the list of protected wetlands per Goal 5 requirements if it is clearly demonstrated that an unprotected significant wetland(s) is likely to be significantly impacted by a land use action over which the County has jurisdiction. (Modification in process)

8. Sensitive Fish and Waterfowl Areas as identified in the 1983 Revision the Flora and Fauna Working Paper, shall be considered "significant" "1C" resources per OAR 660-16-000/025, and protected per "3C" requirements through protection of riparian and wetland resources as described in the above Policy statement.

9. Residential building permits issued within Major or Peripheral Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna, and as revised and updated in 1983, shall include an indication of that Range and a note that compatibility problems, such as damage to vegetation, may occur.

10. Lands with an acknowledged exception as "built upon or committed" will be treated as Impacted Big Game Range, as identified in the 1982 Lane County Working Paper on Flora and Fauna and as revised and updated in 1983.

11. Oregon Department of Fish and Wildlife recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with Oregon Department of Fish and Wildlife officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similiar activities which are already a part of the County's rural resources zoning program.

12. If uses are identified (which were not previously identified in the Plan) which would conflict with a Goal 5 resource, an evaluation of the economic, social, environmental and energy consequences shall be used to determine the level of protection necessary for the resource. The procedure outlined in OAR 660-16-000 will be followed.

13. In its program of protecting "1C" resources, the County shall make maximum practical use of existing land use regulations (e.g., Willamette Greenway Permit, Coastal Resources Zoning overlays, rural forest and agricultural resource zones)to achieve such protection. Duplication of existing standards shall be avoided wherever practicable, provided County-determined Goal 5 and OAR 660-16-000/025 objectives are met.

14. A group known as the "Lane County Flora and Fauna Committee" is to be established and given permanent status by the Board of County Commissioners. The committee shall represent a wide array of environmental interests and the interests of property owners. Its tasks shall include: evaluation of LCDC Goal 5 concerns and resources, development of information to help the County comply with OAT 660-16-000/025 ("Goal 5 Rule"), research and provision of resource site data to the County, and response to work in progress. Outputs of the Committee shall be presented to the Planning Commissions and subsequently to the Board of County Commissioners.

15. Currently known pigeon springs, heron and rapor (hawk, osprey and eagle) nest sites shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. Lane County shall consider enlarging the list of significant nest sites whenever information about additional sites becomes available. The significant nest sites shall be those identified by Jim Greer and Jim Hutchison (Department of Fish and Wildlife biologists) in a 12/20/83 letter to Jim Mann (Senior Planner, Lane County Land Management Division), and these sites shall be incorporated into the Lane County General Plan Policies document as Flora and Fauna Exhibit A.

16. Rare and endangered vascular plants, identified in a 1/8/84 list prepared by the Native Plant Society of Oregon shall be considered significant in terms of OAR 660-16-000/025 and shall be placed in a "1B" category and evaluated per "1B" requirements within two years of the date of plan adoption. This list of rare and endangered vascular plants is included into the Lane County General Plan Policies document as Flora and Fauna Exhibit B.

17. Lane County recognizes that Douglas fir old growth stands provide valuable and unique wildlife habitat and will encourage the Forest Service and Bureau of Land Management to maintain acreage in this age class sufficient to ensure viable populations of dependent wildlife species.

Open Space and Scenic Areas

1. Lane County has determined that all resource lands in the County are also open space lands. Resource related activities shall prodominate on these lands. Where proposals are developed land uses are made consistent with the Comprehensive Plan and Statewide Goals, development standards shall be applied which minimize loss of open space.

WORKING PAPER:

Flora & Fauna

DRAFT

MAR ~ 1982

COMPREHENSIVE PLAN REVISION

LANE COUNTY, OREGON

EXHIBIT B 2

FLORA AND FAUNA WORKING PAPER

INTRODUCTION

Oregon's wildlife and fish resources are varied and abundant. Lane County alone with its large land area and highly diverse landscape from snow level to sea level provides numerous specialized habitat areas for more than 290 species of birds, 70 mammal, 13 reptile, 17 amphibian and over 50 fish species. This diversity also is apparent in the vegetation of the County from coastal salt spray meadows inland to the treeless crests of the Cascade range.

Inventories of fish and wildlife species were compiled from Oregon Department of Fish and Wildlife information, various environmental assessment or impact statements and the Eugene-Springfield Metropolitan Area Wildlife Study. These lists are presented in the appendix to this report.

Inventories of habitat types are presented on USGS maps at a scale of one inch equaling one mile (15-minute series). This shows unique, endangered or threatened sites such as eagle nests, snowy plover sites, heron rookeries, band-tailed pigeon mineral springs, osprey snags and northern spotted owl sites. Further, major and Peripheral Big Game Range and general riparian vegetation around Class I streams are shown on these maps. Noncoastal wetlands and Sensitive Fish and Waterfowl areas are depicted on other maps.

The USGS maps also show general locations of Nature Conservancy sites and sites inventoried by the Oregon Natural Area Preserves Advisory Committee (NAPAC) which are in Lane County's Inventory.

Statewide Planning Goal #5 - Open Spaces, Scenic and Historic Areas, and Natural Resources - requires consideration of numerous resources, among them fish and wildlife habitat, ecologically and scientifically significant natural areas and wetlands.

Wetlands are considered here as fish and wildlife habitat. Although they have many valuable functions, their habitat value is a primary one. The original list of ecologically and scientifically significant areas included 86 sites from the Nature Conservancy Inventory and 12 sites from the Natural Area Preserves Advisory Committee. These are further refined in this paper.

Several deficiencies in Lane County's treatment of fish and wildlife habitats and natural areas were noted by LCDC. These were:

1. Updated inventory information required for sensitive fish and waterfowl areas and noncoastal wetlands.

2. Provide more specific information on Nature Conservancy Inventory sites.

3. Adopt mandatory policies regarding the protection of natural areas and noncoastal wetlands and clarify this with existing policies that encourage drainage projects.

001761

4. Adopt implementing measures for the protection and/or resolution of conflicts with noncoastal wetlands, natural areas and the following types of fish and wildlife habitat: big game range, riparian areas and sensitive fish and waterfowl areas.

After these orders to comply were written, LCDC adopted administrative rule 660-16-00 which gives very specific procedures for evaluating Goal 5 resources. The administrative rule applied to Lane County due to the continuance status of the County. Therefore, this paper addresses the items set out in the orders to comply and does so in the format of OAR 660-16-00. Specifically, this rule requires that when conflicts to Goal 5 resources can be anticipated in the plan, the economic, social, environmental and energy (ESEE) consequences of the conflict are analyzed and resolution to the conflict proposed. In cases where a resource is considered significant but conflicts cannot be anticipated, procedures are established to analyze conflicts as they are identified.

The contents of this paper are as follows:

A. General Findings. Concise statements summarizing facts on Lane County's flora and fauna resource and potential impacts of certain land use activities.

B. Habitat Types. A description of the 12 habitat types found in Lane County.

C. Endangered or Threatened and Special Concern Species. A listing of the threatened or endangered species found in the County and special habitat requirements for some of them.

D. Habitats of Particular Concern. Location, quality and quantity information and conflict analysis for the following types of habitat:

Riparian vegetation
Noncoastal wetlands
Sensitive fish and waterfowl
Big game range

E. Natural Areas. Location, quality and quantity of the sites on the Nature Conservancy and NAPAC lists determined to be significant, including conflict analysis.

F. Policy Recommendations.

G. Appendices. Includes lists of species.

FINDINGS

1. Lane County's fish and wildlife resource is highly varied. Diverse habitats, ranging from coastal to alpine, support nearly 400 vertebrate species. Status of individual species extends from common to endangered.

2. Four physiographic provinces - coast, coast range, western interior valleys and western Cascades - are found in Lane County. Each province represents differences in climate, substrate, topography and other physical

001762

and chemical variables. Each is distinct and represents a unique diversity, supporting flora and fauna which are adapted to the region.

3. Twelve distinct wildlife habitats are found in Lane County: estuary and bay (includes subtypes coastal salt marsh, tidelands and eelgrass), inland marsh, lakes and reservoirs, wet meadows, annual and perennial grasslands, riparian vegetation, coastal shore pine/spruce, Douglas fir/trailing blackberry, true fir/alpine, deciduous hardwoods, agricultural lands and cities.

4. Lane County's fish and wildlife resource provides substantial social, economic and ecological values.

5. A diversity of habitats is required to maintain Lane County's fish and wildlife fauna. Distribution of many species is limited by specialized habitat requirements.

6. Coordination between Lane County and state and federal agencies is necessary to properly harmonize wildlife needs and other resource values.

7. There will be a continuing need to review and update fish and wildlife inventory information.

8. Numerous land use activities have the potential to diminish the quality and quantity of fish and wildlife habitat. Habitat losses for a broad spectrum of fish and wildlife continue to occur. Sound resource management is necessary to minimize this loss.

9. Lack of biological information for many species handicaps the development of management procedures such as habitat guidelines.

10. Species not presently endangered or threatened may become so if their habitats are not adequately protected.

11. Examples of habitats of special value to fish and wildlife include high quality riparian and wetlands areas, estuaries, Major and Peripheral Big Game Ranges and other sensitive, fragile or unique areas.

12. Protecting water quality and quantity is vital to fish and wildlife resources.

13. A majority of certain habitat types and major watersheds lie within federal ownerships in Lane County. Therefore, public land managers have prime responsibility for protection of these habitats and watersheds. Where private lands support certain habitats, County land use planning needs to take into consideration wildlife needs, Statewide Planning Goal objectives and the rights and management objectives of the private landowner.

14. Land use activities which could negatively impact fish and wildlife habitat if uncontrolled include:

    a. Conversion of agricultural and forest lands to other uses;

001763

b. Division of large tracts of farm and forest lands to small parcels;

c. Field burning, fencerow clearing, wetland drainage and certain other agricultural practices;

d. Careless or unplanned road construction;

e. Gravel extraction from streambeds.

f. Logging and road building activities which do not conform strictly to the Oregon Forest Practices Act.

15. Designated natural areas in Lane County provide examples of unique or outstanding habitat or species assemblages.

BIG GAME RANGE

LCDC Orders to Comply required implementing measures for the protection and/or resolution of conflicts with Big Game Range. The County must clarify the types of uses which conflict with big game habitat, and would therefore be reviewable by the County under any implementing measures developed. The primary conflicting use mentioned by LCDC is residential use at certain densities.

Location. The Oregon Department of Fish and Wildlife (ODFW) has divided big game range in Lane County into three categories as follows:

> Major Big Game Range - That portion of the County which supports the majority of big game. In general these lands are sparsely developed commercial forest lands. They also provide the majority of big game recreational opportunity.
>
> Peripheral Big Game Range - Foothill areas of the County generally located between commercial forest lands and valley floors. These lands support substantial big game populations and serve as a wintering area for animals in severe winters.
>
> Impacted Big Game Range - Those areas of the County that have existing levels of land use which preclude future wildlife management options of maintaining viable wildlife populations and recreational opportunity. These areas frequently contain populations of big game animals.

These areas are mapped on Lane County Wildlife Inventory maps. As a general depiction, Major Big Game Range occurs on federal lands, large timber company holdings, and some private lands which are sparsely developed. Peripheral Big Game Range encompasses primarily foothills and smaller valleys. Impacted Range includes cultivated fields and developed areas, often on valley floors.

Because of the large amount of undeveloped timberland in Lane County, the majority of the County is Major Big Game Range. But, due to scattered ownership patterns, many areas within the Major Range are small, private parcels. Peripheral Range often falls along small valley floors which are privately owned and often fairly extensively developed. For example, most of the Fall Creek, Mohawk and Lorane valleys are within Peripheral Range, as well as large tracts of land west of Elmira.

Wildlife Inventory maps have not been included in this Working Paper due to budget constraints, but are available for review in the Planning Department office.

Quality. The majority of big game use occurs on Major Range. This can be considered the highest quality habitat as man's intrusion with developments is the least. Peripheral Range is also important habitat, and can be particularly crucial in severe winters, but has enough development to limit big game use and management options. Impacted Range is the lowest quality habitat of the three categories. It is already developed to an extent that precludes viable management of the species, although populations may still exist there.

001765

One other category of lands should be mentioned here. Outside Urban Growth Boundaries, areas exist which are committed to nonresource use. Exceptions for these areas will be taken as "Built Upon and Committed Lands" and acknowledged by LCDC. These small pockets of development within Major or Peripheral Range are essentially Impacted areas due to their level of use by man. They were not large enough, generally to include on the Big Game maps as Impacted. These areas will be treated as Impacted areas for implementation purposes.

Quantity. Areas of of Major, Peripheral and Impacted Big Game Range have not been computed. Figures for acreage of some other categories of land may be useful, though, for illustrative purposes.

Total amount of land in Lane County	2,959,400 acres
Commercial forest land (primarily Major Range)	1,813,228 acres
Other public lands (primarily Major Range, some Peripheral Range)	735,112 acres
Farms (primarily Impacted Range)	255,712 acres

Over 61 percent of the County is considered commercial forest land, a category with essentially no residential development. Including other public lands, such as the Dunes National Recreation Area, Oregon State lands, Corps of Engineers lands and County parks, approximately 85 percent of the County is not available for residential use. A good portion of the remaining acreage is farmland, a category very difficult to justify as available for residential use, but also not prime big game habitat.

Conflict Identification

The clearing of natural vegetation for agricultural purposes decreases an area's habitat value for big game. But since important, existing agricultural lands are already considered Impacted Big Game Range, this is not an issue now. Impacted Range has essentially been "written off" for big game management.

Management of land for timber production does not conflict with big game habitat. With proper forest management techniques, big game habitat can be significantly enhanced. The forage provided to deer and elk in clear-cut areas is very important, but the combination of areas in various successional stages is probably the vital factor in enhancing numbers of deer and elk. Lands zoned for the primary purpose of timber production are subject to the requirements of the Oregon Forest Practices Act. For our purposes, timber harvesting activities do not constitute a conflict to Big Game Range.

The primary conflict to big game, as mentioned earlier is residential use at certain densities. ODFW has recommended overall residential densities for Peripheral Big Game Range at one dwelling unit per 40 areas; for Major Big Game Range at one dwelling unit per 80 acres. Therefore, to restate the conflict: overall residential density greater than one dwelling unit/40 acres in Peripheral Range and one dwelling unit/80 acres in Major Range conflicts with habitat for big game.

The following paragraphs basically outline procedures to be used for implementation of the ODFW density recommendations in big game ranges. The premise is to work overall density figures into minimum lot size recommendations for regions of the County, rather than postponing the issue by referrals to ODFW for every land division application. The anticipated result is to base zoning

001766

by region on the overall residential densities or ODFW minimum parcel size recommendations, thereby creating no conflict with Goal 5.

The County will be divided into regions convenient for planning purposes. These have not yet been determined, but will probably result in 10-20 regions in the County.

Within these regions, determinations will be made of acreages, number of existing residences, and additional number of residences allowable to still fall within the overall density level. Built upon and committed areas are subtracted out, as they are treated as Impacted Range. From the figure of remaining residences and acreage, a residential carrying capacity will be determined. This figure, or the ODFW figure of 40 or 80 acres, whichever is lesser, will be recommended in the region for residential density for big game purposes. This, along with other resource land requirements will be used to determine appropriate zoning in an area.

If this figure is ever exceeded, it constitutes a conflict with Big Game Range. ESEE consequences must be determined and analyzed at that time. Prior to dividing the County into regions and making the above determinations, it is impossible to determine if conflicts will exist in any regions. The expectation, based on examining trial areas, is that the recommendations of ODFW can be incorporated without creating a conflict.

Special uses which may be allowed in resource zones have the potential of conflicting with Big Game Range. To preclude that conflict, criteria will be incorporated into the Special Use review considering the effect on big game. Recommendations will be requested from ODFW and considered as part of the review process.

As a final note regarding residences in Big Game Range, damage to landscaping and gardens is a common problem around these residences. For new residential building permits within Major and Peripheral Range, the applicant will be notified that compatibility problems with big game may exist.

Several recommendations in the Policies Section of this Working Paper relate to the method the County will use to protect Big Game Range.

01/22/21 AM 8:58 LUBA

BEFORE THE LAND USE BOARD OF APPEALS
OF THE STATE OF OREGON

LANDWATCH LANE COUNTY,
Petitioner,

and

1000 FRIENDS OF OREGON,
Intervenor-Petitioner,

vs.

LANE COUNTY,
Respondent,

and

NIMPKISH LLC,
Intervenor-Respondent.

LUBA No. 2020-030

FINAL OPINION
AND ORDER

Appeal from Lane County.

Sean Malone filed a petition for review and reply brief and argued on behalf of petitioner.

Andrew Mulkey filed a petition for review and reply brief and argued on behalf of intervenor-petitioner.

No appearance by Lane County.

Michael E. Farthing filed the response briefs and argued on behalf of intervenor-respondent.

EXHIBIT C

RYAN, Board Member; RUDD, Board Chair; ZAMUDIO, Board Member, participated in the decision.

REMANDED 01/21/2021

You are entitled to judicial review of this Order. Judicial review is governed by the provisions of ORS 197.850.

Opinion by Ryan.

NATURE OF THE DECISION

Petitioner appeals a decision by a hearings officer approving an application for a forest template dwelling.

MOTION TO INTERVENE

1000 Friends of Oregon (1000 Friends) moves to intervene on the side of petitioner. There is no opposition to the motion and it is allowed.

Nimpkish LLC (intervenor), the applicant below, moves to intervene on the side of the county. There is no opposition to the motion and it is allowed.

FACTS

Intervenor's property is approximately 10 acres in size and zoned Impacted Forest Land (F-2). The property includes slopes of over 40 percent in some areas. The property is included on the county's inventory of Major Big Game Range. Intervenor applied for a forest template dwelling, and the planning director approved the application. Petitioner appealed the planning director's decision to the hearings officer, who held a hearing on the appeal and issued a decision affirming the planning director's decision and approving the application. This appeal followed.

PETITIONER'S FIRST ASSIGNMENT OF ERROR/1000 FRIENDS' ASSIGNMENT OF ERROR

Statewide Planning Goal 5 (Natural Resources, Scenic and Historic Areas, and Open Spaces) (Goal 5) is "[t]o protect natural resources and conserve scenic

and historic areas and open spaces." OAR 660-015-0000(5). In order to implement Goal 5, local governments are required to "adopt programs that will protect natural resources." *Id.* The county's program to protect natural resources was acknowledged by the Land Conservation and Development Commission (LCDC) to comply with Goal 5 in 1984. The county's Goal 5 program includes a map and inventory of big game habitat determined to be "significant or important" within the meaning of *former* OAR 660-016-0000(1)(1C) (June 29, 1981) *renumbered as* OAR 660-016-0000(5)(c) (June 6, 1990) (Big Game Habitat Inventory). *Save TV Butte v. Lane County*, 77 Or LUBA 22, 40 (2018).[1] As noted, the subject property is included on the Big Game Habitat Inventory.[2]

The county's Goal 5 program also includes a Rural Comprehensive Plan (RCP) policy, the meaning and application of which is at the heart of the parties' dispute in this appeal. RCP Goal 5, Flora and Fauna Policy 11, provides:

"Oregon Department of Fish and Wildlife [(ODFW)]

---

[1] LCDC adopted Goal 5 in 1974. It adopted its first set of Goal 5 rules in 1981, which were codified at OAR chapter 660, division 16. Those rules were amended in 1990. In 1996, LCDC adopted a second set of Statewide Planning Goal 5 rules, which are codified at OAR chapter 660, division 23. Because LCDC acknowledged the county's program to protect natural resources in 1984, the 1981 rules applied. *See Delta Property Co., LLC v. Lane County*, 271 Or App 612, 616-19, 617 n 1, 352 P3d 86 (2015).

[2] The Lane County Wildlife Inventory maps were developed based on Oregon Department of Fish and Wildlife (ODFW) big game range maps and identify the location, quality, and quantity of big game range, identify conflicts with big game range, and explain how those conflicts are to be mitigated. Record 541-42.

> recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with [ODFW] officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resources zoning program."

RCP Goal 5, Flora and Fauna Policy 11, was developed in part by relying on a March 1982 Flora and Fauna Working Paper. The county (and DLCD) relied on the Flora and Fauna Working Paper as a background document to the RCP.[3]

During the proceedings below, petitioner and intervenor-petitioner (together, petitioners) argued that RCP Goal 5, Flora and Fauna Policy 11, applied to the application and that, because the density of the subject property with a forest template dwelling would be one dwelling unit per 10 acres, which

---

[3] The RCP characterizes the Flora and Fauna Working Paper as "background information * * * to be used to help interpret and understand [the RCP]." RCP Part 1(C). The Flora and Fauna Working Paper explains in more detail that that the ODFW residential density recommendations for Major Big Game Range were one dwelling unit per 80 acres:

> "The primary conflict to big game, as mentioned earlier is residential use at certain densities. ODFW has recommended overall densities for Peripheral Big Game Range at one dwelling unit per 40 [acres]; for Major Big Game Range at one dwelling unit per 80 acres. Therefore, to restate the conflict: overall residential density greater than one dwelling unit/40 acres in Peripheral Range and* * * one dwelling unit/80 acres in Major Range conflicts with habitat for big game." Record 542.

001772

would exceed the ODFW recommendations on overall density for protection of Major Big Game Range, the application could not be approved absent "resolution in accordance with OAR 660-16-000." The hearings officer concluded that RCP Goal 5, Flora and Fauna Policy 11, did not apply to intervenor's application for a forest template dwelling because that provision only applies to applications for a land division or a zone change:

> "Ultimately, the acknowledged zoning ordinance did not apply the Big Game limitations except in certain circumstances, such as in the Exclusive Farm Use Zone. And in that case only properties lying within a Major Big Game area were affected. No specific siting regulations for forest template dwellings located within a peripheral big game range were adopted by the acknowledged Chapter 16 zoning code. That is, the Big Game Range density standards were integrated into the zoning classifications and minimum lot size recommendations within the [F-2] Zone. The density recommendations were not applicable to existing parcels but were to be considered only in rezoning and land division applications. Therefore, the approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards." Record 10 (footnote omitted).

In reaching that conclusion, the hearings officer relied in part on a July 1984 Department of Land Conservation and Development (DLCD) staff report, prepared by DLCD when the county was seeking LCDC acknowledgement of its Goal 5 program.[4] According to the hearings officer, the DLCD staff report and

---

[4] The hearings officer found:

> "The DLCD staff report of July 19, 1984 indicates a concern with the minimum lot sizes in the resource zones coupled with a lack of

001773

the Flora and Fauna Working Paper demonstrate that the county intended that the primary method for achieving the recommended ODFW density standards was the creation of zoning areas, the adoption of minimum parcel sizes to implement the density standards, and the adoption of siting and clustering standards for new dwellings in the F-2 zone. The hearings officer also relied on testimony from two former county planners that RCP Goal 5, Flora and Fauna Policy 11, was intended only to apply to land divisions and zone changes. Record 9-10.

Petitioner's first assignment of error and 1000 Friends' sole assignment of error challenge the hearings officer's interpretation of the density

---

siting and clustering requirements. The minimum parcel size was the County's chosen method to comply with the ODFW recommended maximum densities. The recommended densities—one dwelling per 40 acres in the peripheral big game range—depended entirely on the size of the area being studied. When considering an 80-acre study area, the recommendation would only allow two dwellings. However, the recommendation was intended to apply at a much higher level; which is why the County originally anticipated dividing the County into regions. Ultimately, the County, with the blessing of DLCD and ODFW, decided to rely on minimum parcel sizes to implement the ODFW recommendations. This view is borne out in DLCD's staff report which stated: '*Without siting clustering requirements, the minimum lot sizes in the F-1, F-2 and E zones are half that recommended by ODFW (i.e., the minimum lot sizes would have to be doubled to be acceptable.)*' At this time, Lane County's proposal was to have a minimum lot size of 40 acres for the F-1 Zone, minimum lot size of 20 acres in the F-2 Zone, minimum lot size of 40 acres in the EFU Zone, and no clustering or siting standards for dwellings." Record 9 (emphasis in original).

recommendations referenced in RCP Goal 5, Flora and Fauna Policy 11, as being inapplicable to intervenor's forest template dwelling application.[5] Petitioners argue that the hearings officer's conclusion that the density recommendations were "integrated into the zoning classifications and minimum lot size recommendations within the [F-2] Zone" has no support in the provisions of the F-2 zone. Petitioners argue that the hearings officer failed to give any effect to the second sentence of RCP Goal 5, Flora and Fauna Policy 11, which, according to petitioners, prohibits the county from allowing residential density above the ODFW-recommended limits without first conducting an Economic, Social, Environmental, and Energy (ESEE) analysis under the applicable Statewide Planning Goal 5 rule. Petitioners argue that the hearings officer's interpretation contravenes ORS 174.010's prohibition on "insert[ing] what has been omitted."[6]

---

[5] OAR 660-006-0027(6)(a) provides, in relevant part, that "[a] proposed 'template' dwelling under this rule is allowed only if" "[i]t will comply with the requirements of an acknowledged comprehensive plan, acknowledged land use regulations, and other provisions of law." OAR 660-006-0025(6) provides that "[n]othing in this rule relieves governing bodies from complying with other requirements contained in the comprehensive plan or implementing ordinances such as the requirements addressing other resource values (e.g., Goal 5) that exist on forest lands."

[6] ORS 174.010 provides:

> "In the construction of a statute, the office of the judge is simply to ascertain and declare what is, in terms or in substance, contained therein, not to insert what has been omitted, or to omit what has been inserted; and where there are several provisions or particulars such construction is, if possible, to be adopted as will give effect to all."

Intervenor responds that, based on the testimony of the former county planners and the legislative history in the record regarding LCDC's acknowledgement of the county's Goal 5 program, the hearings officer correctly concluded that RCP Goal 5, Flora and Fauna Policy 11, does not apply to a forest template dwelling application for property inventoried as Major Big Game Range. In intervenor's view, the county's program to protect Major Big Game Range relies on the F-2 zone's minimum parcel size of 80 acres for new land divisions and clustering standards in Lane Code (LC) 16.211, but the LC includes no density standards for dwellings on existing parcels.

We review the hearings officer's interpretation of the RCP and the LC to determine whether the hearings officer "[i]mproperly construed the applicable law." ORS 197.835(9)(a)(D). In construing the law, we will consider the text and context of the law at issue in order to determine the intent of the enacting body. *PGE v. Bureau of Labor and Industries*, 317 Or 606, 610-12, 859 P2d 1143 (1993); *State v. Gaines*, 346 Or 160, 171-72, 206 P3d 1042 (2009). For the reasons explained below, we agree with petitioners that RCP Goal 5, Flora and Fauna Policy 11, applies to intervenor's application for a forest template dwelling on property included on the county's Big Game Habitat Inventory of Major Big Game Range.

First, the hearings officer's conclusion that RCP Goal 5, Flora and Fauna Policy 11, applies only where an application is for a land division or a zone change has no support in the text that policy or in any of the LC provisions

governing the F-2 zone. The plain language of RCP Goal 5, Flora and Fauna Policy 11, does not refer to or limit its application to land divisions and zone changes. Context provided by the Flora and Fauna Working Paper does not refer to or limit the county's Goal 5 program to applications for land divisions and zone changes.[7] For those reasons, we agree with petitioners that the text and

---

[7] The Flora and Fauna Working Paper explains:

> "The following paragraphs basically outline procedures to be used for implementation of the ODFW density recommendations in big game ranges. The premise is to work overall density figures into minimum lot size recommendations for regions of the County, rather than postponing the issue by referrals to ODFW for every land division application. The anticipated result is to base zoning by region on the overall residential densities or ODFW minimum parcel size recommendations, thereby creating no conflict with Goal 5.
>
> "The County will be divided into regions convenient for planning purposes. These have not yet been determined but will probably result in 10-20 regions in the County.
>
> "Within these regions, determinations will be made of acreages, number of existing residences, and additional number of residences allowable to still fall within the overall density level. Built upon and committed areas are subtracted out, as they are treated as Impacted Range. From the figure of remaining residences and acreage, a residential carrying capacity will be determined. This figure, or the ODFW figure of 40 or 80 acres, whichever is lesser, will be recommended in the region for residential density for big game purposes. This, along with other resource land requirements will be used to determine appropriate zoning in an area.

001777

context of RCP Goal 5, Flora and Fauna Policy 11, does not support the hearings officer's interpretation. Rather, the hearings officer's interpretation "insert[s] what has been omitted," in contravention of ORS 174.010, and gives no effect to the second sentence of RCP Goal 5, Flora and Fauna Policy 11. Moreover, a decision approving an application to divide or rezone land generally does not authorize any development, let alone residential development, but rather is the precursor to an application for future residential development. Thus, it is difficult to see how the ODFW density standards would apply to either of those types of applications at all, let alone apply *solely* to those types of applications.[8] Finally,

---

> "If this figure is ever exceeded, it constitutes a conflict with Big Game Range. ESEE consequences must be determined and analyzed at that time. Prior to dividing the County into regions and making the above determinations, it is impossible to determine if conflicts will exist in any regions. The expectation, based on examining trial areas, is that the recommendations of ODFW can be incorporated without creating a conflict.
>
> "Special uses which may be allowed in resource zones have the potential of conflicting with Big Game Range. To preclude that conflict, criteria will be incorporated into the Special Use review considering the effect on big game. Recommendations will be requested from ODFW and considered as part of the review process." Record 542-43.

[8] An application to rezone property could trigger OAR 660-023-0250(3)(b), which provides that a local government is required to apply Goal 5 to an application for a post-acknowledgment plan or land use regulation amendment (PAPA) only if "[t]he PAPA allows new uses that could be conflicting uses with a particular significant Goal 5 resource site."

the testimony of the former county planners on which the hearings officer relied is not particularly persuasive, given that it also is not supported by the text of RCP Goal 5, Flora and Fauna Policy 11, or any provision of the LC.

As explained above, the hearings officer's view of the county's Goal 5 program is that the county intended to rely on (1) the creation of zoning areas, (2) the adoption of minimum parcel sizes to implement the density standards, and (3) the adoption of siting and clustering standards for new dwellings in the F-2 zone. The first sentence of RCP Goal 5, Flora and Fauna Policy 11, refers to the process that the county was supposed to follow, which included taking actions to identify "10-20 regions" and to "base zoning by region on the overall residential densities or ODFW minimum parcel size recommendations." *See* n 7. All parties agree that, during the 36 years since its Goal 5 program was acknowledged, the county has never taken the steps described in the first sentence and has never created any "regions" or "base[d] zoning by region on the overall residential densities or ODFW minimum parcel size recommendations."

1000 Friends argues that the county's failure to take the steps described in the first sentence of RCP Goal 5, Flora and Fauna Policy 11, means that Goal 5 applies directly to the county's permit decision. We disagree with that argument. RCP Goal 5, Flora and Fauna Policy 11, is acknowledged to comply with Goal 5 and Goal 5 does not apply directly to the county's decision. ORS 197.175(2)(d).

However, the county's failure to take the step of identifying regions and basing zoning by region on either overall residential densities or ODFW

minimum parcel size recommendations does not mean that the county is absolved from protecting land included on the Big Game Habitat Inventory as Major Big Game Range through the residential density recommendations referred to in RCP Goal 5, Flora and Fauna Policy 11, or that the density recommendations simply do not apply. Rather, the *second sentence* of RCP Goal 5, Flora and Fauna Policy 11, remains operative, and it provides that "[a]ny density above [the ODFW-recommended density] limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000."[9] The second sentence is not tethered to or derivative of the first sentence, which envisions the creation of zoning areas that the county has never completed. The second sentence does not mention or refer to zoning areas. To find that the second sentence simply has no effect absent the creation of zoning areas would be to allow the county to fail to perform an action that it assured LCDC it would perform in order to obtain acknowledgement of its Goal 5 program, and it would have the effect of eliminating the Goal 5 protections for Big Game Range that LCDC understood were in place when it acknowledged the program. Moreover, the county must interpret a provision of the RCP that was adopted to implement its Goal 5 program, which protects Big Game Range from conflicting residential

[9] The hearings officer's decision never directly addresses the second sentence of RCP Goal 5, Flora and Fauna Policy 11.

development through density standards, in a manner that is not inconsistent with Goal 5. ORS 197.829(1)(d).

This view is supported by language in DLCD's final staff report leading to acknowledgement of the county's Goal 5 program. In its response to some objections to the county's proposed program, DLCD explained its understanding of why the county's program did not conflict with Goal 5:

> "Objectors are not correct that [RCP Goal 5, Flora and Fauna Policy 11,] violates Goal 5. Densities above those recommended by ODFW would certainly constitute a conflict with big game habitat. *The County has, through this policy, however, simply indicated that it intends to resolve them by applying the entire Goal 5 process when such proposals are made. This would require a plan amendment and could only take place if justified based on the Goal 5 analysis.*" Record 212-13 (emphasis added).

We understand DLCD to have concluded that the county's Goal 5 program protects habitat because it adopts residential densities in accordance with ODFW's recommendations and requires that, if "proposals are made" that exceed those densities, the county will conduct an ESEE analysis for that individual proposal. Contrary to the hearings officer's decision, RCP Goal 5, Flora and Fauna Policy 11, includes no language that limits its application to land divisions and zone changes. The hearings officer's decision is not consistent with ORS 174.010 because it inserts language into the policy.

Moreover, the hearings officer's interpretation that the county's Goal 5 program to protect Big Game Range is implemented by provisions of the LC, specifically the F-2 zone's minimum parcel size of 80 acres for new land

divisions and the clustering standards in LC 16.211(5), is not supported by anything in the text of the F-2 zone provisions. The siting and clustering standards in LC 16.211(5)(a) do not quantify a residential density standard. A requirement to site dwellings "[n]ear dwellings on other tracts" is not a density standard. LC 16.211(5)(a)(i). Nor do the rest of the F-2 zone provisions support the hearings officer's interpretation. The use table for the F-2 zone lists six types of allowed dwellings, five of which do not require any particular parcel size. The F-2 zone does not provide any residential density standard at all. As we explained in *Cattoche v. Lane County*, the county has not quantified a residential density standard in the F-2 zone but "instead use[s] the ODFW 40-acre standard [referenced in RCP Goal 5, Flora and Fauna Policy 11, and the Flora and Fauna Working Paper] for areas inventoried as Peripheral Big Game Range." 79 Or LUBA 466, 479 (2019). Similarly, here, we conclude that the county uses the one-dwelling-per-80-acres standard referenced in RCP Goal 5, Flora and Fauna Policy 11, and the Flora and Fauna Working Paper to determine the allowed residential density in areas inventoried as Major Big Game Range.

In conclusion, we agree with petitioners that the hearings officer's conclusion that RCP Goal 5, Flora and Fauna Policy 11, does not apply because the application does not involve a land division or a zone change improperly construes RCP Goal 5, Flora and Fauna Policy 11. There is no dispute that the density of the subject property with the proposed dwelling would exceed one dwelling unit per 80 acres. Accordingly, the proposed dwelling "shall be

considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000." RCP Goal 5, Flora and Fauna Policy 11.

Petitioner's first assignment of error and 1000 Friends' assignment of error are sustained.

PETITIONER'S SECOND ASSIGNMENT OF ERROR

As noted, the located of the proposed dwelling is in an area of the property that contains steep slopes.[10] RCP Goal 7, Policy 3 provides:

> "When extensive or drastic safeguards must be employed in conjunction with development proposals, the immediate and ultimate impact (including financial and economic considerations) of such safeguards on the environment and the public shall be considered."

In appealing the planning director's decision, petitioner argued that RCP Goal 7, Policy 3 (Policy 3) applied and that the planning director failed to apply it to the application. Record 608.

During the proceedings below, intervenor provided a geotechnical evaluation of the proposed dwelling site and the property (Level I report). The Level I report determined that the proposed driveway location did not present a

---

[10] The decision states that the home site is "located at least 30 feet from a ravine ridge or slope greater than 40%" and that, "[w]est of the home site, there is a 17% downslope." Record 5-6.

significant landslide hazard, and recommended a more detailed geotechnical investigation of the proposed dwelling site prior to development.[11] Record 11.

The hearings officer found that the general location of the property within a very high-risk landslide area "is an indication that potential development problems may exist." Record 12. While the hearings officer expressed doubt that Policy 3 applied to the application, the decision applied Policy 3 and found:

> "In regard to Policy #3, the Level I [report] did not identify extensive or drastic safeguards that had to be employed in conjunction with [intervenor's] development proposal. However, the location of the development within a very high landslide hazard area is an indication that potential development problems may exist. Thus, [the Level I report] wisely recommends that this evaluation be a prelude to a more comprehensive evaluation (Level II) when the actual development is proposed through the building permit process.
>
> "In a prior appeal of a template dwelling in the general area of the subject property, this Hearings Official addressed the implications of [*Rhyne v. Multnomah County*, 23 Or LUBA 442 (1992),] in regard to LC 16.005(2). In its decision in the *Rhyne* case, LUBA noted that [the] local government had the option of deferring its determination of compliance [with] a standard to a subsequent proceeding. Lane County has a process where an applicant may be compelled to apply for a Type III Modification of Decision when a substantial change in an approved application is necessary. This review would be before the Hearings Official and would require notice to the Appellant.
>
> "Thus, the building inspector will review the Level II * * * report provided by [intervenor's] engineer. Section 1803 of the Oregon

---

[11] The decision states that slopes for the proposed driveway are between zero and 14 percent. Record 4.

001784

> Structural Specialty code gives the Building Official the authority to require and review geotechnical information. If the Building Official finds problems that would require a restriction on mechanical grading and/or clearing, that issue would be reviewed by the Hearings Official. Condition of Approval #13 has been modified to reflect this change." Record 12 (footnotes omitted).[12]

In *Rhyne*, we explained a local government's options in evaluating the evidence submitted to it to support compliance with an approval criterion:

> "Where the evidence presented during the first stage approval proceedings raises questions concerning whether a particular approval criterion is satisfied, a local government essentially has three options potentially available. First, it may find that although the evidence is conflicting, the evidence nevertheless is sufficient to support a finding that the standard is satisfied or that feasible solutions to identified problems exist, and impose conditions if necessary. Second, if the local government determines there is insufficient evidence to determine the feasibility of compliance with the standard, it could on that basis deny the application. Third, if the local government determines that there is insufficient evidence to determine the feasibility of compliance with the standard, instead of finding the standard is not met, it may defer a determination concerning compliance with the standard to the second stage. In selecting this third option, the local government is not finding all applicable approval standards are complied with, or that it is feasible to do so, as part of the first stage approval (as it does under the first option described above). Therefore, the local government must assure that the second stage approval process to which the decision making is deferred provides the statutorily required notice and hearing, even though the local code may not require such notice and

---

[12] We note that the decision includes a purported quote of "LC 16.005(2)" that does not appear to be an accurate quote of that LC provision. Record 12. The language quoted by the hearings officer as LC 16.005(2) appears to be a quote of a provision of the Metro Plan, the regional plan for the cities of Eugene and Springfield and the county.

> hearing for second stage decisions in other circumstances." 23 Or LUBA at 447-48 (footnotes omitted) (citing *Holland v. Lane County*, 16 Or LUBA 583, 596-97 (1988)).

In its second assignment of error, petitioner argues that the hearings officer erred in deferring a determination of whether Policy 3 was met to a later-stage proceeding that does not allow for notice and an opportunity for a hearing.[13] Intervenor responds that the hearings officer found that compliance with Policy 3 is feasible, as allowed by *Meyer v. City of Portland*, 67 Or App 274, 678 P2d 741, *rev den*, 297 Or 82 (1984), and that the later Level II report that is required by Condition 13 is therefore not entitled to public review and comment.[14]

The hearings officer's decision regarding Policy 3 is somewhat unclear, and the parties' dispute boils down to a dispute over whether the hearings officer's decision follows the first *Rhyne* option, as intervenor maintains, or the third *Rhyne* option, as petitioner maintains. Given the decision's explicit

---

[13] Petitioner also cites RCP Goal 7, Policies 1 and 2, but does not develop any argument regarding why those policies apply or are not met.

[14] Condition 13 provides:

> "Excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and erosion control. The character of soils for fills and the characteristics of the subject property made usable by means of fill shall be suitable for the intended purpose. Prior to building approval, [intervenor] shall submit a Level II * * * report to the County. If the building inspector finds problems that would require a restriction on mechanical grading and/or clearing, that issue shall be reviewed by the Hearings Official through a Type III Modification of Decision." Record 7.

reference to the third *Rhyne* option ("LUBA noted that [the] local government had the option of deferring its determination of compliance [with] a standard to a subsequent proceeding"), we understand the hearings officer to have determined that the evidence provided by the Level I report was insufficient to determine whether Policy 3 was met and to have deferred that determination to a later stage approval process through Condition 13. The problem with Condition 13 is that it places review and approval of the future Level II report solely in the discretion of the building inspector, and only if the building inspector concludes that there are "problems that would require a restriction on mechanical grading and/or clearing" would that issue be referred by the building inspector to the hearings officer for review. Such a closed circle of decision making that excludes public participation is inconsistent with *Rhyne*.

The second assignment of error is sustained.

PETITIONER'S THIRD ASSIGNMENT OF ERROR

Former ORS 215.750(4)(d) (2017), *renumbered as* ORS 215.750(5)(d) (2020), prohibits a template dwelling if the property is part of a tract that already contains a dwelling. ORS 215.010(2) defines "tract" as "one or more contiguous lots or parcels under the same ownership." The subject property is owned by intervenor, a limited liability company. The Goodmans own adjacent properties to the west and the east of the subject property, at least one of which contains a dwelling. Record 685-86. The Goodmans are the registered agents of and have a membership interest in intervenor.

The hearings officer concluded that the subject property is not part of a tract because the owner of the subject property is not the owner of the adjacent properties and that the fact that the Goodmans may control the owner of the subject property or own the limited liability company that owns the subject property is not relevant for purposes of applying the operative terms of the definition of "tract." Petitioner argues that the subject property is part of a tract that is effectively owned by the Goodmans and, therefore, the subject property is not allowed a dwelling. Petitioner argues that viewing the subject property and adjacent properties as under different ownership is "contrary to the underlying policy of the template dwelling statute's prohibition on allowing more than one dwelling on a tract." Petition for Review 30-31. Intervenor responds that the hearings officer correctly interpreted *former* ORS 215.750(4)(d) (2017) to conclude that the subject property is not under the same ownership as the adjacent properties.

Petitioner has not developed any argument that persuades us to conclude that the subject property and adjacent properties are "under the same ownership," within the meaning of ORS 215.010(2), where title to the properties is vested in different owners. Absent any developed argument regarding the meaning of the phrase "under the same ownership" in the context of *former* ORS 215.750(4)

(2017), petitioner's arguments in this assignment of error do not provide a basis for reversal or remand.[15]

The third assignment of error is denied.

The county's decision is remanded.

---

[15] In *Central Oregon Landwatch v. Deschutes County*, ___ Or LUBA ___ (LUBA No 2019-105, Jan 31, 2020), we rejected the petitioner's argument that two properties constituted a "tract" because they were "under the same ownership" within the meaning of ORS 215.010(2), where title to one property was held in the name of an individual person and title to an adjacent property was held in the name of the same person as "trustee" of a trust. *Id.* at ___ (slip op at 10-13).

AGENDA
LANE COUNTY HEARINGS OFFICIAL

DATE: Thursday, March 4th, 2021

TIME(S): 9:30 A.M.

LOCATION: Remote Access Only*

Lane County complies with state and federal laws and regulations relating to discrimination, including the Americans with Disabilities Act of 1990 (ADA). The meeting location is wheelchair-accessible. If one needs special accommodations (hearing impaired, language translation, chemical sensitivity needs or large print copies of the agenda), please request at least 48 hours prior to the meeting by calling Rachel Adams 541-682-6911.

LANE COUNTY HEARINGS OFFICIAL STAFF REPORT

Department File:	509-PA20-05064
Hearing Date:	March 4, 2021
Report Date:	February 25, 2021
Owner:	E.J.K. Investments
Applicant:	Edward J. King
Agent:	Kim O'Dea – Law Office of Bill Kloos
Appellant:	LandWatch Lane County
Map & Tax Lot:	21-35-07-30-02900
Address:	N/A
Size:	12.05 +/- Acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zone:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

I. PROPOSAL

Appeal of the Type II Type II Director **APPROVAL** of a request for a forest template dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

II. BACKGROUND INFORMATION

The applicant submitted the subject application to the Lane County Land Management Division (LMD) on February 5, 2020. Staff deemed the application complete on March 6, 2020 and solicited referral responses from affected agencies, service providers, and surrounding property owners on March 23, 2020. On January 27, 2021, the Director mailed a decision approving the proposal (**Attachment 2**).

LandWatch Lane County (LWLC) submitted a timely appeal of the Director's decision on February 8, 2020. The Director reviewed the appeal pursuant to Lane Code 14.080(1) and, on February 10, 2021, accepted the appeal, and affirmed the decision without reconsideration. On February 8, 2021, staff mailed notice of the appeal hearing. The hearing is scheduled for March 4, 2020 at 9:30 am, which is day 188 of the statutory 150-day timeline set forth in ORS 215.427, accounting for extensions provided by the applicant totaling 165 days.

The subject 12.5 acre parcel is identified as Tax Lot 2900 on Lane County Tax Assessor's Map 21-35-07-30 and is not part of a larger tract under common ownership. The property is located immediately north of the Oakridge Airport, and situated between the Westfir and Oakridge Urban Growth Boundaries (UGBs). The property is vacant except for an existing roadway and powerlines largely within an east-west Bonneville Power Administration (BPA) easement that transects the property. The property generally slopes downward to the northwest property corner with steep slopes greater than 25 percent predominating north of the BPA easement.

According to County GIS data layers, the property is mapped by DOGAMI as having "high" and "moderate" landslide susceptibility and does not contain floodplain, a Class 1 stream, or wetlands. Per the applicant, the site is vegetated with small fir trees, scattered with underbrush and a few maple and oak trees. 2018 statewide imagery shows more tree cover north of the BPA easement.

The entire property is designated Major Big Game Range by the Department of Fish and Wildlife Habitat Maps. As well, the property is designated Forest in the Lane County Rural Comprehensive Plan, and is zoned Impacted Forest Land (F-2) consistent with that plan designation. The property is bordered to the south by the Oakridge Airport within the Airport Operations (AO-RCP) zoning district and abuts Impacted Forest Lands (F-2, RCP) zoned properties, to the north, east and west.

The subject application was one of three related template dwelling applications in the vicinity, and one of two applications approved by the Planning Director now on appeal and scheduled for public hearing by the Hearings Official on March 4, 2021. Staff note that the application for the other hearing item (File No. 509-PA20-05064) concerns a template dwelling proposal on a contiguous 13.28 acre parcel identified as Tax Lot 2800 of Assessor's Map 21-35-07-30, which is also designated Major Big Game Range by the Department of Fish and Wildlife Habitat Maps.

III. SUBSTANCE OF THE APPEAL

The appeal statement is provided as **Attachment 1**. The appellant contends the Director erred on one count with respect to the interpretation of Lane Code or Lane Manual, state law or federal law, or other applicable standards and criteria. The specific assignment of error is summarized below and followed by staff's response.

1. **The PD decision failed to consider the subject property is designated Major Big Game. Pursuant to LUBA No. 2020-030, an ESEE analysis is required.**

Staff Response: Staff understand this assignment of error to be the same assignment of error concerning Major Game that was sustained by LUBA in LandWatch Lane County vs. Lane County (LUBA 2020-030) for Nimpkish (**Attachment 3**). .

Nimpkish concerns a forest template dwelling proposal submitted under File No. 509-PA19-05298 that was approved by the Planning Director and affirmed by the Hearings Official. The petitioners asserted that the Hearings Official erred by approving a forest template dwelling on a 10-acre parcel within designated Big Game Habitat contrary to the one one-dwelling-per-80-acres standard referenced in the Lane County Rural Comprehensive Plan (RCP), Goal 5, Flora and Fauna 15 Policy 11, and the Flora and Fauna Working Paper. The petitioners maintained that the policy prohibits the county from allowing residential density above the ODFW-recommended limits without first conducting an Economic, Social, Environmental, and Energy (ESEE) analysis under the applicable Statewide 11 Planning Goal 5 rule.

The Hearings Official had concluded that the RCP Policy does not apply to template dwelling proposals. In accordance with the Hearings Official determination in Nimpkish, the Planning Director did not address compliance with the referenced RCP Policy or related background information contained in the Flora and Fauna Working Paper in the decision approving the subject template dwelling application.

Footnote 5 of LUBA's decision recognizes that OAR 660-006-0027(6)(a) only authorizes template dwellings that comply with the requirements of an acknowledged comprehensive plan, acknowledged land use regulations, and other provisions of law and does not relieve governing bodies from complying with other requirements

contained in the comprehensive plan or implementing ordinances such as the requirements addressing other resource values (e.g., Goal 5) that exist on forest lands.

For the reasons outlined in its decision, LUBA held that the Hearings Official errored in finding the policy inapplicable and that the proposal conflicts with Goal 5.

> *"As we explained in Cattoche v. Lane County, the county has not quantified a residential density 10 standard in the F-2 zone but "instead use[s] the ODFW 40-acre standard [referenced in RCP Goal 5, Flora and Fauna Policy 11, and the Flora and Fauna Working Paper] for areas inventoried as Peripheral Big Game Range." 79 Or LUBA 466, 479 (2019). Similarly, here, we conclude that the county uses the one-dwelling-per-80-acres standard referenced in RCP, Goal 5, Flora and Fauna Policy 11, and the Flora and Fauna Working Paper to determine the allowed residential density in areas inventoried as Major Big Game Range.*
>
> *In conclusion, we agree with petitioners that the hearings officer's conclusion that RCP Goal 5, Flora and Fauna Policy 11, does not apply because the application does not involve a land division or a zone change improperly construes RCP Goal 5, Flora and Fauna Policy 11. There is no dispute that the density of the subject property with the proposed dwelling would exceed one dwelling unit per 80 acres. Accordingly, the proposed dwelling "shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000." RCP Goal 5, Flora and Fauna Policy 11. Petitioner's first assignment of error and 1000 Friends' assignment of error are sustained."*

The circumstances concerning Big Game density requirements for the subject proposal are substantially similar to the circumstances addressed by LUBA in Nimpkish.

Absent evidence that demonstrates no Big Game density conflict exists or a plan amendment that resolves the conflict with the required ESEE analysis justification, staff concede the Director erred in approving the application and recommend that the Hearings Official reverse the Director Approval and deny the request based on noncompliance with *RCP Goal 5, Flora and Fauna Policy 11* and OAR 660-006-0027(6)(a).

REQUIRED SUBMITTALS. A notice of appeal must be filed with the Director prior to the end of business (4 pm PST) on the 12th day after the date the notice of decision is mailed.

Please note that your appeal application will be rejected if it does not meet all the requirements of Lane Code 14.080(1)(a) through (c). Failure to address all appeal requirements of Lane Code 14.080(1)(a) through (c) may result in the appeal being rejected.

1. A copy of the decision being appealed, with the department file number: PA2005064 and date of the decision Jan 27, 2021
2. The $250 appeal fee, payable to Lane County.
3. The appeal deadline, as stated in the Director's Decision: Feb. 8 2021
4. Address each of the following:
   a. State how the appellant is a person who is entitled to written notice under LC 14.060 or a person who is adversely affected or aggrieved by the application:
      - ☐ I am a person entitled to receive the Notice of Decision per LC 14.060
      - ☑ I am adversely affected or aggrieved by the application because (explain): statement attached

See Page 2, appeal form continued. →

b. Please provide a written statement explaining the reason(s) why the Director's decision was made in error or why the Director should reconsider the decision. Please explain the issues being raised on appeal with sufficient specificity to afford the approval authority the opportunity to respond to each issue raised (attached a separate letter if necessary).

attached

c. Provide an explanation with detailed support specifying one or more of the following as assignments of error or reasons for reconsideration (attach a separate letter if necessary):

- ☐ The Director exceeded their jurisdiction;
- ☐ The Director failed to follow the procedure applicable to the matter;
- ☐ The Director rendered a decision that is unconstitutional; or
- ☑ The Director misinterpreted the Lane Code or Lane Manual, state law or federal law, or other applicable standards and criteria.
- ☐ Reconsideration of the decision is requested in order to submit additional evidence not available in the record at the hearing and addressing compliance with relevant standards and criteria.

statement attached

5. Include any other additional information in support of your appeal.

NOTICE OF PENDING LAND USE DECISION BY THE LANE COUNTY PLANNING DIRECTOR

Mailing Date:	JAN 27 2021
Department File:	**509-PA20-05064**
Owner/Applicant:	E.J.K. Investments
Agent:	Kim O'Dea – Law Office of Bill Kloos
Map & Tax Lot:	21-35-07-30-02900
Address:	N/A
Size:	12.05 +/- Acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zone:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: A request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

Enclosed is a vicinity map and site plan that shows the proposed location of the dwelling.

The proposed use that could be authorized by approval of the land use application is: One single family dwelling on the subject property.

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report can be made available electronically at no cost, and copies will be provided at reasonable cost. The Lane County Land Management Division representative to contact is Shawna Adams at (541) 682-8904 or shawna.adams@co.lane.or.us.

This decision will become final at 4 P.M. on FEB 08 2021 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision. To complete this form and appeal the decision:**

1. Fill in the required information along with all of the materials and information required in the appeal form, the appeal fee, and all materials required by LC 14.080(1).
2. Submit the completed appeal to the Planning Director so that the Director receives it prior to the date and time that the decision becomes final (see above deadline). The Director will reject an appeal if it: (a) is not received prior to the date and time that the decision becomes final or (b) is incomplete.
3. To be accepted, appeals must satisfy all the requirements of Lane Code 14.080(1). A Type II decision issued by the Director for which a hearing has not been held may be appealed by a person who is entitled to written notice or any person who is adversely affected or aggrieved by the application.

Failure to raise an issue in a hearing—in person or in writing—or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals (LUBA).

Prepared by: Shawna Adams, Senior Planner **Date:** JAN 27 2021

Authorized by: Amber Bell, Planning Director **Date:** JAN 27 2021

RE: APPEAL OF PA2005064, EJK INVESTMENTS TEMPLATE DWELLING APROVAL

JUSTIFICATION FOR APPEAL AND REQUEST FOR RECONSIDERATION

The PD decision failed to consider the subject property is designated Major Big Game. Pursuant to LUBA No. 2020-030, an ESEE analysis is required.

For this reason, LWLC respectfully requests reconsideration of the PD decision.

Thank you.

LANDWATCH
LANE COUNTY
Protecting Our Natural Heritage
From the Coast to the Cascades
P.O. Box 5347 • Eugene, OR 97405 • (541) 741-3625 • www.landwatch.net

February 8, 2021

LandWatch Lane County is a 501(c)(3) tax exempt, nonprofit organization dedicated to protecting Lane County's water, soils and air so that our natural areas, farms and forests will remain vital in perpetuity.

LandWatch is committed to protecting Lane County's farms, forests and open space from urban sprawl by promoting responsible and sustainable land use policies.

The over-parcelization and development of productive resource land leads to negative impacts for commercial resource use and protection of Goal 5 resources.

LandWatch is aggrieved by the Directors recent approval of a forest template dwelling in the F2 zone because the decision does not consider the subject property is designated Major Big Game and is subject to an ESEE analysis pursuant to LUBA No. 2020-030, dated January 21, 2021.

For this reason, LWLC is an aggrieved party.

CONDITIONS OF APPROVAL
509-PA20-05064

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of 509-PA20-05064 is valid for a four-year period from the final date of approval unless and extension is granted in accordance with Lane Code Chapter 14 provisions in effect at the time the request is made.

2. The dwelling must be located within the reduced 70 x110-foot approved home site area shown in **Exhibit C.**

3. The dwelling must be located at least 30 feet away from any ravine, ridge or slope greater than 40 percent.

4. The subject properties are located within the Airport Safety Combining Zone (/AS) and the Transitional Surface of the Oakridge Airport. Development shall comply with the applicable requirements of LC 16.246. Pursuant to LC 16.246(3)(a) and (5)(e), no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface.

The following conditions shall be met prior to the expiration date in condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease:

5. Complete, have notarized, and record the enclosed *Farm and Forest Management Agreement* with an attached "Exhibit A" depicting the legal description of the property (which must be recorded together with the Agreement at the Lane County Deeds and Records office).

6. Submit a stocking survey report for the subject parcel prepared by a qualified forester to the Lane County Assessor. Submit a copy of the stocking survey report to Lane County Land Management Division with evidence of receipt by Lane County Assessment and Taxation.

7. Obtain Lane County Facility Permit to verify the shared access easement approach to Airport Road is adequate to support a shared approach to multiple properties/dwellings as proposed. For more information about Facility Permits, contact 541-682-6902 or visit: https://lanecounty.org/ government/ county departments/ public works/right-of-way permits/facility permits/.

8. Any private access easements serving the subject property must comply with LC 15.055(4), (5), and (7), specifically including provisions for utilities. Submit a copy of the recorded access easement(s) demonstrating compliance with this requirement and specifically including documentation verifying legal right of use for any segments coinciding with BPA access and transmission line easements. This can be satisfied by providing a copy of BPA approval or court rulings.

9. Improve the existing roadway access Airport Road and the dwelling site to the minimum standards of LC 16.211(8)(e) and the applicable standards of Lane Code Chapter 15. The shared access easement road between Airport Road and the easternmost base of the driveway loop must be improved to road standards, with turnarounds spaced not more than 500 feet. Between the shared access easement road and the home

site, the driveway loop must be improved to driveway standards with a turnaround. As specified in LC 16.211(8)(e), Oregon Registered Professional Engineer or fire district certifications must be provided for the road and driveway grades that exceed eight percent and for any culverts or bridges.

10. Submit written verification from the Hazeldell Rural Fire Protection District, or written certification from an Oregon Registered Professional Engineer, stating that the route of access for firefighting equipment from the fire station to the building site, across public roads, bridges, and driveways comply with and meet the construction standards Lane Code 16.211(8)(e) and the Fire District standards.

11. Physically establish the primary and secondary fuel breaks in compliance with Lane Code 16.211(8)(c)(i). These fuel breaks shall be maintained in perpetuity. The minimum primary safety zone surrounding the proposed dwelling shall be at least 30 feet plus the Additional Safety Zone Down Slope as applicable. The minimum secondary fuel breaks surrounding the primary safety zone shall be at least 100 feet to the extent this can be established on lands owned or controlled by the owner. Primary fuel breaks, including any Additional Safety Zone Down Slopes, must be fully accommodated on site. The approved preliminary site plan in **Exhibit C** must be revised accordingly.

12. Provide evidence to the Planning Director that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule (OAR Chapter 629). This can be satisfied by providing a copy of the Well Log for the property that complies with the requirements outlined in Lane Manual Chapter 9.160, specifically a five-hour flow test.

13. Upon completion of **conditions #5 through #12**, the applicant shall complete and submit a Land Use Application form to Verify Compliance with Conditions of Approval, with the required processing fee. **Attach to this form a copy of:**
    - Signed, notarized, and recorded Farm Use and Forest Management Agreement and description of property, along with all required exhibits;
    - Recorded shared access easement(s) with BPA right of use documentation;
    - Approved facility permit;
    - Forest stocking survey with evidence of receipt from the County Assessor;
    - Well log or well constructor's report and pump test that complies with the Lane Manual 9.160;
    - Verification letter from the Hazeldell Rural Fire Protection District, or written certification from an Oregon Registered Professional Engineer, regarding adequacy of access route and the adequacy of the constructed road and driveway improvements;
    - A revised final Site Plan that conforms with the approved plan, drawn to scale, including the same information, and meeting other minimum standards of the Land Management Division. These plans shall show the primary and secondary fuel breaks surrounding the proposed dwelling as required by Lane Code 16.211(8)(c)(i), the entire access between Airport Road and the home site, surfacing widths, turnouts, turnarounds, bridges, culverts, airport surface, easements, including BPA easements, transmission lines etc.

14. As part of the Verification of Conditions process, the access road, driveway and fuel breaks must be field inspected by Planning Office staff to verify that requirements stated in **conditions #3, #9, and #11** have been met. Failure to meet minimum fuel break and/or driveway and/or grade standards as in LC 16.211(8)(e) and (c) upon first inspection may require an additional application for fuel break and road inspection, with the applicable fee, at the determination of the Planning Director.

15. Upon completion of Verification of Conditions, submit a building permit to verify that the construction of the dwelling meets current Oregon Structural Specialty Code application for the proposed dwelling, with the

appropriate deposit fee. Contact the Building Program at 541-682-4651 and the On-Site Wastewater Program at 541-682-3754 with questions regarding building and sanitation requirements.

16. In the building or placement permit application submittal, the applicant shall submit a site plan demonstrating that the parcel configuration, and the proposed dwelling, driveway, and septic system, are located consistent with the final approved site development plan, except as authorized by the Planning Director. Per Lane Code Chapter 14, modifications to the final approved site plan not within the scope of the original approval may be subject to a new Type II or Type III Modification of Approval.

The following condition shall be met prior to building permit issuance for above ground construction.

17. Prior to building permit submittal, the applicant must submit documentation demonstrating compliance with LC 16.246(3)(a) and (5)(e), with the maximum height limitation to be indicated on the building permit plans. Preliminary calculations under **Finding 28** indicate a single-story structure is feasible.

18. Prior to building permit submittal, the property owner must complete a FAA Form 7460-1 for the proposed dwelling and return to Seth Thompson, Aviation Planner at ODA and receive a Letter of Determination for the proposed construction as required by OAR 738-070-0060. Submit a copy of the completed form and letter of determination to Lane County Land Management Division at the time of building permit.

The following condition shall be met prior to approval for legal occupancy of the proposed dwelling.

19. The proposed dwelling shall meet the following requirements, to be indicated on the building permit plans and verified by the Lane County Building Official:

a. All buildings or structures with chimneys shall have a spark arrester on all chimneys.
b. Wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs.

The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:

20. The applicant is responsible for complying with any applicable local, state, and federal laws, including Oregon Department of State Lands (DSL) and/or Army Corps of Engineers (ACOE) wetland regulations and Oregon Department of Aviation (ODA) and Federal Aviation Administration (FAA) requirements. See **Exhibit H** for more information about ODA and FAA requirements.

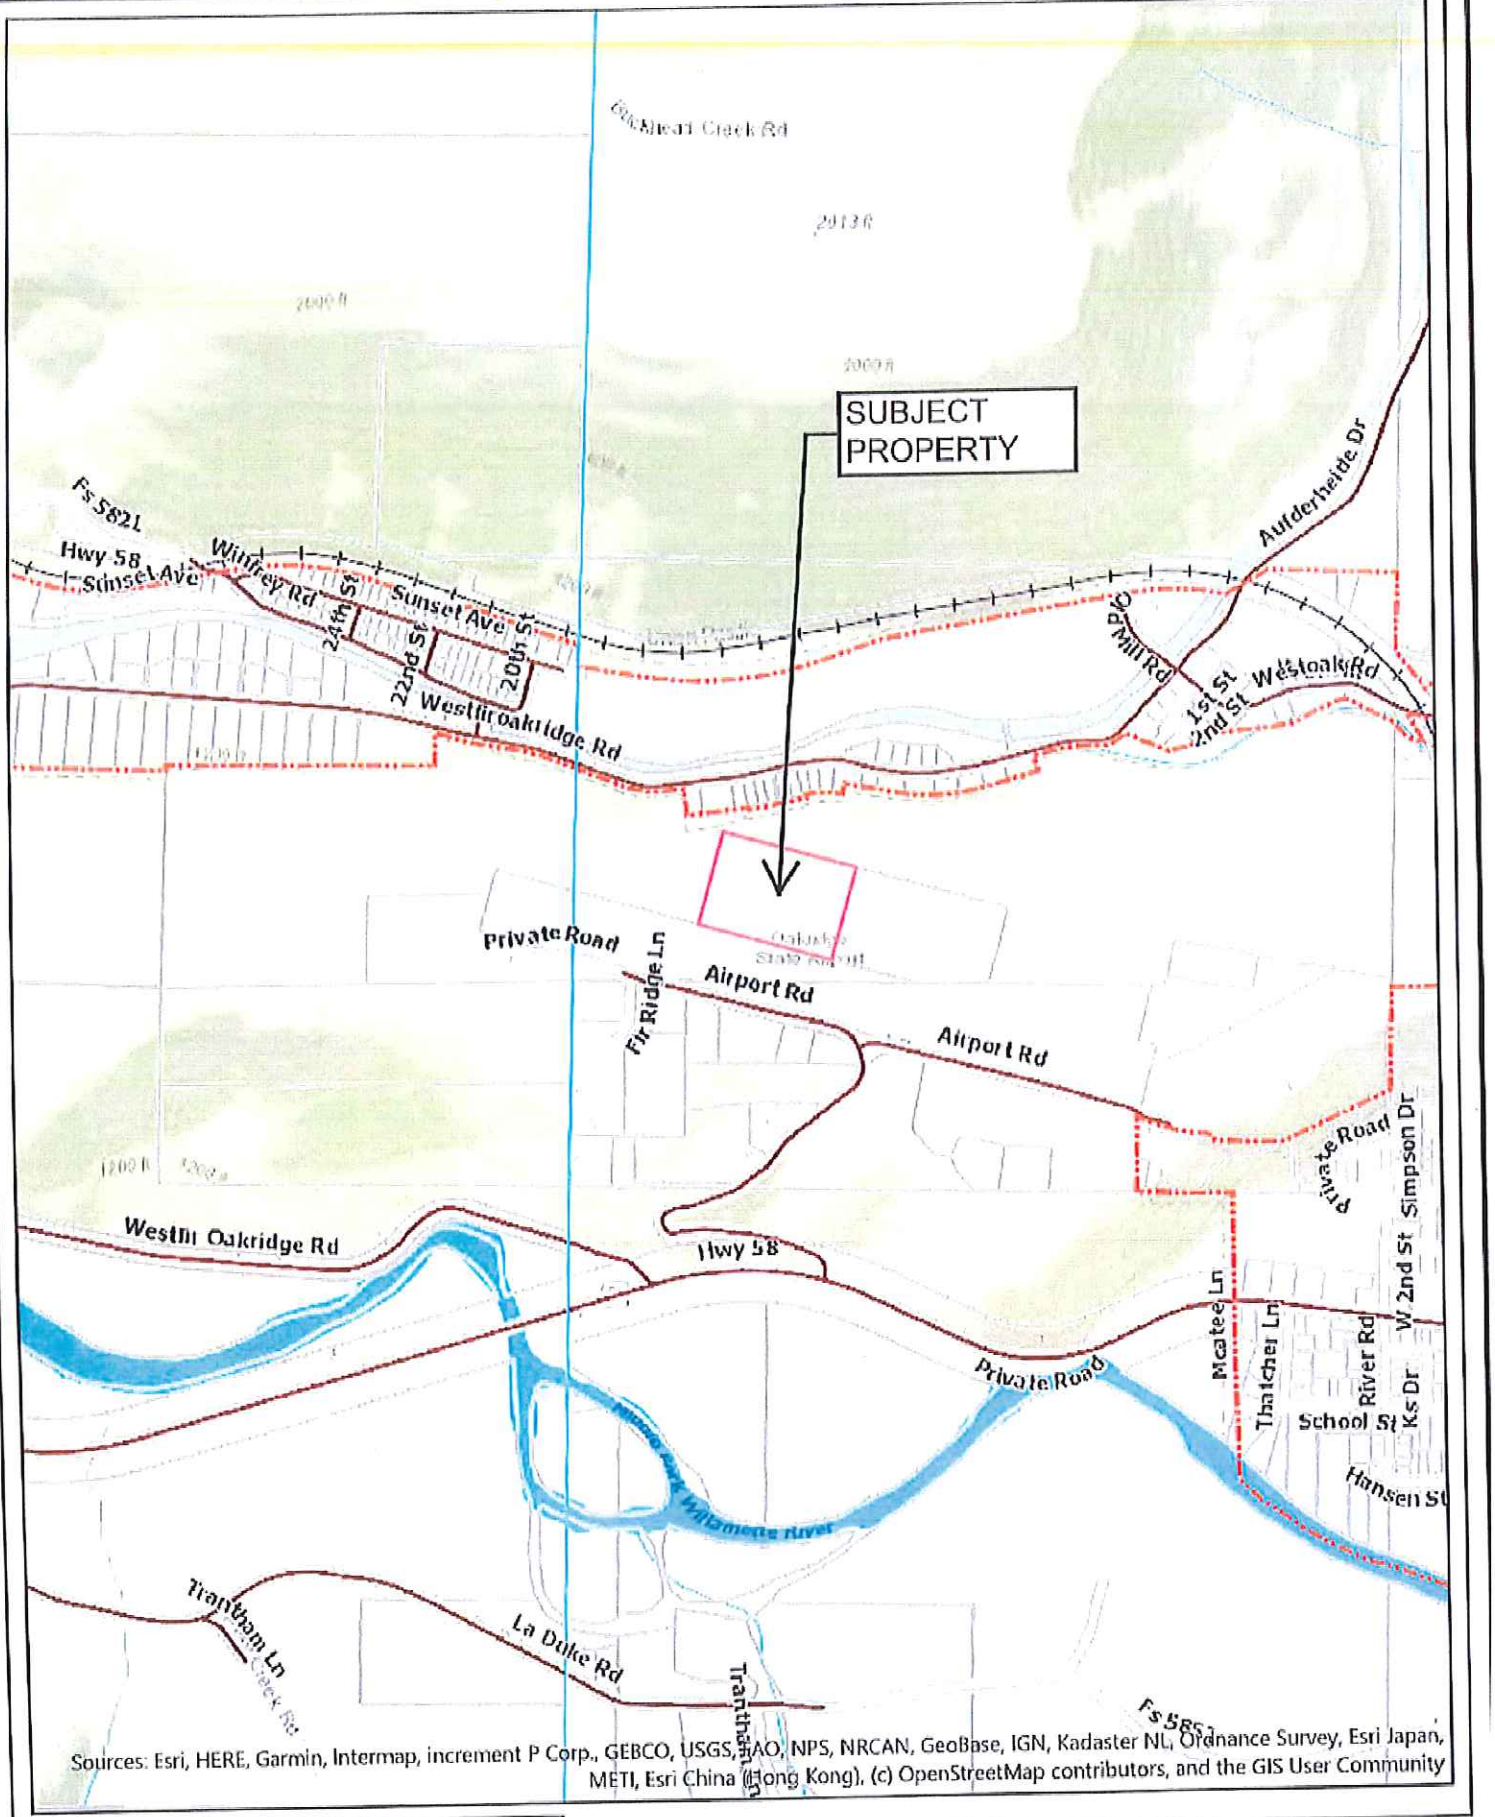
21. Future development must comply with the limitations and standards of the Airport Safety Combining Zone, LC 16.246.

22. The applicant is responsible for procuring the necessary agreements with the Bonneville Power Association. Recent and past BPA communications indicate that portions of tax lots 2800 & 2900 are encumbered by an easement for high-voltage transmission lines and an access road easement. Per the BPA, these easements grant certain rights to BPA and limit the landowner's use within the easement area. A portion of BPA's rights include the right of ingress and egress, and the right to keep the easements free and clear of vegetation and buildings, sheds, fences, roads or any other type of structure. All activities planned within the BPA easement need to be reviewed by BPA prior to their occurrence. Do not build, dig or plant within the easement area without first contacting BPA. Requests for information regarding the process for reviewing proposed uses of the easement may be addressed to Janai Soto at jasoto@bpa.gov or 541/988-7409.

23. Per LC 16.005, excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and the character of soils for fill and the characteristics of parcels or lots made usable by means of fill shall be suitable for the intended purpose.

24. The subject property is within a "High" and "Moderate" landslide susceptibility area according to DOGAMI. This designation may require a geotechnical report with submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 to confirm requirements.

25. Any future naming of the proposed shared access easement road is subject to the provisions of LC 15.305 through 15.335.



26. Storm water runoff from the subject property shall not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches.

27. The owner shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules. It is the owner's responsibility to document that the required tree planting was done in conformance with the criteria of Lane Code 16.211(5)(e). If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372. Information regarding Department of Forestry stocking requirements can be obtained through the Department of Forestry. Information regarding Department of Forestry stocking requirements can be obtained through the Department of Forestry at (541) 935-2283 (in western Lane County); (541) 726-2501 (in eastern Lane County).

28. The following is provided for informational purposes as an **Advisory Notice**: Section 93.040(1) of the Oregon Revised Statutes requires the following statement to be included in the body of any instrument transferring or contracting to transfer fee title to real property:

    "THIS INSTRUMENT WILL NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY APPROVED USES AND TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES AS DEFINED IN ORS 30.930."

    This Oregon Law disclosure requirement serves a constructive purpose. Approval of a residence for this property is contingent upon compliance with the conditions of the special use permit, and any future owners of the subject property need to understand and adhere to these conditions. This disclosure statement should alert the cautious and potential purchaser to inquire with the Lane County Land Management Division about the conditions of this special use permit.

The information on this map was derived from digital databases on the Lane County regional geographic information system. Care was taken in the creation of this map, but is provided "as is". Lane County cannot accept any responsibility for errors, omissions or positional accuracy in the digital data or the underlying records. Current plan designation, zoning, etc., for specific parcels should be confirmed with the appropriate agency. There are no warranties, expressed or implied, accompanying this product. However, notification of any errors will be appreciated.

REQUIRED SUBMITTALS. **A notice of appeal must be filed with the Director prior to the end of business (4 pm PST) on the 12th day after the date the notice of decision is mailed.**

Please note that your appeal application will be rejected if it does not meet all the requirements of Lane Code 14.080(1)(a) through (c). Failure to address all appeal requirements of Lane Code 14.080(1)(a) through (c) may result in the appeal being rejected.

1. A copy of the decision being appealed, with the department file number:_____ and date of the decision_____
2. The $250 appeal fee, payable to Lane County.
3. The appeal deadline, as stated in the Director's Decision: _____
4. Address each of the following:
   a. State how the appellant is a person who is entitled to written notice under LC 14.060 or a person who is adversely affected or aggrieved by the application:

      ☐ I am a person entitled to receive the Notice of Decision per LC 14.060

      ☐ I am adversely affected or aggrieved by the application because (explain):

      _____

      _____

See Page 2, appeal form continued. →

b. Please provide a written statement explaining the reason(s) why the Director's decision was made in error or why the Director should reconsider the decision. Please explain the issues being raised on appeal with sufficient specificity to afford the approval authority the opportunity to respond to each issue raised (attached a separate letter if necessary).

c. Provide an explanation with detailed support specifying one or more of the following as assignments of error or reasons for reconsideration (attach a separate letter if necessary):

- ☐ The Director exceeded their jurisdiction;
- ☐ The Director failed to follow the procedure applicable to the matter;
- ☐ The Director rendered a decision that is unconstitutional; or
- ☐ The Director misinterpreted the Lane Code or Lane Manual, state law or federal law, or other applicable standards and criteria.
- ☐ Reconsideration of the decision is requested in order to submit additional evidence not available in the record at the hearing and addressing compliance with relevant standards and criteria.

5. Include any other additional information in support of your appeal.

STAFF REPORT

509-PA20-05064

Department File:	**509-PA20-05064**
Owner/Applicant:	E.J.K. Investments
Agent:	Kim O'Dea – Law Office of Bill Kloos
Map & Tax Lot:	21-35-07-30-02900
Address:	N/A
Size:	12.05 +/- Acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zone:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)
Staff:	Shawna Adams, Senior Planner

I. PROPOSAL

A request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

II. BACKGROUND INFORMATION

The subject application was submitted to the Land Management Division on February 5, 2020 and was deemed complete by staff on March 6, 2020. On March 23, 2020, staff solicited referral responses from affected agencies, service providers, and surrounding property owners. Subsequently, the applicant provided extensions to the statutory timeline requirements of ORS 215.427 totaling 165 days. Copies of all written comments and applicant submittals are included in the application file for this proposal and are addressed in the staff evaluation below in the context of the approval criteria, as applicable.

III. PROPERTY DESCRIPTION

A. **LOCATION**: The subject property is identified as Tax Lot 2900 on Lane County Tax Assessor's Map 21-35-07-30. The property is located immediately north of the Oakridge Airport, and situated between the Westfir and Oakridge Urban Growth Boundaries (UGBs).

B. **PHYSICAL DESCRIPTION**: The subject 12.05-acre property is vacant except for an existing roadway and powerlines largely within an east-west Bonneville Power Administration (BPA) easement that transects the property. The property generally slopes downward to the northwest property corner with steep slopes greater than 25 percent predominating north of the BPA easement. According to County GIS data layers, the property is mapped by DOGAMI as having "high" and "moderate" landslide susceptibility and does not contain floodplain, a Class 1 stream, or wetlands. Per the applicant, the site is vegetated with small fir trees, scattered with underbrush and a few maple and oak trees. 2018 statewide imagery shows more tree cover north of the BPA easement.

C. ZONING & SURROUNDING PROPERTIES: The property is designated Forest in the Lane County Rural Comprehensive Plan, and is zoned Impacted Forest Land (F-2) consistent with that plan designation. The property is bordered to the south by the Oakridge Airport within the Airport Operations (AO-RCP) zoning district and abuts Impacted Forest Lands (F-2, RCP) zoned properties, to the north, east and west.

IV. APPLICABLE CRITERIA AND FINDINGS OF FACT

This application is evaluated pursuant to the applicable criteria found in Lane Code 16.211(5) and Lane Code 16.211(8) and other standards as applicable. The code language is in **boldface** type, followed by findings of fact.

D. Conformity with Lane Code 16.211(5):

Template Dwelling. One single-family dwelling is allowed subject to prior submittal and approval of an application pursuant to Type II procedures of LC Chapter, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(5)(a) through (f) and LC 16.211(8) below.

(a) The tract upon which the dwelling will be located has no other dwellings on it.

Finding 1: The subject property on which the dwelling will be located coincides with Tax Lot 2900 of Assessor's Map and Tax Lot 21-35-07-30, does not contain a dwelling, and is owned by EKJ Investments. The tract consists only of the subject property. As per Regional Land Information Database (RLID) records, all abutting properties are under separate ownership and owned by Crown Properties LLC, Oregon State Board of Aeronautics, Edward J King, or the State of Oregon. Accordingly, this criterion is met.

House Bill 2225 includes additional tract requirements that have not yet been adopted in the Lane Code. These provisions apply directly as of January 1, 2020 and are set forth in OAR 660-06-027(6)(a). The applicable provisions of Section 2 of the House Bill applicable through January 1, 2023 further provide that no more than one dwelling may have existed, exist, or have been approved on the other lots or parcels within the former tract that existed as of January 1, 2019 and thereafter through January 1, 2021. Staff find that the RLID records and other information in the file record indicate that subject tract remains the same as it existed on January 1, 2019, in compliance with these requirements. Also see **Finding 30**.

(b) The lot or parcel upon which the dwelling will be located was lawfully created.

Finding 2: The subject parcel was verified to be a legal lot under Planning Action File No. 509-PA08-06632 and noticed as a final land use decision without appeal under 509-PA08-06329 and remains in the same configuration. This criterion is met.

(c) The lot or parcel upon which the dwelling will be located:

(iii) Is predominantly composed of soils that are capable of producing 85 cubic feet per acre per year of wood fiber; and

(aa) All or part of at least eleven other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(iii)(aa) above.

(bb) At least three dwellings existed on January 1, 1993, and continue to exist on the other lots or parcels described in LC 16.211(5)(c)(iii)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(iii)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle.

Finding 3: The applicant chose to document the presence of at least 11 other lots or parcels that existed on January 1, 1993. This is the most rigorous of the three "tests" outlined in LC 16.211(5)(c), and it appears to be the only option given that RLID soils data and Lane County Soil Ratings for Forestry and Agriculture estimates indicate 100% of the subject parcel's soils are Nekia soils (89D & 89F capable of producing 160 cubic feet per acre per year of wood fiber. The applicant's template square is centered on the mathematical center of the tract, as verified by County GIS generated centroid measurements. Accordingly staff find that the proposal satisfies the methodology set forth in subsection (5)(c)(iii)(aa) and House Bill 2225 for tracts with less than 60 acres. Staff also note that the submitted template map is marginally different from the 1:400 scale indicated, but finds the relationship between the template and parcels appears to be preserved and an accurate measure.

The applicant has identified 17 lots or parcels that existed on January 1, 1993, as within the template area. With consideration of the current property description cards and other documentation submitted by the applicant, and available County records included in the application file, staff find that at least 12 of the 17 lots or parcels identified as within the 160-acre template appear to have been lawfully created prior to January 1, 1993. None of these parcels were wholly or partially within a UGB as of January 1, 1993 or currently. These parcels satisfy LC 16.211(5)(c)(iii)(aa) and are described in in **Figure 1**.

FIGURE 1: LOTS, PARCELS AND UNITS OF LAND WITHIN TEMPLATE AREA

Count (*dwelling)	Assessor's Map	Tax Lot	Date of Creation	Documentation / Deed / LLV / Partition
1	21-35-07-30	2700	1972	R360D/96687
2*	21-35-18-00	914	1980	P1 of M463-79
3*	21-35-18-00	913	1980	P1 of M463-79; R1210-8227205
4*	21-35-18-00	911	1979	P2 of M316-78
5*	21-35-18-00	912	1979	P1 of M316-78
6*	21-35-18-00	906	1970	Reel 469-D/95859
7*	21-35-18-00	908	1970	LSC R1437/8652701; Deed R484/10186; LL PA87-02870 Part 2
8	21-35-18-00	903	1971	LSC R477/3455; Deed R871/70102; LL PA87-02870 Part 1
9*	21-35-18-00	904	1969	R423/52735
10*	21-35-18-00	918	1984	P2 of PA83-02253; 1291R/8412582
11	21-35-18-00	902	1968	R382/16860
12*	21-35-18-00	910	1978	P2 of M174-78

*Note: Verification of the parcels above is preliminary and does **not** constitute a determination of legal lot status.*

The applicant provided documentation for ten (10) dwellings located on the parcels identified in **Figure 1** above. These are denoted with an asterisk and include three dwellings that post-date January 1, 1993 according to the submitted documentation. As evidenced by the RLID reports and other records submitted by the applicant and 2018 aerial photography, staff verified at least five (5) of the ten dwellings existed on January 1, 1993, continue to exist on the qualifying lots partially or wholly located within the template square. The relative location of the dwellings is not relevant because the template measurement was not made according to LC 16.211(5)(c)(iii)(aa)(B). The dwellings found to satisfy LC 16.211(5)(c)(iii)(bb) are listed in **Figure 2** below.

FIGURE 2: QUALIFYING DWELLINGS WITHIN TEMPLATE DWELLING

Count	Assessor's Map	Tax Lot	Date of Dwelling on Property
1	21-35-18-00	912	1965; RLID
2	21-35-18-00	908	1954; RLID
3	21-35-18-00	904	1965; RLID
4	21-35-18-00	910	1974; RLID
5	21-35-18-00	913	1990; RLID; BP80-02322

For the reasons explained above, staff find the proposal satisfies LC 16.211(5)(c).

(d) Approval of a dwelling or manufactured dwelling shall comply with the requirements in LC 16.211(5)(d)(i) through (iv) below:

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

Finding 4: All of the provisions of LC 16.211(5)(d)(i) through (iv) apply since the subject property is larger than ten acres. Lane County Assessment and Taxation will receive notice of this decision. Conditions of approval have been established to ensure that the owner plants a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules. As conditioned, the owner must submit to Lane County Assessment and Taxation a stocking survey report for the subject property, prepared by a qualified forester. A copy of the stocking survey report with evidence of receipt by Lane County Assessment and Taxation must be submitted to Lane County Land Management Division as part of the Verification of Conditions application process. The proposal meets this criterion as conditioned.

(e) Prior to land use clearance of a building permit for the dwelling, when the lot or parcel on which the dwelling will be located is part of a tract, the remaining portions of the tract shall be consolidated into a single lot or parcel and a deed restriction using the form provided in OAR 660-06-027(7), "Exhibit A," shall be completed and recorded with Lane County Deeds and Records. The covenants, conditions and restrictions in the deed restriction:

Finding 5: The subject tract consists of the subject parcel with no contiguous property under common ownership remaining. As such, the above criterion, does not apply. Staff note that the referenced OAR was renumbered under House Bill 2225 and is now implemented in OAR 660-06-027(6)(a).

(f) Land use approval of a permit described in LC 16.211(5) above shall be valid for four years from the date of the approval.

Finding 6: This approval will be valid for four years from the final date of approval indicated on the Notice of Decision. This has been made part of **Condition #1** of **Exhibit A**.

(g) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

Finding 7: As a condition of approval to ensure compliance with the above criterion, the applicant must record a Farm and Forest Management Practices Agreement with Lane County Deeds and Records office and submit a copy of the recorded agreement to Land Management Division as part of the Verification of Conditions application. This requirement must be satisfied prior to the issuance of a building permit for a single family dwelling or a placement permit for a manufactured home.

E. Conformity with Lane Code 16.211(8):

Siting Standards for Dwellings, Structures, and Other Uses. The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h), (2) (j), and (2)(o), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through(b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

(a) Setbacks. Residences, dwellings or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent;

Finding 8: The applicant's site plan identifies a 100-foot by 200-foot home site area set back 130 feet from the south property line and 335 feet from the east and west property lines (**Exhibit C**). The subject property is near numerous dwellings, including dwellings within the Westfir UGB to the north and south of the Oakridge Airport. The nearest dwelling to the proposed home site appears to be approximately 600 feet to the south. The proposed home site is roughly 100 feet to the south of the existing private roadway that runs along the BPA easement, and as near to other nearby roads as other locations within the tract. The entire property is comprised of soils suitable for forestry use. Staff conclude that the portion of the property that lies south of the BPA easement where the home site is proposed is the least suitable for forestry use, due to its proximity to the BPA transmission

lines, existing roadway, and greater height limitations due to higher elevations and proximity to the airport. See **Finding 28.**

Specific to slopes, April 16, 2020 comments from LandWatch Lane County (LWLC) contend that that onsite slopes are greater than indicated by the applicant (**Exhibit F**). The applicant indicates that the home site is proposed within the most level area of the tract, that slopes within the home site do not exceed six percent, and that the home site is not within 200 feet of slopes 40 percent or greater. The submitted County LiDAR and 20-foot contour data suggest that slopes within the vicinity of the home site are greater than indicated by the applicant. As evidenced by the submitted slope data and other available County GIS LiDAR and contour data layers (**Exhibit K**), the home site is at the north and west end of the most level part of the property, predominately consists of slopes greater than six percent with significantly steeper slopes in the north part of the home site, with slopes indicated be 40 percent or greater in the northeast corner of the home site and within 30 feet of the home site's north boundary. The data do not indicate that the proposed 100 x 200 foot home site meets the above standard, but do indicate that a reduced 70 x 110-foot home site, with the northern 30 feet and western 90 feet eliminated, would comply with the above standards and allow sufficient area for home site development.

For the reasons explained above, staff find that proposal meets the above standard subject to the condition that the home site be reduced as described and indicated on the approved preliminary site plan in **Exhibit C.**

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses; and

Finding 9: The applicant indicates that the proposed home site is located in a forested area that was clear cut several years ago and is in a mostly open area with only a few scattered underbrush and replanted fir trees. For the reasons explained under **Finding 8** staff find that part of the site south of the BPA easement where the home site is proposed is the least suitable part of the site for forestry. The available slope evidence addressed under **Finding 8** and the fuel break requirements addressed under **Finding 14**, indicate that construction of a dwelling within the north part of the proposed 100 x 200-foot home site would necessitate the maximum additional safety zone downslopes to the north and northeast of the home site, with the possibility of both primary and secondary fuel breaks extending north of the BPA easement. Reducing the home site area to 70 x 110 feet as indicated on the approved preliminary site plan in **Exhibit C**, would necessitate less extensive fuel breaks and more fully accommodate required fuel breaks within the south part of the site. The home site, as reduced, is found to sufficiently minimize intrusion into forest areas. As conditioned, the proposal meets this standard.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

Finding 10: The subject property abuts only F-2 and AO zoned property. The proposed home site is set back at least 100 feet from the nearest property boundary in accordance with this standard.

(iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) are met; and

Finding 11: The property does not contain and is not near a designated Class 1 stream. The above standards do not apply.

(v) Structures other than a fence or sign shall not be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road or a local access public road specified in Lane Code LC Chapter 15; and

(bb) 30 feet from all property lines other than those described in LC 16.211(8)(a)(v)(aa) above; and

(cc) The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

Finding 12: The subject property does not front a road subject to compliance with subsection (v)(aa). Otherwise, the proposed home site is located more than 30 feet from all property lines in accordance with subsection (v)(bb). **Findings 8 through 12 and Finding 13 through 17** address compliance with the remaining standards of LC 16.211(8)(a) through (d), and are incorporated here as demonstration of compliance with (cc) above. The above standard is met.

(b) The amount of forest lands used to site access roads, service corridors and structures shall be minimized.

Finding 13: As further explained under **Finding 8** and **9**, the reduced home site area is to be sited near an existing access roadway and BPA access easement in a location where fuel breaks will be minimized. As conditioned, the proposal meets this standard.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:

(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements.

(aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house. As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	Feet of Primary Safety Zone	Feet of Additional Safety Zone Down Slope
0	30	0
10	30	50

20	30	75
25	30	100
40	30	150

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

Finding 14: The applicant indicates that slopes within 30 feet of the home site range from three to six percent and, accordingly, the applicant's site plan shows the standard 30 foot fuel break and a secondary 100 foot fuel break on lands controlled by the owner. However, the applicants slope evidence includes County GIS LiDAR and 20-foot contour data that indicate down slopes within 30 feet of the home site are greater than assumed. See **Finding 8**. Currently available County GIS LiDAR and 1-foot contour interval data also indicates the slopes are greater than assumed (**Exhibit K**). These slope data would dictate a 30-foot primary fuel break with an additional 150-foot additional safety zone down slope to the north and northwest of the proposed 100 by 200-foot home site. While it appears that this primary fuel break and additional 100-foot secondary fuel break could be accommodated in accordance with fuel break requirements, staff do not find the proposed home site's placement in proximity to the downslopes meets the siting standards at LC 16.211(8)(a) and (b) and has conditioned approval on the reduced 110 by 70-foot home site area shown on the approved preliminary site plan in **Exhibit C**. As reduced, it appears that the downslopes within 30 feet of the home site may exceed 25 percent near the northeast corner and require an additional safety zone down slope of up to 100 feet. In any case, the evidence indicates that the required primary and secondary fuel breaks can be fully accommodated on the subject property without need for consideration of the extent abutting properties might be under common control. Compliance with fuel break has been made a condition of approval, and will be field verified as part of the Verification of Conditions application review. As conditioned, the required fuel breaks must be maintained in perpetuity and must be accurately depicted on the final site plan.

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district or shall be provided with residential fire protection as evidenced by a long term contract with a fire protection district (FPD) recorded in Lane County Deeds and Records. If the dwelling or manufactured dwelling are not within a FPD, the applicant shall provide evidence that the applicant has submitted a written request for a long term services contract with the nearest FPD and to be annexed into the FPD boundaries. If the FPD and the Planning Director determine that inclusion within a FPD or contracting for residential fire protection is impracticable, the Planning Director shall require as a condition of approval for the dwelling or manufactured dwelling that the property owner implement and maintain a Fire Protection Plan as an alternative means for protecting the dwelling or manufactured dwelling from fire hazards, consistent with the following standards:

Finding 15: The subject property is located within the Hazeldell Rural Fire Protection District. This standard is satisfied without need for a Structural Fire Protection Plan.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the

State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

Finding 16: As a condition of approval, the applicant must provide evidence that the building plans meet this requirement. This requirement will also be field verified by Lane County staff.

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:

(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water; or

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or

(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

Finding 17: The applicant indicates that the proposed dwelling will be served by a future on site well and has submitted well reports for several properties in the vicinity to demonstrate feasibility. Per the Lane County Hearings Official' findings in Planning Action File No. 509-PA18-05804, to verify compliance with this standard, the well must comply with ORS 537.545(1)(d) and Lane Manual 9.160. ORS 537.545(1)(d) provides that the use of the well for single or group domestic purposes in an amount not exceeding 15,000 gallons a day does not require a water use permit. As conditioned to ensure compliance with this standard, the applicant will be required to provide a well log or well constructor's report that conforms with Lane Manual 9.160 and ORS 537.545(1)(d), as applicable.

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for firefighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the firefighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than

one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

Finding 18: Home site access is proposed via a 40-foot wide shared access easement road and driveway loop off the private road. The applicant proposes to establish a shared access easement between the Airport Road terminus and driveway loop adjacent to the home site. The proposed shared access easement is to be established over Tax Lot 843, Tax Lot 103, and the subject property and allow for the improvement of the existing roadway to be improved to the road and driveway standards of LC 16.211(8)(e). Currently, the existing roadway appears to be devoted to commercial forestry and BPA use, is largely contained within the BPA easement north of the Airport, and clips the southwest corner of the Oakridge Airport. As proposed, the access will be adjusted such that it is entirely outside of the Airport property. The proposed driveway loop appears to be existing and outside of the BPA easement.

The application materials detail the route of access from the Fire station to the home site. The file record includes publically available information indicating that the Hazeldell Rural Fire Protection District contracts with the Oakridge Fire Department to provide service and the equipment used by the District.

April 16, 2020 LWLC comments cite several concerns regarding the adequacy of the submitted documentation with respect to grades, road turnarounds, and BPAs easement limitations. As further addressed under **Finding 19 through 26** below, and with consideration of **Finding 26 and 27** addressing Lane Code Chapter 15 and BPA requirements, staff find that the evidence is sufficient to demonstrate it is feasible for the road access and driveway to meet the standards of LC 16.211(8)(e). Compliance with Lane Code 16.211(8)(e) and field verification by staff has been made a condition of approval. Also, written verification of compliance from an Oregon Registered Professional Engineer or the fire district providing residential fire protection service must be provided. All road and driveway improvements, including turnarounds, turnouts, and culverts, and all easement locations must be shown on the final site plans.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

Finding 19: The applicant proposes to improve the proposed shared access easement road and driveway as necessary to comply with the above standards and further confirms that the shared access easement will be improved to road standards with a minimum 20-foot unobstructed width and a 16-foot wide gravel surface and the driveway will be improved to driveway standards with a 12-foot wide gravel surface. Staff note that the application materials provide conflicting information regarding the extent to which the Road and Driveway surfaces are already improved to standard, although it appears from aerial photos and other communications that the roadway and driveway has been established to, or near to, the widths required. Compliance with this standard is required and will be field verified as part of the Verification of Conditions application process.

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not more than 500 feet. Turnarounds shall comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(dd) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

Finding 20: Staff find that compliance with the above standards is feasible. The proposed dwelling is to be accessed from Airport Road via a private shared access easement road. The private road does not appear to exit onto any other roads and is therefore considered to be a dead-end road necessitating turnarounds. Notwithstanding that the application materials provide conflicting statements regarding whether turnarounds or turnouts are proposed or required along the shared access road, staff understands that the applicant proposes turnarounds spaced not more than 500 feet and maintains that these can be accommodated along the existing roadway and may also propose a turnaround at the home site. The roadway is already established, crosses other properties that appear to be in common control, if not ownership, and it appears that these turnarounds can be accommodated within the proposed shared access easement either within or outside of the proposed shared access easement can accommodate the turnarounds either within or outside of the existing BPA easement area. Given that the roadway is found to otherwise comply with the applicable standards and criteria addressed elsewhere in this report, staff find the submitted evidence is sufficient to demonstrate the required turnarounds along the roadway are feasible. Compliance with LC 16.211(8)(e) has been made a condition of approval. The above standard will be field verified by staff during the Verification of Conditions.

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Finding 21: The applicant does not propose any bridges or culverts as a part of the proposed development, In the event that a bridge or culvert becomes necessary during construction of the access, it must be constructed to meet the above standard. General compliance with the applicable standards of LC 16.211(8)(e) has been made a condition of approval. As conditioned, written verification of compliance from an Oregon Registered Professional Engineer or the fire district providing residential fire protection service must be provided for any bridges or culverts within the constructed access.

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon

demonstrating that road and driveway grades in excess of eight percent are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment and water supply.

Finding 22: Materials submitted by the applicant, including current County GIS LiDAR, aerial photo, and 20-foot contour data, and clinometer readings from Brinks Land Improvement submitted on November 23, 2020 (**Exhibit J**), evidence that the road and driveway are existing and slopes do not exceed 16 percent. Brinks Land Improvement indicate that the clinometer readings indicate no area in excess of 10%, most grades measured 3-6 percent, and no presence of inclines that would exceed 15 percent. Compliance with has been made a condition of approval with field verification by staff as part of the Verification of Conditions application process. Since the road and driveway grades exceed eight percent, the fire district or a licensed engineer must certify that the road and driveway grades are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment, and water supply.

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

Finding 23: Lane County Transportation Planning has not indicated that road naming is required for the proposed dwelling. As an advisory condition, staff note that road naming is subject to the provisions of LC 15.305 through 15.335.

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

Finding 24: Based on the applicant's site plan and site access plan, the looped driveway between the shared access road and home site exceed 200 feet. Therefore, turnouts spaced 400 feet or less are required along the driveway. Compliance with the above standard has been made a condition of approval.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for firefighting equipment from its point of origination to its point of destination.

Finding 25: No modification of road standards has been requested with this application or appears to be required. Any modifications or alternatives that may prove necessary or preferred, will be subject to review and approval of a new Type II dwelling application or Modification of Approval application as set forth in Lane Code Chapter 14.090.

F. Compliance with Other Development Standards

Lane Code 16.095: Compliance with LC Chapter 15, Roads

Finding 26: Access to the home site from Airport Road is proposed via a proposed 40-foot wide shared access easement road over Tax Lot 843, Tax Lot 133, and a driveway loop of the road.

See **Exhibit E** for Lane County Transportation Planning (LCTP) comments dated April 2 2020 and incorporated herein by reference. In summary, LCTP comments confirm Airport Road is Rural Local Road under the jurisdiction

and maintenance of Lane County and that Facility permit approval will be required to ensure the existing approach is adequate to support a shared approach to multiple properties and dwellings in accordance with applicable Chapter 15 requirements. LCTP staff further confirm that the private access easements serving the proposed dwelling must meet the minimum private access easement requirements of LC 15.055 (4), (5), and (7). Given that the ownerships traversed by the proposed easement appear to be represented by the same individual, Ed King, staff find that establishment and improvement of the shared access and utility easement compliance with LC 15.055 appears feasible and has been made a condition of approval along with field verification by staff as part of the Verifications of Conditions process. See Also **Finding 27**.

Bonneville Power Association (BPA) Easement

Finding 27: The subject property is traversed by an east-west Bonneville Power Administration easement that partially coincides with the proposed private road access.

LWLC suggests that the expired 2010 approval for the proposed template dwelling home site (509-PA10-05484) did not require compliance with BPA concerns and question whether BPA was notified of the subject application.

Staff note that the applicant's submittal includes December 8, 2010 correspondence in support of the feasibility of an identical access proposal for expired template dwelling approvals on Tax Lot 2900 and Tax Lot 2800 that have been resubmitted for new approvals under 509-PA20-05064 and 509-PA20-05066). The letter notes that tax lots 2800 and 2900 are encumbered by an easement for high-voltage transmission lines and an access road easements that grant certain rights to BPA and limit the landowner's use within the easement area, and necessitate review and approval by BPA for all activities planned within the BPA easement prior to their occurrence. The letter confirmed that the BPA would like to work with the landowner to locate the dwelling so it doesn't interfere with BPA's use of the access road and asked that the dwelling land use decision make note of the BPA restrictions. The expired template dwelling approvals included the advisory statements requested by BPA and an updated statement has been added as an advisory condition for the subject application.

BPA referral comments and communications with the applicant specific to the subject confirm that BPA approval will be required for use and improvement of the proposed shared access easement within the BPA easement area (**Exhibit G**). Via phone, BPA staff indicated that BPA cannot directly confirm feasibility outside of the formal BPA review process. BPA communications with the applicant indicate that additional details regarding turnaround locations, the method of improvement, and possibly a road survey by the property owner will be needed for BPA review and approval so that BPA can work with the property owner to assure safe and secure joint access to the road in the future. BPA also advised the applicant that BPA application review may be delayed due to COVID-19 work restrictions.

On September 29, 2020, the applicant submitted a revised access proposal and home site location to address BPA issues and other considerations. Staff advised the applicant that staff consideration of these application materials appeared to require an application modification if not a new application submittal according to Lane Code Chapter 14. Moreover, staff's review of the BPA communication in the record did not appear to establish that improvement of the existing access road was infeasible and, accordingly, that new construction of a 4,000 foot long shared access easement road segment adjacent to the existing roadway used by BPA would minimize impacts to forest lands as required to comply with LC 16.211(8)(a) and (b). Subsequently, the applicant has directed staff to proceed with review of the initial proposal and has provided additional evidence regarding the slope of the existing roadway.

While the BPA has not directly stated that use of the roadway is conceptually acceptable, the BPA indicates a willingness to work with the applicant to assure safe and secure joint access of the road via BPA's review process. Also, the available information appears to indicate options exist to accommodate any necessary improvements to

the existing roadway within and outside the transmission line easement area. Use of the existing roadway for access appears feasible. Verification of legal use and improvement of the existing roadway has been made a condition of approval.

Lane Code 16.246, Airport Safety Combining Zone (/AS):

(3) Use Limitations. In a/AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

(b) All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

Finding 28: The proposed home site is located within the Transitional Surface of the Oakridge Airport. Per LC 16.246(5)(e), the Transitional Surface extends upward and outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of seven horizontal feet to one vertical foot to the intersection with the Horizontal Surface, a horizontal plane 150 feet above the airport runway.

The application includes 2010 documentation stamped by a surveyor demonstrating that a 50-foot high structure could be developed at a specific location in the north half of the reduced 70 x 110-foot home site boundary in accordance with the above standard. Staff further note that the Primary Surface as delineated on the applicant's September 29, 2020 maps measures approximately 301 from the center of the south home site boundary and approximately 371 feet from the center of north site boundary. Per LC 16.246(2)(d), the elevation of the Oakridge runway is 1419 feet above sea level. Using the 7:1 ratio to determine the height limit at the southern home site boundary, staff calculate the Transitional Surface to be approximately 1464 MSL (301/7=43; 43+1419=1462). The surveyor documentation indicates the elevation at a high point near the center of the south home site boundary is 1435 feet above sea level. This would allow for construction of a home that is 27 feet above grade at the southern border of the home site (1462-1435=27) and increasing to height of 50 feet or more as documented in the record. Given that single-story homes are generally between 14 and 28 feet above grade, compliance with the above requirement appears feasible and has been made a condition of approval to be satisfied as part of the building permit submittal process.

Referral comments from Oregon Department of Aviation (ODA) indicate that pursuant to OAR 738-070-0060, the applicant must submit FAA Form 7460-1 documents to the ODA and receive a Letters of Determination for the proposed construction prior to issuance of any building permits for the template dwelling and provide information

about additional ODA and Federal Aviation Administration (FAA) requirements (**Exhibit H**). As conditioned to ensure compliance with the above standards, the applicant must submit a copy of the FAA Form and Letter of Determination at the time of building permit. The applicant is advised that the ODA will also require post construction documentation.

Lane Code Chapter 16.005(2) - Use of a Development - Landslide Hazards

Finding 29: April 16, 2020 LWLC comments note that the home site and a portion of the access road appear to be within areas mapped by DOGAMI as having high susceptibility for landslides. Per available County GIS DOGAMI map data added to the file record, the subject property contains areas of "Moderate" and "High" landslide susceptibility areas according to DOGAMI landslide hazard maps. Depending on the location of the dwelling within the dwelling site area, these designations will or may require a geotechnical report with submittal of a building permit.

The areas mapped by DOGAMI as moderate and high landslide risk areas generally are divided along the BPA easement boundary, which bisects the north and south part of the property. The easement is developed with transmission lines and the existing roadway, which meander within and outside the south part of the easement. The mapped high landslide risk area to the north corresponds with the steepest portion of the property, where over 20 percent predominate. The moderate susceptibility area generally corresponds with the moderate slopes to the south where the home site is proposed. Contrary to LWLC's assertion, the home site is within the Moderate susceptibility area. Otherwise, the roadway generally follows the boundary between the mapped landslide risk designations, with portions in each. Based on the pixilation, staff interprets the mapped boundary to be generalized. Otherwise, driveway and roadway are within areas or follow contours where slopes are less than 16 percent according to available contour data and LiDAR data in the file record. Clinometer readings reported by Brinks Land Improvement indicate no inclines above 15 percent, if not 10 percent. With consideration of these data and the fact that the access is already constructed, and in the absence of evidence to the contrary, staff do not find that landslide hazard makes the development unfeasible or warrants additional measures beyond those that will be addressed as part of the building permit review process for dwelling construction.

The general requirements at LC 16.005 remain applicable and provide that excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and erosion control. This requirement has been made an advisory condition of approval. The applicant also is advised to consult with Building Department staff to verify related geotechnical requirements that may be required due to the DOGAMI risk designation and slope and soil conditions. This has been made an advisory condition of approval.

House Bill 2225

Finding 30: Approval of this request is subject to compliance with the provisions House Bill (HB) 2225, as implemented in OAR 660-06-027(6)(a). Consistent with these provisions, the subject property has not been reconfigured/property line adjusted since January 1, 2019 in order to meet the template test or to qualify for dwelling. The remaining requirements of HB 2225 have been addressed in this report, as applicable.

IV. DECISION

Based upon the findings above, the application for a forest template dwelling meets the criteria of Lane Code 16.211(5), 16.211(8), and other applicable criteria. Therefore, **APPROVAL** is granted, subject to the conditions stated in **Exhibit A** of this staff report.

PROPOSAL:	**A REQUEST FOR DIRECTOR APPROVAL OF A DWELLING IN THE IMPACTED FOREST LANDS ZONE (F-2), IN ACCORDANCE WITH THE 'TEMPLATE TEST' PROVISIONS OF LANE CODE 16.211(5) AND (8).**

Thank you for the opportunity to review and comment on this proposal. Please accept the following comments from Lane County Transportation Planning:

COMMENTS FROM LANE COUNTY TRANSPORTATION PLANNING

CONDITIONS

- Any private access easements serving the subject property must meet the requirements of Lane Code 15.055(2), (4), (5), and (7).

- Facility Permit approval will be required to ensure the existing access is adequate to support a shared approach to multiple properties/dwellings as proposed in the written statement. For more information about Facility Permits, please call 541.682.6902 or visit: https://lanecounty.org/government/county_departments/public_works/right-of-way_permits/facility_permits/

- As an informational item, stormwater runoff from the subject property must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches.

FINDINGS

Based on the site plan, the subject property "property" is proposed to take access via an existing driveway off Airport Road. The existing access will extend to the proposed dwelling as a private access easement. Airport Road is owned and maintained by Lane County and is functionally classified as a Rural Local road. For the purpose of establishing development setbacks, the minimum right-of-way (ROW) width of Rural Local roads is 50 feet (Lane Code [LC] 15.070(1)(c)(gg)). Proposed development as conceptually shown meets this requirement.

Lane Code 15.055: Minimum Requirements for Private Access Easements

(2) When a Private Access Easement is used to provide access to a vacant lot or parcel where development is proposed, prior to land use and zoning authorization for the proposed development the following shall apply:

EXHIBIT E

(c) **The requirements specified above in LC 15.055(2)(a) through (b) shall apply only to lands outside of a County-designated Forest zone. Lands within a Forest zone shall be governed by the siting and development standards of the applicable zoning district.**

Pursuant to Lane Code 15.055(2)(c), transportation Planning defers to Land Management Division to ensure the private access easement meets the applicable siting and development standards of the Impacted Forest Lands Zone (F-2).

(4) **The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.**

(5) **All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.**

(7) **Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of the grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.**

Compliance with LC 15.055(4), (5), and (7) must be demonstrated.

Lane Code 15.205: Facility Permits

Facility Permits are required for the placement of facilities and development within Lane County right-of-way. Facilities and development include, but are not limited to: road improvements; sidewalks; new or reconstructed driveway or road approach intersections; utility placements; excavation; clearing; grading; culvert placement or replacement; stormwater facilities; or any other facility, thing, or appurtenance [Lane Code 15.205(1)].

A review of Lane County Facility Permit records indicates that there is no record of a Facility Permit for the existing access off Airport Road.

Lane Manual 15.515: Drainage

Stormwater runoff from new private development must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches (Lane Manual 15.515). Accordingly, levels of stormwater directed off-site post-construction of the improvements must match pre-development flows. Ditches adjacent to County roads are designed solely to accommodate stormwater runoff generated by the roadways themselves.

Shawna and Jared,

Please confirm receipt and please send Notice of Decision for the three applications noted above.

Thank you.

Lauri Segel
LWLC

- The applicant relies on the 2010 application materials for all three 2020 applications; in PA 20-05065, the application says a rectangular template map will not be used; however, the 2010 application and decision for tax lot 843 relied on a rectangular template that did not appear to be aligned with the road; that decision did not discuss the actual alignment of the rectangular template nor whether at least one of the required dwellings was on the same side of the road as the proposed dwelling

- The 2010 decisions did not require proof of slopes, and the applicant's assertions about the slopes at the time appear to understate the area of tax lots 843 and 2900 having slopes greater than 10%

- It does not appear the 2010 decisions required compliance with the BPA concerns regarding their easement that the applicant intends to use to access the three proposed dwellings; it also does not appear that BPA was sent referral notice for the 2020 planning actions

- Tax lot 2900 is within an area designated by DOGAMI mapping as having a high susceptibility for landslides; that area appears to coincide with the proposed dwelling site on tax lot 2900, and a portion of the long access easement roadway that is between tax lot 843 and 2900

- The site plans do not identify the required turnarounds with the applicable spacing

- All the parcel/dwelling count lists have errors including but not limited to siting to preliminary LLVs instead of noticed LLVs

Subject: RE: 509-PA20-05064 E.KING Oakridge

Kimberly,

Thank You for your inquiry into use of the BPA access road for driveway access to your clients property.

I have attached a copy of the BPA easements and the plan & profile drawing for the area crossing your clients property. BPA's Hills Creek-Lookout Point No. 1, 115 kV transmission line right of way is 100 feet in width. The deeded access road includes portions of the road that are both inside and outside the corridor width. A survey by your client locating the right-of-way boundary may be needed to assist proper siting of structures beyond the boundary.

Also attached, is a copy of BPA's land use application form. A $250.00 non-refundable fee will be required to process the application.

Your email mentioned plans to upgrade the road and bring it up to county standards. As part of the application, BPA would like to know, the equipment that will be used to do the work, what grades and turnouts are planned, what gates may be installed and whether any utilities will be undergrounded in the road. (Distances of road features from transmission structures are especially useful for analysis and can reduce the need for site visits.) This information will allow BPA to do a

EXHIBIT G

thorough analysis of safety hazards that could arise from excavation and grading work in the right-of-way and to work with your client to assure safe and secure joint access to the road in the future.

Please note that a portion of the BPA access road crosses the airport property as it turns north from the county road. Permission from the Oregon State Board of Aeronautics may be needed to improve and use that portion of the road.

Due to COVID-19 work restrictions, applications can take longer to process than usual. Detailed plans and work descriptions greatly assist in the turnaround time for responses. Email correspondence and application submission is vital to aid response time.

Please contact Myself or Janai if you have further questions or concerns.

Subject: [EXTERNAL] FW: 509-PA20-05064 E.KING Oakridge

Good afternoon, Janai:

I represent Ed King on the subject properties near Oakridge. Based on our site plans, none of the proposed dwellings are within the BPA right-of-way, which appears to be 80-90'. It is not our intention to propose any dwellings within the BPA easement. In fact, no structures will be built within the BPA easement.

However, we would like to utilize the existing access road. I was under the understanding that it was an old logging road. Regardless, as part of development, it will need to be improved to County standards (16' wide; compacted gravel; 20' of cleared area). This will also benefit BPA and give better access.

Attached is a rough site plan that shows all the parcels and the location of proposed access. It is feasible for us to move the dwelling site on TL 2900 eastward, if that would alleviate your concerns. A couple detailed site plans are also included.

In any case, please let me know what we need to do to obtain permission to use the existing access road, part of which is within the BPA easement?
Further, could you clarify the location and width of the BPA easement so that we can incorporate into our site plans, please?

Thank you much,
Kim

Kim, Sounds good. You may have better luck with Janai than I did, especially if you show her the c. 2010 letter to her.

If you are unable to get something from them that confirms feasibility by Friday and would like me to hold off on the decision until that can be provided, I'll need an extension to enable that.

Kim, BPA comment for this template dwelling application are below. I have followed up with Janai to verify whether the situation is similar to that in 2010 where we had sufficient confirmation to make feasibility findings. It sounds like that is not the case this time- they would need more info and an application before they can confirm that use of their access for the proposed purposes is something arrangements can be made for. Please advise how you would prefer we proceed with the review.

Thanks Janai. At this point, we just need to know that the proposed access is feasible, e.g. that BPA is amenable to an arrangement with the applicants. Is the BPA able to confirm that at this stage? If not, is that what might be 12 weeks out or does the applicant need to submit one of your applications to before you would be able to respond?

My error I apologize this will need to be approved by BPA & has not been submitted as of yet. The existing case file we have is on another E.King parcel in Lane County.

I have attached a map that reflects where our lines are it appears the landowner will need to complete one of our applications for approval before building any dwellings in our easement areas. His parcels are marked by blue dots...
Thank you~

M., Lane County, Oregon, for the following purposes, namely: the right to enter and to clear of timber, danger trees, and [illegible] to build, cut, fill, level, grade, drain, surface, maintain,

Bonneville Power Administration, [illegible]
ence, made a part hereof.

The Grantor reserves the right of ingress and egress over and across said roads and the right to pass and repass along and on said roads insofar as the same extend across the lands of the Grantor, said right to be exercised in a manner that will not interfere with the use of the roads by the UNITED STATES OF AMERICA, its employees, contractors, or assigns.

It is understood and agreed that if said roads are damaged by the UNITED STATES OF AMERICA, its employees, contractors, or assigns, the UNITED STATES OF AMERICA, subject to the availability of appropriations, or its assigns, will repair such damage. It is further understood and agreed that the Grantor may erect or maintain fences across such roads, provided adequate gates of not less than ten feet in width are installed, which may be kept locked, provided the UNITED STATES OF AMERICA is also permitted to install its own lock thereon.

TO HAVE AND TO HOLD said easement and rights unto the UNITED STATES OF AMERICA and its assigns, forever.

The Grantor covenants to and with the UNITED STATES OF AMERICA and its assigns that the title to all brush, timber, or structures existing upon the rights of way on the date hereof, and the title to all present danger trees shall vest in the UNITED STATES OF AMERICA on said date; and that title to any additional danger trees shall vest in the UNITED STATES OF AMERICA upon their being cut pursuant to the terms hereof; and that title to all future danger trees cut pursuant to the terms hereof shall remain in the owner thereof at the date of cutting; and that the consideration stated herein is accepted by the Grantor as full compensation for all damages incidental to the exercise of said easement and danger tree rights, except payment for any additional danger trees as defined hereinabove which may be cut under authority of the UNITED STATES OF AMERICA as herein provided.

The Grantor also covenants to and with the UNITED STATES OF AMERICA that Grantor is lawfully seized and possessed of the lands aforesaid; has a good and lawful right and power to sell and convey same; that same are free and clear of encumbrances, except as above indicated; and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the lawful claims and demands of all persons whomsoever.

The UNITED STATES OF AMERICA, Department of the Interior, acting by and through the Bonneville Power Administrator, pursuant to the Acts of Congress approved August 20, 1937 (50 Stat. 731, 16 U.S.C. 832a, et seq.), as amended, and June 30, 1949 (63 Stat. 377, 40 U.S.C. 471, et seq.), as amended, and regulations and delegations of authority issued pursuant thereto, and as part of the consideration for the easement rights hereinabove described, does hereby remise, release and quitclaim to the Grantor all that portion of Tract LO-35 as acquired by easement dated October 10, 1960 and recorded in Reel 162 '60 D, File No. 15633, Official Records of Lane County, Oregon, which lies southerly of the above-described Tract Lo-R-35.

IN WITNESS WHEREOF, EDWARD HINES LUMBER CO. has caused this instrument to be signed by its proper officers thereunto duly authorized and its corporate seal to be hereunto affixed this 18 day of July, 1968.

Subject: RE: ODA Comment: 509-PA20-05065 & 509-PA20-05066

[EXTERNAL ⚠]

Hi Jared,

Great to hear from you and thanks for reaching out. I'm doing well, thank you. I hope you are as well.

Yes, the ODA requests submittal of the FAA Form 7460-1 still be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport.

The applicant must submit FAA Form 7460-1 documents to the ODA and receive Letters of Determination for the proposed construction as required by OAR 738-070-0060, prior to issuance of any building permits for the Template Dwellings.

The applicant should note that a separate FAA Form 7460-1 must be submitted for each Template Dwelling.

Notification to the FAA is also required for each Template Dwelling and is completed through the FAA's online portal:

https://oeaaa.faa.gov/oeaaa/external/portal.jsp

The ODA Letters of Determination will provide recommendations for the proposed construction in regards to aviation and public safety.

I am happy to reach out to the applicant directly if further clarification is needed.

Thanks again and please let me know if you have further questions.

Best regards,

Seth Thompson

Hi Seth –

EXHIBIT H

I hope all is well with you. I just want to confirm that the ODA would still like the attached form to be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport?

If so, is their submittal of the form to you all sufficient for the County to issue building permits, or do they need to see the processing of the form through with ODA first?

Thank you much,

Jared Bauder | Planner, CFM

[EXTERNAL SENDER]

Good afternoon,

Thank you for providing the opportunity for the Oregon Department of Aviation (ODA) to comment on Department File: 509-PA20-05065.

The ODA has determined that a FAA FORM 7460-1 will need to be completed by the applicant for the proposed construction.

The completed FAA FORM 7460-1 must be submitted to the ODA and FAA prior to final approval of building permits or land use decisions.

I have attached a FAA FORM 7460-1 for reference.

Please let me know if you have any questions.

Best regards,

Seth Thompson

NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION

§ 77.7 Form and time of notice.

(a) If you are required to file notice under §77.9, you must submit to the FAA a completed FAA Form 7460–1, Notice of Proposed Construction or Alteration. FAA Form 7460–1 is available at FAA regional offices and on the Internet.

(b) You must submit this form at least 45 days before the start date of the proposed construction or alteration or the date an application for a construction permit is filed, whichever is earliest.

(c) If you propose construction or alteration that is also subject to the licensing requirements of the Federal Communications Commission (FCC), you must submit notice to the FAA on or before the date that the application is filed with the FCC.

(d) If you propose construction or alteration to an existing structure that exceeds 2,000 ft. in height above ground level (AGL), the FAA presumes it to be a hazard to air navigation that results in an inefficient use of airspace. You must include details explaining both why the proposal would not constitute a hazard to air navigation and why it would not cause an inefficient use of airspace.

(e) The 45-day advance notice requirement is waived if immediate construction or alteration is required because of an emergency involving essential public services, public health, or public safety. You may provide notice to the FAA by any available, expeditious means. You must file a completed FAA Form 7460–1 within 5 days of the initial notice to the FAA. Outside normal business hours, the nearest flight service station will accept emergency notices.

§ 77.9 Construction or alteration requiring notice.

If requested by the FAA, or if you propose any of the following types of construction or alteration, you must file notice with the FAA of:

(a) Any construction or alteration that is more than 200 ft. AGL at its site.

(b) Any construction or alteration that exceeds an imaginary surface extending outward and upward at any of the following slopes:

(1) 100 to 1 for a horizontal distance of 20,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(2) 50 to 1 for a horizontal distance of 10,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway no more than 3,200 ft. in actual length, excluding heliports.

(3) 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section.

(c) Any highway, railroad, or other traverse way for mobile objects, of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, for a private road, 23 feet for a railroad, and for a waterway or any other traverse way not previously mentioned, an amount equal to the height of the highest mobile object that would normally traverse it, would exceed a standard of paragraph (a) or (b) of this section.

(d) Any construction or alteration on any of the following airports and heliports:

(1) A public use airport listed in the Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement of the U.S. Government Flight Information Publications;

(2) A military airport under construction, or an airport under construction that will be available for public use;

(3) An airport operated by a Federal agency or the DOD.

(4) An airport or heliport with at least one FAA-approved instrument approach procedure.

(e) You do not need to file notice for construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded structure will not adversely affect safety in air navigation;

(2) Any air navigation facility, airport visual approach or landing aid, aircraft arresting device, or meteorological device meeting FAA-approved siting criteria or an appropriate military service siting criteria on military airports, the location and height of which are fixed by its functional purpose;

(3) Any construction or alteration for which notice is required by any other FAA regulation.

(4) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

INSTRUCTIONS FOR COMPLETING FAA FORM 7460-1

PLEASE TYPE or PRINT

ITEM #1. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #2. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #3. New Construction would be a structure that has not yet been built.

Alteration is a change to an existing structure such as the addition of a side mounted antenna, a change to the marking and lighting, a change to power and/or frequency, or a change to the height. The nature of the alteration shall be included in ITEM #21 "Complete Description of Proposal".

Existing would be a correction to the latitude and/or longitude, a correction to the height, or if filing on an existing structure which has never been studied by the FAA. The reason for the notice shall be included in ITEM #21 "Complete Description of Proposal".

ITEM #4. If Permanent, so indicate. If Temporary, such as a crane or drilling derrick, enters the estimated length of time the temporary structure will be up.

ITEM #5. Enter the date that construction is expected to start and the date that construction should be completed.

ITEM #6. Please indicate the type of structure. DO NOT LEAVE BLANK.

ITEM #7. In the event that obstruction marking and lighting is required, please indicate type desired. If no preference, check "other" and indicate "no preference" DO NOT LEAVE BLANK. NOTE: High intensity lighting shall be used only for structures over 500' AGL. In the absence of high intensity lighting for structures over 500' AGL, marking is also required.

ITEM #8. If this is an existing tower that has been registered with the FCC, enter the FCC Antenna Structure Registration number here.

ITEM #9 and #10. Latitude and longitude must be geographic coordinates, accurate to within the nearest second or to the nearest hundredth of a second if known. Latitude and longitude derived solely from a hand-held G P S instrument is NOT acceptable. A hand-held GPS is only accurate to within 100 meters (328 feet) 95 percent of the time. This data, when plotted, should match the site depiction submitted under ITEM #20.

ITEM #11. NAD 83 is preferred; however, latitude and longitude may be submitted in NAD 27. Also, in some geographic areas where NAD 27 and NAD 83 are not available other datum may be used. It is important to know which datum is used. DO NOT LEAVE BLANK.

ITEM #12. Enter the name of the nearest city and state to the site. If the structure is or will be in a city, enter the name of that city and state.

ITEM #13. Enter the full name of the nearest public-use (not private-use) airport or heliport or military airport or heliport to the site.

ITEM #14. Enter the distance from the airport or heliport listed in #13 to the structure.

ITEM #15. Enter the direction from the airport or heliport listed in #13 to the structure.

ITEM #16. Enter the site elevation above mean sea level and expressed in whole feet rounded to the nearest foot (e.g. 17'3" rounds to 17', 17'6" rounds to 18'). This data should match the ground contour elevations for site depiction submitted under ITEM #20.

ITEM #17. Enter the total structure height above ground level in whole feet rounded to the next highest foot (e.g. 17'3" rounds to 18'). The total structure height shall include anything mounted on top of the structure, such as antennas, obstruction lights, lightning rods, etc.

ITEM #18. Enter the overall height above mean sea level and expressed in whole feet. This will be the total of ITEM #16 + ITEM #17.

ITEM #19. If an FAA aeronautical study was previously conducted, enter the previous study number.

ITEM #20. Enter the relationship of the structure to roads, airports, prominent terrain, existing structures, etc. Attach an 8-1/2" x 11" non-reduced copy of the appropriate 7.5 minute U.S. Geological Survey (USGS) Quadrangle Map MARKED WITH A PRECISE INDICATION OF THE SITE LOCATION. To obtain maps, contact USGS at 1-888-275-8747 or via internet at "http://store.usgs.gov". If available, attach a copy of a documented site survey with the surveyor's certification stating the amount of vertical and horizontal accuracy in feet.

ITEM #21.

- For transmitting stations, include maximum effective radiated power (ERP) and all frequencies.
- For antennas, include the type of antenna and center of radiation (Attach the antenna pattern, if available).
- For microwave, include azimuth relative to true north.
- For overhead wires or transmission lines, include size and configuration of wires and their supporting structures (Attach depiction).
- For each pole/support, include coordinates, site elevation, and structure height above ground level or water.
- For buildings, include site orientation, coordinates of each corner, dimensions, and construction materials.
- For alterations, explain the alteration thoroughly.
- For existing structures, thoroughly explain the reason for notifying the FAA (e.g. corrections, no record or previous study, etc.).

Filing this information with the FAA does not relieve the sponsor of this construction or alteration from complying with any other federal, state or local rules or regulations. If you are not sure what other rules or regulations apply to your proposal, contact local/state aviation's and zoning authorities.

Paperwork Reduction Work Act Statement: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection displays a currently valid OMB Control Number. The OMB control number for this information collection is 2120-0001. Public reporting for this collection of information is estimated to be approximately 39 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, completing and reviewing the collection of information. All responses to this collection of information are mandatory for anyone proposing construction or alteration that meets the criteria contained in 14 CFR 77. This information is collected to evaluate the effect of proposed construction or alteration on air navigation and is not confidential. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177-1524.

RECEIVED MAR 30 2020

Regarding Department File: 509-PA20-05064
Applicant: EDWARD KING

Staff: Shawna Adams

Comments:

We know it doesn't matter what we tell you or how we feel about more homes, I'm sure they already have it in the works, We say NO more houses. Progress Sucks!! Keep the Airport clear of more homes.

Mr. King can build his Castle elsewhere. Keep Westfir Clear of more homes altogether!

Subject: King: Oakridge Access Road Grade Statement
Attachments: Brink Color Logo copy.pdf; Untitled attachment 00162.htm

[EXTERNAL ⚠]

See below from Mark Brink. He has measured grade on the existing road with a clinometer.
Please put this email into the record of PA 20-05066, PA 20-05064 and PA 20-05065.
TL 843 should go forward as supplemented, as the revision was slight;
TL 2800 and 2900 can go forward as originally filed (dwelling site and access) per conversations with Shawna.
No portion of the accessway fall within the runway.

Subject: Oakridge Access Road Grade Statement

Thom,

To whom it may concern , We did an evaluation of the road to access lots 2800 and 2900 next to the Oakridge Airport that need to be used for access, By using a clinometer to measure the percentage of slope at any point in the road. We found no area that exceeded 10% and most areas were 3% - 6% there are no inclines that would exceed 15% on the road areas in question.

Any Questions please let me know.

Thanks,
Mark W. Brink

Applicant's Statement addressing Lane Code Siting Standards for development of a dwelling on Map 21-35-07-30 Taxlot 2900

LC 16.211(8): Siting Standards for Dwellings, Structures and Other Uses. The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h), (2) (j), and (2)(o), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through (b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

RESPONSE: The above provision requires that the standards of subsections (a) through (b) below be weighed together with the requirements of (c) and (e) below in order to determine the best site.

(a) Setbacks. Residences, dwellings, or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet from any ravine, ridge or slope greater than 40 percent;

RESPONSE:

Near other dwellings: The dwelling site is located in the southeast portion of the parcel. The area is sparsely settled with dwellings. The proposed dwelling site is located approximately 700 feet from the 4 dwellings located due south on the south side of the Oakridge Airport. The site is as close to dwellings on other tracts as it can be while maximizing proximity to the forest lands to the north.

Near existing roads: The homesite is located immediately adjacent to an existing road running under the BPA power lines to the north. See Exhibits 1 & 4 – Site Plan and Aerial.

On the most level part of the tract. The tract is level on the south side of the power lines and slopes down to the north on the north side of the lines See Exhibits 2 & 3 Based on these materials, the dwelling site is on the most level portion of the tract, especially when this provision is balanced with other provisions, such as setbacks, access, slopes, and minimal intrusion into forested areas.

On the least suitable portion of the tract for forest use: The entire area of the parcel is comprised of Soil Map Unit Nekia (89D & F) with a forest productivity ratings of at least 160 cu.ft./ac/yr. There is no ability to construct the home within an area of less forest productivity. Exhibit F. Soils are not determinative of forestry suitability, but are relevant. When balanced with other standards, the dwelling site is located on the least suitable portion of the tract for forest use.

EXHIBIT N N
Part 1

At least 30 feet from any ravine, ridge or slope greater than 40%. There are no ravines, ridges or slopes greater than 40% within 30 feet of the site. See Exhibit 2 – Detail Site Plan LIDAR.

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses;

RESPONSE: Intrusion into forest areas is minimized by the placement of the dwelling in the south portion of the property between the airport and the BPA power lines.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

RESPONSE: The subject property is bordered by property zoned F-2 to the west, north, and east. Property to the south is zoned AO. The dwelling site is setback 100 feet from the east property line and 400 feet and 600 feet from the north and west property lines respectively (the directions of the F-2 properties).

(iv) (iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) or LC 16.253(6), as applicable, are met; and

RESPONSE: There are no Class I streams on the subject property

(v) Structures other than a fence or sign cannot be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(bb) 30 feet from all property lines other than those described in LC 16.211(8)(a)(v)(aa) above; and

(cc) The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

RESPONSE: The parcel does not border any public road right-of-way. The dwelling site is at least 30 feet from all property lines. See Site Plan. (8)(a) and (b) through (d) are addressed below. See Site Plan.

(b) The amount of forest lands used to site access roads, service corridors, and structures must be minimized.

RESPONSE: The site will be accessed from Airport Road by an access road across Map 21-25-12 #843 and Map 21-35-07-40 #133 that also serves as access to the parcel to the east Map 21-35-07-30 #2800. The roadway will be constructed to county standards. Service corridors for utilities will run adjacent to the proposed roadway and driveway. Thus, the use of the proposed shared roadway to serve multiple parcels assures the amount of forestland used to site roads and services will be minimized.

The applicant believes that this standard applies only to structures other than the dwelling, as the relationship between dwellings and forestlands is already addressed under (ii). There are no other proposed structures on the property. However, even if the dwelling site is subject to this analysis, the sites are sited with all other siting standards in mind, thus reducing the amount of forest lands used. The response under (ii) is herein incorporated.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:
(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements. (aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house. As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	*Feet of Primary Safety Zone*	*Feet of Additional Safety Zone Down Slope*
0	*30*	*0*
10	*30*	*50*
20	*30*	*75*
25	*30*	*100*
40	*30*	*150*

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent

RESPONSE: The site is level at the proposed homesite. The parcel slopes downward to the north on the north side of the BPS power lines. There are no slopes greater than 10% within 30 feet of the dwelling site. The applicant has provided a 30-foot primary fuel break in all directions. See Exhibit 1 - Site Plan. There are no slopes in excess of 40% within 30 feet of the home site.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

RESPONSE: The proposed dwelling site will have a secondary fuel break that extends to the south property line, east property line, and the BPA easement to the north. The secondary fuel break to the west will be 100 feet.

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district . . .

RESPONSE: The parcel is located within the Hazeldell Rural Fire Protection District.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

RESPONSE: This is instructional.

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:
(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or
(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

RESPONSE: Based on well log data for nearby wells, Exhibit KK – Water Resources Report, there is sufficient proof to make a conclusion that there is a feasible domestic water supply available. The subject property is exempt under ORS 537.545, and agrees to submit the required report once the well is complete.

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the fire fighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

RESPONSE: The subject property is within a fire district. The route of access from the Fire District located at 47592 Hwy 58 to the property is by way of a State Highway (58) for a distance of 1 mile to Airport Road (County road). Airport Road is paved for the entire ¾ mile length to get to the subject property. The proposed shared road and driveway from Airport Road to the subject property will be improved to the applicable Lane Code 16.211 fire standards See Exhibit 6.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

RESPONSE: Access to the site is from Airport Road via an existing shared easement road and a driveway that will be improved to Lane Code 16.211 standards. Exhibit 6 It is feasible to construct the road and driveway to the above county standards.

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not more than 500 feet. Turnarounds shall comply with these design and construction standards:
(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or
(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and
(cc) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

RESPONSE: Turn arounds within the road portion of the shared access are illustrated on Exhibit 6 at intervals of not more than 500 feet. A turn around will be provided at the dwelling,

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from a engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

RESPONSE: No bridges are required or existing. No new culverts are proposed. However, if any are needed, the applicant agrees to install per the above.

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply.

RESPONSE: The proposed shared roadway and driveway can be constructed on slopes not exceeding 16%.

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

RESPONSE: This is instructional.

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

RESPONSE: The driveway portion of the access is less than 200 feet in length to the home site. See site plan, Exhibit 1, Exhibit 6.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for fire fighting equipment from its point of origination to its point of destination.

RESPONSE: Not applicable.

(9) Other Development Standards.
(a) Maintenance, Removal and Replacement of Indigenous Vegetation within the Riparian setback area. Maintenance, removal and replacement of indigenous vegetation within the riparian setback area designated for riparian vegetation protection by the comprehensive plan must comply with the provisions of LC 16.253(2) or LC 16.253(6), as applicable.

No removal of riparian vegetation is proposed for development of the dwelling.

(b) Signs.
(i) Signs shall not extend over a public right-of-way or project beyond the property line.
(ii) Signs shall not be illuminated or capable of movement.
(iii) Signs shall be limited to 200 square feet in area.

RESPONSE: No signs are proposed.

Applicant's Statements addressing Lane Code 16.246 Airport Safety Combining Zone requirements for development of a dwelling on Map 21-35-07-30 Taxlot 2900

LC 16.246(2) Applicability. The /AS-RCP Zone is applied to those lands adjacent to the Creswell Airport, the Cottage Grove Airport, the McKenzie Airport, the Oakridge Airport and Florence Airport which are encompassed by the surfaces set forth and described in LC 16.246(5) below and diagramed in LC 16.246(9) below. For purposes of this Chapter, the elevations of the five runways are established as follows:

(a) Cottage Grove - 641 feet above sea level.
(b) Creswell - 535 feet above sea level.
(c) Florence - 12 feet above sea level.
(d) Oakridge - 1419 feet above sea level.
(e) McKenzie - 1620 feet above sea level.

The determinations of the height of the various airport surfaces below are based on the established primary surface of the Oakridge Airport runway at an elevation of 1419' MSL.

(3) Use Limitations. In a/AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

The homesite is located underneath the Transitional Surface to the north of the Primary Surface. It is feasible to construct a dwelling on the subject property that does not penetrate the surface as described below. See analysis under the applicable Lane Code 16.246(5)(e) provision.

(b) All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

It is feasible to meet these requirements when development of the property occurs. The applicant will file a Notice of Construction or Alteration (Form 7460-1) with the Federal Aviation Administration and Oregon Department of Aviation.

(4) Uses Prohibited. The area lying beneath the Approach Surface beginning at the end of the Primary Surface and extending outward a horizontal distance of 1,000 feet shall be considered to be

EXHIBIT N N
PART 2

a clear zone. Within this clear zone, no structure or object, except for fences and navigational aids approved by the airport operator, shall be erected, placed, altered, allowed to grow or be maintained above the surface of the ground.

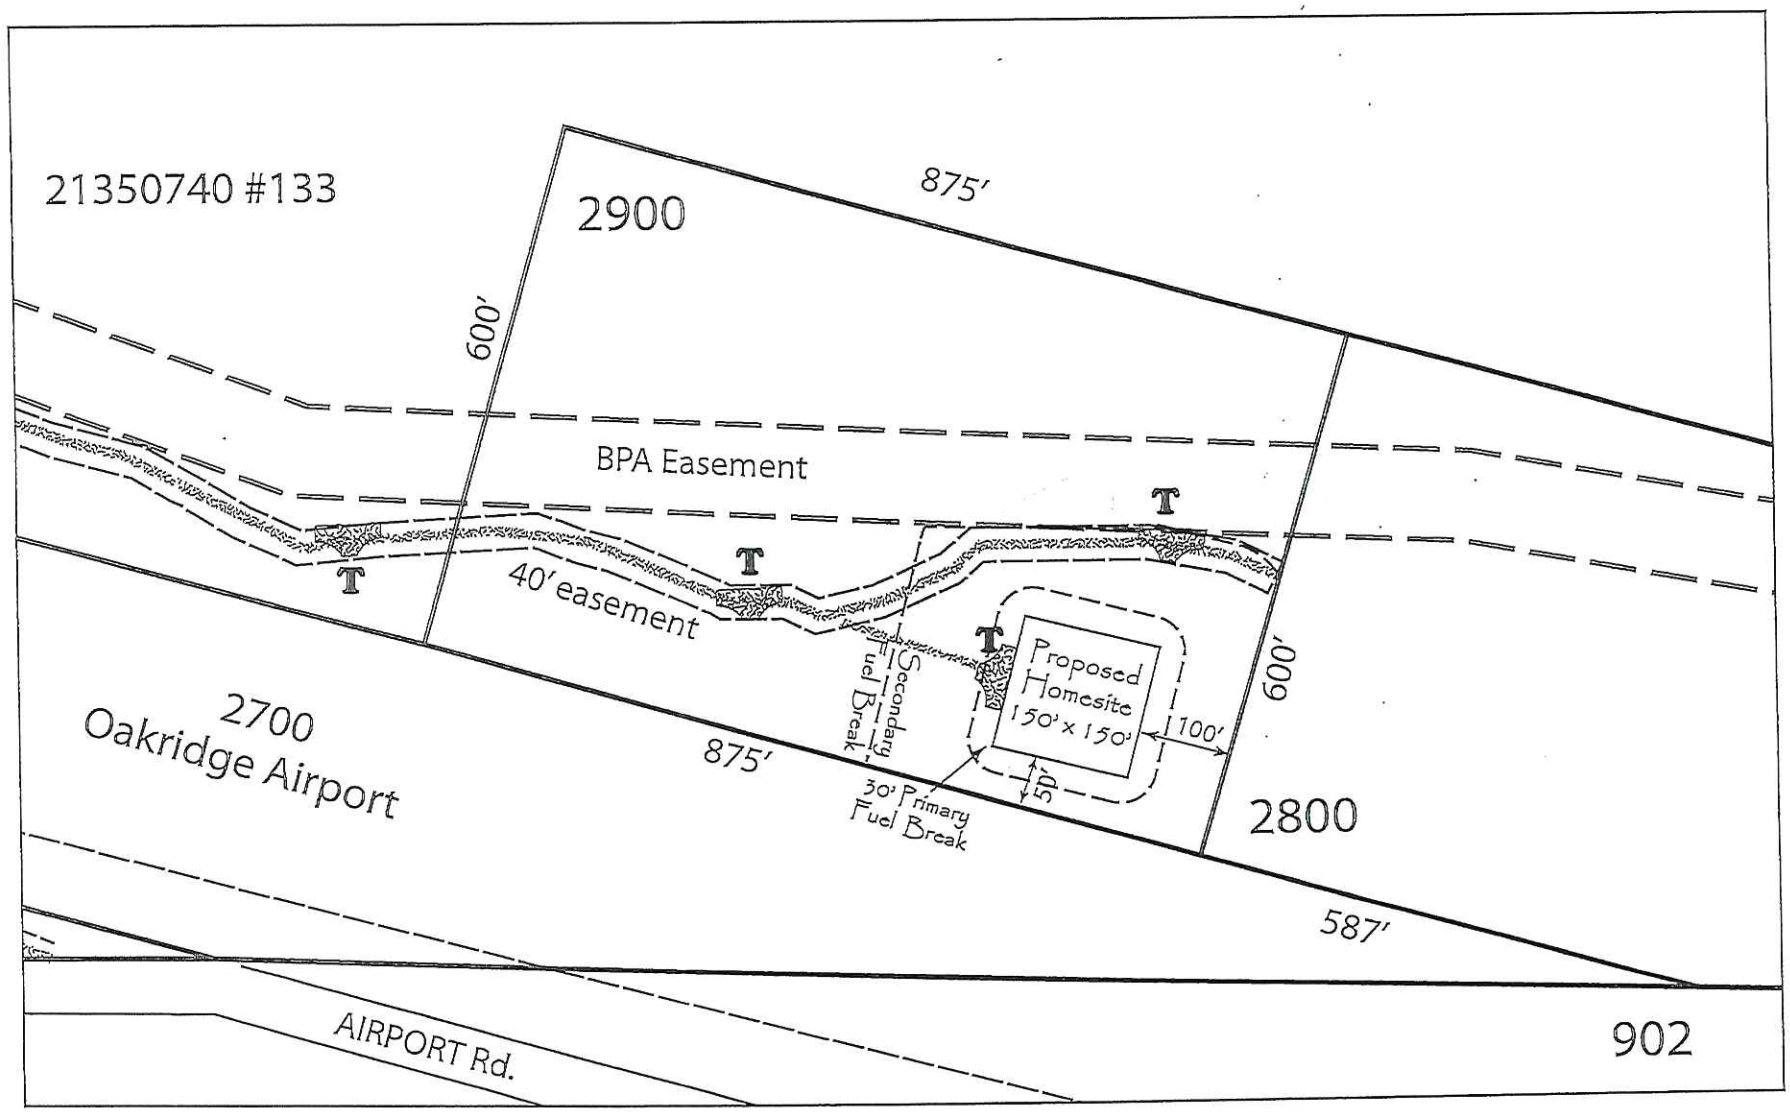
The subject property is not located beneath the Approach Zone of the Oakridge Airport.

(5) Surface Described.

(a) Approach Surface. A surface longitudinally centered on the runway centerline, extending outward and upward from the ends of the Primary Surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 5,000 feet and widening from the width of 250 feet to 1,250 feet at its outer edge.

The subject property is not located beneath the Approach Zone of the Oakridge Airport.

(d) Primary Surface. The Primary Surface is a plane longitudinally centered on the runway centerline and extending 200 feet beyond the ends of the prepared runway surface and having a width of 250 feet. For purposes of this section, the Primary Surface shall be considered as having the same elevation as its respective runway as the same are specified in LC 16.246(2) above.



The proposed homesite is located 230' from the side of the primary surface. The Primary Surface is established at an elevation of 1419' MSL above.

(e) Transitional Surfaces. These surfaces extend upward and outward at 90 degree angles to the runway centerline and the runway centerline extended at a slope of seven feet horizontally for each foot vertically from the sides of the Primary Surface and Approach Surface to the point of intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above the runway.

The southern boundary of the proposed is located 230' from the side of the primary surface when measured perpendicular to the runway centerline. The northern boundary of the proposed homesite is located 380 feet from the side of the primary surface when measured perpendicular to the runway centerline. Using the 7:1 ration to determine the height of the Transitional Surface at the homesite, it can be determined that the Transitional Surface is located at a height of 1451' MSL [230' / 7 = 32.8'; 32 + 1419' = 1451'] at the southern boundary of the proposed homesite. It can also be determined that the Transitional Surface is located at a height of 1473' MSL [380' / 7 = 54.3'; 54 + 1419' = 1473'] at the northern boundary of the proposed homesite. Prior information in the record established the elevation at the level homesite at 1421' MSL. This allows for the construction of a home that is 30 feet in height at the southern border of the homesite (1451' – 1421' = 30') and increasing to a height of 52 feet at the northern boundary of the homesite (1473' – 1421' = 30'). It is feasible to develop a residence in the proposed homesite location within these height limitations.

FARM USE AND FOREST MANAGEMENT EASEMENT

Grantor(s)_____
print name(s)

is/are the owner(s) of real property as described on Exhibit "A", attached hereto. In accordance with the conditions set forth in the decision of the Lane County Land Management Division dated _____ approving Planning Action PA # _____, for Assessor's Map and Tax Lot _____ **Grantor**(s) hereby grant(s) to the owner(s), **(Grantees)**, of all property zoned for farm or forest use, a perpetual non-exclusive farm use and forest practices management easement as follows:

1. The Grantor(s), the heirs, successors, and assignees acknowledge by the granting of this easement that the above described property is situated in a farm or forest zone in Lane County, Oregon, and may be subjected to conditions resulting from farm use or commercial forests operations on lands zoned for farm or forest use. Such operations may include farm use as defined in ORS 215.203 and management and harvesting of timber, disposal of slash, reforestation, application of chemicals, road construction and maintenance, and other accepted and customary forest management activities conducted in accordance with Federal and State Laws. Said farm use and forest management activities ordinarily and necessarily produce noise, dust, odors, smoke and other conditions, which may conflict with Grantor's use of Grantor's property for residential purposes, and Grantor(s) hereby give(s) an easement to the property owners of lands zoned for farm or forest use for the resultant impact on Grantors property caused by the farm use or forest management activities on such lands.

2. Grantor(s) shall comply with all restrictions and conditions for maintaining residences in farm and forest zones that may be required by State, Federal, and local land use laws and regulations. Grantor(s) will comply with all fire safety regulations developed by the Oregon Department of Forestry for residential development within a forest zone.

This easement is appurtenant to all property zoned for farm or forest use, and shall bind the heirs, successors, and assignees of Grantor(s), and shall endure for the benefit of the owners of lands zoned for farm or forest use, their heirs, successors, and assignees. The grantees, their heirs, successors, and assignees are hereby expressly granted the right of third party enforcement of this easement.

REV. 3/2011

BEFORE THE LAND USE BOARD OF APPEALS
OF THE STATE OF OREGON

LANDWATCH LANE COUNTY,
Petitioner,

and

1000 FRIENDS OF OREGON,
Intervenor-Petitioner,

vs.

LANE COUNTY,
Respondent,

and

NIMPKISH LLC,
Intervenor-Respondent.

LUBA No. 2020-030

FINAL OPINION
AND ORDER

Appeal from Lane County.

Sean Malone filed a petition for review and reply brief and argued on behalf of petitioner.

Andrew Mulkey filed a petition for review and reply brief and argued on behalf of intervenor-petitioner.

No appearance by Lane County.

Michael E. Farthing filed the response briefs and argued on behalf of intervenor-respondent.

RYAN, Board Member; RUDD, Board Chair; ZAMUDIO, Board Member, participated in the decision.

REMANDED 01/21/2021

You are entitled to judicial review of this Order. Judicial review is governed by the provisions of ORS 197.850.

Opinion by Ryan.

NATURE OF THE DECISION

Petitioner appeals a decision by a hearings officer approving an application for a forest template dwelling.

MOTION TO INTERVENE

1000 Friends of Oregon (1000 Friends) moves to intervene on the side of petitioner. There is no opposition to the motion and it is allowed.

Nimpkish LLC (intervenor), the applicant below, moves to intervene on the side of the county. There is no opposition to the motion and it is allowed.

FACTS

Intervenor's property is approximately 10 acres in size and zoned Impacted Forest Land (F-2). The property includes slopes of over 40 percent in some areas. The property is included on the county's inventory of Major Big Game Range. Intervenor applied for a forest template dwelling, and the planning director approved the application. Petitioner appealed the planning director's decision to the hearings officer, who held a hearing on the appeal and issued a decision affirming the planning director's decision and approving the application. This appeal followed.

PETITIONER'S FIRST ASSIGNMENT OF ERROR/1000 FRIENDS' ASSIGNMENT OF ERROR

Statewide Planning Goal 5 (Natural Resources, Scenic and Historic Areas, and Open Spaces) (Goal 5) is "[t]o protect natural resources and conserve scenic

and historic areas and open spaces." OAR 660-015-0000(5). In order to implement Goal 5, local governments are required to "adopt programs that will protect natural resources." *Id.* The county's program to protect natural resources was acknowledged by the Land Conservation and Development Commission (LCDC) to comply with Goal 5 in 1984. The county's Goal 5 program includes a map and inventory of big game habitat determined to be "significant or important" within the meaning of *former* OAR 660-016-0000(1)(1C) (June 29, 1981) *renumbered as* OAR 660-016-0000(5)(c) (June 6, 1990) (Big Game Habitat Inventory). *Save TV Butte v. Lane County*, 77 Or LUBA 22, 40 (2018).[1] As noted, the subject property is included on the Big Game Habitat Inventory.[2]

The county's Goal 5 program also includes a Rural Comprehensive Plan (RCP) policy, the meaning and application of which is at the heart of the parties' dispute in this appeal. RCP Goal 5, Flora and Fauna Policy 11, provides:

"Oregon Department of Fish and Wildlife [(ODFW)]

---

[1] LCDC adopted Goal 5 in 1974. It adopted its first set of Goal 5 rules in 1981, which were codified at OAR chapter 660, division 16. Those rules were amended in 1990. In 1996, LCDC adopted a second set of Statewide Planning Goal 5 rules, which are codified at OAR chapter 660, division 23. Because LCDC acknowledged the county's program to protect natural resources in 1984, the 1981 rules applied. *See Delta Property Co., LLC v. Lane County*, 271 Or App 612, 616-19, 617 n 1, 352 P3d 86 (2015).

[2] The Lane County Wildlife Inventory maps were developed based on Oregon Department of Fish and Wildlife (ODFW) big game range maps and identify the location, quality, and quantity of big game range, identify conflicts with big game range, and explain how those conflicts are to be mitigated. Record 541-42.

> recommendations on overall residential density for protection of big game shall be used to determine the allowable number of residential units within regions of the County. Any density above that limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000. The County shall work with [ODFW] officials to prevent conflicts between development and Big Game Range through land use regulation in resource areas, siting requirements and similar activities which are already a part of the County's rural resources zoning program."

RCP Goal 5, Flora and Fauna Policy 11, was developed in part by relying on a March 1982 Flora and Fauna Working Paper. The county (and DLCD) relied on the Flora and Fauna Working Paper as a background document to the RCP.[3]

During the proceedings below, petitioner and intervenor-petitioner (together, petitioners) argued that RCP Goal 5, Flora and Fauna Policy 11, applied to the application and that, because the density of the subject property with a forest template dwelling would be one dwelling unit per 10 acres, which

---

[3] The RCP characterizes the Flora and Fauna Working Paper as "background information * * * to be used to help interpret and understand [the RCP]." RCP Part 1(C). The Flora and Fauna Working Paper explains in more detail that that the ODFW residential density recommendations for Major Big Game Range were one dwelling unit per 80 acres:

> "The primary conflict to big game, as mentioned earlier is residential use at certain densities. ODFW has recommended overall densities for Peripheral Big Game Range at one dwelling unit per 40 [acres]; for Major Big Game Range at one dwelling unit per 80 acres. Therefore, to restate the conflict: overall residential density greater than one dwelling unit/40 acres in Peripheral Range and* * * one dwelling unit/80 acres in Major Range conflicts with habitat for big game." Record 542.

would exceed the ODFW recommendations on overall density for protection of Major Big Game Range, the application could not be approved absent "resolution in accordance with OAR 660-16-000." The hearings officer concluded that RCP Goal 5, Flora and Fauna Policy 11, did not apply to intervenor's application for a forest template dwelling because that provision only applies to applications for a land division or a zone change:

> "Ultimately, the acknowledged zoning ordinance did not apply the Big Game limitations except in certain circumstances, such as in the Exclusive Farm Use Zone. And in that case only properties lying within a Major Big Game area were affected. No specific siting regulations for forest template dwellings located within a peripheral big game range were adopted by the acknowledged Chapter 16 zoning code. That is, the Big Game Range density standards were integrated into the zoning classifications and minimum lot size recommendations within the [F-2] Zone. The density recommendations were not applicable to existing parcels but were to be considered only in rezoning and land division applications. Therefore, the approval of dwellings under a template dwelling test does not involve a determination of consistency with Big Game Range density standards." Record 10 (footnote omitted).

In reaching that conclusion, the hearings officer relied in part on a July 1984 Department of Land Conservation and Development (DLCD) staff report, prepared by DLCD when the county was seeking LCDC acknowledgement of its Goal 5 program.[4] According to the hearings officer, the DLCD staff report and

---

[4] The hearings officer found:

> "The DLCD staff report of July 19, 1984 indicates a concern with the minimum lot sizes in the resource zones coupled with a lack of

the Flora and Fauna Working Paper demonstrate that the county intended that the primary method for achieving the recommended ODFW density standards was the creation of zoning areas, the adoption of minimum parcel sizes to implement the density standards, and the adoption of siting and clustering standards for new dwellings in the F-2 zone. The hearings officer also relied on testimony from two former county planners that RCP Goal 5, Flora and Fauna Policy 11, was intended only to apply to land divisions and zone changes. Record 9-10.

Petitioner's first assignment of error and 1000 Friends' sole assignment of error challenge the hearings officer's interpretation of the density

---

siting and clustering requirements. The minimum parcel size was the County's chosen method to comply with the ODFW recommended maximum densities. The recommended densities—one dwelling per 40 acres in the peripheral big game range—depended entirely on the size of the area being studied. When considering an 80-acre study area, the recommendation would only allow two dwellings. However, the recommendation was intended to apply at a much higher level; which is why the County originally anticipated dividing the County into regions. Ultimately, the County, with the blessing of DLCD and ODFW, decided to rely on minimum parcel sizes to implement the ODFW recommendations. This view is borne out in DLCD's staff report which stated: '*Without siting clustering requirements, the minimum lot sizes in the F-1, F-2 and E zones are half that recommended by ODFW (i.e., the minimum lot sizes would have to be doubled to be acceptable.)*' At this time, Lane County's proposal was to have a minimum lot size of 40 acres for the F-1 Zone, minimum lot size of 20 acres in the F-2 Zone, minimum lot size of 40 acres in the EFU Zone, and no clustering or siting standards for dwellings." Record 9 (emphasis in original).

recommendations referenced in RCP Goal 5, Flora and Fauna Policy 11, as being inapplicable to intervenor's forest template dwelling application.[5] Petitioners argue that the hearings officer's conclusion that the density recommendations were "integrated into the zoning classifications and minimum lot size recommendations within the [F-2] Zone" has no support in the provisions of the F-2 zone. Petitioners argue that the hearings officer failed to give any effect to the second sentence of RCP Goal 5, Flora and Fauna Policy 11, which, according to petitioners, prohibits the county from allowing residential density above the ODFW-recommended limits without first conducting an Economic, Social, Environmental, and Energy (ESEE) analysis under the applicable Statewide Planning Goal 5 rule. Petitioners argue that the hearings officer's interpretation contravenes ORS 174.010's prohibition on "insert[ing] what has been omitted."[6]

---

[5] OAR 660-006-0027(6)(a) provides, in relevant part, that "[a] proposed 'template' dwelling under this rule is allowed only if" "[i]t will comply with the requirements of an acknowledged comprehensive plan, acknowledged land use regulations, and other provisions of law." OAR 660-006-0025(6) provides that "[n]othing in this rule relieves governing bodies from complying with other requirements contained in the comprehensive plan or implementing ordinances such as the requirements addressing other resource values (e.g., Goal 5) that exist on forest lands."

[6] ORS 174.010 provides:

> "In the construction of a statute, the office of the judge is simply to ascertain and declare what is, in terms or in substance, contained therein, not to insert what has been omitted, or to omit what has been inserted; and where there are several provisions or particulars such construction is, if possible, to be adopted as will give effect to all."

Intervenor responds that, based on the testimony of the former county planners and the legislative history in the record regarding LCDC's acknowledgement of the county's Goal 5 program, the hearings officer correctly concluded that RCP Goal 5, Flora and Fauna Policy 11, does not apply to a forest template dwelling application for property inventoried as Major Big Game Range. In intervenor's view, the county's program to protect Major Big Game Range relies on the F-2 zone's minimum parcel size of 80 acres for new land divisions and clustering standards in Lane Code (LC) 16.211, but the LC includes no density standards for dwellings on existing parcels.

We review the hearings officer's interpretation of the RCP and the LC to determine whether the hearings officer "[i]mproperly construed the applicable law." ORS 197.835(9)(a)(D). In construing the law, we will consider the text and context of the law at issue in order to determine the intent of the enacting body. *PGE v. Bureau of Labor and Industries*, 317 Or 606, 610-12, 859 P2d 1143 (1993); *State v. Gaines*, 346 Or 160, 171-72, 206 P3d 1042 (2009). For the reasons explained below, we agree with petitioners that RCP Goal 5, Flora and Fauna Policy 11, applies to intervenor's application for a forest template dwelling on property included on the county's Big Game Habitat Inventory of Major Big Game Range.

First, the hearings officer's conclusion that RCP Goal 5, Flora and Fauna Policy 11, applies only where an application is for a land division or a zone change has no support in the text that policy or in any of the LC provisions

governing the F-2 zone. The plain language of RCP Goal 5, Flora and Fauna Policy 11, does not refer to or limit its application to land divisions and zone changes. Context provided by the Flora and Fauna Working Paper does not refer to or limit the county's Goal 5 program to applications for land divisions and zone changes.[7] For those reasons, we agree with petitioners that the text and

---

[7] The Flora and Fauna Working Paper explains:

> "The following paragraphs basically outline procedures to be used for implementation of the ODFW density recommendations in big game ranges. The premise is to work overall density figures into minimum lot size recommendations for regions of the County, rather than postponing the issue by referrals to ODFW for every land division application. The anticipated result is to base zoning by region on the overall residential densities or ODFW minimum parcel size recommendations, thereby creating no conflict with Goal 5.
>
> "The County will be divided into regions convenient for planning purposes. These have not yet been determined but will probably result in 10-20 regions in the County.
>
> "Within these regions, determinations will be made of acreages, number of existing residences, and additional number of residences allowable to still fall within the overall density level. Built upon and committed areas are subtracted out, as they are treated as Impacted Range. From the figure of remaining residences and acreage, a residential carrying capacity will be determined. This figure, or the ODFW figure of 40 or 80 acres, whichever is lesser, will be recommended in the region for residential density for big game purposes. This, along with other resource land requirements will be used to determine appropriate zoning in an area.

context of RCP Goal 5, Flora and Fauna Policy 11, does not support the hearings officer's interpretation. Rather, the hearings officer's interpretation "insert[s] what has been omitted," in contravention of ORS 174.010, and gives no effect to the second sentence of RCP Goal 5, Flora and Fauna Policy 11. Moreover, a decision approving an application to divide or rezone land generally does not authorize any development, let alone residential development, but rather is the precursor to an application for future residential development. Thus, it is difficult to see how the ODFW density standards would apply to either of those types of applications at all, let alone apply *solely* to those types of applications.[8] Finally,

---

> "If this figure is ever exceeded, it constitutes a conflict with Big Game Range. ESEE consequences must be determined and analyzed at that time. Prior to dividing the County into regions and making the above determinations, it is impossible to determine if conflicts will exist in any regions. The expectation, based on examining trial areas, is that the recommendations of ODFW can be incorporated without creating a conflict.
>
> "Special uses which may be allowed in resource zones have the potential of conflicting with Big Game Range. To preclude that conflict, criteria will be incorporated into the Special Use review considering the effect on big game. Recommendations will be requested from ODFW and considered as part of the review process." Record 542-43.

[8] An application to rezone property could trigger OAR 660-023-0250(3)(b), which provides that a local government is required to apply Goal 5 to an application for a post-acknowledgment plan or land use regulation amendment (PAPA) only if "[t]he PAPA allows new uses that could be conflicting uses with a particular significant Goal 5 resource site."

the testimony of the former county planners on which the hearings officer relied is not particularly persuasive, given that it also is not supported by the text of RCP Goal 5, Flora and Fauna Policy 11, or any provision of the LC.

As explained above, the hearings officer's view of the county's Goal 5 program is that the county intended to rely on (1) the creation of zoning areas, (2) the adoption of minimum parcel sizes to implement the density standards, and (3) the adoption of siting and clustering standards for new dwellings in the F-2 zone. The first sentence of RCP Goal 5, Flora and Fauna Policy 11, refers to the process that the county was supposed to follow, which included taking actions to identify "10-20 regions" and to "base zoning by region on the overall residential densities or ODFW minimum parcel size recommendations." *See* n 7. All parties agree that, during the 36 years since its Goal 5 program was acknowledged, the county has never taken the steps described in the first sentence and has never created any "regions" or "base[d] zoning by region on the overall residential densities or ODFW minimum parcel size recommendations."

1000 Friends argues that the county's failure to take the steps described in the first sentence of RCP Goal 5, Flora and Fauna Policy 11, means that Goal 5 applies directly to the county's permit decision. We disagree with that argument. RCP Goal 5, Flora and Fauna Policy 11, is acknowledged to comply with Goal 5 and Goal 5 does not apply directly to the county's decision. ORS 197.175(2)(d).

However, the county's failure to take the step of identifying regions and basing zoning by region on either overall residential densities or ODFW

minimum parcel size recommendations does not mean that the county is absolved from protecting land included on the Big Game Habitat Inventory as Major Big Game Range through the residential density recommendations referred to in RCP Goal 5, Flora and Fauna Policy 11, or that the density recommendations simply do not apply. Rather, the *second sentence* of RCP Goal 5, Flora and Fauna Policy 11, remains operative, and it provides that "[a]ny density above [the ODFW-recommended density] limit shall be considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000."[9] The second sentence is not tethered to or derivative of the first sentence, which envisions the creation of zoning areas that the county has never completed. The second sentence does not mention or refer to zoning areas. To find that the second sentence simply has no effect absent the creation of zoning areas would be to allow the county to fail to perform an action that it assured LCDC it would perform in order to obtain acknowledgement of its Goal 5 program, and it would have the effect of eliminating the Goal 5 protections for Big Game Range that LCDC understood were in place when it acknowledged the program. Moreover, the county must interpret a provision of the RCP that was adopted to implement its Goal 5 program, which protects Big Game Range from conflicting residential

[9] The hearings officer's decision never directly addresses the second sentence of RCP Goal 5, Flora and Fauna Policy 11.

development through density standards, in a manner that is not inconsistent with Goal 5. ORS 197.829(1)(d).

This view is supported by language in DLCD's final staff report leading to acknowledgement of the county's Goal 5 program. In its response to some objections to the county's proposed program, DLCD explained its understanding of why the county's program did not conflict with Goal 5:

> "Objectors are not correct that [RCP Goal 5, Flora and Fauna Policy 11,] violates Goal 5. Densities above those recommended by ODFW would certainly constitute a conflict with big game habitat. *The County has, through this policy, however, simply indicated that it intends to resolve them by applying the entire Goal 5 process when such proposals are made. This would require a plan amendment and could only take place if justified based on the Goal 5 analysis.*" Record 212-13 (emphasis added).

We understand DLCD to have concluded that the county's Goal 5 program protects habitat because it adopts residential densities in accordance with ODFW's recommendations and requires that, if "proposals are made" that exceed those densities, the county will conduct an ESEE analysis for that individual proposal. Contrary to the hearings officer's decision, RCP Goal 5, Flora and Fauna Policy 11, includes no language that limits its application to land divisions and zone changes. The hearings officer's decision is not consistent with ORS 174.010 because it inserts language into the policy.

Moreover, the hearings officer's interpretation that the county's Goal 5 program to protect Big Game Range is implemented by provisions of the LC, specifically the F-2 zone's minimum parcel size of 80 acres for new land

divisions and the clustering standards in LC 16.211(5), is not supported by anything in the text of the F-2 zone provisions. The siting and clustering standards in LC 16.211(5)(a) do not quantify a residential density standard. A requirement to site dwellings "[n]ear dwellings on other tracts" is not a density standard. LC 16.211(5)(a)(i). Nor do the rest of the F-2 zone provisions support the hearings officer's interpretation. The use table for the F-2 zone lists six types of allowed dwellings, five of which do not require any particular parcel size. The F-2 zone does not provide any residential density standard at all. As we explained in *Cattoche v. Lane County*, the county has not quantified a residential density standard in the F-2 zone but "instead use[s] the ODFW 40-acre standard [referenced in RCP Goal 5, Flora and Fauna Policy 11, and the Flora and Fauna Working Paper] for areas inventoried as Peripheral Big Game Range." 79 Or LUBA 466, 479 (2019). Similarly, here, we conclude that the county uses the one-dwelling-per-80-acres standard referenced in RCP Goal 5, Flora and Fauna Policy 11, and the Flora and Fauna Working Paper to determine the allowed residential density in areas inventoried as Major Big Game Range.

In conclusion, we agree with petitioners that the hearings officer's conclusion that RCP Goal 5, Flora and Fauna Policy 11, does not apply because the application does not involve a land division or a zone change improperly construes RCP Goal 5, Flora and Fauna Policy 11. There is no dispute that the density of the subject property with the proposed dwelling would exceed one dwelling unit per 80 acres. Accordingly, the proposed dwelling "shall be

considered to conflict with Goal 5 and will be allowed only after resolution in accordance with OAR 660-16-000." RCP Goal 5, Flora and Fauna Policy 11.

Petitioner's first assignment of error and 1000 Friends' assignment of error are sustained.

PETITIONER'S SECOND ASSIGNMENT OF ERROR

As noted, the located of the proposed dwelling is in an area of the property that contains steep slopes.[10] RCP Goal 7, Policy 3 provides:

> "When extensive or drastic safeguards must be employed in conjunction with development proposals, the immediate and ultimate impact (including financial and economic considerations) of such safeguards on the environment and the public shall be considered."

In appealing the planning director's decision, petitioner argued that RCP Goal 7, Policy 3 (Policy 3) applied and that the planning director failed to apply it to the application. Record 608.

During the proceedings below, intervenor provided a geotechnical evaluation of the proposed dwelling site and the property (Level I report). The Level I report determined that the proposed driveway location did not present a

---

[10] The decision states that the home site is "located at least 30 feet from a ravine ridge or slope greater than 40%" and that, "[w]est of the home site, there is a 17% downslope." Record 5-6.

significant landslide hazard, and recommended a more detailed geotechnical investigation of the proposed dwelling site prior to development.[11] Record 11.

The hearings officer found that the general location of the property within a very high-risk landslide area "is an indication that potential development problems may exist." Record 12. While the hearings officer expressed doubt that Policy 3 applied to the application, the decision applied Policy 3 and found:

> "In regard to Policy #3, the Level I [report] did not identify extensive or drastic safeguards that had to be employed in conjunction with [intervenor's] development proposal. However, the location of the development within a very high landslide hazard area is an indication that potential development problems may exist. Thus, [the Level I report] wisely recommends that this evaluation be a prelude to a more comprehensive evaluation (Level II) when the actual development is proposed through the building permit process.
>
> "In a prior appeal of a template dwelling in the general area of the subject property, this Hearings Official addressed the implications of [*Rhyne v. Multnomah County*, 23 Or LUBA 442 (1992),] in regard to LC 16.005(2). In its decision in the *Rhyne* case, LUBA noted that [the] local government had the option of deferring its determination of compliance [with] a standard to a subsequent proceeding. Lane County has a process where an applicant may be compelled to apply for a Type III Modification of Decision when a substantial change in an approved application is necessary. This review would be before the Hearings Official and would require notice to the Appellant.
>
> "Thus, the building inspector will review the Level II * * * report provided by [intervenor's] engineer. Section 1803 of the Oregon

---

[11] The decision states that slopes for the proposed driveway are between zero and 14 percent. Record 4.

> Structural Specialty code gives the Building Official the authority to require and review geotechnical information. If the Building Official finds problems that would require a restriction on mechanical grading and/or clearing, that issue would be reviewed by the Hearings Official. Condition of Approval #13 has been modified to reflect this change." Record 12 (footnotes omitted).[12]

In *Rhyne*, we explained a local government's options in evaluating the evidence submitted to it to support compliance with an approval criterion:

> "Where the evidence presented during the first stage approval proceedings raises questions concerning whether a particular approval criterion is satisfied, a local government essentially has three options potentially available. First, it may find that although the evidence is conflicting, the evidence nevertheless is sufficient to support a finding that the standard is satisfied or that feasible solutions to identified problems exist, and impose conditions if necessary. Second, if the local government determines there is insufficient evidence to determine the feasibility of compliance with the standard, it could on that basis deny the application. Third, if the local government determines that there is insufficient evidence to determine the feasibility of compliance with the standard, instead of finding the standard is not met, it may defer a determination concerning compliance with the standard to the second stage. In selecting this third option, the local government is not finding all applicable approval standards are complied with, or that it is feasible to do so, as part of the first stage approval (as it does under the first option described above). Therefore, the local government must assure that the second stage approval process to which the decision making is deferred provides the statutorily required notice and hearing, even though the local code may not require such notice and

---

[12] We note that the decision includes a purported quote of "LC 16.005(2)" that does not appear to be an accurate quote of that LC provision. Record 12. The language quoted by the hearings officer as LC 16.005(2) appears to be a quote of a provision of the Metro Plan, the regional plan for the cities of Eugene and Springfield and the county.

> hearing for second stage decisions in other circumstances." 23 Or LUBA at 447-48 (footnotes omitted) (citing *Holland v. Lane County*, 16 Or LUBA 583, 596-97 (1988)).

In its second assignment of error, petitioner argues that the hearings officer erred in deferring a determination of whether Policy 3 was met to a later-stage proceeding that does not allow for notice and an opportunity for a hearing.[13] Intervenor responds that the hearings officer found that compliance with Policy 3 is feasible, as allowed by *Meyer v. City of Portland*, 67 Or App 274, 678 P2d 741, *rev den*, 297 Or 82 (1984), and that the later Level II report that is required by Condition 13 is therefore not entitled to public review and comment.[14]

The hearings officer's decision regarding Policy 3 is somewhat unclear, and the parties' dispute boils down to a dispute over whether the hearings officer's decision follows the first *Rhyne* option, as intervenor maintains, or the third *Rhyne* option, as petitioner maintains. Given the decision's explicit

---

[13] Petitioner also cites RCP Goal 7, Policies 1 and 2, but does not develop any argument regarding why those policies apply or are not met.

[14] Condition 13 provides:

> "Excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and erosion control. The character of soils for fills and the characteristics of the subject property made usable by means of fill shall be suitable for the intended purpose. Prior to building approval, [intervenor] shall submit a Level II * * * report to the County. If the building inspector finds problems that would require a restriction on mechanical grading and/or clearing, that issue shall be reviewed by the Hearings Official through a Type III Modification of Decision." Record 7.

reference to the third *Rhyne* option ("LUBA noted that [the] local government had the option of deferring its determination of compliance [with] a standard to a subsequent proceeding"), we understand the hearings officer to have determined that the evidence provided by the Level I report was insufficient to determine whether Policy 3 was met and to have deferred that determination to a later stage approval process through Condition 13. The problem with Condition 13 is that it places review and approval of the future Level II report solely in the discretion of the building inspector, and only if the building inspector concludes that there are "problems that would require a restriction on mechanical grading and/or clearing" would that issue be referred by the building inspector to the hearings officer for review. Such a closed circle of decision making that excludes public participation is inconsistent with *Rhyne*.

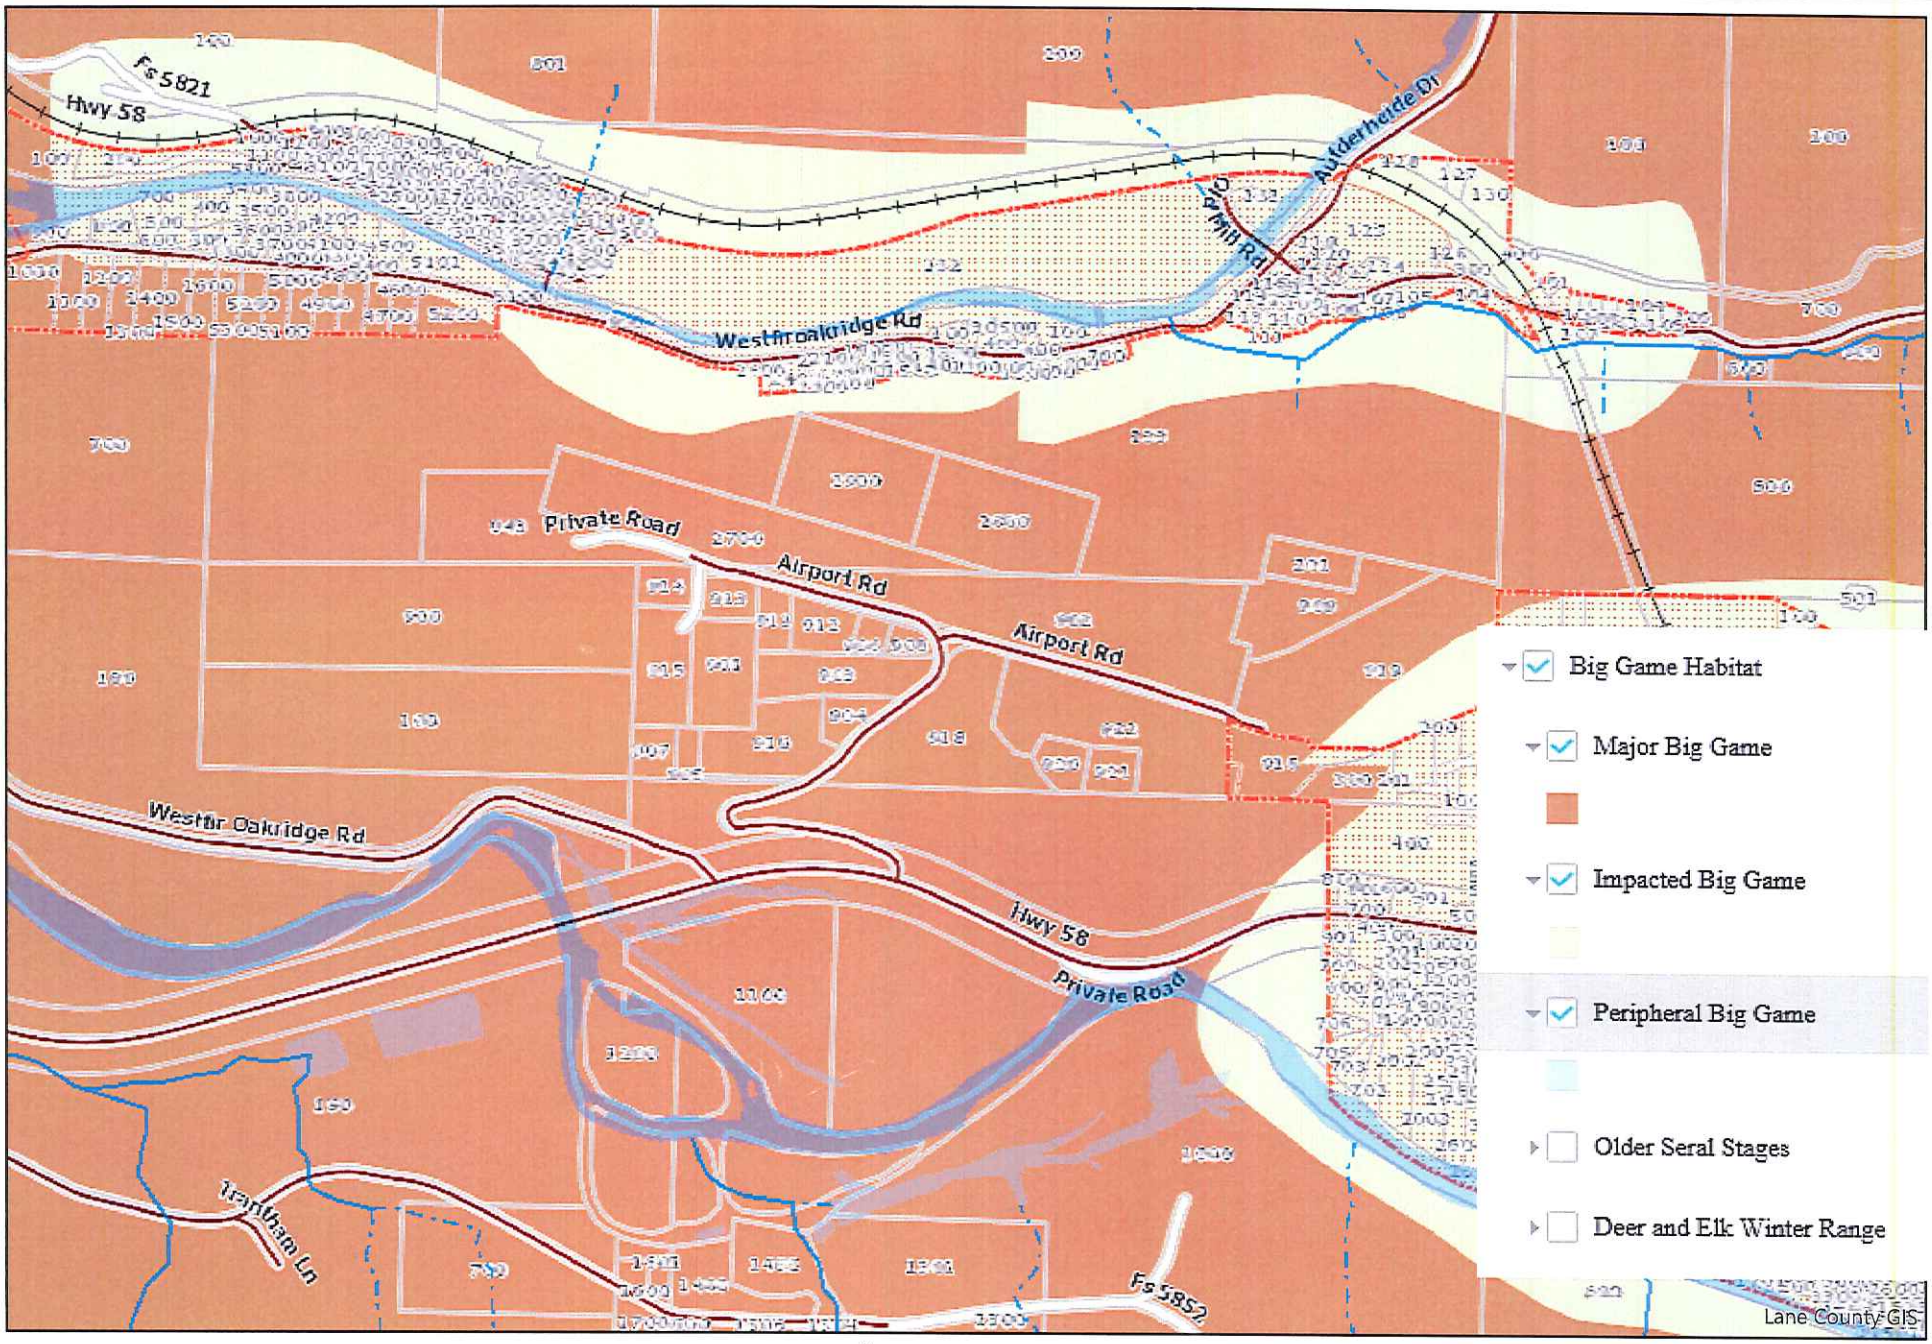
The second assignment of error is sustained.

PETITIONER'S THIRD ASSIGNMENT OF ERROR

Former ORS 215.750(4)(d) (2017), *renumbered as* ORS 215.750(5)(d) (2020), prohibits a template dwelling if the property is part of a tract that already contains a dwelling. ORS 215.010(2) defines "tract" as "one or more contiguous lots or parcels under the same ownership." The subject property is owned by intervenor, a limited liability company. The Goodmans own adjacent properties to the west and the east of the subject property, at least one of which contains a dwelling. Record 685-86. The Goodmans are the registered agents of and have a membership interest in intervenor.

The hearings officer concluded that the subject property is not part of a tract because the owner of the subject property is not the owner of the adjacent properties and that the fact that the Goodmans may control the owner of the subject property or own the limited liability company that owns the subject property is not relevant for purposes of applying the operative terms of the definition of "tract." Petitioner argues that the subject property is part of a tract that is effectively owned by the Goodmans and, therefore, the subject property is not allowed a dwelling. Petitioner argues that viewing the subject property and adjacent properties as under different ownership is "contrary to the underlying policy of the template dwelling statute's prohibition on allowing more than one dwelling on a tract." Petition for Review 30-31. Intervenor responds that the hearings officer correctly interpreted *former* ORS 215.750(4)(d) (2017) to conclude that the subject property is not under the same ownership as the adjacent properties.

Petitioner has not developed any argument that persuades us to conclude that the subject property and adjacent properties are "under the same ownership," within the meaning of ORS 215.010(2), where title to the properties is vested in different owners. Absent any developed argument regarding the meaning of the phrase "under the same ownership" in the context of *former* ORS 215.750(4)



(2017), petitioner's arguments in this assignment of error do not provide a basis for reversal or remand.[15]

The third assignment of error is denied.

The county's decision is remanded.

---

[15] In *Central Oregon Landwatch v. Deschutes County*, ___ Or LUBA ___ (LUBA No 2019-105, Jan 31, 2020), we rejected the petitioner's argument that two properties constituted a "tract" because they were "under the same ownership" within the meaning of ORS 215.010(2), where title to one property was held in the name of an individual person and title to an adjacent property was held in the name of the same person as "trustee" of a trust. *Id.* at ___ (slip op at 10-13).

The information on this map was derived from digital databases on the Lane County regional geographic information system. Care was taken in the creation of this map, but is provided "as is". Lane County cannot accept any responsibility for errors, omissions or positional accuracy in the digital data or the underlying records. Current plan designation, zoning, etc., for specific parcels should be confirmed with the appropriate agency. There are no warranties, expressed or implied, accompanying this product. However, notification of any errors will be appreciated.

NOTICE OF APPEAL RECEIPT & ACCEPTANCE

February 12, 2021

Appellant:	**Land Owner:**	**Applicant:**	**Agent:**
Lauri Segel, LandWatch Lane County PO Box 5347 Eugene, OR 97405	E.J.K. Investments 30414 Lebleu Road Eugene, OR 97405	Edward J. King 30414 Lebleu Road Eugene, OR 97405	Kim O'Dea Law Office of Bill Kloos 375 W. 4th, Suite 204 Eugene, OR 97401

Department File No: 509-PA20-05064
Subject Property: Assessor's Map & Tax Lot 21-35-07-30-02900.

RE: Appeal of a Type II Planning Director approval of a forest template dwelling in in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

This Notice is to inform you that an appeal and request for reconsideration for the above-cited application was received by the Land Management Division on February 8, 2021 and accepted by the Planning Director on February 10, 2021, and the Director has affirmed the decision.

Therefore, a **tentative date** of March 4, 2021 has been set for the Lane County Hearings Official to hold a De Novo Public Hearing at **9:30 A.M.**

Due to concerns caused by the COVID-19 outbreak, the hearing will be held digitally through a call in conference service. Additional information will be provided with the notice of appeal hearing. Please note more than one hearing may be scheduled for March 4.

The regulations for De Novo hearings are found in Lane Code 14.080. Lane Code is available on the internet at www.lanecounty.org/, under "Quick Links".

A formal notice of this hearing will be mailed to you at least **20 days prior** to the hearing date. Please submit written materials to the **attention of Shawna Adams**. You have up to the day of the hearing to submit materials. For a hearing scheduled on March 4, the staff report to the Hearings Official would be completed on February 25, 2021, in consideration of materials in the file record as of February 24, 2021. Any materials submitted after that date may result in staff requesting a continuance.

Sincerely,

Shawna Adams, Senior Planner

NOTICE OF APPEAL HEARING
(REMOTE ACCESS ONLY)

Department File:	**509-PA20-05064**
Owner:	E.J.K. Investments
Applicant:	Edward J. King
Agent:	Kim O'Dea – Law Office of Bill Kloos
Map & Tax Lot:	21-35-07-30-02900
Address:	N/A
Size:	12.05 +/- Acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zone:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

Proposal : Appeal of Type II Director **APPROVAL** of a request for a forest template dwelling in in the Impacted Forest Lands Zone (F-2), in accordance with the provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

An appeal for the above-cited application was submitted by the appellant on February 8, 2021 and accepted by the Planning Director on February 10, 2021 pursuant to Lane Code Chapter 14. The Planning Director has affirmed the decision.

The Lane County Hearings Official is the Approval Authority who will conduct a De Novo public hearing, pursuant to Lane Code Chapter 14. **Due to concerns caused by the nationwide COVID-19 outbreak, the hearing will be held digitally on Thursday, March 4, 2021, at 9:30 A.M. through a call-in conference service. Information for call-ins is as follows:**

Dial-in Number Info:	**(541) 682-1094**
Extension:	**6821094**
Participant Code:	**333-572-15**
Mobile AutoDial:	
VoIP:	**voip://(541) 6821094;33357215#**
iOS Devices:	**(541) 682-1094,33357215 and press #**
Other Devices:	**(541) 682-1094x33357215#**

Upon request, if you do not have access to a computer with internet access or a phone on the day of the hearing, accommodation for teleconference access needs will be made available at the **Lane County Customer Service Center, Goodpasture Room, 3050 North Delta Highway, Eugene, Oregon 97408.** For accommodation, please contact **Shawna Adams** at shawna.adams@lanecountyor.gov or 541-682-4054.

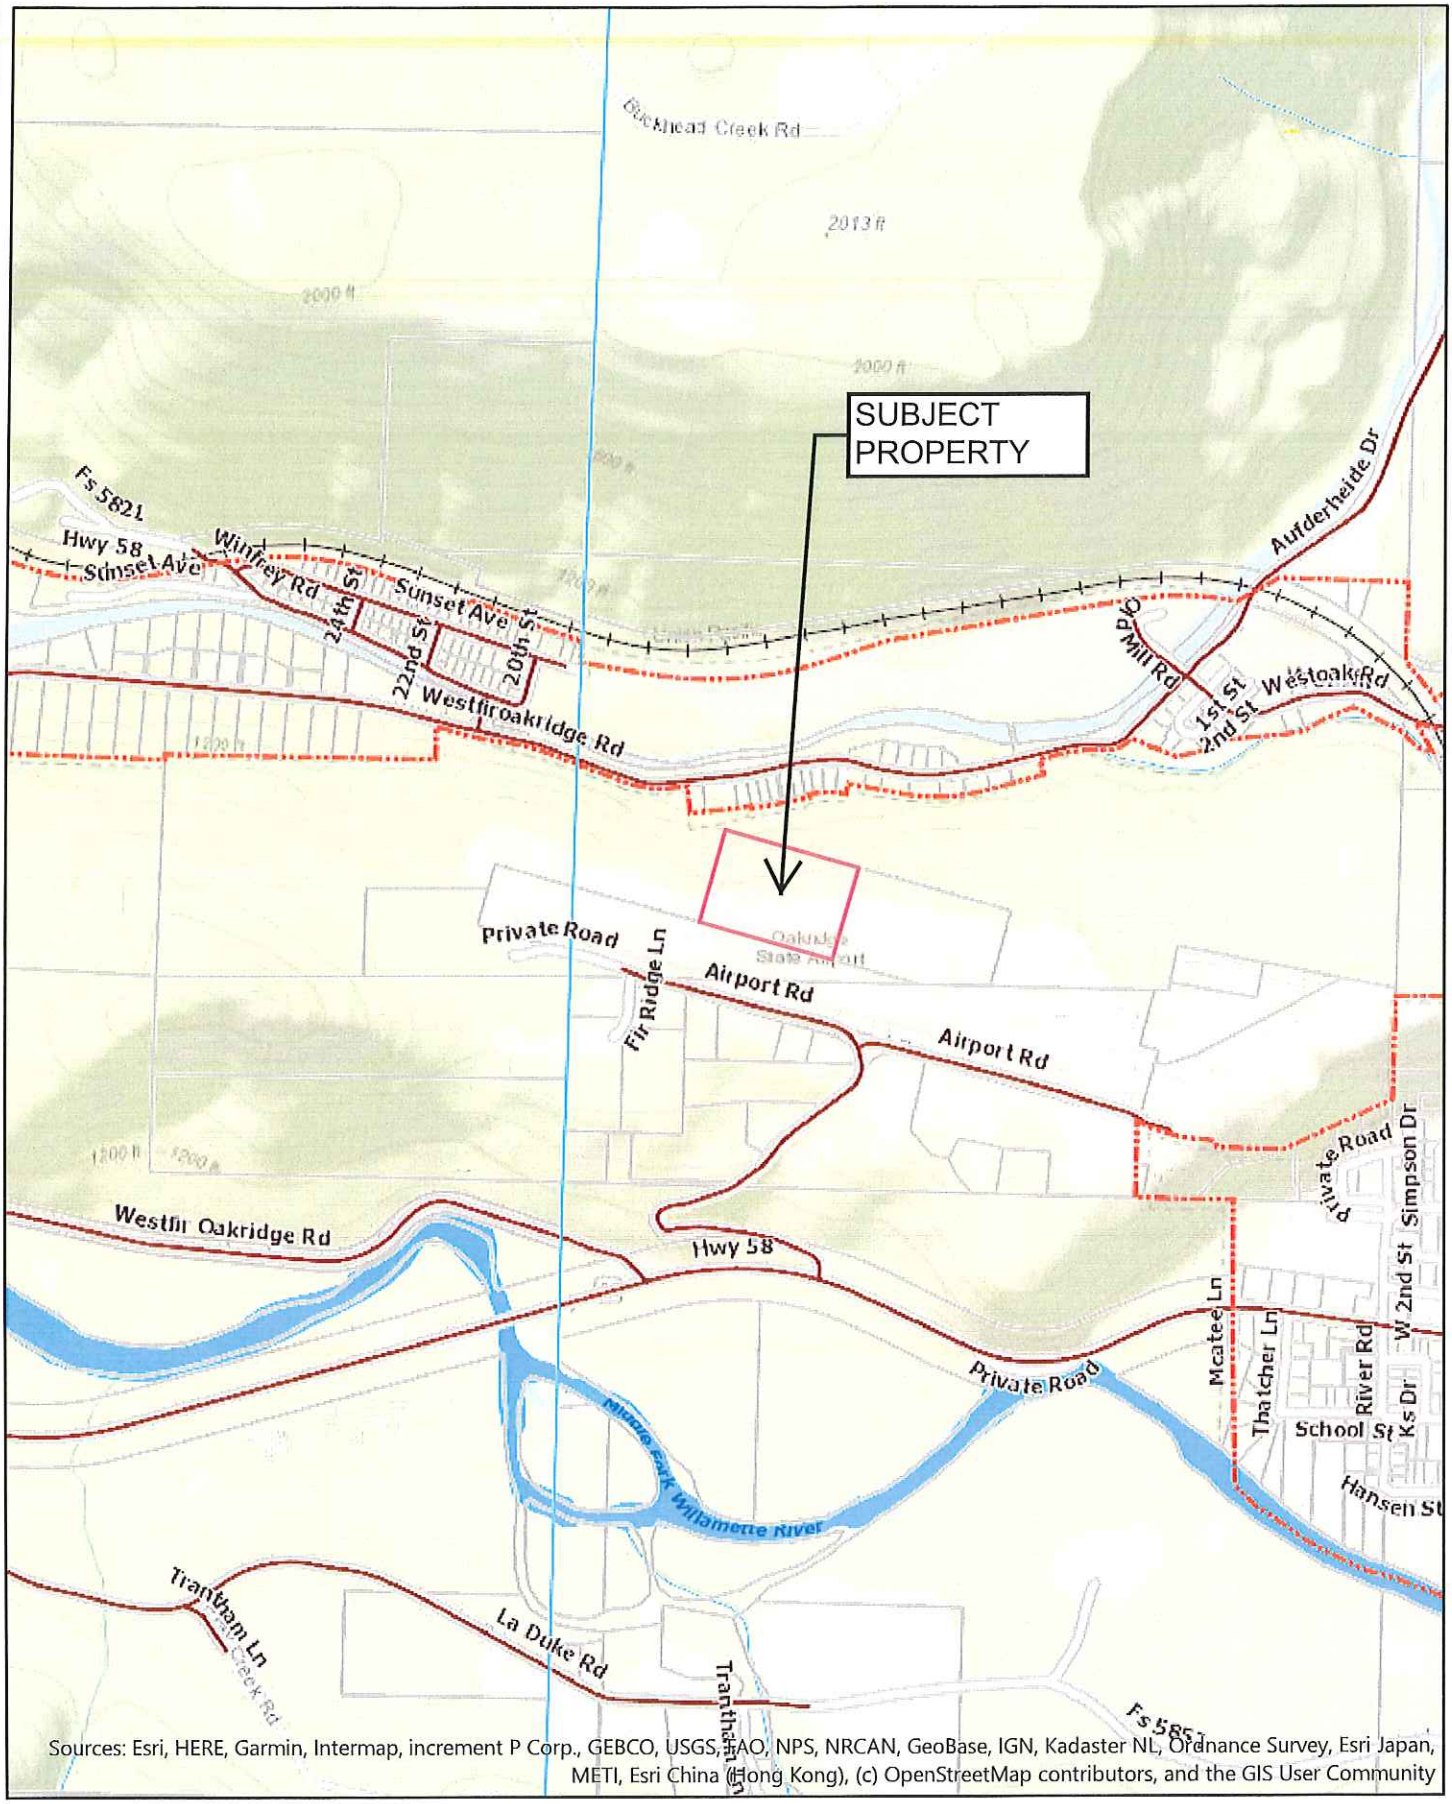
If you wish to receive a courtesy digital copy of the Hearings Official Decision, please contact the above staff.

You received this notice because you own property located near the property that is the subject of this notice. Per Lane Code 14.060, Lane County is required to notify you of the appeal of the above-cited decision so that you have the opportunity to comment and/or participate in the De Novo public hearing for the appeal. Lane County is required only to notify the applicant, owner, owners of record of property of adjacent properties per the most recent property tax assessment roll, and other persons identified. **You may want to share this notice with others in your neighborhood as some may not be aware of the proposal.**

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be promptly forwarded to the purchaser.

Enclosed is a vicinity map for the subject property.

The order of procedure for the conduct of the hearing will generally be as follows:



a. Announcement of the nature and purpose of the hearing
b. Announcement of opportunities for submission of information and appeal.
c. Disclosure of ex parte contacts
d. Report by the Director
e. Applicant's testimony
f. Testimony of persons in favor
g. Testimony of other persons
h. Any additional comments by the Director
i. Applicant rebuttal
j. Conclude the hearing

Failure to raise an issue in a hearing, in person or by writing, or failure to provide statements or evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

The application, all documents and evidence relied upon by the applicant, and the applicable criteria are available for inspection at no cost at the Land Management Division. A copy of the staff report will be available for inspection at no cost at least one week prior to the public hearing. Copies of these materials will be provided at a reasonable cost upon request.

The representative of the Land Management Division to contact regarding this application and hearing is **Shawna Adams** and the telephone number where more information can be obtained is **541-682-8904.** Please submit written materials to: Lane County Land Management Division, Attn. Shawna Adams, 3050 North Delta Highway, Eugene, Oregon 97408. Written materials may be submitted prior to, or during the public hearing.

The meeting location is wheelchair-accessible. Persons needing special accommodation (e.g., hearing impaired, language translation, chemical sensitivity needs, and large print copies of the agenda) are instructed to submit their request at least 48 hours prior to the meeting by calling Rachel Adams at 541-682-6911.

REQUIRED SUBMITTALS. A notice of appeal must be filed with the Director prior to the end of business (4 pm PST) on the 12th day after the date the notice of decision is mailed.

Please note that your appeal application will be rejected if it does not meet all the requirements of Lane Code 14.080(1)(a) through (c). Failure to address all appeal requirements of Lane Code 14.080(1)(a) through (c) may result in the appeal being rejected.

1. A copy of the decision being appealed, with the department file number: PA2005064 and date of the decision Jan 27, 2021
2. The $250 appeal fee, payable to Lane County.
3. The appeal deadline, as stated in the Director's Decision: Feb. 8 2021
4. Address each of the following:
   a. State how the appellant is a person who is entitled to written notice under LC 14.060 or a person who is adversely affected or aggrieved by the application:

   ☐ I am a person entitled to receive the Notice of Decision per LC 14.060

   ☑ I am adversely affected or aggrieved by the application because (explain):
   statement attached

See Page 2, appeal form continued. →

b. Please provide a written statement explaining the reason(s) why the Director's decision was made in error or why the Director should reconsider the decision. Please explain the issues being raised on appeal with sufficient specificity to afford the approval authority the opportunity to respond to each issue raised (attached a separate letter if necessary).

attached

c. Provide an explanation with detailed support specifying one or more of the following as assignments of error or reasons for reconsideration (attach a separate letter if necessary):

- ☐ The Director exceeded their jurisdiction;
- ☐ The Director failed to follow the procedure applicable to the matter;
- ☐ The Director rendered a decision that is unconstitutional; or
- ☑ The Director misinterpreted the Lane Code or Lane Manual, state law or federal law, or other applicable standards and criteria.
- ☐ Reconsideration of the decision is requested in order to submit additional evidence not available in the record at the hearing and addressing compliance with relevant standards and criteria.

statement attached

5. Include any other additional information in support of your appeal.

NOTICE OF PENDING LAND USE DECISION BY THE LANE COUNTY PLANNING DIRECTOR

Mailing Date:	JAN 27 2021
Department File:	**509-PA20-05064**
Owner/Applicant:	E.J.K. Investments
Agent:	Kim O'Dea – Law Office of Bill Kloos
Map & Tax Lot:	21-35-07-30-02900
Address:	N/A
Size:	12.05 +/- Acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zone:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: A request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

Enclosed is a vicinity map and site plan that shows the proposed location of the dwelling.

The proposed use that could be authorized by approval of the land use application is: One single family dwelling on the subject property.

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report can be made available electronically at no cost, and copies will be provided at reasonable cost. The Lane County Land Management Division representative to contact is **Shawna Adams** at **(541) 682-8904** or **shawna.adams@co.lane.or.us**.

This decision will become final at 4 P.M. on FEB 08 2021 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision. To complete this form and appeal the decision:**

1. Fill in the required information along with all of the materials and information required in the appeal form, the appeal fee, and all materials required by LC 14.080(1).
2. Submit the completed appeal to the Planning Director so that the Director receives it prior to the date and time that the decision becomes final (see above deadline). The Director will reject an appeal if it: (a) is not received prior to the date and time that the decision becomes final or (b) is incomplete.
3. To be accepted, appeals must satisfy all the requirements of Lane Code 14.080(1). A Type II decision issued by the Director for which a hearing has not been held may be appealed by a person who is entitled to written notice or any person who is adversely affected or aggrieved by the application.

Failure to raise an issue in a hearing—in person or in writing—or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals (LUBA).

February 8, 2021

LandWatch Lane County is a 501(c)(3) tax exempt, nonprofit organization dedicated to protecting Lane County's water, soils and air so that our natural areas, farms and forests will remain vital in perpetuity.

LandWatch is committed to protecting Lane County's farms, forests and open space from urban sprawl by promoting responsible and sustainable land use policies.

The over-parcelization and development of productive resource land leads to negative impacts for commercial resource use and protection of Goal 5 resources.

LandWatch is aggrieved by the Directors recent approval of a forest template dwelling in the F2 zone because the decision does not consider the subject property is designated Major Big Game and is subject to an ESEE analysis pursuant to LUBA No. 2020-030, dated January 21, 2021.

For this reason, LWLC is an aggrieved party.

RE: APPEAL OF PA2005064, EJK INVESTMENTS TEMPLATE DWELLING APROVAL

JUSTIFICATION FOR APPEAL AND REQUEST FOR RECONSIDERATION

The PD decision failed to consider the subject property is designated Major Big Game. Pursuant to LUBA No. 2020-030, an ESEE analysis is required.

For this reason, LWLC respectfully requests reconsideration of the PD decision.

Thank you.

NOTICE OF PENDING LAND USE DECISION BY THE LANE COUNTY PLANNING DIRECTOR

Mailing Date:	JAN 27 2021
Department File:	**509-PA20-05064**
Owner/Applicant:	E.J.K. Investments
Agent:	Kim O'Dea – Law Office of Bill Kloos
Map & Tax Lot:	21-35-07-30-02900
Address:	N/A
Size:	12.05 +/- Acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zone:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: A request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

Enclosed is a vicinity map and site plan that shows the proposed location of the dwelling.

The proposed use that could be authorized by approval of the land use application is: One single family dwelling on the subject property.

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report can be made available electronically at no cost, and copies will be provided at reasonable cost. The Lane County Land Management Division representative to contact is **Shawna Adams** at **(541) 682-8904** or **shawna.adams@co.lane.or.us**.

This decision will become final at 4 P.M. on FEB 08 2021 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision. To complete this form and appeal the decision:**

1. Fill in the required information along with all of the materials and information required in the appeal form, the appeal fee, and all materials required by LC 14.080(1).
2. Submit the completed appeal to the Planning Director so that the Director receives it prior to the date and time that the decision becomes final (see above deadline). The Director will reject an appeal if it: (a) is not received prior to the date and time that the decision becomes final or (b) is incomplete.
3. To be accepted, appeals must satisfy all the requirements of Lane Code 14.080(1). A Type II decision issued by the Director for which a hearing has not been held may be appealed by a person who is entitled to written notice or any person who is adversely affected or aggrieved by the application.

Failure to raise an issue in a hearing—in person or in writing—or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals (LUBA).

EXHIBIT A

CONDITIONS OF APPROVAL
509-PA20-05064

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of 509-PA20-05064 is valid for a four-year period from the final date of approval unless and extension is granted in accordance with Lane Code Chapter 14 provisions in effect at the time the request is made.

2. The dwelling must be located within the reduced 70 x110-foot approved home site area shown in **Exhibit C**.

3. The dwelling must be located at least 30 feet away from any ravine, ridge or slope greater than 40 percent.

4. The subject properties are located within the Airport Safety Combining Zone (/AS) and the Transitional Surface of the Oakridge Airport. Development shall comply with the applicable requirements of LC 16.246. Pursuant to LC 16.246(3)(a) and (5)(e), no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface.

The following conditions shall be met prior to the expiration date in condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease:

5. Complete, have notarized, and record the enclosed *Farm and Forest Management Agreement* with an attached "Exhibit A" depicting the legal description of the property (which must be recorded together with the Agreement at the Lane County Deeds and Records office).

6. Submit a stocking survey report for the subject parcel prepared by a qualified forester to the Lane County Assessor. Submit a copy of the stocking survey report to Lane County Land Management Division with evidence of receipt by Lane County Assessment and Taxation.

7. Obtain Lane County Facility Permit to verify the shared access easement approach to Airport Road is adequate to support a shared approach to multiple properties/dwellings as proposed. For more information about Facility Permits, contact 541-682-6902 or visit: https://lanecounty.org/ government/ county_departments/ public_works/right-of-way_permits/facility_permits/.

8. Any private access easements serving the subject property must comply with LC 15.055(4), (5), and (7), specifically including provisions for utilities. Submit a copy of the recorded access easement(s) demonstrating compliance with this requirement and specifically including documentation verifying legal right of use for any segments coinciding with BPA access and transmission line easements. This can be satisfied by providing a copy of BPA approval or court rulings.

9. Improve the existing roadway access Airport Road and the dwelling site to the minimum standards of LC 16.211(8)(e) and the applicable standards of Lane Code Chapter 15. The shared access easement road between Airport Road and the easternmost base of the driveway loop must be improved to road standards, with turnarounds spaced not more than 500 feet. Between the shared access easement road and the home

site, the driveway loop must be improved to driveway standards with a turnaround. As specified in LC 16.211(8)(e), Oregon Registered Professional Engineer or fire district certifications must be provided for the road and driveway grades that exceed eight percent and for any culverts or bridges.

10. Submit written verification from the Hazeldell Rural Fire Protection District, or written certification from an Oregon Registered Professional Engineer, stating that the route of access for firefighting equipment from the fire station to the building site, across public roads, bridges, and driveways comply with and meet the construction standards Lane Code 16.211(8)(e) and the Fire District standards.

11. Physically establish the primary and secondary fuel breaks in compliance with Lane Code 16.211(8)(c)(i). These fuel breaks shall be maintained in perpetuity. The minimum primary safety zone surrounding the proposed dwelling shall be at least 30 feet plus the Additional Safety Zone Down Slope as applicable. The minimum secondary fuel breaks surrounding the primary safety zone shall be at least 100 feet to the extent this can be established on lands owned or controlled by the owner. Primary fuel breaks, including any Additional Safety Zone Down Slopes, must be fully accommodated on site. The approved preliminary site plan in **Exhibit C** must be revised accordingly.

12. Provide evidence to the Planning Director that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule (OAR Chapter 629). This can be satisfied by providing a copy of the Well Log for the property that complies with the requirements outlined in Lane Manual Chapter 9.160, specifically a five-hour flow test.

13. Upon completion of **conditions #5 through #12**, the applicant shall complete and submit a Land Use Application form to Verify Compliance with Conditions of Approval, with the required processing fee. **Attach to this form a copy of:**

- Signed, notarized, and recorded Farm Use and Forest Management Agreement and description of property, along with all required exhibits;
- Recorded shared access easement(s) with BPA right of use documentation;
- Approved facility permit;
- Forest stocking survey with evidence of receipt from the County Assessor;
- Well log or well constructor's report and pump test that complies with the Lane Manual 9.160;
- Verification letter from the Hazeldell Rural Fire Protection District, or written certification from an Oregon Registered Professional Engineer, regarding adequacy of access route and the adequacy of the constructed road and driveway improvements;
- A revised final Site Plan that conforms with the approved plan, drawn to scale, including the same information, and meeting other minimum standards of the Land Management Division. These plans shall show the primary and secondary fuel breaks surrounding the proposed dwelling as required by Lane Code 16.211(8)(c)(i), the entire access between Airport Road and the home site, surfacing widths, turnouts, turnarounds, bridges, culverts, airport surface, easements, including BPA easements, transmission lines etc.

14. As part of the Verification of Conditions process, the access road, driveway and fuel breaks must be field inspected by Planning Office staff to verify that requirements stated in **conditions #3, #9, and #11** have been met. Failure to meet minimum fuel break and/or driveway and/or grade standards as in LC 16.211(8)(e) and (c) upon first inspection may require an additional application for fuel break and road inspection, with the applicable fee, at the determination of the Planning Director.

15. Upon completion of Verification of Conditions, submit a building permit to verify that the construction of the dwelling meets current Oregon Structural Specialty Code application for the proposed dwelling, with the

appropriate deposit fee. Contact the Building Program at 541-682-4651 and the On-Site Wastewater Program at 541-682-3754 with questions regarding building and sanitation requirements.

16. In the building or placement permit application submittal, the applicant shall submit a site plan demonstrating that the parcel configuration, and the proposed dwelling, driveway, and septic system, are located consistent with the final approved site development plan, except as authorized by the Planning Director. Per Lane Code Chapter 14, modifications to the final approved site plan not within the scope of the original approval may be subject to a new Type II or Type III Modification of Approval.

The following condition shall be met prior to building permit issuance for above ground construction.

17. Prior to building permit submittal, the applicant must submit documentation demonstrating compliance with LC 16.246(3)(a) and (5)(e), with the maximum height limitation to be indicated on the building permit plans. Preliminary calculations under **Finding 28** indicate a single-story structure is feasible.

18. Prior to building permit submittal, the property owner must complete a FAA Form 7460-1 for the proposed dwelling and return to Seth Thompson, Aviation Planner at ODA and receive a Letter of Determination for the proposed construction as required by OAR 738-070-0060. Submit a copy of the completed form and letter of determination to Lane County Land Management Division at the time of building permit.

The following condition shall be met prior to approval for legal occupancy of the proposed dwelling.

19. The proposed dwelling shall meet the following requirements, to be indicated on the building permit plans and verified by the Lane County Building Official:

a. All buildings or structures with chimneys shall have a spark arrester on all chimneys.
b. Wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs.

The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:

20. The applicant is responsible for complying with any applicable local, state, and federal laws, including Oregon Department of State Lands (DSL) and/or Army Corps of Engineers (ACOE) wetland regulations and Oregon Department of Aviation (ODA) and Federal Aviation Administration (FAA) requirements. See **Exhibit H** for more information about ODA and FAA requirements.

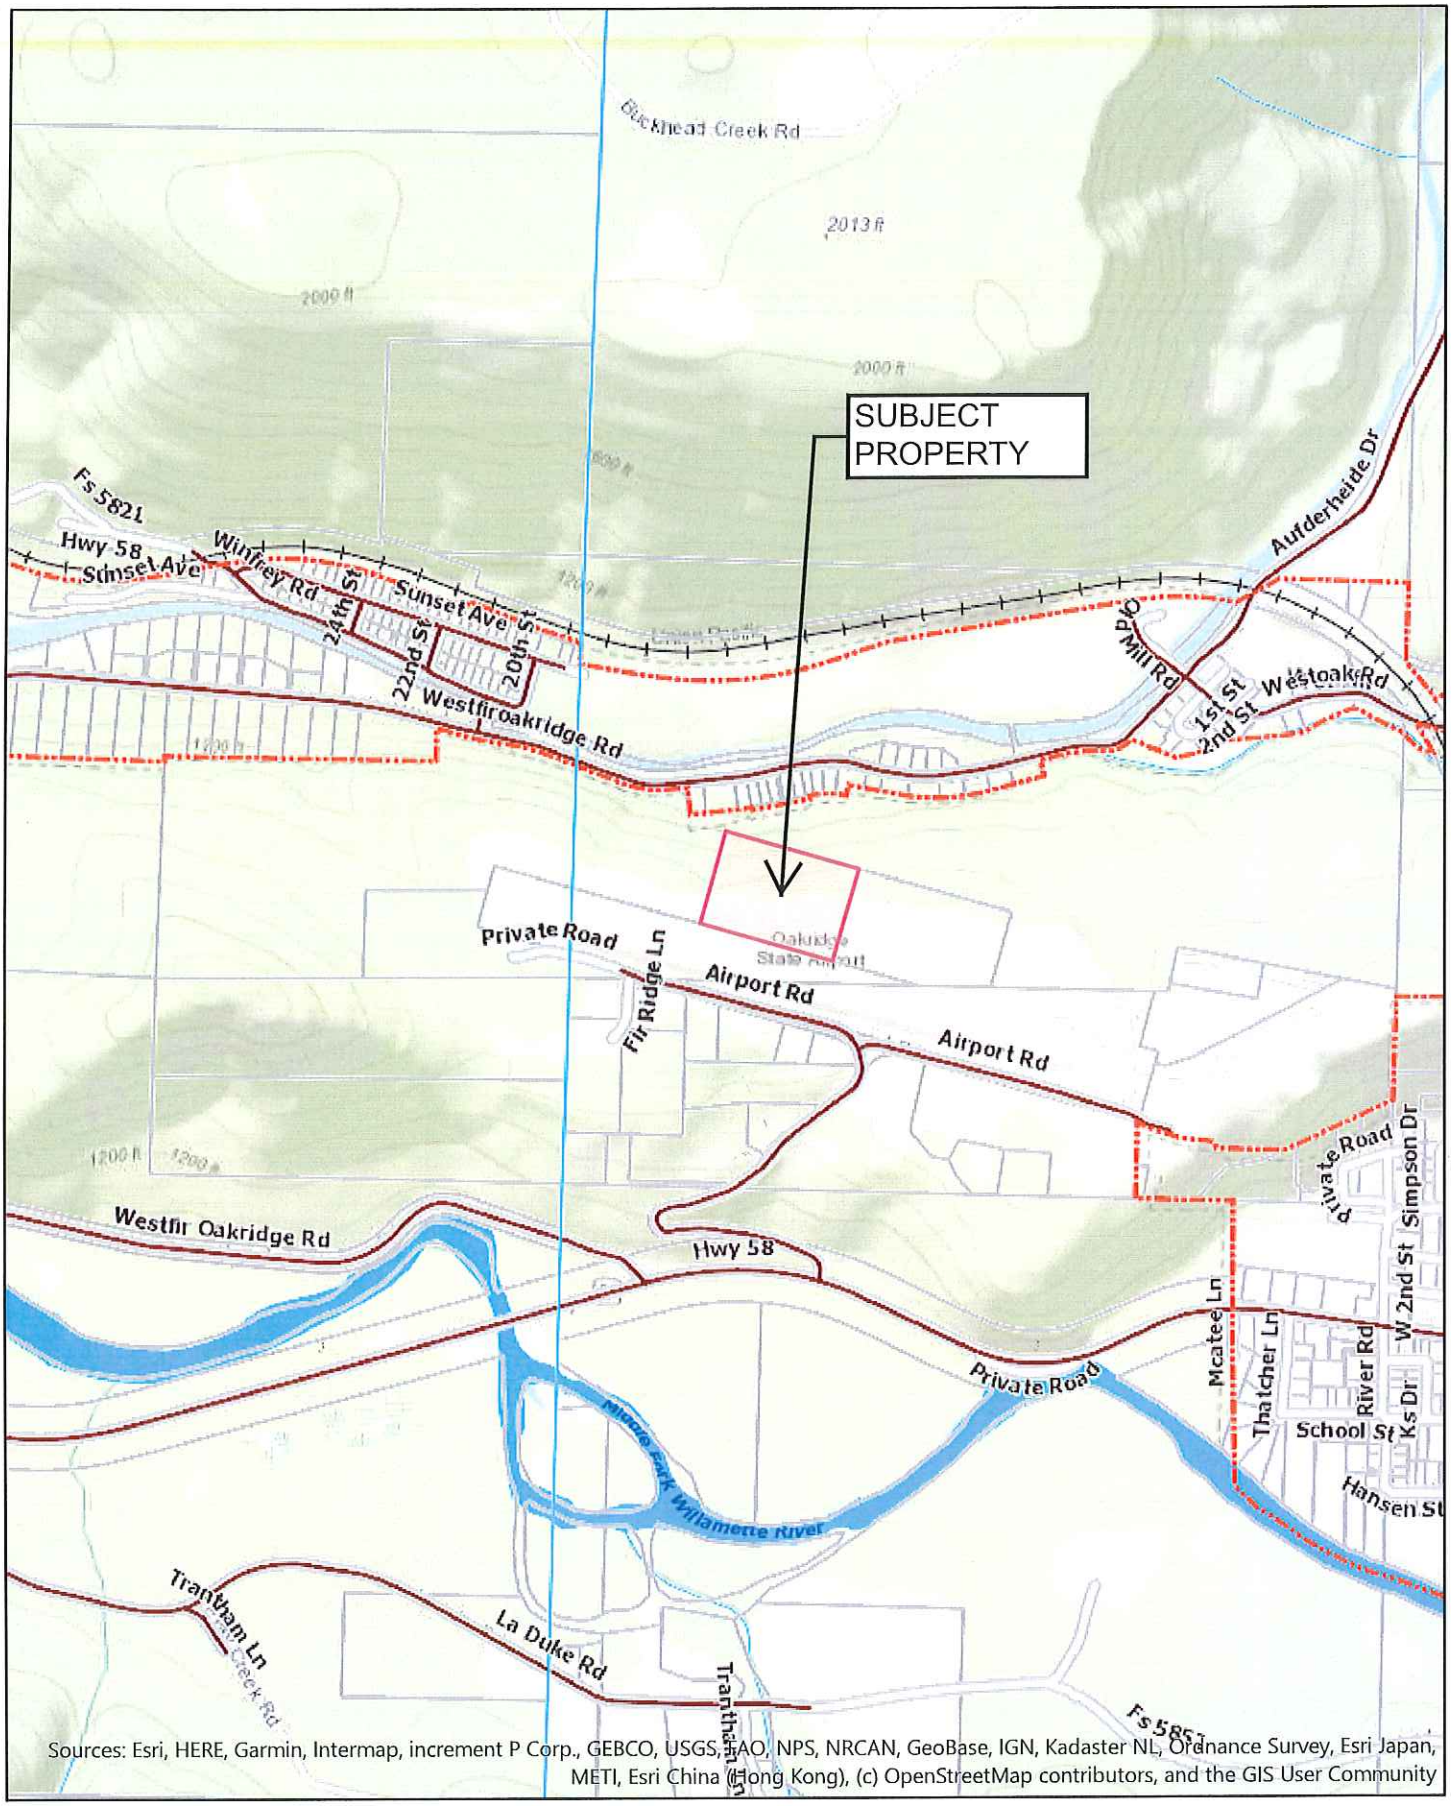
21. Future development must comply with the limitations and standards of the Airport Safety Combining Zone, LC 16.246.

22. The applicant is responsible for procuring the necessary agreements with the Bonneville Power Association. Recent and past BPA communications indicate that portions of tax lots 2800 & 2900 are encumbered by an easement for high-voltage transmission lines and an access road easement. Per the BPA, these easements grant certain rights to BPA and limit the landowner's use within the easement area. A portion of BPA's rights include the right of ingress and egress, and the right to keep the easements free and clear of vegetation and buildings, sheds, fences, roads or any other type of structure. All activities planned within the BPA easement need to be reviewed by BPA prior to their occurrence. Do not build, dig or plant within the easement area without first contacting BPA. Requests for information regarding the process for reviewing proposed uses of the easement may be addressed to Janai Soto at jasoto@bpa.gov or 541/988-7409.

23. Per LC 16.005, excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and the character of soils for fill and the characteristics of parcels or lots made usable by means of fill shall be suitable for the intended purpose.

24. The subject property is within a "High" and "Moderate" landslide susceptibility area according to DOGAMI. This designation may require a geotechnical report with submittal of a building permit. Please contact the Lane County Building Department at 541-682-4651 to confirm requirements.

25. Any future naming of the proposed shared access easement road is subject to the provisions of LC 15.305 through 15.335.



26. Storm water runoff from the subject property shall not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches.

27. The owner shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules. It is the owner's responsibility to document that the required tree planting was done in conformance with the criteria of Lane Code 16.211(5)(e). If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372. Information regarding Department of Forestry stocking requirements can be obtained through the Department of Forestry. Information regarding Department of Forestry stocking requirements can be obtained through the Department of Forestry at (541) 935-2283 (in western Lane County); (541) 726-2501 (in eastern Lane County).

28. The following is provided for informational purposes as an **Advisory Notice**: Section 93.040(1) of the Oregon Revised Statutes requires the following statement to be included in the body of any instrument transferring or contracting to transfer fee title to real property:

> "THIS INSTRUMENT WILL NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY APPROVED USES AND TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES AS DEFINED IN ORS 30.930."

This Oregon Law disclosure requirement serves a constructive purpose. Approval of a residence for this property is contingent upon compliance with the conditions of the special use permit, and any future owners of the subject property need to understand and adhere to these conditions. This disclosure statement should alert the cautious and potential purchaser to inquire with the Lane County Land Management Division about the conditions of this special use permit.

The information on this map was derived from digital databases on the Lane County regional geographic information system. Care was taken in the creation of this map, but is provided "as is". Lane County cannot accept any responsibility for errors, omissions or positional accuracy in the digital data or the underlying records. Current plan designation, zoning, etc., for specific parcels should be confirmed with the appropriate agency. There are no warranties, expressed or implied, accompanying this product. However, notification of any errors will be appreciated.

REQUIRED SUBMITTALS. A notice of appeal must be filed with the Director prior to the end of business (4 pm PST) on the 12th day after the date the notice of decision is mailed.

Please note that your appeal application will be rejected if it does not meet all the requirements of Lane Code 14.080(1)(a) through (c). Failure to address all appeal requirements of Lane Code 14.080(1)(a) through (c) may result in the appeal being rejected.

1. A copy of the decision being appealed, with the department file number:_____ and date of the decision_____
2. The $250 appeal fee, payable to Lane County.
3. The appeal deadline, as stated in the Director's Decision: _____
4. Address each of the following:
   a. State how the appellant is a person who is entitled to written notice under LC 14.060 or a person who is adversely affected or aggrieved by the application:

      ☐ I am a person entitled to receive the Notice of Decision per LC 14.060

      ☐ I am adversely affected or aggrieved by the application because (explain):

      _____

      _____

See Page 2, appeal form continued. →

b. Please provide a written statement explaining the reason(s) why the Director's decision was made in error or why the Director should reconsider the decision. Please explain the issues being raised on appeal with sufficient specificity to afford the approval authority the opportunity to respond to each issue raised (attached a separate letter if necessary).

c. Provide an explanation with detailed support specifying one or more of the following as assignments of error or reasons for reconsideration (attach a separate letter if necessary):

- ☐ The Director exceeded their jurisdiction;
- ☐ The Director failed to follow the procedure applicable to the matter;
- ☐ The Director rendered a decision that is unconstitutional; or
- ☐ The Director misinterpreted the Lane Code or Lane Manual, state law or federal law, or other applicable standards and criteria.
- ☐ Reconsideration of the decision is requested in order to submit additional evidence not available in the record at the hearing and addressing compliance with relevant standards and criteria.

5. Include any other additional information in support of your appeal.

STAFF REPORT

509-PA20-05064

Department File:	**509-PA20-05064**
Owner/Applicant:	E.J.K. Investments
Agent:	Kim O'Dea – Law Office of Bill Kloos
Map & Tax Lot:	21-35-07-30-02900
Address:	N/A
Size:	12.05 +/- Acres
Base Zone:	Impacted Forest Lands (F-2)
Combining Zone:	Airport Safety Combining Zone (/AS)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)
Staff:	Shawna Adams, Senior Planner

I. PROPOSAL

A request for Director Approval of dwelling in the Impacted Forest Lands (F-2) Zone pursuant to the 'Template Dwelling' provisions of Lane Code 16.211(5) and (8) and House Bill 2225.

II. BACKGROUND INFORMATION

The subject application was submitted to the Land Management Division on February 5, 2020 and was deemed complete by staff on March 6, 2020. On March 23, 2020, staff solicited referral responses from affected agencies, service providers, and surrounding property owners. Subsequently, the applicant provided extensions to the statutory timeline requirements of ORS 215.427 totaling 165 days. Copies of all written comments and applicant submittals are included in the application file for this proposal and are addressed in the staff evaluation below in the context of the approval criteria, as applicable.

III. PROPERTY DESCRIPTION

A. **LOCATION**: The subject property is identified as Tax Lot 2900 on Lane County Tax Assessor's Map 21-35-07-30. The property is located immediately north of the Oakridge Airport, and situated between the Westfir and Oakridge Urban Growth Boundaries (UGBs).

B. **PHYSICAL DESCRIPTION**: The subject 12.05-acre property is vacant except for an existing roadway and powerlines largely within an east-west Bonneville Power Administration (BPA) easement that transects the property. The property generally slopes downward to the northwest property corner with steep slopes greater than 25 percent predominating north of the BPA easement. According to County GIS data layers, the property is mapped by DOGAMI as having "high" and "moderate" landslide susceptibility and does not contain floodplain, a Class 1 stream, or wetlands. Per the applicant, the site is vegetated with small fir trees, scattered with underbrush and a few maple and oak trees. 2018 statewide imagery shows more tree cover north of the BPA easement.

C. ZONING & SURROUNDING PROPERTIES: The property is designated Forest in the Lane County Rural Comprehensive Plan, and is zoned Impacted Forest Land (F-2) consistent with that plan designation. The property is bordered to the south by the Oakridge Airport within the Airport Operations (AO-RCP) zoning district and abuts Impacted Forest Lands (F-2, RCP) zoned properties, to the north, east and west.

IV. APPLICABLE CRITERIA AND FINDINGS OF FACT

This application is evaluated pursuant to the applicable criteria found in Lane Code 16.211(5) and Lane Code 16.211(8) and other standards as applicable. The code language is in **boldface** type, followed by findings of fact.

D. Conformity with Lane Code 16.211(5):

Template Dwelling. One single-family dwelling is allowed subject to prior submittal and approval of an application pursuant to Type II procedures of LC Chapter, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(5)(a) through (f) and LC 16.211(8) below.

(a) The tract upon which the dwelling will be located has no other dwellings on it.

Finding 1: The subject property on which the dwelling will be located coincides with Tax Lot 2900 of Assessor's Map and Tax Lot 21-35-07-30, does not contain a dwelling, and is owned by EKJ Investments. The tract consists only of the subject property. As per Regional Land Information Database (RLID) records, all abutting properties are under separate ownership and owned by Crown Properties LLC, Oregon State Board of Aeronautics, Edward J King, or the State of Oregon. Accordingly, this criterion is met.

House Bill 2225 includes additional tract requirements that have not yet been adopted in the Lane Code. These provisions apply directly as of January 1, 2020 and are set forth in OAR 660-06-027(6)(a). The applicable provisions of Section 2 of the House Bill applicable through January 1, 2023 further provide that no more than one dwelling may have existed, exist, or have been approved on the other lots or parcels within the former tract that existed as of January 1, 2019 and thereafter through January 1, 2021. Staff find that the RLID records and other information in the file record indicate that subject tract remains the same as it existed on January 1, 2019, in compliance with these requirements. Also see **Finding 30**.

(b) The lot or parcel upon which the dwelling will be located was lawfully created.

Finding 2: The subject parcel was verified to be a legal lot under Planning Action File No. 509-PA08-06632 and noticed as a final land use decision without appeal under 509-PA08-06329 and remains in the same configuration. This criterion is met.

(c) The lot or parcel upon which the dwelling will be located:

(iii) Is predominantly composed of soils that are capable of producing 85 cubic feet per acre per year of wood fiber; and

(aa) All or part of at least eleven other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(iii)(aa) above.

(bb) At least three dwellings existed on January 1, 1993, and continue to exist on the other lots or parcels described in LC 16.211(5)(c)(iii)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(iii)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle.

Finding 3: The applicant chose to document the presence of at least 11 other lots or parcels that existed on January 1, 1993. This is the most rigorous of the three "tests" outlined in LC 16.211(5)(c), and it appears to be the only option given that RLID soils data and Lane County Soil Ratings for Forestry and Agriculture estimates indicate 100% of the subject parcel's soils are Nekia soils (89D & 89F capable of producing 160 cubic feet per acre per year of wood fiber. The applicant's template square is centered on the mathematical center of the tract, as verified by County GIS generated centroid measurements. Accordingly staff find that the proposal satisfies the methodology set forth in subsection (5)(c)(iii)(aa) and House Bill 2225 for tracts with less than 60 acres. Staff also note that the submitted template map is marginally different from the 1:400 scale indicated, but finds the relationship between the template and parcels appears to be preserved and an accurate measure.

The applicant has identified 17 lots or parcels that existed on January 1, 1993, as within the template area. With consideration of the current property description cards and other documentation submitted by the applicant, and available County records included in the application file, staff find that at least 12 of the 17 lots or parcels identified as within the 160-acre template appear to have been lawfully created prior to January 1, 1993. None of these parcels were wholly or partially within a UGB as of January 1, 1993 or currently. These parcels satisfy LC 16.211(5)(c)(iii)(aa) and are described in in **Figure 1**.

FIGURE 1: LOTS, PARCELS AND UNITS OF LAND WITHIN TEMPLATE AREA

Count (*dwelling)	Assessor's Map	Tax Lot	Date of Creation	Documentation / Deed / LLV / Partition
1	21-35-07-30	2700	1972	R360D/96687
2*	21-35-18-00	914	1980	P1 of M463-79
3*	21-35-18-00	913	1980	P1 of M463-79; R1210-8227205
4*	21-35-18-00	911	1979	P2 of M316-78
5*	21-35-18-00	912	1979	P1 of M316-78
6*	21-35-18-00	906	1970	Reel 469-D/95859
7*	21-35-18-00	908	1970	LSC R1437/8652701; Deed R484/10186; LL PA87-02870 Part 2
8	21-35-18-00	903	1971	LSC R477/3455; Deed R871/70102; LL PA87-02870 Part 1
9*	21-35-18-00	904	1969	R423/52735
10*	21-35-18-00	918	1984	P2 of PA83-02253; 1291R/8412582
11	21-35-18-00	902	1968	R382/16860
12*	21-35-18-00	910	1978	P2 of M174-78

*Note: Verification of the parcels above is preliminary and does **not** constitute a determination of legal lot status.*

The applicant provided documentation for ten (10) dwellings located on the parcels identified in **Figure 1** above. These are denoted with an asterisk and include three dwellings that post-date January 1, 1993 according to the submitted documentation. As evidenced by the RLID reports and other records submitted by the applicant and 2018 aerial photography, staff verified at least five (5) of the ten dwellings existed on January 1, 1993, continue to exist on the qualifying lots partially or wholly located within the template square. The relative location of the dwellings is not relevant because the template measurement was not made according to LC 16.211(5)(c)(iii)(aa)(B). The dwellings found to satisfy LC 16.211(5)(c)(iii)(bb) are listed in **Figure 2** below.

FIGURE 2: QUALIFYING DWELLINGS WITHIN TEMPLATE DWELLING

Count	Assessor's Map	Tax Lot	Date of Dwelling on Property
1	21-35-18-00	912	1965; RLID
2	21-35-18-00	908	1954; RLID
3	21-35-18-00	904	1965; RLID
4	21-35-18-00	910	1974; RLID
5	21-35-18-00	913	1990; RLID; BP80-02322

For the reasons explained above, staff find the proposal satisfies LC 16.211(5)(c).

(d) Approval of a dwelling or manufactured dwelling shall comply with the requirements in LC 16.211(5)(d)(i) through (iv) below:

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

Finding 4: All of the provisions of LC 16.211(5)(d)(i) through (iv) apply since the subject property is larger than ten acres. Lane County Assessment and Taxation will receive notice of this decision. Conditions of approval have been established to ensure that the owner plants a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules. As conditioned, the owner must submit to Lane County Assessment and Taxation a stocking survey report for the subject property, prepared by a qualified forester. A copy of the stocking survey report with evidence of receipt by Lane County Assessment and Taxation must be submitted to Lane County Land Management Division as part of the Verification of Conditions application process. The proposal meets this criterion as conditioned.

(e) Prior to land use clearance of a building permit for the dwelling, when the lot or parcel on which the dwelling will be located is part of a tract, the remaining portions of the tract shall be consolidated into a single lot or parcel and a deed restriction using the form provided in OAR 660-06-027(7), "Exhibit A," shall be completed and recorded with Lane County Deeds and Records. The covenants, conditions and restrictions in the deed restriction:

Finding 5: The subject tract consists of the subject parcel with no contiguous property under common ownership remaining. As such, the above criterion, does not apply. Staff note that the referenced OAR was renumbered under House Bill 2225 and is now implemented in OAR 660-06-027(6)(a).

(f) Land use approval of a permit described in LC 16.211(5) above shall be valid for four years from the date of the approval.

Finding 6: This approval will be valid for four years from the final date of approval indicated on the Notice of Decision. This has been made part of **Condition #1** of **Exhibit A**.

(g) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

Finding 7: As a condition of approval to ensure compliance with the above criterion, the applicant must record a Farm and Forest Management Practices Agreement with Lane County Deeds and Records office and submit a copy of the recorded agreement to Land Management Division as part of the Verification of Conditions application. This requirement must be satisfied prior to the issuance of a building permit for a single family dwelling or a placement permit for a manufactured home.

E. Conformity with Lane Code 16.211(8):

Siting Standards for Dwellings, Structures, and Other Uses. The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h), (2) (j), and (2)(o), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through(b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

(a) Setbacks. Residences, dwellings or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent;

Finding 8: The applicant's site plan identifies a 100-foot by 200-foot home site area set back 130 feet from the south property line and 335 feet from the east and west property lines (**Exhibit C**). The subject property is near numerous dwellings, including dwellings within the Westfir UGB to the north and south of the Oakridge Airport. The nearest dwelling to the proposed home site appears to be approximately 600 feet to the south. The proposed home site is roughly 100 feet to the south of the existing private roadway that runs along the BPA easement, and as near to other nearby roads as other locations within the tract. The entire property is comprised of soils suitable for forestry use. Staff conclude that the portion of the property that lies south of the BPA easement where the home site is proposed is the least suitable for forestry use, due to its proximity to the BPA transmission

lines, existing roadway, and greater height limitations due to higher elevations and proximity to the airport. See **Finding 28**.

Specific to slopes, April 16, 2020 comments from LandWatch Lane County (LWLC) contend that that onsite slopes are greater than indicated by the applicant (**Exhibit F**). The applicant indicates that the home site is proposed within the most level area of the tract, that slopes within the home site do not exceed six percent, and that the home site is not within 200 feet of slopes 40 percent or greater. The submitted County LiDAR and 20-foot contour data suggest that slopes within the vicinity of the home site are greater than indicated by the applicant. As evidenced by the submitted slope data and other available County GIS LiDAR and contour data layers (**Exhibit K**), the home site is at the north and west end of the most level part of the property, predominately consists of slopes greater than six percent with significantly steeper slopes in the north part of the home site, with slopes indicated be 40 percent or greater in the northeast corner of the home site and within 30 feet of the home site's north boundary. The data do not indicate that the proposed 100 x 200 foot home site meets the above standard, but do indicate that a reduced 70 x 110-foot home site, with the northern 30 feet and western 90 feet eliminated, would comply with the above standards and allow sufficient area for home site development.

For the reasons explained above, staff find that proposal meets the above standard subject to the condition that the home site be reduced as described and indicated on the approved preliminary site plan in **Exhibit C**.

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses; and

Finding 9: The applicant indicates that the proposed home site is located in a forested area that was clear cut several years ago and is in a mostly open area with only a few scattered underbrush and replanted fir trees. For the reasons explained under **Finding 8** staff find that part of the site south of the BPA easement where the home site is proposed is the least suitable part of the site for forestry. The available slope evidence addressed under **Finding 8** and the fuel break requirements addressed under **Finding 14**, indicate that construction of a dwelling within the north part of the proposed 100 x 200-foot home site would necessitate the maximum additional safety zone downslopes to the north and northeast of the home site, with the possibility of both primary and secondary fuel breaks extending north of the BPA easement. Reducing the home site area to 70 x 110 feet as indicated on the approved preliminary site plan in **Exhibit C**, would necessitate less extensive fuel breaks and more fully accommodate required fuel breaks within the south part of the site. The home site, as reduced, is found to sufficiently minimize intrusion into forest areas. As conditioned, the proposal meets this standard.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

Finding 10: The subject property abuts only F-2 and AO zoned property. The proposed home site is set back at least 100 feet from the nearest property boundary in accordance with this standard.

(iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) are met; and

Finding 11: The property does not contain and is not near a designated Class 1 stream. The above standards do not apply.

(v) Structures other than a fence or sign shall not be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road or a local access public road specified in Lane Code LC Chapter 15; and

(bb) 30 feet from all property lines other than those described in LC 16.211(8)(a)(v)(aa) above; and

(cc) The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

Finding 12: The subject property does not front a road subject to compliance with subsection (v)(aa). Otherwise, the proposed home site is located more than 30 feet from all property lines in accordance with subsection (v)(bb). **Findings 8 through 12 and Finding 13 through 17** address compliance with the remaining standards of LC 16.211(8)(a) through (d), and are incorporated here as demonstration of compliance with (cc) above. The above standard is met.

(b) The amount of forest lands used to site access roads, service corridors and structures shall be minimized.

Finding 13: As further explained under **Finding 8** and **9**, the reduced home site area is to be sited near an existing access roadway and BPA access easement in a location where fuel breaks will be minimized. As conditioned, the proposal meets this standard.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:

(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements.

(aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house. As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	Feet of Primary Safety Zone	Feet of Additional Safety Zone Down Slope
0	30	0
10	30	50

20	30	75
25	30	100
40	30	150

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

Finding 14: The applicant indicates that slopes within 30 feet of the home site range from three to six percent and, accordingly, the applicant's site plan shows the standard 30 foot fuel break and a secondary 100 foot fuel break on lands controlled by the owner. However, the applicants slope evidence includes County GIS LiDAR and 20-foot contour data that indicate down slopes within 30 feet of the home site are greater than assumed. See **Finding 8**. Currently available County GIS LiDAR and 1-foot contour interval data also indicates the slopes are greater than assumed (**Exhibit K**). These slope data would dictate a 30-foot primary fuel break with an additional 150-foot additional safety zone down slope to the north and northwest of the proposed 100 by 200-foot home site. While it appears that this primary fuel break and additional 100-foot secondary fuel break could be accommodated in accordance with fuel break requirements, staff do not find the proposed home site's placement in proximity to the downslopes meets the siting standards at LC 16.211(8)(a) and (b) and has conditioned approval on the reduced 110 by 70-foot home site area shown on the approved preliminary site plan in **Exhibit C**. As reduced, it appears that the downslopes within 30 feet of the home site may exceed 25 percent near the northeast corner and require an additional safety zone down slope of up to 100 feet. In any case, the evidence indicates that the required primary and secondary fuel breaks can be fully accommodated on the subject property without need for consideration of the extent abutting properties might be under common control. Compliance with fuel break has been made a condition of approval, and will be field verified as part of the Verification of Conditions application review. As conditioned, the required fuel breaks must be maintained in perpetuity and must be accurately depicted on the final site plan.

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district or shall be provided with residential fire protection as evidenced by a long term contract with a fire protection district (FPD) recorded in Lane County Deeds and Records. If the dwelling or manufactured dwelling are not within a FPD, the applicant shall provide evidence that the applicant has submitted a written request for a long term services contract with the nearest FPD and to be annexed into the FPD boundaries. If the FPD and the Planning Director determine that inclusion within a FPD or contracting for residential fire protection is impracticable, the Planning Director shall require as a condition of approval for the dwelling or manufactured dwelling that the property owner implement and maintain a Fire Protection Plan as an alternative means for protecting the dwelling or manufactured dwelling from fire hazards, consistent with the following standards:

Finding 15: The subject property is located within the Hazeldell Rural Fire Protection District. This standard is satisfied without need for a Structural Fire Protection Plan.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the

State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

Finding 16: As a condition of approval, the applicant must provide evidence that the building plans meet this requirement. This requirement will also be field verified by Lane County staff.

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:

(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water; or

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or

(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

Finding 17: The applicant indicates that the proposed dwelling will be served by a future on site well and has submitted well reports for several properties in the vicinity to demonstrate feasibility. Per the Lane County Hearings Official' findings in Planning Action File No. 509-PA18-05804, to verify compliance with this standard, the well must comply with ORS 537.545(1)(d) and Lane Manual 9.160. ORS 537.545(1)(d) provides that the use of the well for single or group domestic purposes in an amount not exceeding 15,000 gallons a day does not require a water use permit. As conditioned to ensure compliance with this standard, the applicant will be required to provide a well log or well constructor's report that conforms with Lane Manual 9.160 and ORS 537.545(1)(d), as applicable.

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for firefighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the firefighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than

one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

Finding 18: Home site access is proposed via a 40-foot wide shared access easement road and driveway loop off the private road. The applicant proposes to establish a shared access easement between the Airport Road terminus and driveway loop adjacent to the home site. The proposed shared access easement is to be established over Tax Lot 843, Tax Lot 103, and the subject property and allow for the improvement of the existing roadway to be improved to the road and driveway standards of LC 16.211(8)(e). Currently, the existing roadway appears to be devoted to commercial forestry and BPA use, is largely contained within the BPA easement north of the Airport, and clips the southwest corner of the Oakridge Airport. As proposed, the access will be adjusted such that it is entirely outside of the Airport property. The proposed driveway loop appears to be existing and outside of the BPA easement.

The application materials detail the route of access from the Fire station to the home site. The file record includes publically available information indicating that the Hazeldell Rural Fire Protection District contracts with the Oakridge Fire Department to provide service and the equipment used by the District.

April 16, 2020 LWLC comments cite several concerns regarding the adequacy of the submitted documentation with respect to grades, road turnarounds, and BPAs easement limitations. As further addressed under **Finding 19 through 26** below, and with consideration of **Finding 26 and 27** addressing Lane Code Chapter 15 and BPA requirements, staff find that the evidence is sufficient to demonstrate it is feasible for the road access and driveway to meet the standards of LC 16.211(8)(e). Compliance with Lane Code 16.211(8)(e) and field verification by staff has been made a condition of approval. Also, written verification of compliance from an Oregon Registered Professional Engineer or the fire district providing residential fire protection service must be provided. All road and driveway improvements, including turnarounds, turnouts, and culverts, and all easement locations must be shown on the final site plans.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

Finding 19: The applicant proposes to improve the proposed shared access easement road and driveway as necessary to comply with the above standards and further confirms that the shared access easement will be improved to road standards with a minimum 20-foot unobstructed width and a 16-foot wide gravel surface and the driveway will be improved to driveway standards with a 12-foot wide gravel surface. Staff note that the application materials provide conflicting information regarding the extent to which the Road and Driveway surfaces are already improved to standard, although it appears from aerial photos and other communications that the roadway and driveway has been established to, or near to, the widths required. Compliance with this standard is required and will be field verified as part of the Verification of Conditions application process.

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not more than 500 feet. Turnarounds shall comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(dd) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

Finding 20: Staff find that compliance with the above standards is feasible. The proposed dwelling is to be accessed from Airport Road via a private shared access easement road. The private road does not appear to exit onto any other roads and is therefore considered to be a dead-end road necessitating turnarounds. Notwithstanding that the application materials provide conflicting statements regarding whether turnarounds or turnouts are proposed or required along the shared access road, staff understands that the applicant proposes turnarounds spaced not more than 500 feet and maintains that these can be accommodated along the existing roadway and may also propose a turnaround at the home site. The roadway is already established, crosses other properties that appear to be in common control, if not ownership, and it appears that these turnarounds can be accommodated within the proposed shared access easement either within or outside of the proposed shared access easement can accommodate the turnarounds either within or outside of the existing BPA easement area. Given that the roadway is found to otherwise comply with the applicable standards and criteria addressed elsewhere in this report, staff find the submitted evidence is sufficient to demonstrate the required turnarounds along the roadway are feasible. Compliance with LC 16.211(8)(e) has been made a condition of approval. The above standard will be field verified by staff during the Verification of Conditions.

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Finding 21: The applicant does not propose any bridges or culverts as a part of the proposed development, In the event that a bridge or culvert becomes necessary during construction of the access, it must be constructed to meet the above standard. General compliance with the applicable standards of LC 16.211(8)(e) has been made a condition of approval. As conditioned, written verification of compliance from an Oregon Registered Professional Engineer or the fire district providing residential fire protection service must be provided for any bridges or culverts within the constructed access.

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon

demonstrating that road and driveway grades in excess of eight percent are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment and water supply.

Finding 22: Materials submitted by the applicant, including current County GIS LiDAR, aerial photo, and 20-foot contour data, and clinometer readings from Brinks Land Improvement submitted on November 23, 2020 (**Exhibit J**), evidence that the road and driveway are existing and slopes do not exceed 16 percent. Brinks Land Improvement indicate that the clinometer readings indicate no area in excess of 10%, most grades measured 3-6 percent, and no presence of inclines that would exceed 15 percent. Compliance with has been made a condition of approval with field verification by staff as part of the Verification of Conditions application process. Since the road and driveway grades exceed eight percent, the fire district or a licensed engineer must certify that the road and driveway grades are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment, and water supply.

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

Finding 23: Lane County Transportation Planning has not indicated that road naming is required for the proposed dwelling. As an advisory condition, staff note that road naming is subject to the provisions of LC 15.305 through 15.335.

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

Finding 24: Based on the applicant's site plan and site access plan, the looped driveway between the shared access road and home site exceed 200 feet. Therefore, turnouts spaced 400 feet or less are required along the driveway. Compliance with the above standard has been made a condition of approval.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for firefighting equipment from its point of origination to its point of destination.

Finding 25: No modification of road standards has been requested with this application or appears to be required. Any modifications or alternatives that may prove necessary or preferred, will be subject to review and approval of a new Type II dwelling application or Modification of Approval application as set forth in Lane Code Chapter 14.090.

F. Compliance with Other Development Standards

Lane Code 16.095: Compliance with LC Chapter 15, Roads

Finding 26: Access to the home site from Airport Road is proposed via a proposed 40-foot wide shared access easement road over Tax Lot 843, Tax Lot 133, and a driveway loop of the road.

See **Exhibit E** for Lane County Transportation Planning (LCTP) comments dated April 2 2020 and incorporated herein by reference. In summary, LCTP comments confirm Airport Road is Rural Local Road under the jurisdiction

and maintenance of Lane County and that Facility permit approval will be required to ensure the existing approach is adequate to support a shared approach to multiple properties and dwellings in accordance with applicable Chapter 15 requirements. LCTP staff further confirm that the private access easements serving the proposed dwelling must meet the minimum private access easement requirements of LC 15.055 (4), (5), and (7). Given that the ownerships traversed by the proposed easement appear to be represented by the same individual, Ed King, staff find that establishment and improvement of the shared access and utility easement compliance with LC 15.055 appears feasible and has been made a condition of approval along with field verification by staff as part of the Verifications of Conditions process. See Also **Finding 27**.

Bonneville Power Association (BPA) Easement

Finding 27: The subject property is traversed by an east-west Bonneville Power Administration easement that partially coincides with the proposed private road access.

LWLC suggests that the expired 2010 approval for the proposed template dwelling home site (509-PA10-05484) did not require compliance with BPA concerns and question whether BPA was notified of the subject application.

Staff note that the applicant's submittal includes December 8, 2010 correspondence in support of the feasibility of an identical access proposal for expired template dwelling approvals on Tax Lot 2900 and Tax Lot 2800 that have been resubmitted for new approvals under 509-PA20-05064 and 509-PA20-05066). The letter notes that tax lots 2800 and 2900 are encumbered by an easement for high-voltage transmission lines and an access road easements that grant certain rights to BPA and limit the landowner's use within the easement area, and necessitate review and approval by BPA for all activities planned within the BPA easement prior to their occurrence. The letter confirmed that the BPA would like to work with the landowner to locate the dwelling so it doesn't interfere with BPA's use of the access road and asked that the dwelling land use decision make note of the BPA restrictions. The expired template dwelling approvals included the advisory statements requested by BPA and an updated statement has been added as an advisory condition for the subject application.

BPA referral comments and communications with the applicant specific to the subject confirm that BPA approval will be required for use and improvement of the proposed shared access easement within the BPA easement area (**Exhibit G**). Via phone, BPA staff indicated that BPA cannot directly confirm feasibility outside of the formal BPA review process. BPA communications with the applicant indicate that additional details regarding turnaround locations, the method of improvement, and possibly a road survey by the property owner will be needed for BPA review and approval so that BPA can work with the property owner to assure safe and secure joint access to the road in the future. BPA also advised the applicant that BPA application review may be delayed due to COVID-19 work restrictions.

On September 29, 2020, the applicant submitted a revised access proposal and home site location to address BPA issues and other considerations. Staff advised the applicant that staff consideration of these application materials appeared to require an application modification if not a new application submittal according to Lane Code Chapter 14. Moreover, staff's review of the BPA communication in the record did not appear to establish that improvement of the existing access road was infeasible and, accordingly, that new construction of a 4,000 foot long shared access easement road segment adjacent to the existing roadway used by BPA would minimize impacts to forest lands as required to comply with LC 16.211(8)(a) and (b). Subsequently, the applicant has directed staff to proceed with review of the initial proposal and has provided additional evidence regarding the slope of the existing roadway.

While the BPA has not directly stated that use of the roadway is conceptually acceptable, the BPA indicates a willingness to work with the applicant to assure safe and secure joint access of the road via BPA's review process. Also, the available information appears to indicate options exist to accommodate any necessary improvements to

the existing roadway within and outside the transmission line easement area. Use of the existing roadway for access appears feasible. Verification of legal use and improvement of the existing roadway has been made a condition of approval.

Lane Code 16.246, Airport Safety Combining Zone (/AS):

(3) Use Limitations. In a/AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

(b) All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

Finding 28: The proposed home site is located within the Transitional Surface of the Oakridge Airport. Per LC 16.246(5)(e), the Transitional Surface extends upward and outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of seven horizontal feet to one vertical foot to the intersection with the Horizontal Surface, a horizontal plane 150 feet above the airport runway.

The application includes 2010 documentation stamped by a surveyor demonstrating that a 50-foot high structure could be developed at a specific location in the north half of the reduced 70 x 110-foot home site boundary in accordance with the above standard. Staff further note that the Primary Surface as delineated on the applicant's September 29, 2020 maps measures approximately 301 from the center of the south home site boundary and approximately 371 feet from the center of north site boundary. Per LC 16.246(2)(d), the elevation of the Oakridge runway is 1419 feet above sea level. Using the 7:1 ratio to determine the height limit at the southern home site boundary, staff calculate the Transitional Surface to be approximately 1464 MSL (301/7=43; 43+1419=1462). The surveyor documentation indicates the elevation at a high point near the center of the south home site boundary is 1435 feet above sea level. This would allow for construction of a home that is 27 feet above grade at the southern border of the home site (1462-1435=27) and increasing to height of 50 feet or more as documented in the record. Given that single-story homes are generally between 14 and 28 feet above grade, compliance with the above requirement appears feasible and has been made a condition of approval to be satisfied as part of the building permit submittal process.

Referral comments from Oregon Department of Aviation (ODA) indicate that pursuant to OAR 738-070-0060, the applicant must submit FAA Form 7460-1 documents to the ODA and receive a Letters of Determination for the proposed construction prior to issuance of any building permits for the template dwelling and provide information

about additional ODA and Federal Aviation Administration (FAA) requirements (**Exhibit H**). As conditioned to ensure compliance with the above standards, the applicant must submit a copy of the FAA Form and Letter of Determination at the time of building permit. The applicant is advised that the ODA will also require post construction documentation.

Lane Code Chapter 16.005(2) - Use of a Development - Landslide Hazards

Finding 29: April 16, 2020 LWLC comments note that the home site and a portion of the access road appear to be within areas mapped by DOGAMI as having high susceptibility for landslides. Per available County GIS DOGAMI map data added to the file record, the subject property contains areas of "Moderate" and "High" landslide susceptibility areas according to DOGAMI landslide hazard maps. Depending on the location of the dwelling within the dwelling site area, these designations will or may require a geotechnical report with submittal of a building permit.

The areas mapped by DOGAMI as moderate and high landslide risk areas generally are divided along the BPA easement boundary, which bisects the north and south part of the property. The easement is developed with transmission lines and the existing roadway, which meander within and outside the south part of the easement. The mapped high landslide risk area to the north corresponds with the steepest portion of the property, where over 20 percent predominate. The moderate susceptibility area generally corresponds with the moderate slopes to the south where the home site is proposed. Contrary to LWLC's assertion, the home site is within the Moderate susceptibility area. Otherwise, the roadway generally follows the boundary between the mapped landslide risk designations, with portions in each. Based on the pixilation, staff interprets the mapped boundary to be generalized. Otherwise, driveway and roadway are within areas or follow contours where slopes are less than 16 percent according to available contour data and LiDAR data in the file record. Clinometer readings reported by Brinks Land Improvement indicate no inclines above 15 percent, if not 10 percent. With consideration of these data and the fact that the access is already constructed, and in the absence of evidence to the contrary, staff do not find that landslide hazard makes the development unfeasible or warrants additional measures beyond those that will be addressed as part of the building permit review process for dwelling construction.

The general requirements at LC 16.005 remain applicable and provide that excessive grading, excavation and clearing shall be avoided when detrimental to soil stability and erosion control. This requirement has been made an advisory condition of approval. The applicant also is advised to consult with Building Department staff to verify related geotechnical requirements that may be required due to the DOGAMI risk designation and slope and soil conditions. This has been made an advisory condition of approval.

House Bill 2225

Finding 30: Approval of this request is subject to compliance with the provisions House Bill (HB) 2225, as implemented in OAR 660-06-027(6)(a). Consistent with these provisions, the subject property has not been reconfigured/property line adjusted since January 1, 2019 in order to meet the template test or to qualify for dwelling. The remaining requirements of HB 2225 have been addressed in this report, as applicable.

IV. DECISION

Based upon the findings above, the application for a forest template dwelling meets the criteria of Lane Code 16.211(5), 16.211(8), and other applicable criteria. Therefore, **APPROVAL** is granted, subject to the conditions stated in **Exhibit A** of this staff report.

Thank you for the opportunity to review and comment on this proposal. Please accept the following comments from Lane County Transportation Planning:

COMMENTS FROM LANE COUNTY TRANSPORTATION PLANNING

CONDITIONS

- Any private access easements serving the subject property must meet the requirements of Lane Code 15.055(2), (4), (5), and (7).

- Facility Permit approval will be required to ensure the existing access is adequate to support a shared approach to multiple properties/dwellings as proposed in the written statement. For more information about Facility Permits, please call 541.682.6902 or visit: https://lanecounty.org/government/county_departments/public_works/right-of-way_permits/facility_permits/

- As an informational item, stormwater runoff from the subject property must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches.

FINDINGS

Based on the site plan, the subject property "property" is proposed to take access via an existing driveway off Airport Road. The existing access will extend to the proposed dwelling as a private access easement. Airport Road is owned and maintained by Lane County and is functionally classified as a Rural Local road. For the purpose of establishing development setbacks, the minimum right-of-way (ROW) width of Rural Local roads is 50 feet (Lane Code [LC] 15.070(1)(c)(gg)). Proposed development as conceptually shown meets this requirement.

Lane Code 15.055: Minimum Requirements for Private Access Easements

(2) When a Private Access Easement is used to provide access to a vacant lot or parcel where development is proposed, prior to land use and zoning authorization for the proposed development the following shall apply:

EXHIBIT E

(c) **The requirements specified above in LC 15.055(2)(a) through (b) shall apply only to lands outside of a County-designated Forest zone. Lands within a Forest zone shall be governed by the siting and development standards of the applicable zoning district.**

Pursuant to Lane Code 15.055(2)(c), transportation Planning defers to Land Management Division to ensure the private access easement meets the applicable siting and development standards of the Impacted Forest Lands Zone (F-2).

(4) The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.

(5) All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.

(7) Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of the grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.

Compliance with LC 15.055(4), (5), and (7) must be demonstrated.

Lane Code 15.205: Facility Permits

Facility Permits are required for the placement of facilities and development within Lane County right-of-way. Facilities and development include, but are not limited to: road improvements; sidewalks; new or reconstructed driveway or road approach intersections; utility placements; excavation; clearing; grading; culvert placement or replacement; stormwater facilities; or any other facility, thing, or appurtenance [Lane Code 15.205(1)].

A review of Lane County Facility Permit records indicates that there is no record of a Facility Permit for the existing access off Airport Road.

Lane Manual 15.515: Drainage

Stormwater runoff from new private development must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches (Lane Manual 15.515). Accordingly, levels of stormwater directed off-site post-construction of the improvements must match pre-development flows. Ditches adjacent to County roads are designed solely to accommodate stormwater runoff generated by the roadways themselves.

[EXTERNAL ⚠]

Shawna and Jared,

Please confirm receipt and please send Notice of Decision for the three applications noted above.

Thank you.

Lauri Segel
LWLC

- The applicant relies on the 2010 application materials for all three 2020 applications; in PA 20-05065, the application says a rectangular template map will not be used; however, the 2010 application and decision for tax lot 843 relied on a rectangular template that did not appear to be aligned with the road; that decision did not discuss the actual alignment of the rectangular template nor whether at least one of the required dwellings was on the same side of the road as the proposed dwelling

- The 2010 decisions did not require proof of slopes, and the applicant's assertions about the slopes at the time appear to understate the area of tax lots 843 and 2900 having slopes greater than 10%

- It does not appear the 2010 decisions required compliance with the BPA concerns regarding their easement that the applicant intends to use to access the three proposed dwellings; it also does not appear that BPA was sent referral notice for the 2020 planning actions

- Tax lot 2900 is within an area designated by DOGAMI mapping as having a high susceptibility for landslides; that area appears to coincide with the proposed dwelling site on tax lot 2900, and a portion of the long access easement roadway that is between tax lot 843 and 2900

- The site plans do not identify the required turnarounds with the applicable spacing

- All the parcel/dwelling count lists have errors including but not limited to siting to preliminary LLVs instead of noticed LLVs

Subject: RE: 509-PA20-05064 E.KING Oakridge

Kimberly,

Thank You for your inquiry into use of the BPA access road for driveway access to your clients property.

I have attached a copy of the BPA easements and the plan & profile drawing for the area crossing your clients property. BPA's Hills Creek-Lookout Point No. 1, 115 kV transmission line right of way is 100 feet in width. The deeded access road includes portions of the road that are both inside and outside the corridor width. A survey by your client locating the right-of-way boundary may be needed to assist proper siting of structures beyond the boundary.

Also attached, is a copy of BPA's land use application form. A $250.00 non-refundable fee will be required to process the application.

Your email mentioned plans to upgrade the road and bring it up to county standards. As part of the application, BPA would like to know, the equipment that will be used to do the work, what grades and turnouts are planned, what gates may be installed and whether any utilities will be undergrounded in the road. (Distances of road features from transmission structures are especially useful for analysis and can reduce the need for site visits.) This information will allow BPA to do a

EXHIBIT G

thorough analysis of safety hazards that could arise from excavation and grading work in the right-of-way, and to work with your client to assure safe and secure joint access to the road in the future.

Please note that a portion of the BPA access road crosses the airport property as it turns north from the county road. Permission from the Oregon State Board of Aeronautics may be needed to improve and use that portion of the road.

Due to COVID-19 work restrictions, applications can take longer to process than usual. Detailed plans and work descriptions greatly assist in the turnaround time for responses. Email correspondence and application submission is vital to aid response time.

Please contact Myself or Janai if you have further questions or concerns.

Respectfully,

To: Soto,Janai A (CONTR) - TERR-ALVEY <jasoto@bpa.gov>
Subject: [EXTERNAL] FW: 509-PA20-05064 E.KING Oakridge

Good afternoon, Janai:

I represent Ed King on the subject properties near Oakridge. Based on our site plans, none of the proposed dwellings are within the BPA right-of-way, which appears to be 80-90'. It is not our intention to propose any dwellings within the BPA easement. In fact, no structures will be built within the BPA easement.

However, we would like to utilize the existing access road. I was under the understanding that it was an old logging road. Regardless, as part of development, it will need to be improved to County standards (16' wide; compacted gravel; 20' of cleared area). This will also benefit BPA and give better access.

Attached is a rough site plan that shows all the parcels and the location of proposed access. It is feasible for us to move the dwelling site on TL 2900 eastward, if that would alleviate your concerns. A couple detailed site plans are also included.

In any case, please let me know what we need to do to obtain permission to use the existing access road, part of which is within the BPA easement?
Further, could you clarify the location and width of the BPA easement so that we can incorporate into our site plans, please?

Thank you much,
Kim

Kim, Sounds good. You may have better luck with Janai than I did, especially if you show her the c. 2010 letter to her.

If you are unable to get something from them that confirms feasibility by Friday and would like me to hold off on the decision until that can be provided, I'll need an extension to enable that.

Kim, BPA comment for this template dwelling application are below. I have followed up with Janai to verify whether the situation is similar to that in 2010 where we had sufficient confirmation to make feasibility findings. It sounds like that is not the case this time- they would need more info and an application before they can confirm that use of their access for the proposed purposes is something arrangements can be made for. Please advise how you would prefer we proceed with the review.

Be well,

Thanks Janai. At this point, we just need to know that the proposed access is feasible, e.g. that BPA is amenable to an arrangement with the applicants. Is the BPA able to confirm that at this stage? If not, is that what might be 12 weeks out or does the applicant need to submit one of your applications to before you would be able to respond?

Thanks much,

My error I apologize this will need to be approved by BPA & has not been submitted as of yet. The existing case file we have is on another E.King parcel in Lane County.

I have attached a map that reflects where our lines are it appears the landowner will need to complete one of our applications for approval before building any dwellings in our easement areas. His parcels are marked by blue dots...
Thank you~

Hi Shawna,

BPA currently has received a request for this development & is in the process of review for a Land use permit. Due to the Covid 19 we are currently on a telework status from home. Our current eta on the Land use applications for multiple departments to review may be extended, the normal response time is: 6-12 weeks to process. Thank you for your patience. Have a great day & stay safe.

AND RELEASE OF EASEMENT

The Grantor, EDWARD HINES LUMBER CO., a Delaware corporation, for and in consideration of the sum of * * * TWO HUNDRED FIFTY * * * * * * * * * * * * * * Dollars ($ 250.00 * * *), in hand paid by the UNITED STATES OF AMERICA, receipt of which is hereby acknowledged, hereby grants, bargains, sells, and conveys to the UNITED STATES OF AMERICA and its assigns, a perpetual easement and right to enter and erect, maintain, repair, rebuild, operate, and patrol one line of electric power transmission structures and appurtenant signal lines, including the right to erect such poles, transmission structures, wires, cables, and appurtenances as are necessary thereto, in, over, upon and across the following-described parcels of land in the County of Lane, in the State of Oregon, to-wit:

Tract O-LP-R-13

A strip of land 100 feet in width across the S½SE¼ of Section 7, Township 21 South, Range 3 East, Willamette Meridian, Lane County, Oregon. The boundaries of said strip of land lie 50 feet on each side of and parallel with the survey line of the United States of America for its Bonneville Power Administration's Oakridge-Lookout Point Line, said survey line being described as follows:

Beginning at a point which is N. 41°04'40" W. 3558.3 feet from the southeast corner of Section 12, Township 21 South, Range 2 East, Willamette Meridian; thence S. 47°28' E. 2225.0 feet; thence S. 53°28'00" E. 360.0 feet; thence S. 69°39'00" E. 1141.4 feet; thence S. 88°05'00" E. 1255.5 feet; thence S. 79°16'50" E. 3472.6 feet to a point which is S. 89°14'30" W. 2475.8 feet from the north quarter corner of Section 17, Township 21 South, Range 3 East, Willamette Meridian.

The bearings of said survey line refer to Local Grid.

Tract LO-R-35

A strip of land 100 feet in width through the SE¼SE¼ of Section 12, Township 21 South, Range 2 East, Willamette Meridian, Lane County, Oregon. The boundaries of said strip of land lie 50 feet on each side of and parallel with the survey line of the United States of America for its Bonneville Power Administration's Oakridge-Lookout Point Line, said survey line being described as follows:

Beginning at a point in said survey line in Section 12, Township 21 South, Range 2 East, Willamette Meridian, said point being N. 41°04'40" W. 3558.3 feet from the southeast corner of said Section 12; thence S. 47°28' E. 2225.0 feet to a point; thence S. 53°28'00" E. 360.0 feet to a point; thence S. 69°39'00" E. 1141.4 feet to a point; thence S. 88° 05'00" E. 1255.5 feet to a point; thence S. 79°16'50" E. 3472.6 feet to a point in said survey line in Section 17, Township 21 South, Range 3 East, Willamette Meridian, said point being S. 89°14'30" W. 2475.8 feet from the north quarter corner of said Section 17.

The bearings of said survey line refer to Local Grid;

together with the present and future right to clear said right of way and keep the same clear of brush, timber, structures, and fire hazards, provided that fire hazards shall not be interpreted to include any growing crops other than trees; and also the present and future right to top, limb or fell all growing [illegible] and snags (collectively called "danger trees") located on land

Tract LO-R-35:

50	Northeasterly	Opp. SS 969+75	Opp. SS 973+35
85	Northeasterly	Opp. SS 975+70	East line Sec. 12, T21S, R2E, WM

and contiguous to said right of way that (a) are danger trees on the date hereof (hereinafter called "present danger trees"), or (b) become danger trees thereafter (hereinafter called "future danger trees"). The right to top, limb or fell danger trees outside of said strips (hereinafter called "additional danger trees") may only be exercised within 3 years after all present danger trees have been cut, and the UNITED STATES OF AMERICA shall pay the person who is the owner thereof at the date of cutting such additional danger trees the market value prevailing at the date of cutting under authority of the UNITED STATES OF AMERICA, such payment to be made within a reasonable period of time after they have been so cut; and

Grantor also hereby grants, bargains, sells, and conveys unto the UNITED STATES OF AMERICA, and its assigns, a permanent easement and right of way for the construction, operation, use and maintenance of roads approximately 14 feet in width (with such additional widths as are necessary to provide for cuts, fills, and turn-outs and for curves at angle points) on, over, and across the land of the Grantor in portions of the SW¼SE¼, SE¼SW¼ and Government Lot 4 of Section 7, Township 21 South, Range 3 East, and the SE¼SE¼ of Section 12, Township 21 South, Range 2 East, W. M., Lane County, Oregon, for the following purposes, namely: the right to enter and to clear of timber, danger trees, and brush; to build, cut, fill, level, grade, drain, surface, maintain,

Bonneville Power Administration, attached hereto and by this reference, made a part hereof.

The Grantor reserves the right of ingress and egress over and across said roads and the right to pass and repass along and on said roads insofar as the same extend across the lands of the Grantor, said right to be exercised in a manner that will not interfere with the use of the roads by the UNITED STATES OF AMERICA, its employees, contractors, or assigns.

It is understood and agreed that if said roads are damaged by the UNITED STATES OF AMERICA, its employees, contractors, or assigns, the UNITED STATES OF AMERICA, subject to the availability of appropriations, or its assigns, will repair such damage. It is further understood and agreed that the Grantor may erect or maintain fences across such roads, provided adequate gates of not less than ten feet in width are installed, which may be kept locked, provided the UNITED STATES OF AMERICA is also permitted to install its own lock thereon.

TO HAVE AND TO HOLD said easement and rights unto the UNITED STATES OF AMERICA and its assigns, forever.

The Grantor covenants to and with the UNITED STATES OF AMERICA and its assigns that the title to all brush, timber, or structures existing upon the rights of way on the date hereof, and the title to all present danger trees shall vest in the UNITED STATES OF AMERICA on said date; and that title to any additional danger trees shall vest in the UNITED STATES OF AMERICA upon their being cut pursuant to the terms hereof; and that title to all future danger trees cut pursuant to the terms hereof shall remain in the owner thereof at the date of cutting; and that the consideration stated herein is accepted by the Grantor as full compensation for all damages incidental to the exercise of said easement and danger tree rights, except payment for any additional danger trees as defined hereinabove which may be cut under authority of the UNITED STATES OF AMERICA as herein provided.

The Grantor also covenants to and with the UNITED STATES OF AMERICA that Grantor is lawfully seized and possessed of the lands aforesaid; has a good and lawful right and power to sell and convey same; that same are free and clear of encumbrances, except as above indicated; and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the lawful claims and demands of all persons whomsoever.

The UNITED STATES OF AMERICA, Department of the Interior, acting by and through the Bonneville Power Administrator, pursuant to the Acts of Congress approved August 20, 1937 (50 Stat. 731, 16 U.S.C. 832a, et seq.), as amended, and June 30, 1949 (63 Stat. 377, 40 U.S.C. 471, et seq.), as amended, and regulations and delegations of authority issued pursuant thereto, and as part of the consideration for the easement rights hereinabove described, does hereby remise, release and quitclaim to the Grantor all that portion of Tract LO-35 as acquired by easement dated October 10, 1960 and recorded in Reel 162 '60 D, File No. 15633, Official Records of Lane County, Oregon, which lies southerly of the above-described Tract Lo-R-35.

IN WITNESS WHEREOF, EDWARD HINES LUMBER CO. has caused this instrument to be signed by its proper officers thereunto duly authorized and its corporate seal to be hereunto affixed this 18 day of July, 1968.

[EXTERNAL ⚠]

Hi Jared,

Great to hear from you and thanks for reaching out. I'm doing well, thank you. I hope you are as well.

Yes, the ODA requests submittal of the FAA Form 7460-1 still be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport.

The applicant must submit FAA Form 7460-1 documents to the ODA and receive Letters of Determination for the proposed construction as required by OAR 738-070-0060, prior to issuance of any building permits for the Template Dwellings.

The applicant should note that a separate FAA Form 7460-1 must be submitted for each Template Dwelling.

Notification to the FAA is also required for each Template Dwelling and is completed through the FAA's online portal:

https://oeaaa.faa.gov/oeaaa/external/portal.jsp

The ODA Letters of Determination will provide recommendations for the proposed construction in regards to aviation and public safety.

I am happy to reach out to the applicant directly if further clarification is needed.

Thanks again and please let me know if you have further questions.

Best regards,

Seth Thompson

Hi Seth –

EXHIBIT H

I hope all is well with you. I just want to confirm that the ODA would still like the attached form to be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport?

If so, is their submittal of the form to you all sufficient for the County to issue building permits, or do they need to see the processing of the form through with ODA first?

Thank you much,

Jared Bauder | Planner, CFM

Good afternoon,

Thank you for providing the opportunity for the Oregon Department of Aviation (ODA) to comment on Department File: 509-PA20-05065.

The ODA has determined that a FAA FORM 7460-1 will need to be completed by the applicant for the proposed construction.

The completed FAA FORM 7460-1 must be submitted to the ODA and FAA prior to final approval of building permits or land use decisions.

I have attached a FAA FORM 7460-1 for reference.

Please let me know if you have any questions.

Best regards,

Seth Thompson

NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION

§ 77.7 Form and time of notice.

(a) If you are required to file notice under §77.9, you must submit to the FAA a completed FAA Form 7460–1, Notice of Proposed Construction or Alteration. FAA Form 7460–1 is available at FAA regional offices and on the Internet.

(b) You must submit this form at least 45 days before the start date of the proposed construction or alteration or the date an application for a construction permit is filed, whichever is earliest.

(c) If you propose construction or alteration that is also subject to the licensing requirements of the Federal Communications Commission (FCC), you must submit notice to the FAA on or before the date that the application is filed with the FCC.

(d) If you propose construction or alteration to an existing structure that exceeds 2,000 ft. in height above ground level (AGL), the FAA presumes it to be a hazard to air navigation that results in an inefficient use of airspace. You must include details explaining both why the proposal would not constitute a hazard to air navigation and why it would not cause an inefficient use of airspace.

(e) The 45-day advance notice requirement is waived if immediate construction or alteration is required because of an emergency involving essential public services, public health, or public safety. You may provide notice to the FAA by any available, expeditious means. You must file a completed FAA Form 7460–1 within 5 days of the initial notice to the FAA. Outside normal business hours, the nearest flight service station will accept emergency notices.

§ 77.9 Construction or alteration requiring notice.

If requested by the FAA, or if you propose any of the following types of construction or alteration, you must file notice with the FAA of:

(a) Any construction or alteration that is more than 200 ft. AGL at its site.

(b) Any construction or alteration that exceeds an imaginary surface extending outward and upward at any of the following slopes:

(1) 100 to 1 for a horizontal distance of 20,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(2) 50 to 1 for a horizontal distance of 10,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway no more than 3,200 ft. in actual length, excluding heliports.

(3) 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section.

(c) Any highway, railroad, or other traverse way for mobile objects, of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, for a private road, 23 feet for a railroad, and for a waterway or any other traverse way not previously mentioned, an amount equal to the height of the highest mobile object that would normally traverse it, would exceed a standard of paragraph (a) or (b) of this section.

(d) Any construction or alteration on any of the following airports and heliports:

(1) A public use airport listed in the Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement of the U.S. Government Flight Information Publications;

(2) A military airport under construction, or an airport under construction that will be available for public use;

(3) An airport operated by a Federal agency or the DOD.

(4) An airport or heliport with at least one FAA-approved instrument approach procedure.

(e) You do not need to file notice for construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded structure will not adversely affect safety in air navigation;

(2) Any air navigation facility, airport visual approach or landing aid, aircraft arresting device, or meteorological device meeting FAA-approved siting criteria or an appropriate military service siting criteria on military airports, the location and height of which are fixed by its functional purpose;

(3) Any construction or alteration for which notice is required by any other FAA regulation.

(4) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

INSTRUCTIONS FOR COMPLETING FAA FORM 7460-1

PLEASE TYPE or PRINT

ITEM #1. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #2. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #3. New Construction would be a structure that has not yet been built.

Alteration is a change to an existing structure such as the addition of a side mounted antenna, a change to the marking and lighting, a change to power and/or frequency, or a change to the height. The nature of the alteration shall be included in ITEM #21 "Complete Description of Proposal".

Existing would be a correction to the latitude and/or longitude, a correction to the height, or if filing on an existing structure which has never been studied by the FAA. The reason for the notice shall be included in ITEM #21 "Complete Description of Proposal".

ITEM #4. If Permanent, so indicate. If Temporary, such as a crane or drilling derrick, enters the estimated length of time the temporary structure will be up.

ITEM #5. Enter the date that construction is expected to start and the date that construction should be completed.

ITEM #6. Please indicate the type of structure. DO NOT LEAVE BLANK.

ITEM #7. In the event that obstruction marking and lighting is required, please indicate type desired. If no preference, check "other" and indicate "no preference" DO NOT LEAVE BLANK. NOTE: High Intensity lighting shall be used only for structures over 500' AGL. In the absence of high intensity lighting for structures over 500' AGL, marking is also required.

ITEM #8. If this is an existing tower that has been registered with the FCC, enter the FCC Antenna Structure Registration number here.

ITEM #9 and #10. Latitude and longitude must be geographic coordinates, accurate to within the nearest second or to the nearest hundredth of a second if known. Latitude and longitude derived solely from a hand-held G P S instrument is NOT acceptable. A hand-held GPS is only accurate to within 100 meters (328 feet) 95 percent of the time. This data, when plotted, should match the site depiction submitted under ITEM #20.

ITEM #11. NAD 83 is preferred; however, latitude and longitude may be submitted in NAD 27. Also, in some geographic areas where NAD 27 and NAD 83 are not available other datum may be used. It is important to know which datum is used. DO NOT LEAVE BLANK.

ITEM #12. Enter the name of the nearest city and state to the site. If the structure is or will be in a city, enter the name of that city and state.

ITEM #13. Enter the full name of the nearest public-use (not private-use) airport or heliport or military airport or heliport to the site.

ITEM #14. Enter the distance from the airport or heliport listed in #13 to the structure.

ITEM #15. Enter the direction from the airport or heliport listed in #13 to the structure.

ITEM #16. Enter the site elevation above mean sea level and expressed in whole feet rounded to the nearest foot (e.g. 17'3" rounds to 17', 17'6" rounds to 18'). This data should match the ground contour elevations for site depiction submitted under ITEM #20.

ITEM #17. Enter the total structure height above ground level in whole feet rounded to the next highest foot (e.g. 17'3" rounds to 18'). The total structure height shall include anything mounted on top of the structure, such as antennas, obstruction lights, lightning rods, etc.

ITEM #18. Enter the overall height above mean sea level and expressed in whole feet. This will be the total of ITEM #16 + ITEM #17.

ITEM #19. If an FAA aeronautical study was previously conducted, enter the previous study number.

ITEM #20. Enter the relationship of the structure to roads, airports, prominent terrain, existing structures, etc. Attach an 8-1/2" x 11" non-reduced copy of the appropriate 7.5 minute U.S. Geological Survey (USGS) Quadrangle Map MARKED WITH A PRECISE INDICATION OF THE SITE LOCATION. To obtain maps, contact USGS at 1-888-275-8747 or via internet at "http://store.usgs.gov". If available, attach a copy of a documented site survey with the surveyor's certification stating the amount of vertical and horizontal accuracy in feet.

ITEM #21.

- For transmitting stations, include maximum effective radiated power (ERP) and all frequencies.
- For antennas, include the type of antenna and center of radiation (Attach the antenna pattern, if available).
- For microwave, include azimuth relative to true north.
- For overhead wires or transmission lines, include size and configuration of wires and their supporting structures (Attach depiction).
- For each pole/support, include coordinates, site elevation, and structure height above ground level or water.
- For buildings, include site orientation, coordinates of each corner, dimensions, and construction materials.
- For alterations, explain the alteration thoroughly.
- For existing structures, thoroughly explain the reason for notifying the FAA (e.g. corrections, no record or previous study, etc.).

Filing this information with the FAA does not relieve the sponsor of this construction or alteration from complying with any other federal, state or local rules or regulations. If you are not sure what other rules or regulations apply to your proposal, contact local/state aviation's and zoning authorities.

Paperwork Reduction Work Act Statement: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection displays a currently valid OMB Control Number. The OMB control number for this information collection is 2120-0001. Public reporting for this collection of information is estimated to be approximately 19 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, completing and reviewing the collection of information. All responses to this collection of information are mandatory for anyone proposing construction or alteration that meets the criteria contained in 14 CFR 77. This information is collected to evaluate the effect of proposed construction or alteration on air navigation and is not confidential. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177-1524.

Federal Regulations (14 CFR), part 77 authorizes FAA to collect this information. PURPOSE(S): FAA will use the information provided to administer the Aeronautical Study Process. ROUTINE USE(S): In accordance with DOT's system of records notice, DOT/ALL 16 Mailing Management System and DOT/FAA 826 Petitions for Exemption, Other than Medical Exemption-Public Dockets, the information provided may be disclosed to officials within the Federal government and the public in general.

Subject: Oakridge Access Road Grade Statement

Thom,

To whom it may concern , We did an evaluation of the road to access lots 2800 and 2900 next to the Oakridge Airport that need to be used for access, By using a clinometer to measure the percentage of slope at any point in the road. We found no area that exceeded 10% and most areas were 3% - 6% there are no inclines that would exceed 15% on the road areas in question.

Any Questions please let me know.

Thanks,
Mark W. Brink

Part 2: CAS narrative
Exhibit 1: Site plan
Exhibit 2: Site plan with Lidar
Exhibit 3: Site plan with contour
Exhibit 4: Site plan with aerial
Exhibit 5: Site plan with airport surface info
Exhibit 6: Road access maps 1-4

Applicant's Statement addressing Lane Code Siting Standards for development of a dwelling on Map 21-35-07-30 Taxlot 2900

LC 16.211(8): Siting Standards for Dwellings, Structures and Other Uses. The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h), (2) (j), and (2)(o), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through (b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

RESPONSE: The above provision requires that the standards of subsections (a) through (b) below be weighed together with the requirements of (c) and (e) below in order to determine the best site.

(a) Setbacks. Residences, dwellings, or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet from any ravine, ridge or slope greater than 40 percent;

RESPONSE:

Near other dwellings: The dwelling site is located in the southeast portion of the parcel. The area is sparsely settled with dwellings. The proposed dwelling site is located approximately 700 feet from the 4 dwellings located due south on the south side of the Oakridge Airport. The site is as close to dwellings on other tracts as it can be while maximizing proximity to the forest lands to the north.

Near existing roads: The homesite is located immediately adjacent to an existing road running under the BPA power lines to the north. See Exhibits 1 & 4 – Site Plan and Aerial.

On the most level part of the tract. The tract is level on the south side of the power lines and slopes down to the north on the north side of the lines See Exhibits 2 & 3 Based on these materials, the dwelling site is on the most level portion of the tract, especially when this provision is balanced with other provisions, such as setbacks, access, slopes, and minimal intrusion into forested areas.

On the least suitable portion of the tract for forest use: The entire area of the parcel is comprised of Soil Map Unit Nekia (89D & F) with a forest productivity ratings of at least 160 cu.ft./ac/yr. There is no ability to construct the home within an area of less forest productivity. Exhibit F. Soils are not determinative of forestry suitability, but are relevant. When balanced with other standards, the dwelling site is located on the least suitable portion of the tract for forest use.

EXHIBIT N N
Part 1

At least 30 feet from any ravine, ridge or slope greater than 40%. There are no ravines, ridges or slopes greater than 40% within 30 feet of the site. See Exhibit 2 – Detail Site Plan LIDAR.

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses;

RESPONSE: Intrusion into forest areas is minimized by the placement of the dwelling in the south portion of the property between the airport and the BPA power lines.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

RESPONSE: The subject property is bordered by property zoned F-2 to the west, north, and east. Property to the south is zoned AO. The dwelling site is setback 100 feet from the east property line and 400 feet and 600 feet from the north and west property lines respectively (the directions of the F-2 properties).

(iv) (iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) or LC 16.253(6), as applicable, are met; and

RESPONSE: There are no Class I streams on the subject property

(v) Structures other than a fence or sign cannot be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(bb) 30 feet from all property lines other than those described in LC 16.211(8)(a)(v)(aa) above; and

(cc) The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

RESPONSE: The parcel does not border any public road right-of-way. The dwelling site is at least 30 feet from all property lines. See Site Plan. (8)(a) and (b) through (d) are addressed below. See Site Plan.

(b) The amount of forest lands used to site access roads, service corridors, and structures must be minimized.

001983

RESPONSE: The site will be accessed from Airport Road by an access road across Map 21-25-12 #843 and Map 21-35-07-40 #133 that also serves as access to the parcel to the east Map 21-35-07-30 #2800. The roadway will be constructed to county standards. Service corridors for utilities will run adjacent to the proposed roadway and driveway. Thus, the use of the proposed shared roadway to serve multiple parcels assures the amount of forestland used to site roads and services will be minimized.

The applicant believes that this standard applies only to structures other than the dwelling, as the relationship between dwellings and forestlands is already addressed under (ii). There are no other proposed structures on the property. However, even if the dwelling site is subject to this analysis, the sites are sited with all other siting standards in mind, thus reducing the amount of forest lands used. The response under (ii) is herein incorporated.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:
(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements. (aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house. As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	*Feet of Primary Safety Zone*	*Feet of Additional Safety Zone Down Slope*
0	*30*	*0*
10	*30*	*50*
20	*30*	*75*
25	*30*	*100*
40	*30*	*150*

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent

001984

RESPONSE: The site is level at the proposed homesite. The parcel slopes downward to the north on the north side of the BPS power lines. There are no slopes greater than 10% within 30 feet of the dwelling site. The applicant has provided a 30-foot primary fuel break in all directions. See Exhibit 1 - Site Plan. There are no slopes in excess of 40% within 30 feet of the home site.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

RESPONSE: The proposed dwelling site will have a secondary fuel break that extends to the south property line, east property line, and the BPA easement to the north. The secondary fuel break to the west will be 100 feet.

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district . . .

RESPONSE: The parcel is located within the Hazeldell Rural Fire Protection District.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

RESPONSE: This is instructional.

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:
(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or
(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

RESPONSE: Based on well log data for nearby wells, Exhibit KK – Water Resources Report, there is sufficient proof to make a conclusion that there is a feasible domestic water supply available. The subject property is exempt under ORS 537.545, and agrees to submit the required report once the well is complete.

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the fire fighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

RESPONSE: The subject property is within a fire district. The route of access from the Fire District located at 47592 Hwy 58 to the property is by way of a State Highway (58) for a distance of 1 mile to Airport Road (County road). Airport Road is paved for the entire ¾ mile length to get to the subject property. The proposed shared road and driveway from Airport Road to the subject property will be improved to the applicable Lane Code 16.211 fire standards See Exhibit 6.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

RESPONSE: Access to the site is from Airport Road via an existing shared easement road and a driveway that will be improved to Lane Code 16.211 standards. Exhibit 6 It is feasible to construct the road and driveway to the above county standards.

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not more than 500 feet. Turnarounds shall comply with these design and construction standards:
(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or
(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and
(cc) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

RESPONSE: Turn arounds within the road portion of the shared access are illustrated on Exhibit 6 at intervals of not more than 500 feet. A turn around will be provided at the dwelling,

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from a engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

RESPONSE: No bridges are required or existing. No new culverts are proposed. However, if any are needed, the applicant agrees to install per the above.

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply.

RESPONSE: The proposed shared roadway and driveway can be constructed on slopes not exceeding 16%.

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

RESPONSE: This is instructional.

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

RESPONSE: The driveway portion of the access is less than 200 feet in length to the home site. See site plan, Exhibit 1, Exhibit 6.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for fire fighting equipment from its point of origination to its point of destination.

RESPONSE: Not applicable.

(9) Other Development Standards.
(a) Maintenance, Removal and Replacement of Indigenous Vegetation within the Riparian setback area. Maintenance, removal and replacement of indigenous vegetation within the riparian setback area designated for riparian vegetation protection by the comprehensive plan must comply with the provisions of LC 16.253(2) or LC 16.253(6), as applicable.

No removal of riparian vegetation is proposed for development of the dwelling.

(b) Signs.
(i) Signs shall not extend over a public right-of-way or project beyond the property line.
(ii) Signs shall not be illuminated or capable of movement.
(iii) Signs shall be limited to 200 square feet in area.

RESPONSE: No signs are proposed.

Applicant's Statements addressing Lane Code 16.246 Airport Safety Combining Zone requirements for development of a dwelling on Map 21-35-07-30 Taxlot 2900

LC 16.246(2) Applicability. The /AS-RCP Zone is applied to those lands adjacent to the Creswell Airport, the Cottage Grove Airport, the McKenzie Airport, the Oakridge Airport and Florence Airport which are encompassed by the surfaces set forth and described in LC 16.246(5) below and diagramed in LC 16.246(9) below. For purposes of this Chapter, the elevations of the five runways are established as follows:

(a) Cottage Grove - 641 feet above sea level.
(b) Creswell - 535 feet above sea level.
(c) Florence - 12 feet above sea level.
(d) Oakridge - 1419 feet above sea level.
(e) McKenzie - 1620 feet above sea level.

The determinations of the height of the various airport surfaces below are based on the established primary surface of the Oakridge Airport runway at an elevation of 1419' MSL.

(3) Use Limitations. In a/AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

The homesite is located underneath the Transitional Surface to the north of the Primary Surface. It is feasible to construct a dwelling on the subject property that does not penetrate the surface as described below. See analysis under the applicable Lane Code 16.246(5)(e) provision.

(b) All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

It is feasible to meet these requirements when development of the property occurs. The applicant will file a Notice of Construction or Alteration (Form 7460-1) with the Federal Aviation Administration and Oregon Department of Aviation.

(4) Uses Prohibited. The area lying beneath the Approach Surface beginning at the end of the Primary Surface and extending outward a horizontal distance of 1,000 feet shall be considered to be

EXHIBIT N N
PART 2

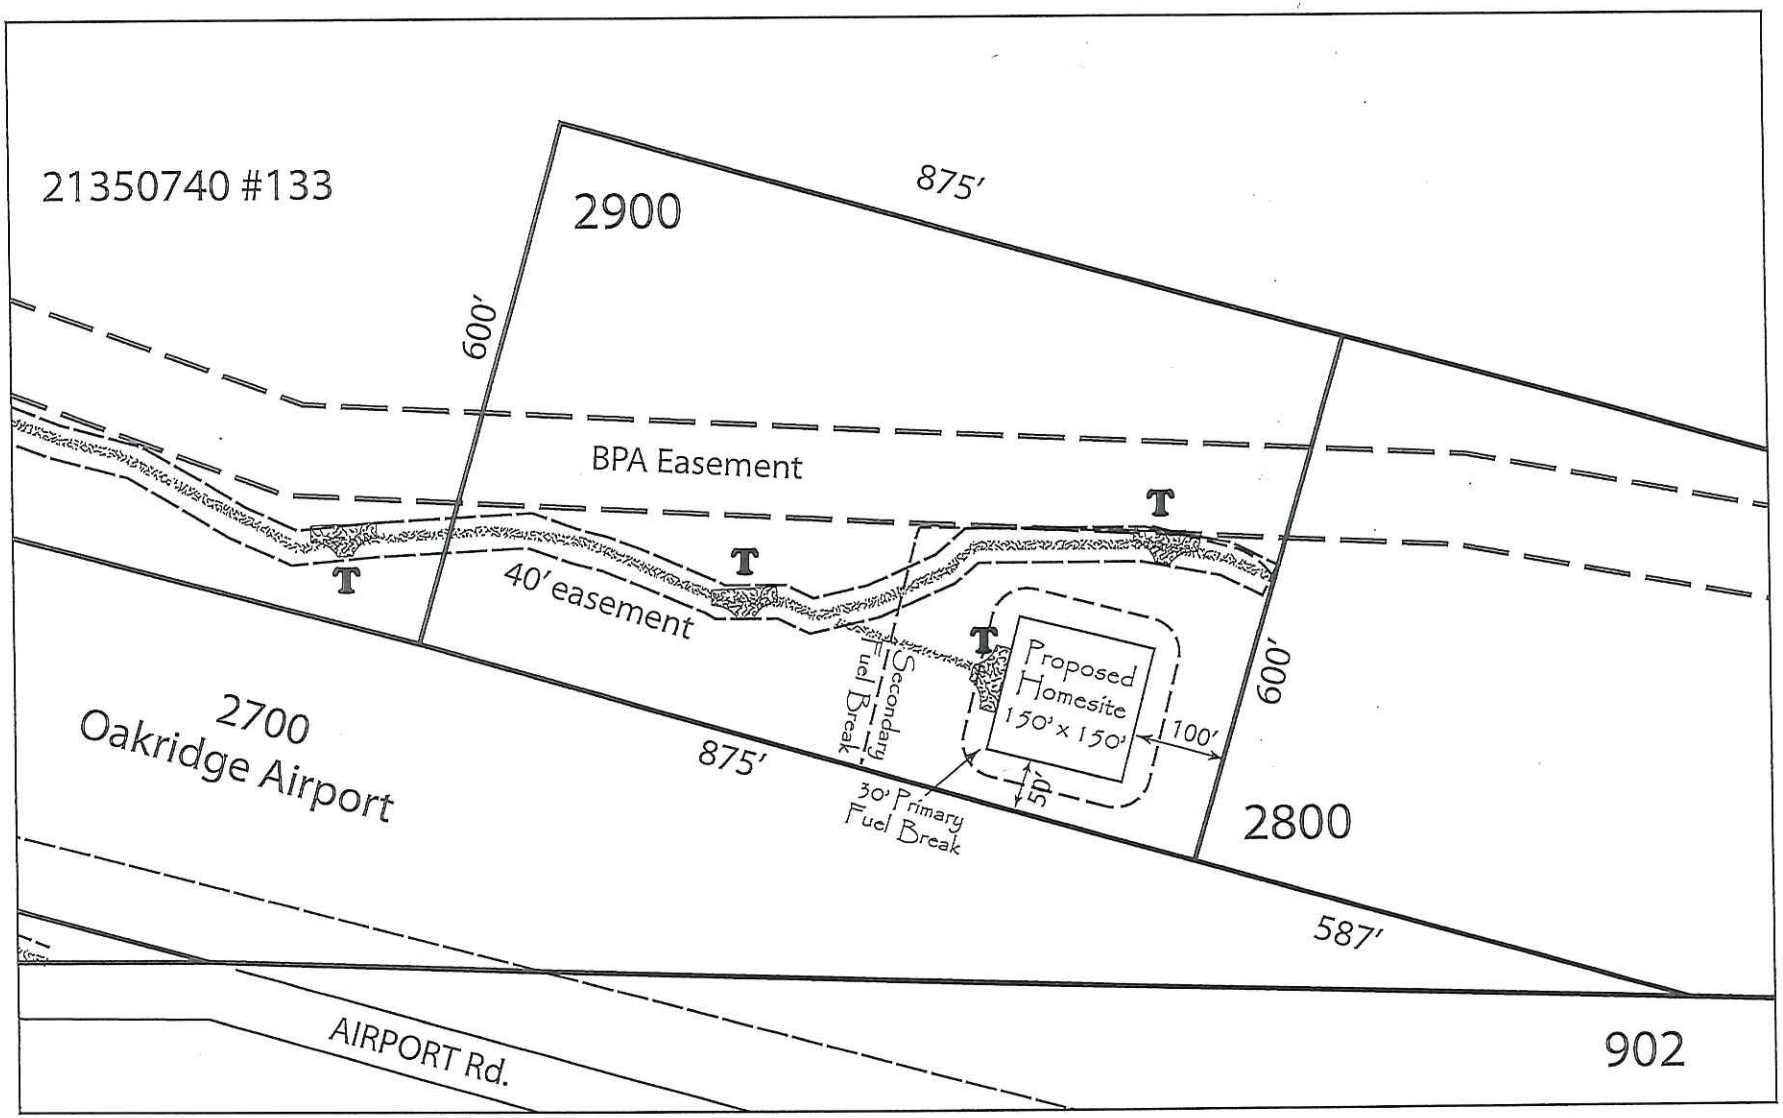
a clear zone. Within this clear zone, no structure or object, except for fences and navigational aids approved by the airport operator, shall be erected, placed, altered, allowed to grow or be maintained above the surface of the ground.

The subject property is not located beneath the Approach Zone of the Oakridge Airport.

(5) Surface Described.

(a) Approach Surface. A surface longitudinally centered on the runway centerline, extending outward and upward from the ends of the Primary Surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 5,000 feet and widening from the width of 250 feet to 1,250 feet at its outer edge.

The subject property is not located beneath the Approach Zone of the Oakridge Airport.



(d) Primary Surface. The Primary Surface is a plane longitudinally centered on the runway centerline and extending 200 feet beyond the ends of the prepared runway surface and having a width of 250 feet. For purposes of this section, the Primary Surface shall be considered as having the same elevation as its respective runway as the same are specified in LC 16.246(2) above.

The proposed homesite is located 230' from the side of the primary surface. The Primary Surface is established at an elevation of 1419' MSL above.

(e) Transitional Surfaces. These surfaces extend upward and outward at 90 degree angles to the runway centerline and the runway centerline extended at a slope of seven feet horizontally for each foot vertically from the sides of the Primary Surface and Approach Surface to the point of intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above the runway.

The southern boundary of the proposed is located 230' from the side of the primary surface when measured perpendicular to the runway centerline. The northern boundary of the proposed homesite is located 380 feet from the side of the primary surface when measured perpendicular to the runway centerline. Using the 7:1 ration to determine the height of the Transitional Surface at the homesite, it can be determined that the Transitional Surface is located at a height of 1451' MSL [230' / 7 = 32.8'; 32 + 1419' = 1451'] at the southern boundary of the proposed homesite. It can also be determined that the Transitional Surface is located at a height of 1473' MSL [380' / 7 = 54.3'; 54 + 1419' = 1473'] at the northern boundary of the proposed homesite. Prior information in the record established the elevation at the level homesite at 1421' MSL. This allows for the construction of a home that is 30 feet in height at the southern border of the homesite (1451' – 1421' = 30') and increasing to a height of 52 feet at the northern boundary of the homesite (1473' – 1421' = 30'). It is feasible to develop a residence in the proposed homesite location within these height limitations.

FARM USE AND FOREST MANAGEMENT EASEMENT

Grantor(s)_____

print name(s)

is/are the owner(s) of real property as described on Exhibit "A", attached hereto. In accordance with the conditions set forth in the decision of the Lane County Land Management Division dated _____ approving Planning Action PA # _____, for Assessor's Map and Tax Lot _____ **Grantor(s)** hereby grant(s) to the owner(s), **(Grantees),** of all property zoned for farm or forest use, a perpetual non-exclusive farm use and forest practices management easement as follows:

1. The Grantor(s), the heirs, successors, and assignees acknowledge by the granting of this easement that the above described property is situated in a farm or forest zone in Lane County, Oregon, and may be subjected to conditions resulting from farm use or commercial forests operations on lands zoned for farm or forest use. Such operations may include farm use as defined in ORS 215.203 and management and harvesting of timber, disposal of slash, reforestation, application of chemicals, road construction and maintenance, and other accepted and customary forest management activities conducted in accordance with Federal and State Laws. Said farm use and forest management activities ordinarily and necessarily produce noise, dust, odors, smoke and other conditions, which may conflict with Grantor's use of Grantor's property for residential purposes, and Grantor(s) hereby give(s) an easement to the property owners of lands zoned for farm or forest use for the resultant impact on Grantors property caused by the farm use or forest management activities on such lands.

2. Grantor(s) shall comply with all restrictions and conditions for maintaining residences in farm and forest zones that may be required by State, Federal, and local land use laws and regulations. Grantor(s) will comply with all fire safety regulations developed by the Oregon Department of Forestry for residential development within a forest zone.

This easement is appurtenant to all property zoned for farm or forest use, and shall bind the heirs, successors, and assignees of Grantor(s), and shall endure for the benefit of the owners of lands zoned for farm or forest use, their heirs, successors, and assignees. The grantees, their heirs, successors, and assignees are hereby expressly granted the right of third party enforcement of this easement.

[EXTERNAL ⚠]

See below from Mark Brink. He has measured grade on the existing road with a clinometer.
Please put this email into the record of PA 20-05066, PA 20-05064 and PA 20-05065.
TL 843 should go forward as supplemented, as the revision was slight;
TL 2800 and 2900 can go forward as originally filed (dwelling site and access) per conversations with Shawna.
No portion of the accessway fall within the runway.

Subject: Oakridge Access Road Grade Statement

Thom,

To whom it may concern , We did an evaluation of the road to access lots 2800 and 2900 next to the Oakridge Airport that need to be used for access, By using a clinometer to measure the percentage of slope at any point in the road. We found no area that exceeded 10% and most areas were 3% - 6% there are no inclines that would exceed 15% on the road areas in question.

Any Questions please let me know.

Thanks,
Mark W. Brink

Subject: RE: ODA Comment: 509-PA20-05065 & 509-PA20-05066

[EXTERNAL ⚠]

Hi Jared,

Great to hear from you and thanks for reaching out. I'm doing well, thank you. I hope you are as well.

Yes, the ODA requests submittal of the FAA Form 7460-1 still be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport.

The applicant must submit FAA Form 7460-1 documents to the ODA and receive Letters of Determination for the proposed construction as required by OAR 738-070-0060, prior to issuance of any building permits for the Template Dwellings.

The applicant should note that a separate FAA Form 7460-1 must be submitted for each Template Dwelling.

Notification to the FAA is also required for each Template Dwelling and is completed through the FAA's online portal:

https://oeaaa.faa.gov/oeaaa/external/portal.jsp

The ODA Letters of Determination will provide recommendations for the proposed construction in regards to aviation and public safety.

I am happy to reach out to the applicant directly if further clarification is needed.

Thanks again and please let me know if you have further questions.

Best regards,

Seth Thompson

This message was sent from outside the organization. Treat attachments, links and requests with caution. Be conscious of the information you share if you respond.

Hi Seth –

I hope all is well with you. I just want to confirm that the ODA would still like the attached form to be a required condition of approval for the King/O'Dea Template Dwellings near the Oakridge Airport?

If so, is their submittal of the form to you all sufficient for the County to issue building permits, or do they need to see the processing of the form through with ODA first?

Thank you much,

[EXTERNAL ⚠]

Good afternoon,

Thank you for providing the opportunity for the Oregon Department of Aviation (ODA) to comment on Department File: 509-PA20-05065.

The ODA has determined that a FAA FORM 7460-1 will need to be completed by the applicant for the proposed construction.

The completed FAA FORM 7460-1 must be submitted to the ODA and FAA prior to final approval of building permits or land use decisions.

I have attached a FAA FORM 7460-1 for reference.

Please let me know if you have any questions.

Best regards,

Seth Thompson

NOTICE OF PROPOSED CONSTRUCTION OR ALTERATION

§ 77.7 Form and time of notice.

(a) If you are required to file notice under §77.9, you must submit to the FAA a completed FAA Form 7460–1, Notice of Proposed Construction or Alteration. FAA Form 7460–1 is available at FAA regional offices and on the Internet.

(b) You must submit this form at least 45 days before the start date of the proposed construction or alteration or the date an application for a construction permit is filed, whichever is earliest.

(c) If you propose construction or alteration that is also subject to the licensing requirements of the Federal Communications Commission (FCC), you must submit notice to the FAA on or before the date that the application is filed with the FCC.

(d) If you propose construction or alteration to an existing structure that exceeds 2,000 ft. in height above ground level (AGL), the FAA presumes it to be a hazard to air navigation that results in an inefficient use of airspace. You must include details explaining both why the proposal would not constitute a hazard to air navigation and why it would not cause an inefficient use of airspace.

(e) The 45-day advance notice requirement is waived if immediate construction or alteration is required because of an emergency involving essential public services, public health, or public safety. You may provide notice to the FAA by any available, expeditious means. You must file a completed FAA Form 7460–1 within 5 days of the initial notice to the FAA. Outside normal business hours, the nearest flight service station will accept emergency notices.

§ 77.9 Construction or alteration requiring notice.

If requested by the FAA, or if you propose any of the following types of construction or alteration, you must file notice with the FAA of:

(a) Any construction or alteration that is more than 200 ft. AGL at its site.

(b) Any construction or alteration that exceeds an imaginary surface extending outward and upward at any of the following slopes:

(1) 100 to 1 for a horizontal distance of 20,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway more than 3,200 ft. in actual length, excluding heliports.

(2) 50 to 1 for a horizontal distance of 10,000 ft. from the nearest point of the nearest runway of each airport described in paragraph (d) of this section with its longest runway no more than 3,200 ft. in actual length, excluding heliports.

(3) 25 to 1 for a horizontal distance of 5,000 ft. from the nearest point of the nearest landing and takeoff area of each heliport described in paragraph (d) of this section.

(c) Any highway, railroad, or other traverse way for mobile objects, of a height which, if adjusted upward 17 feet for an Interstate Highway that is part of the National System of Military and Interstate Highways where overcrossings are designed for a minimum of 17 feet vertical distance, 15 feet for any other public roadway, 10 feet or the height of the highest mobile object that would normally traverse the road, whichever is greater, for a private road, 23 feet for a railroad, and for a waterway or any other traverse way not previously mentioned, an amount equal to the height of the highest mobile object that would normally traverse it, would exceed a standard of paragraph (a) or (b) of this section.

(d) Any construction or alteration on any of the following airports and heliports:

(1) A public use airport listed in the Airport/Facility Directory, Alaska Supplement, or Pacific Chart Supplement of the U.S. Government Flight Information Publications;

(2) A military airport under construction, or an airport under construction that will be available for public use;

(3) An airport operated by a Federal agency or the DOD.

(4) An airport or heliport with at least one FAA-approved instrument approach procedure.

(e) You do not need to file notice for construction or alteration of:

(1) Any object that will be shielded by existing structures of a permanent and substantial nature or by natural terrain or topographic features of equal or greater height, and will be located in the congested area of a city, town, or settlement where the shielded structure will not adversely affect safety in air navigation;

(2) Any air navigation facility, airport visual approach or landing aid, aircraft arresting device, or meteorological device meeting FAA-approved siting criteria or an appropriate military service siting criteria on military airports, the location and height of which are fixed by its functional purpose;

(3) Any construction or alteration for which notice is required by any other FAA regulation.

(4) Any antenna structure of 20 feet or less in height, except one that would increase the height of another antenna structure.

INSTRUCTIONS FOR COMPLETING FAA FORM 7460-1

PLEASE TYPE or PRINT

ITEM #1. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #2. Please include the name, address and phone number of a personal contact point as well as the company name.

ITEM #3. New Construction would be a structure that has not yet been built.

Alteration is a change to an existing structure such as the addition of a side mounted antenna, a change to the marking and lighting, a change to power and/or frequency, or a change to the height. The nature of the alteration shall be included in ITEM #21 "Complete Description of Proposal".

Existing would be a correction to the latitude and/or longitude, a correction to the height, or if filing on an existing structure which has never been studied by the FAA. The reason for the notice shall be included in ITEM #21 "Complete Description of Proposal".

ITEM #4. If Permanent, so indicate. If Temporary, such as a crane or drilling derrick, enters the estimated length of time the temporary structure will be up.

ITEM #5. Enter the date that construction is expected to start and the date that construction should be completed.

ITEM #6. Please indicate the type of structure. DO NOT LEAVE BLANK.

ITEM #7. In the event that obstruction marking and lighting is required, please indicate type desired. If no preference, check "other" and indicate "no preference" DO NOT LEAVE BLANK. NOTE: High Intensity lighting shall be used only for structures over 500' AGL. In the absence of high intensity lighting for structures over 500' AGL, marking is also required.

ITEM #8. If this is an existing tower that has been registered with the FCC, enter the FCC Antenna Structure Registration number here.

ITEM #9 and #10. Latitude and longitude must be geographic coordinates, accurate to within the nearest second or to the nearest hundredth of a second if known. Latitude and longitude derived solely from a hand-held G P S instrument is NOT acceptable. A hand-held GPS is only accurate to within 100 meters (328 feet) 95 percent of the time. This data, when plotted, should match the site depiction submitted under ITEM #20.

ITEM #11. NAD 83 is preferred; however, latitude and longitude may be submitted in NAD 27. Also, in some geographic areas where NAD 27 and NAD 83 are not available other datum may be used. It is important to know which datum is used. DO NOT LEAVE BLANK.
ITEM #12. Enter the name of the nearest city and state to the site. If the structure is or will be in a city, enter the name of that city and state.

ITEM #13. Enter the full name of the nearest public-use (not private-use) airport or heliport or military airport or heliport to the site.

ITEM #14. Enter the distance from the airport or heliport listed in #13 to the structure.

ITEM #15. Enter the direction from the airport or heliport listed in #13 to the structure.

ITEM #16. Enter the site elevation above mean sea level and expressed in whole feet rounded to the nearest foot (e.g. 17'3" rounds to 17', 17'6" rounds to 18'). This data should match the ground contour elevations for site depiction submitted under ITEM #20.
ITEM #17. Enter the total structure height above ground level in whole feet rounded to the next highest foot (e.g. 17'3" rounds to 18'). The total structure height shall include anything mounted on top of the structure, such as antennas, obstruction lights, lightning rods, etc.

ITEM #18. Enter the overall height above mean sea level and expressed in whole feet. This will be the total of ITEM #16 + ITEM #17.

ITEM #19. If an FAA aeronautical study was previously conducted, enter the previous study number.

ITEM #20. Enter the relationship of the structure to roads, airports, prominent terrain, existing structures, etc. Attach an 8-1/2" x 11" non-reduced copy of the appropriate 7.5 minute U.S. Geological Survey (USGS) Quadrangle Map MARKED WITH A PRECISE INDICATION OF THE SITE LOCATION. To obtain maps, contact USGS at 1-888-275-8747 or via internet at "http://store.usgs.gov". If available, attach a copy of a documented site survey with the surveyor's certification stating the amount of vertical and horizontal accuracy in feet.

ITEM #21.

- For transmitting stations, include maximum effective radiated power (ERP) and all frequencies.
- For antennas, include the type of antenna and center of radiation (Attach the antenna pattern, if available).
- For microwave, include azimuth relative to true north.
- For overhead wires or transmission lines, include size and configuration of wires and their supporting structures (Attach depiction).
- For each pole/support, include coordinates, site elevation, and structure height above ground level or water.
- For buildings, include site orientation, coordinates of each corner, dimensions, and construction materials.
- For alterations, explain the alteration thoroughly.
- For existing structures, thoroughly explain the reason for notifying the FAA (e.g. corrections, no record or previous study, etc.).

Filing this information with the FAA does not relieve the sponsor of this construction or alteration from complying with any other federal, state or local rules or regulations. If you are not sure what other rules or regulations apply to your proposal, contact local/state aviation's and zoning authorities.

Paperwork Reduction Work Act Statement: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection displays a currently valid OMB Control Number. The OMB control number for this information collection is 2120-0001. Public reporting for this collection of information is estimated to be approximately 19 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, completing and reviewing the collection of information. All responses to this collection of information are mandatory for anyone proposing construction or alteration that meets the criteria contained in 14 CFR 77. This information is collected to evaluate the effect of proposed construction or alteration on air navigation and is not confidential. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Information Collection Clearance Officer, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177-1524.

Federal Regulations (14 CFR), part 77 authorizes FAA to collect this information. PURPOSE(S): FAA will use the information provided to administer the Aeronautical Study Process. ROUTINE USE(S): In accordance with DOT's system of records notice, DOT/ALL 16 Mailing Management System and DOT/FAA 826 Petitions for Exemption, Other than Medical Exemption-Public Dockets, the information provided may be disclosed to officials within the Federal government and the public in general.

Re: King; Reissue Expired Director's Decision for Template Dwelling; 509-PA 20-05064; Map 21-37-07-30, TL ~~2p00~~ 2900

Jared:

To address BPA easement issues, to better address CAS requirements, and to better comply with required setbacks, we have slightly revised the subject site plans. Exhibits 1 – 6 of attached Exhibit NN. We have also provided supplemental narrative in support. Exhibit NN, part 1 and part 2.

Sincerely,
/s/ *Kimberly JR O'Dea*
Kimberly J.R. O'Dea

Applicant's Statement addressing Lane Code Siting Standards for development of a dwelling on Map 21-35-07-30 Taxlot 2900

LC 16.211(8): Siting Standards for Dwellings, Structures and Other Uses. The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h), (2) (j), and (2)(o), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through (b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

RESPONSE: The above provision requires that the standards of subsections (a) through (b) below be weighed together with the requirements of (c) and (e) below in order to determine the best site.

(a) Setbacks. Residences, dwellings, or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet from any ravine, ridge or slope greater than 40 percent;

RESPONSE:

Near other dwellings: The dwelling site is located in the southeast portion of the parcel. The area is sparsely settled with dwellings. The proposed dwelling site is located approximately 700 feet from the 4 dwellings located due south on the south side of the Oakridge Airport. The site is as close to dwellings on other tracts as it can be while maximizing proximity to the forest lands to the north.

Near existing roads: The homesite is located immediately adjacent to an existing road running under the BPA power lines to the north. See Exhibits 1 & 4 – Site Plan and Aerial.

On the most level part of the tract. The tract is level on the south side of the power lines and slopes down to the north on the north side of the lines See Exhibits 2 & 3 Based on these materials, the dwelling site is on the most level portion of the tract, especially when this provision is balanced with other provisions, such as setbacks, access, slopes, and minimal intrusion into forested areas.

On the least suitable portion of the tract for forest use: The entire area of the parcel is comprised of Soil Map Unit Nekia (89D & F) with a forest productivity ratings of at least 160 cu.ft./ac/yr. There is no ability to construct the home within an area of less forest productivity. Exhibit F. Soils are not determinative of forestry suitability, but are relevant. When balanced with other standards, the dwelling site is located on the least suitable portion of the tract for forest use.

EXHIBIT N N
PART 1

At least 30 feet from any ravine, ridge or slope greater than 40%. There are no ravines, ridges or slopes greater than 40% within 30 feet of the site. See Exhibit 2 – Detail Site Plan LIDAR.

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses;

RESPONSE: Intrusion into forest areas is minimized by the placement of the dwelling in the south portion of the property between the airport and the BPA power lines.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

RESPONSE: The subject property is bordered by property zoned F-2 to the west, north, and east. Property to the south is zoned AO. The dwelling site is setback 100 feet from the east property line and 400 feet and 600 feet from the north and west property lines respectively (the directions of the F-2 properties).

(iv) (iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) or LC 16.253(6), as applicable, are met; and

RESPONSE: There are no Class I streams on the subject property

(v) Structures other than a fence or sign cannot be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(bb) 30 feet from all property lines other than those described in LC 16.211(8)(a)(v)(aa) above; and

(cc) The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

RESPONSE: The parcel does not border any public road right-of-way. The dwelling site is at least 30 feet from all property lines. See Site Plan. (8)(a) and (b) through (d) are addressed below. See Site Plan.

(b) The amount of forest lands used to site access roads, service corridors, and structures must be minimized.

RESPONSE: The site will be accessed from Airport Road by an access road across Map 21-25-12 #843 and Map 21-35-07-40 #133 that also serves as access to the parcel to the east Map 21-35-07-30 #2800. The roadway will be constructed to county standards. Service corridors for utilities will run adjacent to the proposed roadway and driveway. Thus, the use of the proposed shared roadway to serve multiple parcels assures the amount of forestland used to site roads and services will be minimized.

The applicant believes that this standard applies only to structures other than the dwelling, as the relationship between dwellings and forestlands is already addressed under (ii). There are no other proposed structures on the property. However, even if the dwelling site is subject to this analysis, the sites are sited with all other siting standards in mind, thus reducing the amount of forest lands used. The response under (ii) is herein incorporated.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:
(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements. (aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house. As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	*Feet of Primary Safety Zone*	*Feet of Additional Safety Zone Down Slope*
0	*30*	*0*
10	*30*	*50*
20	*30*	*75*
25	*30*	*100*
40	*30*	*150*

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent

RESPONSE: The site is level at the proposed homesite. The parcel slopes downward to the north on the north side of the BPS power lines. There are no slopes greater than 10% within 30 feet of the dwelling site. The applicant has provided a 30-foot primary fuel break in all directions. See Exhibit 1 - Site Plan. There are no slopes in excess of 40% within 30 feet of the home site.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

RESPONSE: The proposed dwelling site will have a secondary fuel break that extends to the south property line, east property line, and the BPA easement to the north. The secondary fuel break to the west will be 100 feet.

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district . . .

RESPONSE: The parcel is located within the Hazeldell Rural Fire Protection District.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

RESPONSE: This is instructional.

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:
(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or
(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

RESPONSE: Based on well log data for nearby wells, Exhibit KK – Water Resources Report, there is sufficient proof to make a conclusion that there is a feasible domestic water supply available. The subject property is exempt under ORS 537.545, and agrees to submit the required report once the well is complete.

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the fire fighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

RESPONSE: The subject property is within a fire district. The route of access from the Fire District located at 47592 Hwy 58 to the property is by way of a State Highway (58) for a distance of 1 mile to Airport Road (County road). Airport Road is paved for the entire ¾ mile length to get to the subject property. The proposed shared road and driveway from Airport Road to the subject property will be improved to the applicable Lane Code 16.211 fire standards See Exhibit 6.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

RESPONSE: Access to the site is from Airport Road via an existing shared easement road and a driveway that will be improved to Lane Code 16.211 standards. Exhibit 6 It is feasible to construct the road and driveway to the above county standards.

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not more than 500 feet. Turnarounds shall comply with these design and construction standards:
(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or
(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and
(cc) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

RESPONSE: Turn arounds within the road portion of the shared access are illustrated on Exhibit 6 at intervals of not more than 500 feet. A turn around will be provided at the dwelling,

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from a engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

RESPONSE: No bridges are required or existing. No new culverts are proposed. However, if any are needed, the applicant agrees to install per the above.

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply.

RESPONSE: The proposed shared roadway and driveway can be constructed on slopes not exceeding 16%.

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

RESPONSE: This is instructional.

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

RESPONSE: The driveway portion of the access is less than 200 feet in length to the home site. See site plan, Exhibit 1, Exhibit 6.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for fire fighting equipment from its point of origination to its point of destination.

RESPONSE: Not applicable.

(9) Other Development Standards.
(a) Maintenance, Removal and Replacement of Indigenous Vegetation within the Riparian setback area. Maintenance, removal and replacement of indigenous vegetation within the riparian setback area designated for riparian vegetation protection by the comprehensive plan must comply with the provisions of LC 16.253(2) or LC 16.253(6), as applicable.

No removal of riparian vegetation is proposed for development of the dwelling.

(b) Signs.
(i) Signs shall not extend over a public right-of-way or project beyond the property line.
(ii) Signs shall not be illuminated or capable of movement.
(iii) Signs shall be limited to 200 square feet in area.

RESPONSE: No signs are proposed.

Applicant's Statements addressing Lane Code 16.246 Airport Safety Combining Zone requirements for development of a dwelling on Map 21-35-07-30 Taxlot 2900

LC 16.246(2) Applicability. The /AS-RCP Zone is applied to those lands adjacent to the Creswell Airport, the Cottage Grove Airport, the McKenzie Airport, the Oakridge Airport and Florence Airport which are encompassed by the surfaces set forth and described in LC 16.246(5) below and diagramed in LC 16.246(9) below. For purposes of this Chapter, the elevations of the five runways are established as follows:

(a) Cottage Grove - 641 feet above sea level.
(b) Creswell - 535 feet above sea level.
(c) Florence - 12 feet above sea level.
(d) Oakridge - 1419 feet above sea level.
(e) McKenzie - 1620 feet above sea level.

The determinations of the height of the various airport surfaces below are based on the established primary surface of the Oakridge Airport runway at an elevation of 1419' MSL.

(3) Use Limitations. In a/AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

(a) The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

The homesite is located underneath the Transitional Surface to the north of the Primary Surface. It is feasible to construct a dwelling on the subject property that does not penetrate the surface as described below. See analysis under the applicable Lane Code 16.246(5)(e) provision.

(b) All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.
(c) All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

It is feasible to meet these requirements when development of the property occurs. The applicant will file a Notice of Construction or Alteration (Form 7460-1) with the Federal Aviation Administration and Oregon Department of Aviation.

(4) Uses Prohibited. The area lying beneath the Approach Surface beginning at the end of the Primary Surface and extending outward a horizontal distance of 1,000 feet shall be considered to be

EXHIBIT N N
PART 2

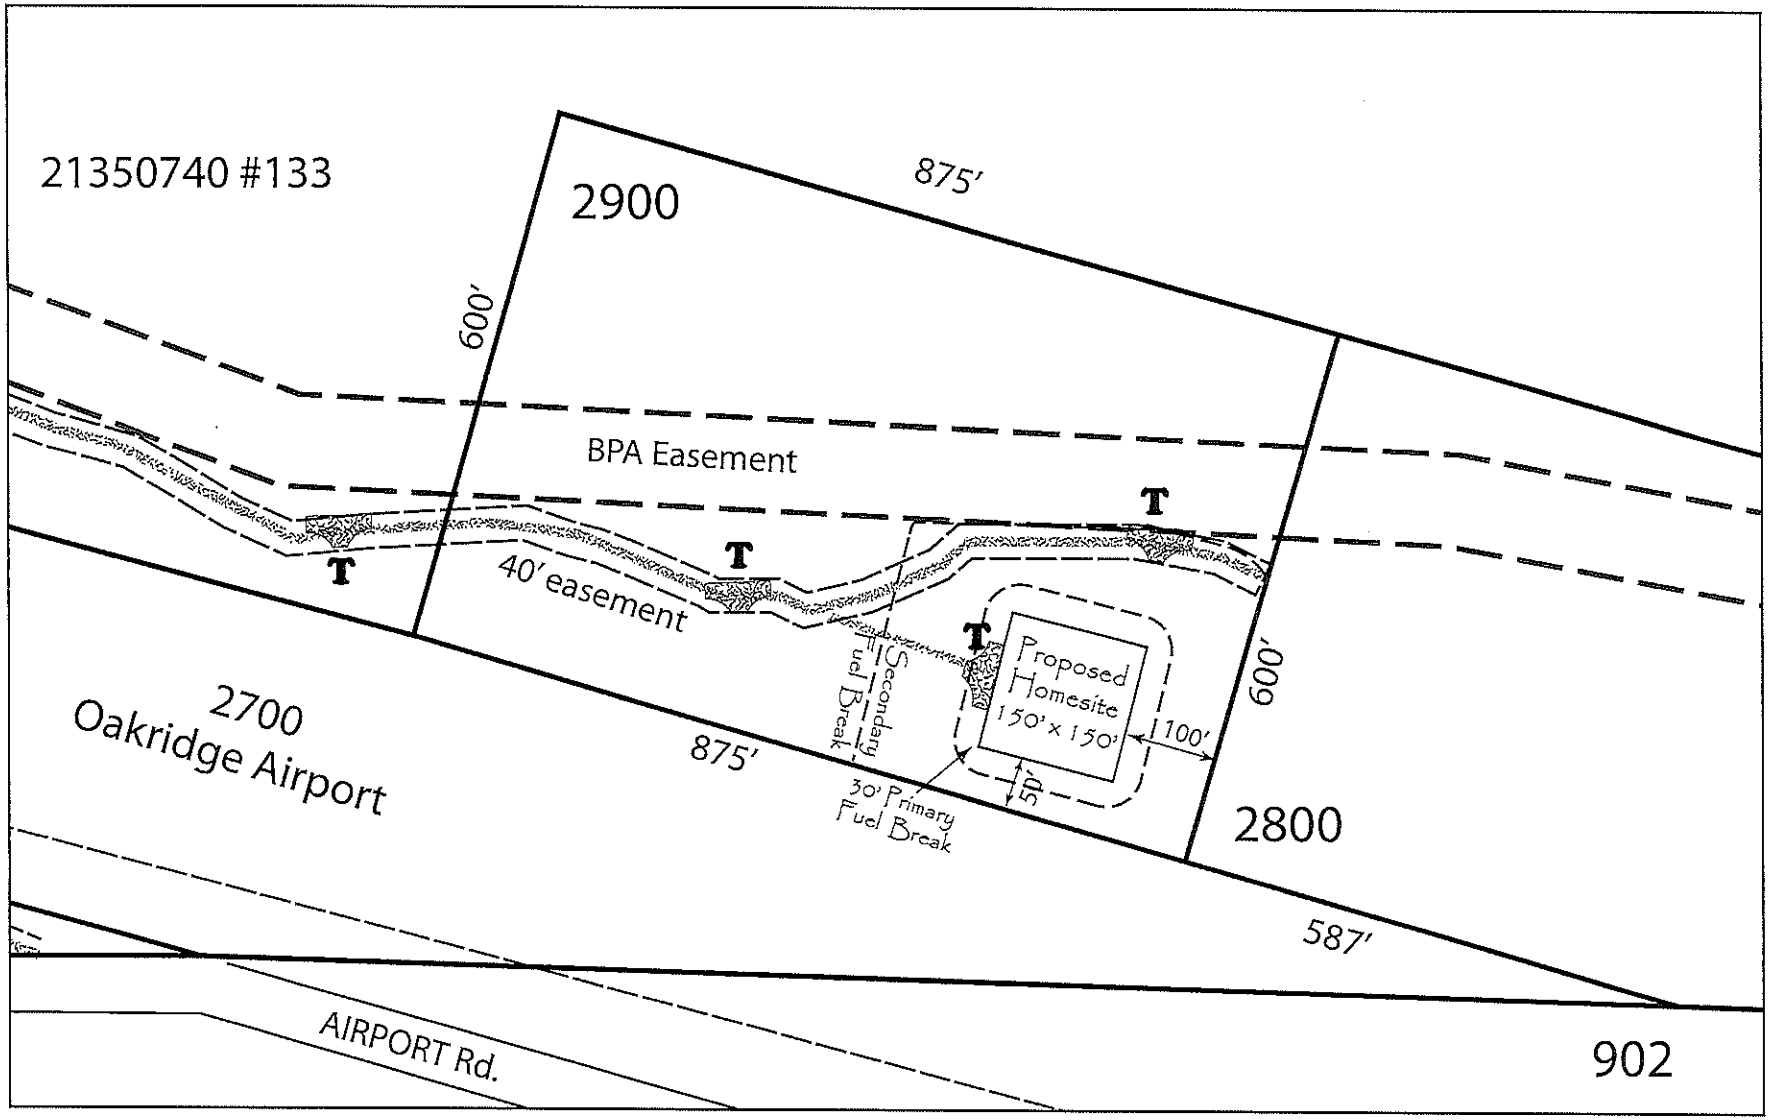
a clear zone. Within this clear zone, no structure or object, except for fences and navigational aids approved by the airport operator, shall be erected, placed, altered, allowed to grow or be maintained above the surface of the ground.

The subject property is not located beneath the Approach Zone of the Oakridge Airport.

(5) Surface Described.

(a) Approach Surface. A surface longitudinally centered on the runway centerline, extending outward and upward from the ends of the Primary Surface at a slope of 20 horizontal feet to one vertical foot for a horizontal distance of 5,000 feet and widening from the width of 250 feet to 1,250 feet at its outer edge.

The subject property is not located beneath the Approach Zone of the Oakridge Airport.



(d) Primary Surface. The Primary Surface is a plane longitudinally centered on the runway centerline and extending 200 feet beyond the ends of the prepared runway surface and having a width of 250 feet. For purposes of this section, the Primary Surface shall be considered as having the same elevation as its respective runway as the same are specified in LC 16.246(2) above.

The proposed homesite is located 230' from the side of the primary surface. The Primary Surface is established at an elevation of 1419' MSL above.

(e) Transitional Surfaces. These surfaces extend upward and outward at 90 degree angles to the runway centerline and the runway centerline extended at a slope of seven feet horizontally for each foot vertically from the sides of the Primary Surface and Approach Surface to the point of intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above the runway.

The southern boundary of the proposed is located 230' from the side of the primary surface when measured perpendicular to the runway centerline. The northern boundary of the proposed homesite is located 380 feet from the side of the primary surface when measured perpendicular to the runway centerline. Using the 7:1 ration to determine the height of the Transitional Surface at the homesite, it can be determined that the Transitional Surface is located at a height of 1451' MSL [230' / 7 = 32.8'; 32 + 1419' = 1451'] at the southern boundary of the proposed homesite. It can also be determined that the Transitional Surface is located at a height of 1473' MSL [380' / 7 = 54.3'; 54 + 1419' = 1473'] at the northern boundary of the proposed homesite. Prior information in the record established the elevation at the level homesite at 1421' MSL. This allows for the construction of a home that is 30 feet in height at the southern border of the homesite (1451' – 1421' = 30') and increasing to a height of 52 feet at the northern boundary of the homesite (1473' – 1421' = 30'). It is feasible to develop a residence in the proposed homesite location within these height limitations.

Subject: RE: 509-PA20-05064 E.KING Oakridge

Kimberly,

Thank You for your inquiry into use of the BPA access road for driveway access to your clients property.

I have attached a copy of the BPA easements and the plan & profile drawing for the area crossing your clients property. BPA's Hills Creek-Lookout Point No. 1, 115 kV transmission line right of way is 100 feet in width. The deeded access road includes portions of the road that are both inside and outside the corridor width. A survey by your client locating the right-of-way boundary may be needed to assist proper siting of structures beyond the boundary.

Also attached, is a copy of BPA's land use application form. A $250.00 non-refundable fee will be required to process the application.

Your email mentioned plans to upgrade the road and bring it up to county standards. As part of the application, BPA would like to know, the equipment that will be used to do the work, what grades and turnouts are planned, what gates may be installed and whether any utilities will be undergrounded in the road. (Distances of road features from transmission structures are especially useful for analysis and can reduce the need for site visits.) This information will allow BPA to do a

thorough analysis of safety hazards that could arise from excavation and grading work in the right-of-way, and to work with your client to assure safe and secure joint access to the road in the future.

Please note that a portion of the BPA access road crosses the airport property as it turns north from the county road. Permission from the Oregon State Board of Aeronautics may be needed to improve and use that portion of the road.

Due to COVID-19 work restrictions, applications can take longer to process than usual. Detailed plans and work descriptions greatly assist in the turnaround time for responses. Email correspondence and application submission is vital to aid response time.

Please contact Myself or Janai if you have further questions or concerns.

Respectfully,

Harley Canaday

To: Soto,Janai A (CONTR) - TERR-ALVEY <jasoto@bpa.gov>
Subject: [EXTERNAL] FW: 509-PA20-05064 E.KING Oakridge

Good afternoon, Janai:

I represent Ed King on the subject properties near Oakridge. Based on our site plans, none of the proposed dwellings are within the BPA right-of-way, which appears to be 80-90'. It is not our intention to propose any dwellings within the BPA easement. In fact, no structures will be built within the BPA easement.

However, we would like to utilize the existing access road. I was under the understanding that it was an old logging road. Regardless, as part of development, it will need to be improved to County standards (16' wide; compacted gravel; 20' of cleared area). This will also benefit BPA and give better access.

Attached is a rough site plan that shows all the parcels and the location of proposed access. It is feasible for us to move the dwelling site on TL 2900 eastward, if that would alleviate your concerns. A couple detailed site plans are also included.

In any case, please let me know what we need to do to obtain permission to use the existing access road, part of which is within the BPA easement?
Further, could you clarify the location and width of the BPA easement so that we can incorporate into our site plans, please?

Thank you much,
Kim

Kim, Sounds good. You may have better luck with Janai than I did, especially if you show her the c. 2010 letter to her.

If you are unable to get something from them that confirms feasibility by Friday and would like me to hold off on the decision until that can be provided, I'll need an extension to enable that.

Kim, BPA comment for this template dwelling application are below. I have followed up with Janai to verify whether the situation is similar to that in 2010 where we had sufficient confirmation to make feasibility findings. It sounds like that is not the case this time- they would need more info and an application before they can confirm that use of their access for the proposed purposes is something arrangements can be made for. Please advise how you would prefer we proceed with the review.

Be well,

Thanks Janai. At this point, we just need to know that the proposed access is feasible, e.g. that BPA is amenable to an arrangement with the applicants. Is the BPA able to confirm that at this stage? If not, is that what might be 12 weeks out or does the applicant need to submit one of your applications to before you would be able to respond?

EXTERNAL ⚠

My error I apologize this will need to be approved by BPA & has not been submitted as of yet. The existing case file we have is on another E.King parcel in Lane County.

I have attached a map that reflects where our lines are it appears the landowner will need to complete one of our applications for approval before building any dwellings in our easement areas. His parcels are marked by blue dots...
Thank you~

Hi Shawna,

BPA currently has received a request for this development & is in the process of review for a Land use permit. Due to the Covid 19 we are currently on a telework status from home. Our current eta on the Land use applications for multiple departments to review may be extended, the normal response time is: 6-12 weeks to process. Thank you for your patience. Have a great day & stay safe.

AND RELEASE OF EASEMENT

The Grantor, EDWARD HINES LUMBER CO., a Delaware corporation, for and in consideration of the sum of * * * TWO HUNDRED FIFTY * * * * * * * * * * * * * * Dollars ($ 250.00 * * *), in hand paid by the UNITED STATES OF AMERICA, receipt of which is hereby acknowledged, hereby grants, bargains, sells, and conveys to the UNITED STATES OF AMERICA and its assigns, a perpetual easement and right to enter and erect, maintain, repair, rebuild, operate, and patrol one line of electric power transmission structures and appurtenant signal lines, including the right to erect such poles, transmission structures, wires, cables, and appurtenances as are necessary thereto, in, over, upon and across the following-described parcels of land in the County of Lane, in the State of Oregon, to-wit:

Tract O-LP-R-13

A strip of land 100 feet in width across the S½SW¼ of Section 7, Township 21 South, Range 3 East, Willamette Meridian, Lane County, Oregon. The boundaries of said strip of land lie 50 feet on each side of and parallel with the survey line of the United States of America for its Bonneville Power Administration's Oakridge-Lookout Point Line, said survey line being described as follows:

Beginning at a point which is N. 41°04'40" W. 3558.3 feet from the southeast corner of Section 12, Township 21 South, Range 2 East, Willamette Meridian; thence S. 47°28' E. 2225.0 feet; thence S. 53°28'00" E. 360.0 feet; thence S. 69°39'00" E. 1141.4 feet; thence S. 88°05'00" E. 1255.5 feet; thence S. 79°16'50" E. 3472.6 feet to a point which is S. 89°14'30" W. 2475.8 feet from the north quarter corner of Section 17, Township 21 South, Range 3 East, Willamette Meridian.

The bearings of said survey line refer to Local Grid.

Tract LO-R-35

A strip of land 100 feet in width through the SE¼SE¼ of Section 12, Township 21 South, Range 2 East, Willamette Meridian, Lane County, Oregon. The boundaries of said strip of land lie 50 feet on each side of and parallel with the survey line of the United States of America for its Bonneville Power Administration's Oakridge-Lookout Point Line, said survey line being described as follows:

Beginning at a point in said survey line in Section 12, Township 21 South, Range 2 East, Willamette Meridian, said point being N. 41°04'40" W. 3558.3 feet from the southeast corner of said Section 12; thence S. 47°28' E. 2225.0 feet to a point; thence S. 53°28'00" E. 360.0 feet to a point; thence S. 69°39'00" E. 1141.4 feet to a point; thence S. 88° 05'00" E. 1255.5 feet to a point; thence S. 79°16'50" E. 3472.6 feet to a point in said survey line in Section 17, Township 21 South, Range 3 East, Willamette Meridian, said point being S. 89°14'30" W. 2475.8 feet from the north quarter corner of said Section 17.

The bearings of said survey line refer to Local Grid;

together with the present and future right to clear said right of way and keep the same clear of brush, timber, structures, and fire hazards, provided that fire hazards shall not be interpreted to include any growing crops other than trees; and also the present and future right to top, limb or fell all growing [illegible] trees and snags (collectively called "danger trees") located on land

and contiguous to said right of way that (a) are danger trees on the date hereof (hereinafter called "present danger trees"), or (b) become danger trees thereafter (hereinafter called "future danger trees"). The right to top, limb or fell danger trees outside of said strips (hereinafter called "additional danger trees") may only be exercised within 3 years after all present danger trees have been cut, and the UNITED STATES OF AMERICA shall pay the person who is the owner thereof at the date of cutting such additional danger trees the market value prevailing at the date of cutting under authority of the UNITED STATES OF AMERICA, such payment to be made within a reasonable period of time after they have been so cut; and

Grantor also hereby grants, bargains, sells, and conveys unto the UNITED STATES OF AMERICA, and its assigns, a permanent easement and right of way for the construction, operation, use and maintenance of roads approximately 14 feet in width (with such additional widths as are necessary to provide for cuts, fills, and turn-outs and for curves at angle points) on, over, and across the land of the Grantor in portions of the SW¼SE¼, SE¼SW¼ and Government Lot 4 of Section 7, Township 21 South, Range 3 East, and the SE¼SE¼ of Section 12, Township 21 South, Range 2 East, W. M., Lane County, Oregon, for the following purposes, namely: the right to enter and to clear of timber, danger trees, and brush; to build, cut, fill, level, grade, drain, surface, maintain,

Bonneville Power Administration, attached hereto and by this reference, made a part hereof.

The Grantor reserves the right of ingress and egress over and across said roads and the right to pass and repass along and on said roads insofar as the same extend across the lands of the Grantor, said right to be exercised in a manner that will not interfere with the use of the roads by the UNITED STATES OF AMERICA, its employees, contractors, or assigns.

It is understood and agreed that if said roads are damaged by the UNITED STATES OF AMERICA, its employees, contractors, or assigns, the UNITED STATES OF AMERICA, subject to the availability of appropriations, or its assigns, will repair such damage. It is further understood and agreed that the Grantor may erect or maintain fences across such roads, provided adequate gates of not less than ten feet in width are installed, which may be kept locked, provided the UNITED STATES OF AMERICA is also permitted to install its own lock thereon.

TO HAVE AND TO HOLD said easement and rights unto the UNITED STATES OF AMERICA and its assigns, forever.

The Grantor covenants to and with the UNITED STATES OF AMERICA and its assigns that the title to all brush, timber, or structures existing upon the rights of way on the date hereof, and the title to all present danger trees shall vest in the UNITED STATES OF AMERICA on said date; and that title to any additional danger trees shall vest in the UNITED STATES OF AMERICA upon their being cut pursuant to the terms hereof; and that title to all future danger trees cut pursuant to the terms hereof shall remain in the owner thereof at the date of cutting; and that the consideration stated herein is accepted by the Grantor as full compensation for all damages incidental to the exercise of said easement and danger tree rights, except payment for any additional danger trees as defined hereinabove which may be cut under authority of the UNITED STATES OF AMERICA as herein provided.

The Grantor also covenants to and with the UNITED STATES OF AMERICA that Grantor is lawfully seized and possessed of the lands aforesaid; has a good and lawful right and power to sell and convey same; that same are free and clear of encumbrances, except as above indicated; and that Grantor will forever warrant and defend the title to said easement and the quiet possession thereof against the lawful claims and demands of all persons whomsoever.

The UNITED STATES OF AMERICA, Department of the Interior, acting by and through the Bonneville Power Administrator, pursuant to the Acts of Congress approved August 20, 1937 (50 Stat. 731, 16 U.S.C. 832a, et seq.), as amended, and June 30, 1949 (63 Stat. 377, 40 U.S.C. 471, et seq.), as amended, and regulations and delegations of authority issued pursuant thereto, and as part of the consideration for the easement rights hereinabove described, does hereby remise, release and quitclaim to the Grantor all that portion of Tract LO-35 as acquired by easement dated October 10, 1960 and recorded in Reel 162 '60 D, File No. 15633, Official Records of Lane County, Oregon, which lies southerly of the above-described Tract Lo-R-35.

IN WITNESS WHEREOF, EDWARD HINES LUMBER CO. has caused this instrument to be signed by its proper officers thereunto duly authorized and its corporate seal to be hereunto affixed this 18 day of July, 1968.

[EXTERNAL ☐]

Shawna and Jared,

Please confirm receipt and please send Notice of Decision for the three applications noted above.

Thank you.

Lauri Segel
LWLC

- The applicant relies on the 2010 application materials for all three 2020 applications; in PA 20-05065, the application says a rectangular template map will not be used; however, the 2010 application and decision for tax lot 843 relied on a rectangular template that did not appear to be aligned with the road; that decision did not discuss the actual alignment of the rectangular template nor whether at least one of the required dwellings was on the same side of the road as the proposed dwelling

- The 2010 decisions did not require proof of slopes, and the applicant's assertions about the slopes at the time appear to understate the area of tax lots 843 and 2900 having slopes greater than 10%

- It does not appear the 2010 decisions required compliance with the BPA concerns regarding their easement that the applicant intends to use to access the three proposed dwellings; it also does not appear that BPA was sent referral notice for the 2020 planning actions

- Tax lot 2900 is within an area designated by DOGAMI mapping as having a high susceptibility for landslides; that area appears to coincide with the proposed dwelling site on tax lot 2900, and a portion of the long access easement roadway that is between tax lot 843 and 2900

- The site plans do not identify the required turnarounds with the applicable spacing

- All the parcel/dwelling count lists have errors including but not limited to siting to preliminary LLVs instead of noticed LLVs

MAP & TAX LOT(S):	21-35-07-30-02900
ZONING:	Impacted Forest Lands Zone (/F-2)
PROPOSAL:	**A REQUEST FOR DIRECTOR APPROVAL OF A DWELLING IN THE IMPACTED FOREST LANDS ZONE (F-2), IN ACCORDANCE WITH THE 'TEMPLATE TEST' PROVISIONS OF LANE CODE 16.211(5) AND (8).**

Thank you for the opportunity to review and comment on this proposal. Please accept the following comments from Lane County Transportation Planning:

COMMENTS FROM LANE COUNTY TRANSPORTATION PLANNING

CONDITIONS

- Any private access easements serving the subject property must meet the requirements of Lane Code 15.055(2), (4), (5), and (7).

- Facility Permit approval will be required to ensure the existing access is adequate to support a shared approach to multiple properties/dwellings as proposed in the written statement. For more information about Facility Permits, please call 541.682.6902 or visit: https://lanecounty.org/government/county_departments/public_works/right-of-way_permits/facility_permits/

- As an informational item, stormwater runoff from the subject property must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches.

FINDINGS

Based on the site plan, the subject property "property" is proposed to take access via an existing driveway off Airport Road. The existing access will extend to the proposed dwelling as a private access easement. Airport Road is owned and maintained by Lane County and is functionally classified as a Rural Local road. For the purpose of establishing development setbacks, the minimum right-of-way (ROW) width of Rural Local roads is 50 feet (Lane Code [LC] 15.070(1)(c)(gg)). Proposed development as conceptually shown meets this requirement.

Lane Code 15.055: Minimum Requirements for Private Access Easements

(2) When a Private Access Easement is used to provide access to a vacant lot or parcel where development is proposed, prior to land use and zoning authorization for the proposed development the following shall apply:

(c) **The requirements specified above in LC 15.055(2)(a) through (b) shall apply only to lands outside of a County-designated Forest zone. Lands within a Forest zone shall be governed by the siting and development standards of the applicable zoning district.**

Pursuant to Lane Code 15.055(2)(c), transportation Planning defers to Land Management Division to ensure the private access easement meets the applicable siting and development standards of the Impacted Forest Lands Zone (F-2).

(4) The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.

(5) All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.

(7) Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of the grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.

Compliance with LC 15.055(4), (5), and (7) must be demonstrated.

Lane Code 15.205: Facility Permits

Facility Permits are required for the placement of facilities and development within Lane County right-of-way. Facilities and development include, but are not limited to: road improvements; sidewalks; new or reconstructed driveway or road approach intersections; utility placements; excavation; clearing; grading; culvert placement or replacement; stormwater facilities; or any other facility, thing, or appurtenance [Lane Code 15.205(1)].

A review of Lane County Facility Permit records indicates that there is no record of a Facility Permit for the existing access off Airport Road.

Lane Manual 15.515: Drainage

Stormwater runoff from new private development must not be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches (Lane Manual 15.515). Accordingly, levels of stormwater directed off-site post-construction of the improvements must match pre-development flows. Ditches adjacent to County roads are designed solely to accommodate stormwater runoff generated by the roadways themselves.

Lauri, We are backlogged for scanning, but I do believe this one is in the queue to be scanned next week. It was just recently deemed complete, along with two others assigned to Jared so we can make adjustments on the comment period. I would note that all three proposals are similar to ones that were previously approved on the properties. I believe the same site plan is proposed.

Welcome to Oakridge Fire & EMS!

Supporting Fire and EMS Services through Community Involvement

The City of Oakridge is dedicated to providing life saving paramedic and fire services to the citizens of the community. Ensuring that lives, as well as structures, can be saved in an emergency is a critical service that ensures prosperity, growth, and the well being of the general public.

Oakridge is nestled in Eastern Lane County off of Oregon Route 58, also known as Willamette Highway 18. Oakridge is a small community with a population of 3,500. Oakridge Fire & EMS is a Fire Department governed under the City of Oakridge. The Fire Department is a combination department consisting of full-time career staff under IAFF Local 851, part-time staff and volunteers that operate under a non-profit 501 (c)3. Oakridge Fire & EMS operates 2 full-time medic units and a 3rd out when available. Our Ambulance Service Area (ASA) is 2,200 square miles, the largest in the county, with mostly rural forested area. Our Fire Service area is Oakridge city limits. We also work under an Intergovernmental Agreement (IGA) with with both Hazeldell Rural Fire District and the City of Westfir to respond for all emergency calls. We respond to all types of emergency calls as far East as Willamette Pass Ski area, mp 61, as far west as mp 17 bordering Dexter Rural Fire District. Oakridge Fire & EMS responds to over 800 calls per year, with more than 87% of those being ambulance calls. The United States Forest Service, along with various independent contractors, control fires in the surrounding National Forest.

PROPOSAL: A request for Type II determination for a Template dwelling in the Impacted Forest Lands (F-2) Zone, pursuant to the provisions of Lane Code 16.211(2)-2.4.

Version 2/2019

Referral Notice and Opportunity to Comment On a Land Use Application for a Development

LAND MANAGEMENT DIVISION
http://www.lanecounty.org

Date: MAR 2 3 2020

Department File: 509-PA20-05064
Applicant: EDWARD KING
Owner: E J K INVESTMENTS LLC
Agent: KIM O'DEA - LAW OFFICE OF BILL KLOOS
Assessor's Map & Taxlot: 21-35-07-30-02900
Base Zone: IMPACTED FOREST LANDS ZONE (/F-2)
Combining Zone: AIRPORT SAFETY (/AS)

Proposal: A request for Director approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(5) and (8).

The purpose of this notice is to acquaint you with the proposed development, to gather information you may have about the project, and provide an opportunity to comment and express concerns related to the approval criteria, prior to the Planning Director's decision to approve or deny the proposal.

The application and related materials are available for inspection at the Lane County Land Management Division at no cost and copies will be provided at reasonable cost. The name of the Lane County Land Management Division representative to contact concerning this application is Shawna Adams, 541-682-8904, or Shawna.ADAMS@lanecountyor.gov.

Approval criteria are found in the section(s) of Lane Code cited above. The criteria may be obtained or viewed at the Land Management Division or at the internet address below. You may submit information in the spaces provided on the last page and return this document to the attention of Shawna Adams, Lane County Land Management Division, 3050 N. Delta Hwy., Eugene, OR 97408, Fax to ATTN: Shawna Adams, (541) 682-3947, or email to Shawna.ADAMS@lanecountyor.gov. Please be sure to reference the department file number shown above, and submit your comments by **4:00 P.M.** on APR 0 7 2020.

Concerns/comments submitted in writing will be considered in making the decision as they relate to the criteria under which the proposal must be evaluated.

Your comments are important and will greatly improve the decision making process, but please note that you will not receive an individual response to information submitted. By law, comments received that are not related to the approval criteria may not be considered. General planning information is available by calling 541/682-3577, or by visiting the Public Works Customer Service Center at 3050 N. Delta Hwy. weekdays between 9 a.m. and 4:00 p.m.

Links to applicable law are available through our Planning homepage:

http://www.lanecounty.org/Departments/PW/LMD/LandUse/Pages/default.aspx

Mailed copies of the approval criteria are also available, at cost, by calling Land Management Division Staff at 541/682-6917. Please allow one week for mailing.

File No. 509-PA20-05064 (21-35-07-30-02900)
Submitted on February 5, 2020
Date Deemed Complete: March 6, 2020

Proposal: A request for Director Approval of a dwelling in the Impacted Forest Lands Zone (F-2), in accordance with the 'template test' provisions of Lane Code 16.211(5) and (8).

The land use application(s) referenced above has/have been deemed complete and accepted for processing pursuant to Lane Code (LC) 14.050(1). Acceptance as a complete application does not involve determining if the application is approvable based on the applicable approval criteria. It is the responsibility of the applicant to demonstrate that the application meets the approval criteria. The information provided by the applicant may or may not be adequate for this purpose.

Staff are required by LC 14.050(1)(d) to mail this written notice to the applicant when an application is deemed complete. Staff will process your application according to LC Chapter 14 Type II procedures. A referral notice will be sent to the applicant, agent, agencies and surrounding property owners allowing a minimum 15 day comment period. Following the comment period, staff will process your application and evaluate whether the approval criteria are met. A land use decision with findings of fact and conditions of approval will then be mailed to the applicant, parties of record and surrounding property owners. Absent an appeal and upon expiration of the 12 day appeal period, your land use decision becomes final.

I am the staff contact for this application unless notice is provided otherwise. If you have any questions concerning this letter or your application, please feel free to contact me, at 541-682-8904 or shawna.adams@co.lane.or.us.

Sincerely,

Shawna Adams, Associate Planner

PROPOSAL: A request for Type II determination for a Template dwelling in the Impacted Forest Lands (F-2) Zone, pursuant to the provisions of Lane Code 16.211(2)-2.4.

Version 2/2019

REQUIRED SUBMITTALS (Also reference the Application Standards handout)

Lane Code 14.020 (3)(b) Electronic Materials.

(i) When application or appeal materials submitted in hard copy format are over five pages in length, an applicant or appellant must provide an identical electronic version of the submitted materials in addition to a hard copy. Any other party submitting written materials into the record that are over five pages is also encouraged to submit an identical electronic copy. Any electronic materials must be in a format acceptable to the Director. This provision should not be interpreted to prohibit electronic submittals of materials less than five pages in length. The County will scan submitted materials upon request for fee. The County cannot be held responsible for electronic submittals that are not received by the Director or not confirmed by the Director to have been received.

(ii) When electronic materials over five pages in length are submitted by any party for inclusion in an application record, an identical hard copy of the materials must also be submitted unless this requirement is waived by the Director.

Lane Code 14.040 Application Requirements

(1) Minimum Submittal Requirements. Applications for a Type I through Type IV procedure must be submitted on a form provided by the Director, address all applicable standards and criteria, and include the following materials and information:

(a) Applications must include at least one hard copy of all application materials, no larger than 11 inch x 17 inch in size;

(b) All applicable information requested on the application form;

(c) Required filing fee, except that the required filing fee may not be required when Lane County initiates an application;

(d) Signature of each applicant;

(e) Signature of a property owner or property owner's authorized representative;

(f) Proof of property ownership by providing a certified or recorded copy of a deed, or land sale contract, or Lane County Tax Assessor's records;

(g) Assessor's map and tax lot number of the subject property;

(h) A site plan drawn to a standard engineer's scale, and conforming to the County's site plan submittal standards;

A site plan must be included. Refer to the handout entitled "How to prepare your plot plan." Identify nearby driveways. Driveways spacing standards are contained in Lane Code 15.138.

(i) Information demonstrating compliance with any applicable prior decisions and conditions of approval for the subject property;

(j) A written narrative clearly indicating what action is requested and addressing all applicable standards and criteria;

(k) Supporting information required to evaluate the application and address the applicable standards and criteria;

(l) A written statement indicating whether a railroad-highway crossing provides or will provide the only access to land that is the subject of an application; and

Does a railroad-highway crossing provide the only access to the subject property?

Yes ___ No X

(m) **Additional information needed to evaluate applicable standards and criteria.**

(2) **Fees Required. In addition to any other applicable approval criteria, an approvable Type II or III application must be accompanied by the appropriate filing fee unless the Director authorizes a waiver or reduction to filing fees pursuant to Lane Manual Chapter 60.850.**

(3) **Determination of Application Requirements. The Director may waive any of the requirements of subsection (1) above if deemed to be inapplicable to the application.**

(4) **Applicant's Burden. It is the applicant's responsibility to provide evidence demonstrating that the application complies with all applicable standards and criteria.**

ADDITIONAL INFORMATION REQUESTED FOR THIS APPLICATION:

ZONING F-2 **ACREAGE:** 12.05 acres

DESCRIBE THE ACCESS TO THE PROPERTY (circle the answer):

State Hwy County Rd Public Rd (Private Easement)

Road name: Easement from Airport Road across Map 21-25-12 #843 and Map 21-35-07-40 #133

NUMBER OF EXISTING DWELLINGS ON PARCEL: None

EXISTING IMPROVEMENTS: What structures or improvements does the property contain (i.e., outbuildings, roads, driveways, wells, septic tanks, drainfields)? Will any structure or improvement be removed/demolished?

None

PHYSICAL FEATURES: Describe the site.

- The Vegetation on the property: See attached application dated 1/4/11, incorporated herein by this reference..
- The Topography of the property: See attached application dated 1/4/11, incorporated herein by this reference...
- Any Significant Features of the property (steep slopes, water bodies, etc.): See attached application dated 1/4/11, incorporated herein by this reference....

APPROVAL CRITERIA

Lane Code 16.211(2) contains the Impacted Forest Lands (F-2) Zone Table of Permitted Uses. Use 2.4, the template dwelling, is subject to (3)(c), (3)(q), (3)(r), (5), and (6).

(3) Use Standards

(c) A single family "template" dwelling authorized on a lot or parcel located within a forest zone pursuant to the following:

The subject property must be a lawfully established unit of land:

- Was the property created by a partition or subdivision? List plat number _____
- If not, a final legal lot verification is required prior to submittal of this application. What is the file number for the legal lot verification?

LLV PA08-6332 Notice PA08-6329

(i) If the lot or parcel is predominantly composed of soils that are:

The minimum number of parcels within the template depends on the productivity of the soil type. At least 51% of the acreage of the parcel is composed of soils capable of producing:

____ (1) Less than 50 cubic feet per acre per year: See subsection (aa)

____ (2) 50 to 85 cubic feet per acre per year: See subsection (bb)

X (3) More than 85 cubic feet per acre per year: See subsection (cc)

Soil Type	(Cubic ft/acre/yr)	% of Parcel
Total (must equal 100 %)		

(aa) Capable of producing zero to 49 cubic feet per acre per year of wood fiber if:

(A) All or part of at least <u>three</u> other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(bb) Capable of producing 50 to 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least <u>seven</u> other lots or parcels that existed on January 1, 1993, are within a 160-acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

(cc) Capable of producing more than 85 cubic feet per acre per year of wood fiber if:

(A) All or part of at least <u>11</u> other lots or parcels that existed on January 1, 1993, are within a 160 acre square centered on the center of the subject tract; and

(B) At least three dwellings existed on January 1, 1993 and continue to exist on the other lots or parcels.

Include a scaled map and the template used to verify the requirements in (aa), (bb), or (cc) showing the 1993 configuration of the parcels.

How many lots or parcels existed on January 1, 1993? 17

How many dwellings existed on January 1, 1993 and continue to exist? 5

12.			
13.			
14.			
15.			
16.			
17.			
18.			

Include property description cards, which you can obtain from Lane County Assessment & Taxation.

If necessary, see the Planner on Duty for prior partitions/subdivision/legal lot status of surrounding properties. If a property was created via a partition or subdivision, please list that above in the deed/date column. If a legal lot verification was completed on a property, please include the PA# along with the year of creation.

If the dwelling is a manufactured dwelling, provide evidence it was placed on the property prior to January 1, 1993.

(ii) Lots or parcels within urban growth boundaries cannot be used to satisfy the eligibility requirements of subsection (i) above;

(iii) A dwelling, as used in subsection (i) above, is considered to be in the 160-acre template if any part of the parcel is in the 160-acre template;

(iv) Except as provided by subsection (v) below, if the subject tract abuts a road that existed on January 1, 1993, the measurement required in (i) above may be made by creating a 160 acre rectangle that is one mile long and 1/4 mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(v) The following applies where a tract 60 acres or larger abuts a road or perennial stream:

(aa) The measurement must be made in accordance with paragraph (iv). However, one of the three required dwellings must be on the same side of the road or stream as the tract, and:

(A) Be located within a 160-acre rectangle that is one mile long and one-quarter mile wide centered on the center of the subject tract and that is, to the maximum extent possible aligned with the road or stream; or

(B) Be within one-quarter mile from the edge of the subject tract but not outside the length of the 160 acre rectangle, and on the same side of the road or stream as the tract;

(bb) If a road crosses the tract on which the dwelling will be located, at least one of the three required dwellings must be on the same side of the road as the proposed dwelling;

Will you be using the 160 acre rectangle template aligned with the road? Yes ___ No X

If yes, is least one of the dwellings used in the dwelling count located on the same side of the road as the proposed dwelling? Yes ___ No ___ (If no, you cannot use the rectangle template)

(vi) A proposed "template" dwelling under this section is not allowed:

(aa) Unless no dwellings are allowed on other lots or parcels that make up the tract and deed restrictions established under paragraph (3)(c)(vii) for the other lots or parcels that make up the tract are met; or

(bb) If the tract on which the dwelling will be sited includes a dwelling;

Does the tract contain any other dwellings? Yes ___ No X

(vii) Where other lots or parcels that make up a tract in Subsection (vi):

(aa) The applicant must provide evidence that the covenants, conditions, and restrictions form adopted as "Exhibit A" in OAR chapter 660, division 6 has been recorded with the county clerk of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(bb) The covenants, conditions, and restrictions are irrevocable, unless a statement of release is signed by an authorized representative of the county or counties where the property subject to the covenants, conditions, and restrictions is located;

(viii) The Director shall maintain a copy of the covenants, conditions, and restrictions filed in the county deed records pursuant to this section and a map or other record depicting tracts do not qualify for the siting of a dwelling under the covenants, conditions, and

restrictions filed in the county deed records pursuant to this section. The map or other record required by this subsection shall be readily available to the public in the county planning office.

(q) For single-family dwellings, the landowner must sign and record in the deed records for the County a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

If this application is approved, this will be made a condition of approval.

(r) For single-family dwellings, the approval is valid for four years from the date of approval, unless otherwise specified in the approval or by other provisions of Lane Code. Notwithstanding the requirements of LC Chapter 14, an application for a two year extension of the timelines for the permit approval can be made and approved pursuant to LC Chapter 14.

Pursuant to ORS 215.417, this application, if approved, will be valid for four years from the date of approval and one two year extension of the timelines can be made. This will be made a condition of approval.

SITING CRITERIA

(5) Siting Standards for Uses, Activities, and Structures

The following siting criteria apply to all new uses, activities, and structures allowed by LC 16.211. These criteria are designed to make such uses compatible with forest operations, to minimize wildfire hazards and risks and to conserve values found on forest lands. The Director must consider the criteria in this section together with the requirements of Section (6) to identify the building site.

(a) Residences, dwellings, and structures must be sited as follows:

(i) Near dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet from any ravine, ridge or slope greater than 40 percent (40%);

Explain the reason for the proposed location. You must address the following issues:

- How is the new dwelling close to other dwellings on adjacent property? Explain.

  See attached application dated 1/4/11, incorporated herein by this reference.

- How is the dwelling near existing roads?

  See attached application dated 1/4/11, incorporated herein by this reference.

- Will a new driveway be constructed or will an existing driveway be extended?

  See attached application dated 1/4/11, incorporated herein by this reference.

- What is the most level part of the property?

  See attached application dated 1/4/11, incorporated herein by this reference.

- What is the area that is least suitable for forest use based on the soil productivity, forest management and forest harvesting practices?

  See attached application dated 1/4/11, incorporated herein by this reference.

- Is there a ravine, ridge or slope greater than 40% within 30 feet of the new dwelling?

  See attached application dated 1/4/11, incorporated herein by this reference.

(ii) With minimal intrusion into forest areas undeveloped by nonforest uses;

Will the dwelling encroach into a forested area? Or will it be located in an existing developed or open area? Explain how the dwelling location will cause minimal intrusion to forested areas:

See attached application dated 1/4/11, incorporated herein by this reference.

(iii) Where possible, when considering LC 16.210(5)(a)(i) and (ii) and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 feet from the adjoining lines of property zoned F-2 or EFU; and

Is the dwelling within 500 feet of adjoining property zoned F-1? Yes ___ No X

If yes, explain:

See attached application dated 1/4/11, incorporated herein by this reference.

Is the dwelling within 100 feet of adjoining property zoned F-2 or EFU? Yes ___ No X

If yes, explain:

See attached application dated 1/4/11, incorporated herein by this reference.

(iv) The amount of forest lands used to site access roads, service corridors, and structures must be minimized.

Explain how the location of the dwelling and driveway minimize intrusion into the forest. Attach additional pages if necessary.

See attached application dated 1/4/11, incorporated herein by this reference.

(b) Setbacks. Structures other than a fence or sign cannot be located closer than:

(i) 20 feet from the right-of-way of a state road, County road, or a local access public road specified in LC Chapter 15.

(ii) 30 feet from all property lines other than those described in Section (5)(b)(i).

(iii) **The minimum distance necessary to comply Sections (5)(a) and (6).**

Does the property front County Right-of-way? Yes ___ No X

If yes, what is the distance from the proposed dwelling to the County Right-of-way? _____ Feet

How far is the proposed dwelling from the northern property line? 375 Feet

How far is the proposed dwelling from the eastern property line? 335 Feet

How far is the proposed dwelling from the southern property line? 130 Feet

How far is the proposed dwelling from the western property line? 335 Feet

Are these setbacks at least the minimum distance to comply with (5)(a) and (6)?

Yes

(iv) **Riparian Setback Area. A riparian setback area applies to the area (iv) between a line that is 100 feet from and parallel to the ordinary high water of a Class I stream designated in the Rural Comprehensive Plan. No structure other than a fence may be located closer than 100 feet from the ordinary high water of a Class I stream unless a riparian modification application is approved in accordance with LC 16.253(3). Vegetation maintenance, removal, and replacement standards and exceptions to these setbacks are found in LC 16.253.**

Is there a designated Class 1 stream on the property? Yes ___ No X

If yes, how far will the dwelling be from the Class 1 stream? _____ Feet

(c) **Domestic Water Supplies. For new dwellings and non-farm structures on vacant land, evidence must be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant must provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(5)(c) above, evidence of domestic water supply means:**

(i) **Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water;**

(ii) **A water use permit issued by the Water Resources Department for the use described in the application; or**

(iii) **Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant must submit the well constructor's report to the Director upon completion of the well.**

What is your proposed water source (check the answer):

Private Well X Community System ___ Public system ___

Describe: Existing wells on nearby properties show adequate supply of water available for parcel. See attached Exhibit.

For a community or public system, do you have written verification the provider can serve your dwelling?

Yes ___ No ___ If yes, include a copy with this application.

Do you have a water use permit (well log) for an existing well, issued by the Water Resources Department? Yes ___ No X

If yes, include a copy with this application. Copies can be obtained by searching for groundwater data at the following website: https://www.oregon.gov/OWRD/pages/index.aspx

(d) **As a condition of approval, if road access to the dwelling is by a road owned and maintained by a private party or by the Oregon Department of Forestry, the U.S. Bureau of Land Management, or the U.S. Forest Service, then the applicant must provide proof of a long-term road access use permit or agreement. The road use permit may require the applicant to agree to accept responsibility for road maintenance.**

(e) **Approval of a dwelling is subject to the following requirements:**

(i) **Approval of a dwelling requires the owner of the tract to plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in department of Forestry administrative rules.**

(ii) **The Director must notify the County Assessor of the above condition at the time the dwelling is approved.**

(iii) **Stocking survey report:**

(aa) **If the lot or parcel is more than ten acres, the property owner must submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and**

(bb) **Upon notification by the Assessor, the Department of Forestry will determine whether the tract meets minimum stocking requirements of the Forest Practices Act. If the Department of Forestry determines that the tract does not meet those requirements, that department will notify the owner and the Assessor that the land is not being managed as forest land. The Assessor will then remove the forest land designation pursuant to ORS 321.359 and impose the additional tax.**

If this proposal is approved, (d) and (e) above will be made conditions of approval.

(6) Fire-Siting Standards for Dwellings and Structures

The following fire-siting standards or their equivalent apply to new residences, dwellings, manufactured dwellings, or structures allowed in Lane Code 16.211:

(a) **The dwelling must be located upon a parcel within a fire protection district or must be provided with residential fire protection by contract. If the dwelling is not within a fire protection district, the applicant must provide evidence that the applicant has asked to be included within the nearest such district. If the Director determines that inclusion within a fire protection district or contracting for residential fire protection is impracticable, the dwelling must comply with the following fire safety plan requirements:**

Is the property within a fire district? Yes X No ___ If yes, go to (b) below.

If the property is not within a fire district, you have two options (choose one):

____ (A) Submit evidence of a long term services contract with the nearest fire district and request annexation into the fire district, or

____ (B) Develop a Fire Protection Plan. It must comply with standards in (i) - (v) below. The Fire Protection Plan will be verified as a Condition of Approval, but it is recommended that you submit the plan with this application.

(i) **The means selected may include a fire sprinkling system, onsite equipment and water storage or other methods that are reasonable, given the site conditions;**

(ii) **If a water supply is required for fire protection, it must be a swimming pool, pond, lake, or similar body of water that at all times contains at least 4,000 gallons or a stream that has a continuous year round flow of at least one cubic foot per second;**

(iii) **The applicant must provide verification from the Water Resources Department that any permits or registrations required for water diversion or storage have been obtained or that permits or registrations are not required for the use;**

(iv) **Road access must be provided to within 15 feet of the water's edge for firefighting pumping units. The road access must accommodate the turnaround of firefighting equipment during the fire season. Permanent signs must be posted along the access route to indicate the location of the emergency water source; and**

(v) **A 100-foot wide primary safety zone and a 100-foot wide secondary safety zone surrounding the perimeter of the dwelling or manufactured dwelling structures must be provided and maintained in perpetuity in compliance with the standards in (6)(c).**

(b) Fire Safety Design Standards for Roads and Driveways.

(i) Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for firefighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways must comply with the standards specified below. Evidence of compliance with the standards specified in (6)(b) should include objective information about the firefighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

Attach to this application objective information demonstrating compliance or feasibility of compliance with Lane Code 16.211(6)(b)(i), including:

X Itemized list of firefighting equipment. Obtain from the fire district (if applicable).

X Description and evidence of physical nature of access or driveway route. Topography maps, photos, or other evidence may be included in the application.

See attached application dated 1/4/11, incorporated herein by this reference.

X Description of proposed improvements to access or driveway route. Design drawings may be included in the application.

See attached application dated 1/4/11, incorporated herein by this reference.

In addition to the above items, the application may also include:

____ A preliminary written verification of compliance from the agency providing fire protection, or a preliminary written certification of compliance from an Oregon Registered Professional Engineer. However, please note that such certification will also be made a condition of approval to verify final access and/or driveway construction.

The standards below will be a condition of approval and will be verified by staff.

(ii) **Road and Driveway Surfaces. Roads must have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways must have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and must have a vertical clearance of 13 feet 6 inches.**

Will an existing driveway be extended to serve the new dwelling? Yes ___ No X

Will there be a new driveway in a new location? Yes X No ___

(iii) **Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County must meet these standards for turnarounds. Dead-end roads must have turnarounds spaced at intervals of not more than 500 feet. Turnarounds must comply with these design and construction standards:**

(aa) **Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) must intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They must be constructed to the standards for driveways in LC 16.211(6)(b)(i) above and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or**

(bb) **Cul-de-sac Turnarounds. Cul-de-sac turnarounds must have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and must be marked and signed by the applicant as "NO PARKING." Such signs must be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and**

(cc) **No cul-de-sacs or hammerhead turnarounds must be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.**

Are you proposing a dead-end road? Yes X No ___

Is it over 200 feet long? Yes X No ___

If yes, it must contain turnouts. Explain: a turnout wil be provided every 500 feet.
See attached application dated 1/4/11, incorporated herein by this reference.

(iv) **Bridges and Culverts. Bridges and culverts must be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width**

surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Will the new driveway or extension of the driveway contain any culverts or bridges? Yes ___ No X

If yes, explain: _____

_____

(v) **Road and Driveway Grades. Road and driveway grades cannot exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the firefighting equipment of the agency providing fire protection to access the use, firefighting equipment and water supply.**

Will the road or driveway contain any slopes in excess of 8%? Yes ___ No X

If yes, explain: _____

_____

(vi) **Identification. Roads must be named and addressed in compliance with LC 15.305 through 15.335.**

Please be advised that staff will evaluate the route of the road serving your dwelling, from the homesite back to the public road to which it connects. Staff will determine if the road is to be named, per LC 15.312 and LM 15.015(3).

(vii) **Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet must provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.**

The driveway must be 12 feet wide. How wide is the driveway? 12'

Is it over 200 feet long? Yes ___ No X

If yes, it must contain turnouts. Turnouts are not required if the driveway is 16 feet wide.

Will the driveway have turnouts? Yes ___ No X

Will the driveway be 16 feet wide? Yes ___ No X

(viii) **Modifications and Alternatives. The standards in (6)(b)(i) through (6)(b)(vii) above may be modified by the approval authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for firefighting equipment from its point of origination to its point of destination.**

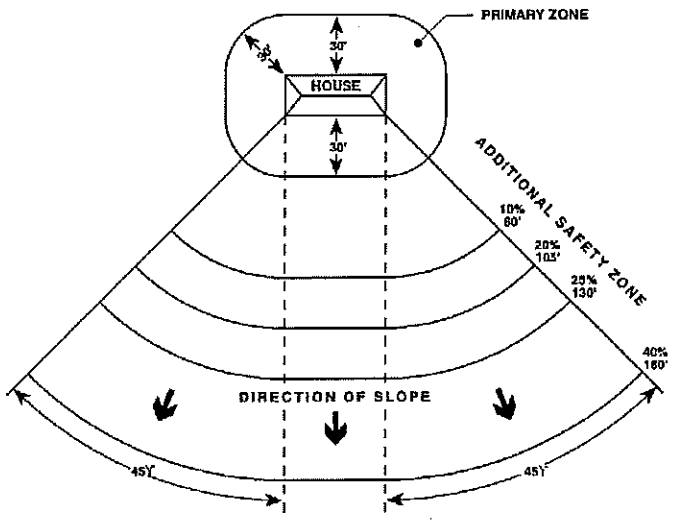
Are you proposing any modifications or alternatives to the road or driveway standards? If yes, explain. Attach additional pages of necessary.

None.

(c) **Fuel-Free Breaks. The owners of dwellings and structures must maintain a primary safety zone surrounding all structures and clear and maintain a secondary safety zone on land surrounding the dwelling that is owned or controlled by the owner in compliance with these requirements.**

(i) **Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures, unless otherwise specifically stated in LC 16.211. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees must be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation must be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) must be placed next to the house.**

(aa) **As slope increases, the primary safety zone must increase away from the house, parallel to the slope and down the slope, as shown in the table and figure below:**



The new dwelling must be surrounded by a 30 foot primary safety zone. If the dwelling is on a slope, the safety zone will increase, as shown in the table.

Table 16.211-2 Minimum Primary Safety Zone

Slope	Feet of Primary Safety Zone	Feet of Additional Primary Safety Zone Down Slope
0%	30	0
10%	30	50
20%	30	75
25%	30	100
40%	30	150

Figure 16.211-1

EXAMPLE OF SAFETY ZONE SHAPE

(ii) Secondary Safety Zone. The secondary safety zone is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary safety zone is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary safety zone must be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees must be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels must be removed.

The secondary fuel break must be established an additional 100 feet from the primary safety zone, but only on property you own.

* Show the fuel breaks on the site plan. If approved, the primary safety zone and the secondary fuel break will be verified as a condition of approval. Contact staff (541-682-3577) or visit the Planning website (www.lanecounty.org/planning) for details regarding fire break standards.

* The establishment and maintenance of fuel breaks within the Riparian Setback Area must comply with the applicable requirements of Lane Code 16.253.

(d) The dwelling must have a fire retardant roof.

(e) Dwellings or manufactured dwellings must be sited at least 30 feet away from a ravine, ridge, or any slope greater than 40 percent slope.

Substantial evidence may need to be submitted with the application to determine slope. This could include photos, slope calculations, and/or evidence from a private engineer or surveyor such as a stamped site plan. What is the slope of the land within 30 feet of the dwelling? 3% - 6%

(f) If the dwelling has a chimney or chimneys, each chimney must have a spark arrester.

If the proposal is approved, (d) and (f) above will be made conditions of approval and will be verified by staff.

COMPLETENESS LETTER

Keir Miller
Planning Director
LMD
3050 N. Delta Hwy
Eugene, OR 97405

RE: Template Dwelling Reissuance; PA _____; Map 21-35-07-30, TL 2900

Completeness issues are limited to the submittal requirements listed in the code under LC 14.040. Substantive review requirements (i.e., approval criteria) cannot be evaluated as part of completeness. With regard to approval criteria, all that is required is that the applicant address each relevant criterion and provide supporting evidence, if needed. The adequacy of the applicant's findings and evidence is evaluated after the application is deemed complete during the substantive review process.

The applicant has submitted a complete application based on the following:

14.040 Application Requirements

(1) Minimum Submittal Requirements. Applications for a Type I through Type IV procedure must:

☐ ***Be submitted on a form provided by the Director;***

See attached. A completed form has been provided.

☐ ***Address all applicable standards and criteria, and;***

See narrative, attached, and also included as Exhibit AA. That narrative addresses all approval criteria.

☐ ***Include the following materials and information:***
☐ ***Applications must include at least one hard copy of all application materials, no larger than 11 inch x 17 inch in size, and an electronic copy if required by LC 14.020(3)(b);***

The attached materials are not larger than 11x17 and an electronic copy is included on CD. See attached.

☐ ***All applicable information requested on the application form;***

As stated above, a completed county form is attached.

☐ ***Required filing fee, except that the required filing fee may not be required when Lane County initiates an application;***

The required filing fee has been submitted.

☐ ***Signature of each applicant;***

The applicant signature is on the application form, attached.

☐ ***Signature of a property owner or property owner's authorized representative;***

The property owner's signature is on the application form, attached. Also attached is an Authorized Representative" form.

☐ ***Proof of property ownership by providing a certified or recorded copy of a deed, or land sale contract, or Lane County Tax Assessor's records;***

Provided as part of Exhibit AA-A and Exhibit CC.

Assessor's map and tax lot number of the subject property;

Provided as part of Exhibit AA and FF. This information can also be found on the application form.

☐ ***A site plan drawn to a standard engineer's scale, and conforming to the County's site plan submittal standards;***

Provided as Exhibit AA-B and Exhibit M.

☐ **Information demonstrating compliance with any applicable prior decisions and conditions of approval for the subject property;**

This requirement is not applicable. The subject property is vacant.

☐ **A written narrative clearly indicating what action is requested and addressing all applicable standards and criteria;**

See narrative attached, and also narrative included as Exhibit A.

☐ ***Supporting information required to evaluate the application and address the applicable standards and criteria;***

Supporting information is provided as Exhibits AA through MM. This evidence is applied to approval standards via the attached narratives.

☐ ***A written statement indicating whether a railroad-highway crossing provides or will provide the only access to land that is the subject of an application; and***

Access to the subject property does not include a railroad crossing. See also attached narrative.

☐ ***Additional information needed to evaluate applicable standards and criteria.***

Provided as Exhibits AA through MM.

Sincerely,

Kim O'Dea

May 3, 2019

Keir Miller, Planning Director
Lane County Land Management
3050 N. Delta Hwy.
Eugene, OR 97401

Re: EJK Inv.; Reissue Expired Director's Decision for Template Dwelling; 509-PA_____ (OLD PA 10-5484); Map 21-35-07-30, TL 2900

Dear Mr. Miller:

The applicant is requesting a Reissuance of Planning Director Approval for Template Dwelling approval PA 10-5484 (approved in 2011). The original approval and application are attached as Exhibit AA. The remainder of the County file for PA 10-5484 is incorporated herein by this reference. The County approval criteria relating to template dwellings has not changed since the approval was issued in 2011.

The following additional information is submitted:

- Adjacent ownership: There continues to be no adjacent property in common ownership. Exhibit DD.
- Subject Property: The subject property remains in the template approved configuration. Exhibit FF – current A&T map.
- Template parcels: The parcels counted toward the template test still fall within the template. Exhibit FF compared to Exhibit AA-G.
- Dwellings: The dwellings counted toward the template test still exist as counted or have been lawfully replaced. Exhibit EE.
- Additional materials as set out in the list of exhibits below.

Supplemental findings:

The dwelling has access via Airport Road, a county road. Access from Airport road is via an existing 40-easement and roadway. The roadway is already graded to 20 feet in width and graveled to 16-20 feet. See aerial. There is sufficient room within the easement to provide turn-arounds every 500 feet. Much of the roadway is within the cleared BPA ROW. There are no grades on the driveway more than 16%. See Lidar. The applicant is providing a loop driveway to the homesite, which benefits fire and emergency services. A turn-around will be provided at the homesite. A railroad-highway crossing will not provide access, as no railroads cross the subject property. Exhibit II.

Sincerely,

Kimberly J.R. O'Dea

ADJOINING OWNERSHIP Is any adjacent property under the same ownership as the subject property? List the map and tax lot(s).

No the owner does not own any adjacent parcel of land, see EXHIBIT "A" for ownership deed.

SITE PLAN A site plan must be included. Refer to the handout entitled "How to prepare your plot plan". Identify nearby driveways. Driveways spacing standards are contained in Lane Code 15.138.

The plot plan is shown on EXHIBIT "B" and EXHIBIT "C" at the end of this form.

ZONING *F-2 zone*

ACREAGE: *12.05 acres more or less*

DESCRIBE THE ACCESS TO THE PROPERTY (circle the answer):

X Private Road Easement

GENERAL ACCESS REQUIREMENTS

Access to the home site must comply with Lane Code Chapter 15. All lots, parcels, or building sites shall have reasonably safe and usable vehicular access either directly to a Public Road, County Road, State Road or an approved Private Access Easement. The access to the homesite must past a two part test. First, the homesite must have legal access. Second, that access must be reasonably safe and useable.

First: A lot or parcel shall be considered as having legal access for the purposes of development when the lot or parcel: (check the one that applies)

_____ (A) Was created in an approved and recorded land division; or

_____ (B) Is part of an unrecorded subdivision filed with the County as a survey recorded prior to January 1, 1955, and the roads in the unrecorded subdivision were dedicated to the County but may not have been accepted as Public Roads as defined in LC 15.010(35); or

___ (C) Is adjacent to a Public Road or County Road, and meets the frontage requirements of LC 15.120

__X_ (D) Is served by a Private Access Easement meeting the requirements of LC 15.055; or

_____ (E) Is adjacent to a state road and meets any applicable state access and permit requirements.

Second: A lot or parcel shall be considered as having reasonably safe and usable vehicular access for purposes of development if the road providing access to the lot or parcel is: (check the one that applies)

____ (A) a County-maintained road or State-maintained road; or

__X___ (B) a Public Road, Local Access Road, or Private Access Easement physically constructed and maintained to the requirements specified in this chapter; and any applicable dedication and improvement requirements of this chapter are met.

EXISTING IMPROVEMENTS Does the property contain any roads, structures, etc.?

The parcel is vacant and contains several existing traveled roadway. The existing roadway is a gravel roadway that goes off County Road No. 2102 and travels westward for approximately 1225 feet before the roadway splits. The northwesterly split is what the owner will be using for the access roadway. The other portion of the split, going westerly, will be used as a driveway to a proposed dwelling site to Tax Lot 843. The northwesterly existing traveled roadway goes northerly and than easterly and is going to be used by 3 other landowners for an access route to their proposed dwellings. A 40 foot wide private road easement will have to be drafted after a private land surveyor locates the existing roadway. This northwesterly access roadway is approximately 12 feet to 14 feet in width and will have to by improved to Lane Code Chapter 16.211 (8) (e) access standards. This northwesterly access traveled roadway has been used by the landowner for forest management and by BPA for an access roadway to maintain there power lines. There is another existing traveled roadway that goes southeasterly from the west property line southeasterly threw the middle of Tax Lot 2900, then loop back to the existing traveled access road. This roadway is approximately 10 feet wide gravel roadway that will be used as a driveway to the proposed dwelling site of Tax Lot 2900. This existing traveled roadway that will be used as the proposed driveway will have to be brought up to Lane Code Chapter 16.2111 (8) driveway standards. Since the proposed driveway is a loop there will be no need for a turnaround. The owner will work with the Fire Department on the access and driveway roadway to make sure that the improvements will meet there requirements for thier type of fire and safety equipment.

PHYSICAL FEATURES: Describe the site. Identify any steep slopes, water bodies (creeks, ponds, etc.) or other significant features. Include additional pages if necessary.

For this particular parcel the proposed dwelling is on a nearly flat portion of the parcel. The proposed dwelling site is 200 feet, east and west by 100 feet north and south, in size and is proposed at approximately 335 feet from the west property line; 370 feet from the north property line; 130 feet from the south property line; and 335 feet from the east property line. The slope on the 200 foot by 100 foot proposed dwelling site is on a 3% to 5% on a northerly downhill slope. The area from the proposed dwelling site to the property lines to the west, east and south consist of a varying slope of 3% to 6% on a northerly downhill slope. The area from the proposed dwelling site going northerly consists of a varying slope. The first 150 feet is a 3% to 6% northerly downhill slope, then the slope changes from 6% to 40% northerly downhill slope. The overall parcel has been clear cut within the last 5 years and has been re-planted. Therefore the existing vegetation consist of small fir trees with some very scattered underbrush with a few oaks and maple trees scattered in for good measure. The soils on this parcel is 77% Class 89D-Nekia Silty Clary Loam, 2% to 12% slopes, the area for the proposed dwelling is on the Class 89D soils but the proposed site will be on a varying slope of 3% to 5%. The Soil Conservation Service for soils classification states that a home site development should be on a flatter portion of the parcel. The proposed dwelling site does not contain any body of water. The northerly portion of the parcel does contain some very steep slopes and the owner is making every effect not to affect the portion of the parcel. That is why the proposed dwelling site is located in the flattest portion of the parcel.

APPROVAL CRITERIA

Lane Code 16.211(5) Template Dwelling.

One single-family dwelling or manufactured dwelling is allowed subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to provide written notice of the decision and an opportunity for appeal, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(5)(a) through (f) and LC 16.211(8) below.

(a) The tract upon which the dwelling or manufactured dwelling will be located has no other dwellings or manufactured dwellings on it. As used in LC 16.211(5), "tract" means one or more contiguous lots or parcels in the same ownership. A tract shall not be considered to consist of less than the required acreage because it is crossed by a public road or waterway.

Does the tract, as defined in this section, contain any other dwellings? _X_ No

(b) The lot or parcel upon which the dwelling or manufactured dwelling will be located was lawfully created. (check the one that applies)

____ (1) If the land has been partitioned or subdivided, identify the partition or subdivision plat number:

_X_ (2) If the land has not been partitioned or subdivided, a legal lot verification is required prior to submittal of this application. What is the PA# for the legal lot verification of this tract: *The preliminary legal lot was completed in 2008, see Lane County Planning Department legal lot verification on PA# 08-6332 (for a copy of the preliminary legal lot verification see EXHIBIT "D"), the notice of the preliminary legal lot was done in 2008, see PA# 08-6329, and since there was no appeals the preliminary legal lot became final on December 2, 2008 (for a copy of the notice see EXHIBIT "E").*

(c) The lot or parcel upon which the dwelling or manufactured dwelling will be located:

The minimum number of parcels within the template depends on the productivity of the soil type. At least 51% of the acreage of the parcel is capable of producing:

—— (1) Less than 50 cubic feet per acre per year: Go to Section (i)

____ (2) 50 to 85 cubic feet per acre per year: Go to Section (ii)

_X_ (3) More than 85 cubic feet per acre per year: Go to Section (iii)

_X_ (4) If there are more than 11 parcels within the template, no soil data is required. Go to Section (iii).

See EXHIBIT "F" for a copy of the Rlid printout

Section (iii) More than 85 cubic feet

(iii) Is predominantly composed of soils that are capable of producing 85 cubic feet per acre per year of wood fiber; and

Include the map and the template used to verify the requirements in (aa) and (bb).

(aa) All or part of at least eleven other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(iii)(aa) above.

How many lots or parcels existed on January 1, 1993? *17*

(bb) At least three dwellings or manufactured dwellings existed on January 1, 1993, on the other lots or parcels described in LC 16.211(5)(c)(iii)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(iii)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings or manufactured dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle.

How many dwellings or manufactured homes existed on January 1, 1993? *9*

(d) Approval of a dwelling or manufactured dwelling shall comply with the requirements in LC 16.211(5)(d)(i) through (iv) below:

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

If your application is approved, it will include a condition of approval that requires a stocking report if the tract contains 10 acres or more. This will be required before a building permit is issued.

(e) Prior to land use clearance of a building permit for the dwelling or manufactured dwelling, when the lot or parcel on which the dwelling or manufactured dwelling will be located is part of a tract, the remaining portions of the tract shall be consolidated into a single lot or parcel and a deed restriction using the form provided in OAR 660-06-027(6), "Exhibit A," shall be completed and recorded with Lane County Deeds and Records. The covenants, conditions and restrictions in the deed restriction:

(i) Shall be irrevocable, unless a statement of release is signed by the Director;

(ii) May be enforced by the Department of Land Conservation and Development or by Lane County;

(iii) Shall, together with a map or other record depicting any tract which does not qualify for a dwelling, be maintained in the Department records and be readily available to the public; and

(iv) *The failure to follow the requirements of LC 16.211(5)(e) above shall not affect the* validity of the transfer of property or the legal remedies available to the buyers of the property which is the subject of the covenants, conditions and restrictions required by LC 16.211(5)(e) above.

If your application is approved and your property is comprised of more than one parcel, this will be a condition of approval.

(f) Land use approval of a permit described in LC 16.211(5) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and *(iii), an application for a two year extension of the timelines for the permit approval described* in LC 16.211(5)(f) above may be made and approved pursuant to LC 14.700(2).

If this application is approved, you have four years to complete the conditions of approval and submit a building permit for the dwelling. If you are unable to submit a building permit within that time, you may request a time extension of two more years. This requires a "Time Extension" application and fee. The time extension must be submitted prior to the expiration date.

(g) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

If your application is approved, you will need to sign and record a "Farm and Forest Management Agreement". This document will be included in the packet that is mailed to you with the application approval.

EXHIBIT "G" for template map

EXHIBIT "H" for copies of A&T description cards

EXHIBIT "I" for copies of rlid, showing date of existing dwellings

Include description cards.

If necessary, see the Planner on Duty for prior partitions/subdivision/legal lot status of surrounding properties.

SITING CRITERIA

Lane Code 16.211(8)

These standards are designed to make the proposed dwelling compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands.

The standards in LC 16.211(8)(a)-(b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

(a) Setbacks. Residences, dwellings or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent;

On the site plan, identify:

- The most level part of the property.
- The area that is least suitable for forest use based on the soil productivity, forest management and forest harvesting practices.

Explain the reason for the proposed location. You must address the following issues:

- How close is the new dwelling to other dwellings on adjacent property?
- Will a new driveway need to be constructed?
- Will an existing driveway be extended?
- Is there a ravine, ridge or slope greater than 40% within 30 feet of the new dwelling?

The proposed dwelling site is approximately 600 feet from the TL 912, being the closest adjacent dwelling. The existing Oakridge Airport runway is an intervening ownership. The topographic conditions and configuration of the parcel would not allow a dwelling any closer to another adjacent dwelling. The proposed dwelling site is on the most level portion of the parcel, being on a 3% to 6% northerly downhill slope. The existing traveled roadway, will be the access road for this parcel, stares from the county road, then goes northerly then easterly threw several other parcels, before the access roadway goes threw TL 2900. The existing traveled access roadway has been history used as a forest management roadway, as well as an access and maintains roadway for the BPA for the power lines. The other existing roadway, going southeasterly threw TL 2900 will be used as a proposed driveway. Both the access and driveway will have to be upgraded to Lane Code Chapter 16.211 (8) access and driveway standards. There is not a ravine, ridge, or slope greater than 40% within 200 feet from the new proposed dwelling. As stated above the proposed dwelling site is on the flattest portion of the parcel, and given the soil type the any location within the Class 89D a dwelling would be allowable on the flatter portion of the soil type.

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses; and

Will the dwelling encroach into a forested area or be located in an existing open area? Explain:

The proposed dwelling site is in a forested area that was clear cut several years ago, therefore is in a mostly open area with only a few scattered underbrush and replanted fir trees.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 and at least 30 feet from the adjoining lines of property zoned F-2 or EFU; and

On the site plan, show the new dwelling and the property lines.

Is the dwelling within 500 feet of adjoining property zoned F-1? *No, the adjacent zone is AO and F-2*

Is the dwelling within 130 feet of adjoining property zoned F-2 or EFU? No

The distance from the north, east and west property lines to the proposed dwelling site is proposed at 335 feet or greater distance. The F-2 zoned parcels are to the north, east and west side of the parcel. The parcels to the south is zoned AO.

(iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) or LC 16.253(6), as applicable, are met; and

Is there a water body on the property? *No*

If so, it must be indicated on the site plan. The dwelling must be at least 100 feet from the ordinary high water mark of a Class I stream. The location of the ordinary high water mark is determined by planning staff. A "Riparian Declaration" application is required if the dwelling is within 125 feet of the ordinary high water mark. You will be notified if a riparian declaration is required.

(v) Structures other than a fence or sign shall not be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road or a local access public road specified in Lane Code LC Chapter 15; and

(bb) 30 feet from all other property lines; and

(cc) The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

The new dwelling must be at least 30 feet from any property line, and 20 feet from the right-of-way of a state road, County road or a local access public road. Some roads have additional setback requirements. Refer to Lane Code Chapter 15 for additional road setbacks.

(b) The amount of forest lands used to site access roads, service corridors and structures shall be minimized.

Explain how the location of the dwelling and driveway minimize intrusion into the forest. Attach additional pages if necessary.

The proposed dwelling is to be located on the flattest portion of the parcel, and the proposed dwelling site is in a clear cut area, that has very little underbrush and marketable trees, the area was clear cut several years ago. The existing forest traveled roadway will be used as an access roadway has been used for prior forest management and for access to the BPA power lines, therefore will have no major impact to the intrusion of the parcel. The other portion of the existing roadway, being the loop portion going threw TL 2900, will be used as the driveway for TL 2900.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:

(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements.

(aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crown and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house.

As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope		
% Slope	Feet of Primary Safety Zone	Feet of Additional Safety Zone Down Slope
0	30	0
10	30	50
20	30	75
25	30	100
40	30	150

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent.

What is the slope of the land within 30 feet of the dwelling? *3% to 6%*

The new dwelling must be surrounded by a 30' primary safety zone. If the dwelling is on a slope, the safety zone will increase, as shown in the table. The safety zone must be established prior to submittal of a building permit.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

The secondary fuel break must be established an additional 100 feet from the primary safety zone, but only on property you own. This will be a condition of approval and must be verified by planning staff prior to submittal of a building permit.

Once you have established the safety zone and the fuel break, submit the "Request for Verification of Conditions". Planning staff will visit the site to verify the construction

meets the standards of the code. Contact Don Nickel (682-3989) for details regarding fire break standards.

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district or shall be provided with residential fire protection as evidenced by a long term contract with a fire protection district (FPD) recorded in Lane County Deeds and Records. If the dwelling or manufactured dwelling are not within a FPD, the applicant shall provide evidence that the applicant has submitted a written request for a long term services contract with the nearest FPD and to be annexed into the FPD boundaries. If the FPD and the Planning Director determine that inclusion within a FPD or contracting for residential fire protection is impracticable, the Planning Director shall require as a condition of approval for the dwelling or manufactured dwelling that the property owner implement and maintain a Fire Protection Plan as an alternative means for protecting the dwelling or manufactured dwelling from fire hazards, consistent with the following standards:

Is the property within a fire district?(circle the answer) *Yes*

Name of fire district: *Hazeldell Rural Fire District*

(aa) Implementation and maintenance in perpetuity of a 100-foot wide primary safety zone surrounding the perimeter of the dwelling or manufactured dwelling structures in compliance with the standards in LC 16.211(c)(i)(aa) above; and

(bb) An external, fire protection system as a component to the equivalent Fire Protection Plan to mitigate the threat to the dwelling and residential structures by a seasonal wildfire or the threat to the forest resource base from a fire originating on the parcel in compliance with the following standards:

(A) Provide a minimum of two all-weather, one-inch valve, fire hydrants and two fire hose reels with sufficient length of fire suppression hose at each hydrant to reach around fifty percent of the exterior of the dwelling and residential accessory structures. The hose reels shall be installed between 50-75 feet from the structure foundations. The minimum fire hose interior diameter shall be one-inch;

(B) Provide a fire nozzle with each fire hose with multiple settings to allow stream, spray and fog applications of water on the exterior of the structures and landscape;

(C) Provide and annually maintain a water supply and pumping system connected to the fire hydrants in compliance with the following minimum requirements: a swimming pool, pond, lake or similar body of water that at all times contains a minimum of 4,000 gallons of water; or a stream that has a continuous year-round flow of at least one cubic foot per second; or a 1,500-gallon storage tank, e.g., concrete septic tank connected to an operating groundwater well for refilling; or a high-yield groundwater well with a minimum yield of 30 gallons per minute for one hour; and a pump system capable of maintaining 80 psi line pressure to the two fire hydrants.

(cc) The property owner shall provide verification from the Water Resources Department that any permits or registrations required for water diversions have been

obtained or that such permits or registrations are not required under state law for the use; and

(dd) Road or driveway access to within 15 feet of the water supply shall be provided for pumping units. The road or driveway access shall accommodate the turnaround of fire fighting equipment during the fire season. Permanent signs shall be posted along the access route to indicate the location of the emergency water source.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

These construction standards will be a condition of approval and will be verified by staff.

(d) Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:

What is your water source (check the answer):

_X_ Private Well

Describe: *The owner will drill a well after the approval of the Special Use Permit and prior to the Verification of Conditions. Which should be one of the conditions of approval.*

(i) Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water; or

For a community or public system, do you have written verification the provider can serve your dwelling? *Not actable*

(ii) A water use permit issued by the Water Resources Department for the use described in the application; or

(iii) Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.

Do you have a water use permit (well log) for an existing well, issued by the Water Resources Department? *No*

(e) Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the fire fighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.

(i) Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

These construction standards will be a condition of approval and will be verified by staff. In addition, refer to the "General Access Requirements" on page 2 of this form.

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not less than 500 feet. Turnarounds shall comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(cc) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

Are you proposing a dead-end road? *No*

Is it over 200 feet long? *No*

The proposed dwelling site will be on approximately 3600 feet from the county road, the majority of the traveled roadway is an access roadway and that surface will be brought up to Lane Code Chapter 16.211 (8) access standards, which is a 16 feet width. The driveway will be a 12 foot wide traveled surface, but will be a loop configuration therefore no turnaround will be required. But the owner will be working with the local fire department to make sure that the access and driveway meets their concerns about fire and safety standards, and meets Lane Code Chapter 16.211 (8) access and driveway fire and safety standards.

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to verification from a engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Will the driveway or road contain any culverts or bridges? *No*

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply.

Will the road or driveway contain any slopes in excess of 8% or 16%? *No*

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

Will the road provide access to more than three dwellings? *Yes*

If yes, the road must be named. This will be a condition of approval and a road name application will be included with the packet that is sent to you.

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

The driveway must be 12 feet wide. How wide is the driveway? *The existing traveled roadway varies from 10 feet to 12 feet wide. The owner will re-grade the existing roadway to meet or exceed Lane Code Chapter 16.211 (8) driveway standards.*

Is it over 200 feet long? *Yes*

If yes, it must contain turnouts. Turnouts are not required if the driveway is 16 feet wide.

Will the driveway have turnouts? *No*

Will the driveway be 16 feet wide? *No*

Since the proposed driveway is going to be a loop configuration and is going to be less than 400 feet in length, turnouts and a turnaround is not required.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for fire fighting equipment from its point of origination to its point of destination.

Are you proposing any modifications or alternatives to the road or driveway standards?
No

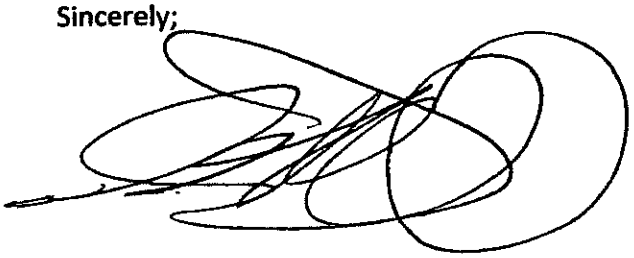
Re: Items that need to be submitted to complete the SUP, address the Oakridge Airport overlay zone, see Lane Code 16.246 (3)(a)-(c), for Tax Lot 2900 of Tax Map 21-35-07-30.

Dear Jerry:
I have complete the necessary field work to address the county's planning department concerns about the proposed dwelling site in relationship to the Oakridge Airport overlay zone. Lane Code 16.246 (3)(a)-(c) discuss the concerns about the (a) the height of the proposed structure (b) to create electric interference with navigation signals or radio communication between the airport and aircraft or (c) all structures shall be designed to limit the structure height, light, glare producing surfaces, radio interference, smoke, and or other hazards to flight air navigation or public health, safety and welfare. It appears that all most all of the issues that are of concerns within Lane Code 16.246(3)(a)-(c) are issues that will need to be addressed at the time of applying for a building permit. The lighting, smoke, radio interference and other related issues are building permit limitations. The only real issue that can be addressed at the SUP application is the height of the proposed dwelling in relationship to the zone limitation on height. The airport overlay zone can be broken down into 3 major parts. I will address each of the 3 parts as follows:

1) The most restrictive is the Primary Surface, which is a longitudinally plane centered on the runway centerline and extending 200 feet beyond the ends of the prepared runway and having a width of 250 feet. For this particular parcel the primary surface is extending out 125 feet at perpendicular right angle from the centerline of the existing runway. Since the proposed dwelling site is 490 feet at right angle from the centerline of the airport this is not an issue;
2) The next is the Transitional Surface, which starts at the end of the primary surface and then extends outward at 90 degree angle from the side of the primary surface and approach surface at a slope of 1 horizontal foot to seven vertical feet, to their intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet. For this particular parcel if the slope is 7 foot vertical to 1 foot horizontal than



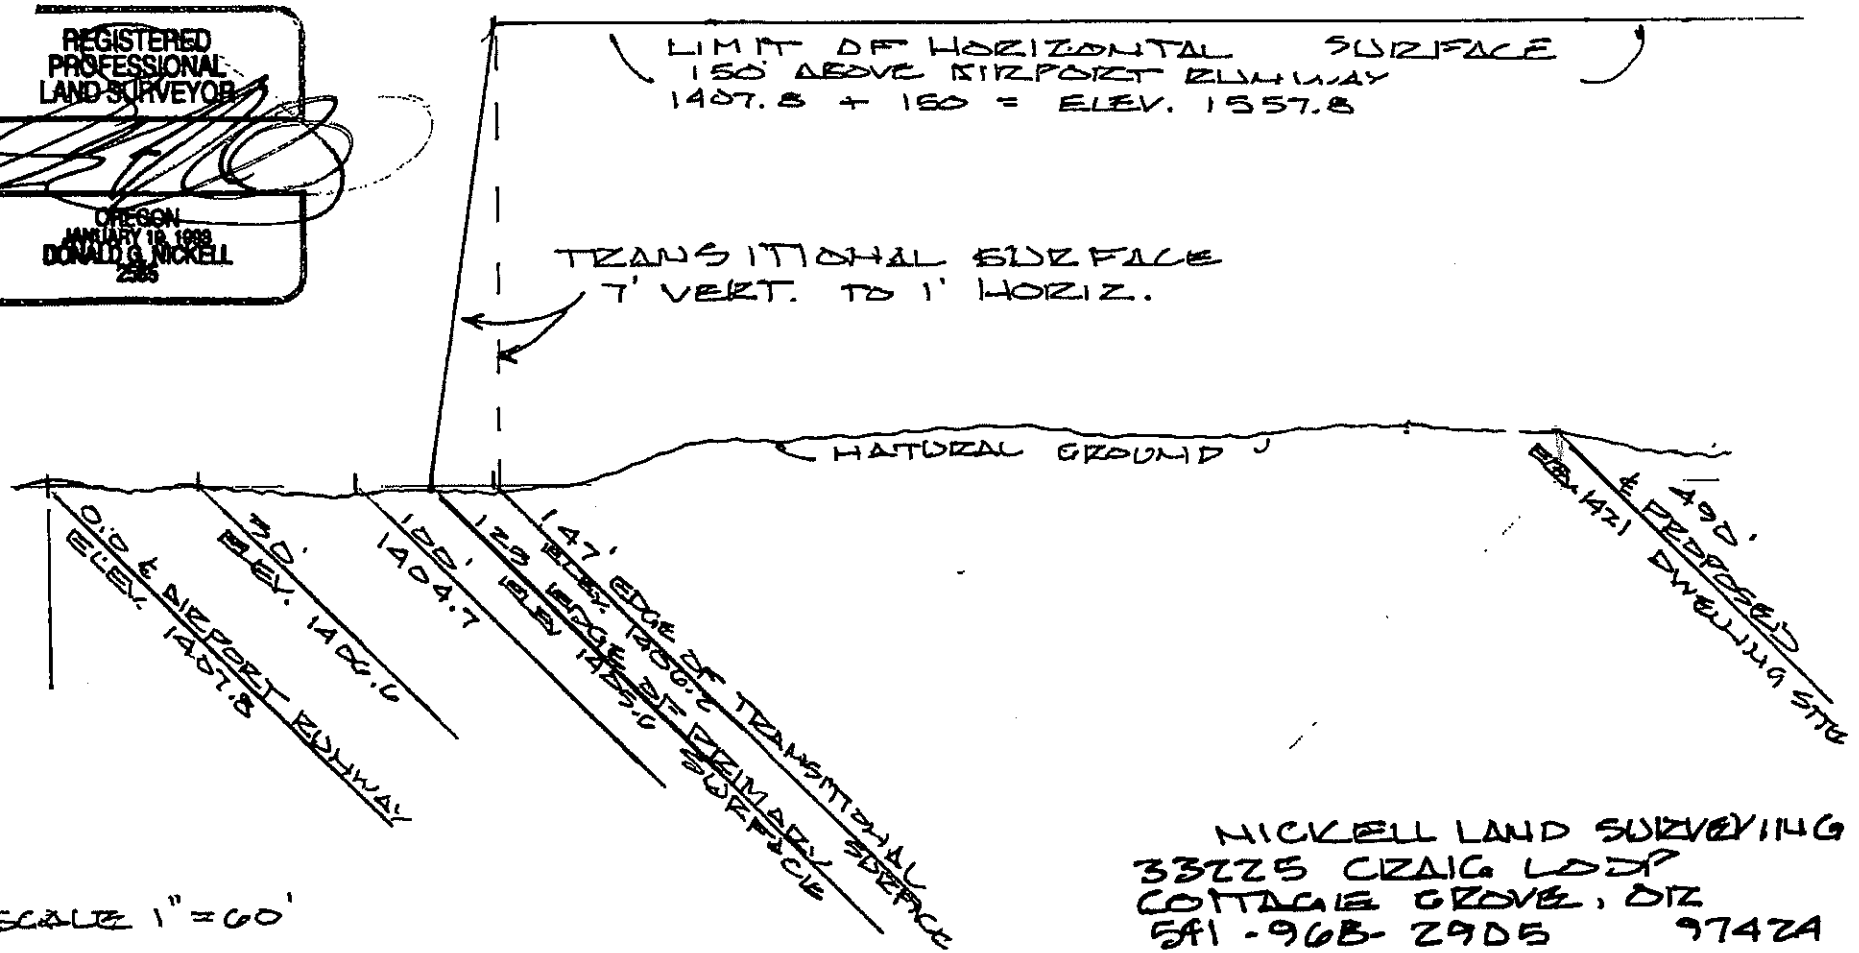
the width of the transitional surface is only approximately 22 feet wide, therefore from the centerline of the runway at right angles to the existing runway surface the total for both the primary and transitional surfaces is only 147 feet. Since the proposed dwelling site is 490 feet from the runway centerline this again is not an issue;

3) The next is the Horizontal Surface, which is a horizontal plan 150 feet above the airport runway, and extending out 5000 feet from the center of the airport runway. Now this appears to be the only issue that we have. I have run elevations on the runway center line and elevations on the site of the proposed dwelling. The results are the runway elevation is 1407.8, the site elevation is 1421 and the horizontal surface elevation is 1557.8, therefore the proposed dwelling site can be 136.8 feet in height. The owners can easily put in a 2 story building and have room to spare. I discussed the height issue with Lane County Building Department and they indicated that a 10 foot ceiling double story house most likely would have total height of 35 foot, therefore using the elevations 1421 plus 35 equals 1454 which is allows a 100 foot Clarence.

I am submitting a cross section of my findings with my stamp. I am also submitting a aerial phone of the parcel to show the distance to the different Surfaces in relationship to the proposed dwelling site.

If you have any questions please contact me at the above address or phone number or by e-mail at nickell2u@msn.com.

Sincerely;



DONALD NICKELL

LEGAL LOT VERIFICATION REPORT

PUBLIC WORKS DEPARTMENT *125 E 8th AVENUE, EUGENE OR 97401 PLANNING: 682-3807*

Date: 11/19/2008

Applicant: Nickell Land Surveying & Planning, LLC
33225 Craig Lp.
Cottage Grove, Or. 97424

Owner: Crown Properties, LLC
30414 LeBleu Rd.
Eugene, Or. 97405

RE: Report and Verification of a Legal Lot, PA08-6332
Tax Map and Lot Number: 21-25-12-00-00800 (Revised 12.05 acres)
More exactly described: Declaration of Property Line Adjustment 2008-059425 P-2 dated 10/07/2008

This legal lot verification report is based upon information provided by the applicant and County records on the above referenced property. Based upon our findings, this unit of land **conformed** to applicable regulations that existed at the time it was created.

Findings (Refer to Lane Code 13.010 for the definition of a legal lot, lot and parcel)

1. The unit of land was created before being reconfigured as a separate parcel on or before 02/09/1901. Information on the instrument(s) from and by which this unit of land was reconfigured is as follows:

   a) Information on the instrument from which the unit of land was divided or separately described: Deed Book 51 Page 627 dated 02/09/1901 (See LLV PA06-7362)

   b) Information by which the subject property was reconfigured: Declarations of Property Line Adjustment 2008-059421, 2008-059424, & 2008-059425 P-2 dated 10/07/2008 (See LLV's PA08-6330 & PA08-6334 for the other affected parcels, being P-1 & P-4)

2. Based upon the above information, the creation of this unit of land as a separate parcel **complied** with all effective land division laws and zoning regulations for size and shape and therefore meets the criteria for a legal lot:

   a) Land division regulations:
   When the unit of land was created, there were no land division laws regulating its creation. Lane County adopted applicable land division regulations on March 26, 1975. This unit of land **complied** with land division laws because the unit of land was created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances. The unit of land was reconfigured by the adjustment of the common property line which is authorized by ORS 92. The adjustment is limited to the relocation of a common boundary between two lawfully created units of land where an additional unit of land is not created.

   b) Zoning regulations:
   When the unit of land was created, there were no zoning laws regulating its creation. Lane County adopted applicable zoning regulations on 08/29/1978, however the reconfiguration fell under the current F-2 zoning which was adopted on 02/29/1984. This unit of land **complied** with this zoning because the adjustment of common property lines is authorized by ORS 92. The adjustment is limited to the relocation of a common boundary where the existing unit of land reduced in size by the adjustment complies with applicable zoning ordinances.

EXHIBIT "D"

Notes:
Tax Lot 800 (Revised 12.05 acres), Map 21-25-12, as described in Declaration of Property Line Adjustment 2008-059425 P-2 dated 10/07/2008, as depicted on the enclosed map complies with applicable land division and zoning requirements.

FOR INFORMATIONAL PURPOSES ONLY: This unit of land does not appear to have legal access.

PLEASE NOTE: THIS IS A PRELIMINARY LEGAL LOT DETERMINATION AND IS NOT A FINAL LEGAL LOT DETERMINATION.

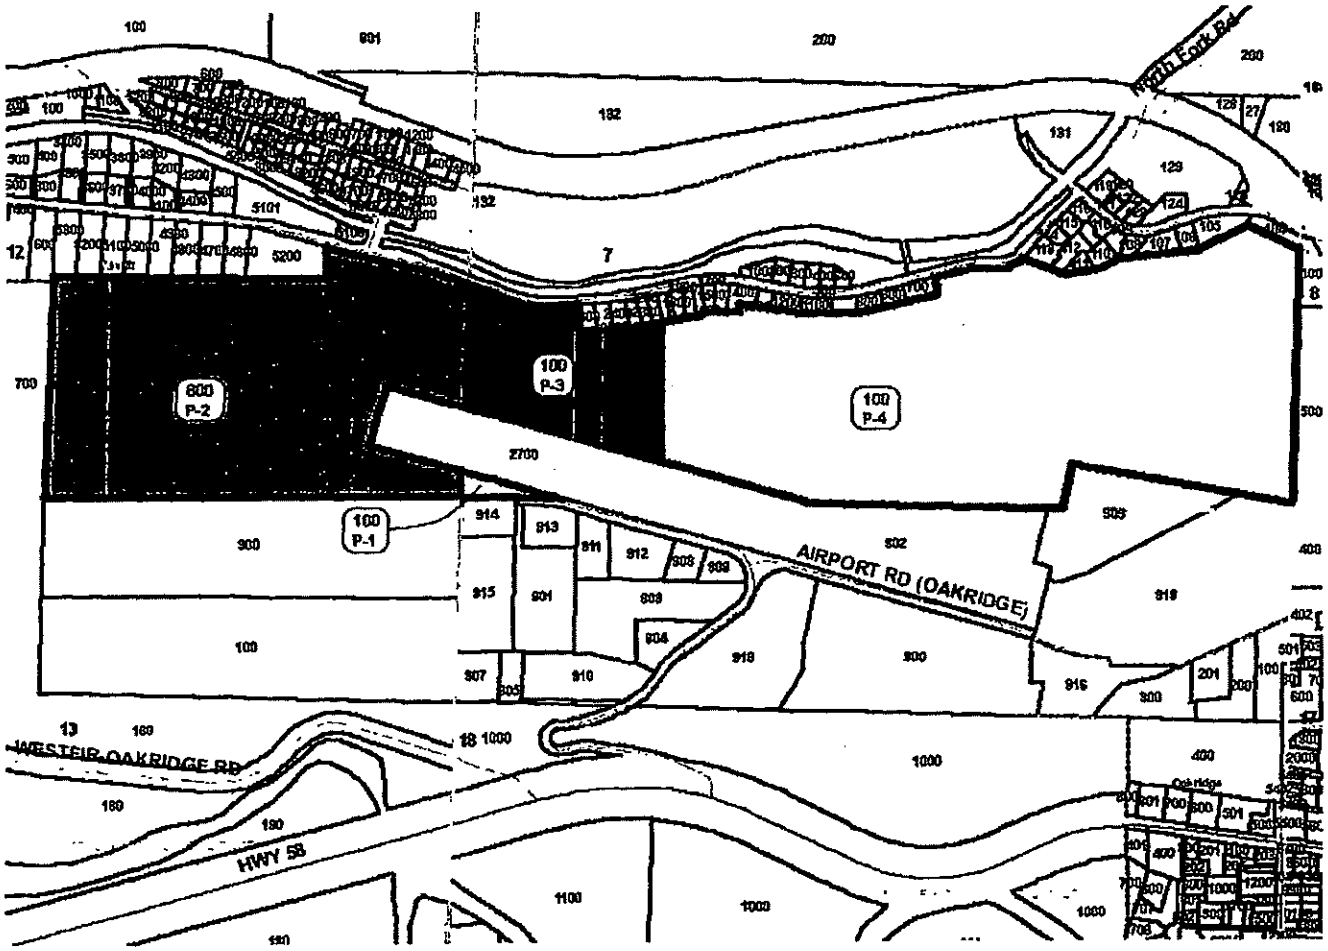
Legal Lot Information:

A. A legal lot verification by the Director is considered final when it is made and noticed and shall occur when:
   1. Submit an application: An application is submitted and reviewed for a legal lot verification on a lot or parcel resulting from a property line adjustment; or
   2. Notice is sent: If notice is requested by the property owner for any legal lot verification, upon submitting an application for review

PLEASE NOTE: Please be aware that if the boundary of this preliminary legal lot changes by the time a permit or application requiring a legal lot is submitted, a new Legal Lot Verification will be required.

B. If your land is found to be a legal lot, then:
   1. Ownership in this property may be conveyed with the assurance that it will not require approval by Lane County under its land division regulations; and
   2. Lane County will recognize this property as a legally separate unit of land for the purposes of development. Nevertheless, development will still be subject to applicable zoning, sanitation, access, and building regulations.

PLEASE NOTE: A Legal Lot Determination and Decision affirms the legal creation of this unit of land, it does not create a new unit of land and is not used with the intention of extinguishing written or unwritten real estate rights. Furthermore, Lane County makes no claim as to the property's ownership, title or boundary location. Additionally, legal lot verification does not approve development or improvement



Sincerely,

Brandon J. Callister

Property Owner: Crown Properties, LLC
Applicant: Nickell Land Surveying & Planning, LLC
Assessor's Map & Tax Lot: 21-25-12-00-00800 & 21-35-07-40-00100
Contiguous Ownership: NONE

You own or occupy property near the above referenced property which is the subject of a land use application and pending decision for conditional **Approval** by the Lane County Planning Director.

PROPOSAL: To make the Director's Legal Lot Verification final and granting this unit legal lot status in accordance with Lane Code Chapter 13.020.

PLEASE NOTE: An approval of this proposal does not create a new unit of land and is not used with the intention of extinguishing written or unwritten real estate rights. Furthermore, Lane County makes no claim as to the property's ownership, title or boundary location. Additionally, this legal lot decision does not approve development or improvement of the subject unit of land beyond what is allowed by current zoning.

Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals. You may receive more information, including requirements to appeal this pending decision, by the Director to the Lane County Hearings Official.

Attached to this Notice are a Staff Report and a Legal Lot Verification. The application, the Lane County Planning Director's report, all documents provided by the applicant, and any applicable criteria used to make the determination are available for inspection at the Lane County Land Management Division. The Lane County Land Management Division representative is **Brandon J. Callister** who can be contacted at **541-682-4650**. Other Information can be obtained through the Lane County Web Site at **http://www.lanecounty.org/Planning/**.

ATTENTION: **Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.**

EXHIBIT "E"

NOTICE OF A LAND USE DECISION
BY THE LANE COUNTY PLANNING DIRECTOR

Enclosed is a vicinity map of the subject property and surrounding properties.

This decision will become final at 5 P.M. on 12/2/2008 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision.**

1. To complete this form, fill in the required information and attach to it all of the materials and information required in numbers 2, 3 and 6 of the appeal form.
2. Then, submit the completed form to Lane County Planning Director so that it is received by him or her prior to the above mentioned time that the decision becomes final.
3. The Lane County Planning Director shall reject an appeal if it is not received prior to the time that the decision becomes final or if it is not complete.

Failure of an issue to be raised in a hearing, in person or in writing, or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

I. PROPOSAL

Applications requesting Legal Lot Verification on one or more units of land were made. In accordance with Lane Code 13.020, the purpose of these applications was to determine if the identified units of land complied with the state and county laws that were in effect when it was created.

II. BACKGROUND INFORMATION

On 11/06/2008, applications for legal lot verifications were submitted to Lane County Land Management Division. The applications were reviewed and accepted as complete on 11/19/2008.

III. LOCATION AND DESCRIPTION

The subject properties are in the F-2 zone with the minimum parcel size being 80 acres. The locations of these properties are as identified above along with the corresponding acreages.

IV. APPROVAL CRITERIA & FINDINGS OF FACT

The identified units of land are legal lots in accordance with LC 13.020. Additionally, the following criteria apply:

- The units of land were created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances.
- The adjustment was limited to the relocation of a common boundary between lawfully created units of land where no additional units of land were created and the existing unit of land reduced in size complied with applicable zoning ordinances. All units of land complied.

V. DECISION

These units of land were created in conformance with applicable land division and zoning regulations and are legal lots in accordance with Lane Code 13.020.

4) Unit 4 Legal lot Verification Report: PA08-6334
Tax Map and Lot Number: 21-35-07-40-00100 (P-4)

These legal lot verification reports are based upon information provided by the applicant and County records on the above referenced properties. Based upon our findings, these units of land conformed to applicable regulations that existed at the time they were created. Please refer to Lane Code 13.010 (4) for the definition of a legal lot or parcel.

A legal lot is a unit of land (lot or parcel) that conforms to the applicable regulations that existed at the time the parcel or lot was first created. It remains a legal lot unless the parcel or lot lines are changed, the lot lines are vacated, or the unit of land is further divided as provided by law LC 13.010

FINDINGS

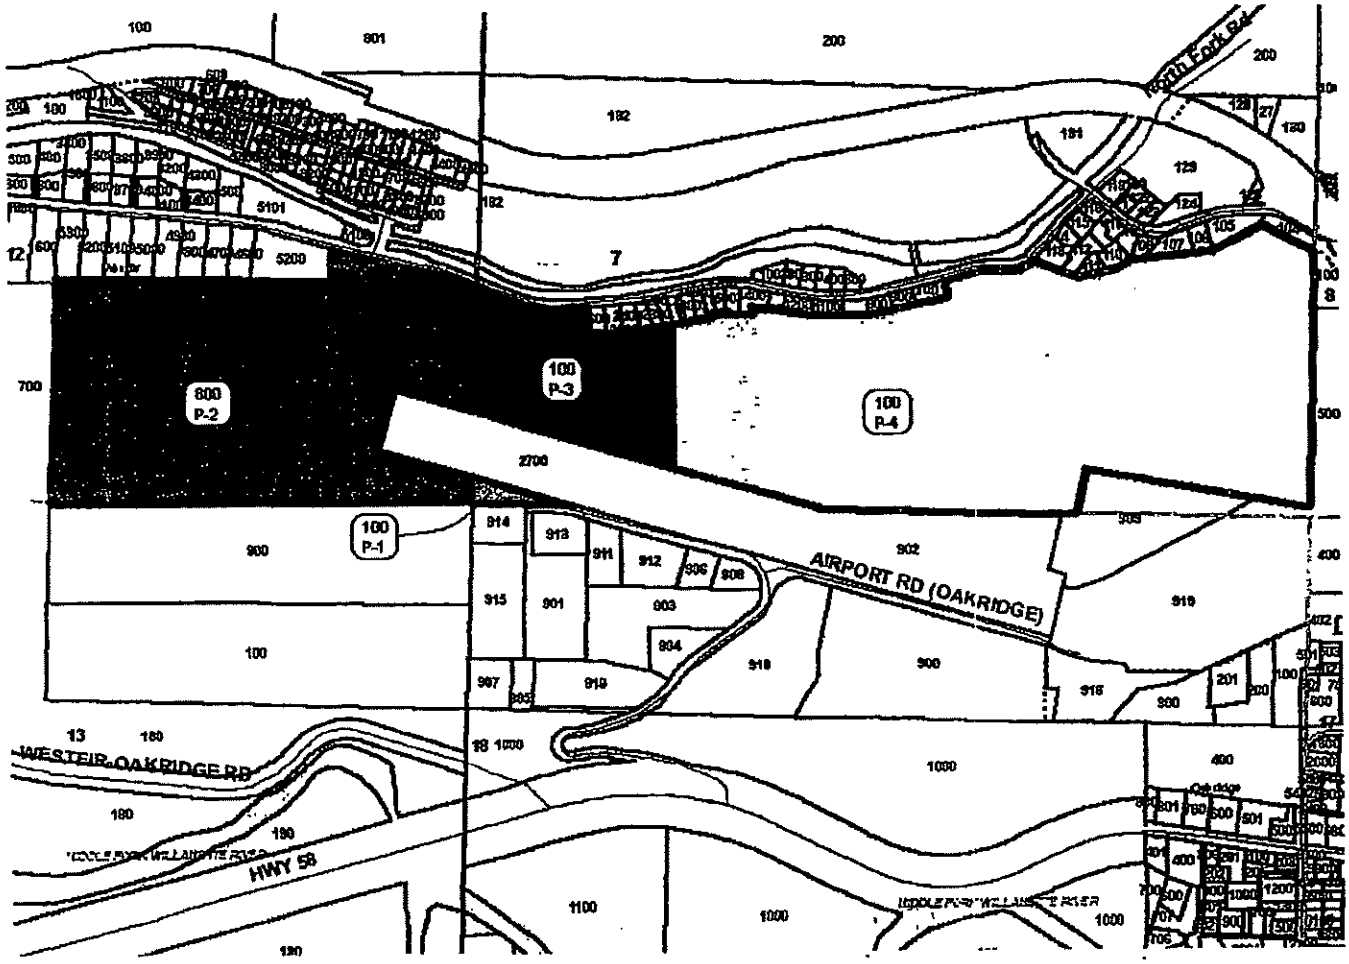
A. Land Division information
1) Unit 1: The unit of land was created as a separate parcel on 07/14/1913
- Instrument from which the unit of land was divided or separately described: DEED Book 1103 Page 122 dated 07/14/1913
- The unit of land was reconfigured on 10/07/2008
Documentation: Declaration of Property Line Adjustment 2008-059421 dated 10/07/2008

2) Unit 2: The unit of land was created as a separate parcel on 02/09/1901
- Instrument from which the unit of land was divided or separately described: DEED Book 51 Page 627 dated 02/09/1901
- The unit of land was reconfigured on 10/07/2008
Documentation: Declarations of Property Line Adjustment 2008-059421, 2008-059424, & 2008-059425

This legal lot verification does not approve any development. In accordance with LC 13.010 and LC 13.020, a legal lot verification is "A determination that a unit of land was created in conformance with the Lane Code and other applicable law." This legal lot verification identifies a unit of land that was created in conformance with the applicable county and state laws.

3) Unit 3: The unit of land was created as a separate parcel on 07/14/1913
- Instrument from which the unit of land was divided or separately described: DEED Book 103 Page 122 dated 07/14/1913
- The unit of land was reconfigured on 10/07/2008
  Documentation: Declarations of Property Line Adjustment 2008-059422 & 2008-059423

4) Unit 4: The unit of land was created as a separate parcel on 08/01/1945
- Instrument from which the unit of land was divided or separately described: DEED Book 293 Page 240 dated 08/01/1945
- The unit of land was reconfigured on 10/07/2008
  Documentation: Declarations of Property Line Adjustment 2008-059422, 2008-059423, 2008-059424, & 2008-059425



B. Zoning and Land Division information

Land division laws effective on: ☐ May 2, 1962 ☐ June 4, 1970 ☒ March 26, 1975
Criteria: The units of land were created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances. The adjustment was limited to the relocation of a common boundary between lawfully created units of land where no additional units of land were created and the existing unit of land reduced in size complied with applicable zoning ordinances. All units of land complied.

Original zoning ordinance date: 08/29/1978 & 08/22/1979 Zoning effective on 02/29/1984
Criteria: The units of land were created by deed signed prior to any applicable zoning, partitioning or subdivision ordinances. The adjustment was limited to the relocation of a common boundary between lawfully created units of land where no additional units of land were created and the existing unit of land reduced in size complied with applicable zoning ordinances. All units of land complied.

This legal lot verification does not approve any development. In accordance with LC 13.010 and LC 13.020, a legal lot verification is "A determination that a unit of land was created in conformance with the Lane Code and other applicable law." This legal lot verification identifies a unit of land that was created in conformance with the applicable county and state laws.

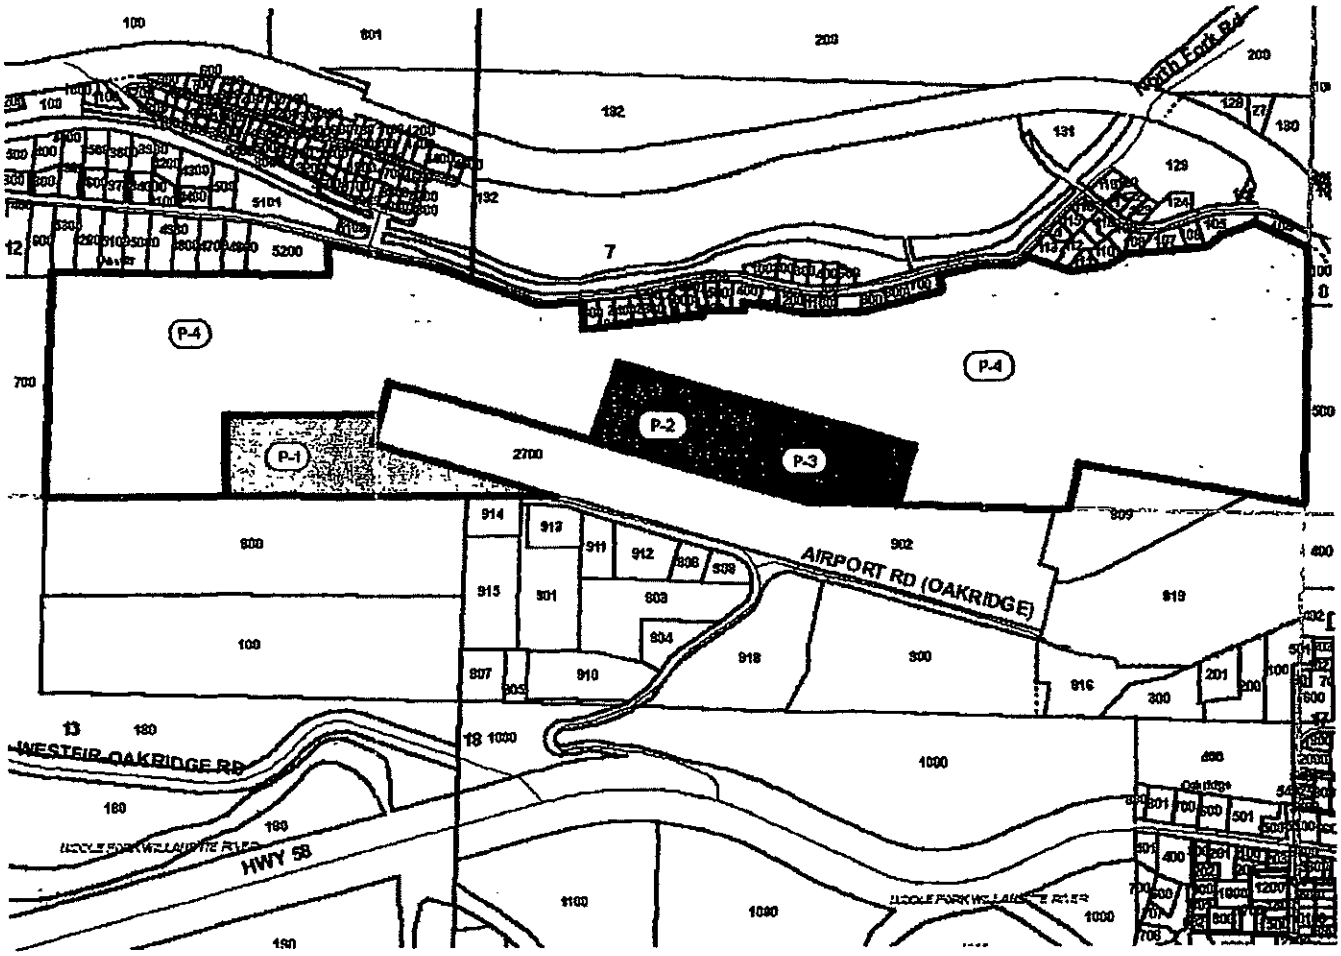


DIAGRAM OF THE UNIT OF LAND PRIOR TO ADJUSTMENT

** Note: This is only a graphical representation to aid in locating the approximate location of the subject property. It is not intended to depict the actual location of the boundary nor is it the result of a survey. Information shown is based upon information provided by the Applicant.*

This legal lot verification does not approve any development. In accordance with LC 13.010 and LC 13.020, a legal lot verification is "A determination that a unit of land was created in conformance with the Lane Code and other applicable law." This legal lot verification identifies a unit of land that was created in conformance with the applicable county and state laws.

DIAGRAM OF THE UNIT OF LAND AFTER ADJUSTMENT

**Note: This is only a graphical representation to aid in locating the approximate location of the subject property. It is not intended to depict the actual location of the boundary nor is it the result of a survey. Information shown is based upon information provided by the Applicant.*

This legal lot verification does not approve any development. In accordance with LC 13.010 and LC 13.020, a legal lot verification is "A determination that a unit of land was created in conformance with the Lane Code and other applicable law." This legal lot verification identifies a unit of land that was created in conformance with the applicable county and state laws.

Property Values & Taxes

The values shown are the values certified in October unless a value change has been processed on the property. Value changes typically occur as a result of appeals, clerical errors and omitted property. The tax shown is the amount certified in October. This is the full amount of tax for the year indicated and does not include any discounts offered, payments made, interest owing or previous years owing. It also does not reflect any value changes.

Notice of Pending Land Use Decision
By The Lane County Planning Director

LANE COUNTY OREGON

LAND MANAGEMENT DIVISION
http://www.LaneCounty.org/PW_LMD/

Mailing Date:	12/22/2010
Department File:	PA 10-5484
Property Owner:	E.J.K. Investments, LLC
Applicant:	Nickell Land Surveying & Planning, LLC
Assessor's Map & Tax Lot:	21-35-07-30-02900
Address or Location:	Airport Road, Oakridge, OR
Acreage:	12.05 acres
Base Zone:	Impacted Forest Lands (F-2, RCP)
Combining Zone(s):	Airport Safety Combining Zone (/AS-RCP)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a land use application and pending decision for conditional **Approval** of this application by the Lane County Planning Director. **The conditions of approval are contained in the attached Exhibit A.**

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: Request for Director approval of a dwelling in the Impacted Forest Lands Zone (F-2, RCP) pursuant to the "Template Dwelling" provisions of Lane Code 16.211(5) and Lane Code 16.211(8).

Enclosed is a site plan of the subject property.

The proposed use that could be authorized by approval of the land use application is: One Dwelling

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report are available for inspection at the Lane County Land Management Division at no cost, and copies will be provided at reasonable cost. The name of the Lane County Land Management Division representative to contact is **Sarah Wilkinson** and the telephone number where more information can be obtained is **541-682-4054**.

This decision will become final at 5 P.M. on 1/3/11 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is

submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision.**

1. To complete this form, fill in the required information and attach to it all of the materials and information required in numbers 2, 3 and 6 of the appeal form.
2. Then, submit the completed form to Lane County Planning Director so that it is received by him or her prior to the above-mentioned time that the decision becomes final.
3. The Lane County Planning Director shall reject an appeal if it is not received prior to the time that the decision becomes final or if it is not complete.

Failure of an issue to be raised in a hearing, in person or in writing, or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

Prepared by: Sarah Wilkinson, Planner **Date:** 12/20/2010

Authorized by: for Kent Howe, Planning Director **Date:** 12/20/2010

EXHIBIT A

CONDITIONS OF APPROVAL
PA 10-5484

All of the following conditions are binding on the applicant or successive owner(s) of the parcel or successive applicant(s) who exercise this approval action.

1. Approval of PA 10-5484 is valid for a **four-year** period from the final date of approval. Lane County may grant an initial extension period of **two years** if:

   a. An applicant makes a written request with the required fee for an extension of the development approval period;
   b. The request is submitted to the county prior to the expiration of the development approval period;
   c. The applicant states reasons that prevented the applicant from beginning or continuing development within the approval period;
   d. The county determines that the applicant was unable to begin or continue development during the approval period for reasons which the applicant was not responsible; and
   e. The criteria and standards under which this proposal was granted have not changed.

Approval of an extension granted under this rule is an administrative decision, is not a land use decision as described in ORS 197.015 and is not subject to appeal as a land use decision.

The following conditions shall be met prior to the expiration date in condition #1 and prior to approval of a building or placement permit for a dwelling, septic system, or accessory structure. Failure to meet conditions of approval as specified prior to the expiration date, and if no extension has been granted prior to that date, shall invalidate this approval, and the development rights conditionally allowed by this planning action shall cease:

1. Submit to Lane County Assessment and Taxation a stocking survey report for the subject property, prepared by a qualified forester. A copy of the stocking survey report shall be submitted to Lane County Land Management Division with evidence of receipt by Lane County Assessment and Taxation.

2. Complete, notarize and record a Farm and Forest Management Practices Easement for the subject property (Attachment 1). Attach to the easement an "Exhibit A" depicting the legal description of the property. The easement is to be submitted to and recorded by Lane County Deeds and Records. A copy of the signed, notarized and recorded Farm and Forest Management Practices Easement shall be submitted to Lane County Land Management Division.

3. Physically establish primary and secondary fuel breaks. The minimum primary fuel break shall extend 30 feet in all directions around the dwelling. The secondary fuel break shall extend 100 feet in all directions around the primary fuel break. All fuel breaks must be maintained in perpetuity. Please contact 541-682-3989 for more information about fuel break requirements.

4. Submit evidence that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629.

5. Construct the length of the private road and driveway, from the Airport Road right-of-way to the proposed dwelling, to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director. Please contact 541-682-3989 for more information about the requirements of LC 16.211(8)(e).

6. Staff recommends that, prior to making any access improvements, an engineer evaluate the existing road and drainage patterns to determine if and what measures need to taken to control runoff (e.g., installation of culverts).

7. Submit written documentation from the Hazeldell RFD that states that the roads and driveway leading from the fire station to the home site are adequate for their fire fighting equipment to access the use, fire fighting equipment and water supply.

   - OR -

   Submit written documentation from an Oregon Registered Professional Engineer that states that the roads and driveway leading from the fire station to the home site meet the requirements of LC 16.211(8)(e).

8. Obtain approval of a road name for the private road (Attachment 2). The road name should not duplicate existing road names, or be similar sounding, or confusing. Upon approval of the road name, a road name sign shall be installed at the intersection of the private road and Airport Road (Attachment 3). The road name shall be noted on the Site Plan. Addressing requirements shall be addressed as part of the building permit process. Please contact 541-682-4196 for more information about road naming and/or signage.

9. No structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface. In regard to the subject property, the Transitional Surface is limited to a height of 150 feet above the runway (Elev. 1419 feet above sea level), which is equivalent to 1569 feet above sea level (1419 + 150 = 1569). The applicant documented that the elevation of the proposed home site is 1421 feet above sea level. Accordingly, the height of structures or objects within the home site shall not exceed 148 feet (1569 – 1421 = 148).

10. A private access easement, at least 30 feet in width, shall be established over Tax Lot No. 843, 133 and 2900 to the western boundary of Tax Lot No. 2800. The applicable requirements in LC 15.055 shall be met:

    (4) The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.

    (5) All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.

(6) Development on a lot or parcel taking access over a railroad or limited access road right-of-way may require documentation that permanent or long term access over the railroad or limited access road meeting the requirements of this section has been granted.

(7) Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.

(8) The County may require that at the entrance to a Private Access Easement road a sign be posted at private expense stating the name of the private road and the words "Private Road, Not Dedicated for Public Use or Maintained by Lane County."

11. A Facility Permit is required for placement of facilities within the right-of-way of Airport Road (Attachment 4). Facilities and development include, but are not limited to, road improvements, sidewalks, new or reconstructed driveway or road approach intersections, utility placements, excavation, clearing, grading, culvert placement or replacement, storm water facilities, or any other facility, thing, or appurtenance [LC 15.205(1)]. **A facility permit is required for the existing private road approach connection to Airport Road.**

12. Storm water runoff from the subject property shall **not** be directed to the Lane County road right-of-way or into any Lane County drainage facility, including roadside ditches. Ditches adjacent to County roads are designed solely to accommodate roadway storm water runoff.

13. Upon completion of conditions no.2 through no.12, complete and submit a Land Use Application for the Verification of Conditions for PA 10-5484, with the applicable fee (Attachment 5). **Attach to this application:**

    ☐ Copy of the stocking survey report with evidence of receipt by Lane County Assessment and Taxation;

    ☐ Copy of signed, notarized and recorded Farm Use and Forest Management Agreement;

    ☐ Copy of a well constructor's report or a water use permit from the Water Resources Department;

    ☐ Copy of recorded private access easement;

    ☐ Copy of facility permit;

    ☐ Copy of letter from the **Hazeldell RFD** regarding adequacy of roads and driveway; and

    ☐ Copy of the approved Site Plan that conforms with the approved plans, drawn to scale, including the same information, and meeting other minimum standards of the Land Management Division. The Site Plan shall show the primary and secondary fuel breaks, the BPA easement that traverses the property, and the approved name for the private road.

14. As part of the Verification of Conditions process, the road, driveway and fuel breaks shall be field inspected by Land Management Division staff to verify the requirements stated in conditions no.3, 5

and 7 have been met. At the discretion of the Planning Director, failure to meet, upon first inspection, the minimum fuel break and/or driveway and/or grade standards as in LC 16.211(8)(c) and (e), may require the owner to submit an application for Fuel Break Verification and Road Inspection, with the applicable fee.

15. Upon completion of the Verification of Conditions, submit a building or placement permit application for the proposed dwelling. To schedule a Permit Review Meeting, during which application for a building permit is submitted, please call 541-682-3577 or visit the Planner on Duty in the Land Management Division located in the Public Service Building at 125 E. 8th Ave., Eugene, OR. Please contact the Building Department at 541-682-3823 and the On-Site Sewage Department at 541-682-3754 with questions regarding building and sanitation requirements.

16. In the building or placement permit application submittal, submit a Site Plan that demonstrates the parcel configuration, proposed dwelling, driveway, and septic system, are located as on the approved Site Plan, unless modified by the Planning Director. The Site Plan shall show the primary and secondary fuel breaks, the BPA easement that traverses the property, and the approved name for the private road. At the discretion of the Planning Director, any deviation from the approved Site Plan may require an application for the Modification of Conditions.

The following condition shall be met prior to approval for legal occupancy of the proposed dwelling.

17. The proposed dwelling shall meet the following requirements, to be verified by the Lane County Building Official:

    a. All buildings or structures with chimneys shall have a spark arrester on all chimneys.

    b. Wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs.

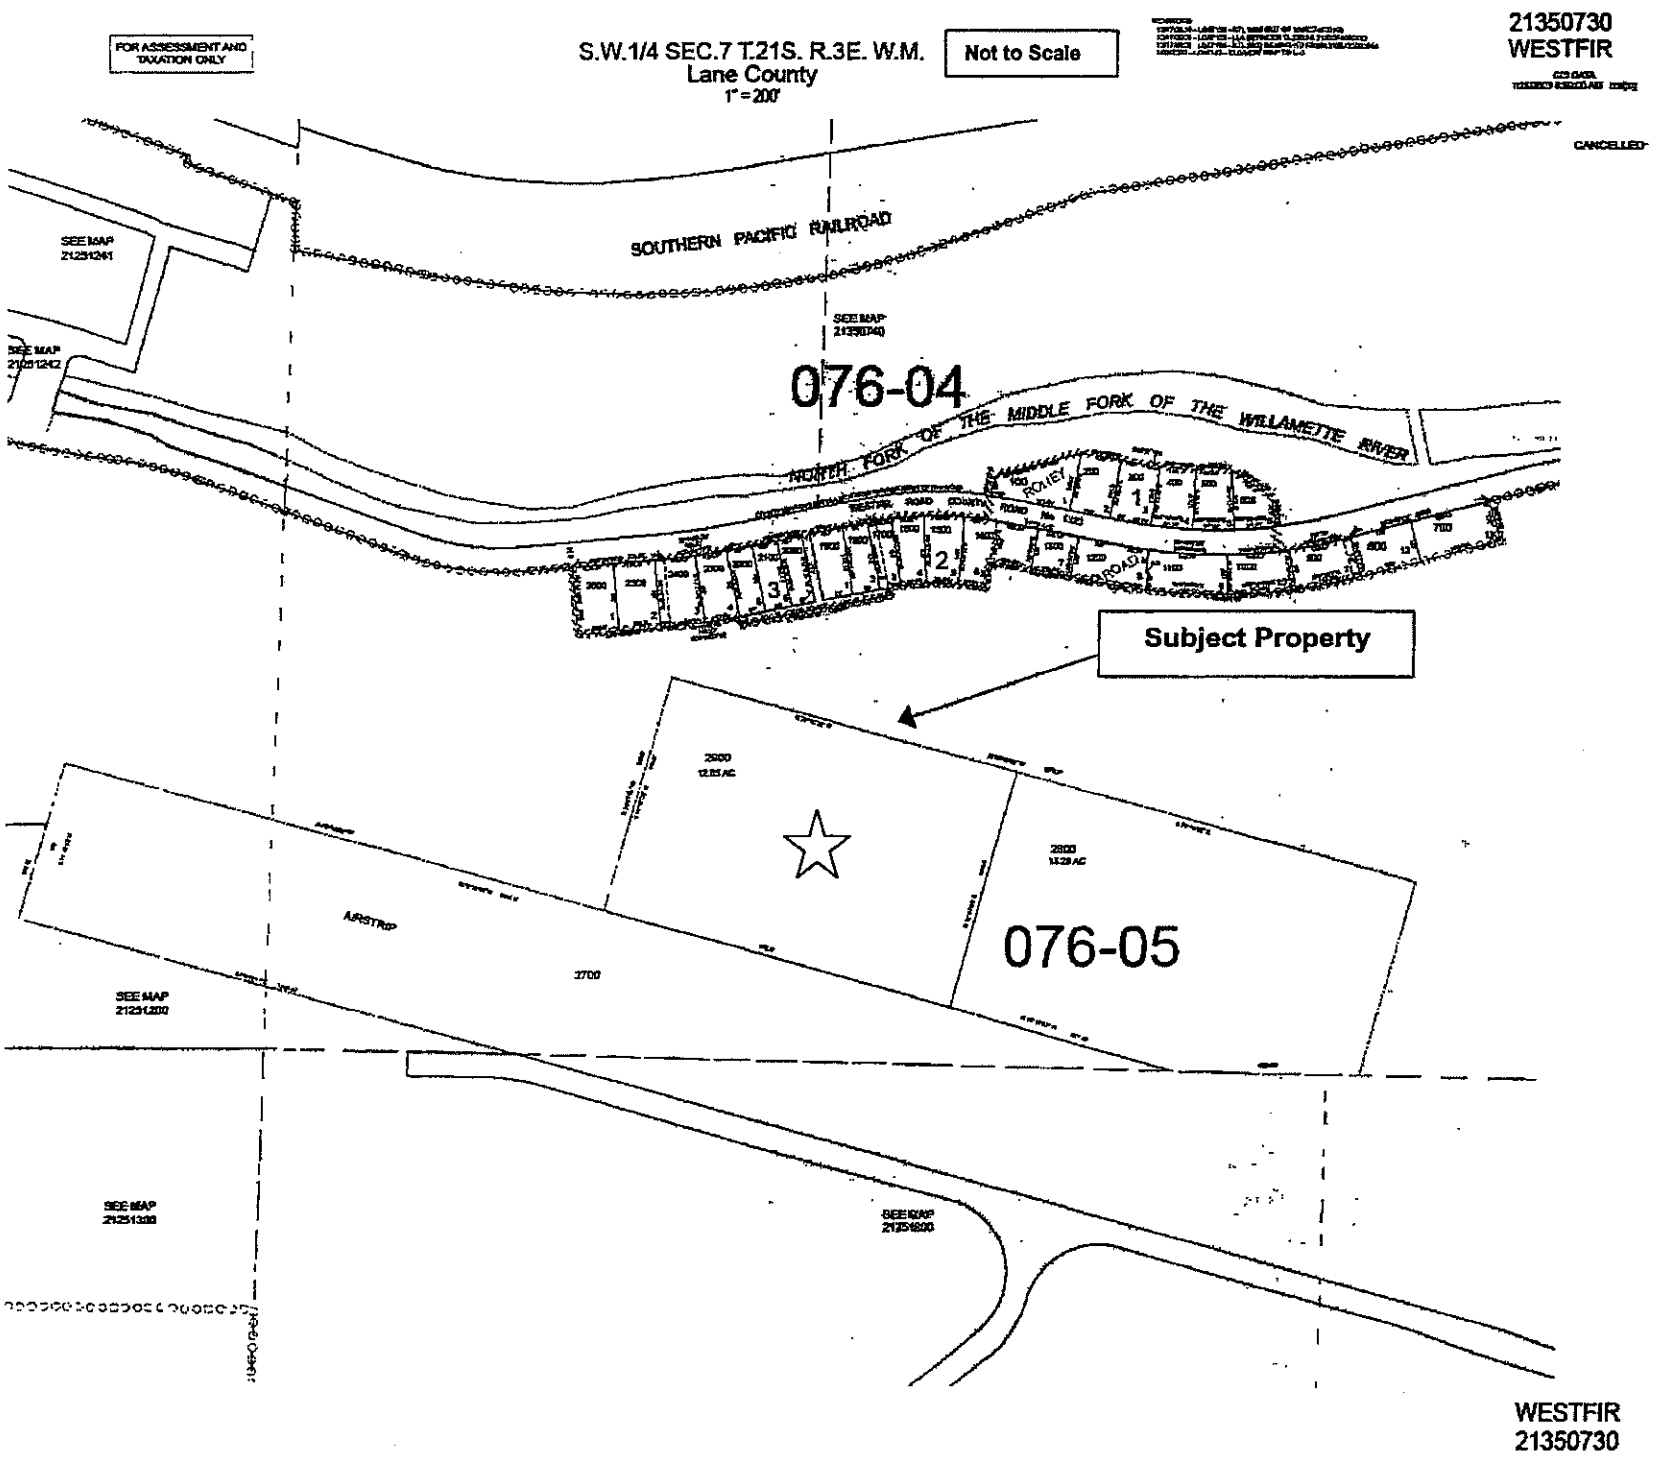
    (Please contact a Lane County plans examiner at 541-682-3823 for more information about building code requirements)

The following conditions are provided for informational purposes and shall be fulfilled as they apply to the proposed development:

18. All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

19. All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating

structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.



20. Per referral response from the Department of Energy, Bonneville Power Administration:

Portions of tax lots 2800 & 2900 are encumbered by an easement for high-voltage transmission lines and an access road easement. These easements grant certain rights to BPA and limit the landowner's use within the easement area. A portion of BPA's rights include the right of ingress and egress, and the right to keep the easements free and clear of vegetation and buildings, sheds, fences, roads or any other type of structure. All activities planned within the BPA easement need to be reviewed by BPA prior to their occurrence. Do not build, dig or plant within the easement area without first contacting BPA. Requests for information regarding the process for reviewing proposed uses of the easement may be addressed to Bonneville Power Administration, Real Estate Field Services, 86000 Highway 99 South, Eugene, OR 97405

21. The following is provided for informational purposes as an **Advisory Notice**: Section 93.040(1) of the Oregon Revised Statutes requires the following statement to be included in the body of any instrument transferring or contracting to transfer fee title to real property:

> "THIS INSTRUMENT WILL NOT ALLOW USE OF THE PROPERTY DESCRIBED IN THIS INSTRUMENT IN VIOLATION OF APPLICABLE LAND USE LAWS AND REGULATIONS. BEFORE SIGNING OR ACCEPTING THIS INSTRUMENT, THE PERSON ACQUIRING FEE TITLE TO THE PROPERTY SHOULD CHECK WITH THE APPROPRIATE CITY OR COUNTY PLANNING DEPARTMENT TO VERIFY APPROVED USES AND TO DETERMINE ANY LIMITS ON LAWSUITS AGAINST FARMING OR FOREST PRACTICES AS DEFINED IN ORS 30.930."

This Oregon Law disclosure requirement serves a constructive purpose. Approval of a residence for this property is contingent upon compliance with the conditions of the special use permit, and any future owners of the subject property need to understand and adhere to these conditions. This disclosure statement should alert the cautious and potential purchaser to inquire with the Lane County Land Management Division about the conditions of this special use permit.

Planning Director Approval of a Land Use Application

Staff Report

Department File:	PA 10-5484
Property Owner:	E.J.K. Investments, LLC
Applicant:	Nickell Land Surveying & Planning , LLC
Assessor's Map & Tax Lot:	21-35-07-30-02900
Address or Location:	Airport Road, Oakridge, OR
Acreage:	12.05 acres
Base Zone:	Impacted Forest Lands (F-2, RCP)
Combining Zone(s):	Airport Safety Combining Zone (/AS-RCP)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)
Staff Planner:	Sarah Wilkinson, 541-682-4054

I. PROPOSAL

Request for Director approval of a dwelling in the Impacted Forest Lands Zone (F-2, RCP) pursuant to the "Template Dwelling" provisions of Lane Code 16.211(5) and Lane Code 16.211(8).

II. BACKGROUND

On June 25, 2010, the applicant submitted to Lane County Land Management an application for a "Template Dwelling." On July 20, 2010, staff reviewed and deemed the application incomplete pending submittal of evidence of compliance with Lane Code 16.246. On November 17, 2010, the applicant submitted the required materials and staff accepted the application as complete. On November 29, 2010, staff solicited referral responses from affected agencies, service providers and surrounding property owners. Referral responses, applicable to the approval criteria, are incorporated in the findings and decision below. Copies of all written responses are included in the application file for this proposal.

III. PROPERTY AND PROJECT DESCRIPTION

a. **LOCATION:** The subject property is identified as Tax Lot No. 2900 on Lane County Tax Assessor's Map 21-35-07-30. The property is located immediately north of the Oakridge Airport and is a legal lot, verified by PA 08-6332 and noticed by PA 08-6329.

b. **ZONING:** The subject property is designated Forest (F) in the Lane County Rural Comprehensive Plan, is zoned Impacted Forest Lands (F-2, RCP) and is within the Airport Safety Combining Zone (/AS-RCP).

c. **SITE DESCRIPTION AND SURROUNDING USES:** The subject property is 12.05 acres in size, vacant and traversed east-west by easement for the Bonneville Power Administration. The property slopes upward from the south to the north and contains open and forested areas. The

property is bordered to the south by the Oakridge Airport and is surrounded to the north, east and west by land zoned Impacted Forest Lands (F-2, RCP), and to the south by land zoned Airport Operations (AO-RCP).

d. **PROJECT:** The applicant proposes to construct a dwelling on the subject property. The proposed 200-foot wide by 100-foot deep home site is located 370 feet south of the north property line, 130 feet north of the south property line, 335 feet west of the east property line, and 335 east of the west property line. The proposed dwelling is to be accessed from Airport Road, a County road, by an existing private road.

IV. APPLICABLE CRITERIA AND FINDINGS OF FACT

This application is evaluated pursuant to the applicable criteria found in Lane Code 16.211(5) and Lane Code 16.211(8). The code language is in **boldface** type, followed by the findings of fact.

A. Conformity with Lane Code 16.211(5):

One single-family dwelling or manufactured dwelling is allowed subject to prior submittal of an application pursuant to LC 14.050, approval of the application pursuant to LC 14.100 with the options for the Director to conduct a hearing or to provide written notice of the decision and an opportunity for appeal, and compliance with the general provisions and exceptions in LC Chapter 16, LC 16.211(5)(a) through (f) and LC 16.211(8) below.

(a) The tract upon which the dwelling or manufactured dwelling will be located has no other dwellings or manufactured dwellings on it. As used in LC 16.211(5), "tract" means one or more contiguous lots or parcels in the same ownership. A tract shall not be considered to consist of less than the required acreage because it is crossed by a public road or waterway.

Finding 1: Staff finds the subject proposal meets this criterion. The subject tract consists of only one parcel in the ownership of "EJK Investments LLC" (Assessor's Map & Tax Lot: 21-35-07-30-02900). The tract contains no other dwellings or manufactured dwellings.

(b) The lot or parcel upon which the dwelling or manufactured dwelling will be located was lawfully created.

Finding 2: Staff finds the subject proposal meets this criterion. The property is a legal lot, verified by PA 08-6332 and noticed by PA 08-6329.

(c) The lot or parcel upon which the dwelling or manufactured dwelling will be located:

(iii) Is predominantly composed of soils that are capable of producing 85 cubic feet per acre per year of wood fiber; and

(aa) All or part of at least eleven other lots or parcels that existed on January 1,1993, are within a 160 acre square centered on the center of the subject tract measured and counted as follows:

(A) If the subject tract abuts a road that existed on January 1, 1993, the measurement may be made by creating a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract and that is to the maximum extent possible, aligned with the road;

(B) If the subject tract is 60 acres or larger and abuts a road or perennial stream, the measurement shall be made by using a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center of the subject tract that is to the maximum extent possible, aligned with the road or stream;

(C) Lots or parcels within urban growth boundaries shall not be used to satisfy the eligibility requirements in LC 16.211(5)(c)(iii)(aa) above.

Finding 3: Staff finds the subject proposal meets this criterion. The subject property is composed of soils that are capable of producing at least 85 cubic feet per acre per year of wood fiber. The applicant documented the presence of at least 11 other lots or parcels that existed on January 1, 1993, within a 160-acre square centered on the subject property. Lots or parcels within urban growth boundaries were not used to satisfy the eligibility requirements in LC 16.211(5)(c). The applicant documented 11 qualifying lots or parcels:

- Map 21-35-07-30, Tax Lot No. 2700
- Map 21-35-18, Tax Lot No. 913, 914, 911, 912, 906, 908, 903, 904, 902, 900

The verification of the status of the 11 lots or parcels referenced above was preliminary and does not constitute a determination of legal lot status.

(bb) At least three dwellings or permanent manufactured dwellings existed on January 1, 1993, on the other lots or parcels described in LC 16.211(5)(c)(iii)(aa) above. If the measurement is made pursuant to LC 16.211(5)(c)(iii)(aa)(B) above and if a road crosses the subject tract, then at least one of the three required dwellings or permanent manufactured dwellings shall be located:

(A) On the same side of the road as the proposed residence; and

(B) On the same side of the road or stream as the subject tract and located within a 160-acre rectangle that is one mile long and one-fourth mile wide centered on the center on the subject tract that is to the maximum extent possible aligned with the road or stream and within one-quarter mile from the edge of the subject tract but not outside the length of the 160-acre rectangle.

Finding 4: Staff finds the subject proposal meets this criterion. The applicant documented at least three dwellings or manufactured dwellings that existed on January 1, 1993 on the lots or parcels listed in Finding 3. The applicant documented four qualifying dwellings:

- Map 21-35-18, Tax Lot No. 912, 908, 904, 900

(d) Approval of a dwelling or manufactured dwelling shall comply with the requirements in LC 16.211(5)(d)(i) through (iv) below:

(i) The owner of the tract shall plant a sufficient number of trees on the tract to demonstrate that the tract is reasonably expected to meet Department of Forestry stocking requirements at the time specified in Department of Forestry administrative rules;

(ii) The Director shall notify the County Assessor of the above condition at the time the dwelling is approved;

(iii) If the lot or parcel is more than ten acres, the property owner shall submit a stocking survey report to the County Assessor and the Assessor will verify that the minimum stocking requirements have been met by the time required by Department of Forestry rules; and

(iv) If the Department of Forestry determines that the tract does not meet those requirements and notifies the owner and the Assessor that the land is not being managed as forest land, the Assessor will remove the forest land designation pursuant to ORS 321.359 and impose the additional tax pursuant to ORS 321.372.

Finding 4: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, a stocking survey report for the subject property, prepared by a qualified forester, shall be submitted to Lane County Assessment and Taxation. A copy of the stocking survey report with evidence of receipt by Lane County Assessment and Taxation shall be submitted to Lane County Land Management Division.***

(e) Prior to land use clearance of a building permit for the dwelling or manufactured dwelling, when the lot or parcel on which the dwelling or manufactured dwelling will be located is part of a tract, the remaining portions of the tract shall be consolidated into a single lot or parcel and a deed restriction using the form provided in OAR 660-06-027(6), "Exhibit A," shall be completed and recorded with Lane County Deeds and Records. The covenants, conditions and restrictions in the deed restriction:

Finding 5: This criterion does not apply to the subject proposal. The subject property is the only contiguous parcel in the ownership of "EJK Investments LLC."

(f) Land use approval of a permit described in LC 16.211(5) above shall be valid for four years from the date of the approval. Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(5)(f) above may be made and approved pursuant to LC 14.700(2).

Finding 6: Approval of the subject proposal shall be valid for four years from the final date of approval as indicated in the Conditions of Approval (Exhibit A). Notwithstanding the requirements in LC 14.700(2)(d)(ii) and (iii), an application for a two year extension of the timelines for the permit approval described in LC 16.211(5)(f) above may be made and approved pursuant to LC 14.700(2).

(g) The Director shall require as a condition of approval that the landowner for the dwelling sign and record in the Lane County deed records a document binding the landowner, and the landowner's successors in interest, prohibiting them from pursuing a claim for relief or cause of action alleging injury from farming or forest practices for which no action or claim is allowed under ORS 30.936 or 30.937.

Finding 7: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, a Farm and Forest Management Practices Easement for the subject property shall be submitted to and recorded by Lane County Deeds and Records. A legal description of the property shall be attached to the easement as "Exhibit A." A copy of the recorded Farm and Forest Management Practices Easement shall be submitted to Lane County Land Management Division.***

B. Conformity with Lane Code 16.211(8):

The following siting standards shall apply to all new dwellings, manufactured dwellings and structures, and other uses as specified above in LC 16.211(2)(h) and (j), and in LC 16.211(3) through (7) above. These standards are designed to make such uses compatible with forest operations and agriculture, to minimize wildfire hazards and risks and to conserve values found on forest lands. The standards in LC 16.211(8)(a)-through(b) below shall be weighed together with the requirements in LC 16.211(8)(c) and (e) below to identify the building site.

(a) Setbacks. Residences, dwellings or manufactured dwellings and structures shall be sited as follows:

(i) Near dwellings or manufactured dwellings on other tracts, near existing roads, on the most level part of the tract, on the least suitable portion of the tract for forest use and at least 30 feet away from any ravine, ridge or slope greater than 40 percent;

Finding 8: Staff finds the subject proposal meets this criterion:

a. **Near dwellings or manufactured dwellings on other tracts.** The proposed dwelling is to be sited approximately 600 feet north of the nearest dwelling located to the south on Tax Lot No. 912, as identified on Lane County Tax Assessor's Map 21-35-18.

b. **Near existing roads.** The proposed dwelling is to be located adjacent an existing private road.

c. **Most level part of the tract.** The applicant stated that the proposed dwelling is to be sited on a level part of the subject property in an area containing slopes of 3 – 6 percent.

d. **Least suitable portion of the tract for forest use.** The proposed dwelling is to be sited in an open area, adjacent an existing private road.

e. **30 feet away from any ravine, ridge or slope greater than 40 percent.** The applicant stated that the proposed dwelling is to be sited at least 30 feet away from any ravine, ridge or slope greater than 40 percent.

(ii) With minimal intrusion into forest areas undeveloped by non-forest uses; and

Finding 9: Staff finds the subject proposal meets this criterion. The proposed dwelling is to be sited in an open area, adjacent an existing private road.

(iii) Where possible, when considering LC 16.211(8)(a)(i) and (ii) above and the dimensions and topography of the tract, at least 500 feet from the adjoining lines of property zoned F-1 and 100 and at least 30 feet from the adjoining lines of property zoned F-2 or EFU; and

Finding 10: Staff finds the subject proposal meets this criterion. The subject property is not adjacent to property zoned F-1 or EFU. The proposed dwelling is to be sited at least 130 feet from adjoining property zoned F-2.

(iv) Except for property located between the Eugene-Springfield Metropolitan Area General Plan Boundary and the Eugene and Springfield Urban Growth Boundaries, where setbacks are provided for in LC 16.253(6), the riparian setback area shall be the area between a line 100 feet above and parallel to the ordinary high water of a Class I stream designated for riparian vegetation protection in the Rural Comprehensive Plan. No structure other than a fence shall be located closer than 100 feet from ordinary high water of a Class I stream designated for riparian vegetation protection by the Rural Comprehensive Plan. A modification to the riparian setback standard for a structure may be allowed provided the requirements of LC 16.253(3) are met; and

Finding 11: This criterion does not apply to the subject proposal. The subject property neither contains nor is adjacent to a Class I stream.

(v) Structures other than a fence or sign shall not be located closer than:

(aa) 20 feet from the right-of-way of a state road, County road or a local access public road specified in Lane Code LC Chapter 15; and

(bb) 30 feet from all other property lines; and

(cc)The minimum distance necessary to comply with LC 16.211(8)(a) above and LC 16.211(8)(b) through (d) below.

Finding 12: Staff finds the subject proposal meets this criterion. The proposed dwelling is to be sited at least 20 feet from Airport Road, the nearest right-of-way of a County road, and at least 30 feet from all other property lines. The location of the proposed dwelling complies with LC 16.211(8)(a), as discussed above, and 16.211(8)(b) through (d), as discussed below.

(b) The amount of forest lands used to site access roads, service corridors and structures shall be minimized.

Finding 13: Staff finds the subject proposal meets this criterion. The proposed dwelling is to be accessed from an existing private road and driveway minimizing the amount of forest land used to site access roads. The dwelling is to be sited in an open, sparsely vegetated area minimizing the amount of forest land used site structures.

(c) Fire Siting Standards. The following fire-siting standards or their equivalent shall apply to new residences, dwellings, manufactured dwellings or structures:

(i) Fuel-Free Breaks. The owners of dwellings, manufactured dwellings and structures shall maintain a primary safety zone surrounding all structures and clear and maintain a secondary fuel break on land surrounding the dwelling or manufactured dwelling that is owned or controlled by the owner in compliance with these requirements.

(aa) Primary Safety Zone. The primary safety zone is a fire break extending a minimum of 30 feet in all directions around dwellings, manufactured dwellings and structures. The goal within the primary safety zone is to exclude fuels that will produce flame lengths in excess of one foot. Vegetation within the primary safety zone could include green lawns and low shrubs (less than 24 inches in height). Trees shall be spaced with greater than 15 feet between the crowns and pruned to remove dead and low (less than eight feet) branches. Accumulated leaves, needles, and other dead vegetation shall be removed from beneath trees. Nonflammable materials (i.e., rock) instead of flammable materials (i.e., bark mulch) shall be placed next to the house. As slope increases, the primary safety zone shall increase away from the house, parallel to the slope and down the slope, as shown in the table below:

Size of the Primary Safety Zone by Percent Slope

% Slope	Feet of Primary Safety Zone	Feet of Additional Safety Zone Down Slope
0	30	0
10	30	50
20	30	75
25	30	100
40	30	150

Dwellings or manufactured dwellings shall not be sited on a slope greater than 40 percent.

(bb) Secondary Fuel Break. The secondary fuel break is a fuel break extending a minimum of 100 feet in all directions around the primary safety zone. The goal of the secondary fuel break is to reduce fuels so that the overall intensity of any wildfire would be lessened and the likelihood of crown fires and crowning is reduced. Vegetation within the secondary fuel break shall be pruned and spaced so that fire will not spread between crowns of trees. Small trees and brush

growing underneath larger trees shall be removed to prevent spread of fire up into the crowns of the larger trees. Dead fuels shall be removed.

Finding 14: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be located in a level area that contains slopes of less than 10-percent within 30 feet of the dwelling. There is sufficient area surrounding the dwelling to establish the required primary and secondary fuel breaks in all directions around the dwelling. ***As a condition of approval, primary and secondary fuel breaks shall be established and maintained. The minimum primary fuel break shall extend 30 feet in all directions around the dwelling. The minimum secondary fuel break shall extend 100 feet in all directions around the dwelling. All fuel breaks must be maintained in perpetuity.***

(ii) Structural Fire Protection. The dwelling or manufactured dwelling shall be located upon a parcel within a fire protection district or shall be provided with residential fire protection as evidenced by a long term contract with a fire protection district (FPD) recorded in Lane County Deeds and Records. If the dwelling or manufactured dwelling are not within a FPD, the applicant shall provide evidence that the applicant has submitted a written request for a long term services contract with the nearest FPD and to be annexed into the FPD boundaries. If the FPD and the Planning Director determine that inclusion within a FPD or contracting for residential fire protection is impracticable, the Planning Director shall require as a condition of approval for the dwelling or manufactured dwelling that the property owner implement and maintain a Fire Protection Plan as an alternative means for protecting the dwelling or manufactured dwelling from fire hazards, consistent with the following standards:

Finding 15: Staff finds the subject proposal meets this criterion. The subject property is located within the Hazeldell Rural Fire District.

(iii) Chimneys and Roofs. Dwellings, manufactured dwellings or structures with any chimneys shall have a spark arrestor on the chimneys. All habitable roofed structures shall be regulated by the State of Oregon Structural Specialty Code or the State of Oregon One and Two Family Specialty Code. Roofing for dwellings and manufactured dwellings shall be asphalt shingles in accordance with Section 903, slate shingles in accordance with Section 904, metal roofing in accordance with Section 905, tile, clay or concrete shingles in accordance with Section 907 and other approved roofing which is deemed to be equivalent to Class C rated roof covering. Wood shingles and shake roofs are not permitted. When 50 percent or more of the roof covering of any one or two family dwelling or manufactured dwelling is repaired or replaced in one year, the roof covering shall be made to comply with this section.

Finding 16: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, wood shingles, wood shakes, or shingles made from wood products for use as roof covering materials for dwellings and accessory structures are prohibited. Such use is a violation of ORS 215.730(1)(b)(A) and subject to civil penalties as contained in Chapter 5, Lane Code. This provision applies to new roofs, reinstallation of roofs, and repair of roofs. Building plans for the proposed dwelling shall meet this requirement. Compliance with this requirement shall be field verified by Land Management Division staff.***

(d) **Domestic Water Supplies. Evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629. If the water supply is unavailable from public sources or sources located entirely on the property, then the applicant shall provide evidence that a legal easement has been obtained permitting domestic water lines to cross the properties of affected owners. For purposes of LC 16.211(8)(d) above, evidence of domestic water supply means:**

(i) **Verification from a water purveyor that the use described in the application will be served by the purveyor under the purveyor's rights to appropriate water; or**

(ii) **A water use permit issued by the Water Resources Department for the use described in the application; or**

(iii) **Verification from the Water Resources Department that a water use permit is not required for the use described in the application. If the proposed water supply is from a well and is exempt from permitting requirements under ORS 537.545, the applicant shall submit the well constructor's report to the Department upon completion of the well.**

Finding 17: Staff finds that it is feasible for the subject proposal to meet this criterion. The applicant stated that domestic water supply is to be provided by a new well. ***As a condition of approval, evidence shall be provided that the domestic water supply is from a source authorized in accordance with the Water Resources Department's administrative rules for the appropriation of ground water or surface water and not from a Class II stream as defined in the Forest Practices Rule, OAR Chapter 629.***

(e) **Fire Safety Design Standards for Roads and Driveways. Private driveways, roads or bridges accessing only commercial forest uses are not subject to compliance with these fire safety design standards for roads and driveways. The route of access for fire fighting equipment, from the fire station to the destination point, across public roads, bridges, private roads or private access easements and driveways shall comply with the standards specified below in LC 16.211(8)(e). Evidence of compliance with the standards specified in LC 16.211(8)(e) below should include objective information about the fire fighting equipment, the physical nature of the access route, the nature of any proposed improvements to the access route, and it may also include a written verification of compliance from the agency providing fire protection, or a written certification of compliance from an Oregon Registered Professional Engineer. As used herein, "road" means a way of access used for more than one use and accessory uses dwelling or manufactured dwelling. As used herein, "driveway" means a way of access used for only one dwelling or manufactured dwelling.**

(i) **Road and Driveway Surfaces. Roads shall have unobstructed widths of at least 20 feet including: travel surfaces with widths of at least 16 feet constructed with gravel to a depth sufficient to provide access for fire fighting vehicles and containing gravel to a depth of at least six-inches or with paving having a crushed base equivalent to six inches of gravel, an unobstructed area two feet in width at right angles with each side of the constructed surface, curve radii of at least 50 feet, and a vertical clearance of at least 13 feet 6 inches. Driveways shall have: constructed widths of at**

least 12 feet with at least six inches of gravel or with paving having a crushed base equivalent to six inches of gravel and shall have a vertical clearance of 13 feet 6 inches.

Finding 18: Staff finds that it is feasible for the subject proposal to meet this criterion. The subject property is accessed from Airport Road by an existing private road and driveway. ***As a condition of approval, the length of the private road and driveway, from the Airport Road right-of-way to the proposed dwelling, shall be constructed to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director.***

(ii) Turnarounds. Any dead-end road over 200 feet in length and not maintained by Lane County shall meet these standards for turnarounds. Dead-end roads shall have turnarounds spaced at intervals of not more than 500 feet. Turnarounds shall comply with these design and construction standards:

(aa) Hammerhead Turnarounds. Hammerhead turnarounds (for emergency vehicles to drive into and back out of to reverse their direction on the road) shall intersect the road as near as possible at a 90 degree angle and extend from the road at that angle for a distance of at least 20 feet. They shall be constructed to the standards for driveways in LC 16.211(8)(e)(i) above and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; or

(bb) Cul-de-sac Turnarounds. Cul-de-sac turnarounds shall have a right-of-way width with a radius of at least 45 feet and an improved surface with a width of at least 36 feet and shall be marked and signed by the applicant as "NO PARKING." Such signs shall be of metal or wood construction with minimum dimensions of 12 inches by 12 inches; and

(cc) No cul-de-sacs or hammerhead turnarounds shall be allowed to cross any slope which will allow chimney-effect draws unless the dangerous effects of the chimney-effect draws have been mitigated by the location of the road and, where necessary, by the creation of permanent fire breaks around the road.

Finding 19: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be accessed from Airport Road by a private road. The private road does not appear to exit onto any other roads and is therefore considered to be a dead-end road. ***As a condition of approval, the length of the private road and driveway, from the Airport Road right-of-way to the proposed dwelling, shall be constructed to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director.***

(iii) Bridges and Culverts. Bridges and culverts shall be constructed to sustain a minimum gross vehicle weight of 50,000 lbs. and to maintain a minimum 16-foot road width surface or a minimum 12-foot driveway surface. The Planning Director may allow a single-span bridge utilizing a converted railroad flatcar as an alternative to the road and driveway surface width requirements, subject to

verification from an engineer licensed in the State of Oregon that the structure will comply with the minimum gross weight standard of 50,000 lbs.

Finding 20: This criterion does not apply to the subject proposal. The existing private road and driveway do not contain bridges or culverts. No bridges and culverts are proposed. A neighboring property owner commented that improvements are needed to control runoff from the existing private road. Staff recommends that, prior to making any access improvements, an engineer evaluate the existing road and drainage patterns to determine if and what measures need to taken to control runoff (e.g., installation of culverts).

(iv) Road and Driveway Grades. Road and driveway grades shall not exceed 16 percent except for short distances when topographic conditions make lesser grades impractical. In such instances, grades up to 20 percent may be allowed for spans not to exceed 100 feet. An applicant must submit information from a Fire Protection District or engineer licensed in the State of Oregon demonstrating that road and driveway grades in excess of eight percent are adequate for the fire fighting equipment of the agency providing fire protection to access the use, fire fighting equipment and water supply.

Finding 21: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, information shall be provided from the Hazeldell Rural Fire District demonstrating that the roads and driveway leading from the fire station to the dwelling are adequate for fire fighting equipment to access the use, fire fighting equipment and water supply; or written documentation from an Oregon Registered Professional Engineer shall be submitted that states the roads and driveway meet the requirements of LC 16.211(8)(e)***

(v) Identification. Roads shall be named and addressed in compliance with LC 15.305 through 15.335.

Finding 22: Staff finds that it is feasible for the subject proposal to meet this criterion. The proposed dwelling is to be accessed from an existing unnamed private road that provides access to more than three parcels. It is County policy to require the naming of a private road when more than three uses/parcels are served. ***As a condition of approval, the private road is required to be named. The road name should not duplicate existing road names, or be similar sounding, or confusing. Upon approval of the road name, a road name sign shall be installed at the intersection of the private road and Airport Road. The road name shall be stated on the site plan. Addressing requirements shall be addressed as part of the building permit process.***

(vi) Driveway Vehicle Passage Turnouts. Driveways in excess of 200 feet shall provide for a 20-foot long and eight-foot wide passage space (turn out) with six inches in depth of gravel and at a maximum spacing of 400 feet. Shorter or longer intervals between turnouts may be authorized by the Planning Director where the Director inspects the road and determines that topography, vegetation, corners or turns obstruct visibility.

Finding 23: Staff finds that it is feasible for the subject proposal to meet this criterion. The subject property is accessed from Airport Road by an existing private road and driveway, which exceeds 200 feet in length. ***As a condition of approval, the length of the private road and driveway, from the Airport***

002200

Road right-of-way to the proposed dwelling, shall be constructed to the minimum standards of Lane Code 16.211(8)(e). Written certification of compliance from an Oregon Registered Professional Engineer may be required at the discretion of the Planning Director.

(vii) Modifications and Alternatives. The standards in LC 16.211(8)(e)(i) through (vi) above may be modified by the Approval Authority provided the applicant has submitted objective evidence demonstrating that an alternative standard would insure adequate access for fire fighting equipment from its point of origination to its point of destination.

Finding 24: This criterion does not apply to the subject proposal. The applicant did not request modification of the standards in LC 16.211(8)(e)(i) through (vi).

VI. OTHER DEVELOPMENT STANDARDS

Lane Code 16.246, Airport Safety Combining Zone:

3. Use Limitations. In a /AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

a. The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

Finding 25: Staff finds that it is feasible for the subject proposal to meet this criterion. The subject property is located within the Transitional Surface (LC 16.246(5)(e)):

These surfaces extend outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of one horizontal foot to seven vertical feet to their intersection with the Horizontal Surface. This surface extends to a height of 150 feet above the runway.

The southern boundary of the proposed building site is located approximately 300 feet north of the Primary Surface of the Oakridge Airport. Using a ratio of one horizontal foot to seven vertical feet, staff determined the height of the dwelling is limited to 2100 feet above sea level. The Transitional Surface, however, is limited to a height of 150 feet above the runway. Per LC 16.246(2)(d), the elevation of the Oakridge runway is 1419 feet above sea level. The Transitional Surface extends to a height of 1569 feet above sea level (1419 + 150 = 1569). The applicant documented that the elevation of the proposed building site is 1421 feet above sea level. Accordingly, the height of the dwelling shall not exceed 148 feet (1569 – 1421 = 148), a height much greater than the 35 feet proposed by the applicant. ***As a condition of approval, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface.***

b. All structures and uses within the /AS-RCP Zone shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor. No use may be made of land or water in such a manner as to create electrical interference with navigation signals or radio

002201

communication between the airport and aircraft, making it difficult for pilots to distinguish between airport lights and others, resulting in glare in the eyes of pilots using the airport, impairing visibility in the vicinity of the airport, or otherwise in any way endangering the landing, take off or maneuvering of aircraft intending to use the airport.

c. All structures and uses within this combining district shall conform to the requirements of Federal Aviation Regulations, Part 77 or successor, and to other Federal and State laws as supplemented by Lane County ordinances, particularly Lane County Ordinance No. 105, or successor, regulating structure height, lights, glare producing surfaces, radio interference, smoke, steam or dust, and other hazards to flight, air navigation or public health, safety and welfare.

Finding 26: Staff finds that it is feasible for the subject proposal to meet this criterion. ***As a condition of approval, all structures and uses shall comply with LC 16.246(3)(b) and (c).***

Lane Code Chapter 15, Access Requirements:

Per referral response from Lane County Transportation Planning (Exhibit E):

Access to the proposed dwelling is from Airport Road via a private access easement across Map 21-35-07-40 Tax lot 133, and Map 21-25-12-00 Tax Lot 843.

Airport Road is a Lane County maintained rural road (LCR). It is functionally classified as a Local road having a minimum right-of-way width of 50 feet for development setback purposes [LC 15.070(1)(c)(i)(gg)].

LC 15.055 - Minimum Requirements for Private Access Easements

(4) The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.

(5) All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.

(6) Development on a lot or parcel taking access over a railroad or limited access road right-of-way may require documentation that permanent or long term access over the railroad or limited access road meeting the requirements of this section has been granted.

(7) Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.

(8) The County may require that at the entrance to a Private Access Easement road a sign be posted at private expense stating the name of the private road and the words "Private Road, Not Dedicated for Public Use or Maintained by Lane County."

LC 15.055(2)(c), "...lands within a Forest Zone shall be governed by the siting and development standards of the applicable zoning district."

Transportation Planning defers to Land Management to ensure that the easement meets Forest Zone requirements from Airport Road to the proposed dwelling.

In accordance with Lane Manual Chapter 15.515, storm water run off from private property shall not be directed to the Lane County road right-of-way, or into any Lane County drainage facility, including roadside ditches. Ditches adjacent to County roads are designed solely to accommodate roadway storm water run off.

A facility permit could not be found for the easement approach connection to Airport Road. A facility permit is required for the easement approach connection.

LANE COUNTY FACILITY PERMIT
A Facility Permit shall be required for placement of facilities within the right-of-way of Airport Road. Facilities and development includes, but is not limited to, road improvements, sidewalks, new or reconstructed driveway or road approach intersections, utility placements, excavation, clearing, grading, culvert placement or replacement, storm water facilities, or any other facility, thing, or appurtenance [LC 15.205(1)].

VII. DECISION

Based upon the findings above and the required conditions of approval, staff finds the applicant's request for approval of a dwelling in the Impacted Forest Lands Zone (F-2, RCP) to be consistent with applicable requirements of Lane Code 16.211(5) and 16.211(8). The applicant's request is **approved** subject to the Conditions of Approval stated in Exhibit A.

Owner: Edward J. King
Location: Airport Road, Oakridge, OR
TRS: 21-35-07-30
Tax Lot: 2900

Proposal: Template Dwelling approval in the Impacted forest Lands Zone (F-2, RCP)

Comments from Lane County Transportation Planning:
Access to the proposed dwelling is from Airport Road via a private access easement across Map 21-35-07-40 Tax lot 133, and Map 21-25-12-00 Tax Lot 843.

Airport Road is a Lane County maintained rural road (LCR). It is functionally classified as a Local road having a minimum right-of-way width of 50 feet for development setback purposes [LC 15.070(1)(c)(i)(gg)].

LC 15.055 - Minimum Requirements for Private Access Easements

(4) The minimum width for private access easement shall be of a width determined by the County suitable for the intended use, but in no case less than 30 feet. Notwithstanding this requirement, a pre-existing easement of at least 20 feet in width and serving a lot or parcel created in its present configuration prior to April 28, 2004 is allowable provided it complies with other requirements of this chapter.

(5) All approved documents creating a private access easement shall provide for the installation, construction and maintenance thereof of all utilities and facilities which are now or may in the future be needed for the area abutting the road and the surrounding area.

(6) Development on a lot or parcel taking access over a railroad or limited access road right-of-way may require documentation that permanent or long term access over the railroad or limited access road meeting the requirements of this section has been granted.

(7) Any easement approved as a private access easement shall be an affirmative, perpetual easement appurtenant to the property that will be served by the easement, and contain at a minimum the names of grantor and grantee, the description of the land covered by the easement, a description of the lot(s) or parcel(s) to be served by the easement, a description of the intent or purpose of the easement and a statement of maintenance responsibility. All approved easements shall be recorded.

(8) The County may require that at the entrance to a Private Access Easement road a sign be posted at private expense stating the name of the private road and the words "Private Road, Not Dedicated for Public Use or Maintained by Lane County."

LC 15.055(2)(c), "...lands within a Forest Zone shall be governed by the siting and development standards of the applicable zoning district."

EXHIBIT E

Transportation Planning defers to Land Management to ensure that the easement meets Forest Zone requirements from Airport Road to the proposed dwelling.

In accordance with Lane Manual Chapter 15.515, storm water run off from private property shall not be directed to the Lane County road right-of-way, nor into any Lane County drainage facility, including roadside ditches. Ditches adjacent to County roads are designed solely to accommodate roadway storm water run off.

A facility permit could not be found for the easement approach connection to Airport Road. A facility permit is required for the easement approach connection.

LANE COUNTY FACILITY PERMIT

A Facility Permit shall be required for placement of facilities within the right-of-way of Airport Road. Facilities and development includes, but is not limited to, road improvements, sidewalks, new or reconstructed driveway or road approach intersections, utility placements, excavation, clearing, grading, culvert placement or replacement, storm water facilities, or any other facility, thing, or appurtenance [LC 15.205(1)].

Please contact 541-682-6902 or visit http://www.lanecounty.org/Departments/PW/Engr/RightofWay/Pages/rowpermits.aspx for information about facility permits.

RE: PA 10-5486 & PA 10-5484

Dear Ms. Wilkinson:

The Bonneville Power Administration (BPA) has reviewed the dwelling proposal and its relationship to the BPA transmission line easement and access road easements that this proposal impacts. PA 10-5484 makes use of the BPA access road for the driveway and while there is no objection to this use **BPA would like to work with the landowner to locate the dwelling so it does not interfere with BPA's use of the access road**. BPA would like the following statement included on the final decision to help ensure public safety and reliable operation of BPA's facilities:

> Portions of tax lots 2800 & 2900 are encumbered by an easement for high-voltage transmission lines and an access road easement. These easements grant certain rights to BPA and limit the landowner's use within the easement area. A portion of BPA's rights include the right of ingress and egress, and the right to keep the easements free and clear of vegetation and buildings, sheds, fences, roads or any other type of structure. All activities planned within the BPA easement need to be reviewed by BPA prior to their occurrence. Do not build, dig or plant within the easement area without first contacting BPA. Requests for information regarding the process for reviewing proposed uses of the easement may be addressed to Bonneville Power Administration, Real Estate Field Services, 86000 Highway 99 South, Eugene, OR 97405.

EXHIBIT H

Applications must be submitted to BPA for any use proposed within the rights-of-way. BPA would like to stress that **no dwellings or portions of dwellings are allowed within the transmission line and access road easement areas**. Please be sure the dwelling applicant and landowner are aware of this information and receive a copy of the above statement. Your cooperation in this matter is greatly appreciated and helps minimize later disputes or unnecessary strained relationships with the public when incompatible activities have to be modified or removed from the easement. If you have questions regarding this request or need additional information please feel free to contact me.

You may direct any communication to this office, at the address in the letterhead, by telephoning 541-988-7432 or 1-800-282-3713 for more information.

Thank you for the opportunity to comment on this proposal.

Sincerely,

Dustin Smith

Notice of REVISION of Land Use Decision
By The Lane County Planning Director

LAND MANAGEMENT DIVISION
http //www LaneCounty org/PW_LMD/

Mailing Date:	1-4-11
Department File:	PA 10-5484
Property Owner:	E.J.K. Investments, LLC
Applicant:	Nickell Land Surveying & Planning, LLC
Assessor's Map & Tax Lot:	21-35-07-30-02900
Address or Location:	Airport Road, Oakridge, OR
Acreage:	12 05 acres
Base Zone:	Impacted Forest Lands (F-2, RCP)
Combining Zone(s):	Airport Safety Combining Zone (/AS-RCP)
Comprehensive Plan:	Lane County Rural Comprehensive Plan (/RCP)

You own or occupy property near the above referenced property that is the subject of a revision to a conditional approval of a land use application by the Lane County Planning Director.

Notice to mortgagee, lien holder, vendor or seller: ORS Chapter 215 requires that if you receive this notice, it must be forwarded to the purchaser.

The purpose of this notice is to inform you about the proposal and pending decision, where you may receive more information and the requirements if you wish to appeal the pending decision by the Director to the Lane County Hearings Official. Any person who is adversely affected or aggrieved or who is entitled to written notice may appeal the decision by filing a written appeal in the manner and within the time period as provided below. Mailing of this notice to you precludes an appeal directly to the Land Use Board of Appeals.

PROPOSAL: On December 22, 2011, the Planning Director conditionally approved the subject application that requested Director approval of a dwelling in the Impacted Forest Lands Zone (F-2, RCP) pursuant to the "Template Dwelling" provisions of Lane Code 16.211(5) and Lane Code 16.211(8). On January 3, 2011, at 5:00 P.M., the decision became final. It was brought to staff's attention that Condition of Approval No. 9 of the decision is inaccurate as it is based upon Lane Code 16.246(5)(e), which contains a typographical error. Accordingly, staff revised Finding No. 25 of the Staff Report and Condition of Approval No 9, as detailed below. Deletions of the text are indicated with ~~strikethrough~~. Additions to the text are indicated with **bold underlined**. All other Conditions of Approval contained in the decision issued December 22, 2010, continue to apply. Please note that as the conditional approval of the subject application is a final decision, only the revisions contained in this notice may be appealed.

Finding No. 25 is revised as follows:

(The code language is in boldface type, followed by the finding of fact.)

Lane Code 16.246, Airport Safety Combining Zone:

3. Use Limitations. In a /AS-RCP Zone, the following limitations and standards shall apply to all uses permitted, allowed conditionally or allowed as special uses by the primary zone with which the /AS-RCP Zone is combined.

a. The height of structures or objects shall not exceed the maximum height of the primary zone with which the /AS-RCP Zone is combined. Furthermore, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the surfaces described in LC 16.246(5) below. Areas located in more than one of the described surfaces shall be subject to the most restrictive (i.e., lowest) surface.

Finding 25: Staff finds that it is feasible for the subject proposal to meet this criterion. The subject property is located within the Transitional Surface (LC 16.246(5)(e)):

These surfaces extend outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of one horizontal foot to seven vertical feet to their intersection with the Horizontal Surface. This surface extends to a height of 150 feet above the runway.

~~The southern boundary of the proposed building site is located approximately 300 feet north of the Primary Surface of the Oakridge Airport. Using a ratio of one horizontal foot to seven vertical feet, staff determined the height of the dwelling is limited to 2100 feet above sea level. The Transitional Surface, however, is limited to a height of 150 feet above the runway. Per LC 16.246(2)(d), the elevation of the Oakridge runway is 1419 feet above sea level. The Transitional Surface extends to a height of 1569 feet above sea level (1419 + 150 = 1569). The applicant documented that the elevation of the proposed building site is 1421 feet above sea level. Accordingly, the height of the dwelling shall not exceed 148 feet (1569 – 1421 = 148), a height much greater than the 35 feet proposed by the applicant.~~

LC 16.246(5)(e) contains a typographical error. Per LC 16.246(9) and OAR 660-013-0070(1)(a), the Transitional Surface extends outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of seven horizontal feet to one vertical foot to the intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above the runway. The applicant documented that the proposed dwelling is to be located 365 feet from the edge of the Primary Surface. Accordingly, the height of the dwelling is not to penetrate 1471 feet above sea level, which is equivalent to 52 feet (365 ÷ 7 = 52) above the elevation of the Primary Surface (1419 feet above sea level). The applicant documented that the elevation of the proposed dwelling site is 1421 feet above sea level. Accordingly, the height of the dwelling shall not exceed 50 feet (1471 – 1421 = 50). As a condition of approval, no structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface.

Condition of Approval No. 9 is revised as follows:

9. No structure or object shall be erected, altered, allowed to grow or be maintained in such a manner as to penetrate the Transitional Surface. ~~In regard to the subject property, the Transitional Surface is limited to a height of 150 feet above the runway (Elev. 1419 feet above sea level), which is equivalent to 1569 feet above sea level (1419 + 150 = 1569). The applicant documented that the elevation of the proposed home site is 1421 feet above sea level. Accordingly, the height of the structures or objects within the home site shall not exceed 148 feet (1569 – 1421 = 148).~~ **Per LC 16.246(5)(e) and 16.246(9), the Transitional Surface extends outward at 90 degree angles from the sides of the Primary Surface and Approach Surface at a slope of seven horizontal feet to one vertical foot to the intersection with the Horizontal Surface. The Transitional Surface extends to a height of 150 feet above the runway. The applicant documented that the proposed dwelling is to be located 365 feet from the edge of the Primary Surface. Accordingly, the height of the dwelling is not to penetrate 1471 feet above sea level, which is equivalent to 52 feet (365 ÷ 7 = 52) above the elevation of the Primary Surface (1419 feet above sea level). The applicant documented that the elevation of the proposed dwelling site is 1421 feet above sea level. Accordingly, the height of the dwelling shall not exceed 50 feet (1471 – 1421 = 50).**

Enclosed is a site plan of the subject property.

The proposed use that could be authorized by approval of this land use decision: Revision to Finding No. 25 and Condition of Approval No. 9 of PA 10-5484.

The application, all documents and evidence relied upon by the applicant, the applicable criteria, and a copy of the Lane County Planning Director's report are available for inspection at the Lane County Land Management Division at no cost, and copies will be provided at reasonable cost. The name of the Lane County Land Management Division representative to contact is **Sarah Wilkinson** and the telephone number where more information can be obtained is **541-682-4054**.

This decision will become final at 5 P.M. on 1-18-11 unless before this time a completed **APPLICATION FOR AN APPEAL OF A DECISION BY THE PLANNING DIRECTOR** form is submitted to and received by the Lane County Land Management Division. **This form is enclosed and must be used if you wish to appeal this decision.**

1. To complete this form, fill in the required information and attach to it all of the materials and information required in numbers 2, 3 and 6 of the appeal form.
2. Then, submit the completed form to Lane County Planning Director so that it is received by him or her prior to the above-mentioned time that the decision becomes final.
3. The Lane County Planning Director shall reject an appeal if it is not received prior to the time that the decision becomes final or if it is not complete.

Failure of an issue to be raised in a hearing, in person or in writing, or failure to provide statements of evidence sufficient to afford the Approval Authority an opportunity to respond to the issue precludes raising the issue in an appeal to the Land Use Board of Appeals.

LANE COUNTY BUILDING PERMIT

lane county

POST THIS PERMIT ON MAIN BUILDING AT SITE

CONSTRUCTION PERMIT # LC 2322-80 (MH)

JOB ADDRESS: 47022 Airport Road, Oakridge

TRS, TL: 21-35-18 TLN # 901 Now #913

SUBDIVISION: N/A

CONSTRUCTION APPROVED BY THIS PERMIT: Double wide mobile home 1980 Sunnybrook 28 x 66 and install Sewage Disposal System

CONDITIONS OF APPROVAL: Minimum Structural Setbacks: center line of road, front-50', interior property lines-15', rear property lines-20'

Footings and piers to comply with State foundation requirements for mobile homes or as recommended by the manufacturer. Provide skirting per enclosure, skirting shall be installed and ready for inspection within at least 30 days of occupancy.

Maintain 100' setback (minimum) from drainlines and well; Septic tank must be 50' from well. Install in area shown on plot plan (approved 9/15/80). Use equal distribution.

PERMITTEE: Gloria Nelson

DATE ISSUED: September 22, 1980

BY: Carol Dyal/John Smeed/Colleen Allison

DIRECTIONS TO SITE: See Don Stewart, this application was taken in the field.

Setbacks - Subsurface Sewage Disposal

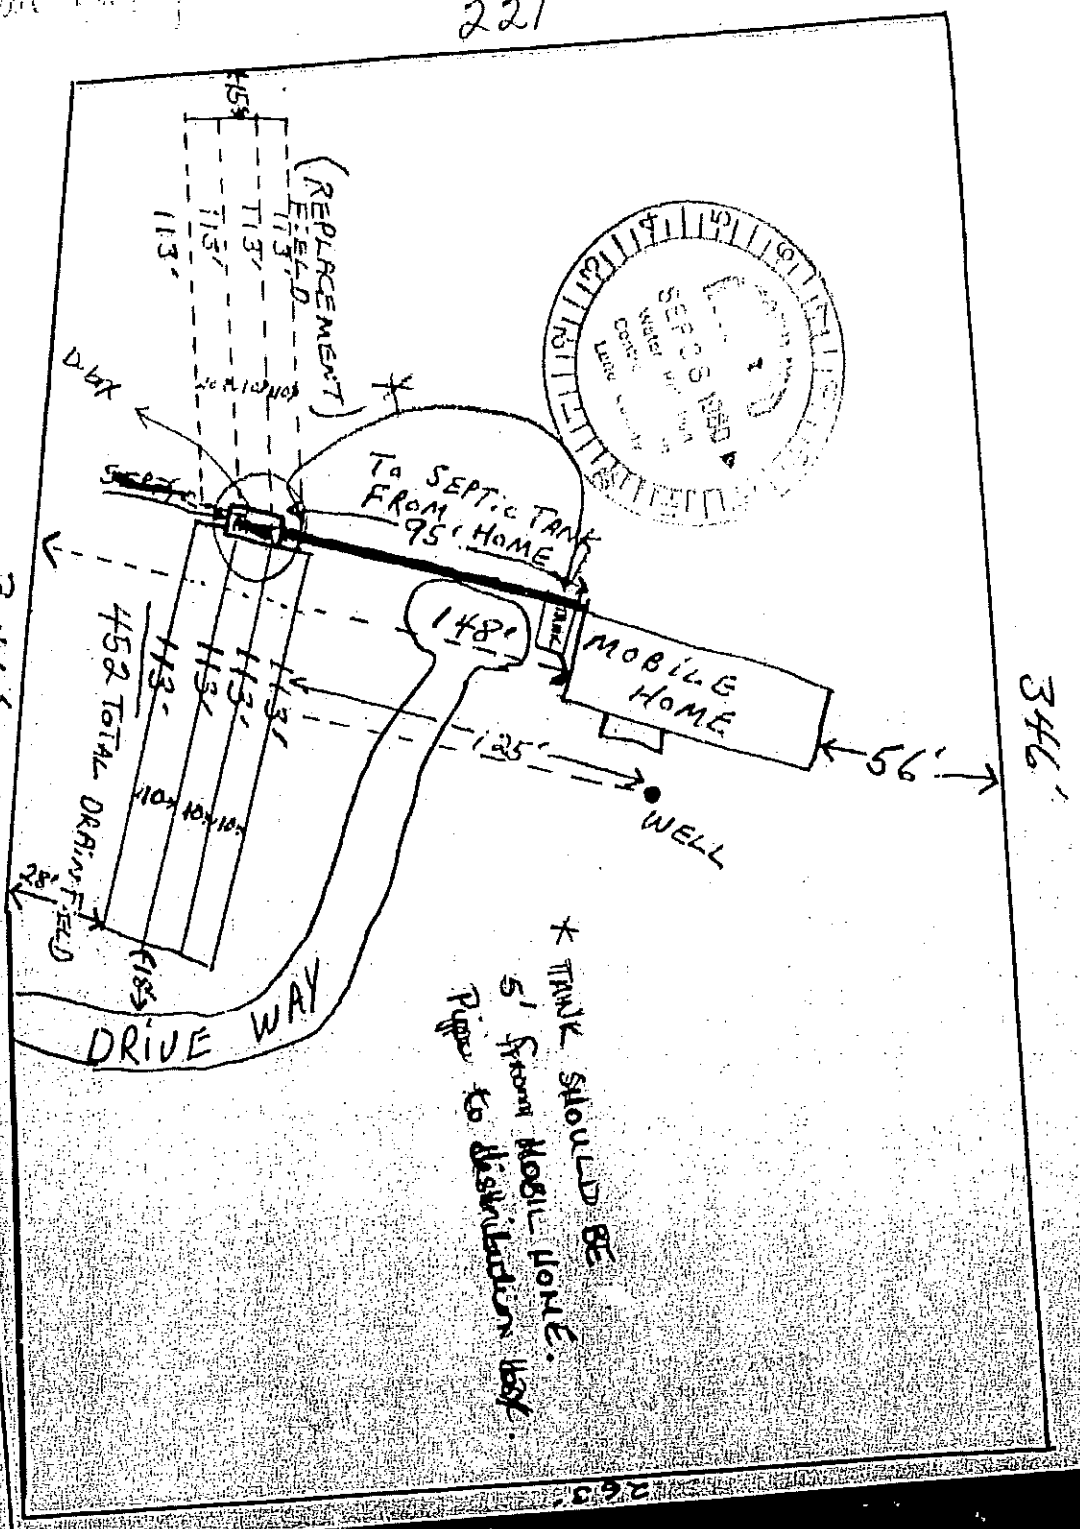
From:	Septic Tank	Drainfield
Interior property lines	10'	10'
Edge of road right-of-way	10'	10'
Building foundation	5'	10'
Wells, other water sources	50'	100'

Existing or new SDS specifications:

1000 gal. min. tank;

450 feet of drainfield

24-30" max. depth of trenches



********** SETBACKS AND OTHER CONDITIONS OF APPROVAL MUST BE STRICTLY OBSERVED. VIOLATION CAN RESULT IN REVOCATION OF THIS PERMIT, CITATION UNDER PROVISIONS OF LANE COUNTY'S INFRACTION ORDINANCE, AND/OR OTHER REMEDIES ALLOWED BY LAW.

WHEN READY FOR INSPECTION (see reverse side) call 687-4065. Have the following information ready: Permit number, job address, type of inspection, when it will be ready, your name and phone number, and any special directions to site.

LAND MANAGEMENT DIVISION

Waiver/Extension of Statutory Timeline Requirements

Instructions: To waive or extend the statutory timeline requirements applicable to your land use application, please complete all applicable fields, sign, date, and return this form to the address listed below.

I, Kim O'Dea, Law Office of Bill Kloos, as owner or authorized representative of the owner of
Applicant (Print Name)
the property known as Assessor's Map and Tax Lot(s) 21-35-07-30 #2900 that is the subject of the land use application Department File Number 509-PA20-05064 and is the subject of this request, do hereby voluntarily **(Check Only One Box)**:

☐ **Waive** the statutory timeline requirements of ORS 215.427, including any rights to a refund as provided for by ORS 215.427(8), and the associated right to seek mandamus as provided for by ORS 215.429(1). Furthermore, I hereby voluntarily request that the County delay processing of the application until

_____.
(Enter M/D/Y or "/NA" If No Delay Requested)

☒ **Extend** the statutory timeline requirements of ORS 215.427 for 14 days[1] in order to submit
(Enter # Calendar Days)
additional information. Furthermore, I do hereby voluntarily request that the County delay processing of the application for the same number of days. **(check box):** ☒ **Yes** ☐ **No**

It is the County's position that:

1) By signing this form, I am making an irrevocable decision to extend/waive the statutory timeline requirements of ORS 215.427. I may not change my mind later except by withdrawing my application, filing a new application, and paying the associated fees.
2) This statutory timeline waiver/extension is given freely and without compulsion by the County, and is not conditioned on any County action apart from granting the delay requested for processing the application, if any.
3) I may request that the County resume processing my application at any time and understand that any such request has no effect on the statutory timeline extension/waiver granted.
4) Lane County is not obligated to accept this statutory timeline waiver/extension request.

_____ 11/16/20

Signature (Authorized Representative/Owner) **Date Signed**

Return to: **Lane County – Public Works**
Land Management Division
3050 N. Delta Hwy.
Eugene, OR 97408

[1] Per ORS 215.427(5), the total period of time an application can be put on hold and final action timeline extended by an applicant may not exceed 215 days, except as provided in ORS 215.427(10). Additionally, unless a hold on processing the application is expressly requested in conjunction with a timeline waiver/extension request and accepted by County staff, the County reserves the right to resume processing the application at any time.

(Version 4/20)

LAND MANAGEMENT DIVISION

Waiver/Extension of Statutory Timeline Requirements

Instructions: To waive or extend the statutory timeline requirements applicable to your land use application, please complete all applicable fields, sign, date, and return this form to the address listed below.

I, Kim O'Dea, Law Office of Bill Kloos, as owner or authorized representative of the owner of
Applicant (Print Name)
the property known as Assessor's Map and Tax Lot(s) 21-35-07-30 #2900 that is the subject of the land use application Department File Number 509-PA20-05064 and is the subject of this request, do hereby voluntarily **(Check Only One Box)**:

☐ **Waive** the statutory timeline requirements of ORS 215.427, including any rights to a refund as provided for by ORS 215.427(8), and the associated right to seek mandamus as provided for by ORS 215.429(1). Furthermore, I hereby voluntarily request that the County delay processing of the application until _____.
(Enter M/D/Y or "/NA" If No Delay Requested)

☒ **Extend** the statutory timeline requirements of ORS 215.427 for 45 days[1] in order to submit
(Enter # Calendar Days)
additional information. Furthermore, I do hereby voluntarily request that the County delay processing of the application for the same number of days. **(check box):** ☒ **Yes** ☐ **No**

It is the County's position that:

1) By signing this form, I am making an irrevocable decision to extend/waive the statutory timeline requirements of ORS 215.427. I may not change my mind later except by withdrawing my application, filing a new application, and paying the associated fees.
2) This statutory timeline waiver/extension is given freely and without compulsion by the County, and is not conditioned on any County action apart from granting the delay requested for processing the application, if any.
3) I may request that the County resume processing my application at any time and understand that any such request has no effect on the statutory timeline extension/waiver granted.
4) Lane County is not obligated to accept this statutory timeline waiver/extension request.

_____ 8/18/20

Signature (Authorized Representative/Owner) **Date Signed**

Return to: **Lane County – Public Works**
Land Management Division
3050 N. Delta Hwy.
Eugene, OR 97408

[1] Per ORS 215.427(5), the total period of time an application can be put on hold and final action timeline extended by an applicant may not exceed 215 days, except as provided in ORS 215.427(10). Additionally, unless a hold on processing the application is expressly requested in conjunction with a timeline waiver/extension request and accepted by County staff, the County reserves the right to resume processing the application at any time.
